Engineering Alloys

Engineering Alloys

FIFTH EDITION

Edited by

Norman E. Woldman, Ph.D.

Consulting Metallurgical Engineer
and Editor of "Alloy Digest"
Formerly Chief Metallurgical Engineer, Bendix Aviation Corporation;
Senior Materials Engineer and Director of Research, United States Naval Gun Factory
Research Metallurgical Engineer, Westinghouse Electric Corp.;
Professor and Head of Department of Metallurgy and Chemistry,
United States Naval Academy Graduate School.
Professor of Metallurgy
Stevens Institute of Technology,
Graduate School

and

Robert C. Gibbons, M.S.

Formerly Chief Metallurgist, Utica Division
The Bendix Corp.

Preface to Fifth Edition

Since publication of the Fourth Edition in 1962 a number of changes have taken place. The major one, as far as this book is concerned, was the death of Norman E. Woldman late in 1969. Dr. Woldman had developed Engineering Alloys through four editions to the high standard that made it a world wide valuable publication. He was at work gathering data for the Fifth Edition at the time of his death. His general knowledge, initiative and organizing ability will be greatly missed.

As an old friend and former co-worker I was asked to finish the revision of the Fifth Edition along the lines he had planned. This involved several procedures to permit the maximum number of alloy entries with a minimum increase in the number of pages.

1. Eliminate the obsolete and discontinued alloys. This has been largely done but a list of the discontinued alloys is given in Section IV along with the code number of the supplier so that if any information on these alloys is required a reference can be made to the source.
2. Eliminate the Alphabetical Index, formerly Section II and put all alloy listings in alphabetical order. This leaves room for many new alloys.
3. Weed out and eliminate a number of duplicate listings.

An additional number of alloys and suppliers is included, and many alloys have been revised and brought up to date. Over 10,000 new or revised alloys are listed.

One trend among suppliers has been noted and that is the tendency to drop certain trade names and go to numbers corresponding to Trade Association standards, particularly Copper Development Association, American Iron and Steel Institute, and the Aluminum Association. This was a major reason for updating many alloy names, and also a reason for many suppliers, particularly foundries, in ceasing to use proprietary names.

Because of this trend an additional section has been added listing some of these association alloys, mainly for composition but also for some mechanical properties. It should be noted that these lists change from year to year.

I wish to express appreciation to The Aluminum Association, American Iron and Steel Institute, American Society for Testing and Materials, Copper Development Association, and Society of Automotive Engineers, Inc. for permission to use some of their charts and tables I also wish to express appreciation to my wife, Mildred, for aid and assistance in the arduous task of alphabetizing.

Robert C. Gibbons

Preface to Fourth Edition

Since the publication of the Third Edition in 1952 over 15,000 additional proprietary alloys have been accumulated from sources throughout the world, making a grand total of over 35,000 alloys for the newly revised Fourth Edition. Publication rights to the Fourth Edition have been transferred from the American Society for Metals to the Reinhold Publishing Corporation to take advantage of their international sales capabilities.

As in the previous editions, obsolete and discontinued proprietary alloys have been retained not only for historical value but because many of these alloys can still be found on metal fabricators' and consumers' blueprints and specifications. And, although not necessarily a standard or active product with the alloy mill, the alloy or alloys may continue to be made by the respective mills if ordered in mill lots.

The data and information on all the alloys were brought up to date by sending tear sheets from the Third Edition to all the ferrous and non-ferrous alloy manufacturers, with the request that they make the necessary corrections, changes and additions for their own alloys and submit the approved copies to the author. All these corrections and changes have been incorporated in the Fourth Edition.

The format of the Fourth Edition has been changed to enable the author to include more useful information on the alloys. Instead of the previous tabulated organization where space was limited, each alloy is now abstracted in a separate paragraph showing the chemical composition, mechanical properties, uses, and general characteristics.

Preface to Third Edition

During the seven years since the publication of the second edition we have accumulated information on more than 7000 new proprietary alloys which have been incorporated in this third edition.

The methods used in securing information on the new alloys as well as supplementing and correcting data on previously listed alloys followed very closely those outlined in the prefaces to the first and second editions.

Section III, Uses and Applications, as previously published in the first and second editions has been deleted from the present edition. So numerous have become the applications to which specific alloys can be put and so large the number of alloys appropriate to each use, it was felt that Section III on uses and applications has become of little practical value, the more so since some information regarding the primary uses appears in Section II. Consequently, Section IV on Manufacturers and Their Alloys as published in the previous editions is now Section III in the present edition.

The author is grateful for the continued cooperation of the alloy manufacturers in making possible the completeness and accuracy of the text.

Preface to Second Edition

In the eight years since the publication of the first edition, many new allows have been developed and marketed by the ferrous and non-ferrous manufacturers.

There have been several changes in the composition, properties, and even trade names of many alloys. Some have become obsolete and are no longer being manufactured. It therefore would seem wise to incorporate the new proprietary trade name alloys, and the changes in the alloys already listed, in a second edition.

The manufacturers included in the first edition were requested to supply any changes in composition and properties of their alloys, as originally published. They were also asked to furnish data and information regarding new alloys put out and marketed by them. Many additional manufacturers supplied data on their alloys for incorporation in the revised edition.

Where the proprietary trade names were changed, an attempt was made to record the old name in Section II under the "Remarks" column. Wherever the alloys have become obsolete and their manufacture has been discontinued, it has been so indicated.

All alloys have been credited to the proper manufacturer, except where this information was unobtainable.

Section VI in the original edition, comprising the references in serial order according to their key number (R-number), has been deleted. Since the alloys covered by these references were checked with the manufacturers, it did not seem necessary to show the source of the original information. Section VII, "Useful Data Appendix," of the first edition, will therefore become Section VI.

Professor Albert Dornblatt, co-author of the first edition, died in 1942. Mr. Robert J. Metzler, formerly Assistant Chief Metallurgist of the Eclipse-Pioneer Division of Bendix Aviation Corporation, and now Chief Metallurgist of the Breeze Corporation, has assumed the responsibilities of co-authorship of this second edition.

Preface to First Edition

This book is the result of a growing demand for a practical and technical reference book on engineering alloys.

The authors of the book have made a careful compilation of the available data and information on practically all proprietary commercial and technical alloys manufactured in the United States of America, and on many alloys made in foreign countries, including England, France, Germany and Sweden. The book is devoted to data on the chemical composition, physical and mechanical properties, uses, and manufacturers of proprietary alloys. No attempt has been made to include alloys conforming to standard specification analyses as such; examples of the common engineering alloys produced to customers' specifications will be found among listed proprietary alloys. However, because of their widespread usage, the Society of Automotive Engineers' specification alloys, as well as a few others of general interest, have been included.

The aim has been to present as large an amount of reliable and up-to-date information on commercial alloys as was consistent with convenience in form and breadth of scope of this book. This information has been obtained by direct correspondence with the alloy manufacturers, and supplemented by data obtained from commercial literature and technical publications.

The book is divided into seven sections, as follows: Section I, which gives an alphabetical listing of all alloys and their corresponding index or serial number; Section II, which gives the trade name, composition, properties, uses, general remarks and a key number designating the manufacturer and the reference for each alloy as listed in serial order; Section III, an index of alloys classified according to typical uses or special characteristics such as corrosion-resistance; Section IV, an alphabetical listing of the manufacturers with a summary of the alloys listed that are produced by each; Section V, which lists the manufacturers, with addresses, in serial order according to the key number (M-number); Section VI, comprising the references, in serial order according to their key number (R-number); and Section VII, an appendix containing useful tables and miscellaneous information pertaining to the properties and testing of alloys.

With this arrangement, data on a particular alloy are located by using the alphabetical index (Section I) to ascertain the alloy serial number, and then turning to that number in Section II for the desired information regarding composition, properties, and uses. The manufacturer's name and address can be located by referring to the appropriate M-number in Section V. Similarly, the source of information is ascertained in Section VI under the appropriate R-number. Where an M-number appears in the reference column of Section II, the information was supplied by the manufacturer. Section IV is intended as an index of manufacturers, and while complete so far as the alloys listed in the second section (excepting discontinued alloys) are concerned, it should not be considered as a listing of all the alloys produced by the particular manufacturer.

Some of the alloys listed are either obsolete or are not in commercial production at the present time, but they have been embodied in the text in order to make it as complete a reference as possible. Some of the blank spaces in the xt appear because of the manufacturers' feeling that certain information is either onfidential or of no practical interest. The latter comment applies particularly to data on physical properties of tool steels. As it is not feasible to include all the information that could be desired, should more specific data on any particular alloy be wanted by the reader, it is recommended that he refer to the reference or manufacturer cited, or else communicate directly with the authors.

Undoubtedly many important alloys are not listed, despite the authors' best efforts in search of new data. This is especially true in regard to alloys not of American manufacture. The authors will be grateful for any additional information or suggestions for the improvement of this work that may be incorporated at a later time, and they hope that the reader will call to their attention any omissions and errors.

The nature of this compilation is such as to make a critical analysis of the data impracticable, and the authors assume no responsibility for the accuracy or reliability of the quoted values and information; in fact, they have attempted to present the data as impartially and faithfully as possible and have abstained from interjecting their personal judgment or opinion in any respect. It should be borne in mind, also, that the mechanical properties of commercial alloys vary between wide limits, and, therefore, the values assigned in a given instance usually represent the most probable values that would be obtained under the given conditions. Some values are quoted from the manufacturers that refer to a test characterizing but a single specimen. In general, however, all these values should be looked upon as being indicative or suggestive rather than definitive. The same is true of the applications cited. Special care must also be exercised in interpreting remarks relative to the corrosion-resistance of any alloy. Furthermore the reader is cautioned against using the data in such manner as would incur liability for infringement of any patents that may now exist or are pending.

Information was obtained from so many sources in the preparation of this book, that a complete acknowledgement, beyond that noted in the citation of sources of information in the reference column of Section II, is difficult to make. Considering the unprecedented nature of this book, the cooperation of the manufacturers listed was most gratifying and their assistance is as deeply appreciated as it was indispensable. The authors wish to make special acknowledgment to the following: the American Society for Metals, the American Society for Testing Materials, the Society of Automotive Engineers, and the National Research Council for permission to use data appearing in their publications; to *Iron Age, Chemical and Metallurgical Engineering,* and the *Metal Industry* (London) for use of information that appeared in these magazines; to the Louis Cassier Company (London) and Verlag Chemie for permission to utilize some of the data published in their respective books, *Metals and Alloys* and *Die Werkstoffe Der Chemischen Apparate* (Dr. -Ing. H. Freytag).

The authors wish to acknowledge their appreciation of the services rendered by Professor H. Bluestone of the United States Naval Academy Postgraduate School, who aided in making translations, and by Marie I. Dornblatt, who assisted in checking data and reading proof. In addition the authors are indebted to Dr. F. L. Coonan for his helpful suggestions and criticism during the preparation of the manuscript.

Abbreviations

AA	Aluminum Association
ACI	Alloy Casting Institute
AISI	American Iron and Steel Institute
Ann	Anneal or annealed
A Rock	Hardness Rockwell A scale
ASTM	American Society for Testing and Materials
B	Flux density
Bal	Balance or remainder
BHN	Brinell hardness number
Br	Remanence flux in gausses
Brin	Brinell Hardness Number (10 mm. ball and 3000 kg. load) (# means 500 kg. load)
CD	Cold drawn
CDA	Copper Development Association
CEL	Elastic Limit in Compression in pounds per square inch
CF	Cold finished
Ch	Charpy impact in foot-pounds
cmf	Circular mil feet
Coef Exp	Coefficient of Expansion per °C.
Coef Res	Temperature Coefficient of Resistance per °C
CS	Crushing strength in pounds per square inch
CUS	Ultimate strength in compression in pounds per square inch
CYP	Yield point in compression in pounds per square inch
DPN	Depth penetration hardness (Vickers hardness)
SAE	Society of Automotive Engineers
Sc	Shore Scleroscope hardness number
SC	Sand cast
Sp H	Specific heat in calories per gram per °C
Sp Res	Specific Resistance in microhms per centimeter cube
SS	Shear strength in pounds per square inch
ST	Ultimate strength in Torsion in pounds per square inch
SYP	Shear Yield Point in pounds per square inch
TC	Total carbon content
Th C	Thermal Conductivity in calories per centimeter cube per sec. per °C
Tr D	Transverse Deflection in inches
Tr S	Transverse strength in pounds
TS	Ultimate Tensile Strength in pounds per square inch
t.s.i.	Tons per square inch
VDH	Vickers hardness
YP	Yield point in tension in pounds per square inch
YPC	Yield Point in compression in pounds per square inch
YS	Yield strength in tension in pounds per square inch
YS (comp)	Yield strength in compression

SECTION I

ALLOY DATA

NO. 000 DOUBLE EXTRA CARBON.
M-350, 1.1-1.3 C, bal Fe.
For intricate tools, broaches, drawing and threading dies, water hardening.

000 EXTRA
M-459; 0.9 C, 19 W, 4 Cr, 2.2 V, bal Fe.
For high speed cutters, high speed steel.

000 SPEZIAL 31
M-459; 0.8 C, 4 Cr, 0.3 Mo, 2.6 V, 10 W, bal Fe.
For turning, shaping and slotting tools, high speed steel.

1% NEB-BRONZE
M-1720, 89-93 Cu, 0.7-1.3 Sn, 0.10 max Pb, 0.05 max Fe, bal Zn
Good hot and cold working properties, good for welding, brazing, soldering.
For jewelry products, flat springs for electrical switchgear.
Copper alloy No. 413

NO. 1 STANDARD
M-179, 55-60 Cu, 0.2 max Pb, 1.5 max Al, 3.5 max Mn, 1.5 max Sn, bal Zn.
Extruded 76,000 TS, 37,000 YS, 28 El; 20 RA; 135 Brin.
Drawn: 86,000 TS, 41,000 YS, 25 El; 18 RA; 140 Brin
For pump valves, propellers, condenser tubes; Parson's manganese bronze

"NO 1 TA" QUALITY
M-179, 55-60 Cu, 0.2 max Pb, 2-3 Mn, bal Zn
Rolled. 76,000 TS, 36,000 YS, 25 El, 25 RA, 125 Brin
For hydraulic tubes, Parson's manganese bronze

2 AS
M-1487,
High speed steel, similar to AISI M2

NO 2 DIE METAL
M-1391, 3.5-4.5 Al, 2.5-3.5 Cu, 0.02-1.0 Mg, bal Zn
Sand cast 37,000 TS, 3 El
For stamping and drop hammer dies; subject to intergranular attack

NO 2 RELAY
M-1, 1-1.5 Si, bal Fe
For armatures, relays, solenoid switches; high permeability.

NO 2 SS RELAY
M-1, 1-1.5 Si, bal Fe
For armatures, relays, solenoid switches, high permeability.

NO 3 C
M-69, C, Cr, Co, bal Fe.
For coldwork dies

NO 3 MINE TALABOT SPECIAL D.
M-1119; 0.95 C, bal Fe.
For tools, springs, taps, drills; water hardened.

4-6 CHROME.
M-735; 4-6 Cr, Ti = 4 to 6 × C, 0.10 C, bal Fe
Annealed 66,000 TS, 39,000 YS; 45 El; 143 Brin.
For oil stills and refinery tubes; corrosion resistant.

NO. 5 RELAY
M-1; 2.5 Si, bal Fe.
For armatures, switches, solenoid switches; high permeability.

NO 6 MINE TULIPE SPECIAL D.
M-1119, 0.75 C, bal Fe.
For tools, springs, punches; water hardened.

NO. 7 ALLOY (MATHER & PLATT).
M-454, 3.0 C, 4-5 Cu, 12-14 Ni, 1.0-1.2 Mn, 4-6 Cr, 1.2-1.5 Si, bal Fe .
25,000-30,000 TS, 200-220 Brin
For valves, centrifugal pumps; austenitic cast iron; abrasion and corrosion resistant

13 CrMo 44
M-459; 0.13 C, 0.85 Cr, 0.45 Mo, 0.55 Mn, bal Fe.
For cams, camshafts, bolts, shafts, case hardening, tough.

14 NiCr 74.
M-459, 0.13 C, 0.7 Cr, 3.5 Ni, 0.5 Mn, bal Fe
Heat treated 157,000-185,000 TS, 143,000-171,000 YS, 13-10 El.
For gears, cams, camshafts, shafts; case hardening steel, tough

15 CrNi 6
M-459, 0.15 C, 1.5 Cr, 1.5 Ni, bal Fe.
For gears, shafts, cams, camshafts; case hardening, tough.

16 MnCr 5.
M-459, 0.16 C, 1.2 Mn, 1 Cr, bal Fe.
For gears, shafts, cams, camshafts, case hardened, tough.

18 CrNi 8.
M-459, 0.18 C, 2 Cr, 2 Ni, bal Fe.
For gears, shafts, cams, camshafts, case hardened, tough

20 MnCr 5.
M-459, 0.2 C, 1.3 Mn, 1.2 Cr, bal Fe.
For gears, shafts, cams, camshafts; case hardened, tough.

24 CrMo 5
M-459, 0.24 C, 1.15 Cr, 0.25 Mo, 0.55 Mn, bal Fe.
For bolts, hardware, shafts, rams, water hardened.

30 CrNiMo 8.
M-459, 0.3 C, 2 Cr, 0.2 Mo, 2 Ni, bal Fe.
For gears, shafts, machinery parts; shock resistant, oil hardened

34 Cr 4
M-459; 0.33 C, 0.65 Mn, 1.0 Cr, 0.25 Si, bal Fe
For fasteners, gears, shafts, water or oil hardened.

34 CrNiMo 6.
M-459; 0.34 C, 1.5 Cr, 0.15 Mo, 1.5 Ni, bal Fe.
For gears, shafts, machinery parts, shock resistant, oil hardened

NO 35 MONEL.
M-68; 31.25 Cu, 65.5 Ni, 1 Fe.
Cold rolled: 78,000-85,000 TS; 45,000-65,000 YS; 40-20 El.
For table tops; corrosion resistant.

36 CrNiMo 4.
M-459; 0.36 C, 1 Cr, 0.15 Mo, 1 Ni, bal Fe.
For gears, shafts, machinery parts; shock resistant, oil hardened.

NO. 37 ALUMINUM SOLDER.
M-1713.
For solder for aluminum; resists pressures up to 1000 lbs.

37 MnSi 5.
M-459; 0.37 C, 1.25 Si, 1.25 Mn, bal Fe.
For punches, upsetters, crimpers; oil hardened, tough.

42 CrMo 4.
M-459; 0.42 C, 1.1 Cr, 0.2 Mo, bal Fe.
For gears, bolts, shafts, axles; oil or water hardened.

47 Cr 4.
M-459; 0.4 C, 1.1 Cr, bal Fe.
For gears, cams, shafts, oil hardened.

50 CrMo 4.
M-459, 0.50 C, 1.0 Cr, 0.2 Mo, 0.65 Mn, bal Fe.
For gears, bolts, shafts, axles; water hardened.

50 CrV 4.
M-459; 0.50 C, 0.85 Mn, 1.0 Cr, 0.1 V, bal Fe.
For bolts, springs, shafts, gears; oil hardened, shock resistant.

NO. 50 SOLDER ALLOY.
M-1136, In-Pb.
For solder; M.P. 600°F.

NO. 55 ALLOY.
England, 27-30 Cr, bal Fe.
For glass-to-metal seals, same coefficient of expansion as glass.

58 CrV 4.
M-459, 0.58 C, 0.95 Mn, 1.0 Cr, 0.09 V, bal Fe.
For springs, punches, forging dies, oil hardened, tough.

NO. 93 CHROME MOLYBDENUM.
M-1; 0.5 C, 0.7 Cr, 0.5 Mo, bal Fe.
For tools, oil hardening, shock resisting; now Atlas 93.

100 Cr 6.
M-459, 1.0 C, 1.5 Cr, bal Fe.
For ball bearings and races, header dies; water hardened, wear resistant.

100 CrMn 6.
M-459, 1.0 C, 1.1 Mn, 1.5 Cr, bal Fe.
For roller bearings, oil or water hardened.

"101" VAN PUNCH.
M-1409, 0.5 C, 5 W, bal Fe.
For punches, piercing dies; head, impact and abrasion resistant.

NO. 122 ALLOY.
M-137; 9.25-10.75 Cu, 0.15-0.35 Mg, 0.9-1.5 Fe, bal Al.
Cast: 17,000 TS; 16,000 YS, 0.5 El; 80 Brin.
Heat treated: 40,000 TS; 0.5 El; 160 Brin.
For pistons, permanent molds.

NO. 155 PREMIUM SILVER BRAZING ROD.
M-1713, 55 Ag, bal Cu.
Cast: 50,000 TS.
For silver brazing; 1155°F working temperature.

"401" COPPER-NICKEL ALLOY.
M-1499; 45.5 Ni, 53.1 Cu, 1.7 Mn, 0.50 Co.
Annealed: 70,000 TS; 30,000 YS; 45 El.
For electronic components.

NO. 444 ALLOY.
M-739; 80-96 Cu, 3.5-5.0 Sn, 3.5-4.5 Pb, 4 Zn.
For bearings, bushings; SAE 791.

NO. 446 ALLOY.
England; 27-30 Cr, bal Fe.
For glass-to-metal seals.

NO. 500 ALLOY.
U.S.; Al alloy.
Cast: 27,000 TS, 20,000 YS; 2 El.
For casting, light weight.

NO. 712 ALLOY.
M-18; 29 Os, 40-50 Ir, bal Pt.
For contact points; corrosion resistant.

NO. 812.
M-57, 1.8 C, 12.5 Cr, bal Fe.
For dies; non-deforming.

NO. 812.
M-357, 1.8 C, 12.25 Cr, bal Fe.
For blanking and coining dies, taps, reamers; non-deforming.

NO. 999.
M-340, 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe.
For hogging cuts for fast speeds, cutters, high speed steel.

NO. 1040 ALLOY.
German, 15 Cu, 1 Mn, 3 Mo, 71 Ni, 10 Fe.
For electrical equipment; magnetic alloy.

NO. 3074 HOT WORK.
M-365, 0.40-0.45 C, 8-10 W, 2.5 Cr, 0.10-0.15 V, bal Fe.
For hot work tools and dies, forging mandrels, hot work steel.

NO. 9500-1.
M-216, 95 Bi, 5 Sn. For solder, soft.

"A71NB" QUALITY.
M-179; 61 Cu, 1 min Sn, 0.5 max Pb, bal Zn.
Extruded: 60,000 TS, 25 El, 25 RA, 120 Brin.
Drawn: 66,000 TS, 22 El, 20 RA, 130 Brin.
For condenser tubes, Naval Brass.

A-7W.
M-373, 2.25 C, 5.25 Cr, 4.75 V, 1.0 W, 1.0 Mo, bal Fe.
Air hardening tool steel, AISI A7.

A9V.
M-78; 8.5 Al, 0.5 Zn, 0.3 Mn, bal Mg.
For castings, light metal parts; heat treatable.

A-110.
M-64, 1.2 C, 0.3 Mn, 0.3 Si, bal Fe.
Water hardening tool steel, AISI W1.

"A" ALLOY-1.
M-311, 77 Al, 20 Zn, 3 Cu.
Hot rolled: 60,000 TS, 41,000 YS, 21 El; 36 RA.
For light alloy wrought parts, non-hardenable.

"A" ALLOY-2.
M-311, 4.7 Cu, 1.34 Mg, 1.85 Ni, 1.5 Pb, 0.5 Fe, bal Al.
For light alloy wrought parts, age-hardenable.

A-ALLOY GR. A.
M-59, 0.4-0.8 C, 66-68 Ni, 19-21 Cr, 0.5-1.0 Mn, bal Fe.
Cast: 60,000-80,000 TS; 40,000-50,000 YS; 40 El; 30 RA, 217 Brin.
For heat and corrosion resistant parts, heat and corrosion resistant.

AA NICKEL-COBALT.
M-580, Ni-Co.
For anodes, electroplating.

A.A.A.A.
M-590; Pb, Sb, bal Sn.
For bearings; Babbitt, antifriction metal.

AB2.
M-England; 8.5-10.5 Al, 3 5-5 5 Fe, 4.6-6.5 Ni, 1.5 max Mn, 0.50 max Zn, bal Cu.
For impellers and propellers, gears, pumps, shafts, bushings.
B S. 1400 equivalent; heat treatable, corrosion resistant.

"AB164" QUALITY.
M-179; Al, Fe, Ni, bal Cu.
Extruded 82,000 TS, 42,000 YS; 20 El, 12 RA; 170 Brin.
Drawn· 88,000 TS, 46,000 YS, 18 El, 10 RA; 180 Brin.
For engine valve guides, Al bronze, heat resistant.

"AB197" QUALITY.
M-179, Al, Fe, Ni, bal Cu.
Extruded· 110,000 TS; 62,000 YS, 18 El; 10 RA; 190 Brin.
Drawn. 115,000 TS, 68,000 YS; 15 El; 10 RA; 210 Brin
For hardware, Al bronze, corrosion resistant.

A B C
M-40, M-487, 0 4 C, 0 5 W, 0.25 Cr, 0 3 Si, 0.5 Mn, bal Fe
For tools, chisels, hammers, drills, gears, shafts, tough and hard.

A B.C
M-80, high C, alloy, bal Fe.
For chisels; shock resistant.

ABC-III
Germany, 0 7 C, 2 5 Mo, 2 5 V, 3 W, bal Fe.
For cutting tools, oil hardened

ABK METAL.
M 1099, 3 3 75 C, 0 3 0 9 Mn, 0 3-1.2 Si, 3 5-6 5 Ni, 1 5-4 Cr, bal Fe
Cast 35,000-80,000 TS, 0 10-0 30 El, 500-650 Brin.
For castings, crushing rolls, liners, wear resistant, cast iron

ABK Ni-HARD
M-9, 4 5 Ni, 2 7-3 6 C, 1 5 Cr, 0 5-1 5 Si, 0 3-0 7 Mn, bal Fe
Cast 30,000-40,000 TS, 575-750 Brin
For pump plungers, roller bearing races, chilled rolls, corrosion resistant, tough

ABRADUR 500
M-884, 0 40 C, 3 5 Ni, 1 4 Cr, 0 4 Mo, bal Fe
For gears, shafts, crankshafts, oil hardened, shock resistant

ABRASALLOY.
M-353; 0 35 C, 1 Cr, 0.25 Mo, 0 75 Mn, 0 35 Si, bal Fe
For crusher hammers, coal screens, dredge pumps; tough, wear resistant

ABRASOCRAFT.
M-175; C, alloy, bal Fe.
Welded 350 500 Brin
For hard surfacing electrode, abrasion resistant

ABRASIST.
M-1460; C, alloy, bal Fe.
For machinery castings; abrasion resistant.

ABRASOHARD
M-811; C, alloy, bal Fe.
For welding rods; abrasion resistant.

ABRASOWELD.
M-578; 2.1 C, 1 1 Mn, 0.75 Si, 0 40 Mo, 6.5 Cr, bal Fe.
Hard surfacing arc welding electrodes for resistance to abrasion and impact.

ABROS
Eng.; 10 Cr, 88 Ni, 2 Mn.
For electrical resistance, heating elements; stainless and corrosion resistant.

ABSCO METAL 25H
M-9, high C, Si, Mn, bal Fe.
Cast· 25,000 TS; 150-210 Brin.
For ingot molds, pig molds, cast iron, Class 25

ABSCO METAL 30.
M-9, high C, Si, Mn, bal Fe
Cast: 30,000 TS, 20,000 YS, 0 6 El; 170-240 Brin.
For gears, pulleys, general castings; cast iron, Class 30

ABSCO METAL 30H.
M-9; high C, Si, Mn, alloy, bal Fe.
Cast· 30,000 TS; 220-280 Brin
For heat and wear resistant castings; cast iron.

ABSCO METAL 35.
M-9, high C, Si, Mn, bal Fe
Cast· 35,000 TS; 200-260 Brin
For gears, housings, general castings, cast iron, Class 35.

ABSCO METAL 40
M-9, high C, Si, Mn, bal Fe
Cast· 40,000 TS; 210-260 Brin.
For meter bodies, water valves, compressor cylinders; cast iron, Class 40

ABSCO METAL 40H
M-9, high C, Si, Mn, alloy, bal Fe
Cast. 40,000 TS, 230-290 Brin.
For heat and wear resistant castings, cast iron.

ABSCO METAL 50
M-9, high C, Si, Mn, bal Fe.
Cast 50,000 TS, 220-280 Brin
For press parts, cylinder heads, forming dies; cast iron, Class 50

ABSCO METAL 55.
M 9, high C, Si, Mn, bal Fe.
Cast: 55,000 TS, 45,000 YS, 0 7 El, 230-310 Brin.
For crankshafts, tool shanks, cutter bodies, cast iron, Class 55

ABSCO METAL 400
M 9; high C, Si, Mn, alloy, bal Fe.
Cast· 400 Brin.
For ash-sluice pipe chutes, burner nozzles; heat and wear resistant.

ABYSSINIAN GOLD
Eng , 88 Cu, 11 5 Zn, 0 5 Au.
For ornaments, jewelry

ABYSSINIAN GOLD
Eng., 90 92 Cu, 8-10 Zn, 1 plated Au.
For ornaments, jewelry; sheets plated with Au

AC-254
M-642; 0.24 C, 1.0 Mn, 0 4 Si, 12 0 Cr, 1.0 Ni, 2 5 Mo, 1.0 W, 0.25 V, 0.22 B, bal Fe.
At 1100°F; 85,000 TS, 70,000 YS, 18 El, 55 RA.
For steam turbine blading, jet engine components. Stainless, martensitic, creep resistant.

AC-AMSCO NO. 217.
M-607, 3 C, 8 Cr, 15 W, bal Fe
600-700 Brin.
For hard facing welding rod; maintains hardness up to 1000°F.

AC-AMSCO NO. 459.
M-607; 3 C, 4 Cr, 4 Mo, bal Fe.
500-600 Brin.
For hard surfacing welding rod; for severe wear and abrasion.

AC-COATED 18-8.
M-607; C, 18 Cr, 8 Ni, bal Fe.
Coated.
For stainless steel welding rod; coated rods.

ACCOLLOY.
M-653, 3.5 Ni, 0.3 C, bal Fe.
For chains.

ACCOLOY CN-1.
M-1005; 0.20 C, 28 Cr, 3 max Ni, bal Fe.
For furnace parts, heat treating equipment, heat resistant, ferritic.

ACCOLOY CN-2.
M-1005; 0.40 C, 28 Cr, 10 Ni, bal Fe.
Cast: 95,000 TS; 45,000 YS, 20 El, 200 Brin.
For furnace parts, heat treating equipment, pots, Type HE, austenitic, heat resistant.

ACCOLOY CN-3.
M-1005; 0.30 C, 25 Cr, 20 Ni, bal Fe.
Cast 75,000 TS, 50,000 YS, 17 El, 170 Brin.
For furnace parts, heat treating equipment, pots, Type HK, austenitic, heat resistant.

ACCOLOY CN-4
M-1005, 0.35 C, 25 Cr, 12 Ni, bal Fe
Cast. 80,000 TS, 50,000 YS, 25 El, 185 Brin.
For furnace parts, heat treating equipment, pots; Type HH, austenitic, heat resistant.

ACCOLOY CNC-4B
M-1005, 0.10 max C, 24 Cr, 12 Ni, bal Fe.
For furnace parts, heat treating equipment pots, corrosion and heat resistant, austenitic

ACCOLOY CNC-4D
M-1005, 0.20 max C, 24 Cr, 12 Ni, bal Fe
For furnace parts, heat treating equipment, pots, heat and corrosion resistant, austenitic.

ACCOLOY CN-5
M-1005; 0.25 C, 18 Cr, 8 Ni, bal Fe
Cast: 75,000 TS; 45,000 YS; 30 El, 175 Brin
For carburizing boxes; corrosion and heat resistant, austenitic

ACCOLOY CNC-5A.
M-1005, 0.07 C, 18 Cr, 8 Ni, bal Fe
Cast 85,000 TS, 150 Brin
For castings, baskets, carburizing boxes; Type 304, stainless, austenitic.

ACCOLOY CNC-5B
M-1005; 0.10 C, 18 Cr, 8 Ni, bal Fe
Cast: 85,000 TS; 150 Brin.
For heat treating boxes, pots, baskets, Type 302, stainless, austenitic

ACCOLOY CNC-5C
M-1005, 0.16 max C, 18 Cr, 8 Ni, bal Fe
Cast: 90,000 TS, 160 Brin
For heat treating boxes, chemical plant equipment, Type 302; stainless, austenitic.

ACCOLOY NC-1
M-1005, 0.2 C, 68 Ni, 18 Cr, bal Fe
Cast. 65,000 TS, 36,000 YS; 9 El, 176 Brin
For autoclaves, furnace parts, Type HX, austenitic, heat resistant.

ACCOLOY NC-2
M-1005, C, 60 Ni, 18 Cr, bal Fe.
For castings; heat resistant.

ACCOLOY NC 3
M-1005, 0.40 C, 18 Cr, 38 Ni, bal Fe.
For furnace parts, cylinder liners, conveyors, fixtures; Type HU; austenitic, heat resistant

ACCOLOY NC-4
M-1005, 0.25-0.70 C, 35 Ni, 15 Cr, bal Fe.
Cast: 70,000 TS, 40,000 YS; 10 El; 180 Brin.
For cyanide pots, furnace equipment; Type HT; austenitic, heat resistant.

ACCOLOY NC-5
M-1005; C, 30 Ni, 10 Cr, bal Fe.
For castings, heat resistant.

ACCULOY 280 C.
M-1538; Au, bal Sn
Uses: Brazing alloy for electronic parts.
High corrosion and etch resistance. High electrical conductivity.

ACCUMULATOR METAL.
U S., 90 Pb, 9.2 Sn, 0.8 Sb
Bearings, battery plates, antifriction.

ACCURATE METAL
M-1676; 29-32 Ni, 68 min Cu, 0.4-0.7 Fe.
Annealed: 57,000 TS, 21,000 YS, 43 El, B 44 Rock.
Hard: 82,000 TS, 75,000 YS, 5 El; B 86 Rock
Soft 54,000 TS, 16,000 YS, 35 El, B 40 Rock
For electronic components, marine hardware, ferrules, pump valves.
Corrosion resistant, non-magnetic

ACCURLOY
M-1510, 0.51 C, 1.05 Cr, 0.25 Mo, 0.53 Ni, 0.21 V, 0.97 Mn, bal Fe
Heat treated 165,000 TS, 150,000 YS, 20 El, 59 RA, 280-300 Brin
For shafts, pins, boring bars, piston rods, heat treated and stress-relieved bars, shock resistant.

ACEROID
M-592, Zn, bal Cu
For castings

ACEROLD
M-592, C, alloy, bal Fe.
For machinery castings

ACHORN 6-6-4-2
M-608, 0.85 C, 4 Cr, 2 V, 6.5 W, 5 Mo, bal Fe
For tools, cutters, high speed steel

ACHORN 9W HOT WORK
M-608, 0.30 C, 3.0 Cr, 0.5 V, 9.5 W, bal Fe
Hot work tool steel, oil hardening, for forging dies, hot forming dies, AISI H21

ACHORN 11W HOT WORK
M-608, 0.40 C, 3.0 Cr, 0.45 V, 12.0 W, bal Fe
Oil hardening hot work tool steel, tungsten type, for forging and hot working dies
AISI H22.

ACHORN 15W HOT WORK
M 608, 0.45 C, 3.5 Cr, 0.7 V, 14 W, bal Fe
Air or oil hardening hot working tool and die steel, AISI H24

ACHORN 18-4-1
M-608, 0.65 C, 3.75 Cr, 18.5 W, 1.2 V, bal Fe
For tools, cutters, high speed steel

ACHORN 33 HOT WORK
M 608, 0.33 C, 0.85 Si, 5.0 Cr, 0.2 V, 1.25 W, 1.45 Mo, bal Fe.
Hot work tool steel, chromium type; AISI H12

ACHORN 33A HOT WORK
M-608, 0.40 C, 0.3 Mn, 0.9 Si, 5.0 Cr, 0.5 V, 1.3 Mo, bal Fe
Oil or air hardening tool and die steel, for forging dies and hot forming dies.
AISI H11.

ACHORN 33M HOT WORK.
MD-608; 0.40 C, 1.0 Si, 5.0 Cr, 1.0 V, 1.0 Mo, bal Fe
Air or oil hardening hot work tool steel; AISI H13

ACHORN AF-33 HOT WORK.
M-608, 0.30-0.35 C, 0.8-1.0 Si, 5 Cr, 1.1 W, 1.5 Mo, bal Fe
For hot work dies, hot work steel

ACHORN 100 CHROMIUM.
M-608; 1.0 C, 1.5 Cr, bal Fe.
Low alloy tool steel, oil hardening.
AISI L1.

ACHORN 225 C HIGH PRODUCTION DIE.
M-608; 2.1 C, 12 0 Cr, 0.75 W, bal Fe.
Oil or air hardening cold work tool steel; chromium type; for punch and trim dies, thread rolling tools, gages.
AISI D3.

ACHORN "350" FINISHING.
M-608; 1 3 C, 3.5 W, bal Fe
For tools, dies, fast finishing steel

ACHORN 512
M-608, 0.10 C, 0.48 Mn, 1.5 Cr, 3 5 Ni, bal Fe.
Low carbon steel for cold hubbing and then case hardening for molds.

ACHORN ALLOY PIVOT
M-608, 1 10 C, 0 40 Mn, 0 25 Si, 1 35 Cr, 0 40 Mo, bal Fe
Oil hardening steel for shafts, pivots, lathe centers.
AISI L7

ACHORN BEST CARBON
M-608, 0.8-1.2 C, 0 25 Si, 0 25 Mn, bal Fe
Water hardened. 166,000-216,000 TS; 110,000-150,000 YS, 11-15 El, 32-37 RA; 330-600 Brin.
For taps, reamers, drills, punches, stamps, knurls, mandrels, cutters.
Type W1 water hardening

ACHORN CARBON DRILL ROD
M-608, 1 0 C, 0 25 Mn, 0 28 Si, bal Fe.
Water hardening tool steel, AISI W1

ACHORN CM AIR HARDENING.
M-608, 0 70 C, 2 0 Mn, 0 3 Si, 1 0 Cr, 1 35 Mo, bal Fe
Medium alloy, air hardening cold work tool steel; AISI A6

ACHORN COLD DRAWN TOOL STEEL
M-608, 1.05 C, 0 25 Mn, 0 28 Si, bal Fe
Water hardening tool steel, for drills, arbors, lathe centers, bushings AISI W1

ACHORN COLD HEADING
M-608; 0 8-1 2 C, 0 25 Si, 0 25 Mn, bal Fe
Water hardened 166,000-216,000 TS, 110,000-150,000 YS, 11-15 El, 32-37 RA, 330-600 Brin
For taps, drills, reamers, punches, stamps, knurls, mandrels, cold heading tools
Type W1 water hardening.

ACHORN COMPOSITE STEEL
M-608, 1.0 C, 0 40 Cr, 0 40 V, 1 25 W, bal Fe
Water or oil hardening steel for shafts, arbors, lathe centers, drill bushings
AISI F1

ACHORN CRM-50
M-608, 0 5-0 55 C, 0 6 Mn, 1 0 Cr, 0 20 Mo, bal Fe.
For hot work dies, hot work steel

ACHORN CVM
M-1421, 0 95 C, 0 7 Mn, 5 Cr, 0.25 V, 1.2 Mo, bal Fe
For punches, blanking and forming dies, air hardened, non deforming.

ACHORN EXTRA BLADE
M-608, 1 1 C, 0 25 Mn, bal Fe.
For tools, cutters, oil hardened.

ACHORN EXTRA CARBON
M-608, 1.05 C, 0 25 Mn, 0 28 Si, bal Fe.
Water hardening tool steel, AISI W1

ACHORN EXTRA CHISEL
M-608; 0.8-1.1 C, 0.25 Si, 0.25 Mn, bal Fe.
Water hardened: 166,000-216,000 TS; 110,000-150,000 YS; 11-15 El; 32-37 RA; 330-600 Brin.
For taps, drills, reamers, punches, stamps, knurls, mandrels.
Type W1 water hardening.

ACHORN EXTRA SOLID DRILL.
M-608; 1 15 C, 0 30 Mn, bal Fe.
For tools, drills; water hardened.

ACHORN FAGERSTA BEST.
M-608, 1.05-1 15 C, 0.20-0.25 Mn, 0.25 Si, bal Fe.
For drills, cutters, reamers, taps, broaches; Type W1; water hardened

ACHORN FAGERSTA CHISEL
M-608, 0.8-0.9 C, 0.3 Mn, 0.25 Si, bal Fe
For chisels, screw drivers, water hardened, Type W1.

ACHORN FAGERSTA COLD HEADING.
M-608; 0.95 C, 0.3 Mn, 0.25 Si, bal Fe.
For cold heading dies, form tools; Type W1; water hardened.

ACHORN FAGERSTA ENVELOPE DIE
M-608, 1 05-1 15 C, 0.3 Mn, 0.25 Si, bal Fe.
For envelope dies, cutters, drills, form tools; Type W1, water hardened.

ACHORN FAGERSTA EXTRA
M-608; 1 0-1.1 C, 0 3 Mn, 0 25 Si, bal Fe.
For tools, cutters, drills, taps, reamers; Type W1; water hardened.

ACHORN FAGERSTA EXTRA CUTLERY.
M-608, 1 07-1 12 C, 0 25 Mn, 0 3 Si, bal Fe.
For cutlery tools, drills, taps, Type W1; water hardened.

ACHORN FAGERSTA FINISHING
M-608, 1 15 C, 0.4 Mn, 0 4 Cr, 2 5 W, bal Fe.
For finishing cutters, water hardened, keen cutting edge

ACHORN FAGERSTA HIGH PRODUCTION.
M-608, M-385, 1 6 C, 0 8 Mn, 12 Cr, 0.2 V, bal Fe.
For blanking and forming dies, air hardened, non-deforming

ACHORN FAGERSTA HOT DIE
M-608, 0 55 C, 0 45 Mn, 5 0 W, 3 0 Ni, bal Fe.
For upsetting and forging dies, extrusion rams and liners, hot work steel, oil hardened.

ACHORN FAGERSTA SHOE DIE
M-608, M-385, 0.55 C, 0 65 Cr, 0 35 Mo, bal Fe
For shoe dies, cutting dies for leather and rubber, oil hardening

ACHORN FAGERSTA SILVER DIE.
M-608, 1 0 C, 0 25 Mn, 0 25 Si, bal Fe
For silver dies, Type W1, water hardened.

ACHORN FAGERSTA SMOOTH BOR HOLLOW.
M-608, 0 80 C, 0 25 Mn, 0.25 Si, bal Fe.
For rock drills, Type W1, water hardened

ACHORN FAGERSTA SOLID DRILL
M-608; 0 8-0 9 C, 0 35 Mn, 0 25 Si, bal Fe.
For solid drills; Type W1, water hardened.

ACHORN FAGERSTA SPECIAL ALLOY DIE
M-608, 0.45-0 55 C, 0 9 Cr, 1.2 W, 0 2 Mo, bal Fe.
For dies, tools, oil hardened

ACHORN FAGERSTA STANDARD.
M-608, 0 9-1.0 C, 0 3 Mn, 0.25 Si, bal Fe.
For tools, drills, taps, hobs, reamers; Type W1; water hardened.

ACHORN FAGERSTA STANDARD CUTLERY.
M-608; 0.85-0.95 C, 0.35 Mn, 0,25 Si, bal Fe.
For cutlery tools, drills; reamers; Type W1; water hardened.

ACHORN FAGERSTA SUPERIOR OIL.
M-608; 1.0 C, 1.0 Mn, 0.4 Cr, 0.4 W, bal Fe.
For tools, dies, cold headers, water or oil hardened

ACHORN FAGERSTA UNBREAKABLE CHISEL.
M-608; 0.45 C, 0.9 Cr, 1.2 W, 0.2 Mo, bal Fe
For chisels, upsetters, oil hardened, tough

ACHORN FAGERSTA WHITE GOLD.
M-608; 1.15 C, 0.4 Mn, 0.4 Cr, 1.2 W, bal Fe.
For tools, cutters; oil or water hardened.

ACHORN GRAPHITIC OIL.
M-608; 1.45 C, 0.8 Mn, 1.15 Si, 0.20 Cr, 0.25 Mo, bal Fe
Oil hardening cold work tool steel; AISI O6.

ACHORN HEAT TREATED MOLD STEEL
M-608; 0.30 C, 0.80 Mn, 0.50 Si, 1.7 Cr, 0.40 Mo, bal Fe.
Hardened, machinable, for molds; AISI P20.

ACHORN HIGH PRODUCTION.
M-608; 1.6 C, 12 Cr, 0.8 Mo, 0.8 V, bal Fe.
For punches, drawing dies, form tools; air hardened, non-deforming

ACHORN HOLLOW DRILL.
M-608; 0.75 C, 0.3 Mn, bal Fe.
Heat treated: 180,000 TS; 130,000 YS; 12 El, 36 RA, 360 Brin.
For hollow drills, die blocks; water hardened, Type W1.

ACHORN KLOSTER BRILLIANT AX.
M-608, 0.7 C, 4 Cr, 18 W, 1.75 V, bal Fe.
For tools, cutters, reamers, hobs, lathe and planer tools, high speed steel, Type T1.

ACHORN KLOSTER BRILLIANT WKE.
M-608; 0.7 C, 4.5 Cr, 18 W, 1.5 V, 5 Co, bal Fe.
For lathe and planer tools, hobs, reamers, taps, drills, high speed steel, Type T4

ACHORN KLOSTER PRIOR EXTRA
M-608; 0.6-0.7 C, 4-5 Cr, 18-19 W, 1.2 V, 1 Co, bal Fe.
For lathe and planer tools, hobs, reamers, taps, drills, high speed steel, oil hardened.

ACHORN KLOSTER REMA.
M-608, 0.02-0.05 C, 0.02-0.07 Mn, bal Fe
For molding dies for plastics; hobbing steel.

ACHORN M1 HIGH SPEED.
M-608; 0.80 C, 4.0 Cr, 1.0 V, 1.5 W, 8.0 Mo, bal Fe.
High speed steel, molybdenum type; for drills, lathe tools, milling cutters. AISI M1.

ACHORN M-2.
M-608; 0.8 C, 5 Mo, 6.5 W, 2 V, 4 Cr, bal Fe.
For lathe and planer tools, drills, reamers; high speed steel.

ACHORN M2½ (CLASS 1) HIGH SPEED
M-608; 1.0 C, 4.0 Cr, 2.5 V, 6.25 W, 6.25 Mo, bal Fe.
High speed tool steel, molybdenum-tungsten type; AISI M3 Class 1.

ACHORN M3 (CLASS 2) HIGH SPEED
M-608; 1.15 C, 4.0 Cr, 3.0 V, 6.0 W, 5.5 Mo, bal Fe
High speed steel, tungsten-molybdenum-vanadium-chromium. AISI M3 Class 2

ACHORN M4 HIGH SPEED.
M-608; 1.28 C, 4.5 Cr, 4.0 V, 5.5 W, 4.5 Mo, bal Fe.
High speed steel, tungsten-molybdenum-vanadium-chromium, AISI M4

ACHORN M10 HIGH SPEED.
M-608, 0.85 C, 4.0 Cr, 2.0 V, 8.0 Mo, bal Fe.
Molybdenum type high speed steel; AISI M10.

ACHORN M34 HIGH SPEED
M-608; 0.90 C, 4.0 Cr, 2.0 V, 1.75 W, 8.5 Mo, 8 Co, bal Fe
High speed steel, molybdenum-cobalt type, AISI M34.

ACHORN MANGANESE OIL HARDENING.
M-608, 0.90 C, 1.50 Mn, 0.25 Si, 0.30 Mo, bal Fe
Oil hardening in small sections, AISI O2.

ACHORN MOLDALOY.
M-608; 0.10 C, 0.5 Mn, 0.5 Cr, 1.2 Ni, bal Fe
For dies, molds, carburizing grade.

ACHORN Ni-Cro-Mo
M-608, 0.68 C, 0.6 Mn, 0.25 Si, 0.65 Cr, 1.4 Ni, 0.20 Mo, bal Fe
Oil hardening, low alloy tool steel for shafts, arbors, lathe centers, tool holders. AISI L6

ACHORN OIL HARDENING DRILL ROD
M-608, 0.90 C, 1.1 Mn, 0.5 Cr, 0.15 V, 0.5 W, bal Fe.
Oil hardenable in small sections, AISI O1

ACHORN OILWEAR.
M-608, 1.25 C, 0.3 Mn, 0.35 Si, 0.4 Cr, 0.2 V, 1.4 W, bal Fe
Oil hardening cold work tool steel, wear resistant type; AISI O7.

ACHORN REMA IRON
M-608, 0.06 C, 0.21 Mn, bal Fe.
For plastic mold dies, water hardened.

ACHORN SOLID DRILL.
M-608, 0.85 C, 0.35 Mn, bal Fe
Heat treated 190,000 TS, 145,000 YS, 10 El, 30 RA, 400 Brin
For drills, punches, taps, reamers, cutters, water hardened, Type W1.

ACHORN SPRING STEEL SHEET
M-608, 1.0 C, 0.25 Mn, 0.28 Si, bal Fe
Water hardened sheet steel, spring temper, AISI W1

ACHORN STANDARD CARBON
M-608, 1.0-1.1 C, 0.30 Mn, bal Fe
For cutters, drills, reamers, punches, water hardened; Type W1

ACHORN SUPERIOR OIL HARDENING
M-608, C, alloy, bal Fe
For tools, dies, punches, oil hardened

ACHORN T2 HIGH SPEED
M 608, 0.80 C, 4.0 Cr, 2.0 V, 18.5 W, 0.75 Mo, bal Fe
Tungsten type high speed steel, AISI T2

ACHORN T4 HIGH SPEED
M-608, 0.75 C, 4.0 Cr, 1.05 V, 18.5 W, 5.0 Co, bal Fe
Tungsten-cobalt type high speed steel; AISI T4.

ACHORN T5 HIGH SPEED
M-608, 0.80 C, 4.25 Cr, 2.0 V, 19.0 W, 1.0 Mo, 8.0 Co, bal Fe
Tungsten-cobalt type high speed steel, AISI T5.

ACHORN T15 HIGH SPEED.
M-608, 1.5 C, 4.75 Cr, 5.0 V, 12.5 W, 5.0 Co, bal Fe
High speed steel, tungsten, cobalt, vanadium type, AISI T15

ACHORN TOOL STEEL SHEET.
M-608; 1.05 C, 0.25 Mn, 0.28 Si, bal Fe.
Water hardenable sheet steel, AISI W1.

ACHORN UBC.
M-608; 0.48 C, 0.9 Cr, 1.1 W, 0.2 Mo, bal Fe.
For hot work dies; hot work steel.

ACHORN USI STEEL.
M-608; 0.60, 0.85 Mn, 2.0 Si, 0.25 Cr, 0.2 V, 0.25 Mo, bal Fe.
Water or oil hardening tool steel, shock resisting type; AISI S5.

ACHORN V85 STEEL.
M-608; 0.90 C, 0.3 Mn, 0.25 Si, 0.25 V, bal Fe.
Water hardening tool steel; AISI W2.

ACHORN VAMO
M-608; 0.50 C, 0.45 Mn, 1.0 Si, 5.2 Cr, 1.5 Ni, 1.0 V, 1.4 Mo, bal Fe.
Medium alloy, air hardening cold work tool steel, AISI A9.

ACHORN VBC.
M-608; 0.5 C, 0.90 Cr, 1.25 W, 2 Mo, 0.25 Mn, bal Fe
For punches, rivet sets, upsetters; oil hardened, hot work steel.

ACIBAL
Al alloy.
For light alloy parts.

ACIBEL.
M-280, 0.07-0.13 C, 0.15-0.25 Pb, 0.85-1.15 Mn, 0.23-0.33 S, bal Fe.
Rolled 70,000 TS.
For shafts, gears, machine tool parts; free-cutting, case hardened.

ACIBRADE
M-280; 0.55-0.70 C, 1.25-1.55 Mn, 0.1-0.35 Si, bal Fe
Rolled. 137,000 TS; 275 Brin.
For rods for coke crushing rod mills; wear resistant, tough

ACICULAR
M-494, 2.9 C, 2 Si, 2.5 Ni, 0.9 Mo, bal Fe.
Cast: 280-350 Brin
For castings, gears, housings, alloy cast iron

ACID BRONZE 1.
Eng; 88 Cu, 10 Sn, 2 Pb.
For bearings, chemical equipment, corrosion resistant.

ACID BRONZE-2
Eng, 82 Cu, 8 Sn, 8 Pb, 2 Zn
For chemical equipment, corrosion resistant.

ACID BRONZE-3.
Eng, 84 Cu, 9.5 Sn, 6.3 Pb, 0.2 P.
For chemical equipment; corrosion resistant.

ACID BRONZE-4.
Eng, 74 Cu, 8 Sn, 17 Pb, 1.5 Zn.
For chemical equipment; corrosion resistant.

ACID METAL
U.S; 88 Cu, 10 Sn, 2 Pb.
For chemical equipment; corrosion resisting.

ACID RESISTING-1.
Eng.; 10 Cr, 30 Ni, 40.8 Fe, 6.2 W, 1.55 Mn, 0.45 Si
For chemical apparatus, acid resisting vessels and tanks; stainless and corrosion resistant.

ACID RESISTING-2
Eng; 14.5 Cr, 20 Ni, 56 Fe, 5 Co, 4.5 Cu.
For chemical apparatus; resists attack of HNO_3.

ACID RESISTING-3.
Eng.; 15 Cr, 53 Ni, 23 Fe, 4 W, 1.25 Mn, 3.75 Si.
For chemical apparatus;
heat and corrosion resistant

ACIDUR.
M-323; 16-17 Si, bal Fe.
Cast.
For chemical apparatus; corrosion resistant.

ACIER A3.
M-1043; 0.50 C, bal Fe.
Annealed: 96,000 TS, 52,000 YS; 16 El; 23 RA; 170 Brin
For axles, gears, bolts, bushings, crankshafts; water hardened.

ACIER ACM.
M-1043; 0.55 C, 1.4 Ni, 0.6 Cr, 0.35 Mo, bal Fe.
For gears, bolts, forging dies; oil hardened, tough.

ACIER ACMA.
M-1043, 0.55 C, 1.4 Ni, 0.6 Cr, 0.35 Mo, bal Fe
For gears, forging dies; oil hardened, tough.

ACIER AF NO. 1.
M-1043, 0.85 C, bal Fe
Heat treated: 200,000 TS, 150,000 YS; 10 El, 30 RA, 400 Brin
For drills, taps, reamers, hobs, springs; Type W1; water hardened.

ACIER AFS
M-1043; 0.80 C, bal Fe
Heat treated: 188,000 TS, 143,000 YS; 12 El; 35 RA; 388 Brin.
For drills, punches, reamers, taps, springs, hobs; Type W1; water hardened

ACIERAL-1
M-281, 6 Cu, 0.4 Zn, 0.9 Ni, 0.1 Fe, 0.4 Si, bal Al.
Cast 20,000 TS.
For automotive engine parts; castings.

ACIERAL-2.
M-281, 2.3-3.8 Cu, 0.7-1.4 Fe, 1.0-1.5 Mn, bal Al.
Rolled 22,000 TS, 2 El.
For automotive engine parts; high strength.

ACIER AM3.
M-1043, 0.35 C, 1.1 Mn, bal Fe.
For punches, axles, gears, shafts, water hardened.

ACIER AS,
M-1043, 0.50, bal Fe.
Annealed 96,000 TS; 52,000 YS; 16 El; 23 RA; 170 Brin
For axles, gears, bolts, tie rods, water hardened.

ACIER BLN.
M-1043, 0.28 C, 10 W, 3 Cr, 0.3 Mo, 0.3 V, bal Fe.
For extrusion rams and dies, punches, hot work steel, oil hardened.

ACIER BTR.
M-1043, 0.35 C, 4.6 Ni, 0.3 Cr, 1.1 Mo, bal Fe.
For gears, dies, crankshafts, oil hardened, tough.

ACIER CMYO.
M-1043, 1 C, 1 Cr, 0.2 Mo, bal Fe.
For bearings, liners, sleeves; water or oil hardened.

ACIER CNW.
M-1043, 0.38 C, 3 W, 2.5 Cr, 0.7 Mo, 0.3 V, bal Fe.
For hot work dies and tools; hot work steel.

ACIER CTN2
M-1043, 0.10 C, 2 Ni, bal Fe.
For spindles, gears, cams, camshafts; case hardening steel, tough.

ACIER CTN6.
M-1043; 0.10 C, 6 Ni, bal Fe.
For spindles, gears, cams, shafts; case hardening steel, tough.

ACIER DIABOLIQUE SATAN NO. 2.
M-1043; 1.15 C, 1.9 W, 0.5 Cr, bal Fe.
For header dies, fast finishing cutters; water hardened, wear resistant.

ACIER FAM.
M-1043; 0.42 C, 2 Si, 0.6 Mn, bal Fe.
For heat resistant parts; heat resistant.

ACIER FFV NO. 3.
M-1043; 0.85 C, 0.30 Mn, bal Fe.
Heat treated: 200,000 TS; 150,000 YS, 10 El; 30 RA; 400 Brin.
For drills, taps, reamers, springs, hobs; Type W1; water hardened.

ACIER M13AFY.
M-1043, 1.1 C, 13 Mn, bal Fe.
For wear resistant parts; wear and abrasion resistant.

ACIER NC2.
M-1043; 0.3 C, 2.8 Ni, 0.5 Cr, bal Fe.
For gears, bolts, machine tool parts, oil hardened, tough.

ACIER TRIPLE SATAN.
M-1043; 0.32 C, 9 W, 3.2 Cr, bal Fe.
For extrusion rams and dies, punches; hot work steel, oil hardened.

ACIER VDLD.
M-1043, 0.35 C, 3.8 Ni, 1.5 Cr, bal Fe
For gears, bolts, dies, crankshafts, oil hardened, tough.

ACIER VDLDM.
M-1043, 0.35 C, 4 Ni, 1.5 Cr, 0.5 Mo, bal Fe
For gears, shafts, crankshafts, oil hardened, tough

ACIMET C-1.
M-480, 90 Cu, 10 Al, 0.06 max C
Heat treated: 70,000 TS; 28,000 YS, 20 El, 20 RA, 100 Brin
For acetic acid equipment castings, pumps, impeller shafts for rubber pumps; corrosion resistant.

ACIMET C-2
M-480; 85 Cu, 5 Sn, 5 Pb, 5 Zn
30,000-33,000 TS, 18,000-20,000 YS, 20 El, 20 RA, 50-60 Brin.
For fittings and pumps for brewery, distilleries, alcohol plants, etc; pressure tight.

ACIMET C-3.
M-480; 60 Cu, 2 Pb, 38 Zn.
50,000-75,000 TS, 18,000 YS; 40 El
For close grained forged oil fittings, free-cutting.

ACIMET C-4
M-480; 58 Cu, 0.5 Al, 0.5 Sn, 39 Zn, 0.75 max Fe, 0.75 max Mn.
70,000-75,000 TS; 35,000 YS, 20 El; 20 RA, 100-110 Brin
For impeller shaft and gland fittings for rubber and plastic pumps for handling HCl, corrosion resistant

ACIMET HARD LEAD ALLOY.
M-480; 94.5-95 Pb, 4.5-5.5 Sb.
2,800 TS, 1,600 YS, 75 El, 90 RA
For valves, pumps, fittings, castings, handling corrosive chemicals; M P. 495°F.

ACIPCO 1005.
M-285; 0.08 max C, 0.3-0.6 Mn, bal Fe
Cast, normalize and temper: 48,000 TS, 25,000 YS, 35 El, 110 Brin.
For high magnetic permeability parts. AISI 1005.

ACIPCO 1015.
M-285 0.10-0.20 C, 0.3-0.6 Mn, bal Fe.
Cast, normalize and temper 55,000 TS; 30,000 YS, 30 El; 130 Brin.
Standard mild steel, high ductility
AISI 1015

ACIPCO 1025.
M-285; 0.20-0.30 C, 0.3-0.6 Mn, bal Fe.
Cast, normalize and temper: 65,000 TS; 35,000 YS; 25 El, 150 Brin
Standard structural steel, good weldability.
AISI 1025.

ACIPCO 1045.
M-285; 0.40-0.50 C, 0.5-0.9 Mn, bal Fe.
Cast, normalize and temper 85,000 TS, 45,000 YS; 15 El; 180 Brin.
For machine parts, and for flame hardening.
AISI 1045

ACIPCO 1070
M-285, 0.65-0.75 C, 0.5-0.9 Mn, bal Fe.
Cast, normalize and temper 105,000 TS, 50,000 YS; 5 El, 220 Brin
Particularly for parts requiring flame or induction hardened areas AISI 1070.

ACIPCO 4130
M-285, 0.25-0.35 C, 0.4-0.7 Mn, 0.8-1.1 Cr, 0.15-0.25 Mo, bal Fe
Cast, normalize and temper, 80,000 TS, 45,000 YS; 17 El, 185 Brin
Cast, water quench and temper, 100,000-160,000 TS; 65,000-145,000 YS, 16-5 El, 250-450 Brin.
Preferred water quenching grade AISI 4130

ACIPCO 4140
M-285, 0.35-0.45 C, 0.6-1.0 Mn, 0.8-1.1 Cr, 0.15-0.25 Mo, bal Fe
Cast, normalize and temper 100,000 TS, 50,000 YS, 16 El, 200 Brin
Cast, oil quench and temper, 120,000-180,000 TS, 85,000 165,000 YS, 16-5 El, 250-450 Brin
Oil hardening alloy steel
AISI 4140

ACIPCO 4330
M-285, 0.25-0.35 C, 0.4-0.7 Mn, 1.65-2.0 Ni, 0.7-0.9 Cr, 0.2-0.3 Mo, bal Fe
Cast, normalize and temper 100,000 TS, 60,000 YS, 16 El, 200 Brin
Cast, quench and temper 120,000-180,000 TS, 85,000 165,000 YS, 16-5 El, 250-450 Brin
Hardenable in heavy sections. AISI 4330

ACIPCO 8620
M-285, 0.15 0.25 C, 0.6-1.0 Mn, 0.4 0.7 Ni, 0.4-0.6 Cr, 0.15 0.25 Mo, bal Fe
Cast, normalize and temper 70,000 TS, 40,000 YS, 20 El, 150 Brin
Low alloy carburizing grade
AISI 8620

ACIPCO ACICULAR IRONS
M-285, 2.5 3.0 C, 0.5-1.5 Mn, 0.25 max P, 0.12 max S, 1.7-2.3 Ni, 0.8-1.2 Mo, bal Fe
Cast 60,000 TS, 300 Brin
For highly stressed rolls and cylinders, heat treatable.

ACIPCO CA-15
M-285, 0.15 max C, 1.0 max Mn, 1.5 max Si, 11.5-14.0 Cr, 1.0 max Ni, bal Fe
Cast, normalize and temper 100,000 TS; 65,000 YS, 18 El, 228 Brin.
Heat treatable chromium stainless
ACI CA 15, AISI 410.

ACIPCO CF-8
M-285, 0.08 max C, 1.5 max Mn, 2.0 max Si, 18-21 Cr, 8-11 Ni, bal Fe
Cast: 70,000 TS, 30,000 YS; 30 El; 150 Brin.
Austenitic stainless castings. ACI CF-8; AISI 304.

ACIPCO CF-8M.
M-285, 0.08 max C, 1.50 max Mn, 1.50 max Si, 18-21 Cr, 9-12 Ni, 2-3 Mo, bal Fe.

Cast: 75,000 TS; 40,000 YS; 35 El; 160 Brin.
Austenitic stainless, for special corrosive conditions.
ACI CF-8M; AISI 316.

ACIPCO Cl 30.
M-285; 3.1-3.5 C, 0.4-0.7 Mn, 0.75 max P, 0.12 max S, 1.2-2.5 Si, bal Fe
Cast 30,000 TS, 200 Brin
Castings for engineering parts.

ACIPCO Cl. 40.
M-285; 2.8-3.3 C, 0.4-0.7 Mn, 0.40 max P, 0.12 max S, 1.6-2.2 Si, Si inoculated, bal Fe
Cast: 40,000 TS; 225 Brin.
Standard high strength gray iron.

ACIPCO Cl. 50.
M-285, 2.5-3.0 C, 0.4-0.7 Mn, 0.25 max P, 0.12 max S, 1.6-2.2 Si, Si inoculated, bal Fe
Cast: 50,000 TS; 269 Brin
For highly stressed engineering parts.

ACIPCO Cr Alloy
M-285, 3.2-3.6 C, 0.4-0.6 Mn, 0.75 max P, 0.12 max S, 0.5-1.0 Cr, bal Fe
Cast 240-300 Brin, For parts requiring increased hardness and wear resistance

ACIPCO Cr-Cu IRON
M-285, (C + Si adjusted), 0.4-0.7 Mn, 0.75 max P, 0.12 max S, 0.3-0.7 Cr, 0.8-1.2 Cu, bal Fe
Cast 40,000 TS, 235 Brin
Moderate hardness gray iron for rolls, etc

ACIPCO DUCTILE IRON
As per ASTM A339-55, 60-45-10
ASTM A339-55, 80-60-03

ACIPCO HEAT RESISTING IRON
M-285, 3.2 C, alloy bal Fe
Cast
For retorts for magnesium manufacture, heat and pressure resistant

ACIPCO HF
M-285, 0.20-0.40 C, 2.0 max Mn, 2.0 max Si, 19-23 Cr, 9-12 Ni, bal Fe
Cast 75,000 TS, 38,000 YS, 28 El, 165 Brin.
Austenitic stainless steel
ACI HF, AISI 302B

ACIPCO HH
M-285, 0.20-0.50 C, 2.0 max Mn, 2.0 max Si, 24-28 Cr, 11-14 Ni, bal Fe
Cast 75,000 TS, 38,000 YS, 15 El, 170 Brin
Austenitic stainless, for furnace parts, service to 2000°F
ACI HH, AISI 309

ACIPCO HK
M-285, 0.20-0.60 C, 2.0 max Mn, 2.0 max Si, 24-28 Cr, 18-22 Ni, bal Fe
Cast 70,000 TS, 38,000 YS, 15 El, 187 Brin
Completely austenitic stainless, service to 2000°F
ACI HK, AISI 310

ACIPCO HT
M-285, 0.35-0.75 C, 2.0 max Mn, 2.5 max Si, 13-17 Cr, 33-37 Ni, bal Fe
Cast. 68,000 TS, 35,000 YS, 5 El; 170 Brin
Good thermal shock resistance
ACI HT; AISI 330.

ACIPCO Ni-Cr-Mo IRON.
M-285; (C + Si adjusted), 0.4-0.7 Mn, 0.75 max P, 0.12 max S, 1.3-1.8 Ni, 0.2-0.4 Cr, 0.4-0.6 Mo, bal Fe.
Cast 270 Brin
Wear and heat resistant alloy for die parts, heat treatable

ACIPCO REGULAR.
M-285; 3.2-3.6 C, 0.4-0.7 Mn, 0.75 max P, 0.12 max S, 1.20-2.50 Si, bal Fe.
Cast: 25,000 TS.
General gray iron castings.

ACK DIE STEEL.
M-694; 1.0 C, 0.4 Cr, 0.2 V, 1.6 W, bal Fe.
For tools, dies; water hardening.

ACME
M-248; 35 Cr, 18 Ni, bal Fe
Annealed. 75,000 TS, 40 El; 60 RA
For resistances; now Alray D.

ACME 18-8 STAINLESS 302
M-568, 0.08-0.20 C, 18 Cr, 8 Ni, bal Fe
Annealed: 80,000 TS, 35,000 YS, 45 El; 65 RA; 150 Brin.
For chemical plant equipment, Type 302; stainless, austenitic

ACME 18-8 STAINLESS 304
M-568, 0.11 max C, 17-19 Cr, 7-9 Ni, bal Fe
Annealed: 75,000 TS, 32,000 YS, 45 El; 60 RA, 150 Brin.
For chemical plant equipment; Type 304, stainless, austenitic.

ACME COLORSTRIP
M-568, 0.2 C, bal Fe.
For ornamental architecture, cold rolled strip steel in colors

ACMEITE
M-1461, C, alloy, bal Fe
For die blocks, oil hardened

ACMELOY
M-654, 2.75-3.25 C, 1.00-1.75 Si, 0.65-1.75 Mn, bal Fe
Cast 30,000-60,000 TS, 175-275 Brin
Heat treated 75,000-85,000 TS, 400-600 Brin
For cast iron castings, gears, housings, shafts; high strength corrosion, heat and wear resistant.

ACMELOY.
M-1102, Cu alloy.
For resistance and spot welding electrodes.

ACME M
M-1142, 0.2 C, 18 Cr, 8 Ni, bal Fe
For heat resistant castings, corrosion and heat resistant

ACME NICKEL STEEL
Eng., 30.5 Ni, 14.2 Cr, 0.3 C, bal Fe.
For tanks and vessels to resist corrosion; stainless, corrosion resistant.

ACME SATIN STRIP
M-568, 0.8 C, 18 Cr, 8 Ni, bal Fe
For ornamental architecture; cold rolled stainless strip steel.

ACME STAINLESS 410
M-568, 0.12 max C, 12-14 Cr, bal Fe.
Annealed 75,000 TS, 40,000 YS, 35 El; 70 RA; 155 Brin
Cold drawn 100,000 TS, 85,000 YS; 17 El, 60 RA, 205 Brin
For springs, hardware, tableware, turbine blades, pistons, Type 410, corrosion resistant.

ACME STAINLESS 425.
M-568, 0.12 max C, 14-16 Cr, bal Fe
For chemical plant equipment; Type 425; corrosion resistant

ACME STAINLESS 430
M-568, 0.12 max C, 16-18 Cr, bal Fe.
Annealed 70,000 TS; 40,000 YS; 30 El, 55 RA; 140 Brin.

Cold drawn: 130,000 TS; 125,000 YS; 2 El; 185 Brin.
For automotive trim, kitchen sinks, fasteners, bolts; Type 430, corrosion resistant.

ACME STAINLESS STEEL TYPE 301X.
M-568; 0.10 C, 18 Cr, 8 Ni, bal Fe
For stainless parts, corrosion resistant.

ACMITE.
M-35; 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, 0.65 Mo, bal Fe.
For cutters, hobs, reamers, broaches, piercing, punches, drills; high speed steel, AISI Type T4.

ACMITE-L.
M-35, 0.50 C, 0.25 Mn, 4 Cr, 18 W, 1 V, bal Fe
For hot work dies and tools, hot work steel.

ACMONITAL
Italy; C, Cr, Ni, bal Fe.
For coins, stainless.

ACN3.
M-1176, 2.9-3.2 Cu, 1.5 Fe, 0.7 Si, 0.6 Mg, 0.2 Ti, 0.6 Ni, bal Al.
Heat treated 47,000-60,000 TS, 43,000-51,000 YS; 5-1 El; 115-150 Brin
For light alloy parts; age-hardened.

ACN10.
M-1176, 9.5-10.5 Cu, 0.8-1.2 Si, 0.3 Mg, 0.2 Ti, 1.3-1.7 Ni, bal Al
Heat treated: 45,000-54,000 TS, 37,000-48,000 YS, 1.0-0.5 El, 115-140 Brin
For engine cylinder heads, pistons, heat resistant

A-COPPER
M-789, 99 Cu, 1 Ni.
Hard: 58,000-67,000 TS
For electrical equipment and instruments
Resistance alloy Max working temperature to 200°C.

ACORN
M-375, 1.2 C, bal Fe
For tools, drills, oil or water hardened.

ACORN BRAND
M-214, 3.7 Cu, 7.4 Sb, special hardened, bal Sn
Cast. 12,500 TS, 22.5 El, 24 Brin
For gas and diesel engine bearings, Babbitt, low coefficient of friction.

ACRON.
M-249, 1 Si, 4 Cu, bal Al
Annealed 31,000-35,000 TS, 16,000-19,000 YS, 50-60 Brin
Heat treated. 42,000-60,000 TS, 28,000-40,000 YS, 90-100 Brin.
For automotive engine parts, age-hardenable, high strength

A.C.T
M-353, 0.65 C, 0.15 Mn, 18 W, 4.5 Cr, 2 V, 0.75 Mo, 10 Co, bal Fe.
For tools, drills, cutters, reamers; high speed steel.

ACT CARBIDE
M-353, WC + Co
For tools, cutters, sintered carbide

AC-WELD
M-607, 0.2 C, bal Fe.
Weld 65,000-70,000 TS; 28-30 El.
For welding rod, A.C. welding.

A-D-70.
M-355; 0.7 C, 0.35 Mn, 0.98 W, 0.3 Cr, 0.12 V, bal Fe
For dies, crimpers, punches, oil hardening

ADAMANT
M-1410; 1.45 C, 0.5 Cr, 0.25 V, 4.75 W, bal Fe.
For rifling tools, burnishing tools, water hardened, keen cutting edge

ADAMANTINE.
M-447; 0.7 C, 0.7 Cr, 0.7 Mn, bal Fe.
Heat treated. 145,000 TS; 77,000 YS, 6.5 El; 16.6 RA; 260-300 Brin.
For heat treat steel balls for grinding mills; wear resistant

ADAMANT SUPER-GENUINE BABBITT
M-178; Cu, Sb, bal Sn.
12,850 TS; 8,600 YS; 22.8 Brin.
For marine, airplane, diesel and other internal combustion engine bearings; Sp. Gr 7.34, tough.

ADAMANT XL
M-56; 1.25 C, 1.75 Ni, 3 Cr, 0.4 Mo, bal Fe.
For cold work tools and dies, oil hardened.

ADAMAS 5X.
M-1086, WC, TaC, TiC, Co.
Sintered 230,000 TrS, A 91.0 Rock
For rough machining steel
BHMA 5-5-5; ISO P30.

ADAMAS 6X
M-1086, WC, TaC, TiC, Co
Sintered 230,000 TrS, A 91.5 Rock.
For general purpose machining steel
BHMA 6-5-5, ISO P20

ADAMAS 7X
M-1086, WC, TaC, TiC, Co.
Sintered: 200,000 TrS, A 92.4 Rock
For finish machining steel
BHMA 9-3-5, ISO P10

ADAMAS 387.
M-1086, 89 WC, 11 Co
Sintered 365,000 TrS, A 90.2 Rock

ADAMAS 434
M-1086, WC TaC, TiC, Co
Sintered 270,000 TrS, A 91.0 Rock
For rough machining steel.
BHMA 5-7-5, ISO P40.

ADAMAS 474
M-1086; WC, Co, TaC
Sintered 300,000 TrS, A 90.0 Rock
For rough machining steel
BHMA 3-8-2, ISO P40

ADAMAS 484.
M-1086,
Sintered 230,000 TrS, A 91.1 Rock.
For rough machining steel
BHMA 5-5-4, ISO P40

ADAMAS 502
M-1086, 88 WC, 12 Co
Sintered. 390,000 TrS, A 88.0 Rock

ADAMAS 548
M-1086, WC, TaC, TiC, Co
Sintered 230,000 TrS, A 92.0 Rock.
For finish machining steel.
BHMA 8-5-4, ISO P10.

ADAMAS 569
M-1086, 90 WC, 10 Co.
Sintered. 370,000 TrS, A 88.5 Rock.

ADAMAS 619.
M-1086, (high in TaC).
Sintered 230,000 TrS, A 91.1 Rock.
For general machining at higher heat.

ADAMAS 783
M-1086, 89 WC, 11 Co
Sintered. 385,000 TrS; A 88.4 Rock.

ADAMAS 815.
M-1086; 91 WC, 9 Co.
Sintered: 340,000 TrS; A 89.2 Rock

ADAMAS A.
M-1086; 94 WC, 6 Co.
Sintered: 300,000 TrS; A 91.7 Rock.
For general purpose machining ferrous and non-ferrous metals. BHMA. 7-6-0, ISO K 20.

ADAMAS AA.
M-1086; 96 WC, 4 Co
Sintered: 240,000 TrS; A 92.0 Rock.
For finish machining ferrous and non-ferrous metals. BHMA 8-5-8; ISO K10, M10.

ADAMAS AAA
M-1086; 97 WC, 3 Co.
Sintered: 200,000 TrS, A 92.6 Rock.
For finish boring ferrous and non-ferrous alloys
BHMA 9-3-0, ISO KO1.

ADAMAS AM
M-1086; WC, Co, TaC
Sintered: 240,000 TrS, A 91.9 Rock.
For general purpose machining steel and cast iron.
BHMA 7-5-1, ISO M20.

ADAMAS B
M-1086, 91 WC, 9 Co
Sintered 300,000 TrS; A 90.5 Rock.
For rough machining ferrous and non-ferrous alloys.
BHMA 4-8-0, ISO K30

ADAMAS BB
M-1086; 87 WC, 13 Co
Sintered 360,000 TrS, A 89.4 Rock
For rough machining ferrous and non-ferrous metals
BHMA 2-9-0, ISO K40

ADAMAS C
M-1086, 76 WC, 15 TiC, 9 Co
Sintered 210,000 TrS, A 92.0 Rock.
For finish machining steel
BHMA 8-4-6, ISO P10

ADAMAS CC
M-1086, 80 WC, 16 TiC, 4 Co
Sintered 175,000 TrS, A 93.2 Rock.
For precision boring steel
BHMA 9-2-6, ISO PO1

ADAMAS D
M-1086; 82 WC, 8 TiC, 10 Co
Sintered: 240,000 TrS, A 91.0 Rock.
For general purpose machining steel
BHMA 5-5-4, ISO P20

ADAMAS DD
M-1086; 83 WC, 5 TiC, 12 Co
Sintered 260,000 TrS, A 90.5 Rock.
For rough machining steel
BHMA 4-6-3, ISO P50

ADAMAS GG
M-1086; WC, Co, TaC
Sintered: 290,000 TrS, A 89.2 Rock.
For rough machining steel
BHMA 2-8-5, ISO P50.

ADAMAS HD-15.
M-1086, 85 WC, 15 Co
Sintered: 400,000 TrS; A 87.4 Rock.
For lamination punches and dies and wear parts.

ADAMAS HD-20
M-1086, 80 WC, 20 Co.
Sintered: 385,000 TrS; A 85.5 Rock.
For heading dies, swaging dies, nail gripper dies.

ADAMAS HD-20T.
M-1086, 75 WC, 5 TaC, 20 Co.
Sintered: 380,000 TrS; A 85.3 Rock.
For small swaging dies and gripper dies where anti-galling properties are important.

ADAMAS HD-25.
M-1086; 75 WC, 25 Co.
Sintered: 360,000 TrS; A 83.5 Rock.
For dies where high impact strength coupled with high abrasion resistance are necessary.

ADAMAS HD-25T.
M-1086; 70 WC, 5 TaC, 25 Co.
Sintered. 380,000 TrS, A 83.5 Rock.
For dies requiring maximum impact strength and anti-galling properties.

ADAMAS PWX.
M-1086; WC, Co, TaC.
Sintered: 230,000 TrS; A 92.3 Rock
For finish machining steel.
BHMA 9-5-1; ISO M10, KO5

ADAMAS TITAN 60.
M-1086; TiC, Mo_2C, Ni.
Sintered: 235,000 TrS; A 91.9 Rock.
For rough machining ferrous and non-ferrous alloys, including superalloys.

ADAMAS TITAN 80.
M-1086, TiC, Mo_2C, Ni.
Sintered: 200,000 TrS, A 93.0 Rock.
For finish machining and boring ferrous and non-ferrous alloys, including superalloys.
BHMA 9-2-9, ISO PO1, P10

ADAMITE
M-229; high C, 1 Cr, 0.75 Ni, bal Fe.
For press dies, rolls, mill guides, furnace parts, castings, cast iron-pearlitic, wear resistant.

ADAPTALOY
M-815; 1.8 Cu, 1.0 Si, 1.0 Mg, bal Zn
Cast 22,000-25,000 TS, 8000-10,000 YS; 11-7 El, 48 Brin
For ornamental grills, valve handles, structural castings, high elongation and impact strength.

ADIC
M-1112, 0.37 C, 1.1 Si, 5 Cr, 1 V, 1.3 Mo, bal Fe.
Annealed 230 Brin.
For die casting dies, hot forging dies; hot work steel, air hardened.

ADIC C T U
M-1112; 0.37 C, 1.1 Si, 5 Cr, 1.75 W, 1 V, 1.3 Mo, bal Fe
Annealed 230 Brin.
For die casting dies, shear blades, slitters; hot work steel, air hardened

ADLERSTAHL 1W.
M-1330, 1.0 C, 0.25 Si, 0.07 Mn, 1.1 Cr, bal Fe.
For bearings, races, liners, sleeves; water hardened, wear resistant.

ADLERSTAHL 3 MH
M-1330, 1.1 C, 0.25 Si, 0.25 Mn, bal Fe.
Annealed: 105,000 TS, 55,000 YS; 20 El; 40 RA, 205 Brin.
For drills, hobs, reamers, dies, cutters; Type W1, water hardened.

ADLERSTAHL 4 ZH.
M-1330, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS, 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, taps, lathe and planer tools, cutters; Type W1; water hardened.

ADLERSTAHL 5 ZAH
M-1330; 0.85 C, 0.25 Si, 0.25 Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 12 El; 35 RA; 400 Brin
For drills, taps, tools, springs, cutters; Type W1; water hardened.

ADLERSTAHL AZ1.
M-1330; 1.05 C, 1.0 Cr, 1.15 W, 0.9 Mn, bal Fe.
For bearings liners, cutters, forming dies; water hardened.

ADLERSTAHL B11.
M-1330; 1.0 C, 0.2 Si, 0.25 Mn, 0.1 V, bal Fe.
For drills, taps, punches, reamers, hobs; Type W2; water hardened.

ADLERSTAHL C1.
M-1330; 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe
For bearings, sleeves, liners; water hardened, wear resistant

ADLERSTAHL C13.
M-1330, 2.1 C, 11.5 Cr, 0.3 Mn, bal Fe.
For blanking and forming dies, punches; oil hardened, nondeforming.

ADLERSTAHL C13TU.
M-1330; 2.1 C, 11.5 Cr, 0.3 Mn, bal Fe.
For blanking and forming dies, punches; oil hardened, nondeforming

ADLERSTAHL C13W
M-1330; 1.65 C, 11.5 Cr, 0.1 V, bal Fe
For blanking and forming dies, punches, oil hardened, nondeforming.

ADLERSTAHL EC2
M-1330, 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For reamers, taps, form cutters, drills, hobs, Type W1; water hardened.

ADLERSTAHL EC3.
M 1330; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 110,000 TS, 55,000 YS, 18 El; 38 RA; 210 Brin
For reamers, drills, taps, cutters, broaches; Type W1, water hardened

ADLERSTAHL EC4
M-1330, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed: 100,000 TS, 53,000 YS, 21 El; 42 RA, 200 Brin
For springs, tools, cutters, drills, reamers, Type W1, water hardened.

ADLERSTAHL EC5
M-1330; 0.85 C, 0.25 Si, 0.25 max Mn, bal Fe
Heat treated. 190,000 TS, 145,000 YS, 10 El; 30 RA; 400 Brin
For springs, tools, drills, cutters, taps, hammers, Type W1, water hardened

ADLERSTAHL EC6
M-1330, 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated. 175,000 TS; 128,000 YS. 12 El; 37 RA, 355 Brin.
For springs, tools, rails, axes, Type W1, water hardened

ADLERSTAHL EGH1.
M-1330; 0.35 C, 0.9 Si, 0.3 Mn, 1.05 Cr, 0.18 V, 1.85 W, bal Fe
For header dies, upsetters, crimpers, punches, oil hardened, tough

ADLERSTAHL EGH3
M-1330, 0.55 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe
For header dies, upsetters, shears, crimpers, oil hardened, tough.

ADLERSTAHL EXTRA
M-1330, 0.86 C, 4 Cr, 2.5 V, 0.85 Mo, 12 W, bal Fe.
For reamers, taps, drills, hobs, broaches; high-speed steel

ADLERSTAHL EXTRA P12
M-1330; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps; high-speed steel.

ADLERSTAHL GCN1.
M-1330; 0.55 C, 0.7 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For gears, shafts, bolts, studs, crankshafts; oil hardening, shock resistant.

ADLERSTAHL GCN2.
M-1330; 0.56 C, Ni, Cr, Mo, V, bal Fe.
For gears, fasteners, bolts, studs; oil hardened, shock resistant.

ADLERSTAHL GDM.
M-1330; 0.30 C, 1.0 Si, 1.1 Cr, 0.18 V, 3.75 W, bal Fe
For header dies, upsetters, crimpers; oil hardened, tough

ADLERSTAHL KJ.
M-1330, 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, reamers, broaches; high-speed steel.

ADLERSTAHL KT
M-1330, 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2 V, 12 W, bal Fe
For lathe and planer tools, drills, taps, reamers, high speed steel

ADLERSTAHL NI.5H
M 1330, 0.50 C, 1.05 Cr, 3.25 Ni, 0.50 Mn, bal Fe
For gears, bolts, crankshafts, dies, punches, oil hardened, shock resistant

ADLERSTAHL NWO
M-1330, 0.45 C, Ni, Cr, bal Fe
For gears, bolts, crankshafts, oil hardened, shock resistant

ADLERSTAHL 03
M-1330, 1.0 C, 1.1 Cr, 0.25 Si, 0.07 Mn, bal Fe
For bearings, races, liners, sleeves, water hardened, wear resistant

ADLERSTAHL P15
M-1330, 1.35 C, Cr, V, W, Co, bal Fe
For reamers, broaches, cutters, taps, high speed steel

ADLERSTAHL PM35
M-1330, 0.38 C, Si, Cr, V, bal Fe
For gears, springs, punches, bolts, shafts; oil hardened, tough

ADLERSTAHL P45
M-1330, 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe
For reamers, broaches, cutters, taps, high-speed steel

ADLERSTAHL PM45
M-1330, 0.45 C, Si, Cr, V, bal Fe
For springs, bolts, crankshafts, gears, oil hardened, shock resistant

ADLERSTAHL PM50
M-1330, 0.61 C, 1.18 Cr, 0.10 V, 0.75 Mn, 0.85 Si, bal Fe
For upsetters, heading and forging dies, oil hardened, tough

ADLERSTAHL PROPHET EXTRA.
M-1330, 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2 V, 12 W, bal Fe
For lathe and planer tools, cutters, reamers, high-speed steel

ADLERSTAHL PZM.
M-1330; 1.4 C, 0.1 V, 0.30 Cr, 0.30 Mn, bal Fe
For bearings, forming and blanking dies, water or oil hardened, wear resistant

ADLERSTAHL RO
M-1330, 1.42 C, W, V, bal Fe
For blanking and forming dies, bearings, water or oil hardened, wear resistant.

ADLERSTAHL SICR.
M-1330; 1.1 C, 0.40 Cr, 0.30 Mn, bal Fe.
Heat treated: 190,000 TS; 120,000 YS; 10 El; 30 RA; 375 Brin
For springs, taps, cutters, drills, reamers; Type W1; water hardened.

ADLERSTAHL SPEZIAL M25.
M-1330; 0.95 C, W, Mo, bal Fe.
For cutters, punches, dies; oil hardened.

ADLERSTAHL WKS.
M-1330; 0.55 C, 1.05 Cr, 0.18 V, 1.85 W. 0.9 Si, bal Fe.
For upsetting and heading dies, punches, oil hardened tough.

ADLERSTAHL WPS.
M 1330; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion rams and dies, hot punches; oil hardened, hot work steel.

ADLERSTAHL WPS-EXTRA.
M-1330; 0.30 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe.
For extrusion rams and dies, hot punches; oil hardened, hot work steel

ADLERSTAHL V
M-1330, 0.8 C, 4.7 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe
For lathe and planer tools, taps, reamers, high-speed steel

ADMIRALTY BRASS
M-8, 62 Cu, 37 Zn, 1 Sn.
Cast 56,000 TS, 27,000 YS, 15 El, 25 RA
Rolled hard 71,680 TS, 55,500 YS; 20 El; 30 RA
For pump rods, sheets.

ADMIRALITY BRASS
M-286, M-1560, 70 Cu, 1 Sn, 0.04 As, bal Zn
Annealed 40,300-49,300 TS, 18,000-22,400 YS, 60-75 El, 54-73 Brin
Hard. 71,700-87,400 TS, 60,000-76,000 YS, 8-15 El, 145-175 Brin.
Good resistance to sea air, for fixtures on marine equipment

ADMIRALTY BRONZE MODIFIED
M-126, 86 Cu, 8 Sn, 2 Pb, 4 Zn.
For valves, fittings, pressure tight

ADMIRALTY CAG.
M-657, 87 Cu, 9 Sn, 4 Zn or 88 Cu, 10 Sn, 2 Zn
Cast 36,000 TS, 18,000 YS, 20 El.
For marine castings, resists marine corrosion

ADMIRALTY GUN METAL.
M-711, 87.7 Cu, 10.3 Sn, 1.4 Zn, 0.4 As, 0.08 Pb, 0.05 Fe.
Cast 37,300 TS, 21,300 YS, 9 El, 100 Brin.
For valves, pump parts, corrosion resistant.

ADMIRALTY METAL
M-33, 70-73 Cu, 0.9-1.2 Sn, 0.07 max Pb, 0.06 max Fe, bal Zn
Annealed: 45,000 TS, 18,000 YS; 60 El, 70 Brin.
Hard. 100,000 TS, 98,000 YS, 4 El; 210 Brin.
For condenser tubes, ferrules, distiller tubes, reduced dezincification, corrosion resistant

ADMIRALTY NICKEL.
M-126, 70 Cu, 29 Zn, 1 Ni
For condenser tubes, corrosion resistant

ADMIRALTY WHITE METAL
Eng.; 8-9 Sb, 2-7 Cu, bal Sn.
For bearings.

ADMIRO.
M-2; 48 Cu, 10 Ni, 35 Zn, 2 Al, 3 Mn, 2 Fe.
Cast: 57,000-70,000 TS, 40-20 El, 110-130 Brin.
Hot pressed: 63,000-76,000 TS; 40-25 El; 150-170 Brin.
For turbine bearings, tubes; corrosion resistant.

ADMIRO V.
M-2, 43 Cu, 15 Ni, 35 Zn, 2 Al, 3 Mn, 2 Fe.
Cast: 18-5 El; 160 Brin.
Pressed: 20-8 El, 185 Brin.
For turbine bearings; corrosion resistant

ADMOS.
M-2, 40-55 Cu, 3-15 Ni, 1-3 Mn, 1-2 Fe, 0.5-3.0 Al, bal Zn
Cast 56,000-71,680 TS; 35-20 El; 80-90 Brin.
Hot pressed: 69,440-85,120 TS; 35-20 El; 90-120 Brin.
For bearing bushes, worm wheels, condenser tubes, turbine blading, gear wheels, valves; resists corrosion and erosion of superheated steam.

ADRIATICAL.
M-658; 4-5 Cu, bal Al.
For light alloy parts; similar to Duralumin

ADVALOY
M-1462; Al alloy.
For castings, permanent mold.

ADVANCE
M-44, 54-55 Cu, 44-46 Ni
Rolled. 62,000 TS, 40,000 YS; 40 El; 75 RA.
For rheostats, electrical instrument work, resistance metal, similar to Constantan and Ideal.

ADVANCE
M-585, Cu, Sb, bal Sn.
For bearings, Babbitt metal

ADVANCED DUTY OILITE BRONZE.
M-211, 87.5-90.5 Cu, 1.0 max Fe, 1.75 max C, 9.5-10.5 Sn
Sintered 16,000-18,000 TS, 15,000-20,000 YS; 6.8-7.2 density.
Oilite bearing material
ASTM B255-61 Type 11, SAE 842, PMPMA BT-0010-S

A.E.B. STAINLESS.
M-111a, 0.95 C, 1 Mn, 13.5 Cr, bal Fe
For razor blades, surgical instruments, hardenable, corrosion resistant

AELENER ZINC
3 Sb, 3.5 Cu, 21.6 Pb, 20.5 Sn, 51.4 Zn.
For solder, bearings

AEM 90.
M-1246
For permanent magnets, sintered.

AEM 120
M-1246
For permanent magnets, sintered

AEONITE
M-453; Ni, bal Cu
For sanitary appliances, white metal.

AERAL.
M-187, 2.0-4.5 Cu, 0.2-1.5 Mg, 0.7 Si, 0.3 Mn, 0.5-2.5 Cd, bal Al
Cast 31,500 TS; 25,000 YS; 3 El; 90 Brin
For casings, housings, oil pans
Age-hardenable, good machinability

AERAL
M-623; 3.5-4.5 Cu, 0.4-1.0 Mn, 0.3-0.75 Mg, bal Al.
56,000-75,000 TS, 30,000-55,000 YS, 20-10 El.
For light alloys, airplane and dirigible parts; "Duralumin" type alloy; age-hardening.

AERAL A
M-623; 2.0-4.5 Cu, 0.2-1.5 Mg, 2.5 max Si, 0.8 max Fe, 0.4 max Ti, 0.5-2.5 Cd, 0.5 max Mn, bal Al.

Solution treated: 28,000-34,000 TS; 22,000-24,000 YS; 5-3 El.
For sand and chill castings; heat treatable.

AERALLOY.
M-237; Pt alloy.
For electrical contacts; heat resistant.

AERALLOY NO. 1.
M-237; Ir, bal Pt.
For electrical contacts, vibrators, temperature gages; resists arc erosion.

AERALLOY NO. 2.
M-237; Ir, bal Pt.
For electrical contacts, vibrators, thermostats, resists arc erosion.

AERISWELD.
M-578; 0.05 P, 7.0 Sn, 0.1 Al, 0.02 Pb, bal Cu.
Bronze arc welding electrode
AWS Class E CuSn-C.

AEROLITE.
M-28; 12 Cu, 2 Mn, bal Al.
Cast: 22,000 TS; 14,000 YS; 60 Brin.
For pistons, automobile parts; good machinability.

AEROLITE.
English; 97 Al, 1.2 Cu, 1.0 Fe, 0.5 Si, 0.4 Mg
For pistons, auto parts.

AERO METAL (Cast).
M-287, 4.2 Cu, 27.8 Zn, 0.5 Fe, 0.5 Si, 67 Al.
Cast: 25,000 TS.
For automotive engine parts; cast.

AERO METAL (Sheet).
M-287; 0.2-0.6 Cu, 2.1-2.9 Mg, 96 Al, 0.3-1.3 Fe
Rolled: 20,000 TS
For automotive engine parts; sheet

AEROMIN.
Germ.; 92.7 Al, 6.2 Mn, 0.8 Fe, 0.3 Si.
For light alloy parts

AERON.
M-320, M-299, 1.8 Cu, 0.8 Mn, 1.0 Si, bal Al.
Heat treated: 54,000-60,000 TS; 26,000-34,000 YS; 18-25 El; 90-120 Brin.
For light alloy parts, heat treatable.

AERON.
M-584; 4.5 Cu, 0.75 Si, 0.75 Mn, bal Al.
Annealed: 23,000-35,000 TS, 7,000-12,000 YS; 12-20 El; 45-55 Brin
Quenched. 45,000-53,000 TS, 15,000-30,000 YS; 15-22 El; 68-85 Brin
For light anti-corrosive alloy parts; light anti-corrosion alloy. Similar to Alcoa No. 25S.

AEROSIL 8F
M-1323, 0.12 max C, 0.8 Al, 6.5 Cr, bal Fe
For oil refining equipment; creep and heat resistant.

AEROSIL 9F.
M-1323; 0.12 max C, 1.0 Al, 13 Cr, bal Fe.
For oil refinery and chemical plant equipment; corrosion and heat resistant.

AEROSIL 10A.
M-1323; 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment; Type 302; stainless, austenitic.

AEROSIL 10F.
M-1323; 0.12 max C, 1.0 Al, 18 Cr, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 160 Brin.
For oil refinery equipment; corrosion and heat resistant.

AEROSIL 11FO.
M-1323; 0.2 C, 25 Cr, 4 Ni, bal Fe.
For furnace parts, heat treating boxes; heat resistant.

AEROSIL 12A.
M-1323; 0.15 C, 24 Cr, 19 Ni, bal Fe.
For furnace equipment heat treating boxes, pots; Type 310; stainless, austenitic.

AEROSIL 12F.
M-1323, 0.12 max C, 1.5 Al, 24 Cr, bal Fe.
For furnace parts, conveyors, boxes, fixtures; heat and creep resistant.

AETERNA.
60.4 Cu, 0.2 Pb, 0.1 Mn, 0.3 Sn, 39 Zn.
For marine hardware; corrosion resistant

AETERNA 600 METAL
M-953, 60 Cu, 40 Zn, Mn, Si.
85,000-90,000 TS.
For gears, levers, cams, cranks; high strength.

AF 1753.
M-U S, 0.24 C, 16.25 Cr, 7.2 Co, 1.6 Mo, 8.4 W, 3.1 Ti, 1.9 Al, 0.06 Zr, 0.008 B, 9.5 Fe, bal Ni
At 70°F 187,000 TS, 121,200 SS.
At −320°F: 217,100 TS
At −423°F 219,400 TS, 149,200 SS
For cryogenic fasteners
Good tensile-impact properties.

AFCOLOY 18-8
M-159, 0.2 max C, 1.5 max Mn, 2 max Si, 18-21 Cr, 8-11 Ni, bal Fe.
Annealed: 80,000 TS, 40,000 YS, 45 El; 50 RA; 150 Brin
For stainless castings, chamical plant equipment; ACI-CF 20, stainless, austenitic

AFCOMET 150-12
M-159, 1.4-1.8 C, 0.5-1.25 Mn, 0.25-1.0 Si, 12-14 Cr, bal Fe.
Cast. 50,000 TS; 500 Brin
For forging dies, gauges, tools, Tr S 4000; Ti.D 0.10, wear resistant

AFFRFEZF-III
M-448; 0.15 max C, 1.3 Mn, 0.25 Mo, 0.07 V, bal Fe
For nuclear parts, pressure vessels.
Good creep strength Maximum service life of 790°F.

A-G5.
French, 5 Mg, 0.5 Mn, bal Al.
For automobile chassis, light weight construction

AGATHON ARMATURE.
M-97, 0.5 Si, bal Fe
For electric motors, high permeability

AGATHON DYNAMO
M-97, 2.5 Si, bal Fe
For dynamos; high permeability.

AGATHON ELECTRIC.
M-97, 1.0 Si, bal Fe
For electric motors, high permeability

AGATHON SPECIAL ELECTRIC
M-97, 1.2 Si, bal Fe
For electric motors; high permeability

AGGERLIT A.
M-614, 0.3 C, 2.2 Si, 6 Cr, bal Fe.
For oil refinery equipment, heat resistant.

AGGERLIT B.
M-614; 0.5 C, 1.5 Si, 17 Cr, bal Fe.
For heat treating boxes, furnace parts, fixtures; corrosion and heat resistant.

AGGERLIT C.
M-614; 0.6 C, 1.5 Si, 22 Cr, bal Fe.
For furnace parts and equipment, fixtures; corrosion and heat resistant.

AGGERLIT D.
M-614; 0.6 C, 1.5 Si, 22 Cr, bal Fe
For furnace parts and equipment; fiixtures; corrosion and heat resistant.

AGGERLIT E.
M-614, 0.6 C, 1.5 Si, 29 Cr, bal Fe
For furnace parts and equipment, fixtures, heat resistant.

AGGERSTAHL
M-614, 1.45 C, 1.4 Cr, 0.25 Si, 0.6 Mn, bal Fe.
For bearings, sleeves, liners, water hardened, wear resistant.

AGILE ACTARC.
M-661; pure Fe or low alloy steel.
For welding electrodes, for sheet metal

AGILE NO. 200
M-661, 15 Sn, bal Cu.
For welding and brazing rods, coated, M.P. 1596°F.

AGILE SILVER A-C ELECTRODE
M-661, 0.9 C, 0.7 Mn, 0.7 Cr, 1.5 W, bal Fe.
400-650 Brin
For welding electrodes, deposit should be heat treated

AGILE SILVER BLACK.
M-661, 0.6 C, 12 Cr, 8 Mo, 8 W, 1.5 B, bal Fe
For welding high speed steel cutters; high speed steel

AGILE SILVER CHISEL.
M-661, 0.8-1.0 C, 1.0 Si, 1.5 W, 0.3-0.5 B, bal Fe.
400-620 Brin
For welding electrodes for chisels and shock resisting tools, tough, shock resisting

AGILE SILVER D-C-ELECTRODE
M-661, 1.8-2.2 C, 12-14 Cr, 0.5 V, 0.8 Mo, bal Fe
400-640 Brin
For welding electrodes for punches and cold working dies, must be heat treated.

AGILE SILVER RED
M-661, 0.75 C, 4 Mo, 6 W, 4 Cr, 0.8 B, bal Fe.
For welding high speed steel tools, high speed steel.

AGILE YELLOW ROD
M-661, 67 Ni, 31 Cu, 0.2 B
190 Brin
For welding, electrode for cast iron, machinable.

AGMOLITE.
M-237, Ag-Mo.
For electrical contacts for circuit breakers; sintered

AGNILITE
M-237, Ag, Ni
For electric contacts for circuit breakers, sintered.

AGRAPHITE
M-237, Ag-graphite
For electrical contacts for circuit breakers; sintered

AGRICOLA
M-221; 70 Cu, 30 Pb.
For diesel egine bearings, seals, heavy duty

AGRICOLA BRONZE.
M-699, 70 Cu, 1 Ag, 29 Pb
For bearings, bushings.

AGRILITE BEARING METAL
M-128; 70 Cu, 5 Sn, 25 Pb.
25,000 TS; 16,350 YS, 50 Brin.
For bearings for rolling mill, thrust bearings on steam boats, bearing for washing and ironing machines; self lubricating bearing bronze.

AGRILITE NO. 5.
M-128; 70.49 Cu, 5.39 Sn, 24.0 Pb, 0.09 Ni, 0.005 P.
For connecting rod bearings for aero engines, rolling mill bearings, self lubricating bearing bronze

AH NO. 2.
M-926, 30 Ag, 52.45 Cu, 9.75 Zn, 7.8 Ni.
For brazing; M.P. 1400-1735°F.

AHB-300
M-Russia; 15.5 Cr, 8.5 W, Ti, Al, Fe, 0.10 max C, 0.10 max B, bal Ni
For automotive turbines, aircraft gas turbines.
Good creep and rupture strength. High oxidation resistance.

A.H. CHROME DIE
M-1406, 1.0 C, 5 Cr, 1 Mo, 0.3 V, bal Fe
For dies, gages, mandrels; cold work steel, air hardened, non-deforming.

AICH METAL
Eng., 59.37 Cu, 39.68 Zn; 0.95 Fe.
Cast: 60,000 TS, 21,000 YS, 44 El, 45 RA, 90 Brin.
Forged: 64,500 TS; 31,000 YS, 44 El; 64 RA, 107 Brin
For hydraulic cylinders and forgings, resists oxidation, similar to "Sterro."

AICMA FE PL 52 S (Vascojet 90)
M-1723, 0.12-0.18 C, 0.20 max Si, 0.80-1.10 Mn, 1.25-1.50 Cr, 0.80-1.0 Mo, 0.20-0.30 V, bal Fe
Air or oil hardenable
Hardened: 140,000-184,000 TS, 112,000 min YS, 10 min El
High strength, weldable, low carbon-low alloy steel, can be case hardened for improved wear
AFNOR 15 CDV 6

AIDION
M-587, Sb, Pb, bal Sn
For bearings, antifriction metal

AIKEN METAL
U.S.; 50 Cu, 50 Pb
For plastic metal parts

AIR-4.
M-24, 0.95 C, 2.0 Mn, 2.2 Cr, 1.1 Mo, 0.15-0.35 Pb, bal Fe
General purpose tools, cold forming dies, blanking dies, forming rolls, knurling tools
Free machining type
Type A4 air hardening tool steel

AIRALOY see A-4

AIR-CHROM
M-335, 1.0 C, 0.6 Mn, 5.25 Cr, 0.25 V, 1.1 Mo, bal Fe
For tools, dies
AISI A2 air hardening tool steel.

AIRCO NO. 1
M-663, 0.15 max C, 0.45 Mn, 0.2 Si, 1.0-1.5 Ni, 0.3 max Cr, bal Fe
Low alloy steel welding rod, for gas or tungsten inert gas welding of carbon and low alloy steels
As welded: 62,000 TS, 22 El
AWS RG 60.

AIRCO NO. 4
M-663, 0.08-0.20 C, 0.9-1.2 Mn, 0.15-0.30 Si, bal Fe.
Low alloy steel welding rod, for gas or tungsten inert gas welding of carbon and low alloy steels
As welded: 62,000-67,000 TS; 20-25 El.

AIRCO NO. 7.
M-663, 0.06 max C, 0.25 max Mn, bal Fe
Low carbon steel welding rod, copper coated, for gas welding of low carbon steel sheet, plate and pipe, and for auto body repair.
As welded: 52,000 TS; 23 El.
AWS RG 45.

AIRCO NO. 9.
M-663; 3.25 C, 0.6 Mn, 3.0 Si, bal Fe.
Square cast iron gas welding rod,-for general gas welding of grey cast iron.
AWS-ASTM RCI.

AIRCO NO. 10.
M-663; 3.3 C, 0.6 Mn, 2.25 Si, 1.4 Ni, 0.35 Mo, bal Fe.
Square low alloy cast iron rod,-for welding low alloy gray irons.
AWS-ASTM RCI-A.

AIRCO NO. 20 BRONZE ROD.
M-663; 0.5-1.0 Sn, 60 Cu, 0.06 max Fe, bal Zn.
Bare or coated rod for braze-welding copper, bronze and nickel alloys. Fuses readily at 1625°F; strength: 40,000 TS min.
AWS RB CuZn-A.

AIRCO NO 21 NICKEL SILVER ROD.
M-663; 46-50 Cu, 9-11 Ni, bal Zn.
Bare or coated rod for joining dissimilar metals as mild steel, tool steel, cast iron, stainless steel, monel, inconel, bronze, copper, malleable iron 70,000 min. TS
AWS RB Cu Zn-D

AIRCO NO 22 MANGANESE BRONZE ROD.
M-663, 59 Cu, 0.4 Fe, 0.23 Mn, 1.0 Sn, 0.3 Ni, bal Zn.
Bare or coated rod for braze-welding steel, cast iron, malleable iron, copper base alloys and to build up wearing surfaces and bearings 45,000 min. TS.
AWS R Cu Zn-B.

AIRCO NO 23 A SILICON COPPER ROD
M-663, 0.65-0.90 Sn, 0.1-0.3 Si, 0.1-0.25 Mn, 0.15 max P, bal Cu (deoxidized).
Bare rod for TIG welding; 25,000 TS.
AWS R Cu.

AIRCO NO 27 LOW FUMING BRONZE ROD
M-663, 56-59 Cu, 0.4-0.8 Fe, 0.1 Si, 0.3 Mn, 1.0 Sn, bal Zn.
Bare or coated rod, low fuming, for general purpose braze-welding of steel, cast iron, brass and bronze 50,000 TS min.
AWS R Cu Zn-C.

AIRCO NO. 28.
M-663, 56.5-58.5 Cu, 0.1-0.3 Si, 2.1-2.7 Sn, bal Zn
For bronze welding rod, for wear resistant surfaces

AIRCO 35-Ni 15-Cr TITANIA
M 663, 0.07 C, 1.8 Mn, 16 Cr, 35 Ni, 0.9 Mo, bal Fe
For welding rod, heat and corrosion resistant.

AIRCO 43
M-663, 5% Si Aluminum base electrode, coated, DC reverse polarity
For arc welding aluminum
AWS-ASTM Al-43.

AIRCO 46.
M-663; Coated electrode, DC reverse polarity.
Deposit analysis 0.6 C, 0.2 Mn, 0.1 Si, bal Fe
Hardness 20-25 Rock C.
For build-up to resist abrasion and impact, for excavator bucket fingers, locomotive tire flanges, rails and switches.

AIRCO 57.
M-663; 4.5-6.0 Si, 0.8 Fe, 0.3 Cu, 0.1 Zn, 0.2 Ti, bal Al
General purpose aluminum electrode, coated, DC reverse polarity.
As welded. 14,000 TS min
For welding aluminum alloys 6061, 6063, 5052, 5154, 5454, 3003 and 2024.
AWS-ASTM Al-43

AIRCO 70.
M-663; 4.25 Sn, 0.5 Fe, 0.15 Zn, 0.10 P, 0.10 Si, bal Cu.
Phosphor bronze brazing rod, coated: DC reverse polarity.
As welded: 40,000 TS, 20,000 YS; 15 El; 75 Brin.
For joining brass, bronze, copper, steel, cast iron, malleable iron
AWS-ASTM E Cu Sn-A

AIRCO 77
M-663, 0.10 C, 0.22 Mn, 0.17 Si, bal Fe.
AC-DC reverse polarity coated electrode
For arc welding cast iron cylinder blocks and heads, bearing blocks, machine parts, large frames.
AWS-ASTM E St.

AIRCO NO 92 SILICON BRONZE ROD
M-663, 95.8 Cu, 3.0 Si, 1.0 Mn, 1.0 Zn.
Tin coated rod for brazing galvanized iron by carbon arc process or TIG
AWS R Cu Si-A

AIRCO 100
M-663, 9.0-11.0 Al, 1.5 max Fe, bal Cu
Aluminum bronze brazing rod, coated, DC reverse polarity.
As welded 77,000 TS, 35,000 YS; 27 El, 120 Brin
For welding and build-up on brass, manganese bronze, aluminum bronze and dissimilar metals
AWS-ASTM E Cu Al-A2

AIRCO 116
M-663, 11.0-12.0 Al, 3.0-4.25 Fe, bal Cu
Aluminum bronze brazing rod, coated, DC reverse polarity
As welded: 89,000 TS, 47,000 YS, 15 El, 160 Brin
For overlays on bearing surfaces that are subjected to shock or impact loading, and for joining many dissimilar metals.
AWS-ASTM E Cu Al-B

AIRCO 120
M-663, 12.0-13.0 Al, 3.0-5.0 Fe, bal Cu
Aluminum bronze brazing rod, coated, DC reverse polarity
As welded 90,000 TS, 46,000 YS, 4 El, 200 Brin
For surfacing and overlays for good wear and strength for severe service
AWS ASTM E Cu Al-C

AIRCO 125
M-663, 13.0-14.0 Al, 3.0-5.0 Fe, bal Cu Aluminum bronze brazing rod, coated; DC reverse polarity
As welded 77,000 TS, 54,000 YS, 1.0 El, 250 Brin
For surfacing and overlays for rebuilding aluminum bronze dies or finish layer on ferrous dies to reduce galling.
AWS-ASTM E Cu Al-D

AIRCO 130
M-663, 14.0-15.0 Al, 3.0-5.0 Fe, bal Cu
Aluminum bronze brazing rod, coated, DC reverse polarity
As welded 80,000 TS, 69,000 YS, 0 El, 300 Brin
For overlaying dies, shafts, bearings to minimize scratching and galling
AWS-ASTM E Cu Al-E

AIRCO 308.
M-663, 19 Cr, 9 Ni stainless welding rod; bare wire, cut lengths
AWS ER 308, AISI 308.

AIRCO 308 AC-DC
M-663, 0.07 C, 20 Cr, 10 Ni, 1.7 Mn, 0.4 Si, bal Fe.
AC-DC reverse polarity titania coated electrode.
For welding Austenitic 18-8 type stainless steels
AWS-ASTM E 308-16, AISI 308

AIRCO 308 DC.
M-663; 0.05 C, 19 Cr, 10 Ni, 1.8 Mn, 0.3 Si, bal Fe.
DC reverse polarity lime coated electrode
For welding austenitic 18-8 type stainless steels.
AWS-ASTM E 308-15, AISI 308.

AIRCO 308 ELC.
M-663; Low carbon grade of 308.
For welding AISI 304L, 321 and 347 stainless steels.
AWS ER 308 L; AISI 308 L.

AIRCO 308 ELC AC-DC
M-663; 0.03 C, 20 Cr, 10 Ni, 1.9 Mn, 0.4 Si, bal Fe.
AC-DC reverse polarity titania coated electrode
For welding 304 L, 321, 347 and other 18-8 stainless steels
AWS-ASTM E 308 L-16; AISI 308 ELC.

AIRCO 309
M-663, 25 Cr, 12 Ni stainless welding rod, bare wire, cut lengths.
For welding AISI 309 Stainless steel
AWS ER 309, AISI 309

AIRCO 309 AC-DC
M-663, 0.10 C, 24 Cr, 13 Ni, 1.8 Mn, 0.55 Si, bal Fe
AC-DC reverse polarity titania coated electrode
As welded 89,000 TS, 65,000 YS; 42 El.
For welding austenitic type 309 stainless.
AWS-ASTM E 309-16, AISI 309

AIRCO 309 Cb AC-DC
M-663, 0.09 C, 24 Cr, 13 Ni, 2.1 Mn, 0.55 Si, 0.85 Cb, bal Fe.
AC DC reverse polarity titania coated electrode
As welded: 90,000 TS, 70,000 YS, 35 El
AWS-ASTM E 309 Cb-16, AISI 309 Cb

AIRCO 309 DC
M-663; 0.07 C, 23 Cr, 12.75 Ni, 1.9 Mn, 0.7 Si, bal Fe
DC reverse polarity lime coated electrode
As welded 89,000 TS, 63,500 YS, 42 El.
For welding austenitic type 309 stainless.
AWS-ASTM E 309-15, AISI 309

AIRCO 310
M-663; 25 Cr, 20 Ni, stainless welding rod, bare wire, cut lengths
For welding AISI 310 stainless by TIG or oxyacetylene (with flux) methods, for elevated temperature operations
AWS ER 310, AISI 310

AIRCO 310 AC-DC
M-663, 0.11 C, 26.5 Cr, 21.0 Ni, 1.8 Mn, 0.5 Si, bal Fe.
AC-DC reverse polarity titania coated electrode
As welded. 91,000 TS, 61,000 YS; 36.5 El
For welding austenitic types 310 and 314 stainless steels
AWS-ASTM E 310-16, AISI 310

AIRCO 310 Cb AC-DC.
M-663, 0.11 C, 26 Cr, 21 Ni, 1.9 Mn, 0.6 Si, 0.85 Cb, bal Fe
AC-DC reverse polarity titania coated electrode
As welded 93,500 TS, 69,500 YS, 42 El
For welding austenitic stainless steels and some dissimilar metals
AWS-ASTM E 310 Cb-16, AISI 310 Cb

AIRCO 310 DC
M-663, 0.10 C, 26 Cr, 21 Ni, 1.8 Mn, 0.6 Si, bal Fe
DC reverse polarity lime coated electrode.
As welded: 91,000 TS, 61,000 YS, 36 El
For welding austenitic types 310 and 314 stainless steels.
AWS-ASTM E 310-15; AISI 310.

AIRCO 310 Mo AC-DC.
M-663; 0.10 C, 26 Cr, 21 Ni, 1.9 Mn, 0.55 Si, 2.5 Mo, bal Fe
AC-DC reverse polarity titania coated electrode.
As welded: 89,000 TS; 62,500 YS; 37 El.
For welding type 310 and similar steels and for overlay mild steel for paper pulp digestors and similar applications
AWS-ASTM E 310 Mo-16; AISI 310 Mo.

AIRCO 312 AC-DC.
M-663, 0.12 C, 28 Cr, 9.25 Ni, 2.0 Mn, 0.7 Si, bal Fe.
AC-DC reverse polarity titania coated electrode.
As welded 120,000 TS; 80,000 YS, 36 El.
For welding high strength type 312 base materials particularly for jet aircraft industry, and for dissimilar metals.
AWS-ASTM E312-16; AISI 312.

AIRCO 316.
M-663, 19 Cr, 12 Ni, 2.5 Mo stainless welding rod, bare wire, cut lengths
For welding AISI 316 stainless steel.
AWS ER 316; AISI 316

AIRCO 316 AC-DC
M-663, 0.06 C, 18.5 Cr, 13.0 Ni, 1.9 Mn, 0.6 Si, 2.25 Mo, bal Fe.
AC-DC reverse polarity titania coated electrode.
As welded: 93,000 TS; 75,000 YS, 35 El.
For welding type 316 for corrosion resistant or elevated temperature applications.
AWS-ASTM E316-16, AISI 316.

AIRCO 316 Cb AC-DC
M-663, 0.07 C, 18.5 Cr, 11.5 Ni, 1.9 Mn, 0.55 Si, 2.25 Mo, 0.5 Cb, bal Fe
AC-DC reverse polarity titania coated electrode.
As welded 90,000 TS; 63,000 YS; 36 El.
For welding type 316 and other austenitic stainless steels for best corrosion resistant joints
AWS ASTM E- 318-16, AISI 318.

AIRCO 316 ELC
M-663, Low carbon grade of 316.
For welding AISI 316L stainless steel
AWS ER 316L, AISI 316L.

AIRCO 316 ELC AC-DC
M-663, 0.03 C, 18.5 Cr, 13.0 Ni, 1.9 Mn, 0.6 Si, 2.25 Mo, bal Fe.
AC-DC reverse polarity titania coated electrode.
As welded 88,700 TS, 74,350 YS, 33.5 El.
For welding extra low carbon molybdenum bearing austenitic stainless
AWS-ASTM E 316L-16, AISI 316 ELC.

AIRCO 317 AC-DC
M-663; 0.07 C, 19 Cr, 13 Ni, 2 Mn, 0.55 Si, 3.5 Mo, bal Fe
AC-DC reverse polarity titania coated electrode.
As welded 102,000 TS; 87,000 YS, 31 El
For welding type 317 stainless for severe corrosion resistance
AWS-ASTM E317-16, AISI 317.

AIRCO 330 AC-DC
M-663, 0.20 C, 15 Cr, 34.5 Ni, 1.75 Mn, 0.6 Si, bal Fe
AC-DC reverse polarity titania coated electrode.
As welded: 89,500 TS, 70,000 YS, 35.5 El.
For welding high nickel alloy castings for high temperature operation
AWS-ASTM E330-16; AISI 330.

AIRCO 347
M-663, 19 Cr, 9 Ni, Cb stabilized stainless steel welding rod, bare wire, cut lengths.
For welding AISI 304L, 321 and 347 stainless steels.
AWS ER 347, AISI 347.

AIRCO 347 AC-DC.
M-663; 0.06 C, 19.5 Cr, 10.0 Ni, 1.5 Mn, 0.6 Si, 0.70 Cb, bal Fe.
AC-DC reverse polarity titania coated electrode.
As welded: 109,000 TS; 79,500 YS; 34.5 El.
For welding types 321 and 347 stainless.
AWS-ASTM E347-16; AISI 347

AIRCO 361.
M-663; stainless core rod, composite coating
Deposit comp: 0.50 C, 4.75 Mn, 19.0 Cr, 9.5 Ni, 0.75 Si, bal Fe.
For joining and hardfacing of railroad frogs and switches and similar applications Impact resistant.

AIRCO 363.
M-663; Coated electrode
AC or DC, either polarity.
Deposit analysis: 0.20 C, 1.0 Mn, 0.65 Si, 0.5 Cr, bal Fe Hardness 20-28 Rock C.
For surfacing or intermediate layer with some abrasion and impact resistance, for brake drums, gear teeth, sprockets and bushings

AIRCO 375
M-663, 1.2 C, 1.0 Mn, 0.45 Si, 2.75 Fe, bal Ni
AC-DC reverse polarity
For welding cast iron.
AWS-ASTM E NiCI

AIRCO 410
M-663; 12 Cr, stainless welding rod, bare wire, cut lengths.
For welding AISI 403 and 410 stainless steels
AWS ER 410, AISI 410

AIRCO 410 DC.
M-663; 0.09 C, 12.5 Cr, 0.6 Ni, 0.8 Mn, 0.6 Si, bal Fe
DC reverse polarity lime type coated electrode
As welded: 150,000 TS, 5 El
Heat treated 71,500 TS; 53,000 YS, 20 El.
For welding types 403 and 410 chrome corrosion resistant steels and for stainless overlay on carbon steels.
AWS-ASTM E410-15, AISI 410

AIRCO 502 DC.
M-663; 0.08 C, 5.0 Cr, 0.4 Ni, 0.6 Mn, 0.65 Si, 0.55 Mo, bal Fe
DC reverse polarity lime type coated electrode.
As welded: 145,000 TS; 2.8 El
Heat treated: 80,000 TS, 67,500 YS, 38 El.
For welding types 501 and 502 stainless and some alloy steels as 4130.
AWS-ASTM E502-15, AISI 502

AIRCO 630.
M-663, steel core, composite type coating AC-DC straight polarity
Deposit analysis: 4.5 C, 30 Cr, 2 Si, 1 Mn, bal Fe
For build-ups having resistance to severe abrasion with moderate impact Hardness 56-61 Rock C For dredging parts, dipper teeth, sand muller parts.

AIRCO 660.
M-663, Low alloy steel rod, composite coating
AC-DC either polarity
Deposit analysis: 1.8 C, 4.0 Cr, 0.5 Mn, 0.5 Si, bal Fe. Hardness 45-55 Rock C.
For surfacing or build-up for resistance to abrasion and impact; for crusher rolls, hammermill hammers, impact breaker bars.

AIRCO 718
M-663; 12 Si, bal Al.
Bare aluminum brazing rod. For braze-welding 1060, 1100, 3003, 5005, 6061, 6063 and cast alloys A612 and C612
AWS B AlSi-4.

AIRCO NO. 1010 SILICON BRONZE ROD.
M-663; 95.8 Cu, 3.1 Si, 1.1 Mn, 1.0 Zn.
Bare rod for gas welding of copper, copper-silicon and copper-zinc base alloys to themselves and to plain and galvanized steel. 50,000 min TS. Everdue grade AWS R Cu Si-A.

AIRCO 4043.
M-663; 4.5-6.0 Si, 0.3 max Cu, 0.8 max Fe, 0.1 max Zn, 0.2 max Ti, bal Al
Bare aluminum alloy wire for gas or TIG welding of 3003, 3004, 5052, 6061, 6063, and casting alloys 43, 355, 356 and 214. Flows at 1155°F.
AWS ER 4043.

AIRCO 4130.
M-663, 0.30 C, 0.5 Mn, 0.3 Si, 0.2 Mo, 0.95 Cr, bal Fe
Alloy wire for welding AISI 4130 steel by automatic submerged arc

AIRCO 5183
M-663, 4.3-5.2 Mg, 0.5-1.0 Mn, 0.4 max Si, 0.4 max Fe, 0.25 max Zn, 0.15 max Ti, 0.05-0.25 Cr, 0.10 max Cu, bal Al.
Bare aluminum alloy welding rod for gas or TIG welding of 5052, 5083, 5356, 5454 and 5456 alloys; flows at 1180°F.
AWS ER 5183

AIRCO 5356
M-663, 4.5-5.5 Mg, 0.5 max Si + Fe, bal Al
Bare aluminum alloy, general purpose, for gas or TIG welding of 5050, 5052, 5083, 5086, 5356, 5454, and 5456 Flows at 1180°F
AWS ER 5356

AIRCO 5554
M-663, 2.4-3.0 Mg, 0.5-1.0 Mn, 0.25 max Zn, 0.05-0.20 Ti, bal Al
Bare aluminum alloy rod for gas or TIG welding of 5454 and 5052 alloys Flows freely at 1095°F
AWS ER 5554

AIRCO 5556
M-663, 4.7-5.5 Mg, 0.5-1.0 Mn, 0.25 max Zn, 0.05-0.2 Cr, bal Al
Bare aluminum wire for gas or TIG welding 5052, 5083, 5086, 5356, 5454, and 5456 for maximum weld strength Flows freely at 1180°F.
AWS ER 5556

AIRCO 6010.
M-663, 0.07-0.12 C, 0.2-0.4 Mn, 0.1-0.3 Si, bal Fe
DC reverse polarity coated electrode
Weld metal: 68,500 TS, 58,250 YS, 28.5 El.
AWS-ASTM Class E6010

AIRCO 6010 ARCRODS (001)
M-663, Mild steel coated electrode; DC reverse polarity.
AWS-ASTM Class E6010

AIRCO 6011
M-663, 0.08 C, 0.35 Mn, 0.11 Si, bal Fe.
AC-DC reverse polarity coated electrode
Weld metal 70,000 TS, 62,000 YS; 30 El
AWS-ASTM Class E6011

AIRCO 6011C.
M-663; 0.10 C, 0.58 Mn, 0.19 Si, bal Fe.
AC-DC reverse polarity coated electrode.
Weld metal: 72,000 TS; 59,000 YS, 29.5 El
AWS-ASTM Class E6011.

AIRCO 6011LOC.
M-663, 0.11 C, 0.6 Mn, 0.25 Si, bal Fe.
AC-DC reverse polarity coated electrode.
Weld metal: 71,000 TS; 59,000 YS; 22 El
AWS-ASTM Class E6011.

AIRCO 6012
M-663; 0.08 C, 0.45 Mn, 0.30 Si, bal Fe.
AC-DC straight polarity coated electrode.
Weld metal: 83,000 TS; 74,000 YS, 20 El.
AWS-ASTM E-6012.

AIRCO 6012 C.
M-663; 0.08 C, 0.38 Mn, 0.25 Si, bal Fe.
AC-DC straight polarity coated electrode.
Weld metal 70,000 TS; 60,000 YS; 28 El.
AWS-ASTM E6012.

AIRCO 6013 C.
M-663, 0.09 C, 0.52 Mn, 0.39 Si, bal Fe
AC-DC either polarity coated electrode
Weld metal. 74,500 TS, 63,500 YS, 27 El
AWS-ASTM E6013.

AIRCO 6020.
M-663, 0.12 C, 0.35 Mn, 0.10 Si, bal Fe.
AC-DC either polarity coated electrode.
Weld metal 72,000 TS; 62,000 YS; 28 El.
AWS-ASTM E6020.

AIRCO 6020 D.
M-663, Mild steel coated electrode.
AC or DC either polarity
AWS-ASTM E6020

AIRCO 6020 F.
M-663, Mild steel coated electrode.
AC or DC either polarity.
AWS-ASTM E6020

AIRCO 6150
M-663, 0.50 C, 0.8 Mn, 0.28 Si, 1.0 Cr, bal Fe
Alloy wire for welding AISI 6150 steel by automatic submerged arc

AIRCO 7010-A1
M-663; 0.09 C, 0.43 Mn, 0.14 Si, 0.48 Mo, bal Fe
DC reverse polarity coated electrode
Weld, stress relieved 80,000 TS, 67,000 YS; 29 El.
For welding long distance pipe lines
AWS-ASTM E7010-A1

AIRCO 7016
M-663, 0.09 C, 0.55 Mn, 0.50 Si, bal Fe.
AC-DC reverse polarity coated electrode
Weld metal. 74,000 TS, 62,000 YS, 30 El
Low hydrogen, for assemblies to be enameled
AWS-ASTM E7016

AIRCO 7016 M
M-663, 0.07 C, 0.90 Mn, 0.50 Si, 0.35 Mo, 0.25 Ni, 0.15 Cr, bal Fe
AC-DC reverse polarity coated electrode.
As welded 82,000 TS, 72,000 YS, 29 El.
Good impact strength after stress anneal
AWS-ASTM E7016

AIRCO 7020-A1
M-663; 0.09 C, 0.29 Mn, 0.12 Si, 0.52 Mo, bal Fe
AC-DC either polarity coated electrode.
Weld, stress relieved: 73,000 TS; 63,500 YS, 29 El.
AWS-ASTM E7020-A1.

AIRCO 8016-B2
M-663, 0.07 C, 0.6 Mn, 0.42 Si, 0.45 Mo, 1.30 Cr, bal Fe.
AC-DC reverse polarity coated electrode.
Weld, stress relieved: 84,000 TS, 68,000 YS; 28 El.
AWS-ASTM 8016-B2

AIRCO 8016-C1.
M-663, 0.05 C, 0.82 Mn, 0.4 Si, 2.4 Ni, bal Fe.
AC-DC reverse polarity coated electrode
Weld, stress relieved: 82,000 TS; 69,000 YS; 31 El, Charpy V notch, ft.lbs at −75° F 108.
AWS-ASTM E8016-C1.

AIRCO 8016-C3
M-663, Low carbon, low alloy coated electrode.
AC-DC reverse polarity.
For welding low alloy high tensile steel.
AWS-ASTM E8016-C3.

AIRCO 9016-B3
M-663, 0.09 C, 0.57 Mn, 0.42 Si, 0.98 Mo, 2.26 Cr, bal Fe.
AC-DC reverse polarity coated electrode.
Weld, stress relieved· 99,000 TS; 87,000 YS; 22 El.
For welding equipment for steam power and other assemblies for elevated temperature.
AWS-ASTM E9016-B3.

AIRCO 10013-G.
M-663, Low carbon, low alloy coated electrode.
AC-DC straight polarity.
For welding low alloy high tensile steels.
AWS-ASTM E10013-G.

AIRCO 10016-D2.
M-663, 0.09 C, 1.8 Mn, 0.58 Si, 0.4 Mo, bal Fe.
AC-DC reverse polarity coated electrode.
Weld, stress relieved 106,000 TS; 92,000 YS; 25 El.
For welding higher strength steels
AWS-ASTM E10016-D2

AIRCO 10016-G.
M-663; 0.06 C, 0.8 Mn, 0.34 Si, 0.3 Mo, 1.63 Ni, 0.13 V, bal Fe
AC-DC reverse polarity coated electrode
Weld, stress relieved· 109,500 TS; 102,000 YS, 25 El
For high strength assemblies
AWS-ASTM E10016-G

AIRCO 12015-G
M-663, Low hydrogen electrode; reverse polarity only, for welding high strength and armor steels
AWS-ASTM E12015-G

AIRCO A715
M-663, 0.11 C, 0.44 Mn, 0.5 Si, 1.24 Cr, 0.5 Mo, bal Fe
Low alloy bare wire for machine welding of low alloy steel; copper coated.

AIRCO A725
M-663, 0.12 C, 0.46 Mn, 0.48 Si, 2.35 Cr, 1.0 Mo, bal Fe.
Low alloy bare wire for machine welding of low alloy steel, copper coated

AIRCO AIRCOLOY No 1.
M-663, Bare or coated cobalt base electrode
Deposit analysis 2.5 C, 50.0 Co, 31.0 Cr, 13 W, 1.5 Si.
For wear resistant and corrosion resistant build-up and surfacing Hardness of deposit is 50-58 Rock C
AWS ASTM E Co Cr-C and R Co Cr-C.

AIRCO AIRCOLOY No 6.
M-663, Bare or coated cobalt base electrode.
Deposit analysis: 1.0 C, 60.0 Co, 28.0 Cr, 5.0 W, 1.5 Si, Hardness 38-45 Rock C.
For build-ups resistant to corrosion and abrasion at high temperatures
AWS-ASTM E Co Cr-A and R Co Cr-A.

AIRCO AIR-MANG.
M-663; Steel core rod, composite coating.
Deposit analysis 0.7 C, 14.0 Mn, 4 Cr, 3.5 Ni, bal Fe
For joining or build-up of dipper teeth, coal crusher segments, rail frogs and switches.
Impact resistant.

AIRCO AIROD.
M-663; Steel tube containing tungsten carbide particles used as a bare filler rod for gas welding for hardfacing plow shares, cane knives, conveyor screws. Abrasion resistant.

AIRCO AX-140.
M-663; 0.07-0.11 C, 1.7-2.0 Mn, 0.25-0.45 Si, 2.0-2.5 Ni, 0.85-1.2 Cr, 0.5-0.6 Mo, Ti, bal Fe.
Weld: 140,000 YS; 157,000 TS; 16 El; 57 RA .
For welding high strength steel plates.
Tough, strong and crack free welding wire.

AIRCO BULK TUNGSTEN CARBIDE.
M-663; Hard carbide, to be applied with a binder and subsequently fused into the surface for a hard abrasion resistant skin. Abrasion resistant.

AIRCO CODE-ARC 7018.
M-663; 0.04 C, 0.65 Mn, 0.55 Si, bal Fe.
AC-DC reverse polarity coated electrode.
As welded· 78,000 TS; 67,000 YS; 30 El.
AWS-ASTM E7018.

AIRCO CODE-ARC 7018-A1.
M-663; 0.04 C, 0.6 Mn, 0.6 Si, 0.48 Mo, bal Fe
AC-DC reverse polarity coated electrode
Weld, stress relieved· 81,000 TS; 71,000 YS; 30 El.
AWS-ASTM E 7018-A1.

AIRCO CODE-ARC 8018-C3.
M-663; 0.04 C, 0.9 Mn, 0.4 Si, 1.0 Ni, 0.2 Mo, bal Fe.
AC-DC reverse polarity coated electrode.
As welded: 83,000 TS; 72,000 YS; 31 El.
Good impact properties.
AWS-ASTM E8018-C3.

AIRCO CODE-ARC 11018
M-663; 0.04 C, 1.6 Mn, 0.4 Si, 0.42 Mo, 0.25 Cr, 1.8 Ni, bal Fe.
AC-DC reverse polarity coated electrode.
Weld, stress relieved. 113,000 TS, 105,000 YS; 23 El.
To weld low alloy high strength steels.
AWS-ASTM E11018-M

AIRCO CODE-ARC 12018.
M-663, 0.04 C, 1.8 Mn, 0.4 Si, 0.48 Mo, 0.45 Cr, 2.0 Ni, bal Fe
AC-DC reverse polarity coated electrode.
Weld, stress relieved. 122,000 TS, 113,000 YS, 22 El.
To weld low alloy high strength steels
AWS-ASTM E12018-M.

AIRCO COMMERCIALLY PURE ALUMINUM A1100.
M-663, 100% Al.
For machine welding of 1100 and 3003 aluminum for window frames, heat exchangers, food containers, electrical bus bars, racks
AWS ER 1100.

AIRCO EASYARC 308 AC-DC
M-663,
Weld metal. 0.07 C, 19.6 Cr, 9.5 Ni, 1.65 Mo, 0.68 Si, bal Fe.
As welded 87,900 TS, 57,400 YS, 42 El.
AC-DC reverse polarity; coating. titania type with metal powders, for welding 18-8 type stainless steels
AWS-ASTM E308-16, AISI 308.

AIRCO EASYARC 316 AC-DC.
M-663,
Weld metal· 0.06 C, 18.5 Cr, 12.3 Ni, 1.8 Mn, 0.31 Si, 2.28 Mo, bal Fe.
As welded· 80,400 TS, 56,400 YS, 44 El.
AC-DC reverse polarity; coating: titania type with metal powders; for welding type 316 stainless steel.
AWS-ASTM E316-16; AISI 316.

AIRCO EASYARC 620.
M-663; Alloy steel core rod, chrome iron composite coating; AC-DC either polarity.
Deposit analysis: 6.0 C, 22.0 Cr, 7.0 Mo, 5.0 W, 1.5 Si, 0.5 Mn, bal Fe.
For build-ups resistant to severe abrasion, moderate impact and hot wear up to 1100° F. For crusher parts, coke pusher shoes, hot slag dipper teeth. Hardness 60-65 Rock C.

AIRCO EASYARC 6027.
M-663, 0.07 C, 0.90 Mn, 0.14 Si, bal Fe.
AC-DC either polarity coated electrode
Weld metal: 68,000 TS; 57,000 YS; 30 El.
AWS-ASTM E6027

AIRCO EASYARC 7014
M-663, 0.08 C, 0.45 Mn, 0.30 Si, bal Fe
AC-DC either polarity coated electrode.
Weld metal· 81,000 TS, 73,000 YS; 26 El
AWS-ASTM E7014

AIRCO EASYARC 7018
M-663, 0.06 C, 0.65 Mn, 0.50 Si, bal Fe .
AC-DC reverse polarity coated electrode.
As welded 78,000 TS, 66,000 YS; 28 El
AWS-ASTM E7018

AIRCO EASYARC 7018 C.
M-663; 0.07 C, 0.90 Mn, 0.50 Si, bal Fe.
AC-DC reverse polarity coated electrode
As welded 84,000 TS, 73,000 YS, 30 El
AWS-ASTM E7018

AIRCO EASYARC 7024.
M-663; 0.07 C, 0.75 Mn, 0.50 Si, bal Fe.
DC reverse polarity coated electrode
Weld metal 76,000 TS; 68,000 YS; 20 El
AWS-ASTM E7024

AIRCO EASYARC 7028.
M-663, 0.06 C, 0.70 Mn, 0.35 Si, bal Fe
AC-DC reverse polarity coated electrode
As welded. 80,000 TS, 72,000 YS; 30 El.
AWS-ASTM E7028

AIRCOMATIC A100 ALUMINUM BRONZE.
M-663, Al, Fe, bal Cu
Bare rod for inert gas welding of aluminum bronze or bronze surfacing of steel.
AWS E Cu Al-A2.

AIRCOMATIC A102 PHOS BRONZE
M 663, Sn, P, bal Cu.
Bare rod for inert gas welding of brass, bronze or for overlays on ferrous metals.
AWS E Cu Sn-C.

AIRCOMATIC A104 Ni-Al-Mn BRONZE
M-663, Al, Ni, Mn, bal Cu.
Bare rod for inert gas welding of ship propellers and turbine runners.

AIRCOMATIC A110 SILICON BRONZE.
M-663, Si, bal Cu
Bare rod for inert gas welding of silicon bronze or of many dissimilar metals.
AWS E Cu Si

AIRCOMATIC A145 COPPER.
M-663, Cu.
Bare rod or wire for inert gas welding of copper and copper base alloys and for overlay on steels.
AWS E Cu.

AIRCOMATIC A158 ALUMINUM BRONZE.
M-663; Al, bal Cu.
Iron free bare wire for welding aluminum bronzes, manganese bronze, copper, cast iron, mild steel and alloy steel, and for surfacing; designed for inert gas processes.
AWS E Cu Al-Al

AIRCOMATIC A160 ALUMINUM BRONZE.
M-663; Al, bal Cu.
Aluminum bronze bare wire largely for overlay work to produce corrosion resistant and wear resistant surface. Hardness of deposit 160-210 Brin.
AWS E Cu Al-B.

AIRCOMATIC A308.
M-663,
Wire for welding AISI types 301, 302, 305, and 308 stainless steels, and for depositing stainless overlays on mild steel
AWS ER 308

AIRCOMATIC A308 ELC
M-663; Low carbon grade of A308.
Wire for welding AISI 304 ELC and 308 ELC, also AISI 321 and 347
AWS-ER 308 L.

AIRCOMATIC A308 L Si
M-663; Higher silicon version of A308 for improved arc stability

AIRCOMATIC A309
M-663,
Wire for welding AISI 309 stainless for high temperature operation; also for welding some straight chromium stainless grades
AWS- ER 309.

AIRCOMATIC A309 ELC
M-663; Low carbon grade of A309.
For same purpose as A309 where added insurance against carbide precipitation is required

AIRCOMATIC A310
M-663,
Wire for welding AISI 310 stainless steel for high temperature or corrosion resistant applications.
AWS ER 310

AIRCOMATIC A312
M-663,
Wire designed for welding stainless steels to carbon steels
AWS ER312

AIRCOMATIC A316.
M-663,
Wire for welding AISI 316 stainless.
AWS ER 316

AIRCOMATIC A316 ELC
M-663; Low carbon grade of A316
For welding AISI 316 L stainless steel
AWS ER 316 L.

AIRCOMATIC A316 L Si
M-663, Higher silicon version of A316, for improved arc stability

AIRCOMATIC A347.
M-663,
Wire for welding AISI types 321, 347 and 304 L, particularly for elevated temperature operation or corrosive conditions.
AWS ER 347

AIRCOMATIC A666
M-663; 0.13 C, 1.3 Mn, 0.5 Si, 0.6 Al, bal Fe
Bare mild steel welding wire for CO_2 and inert gas welding, particularly of rusted and scaled steel.
AWS E 70 S-5.

AIRCOMATIC A4043 ALUMINUM ALLOY.
M-663; AA 4043 composition (5.2 Si).
For welding 2014, 4043, 6061, 6062, 6063 alloys for truck bodies, pressure vessels, structural members.
AWS ER 4043

AIRCOMATIC A5183 ALUMINUM ALLOY.
M-663, Mg, bal Al.
Wire for welding liquid oxygen and liquid nitrogen containers. AWS ER 5183.

AIRCOMATIC A5356 ALUMINUM ALLOY
M-663; 5.0 Mg, 0.12 Cr, 0.12 Mn, bal Al.
Wire for welding 5056, 5083, 5086, 5154, 5356 aluminum alloys for truck frames, diesel engine bases, cargo tanks, gun mount bases.
AWS ER 5356.

AIRCOMATIC A5554 ALUMINUM ALLOY.
M-663;
Wire for welding 5052 and 5454 aluminum alloys for truck tankers, dump bodies, railroad tank cars. AWS-ER 5554.

AIRCOMATIC A5556 ALUMINUM ALLOY.
M-663,
Wire for welding 5083, 5086, 5456 high tensile aluminum alloys for truck frames, diesel engine bases, storage tanks
AWS ER 5556

AIRCO NICKEL MANGANESE C
M-663, Steel core rod, composite coating.
Weld metal: 0.60 C, 13.0 Mn, 3.0 Ni, 0.4 Cr, 0.75 Si, bal Fe.
For joining and build-up of Hadfield's manganese steel dipper teeth, shovel tracks, crusher pads; impact resistant.
AWS-ASTM E Fe Mn-A.

AIRCO PHOS-COPPER ROD
M-663, 7.25-7.35 P, bal Cu
Bare rod for torch or furnace braze of transformers, radiators, motors, water coolers, plumbing installations, heat exchangers
AWS B Cu P-2

AIRCO PHOS-SILVER 2 ROD
M-663, 6.75-7.25 P, 1.75-2.25 Ag, bal Cu.
Bare rod for torch or furnace brazing components of copper, brass and bronze
Melt range 1435-1455°F

AIRCO RAILROAD
M-633, 0.2-0.4 C, 0.85-1.15 Mn, 0.1-0.3 V, 0.9-1.25 Cr, bal Fe
Welded 100,000 TS
For welding rod, for rail ends

AIRCO S-10
M-663, 0.10 C, 0.55 Mn, bal Fe.
Mild steel automatic submerged arc welding wire
AWS-EL 12.

AIRCO S-15
M-663, 0.14 C, 0.90 Mn, bal Fe.
Mild steel automatic submerged arc welding wire.
AWS EH 14

AIRCO S-16.
M-663, 0.14 C, 1.9 Mn, 0.5 Mo, bal Fe.
Low alloy steel automatic submerged arc welding wire.

AIRCO S-20
M-663, 0.16 C, 1.1 Mn, 0.2 Si, bal Fe.
Mild steel automatic submerged arc welding wire.
AWS EM 15 K

AIRCO S-65.
M-663; 0.60 C, 1.05 Mn, 0.15 Si, bal Fe
Higher carbon steel automatic submerged arc welding wire

AIRCO S-308.
M-663; 0.06 C, 1.8 Mn, 0.5 Si, 20.5 Cr, 9.8 Ni, bal Fe.
Stainless steel wire for automatic submerged arc welding; for 18-8 stainless
AWS ER 308.

AIRCO S-309.
M-663; 0.07 C, 1.75 Mn, 0.5 Si, 23.0 Cr, 13.0 Ni, bal Fe.
Stainless steel wire for automatic submerged arc welding; designed for AISI 309.
AWS ER 309.

AIRCO S-310.
M-663; 0.12 C, 1.5 Mn, 0.5 Si, 26.8 Cr, 21.0 Ni, bal Fe
Stainless steel wire for automatic submerged arc welding; designed for AISI 310.
AWS ER 310.

AIRCO S-316.
M-663, 0.06 C, 1.65 Mn, 0.45 Si, 19.0 Cr, 12.9 Ni, 2.2 Mo, bal Fe.
Stainless steel wire for automatic submerged arc welding; designed for AISI 316.
AWS ER 316.

AIRCO S-347.
M-663; 0.06 C, 1.65 Mn, 0.5 Si, 19.5 Cr, 9.6 Ni, 0.85 Cb, bal Fe.
Stainless steel wire for automatic submerged arc welding of stabilized 18-8 stainless steel.
AWS ER 347.

AIRCO SELF HARDENING.
M-663; Steel core wire, composite coating
Deposit analysis: 0.85 C, 5.0 Cr, 0.9 Mn, 0.55 Si, 0.35 V, bal Fe; hardness 50-55 Rock C
For hard surfacing and build-up for resistance to abrasion and moderate to heavy impact
For dump truck bodies, brake shoe hangers, bulldozer trunnions.

AIRCO SEMI-AUTOMATIC AIR-MANG.
M-663; Continuous wire version of Airco Air-Mang.
For welding railroad track segments, dredge parts, clamshell lips. Impact resistant.

AIRCOSIL 3.
M-663; 50 Ag, 3 Ni, 16 Cd, 15.5 Cu, bal Zn.
For silver brazing of carbide tools;
M.P. 1170-1270°F.
AWS A5.8-62 and ASTM B260-62; BAg-3.

AIRCOSIL 5.
M-663; 5 Ag, 88.75 Cu, 6.25 P.
For brazing alloy, M.P. 1190-1480°F.
AWS, ASTM BCuP-3

AIRCOSIL 15.
M-663; 15 Ag, 80 Cu, 5 P.
For silver brazing of Cu alloys; M.P. 1185-1500°F; self-fluxing.
AWS, ASTM BCuP-5.

AIRCOSIL 35.
M-663; 35 Ag, 18 Cd, 26 Cu, 21 Zn.
For silver brazing, general purpose;
M.P 1125-1295°F; high plastic range.
AWS, ASTM BAg-2.

AIRCOSIL 45.
M-663; 45 Ag, 24 Cd, 15 Cu, 16 Zn.
For silver brazing; M.P. 1125-1145°F, free-flowing.
AWS, ASTM BAg-1.

AIRCOSIL 50.
M-663; 50 Ag, 18.0 Cd, 15.5 Cu, 16.5 Zn.
For silver brazing for all metals; M.P. 1160-1175°F; high strength.
AWS, ASTM BAg-la.

AIRCOSIL 60.
M-663; 60 Ag, 30 Cu, 10 Sn.
For brazing alloy; M.P. 1115-1325°F.
AWS, ASTM BAg-18.

AIRCOSIL 105.
M-663; 45 Ag, 30 Cu, 12 Zn, 13 Mn.
For brazing alloy; M.P 1298°F; eutectic alloy.

AIRCOSIL A.
M-663; 9 Ag, 53 Cu, 38 Zn.
For brazing alloy, M.P 1410-1565°F.

AIRCOSIL AE-100.
M-663; 92.5 Ag, 7.3 Cu, 0.2 Li.
For brazing alloy; M.P. 1435-1635°F.
AWS-ASTM BAg-19

AIRCOSIL B
M-663; 20 Ag, 45 Cu, 35 Zn.
For brazing alloy, M.P. 1315-1500°F.

AIRCOSIL C
M-663; 20 Ag, 45 Cu, 30 Zn, 5 Cd.
For brazing alloy, M.P. 1140-1500°F.

AIRCOSIL D.
M-663; 30 Ag, 38 Cu, 32 Zn.
For brazing alloy; M.P. 1370-1410°F.

AIRCOSIL E
M-663, 40 Ag, 30 Cu, 28 Zn, 2 Ni
For brazing alloy for carbides, M.P 1240-1435°F
AWS, ASTM BAg-4.

AIRCOSIL EASY.
M-663, 65 Ag, 20 Cu, 15 Zn
For brazing alloy for sterling silver;
M.P 1240-1325°F.
AWS, ASTM BAg-9.

AIRCOSIL F.
M-663; 40 Ag, 36 Cu, 24 Zn
For brazing alloy, M.P. 1325-1415°F

AIRCOSIL G.
M-663; 45 Ag, 30 Cu, 25 Zn
For brazing alloy in food industry,
M.P 1250-1370°F, AWS-ASTM BAg-5.

AIRCOSIL H
M-663, 50 Ag, 34 Cu, 16 Zn.
For brazing alloy in food industry,
M.P 1270-1425°F, AWS-ASTM BAg-6.

AIRCOSIL HARD
M-663; 75 Ag, 22 Cu, 3 Zn
For brazing alloy for sterling silver;
M.P 1365-1450°F
AWS-ASTM BAg-11

AIRCOSIL J.
M-663; 56 Ag, 22 Cu, 17 Zn, 5 Sn.
For brazing alloy on stainless steels,
M.P. 1145-1205°F
AWS, ASTM BAg-7.

AIRCOSIL K
M-663, 60 Ag, 25 Cu, 15 Zn.
For brazing alloy, M.P. 1245-1325°F.

AIRCOSIL L
M-663, 54 Ag, 40 Cu, 5 Zn, 1 Ni
For brazing alloy; M.P. 1325-1575°F.

AIRCOSIL M.
M-663; 72 Ag, 28 Cu
For brazing alloy in electronic industry;
M.P. 1435°F; eutectic alloy.
AWS, ASTM BAg-8.

AIRCOSIL MEDIUM.
M-663; 70 Ag, 20 Cu, 10 Zn.
For brazing alloy for sterling silver;
M.P. 1275-1360°F.
AWS, ASTM BAg-10.

AIRCOSIL N.
M-663; 80 Ag, 16 Cu, 4 Zn.
For brazing alloy; M.P. 1345-1490°F.

AIRCOSIL P.
M-663; 85 Ag, 15 Mn.
For brazing alloy for high temperature applications; M.P. 1760-1778°F.
AWS, ASTM BAg-Mn.

AIRCOSIL Q
M-663; 50 Ag, 28 Cu, 22 Zn.
For brazing alloy; M.P. 1250-1340°F.

AIRCOSIL R.
M-663; 40 Ag, 30 Cu, 25 Zn, 5 Ni
For brazing alloy, M.P. 1240-1560°F.

AIRCOSIL S
M-663; 25 Ag, 52.5 Cu, 22.5 Zn.
For brazing alloy; M.P. 1250-1575°F

AIRCO SPECIAL "B" TUNGTUBE.
M-663; Steel tube containing tungsten carbide particles, used as bare filler rod for build-up on worn core and rock drill bits and post hole digger blades. Abrasion and impact resistant.

AIRCO TIMANG.
M-663; Bare or coated electrode.
Deposit comp 0.75 C, 1.40 Mn, 3.0 Ni, bal Fe
For joining or build-up of manganese steel mill hammers, bucket teeth, crusher jaws.
Impact resistant.

AIRCO TRACKWEAR
M-663; Steel core rod, composite coating.
Deposit comp · 0.85 C, 17.0 Mn, 0.45 V, bal Fe.
For joining and build-up of railroad frogs, switches and cross-overs Impact resistant.

AIRCO TRAC-ROD 27
M-663; 0.08 C, 0.31 Mn, 0.11 Si, bal Fe.
AC-DC either polarity coated electrode
Weld metal· 66,200 TS, 56,300 YS, 27 El.
Welds over rust and scale.
AWS-ASTM E 6027.

AIRCO TUBE AIRCOLITE
M-663, Deposit analysis 4 C, 30 Cr, 2 Si, 1.5 Mn, bal Fe, hardness 60 Rock C.
Bare tubular wire for gas welding and build-up for resistance to severe abrasion with moderate impact For plow shares, cultivator spades, corn picker runners

AIRCO TUNGTUBE
M-663, Steel tube containing tungsten carbide used as a bare filler rod for oxyacetylene flame for hard facing Abrasion resistant

AIRCRAFT.
Eng; 10-11.5 Al, 4-6 Fe, 4-6 Ni, bal Cu
For corrosion resisting parts, aircraft; corrosion resistant.

AIRCRAFT
M-1149; 1.0 C, 0.5 Mn, 1.1 Mo, 0.2 V, 5.0 Cr, bal Fe.
For tools, dies, punches, crimpers, air hardened, ground flat stock

AIRDI 150
M-38; 1.55 C, 11.5 Cr, 0.9 V, 0.8 Mo, bal Fe
Hardened· C 58-63 Rock
Air hardening, somewhat corrosion resistant
For blanking and coining dies, gauges, punches, thread rolling dies, shafts
AISI Type D2 Cold work tool steel

AIRDI 150-S
M-38; 1.5 C, 12 Cr, 0.9 V, 0.8 Mo, 0.15 S, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming

AIR-EEZ.
M-335; 0.95 C, 2.0 Mn, 0.35 Si, 2.2 Cr, 1.1 Mo, 0.30 Pb, bal Fe.
Free machining grade.
AISI A4 low temperature tool steel.

AIRESIST 13.
M-1491; 21 Cr, 11 W, 0.45 C, 2 Cb, 3 Al, 0.5 Y, bal Co.
For jet engine and gas turbine components.
Corrosion resistant. Good high temperature strength. Resists sulphidation and oxidation.

AIRESIST 213.
M-1491, 3.5 Al, 0.10 Y, 0.2 C, 20 Cr, 0.5 Ni, 4.5 W, 6.5 Ta, 3.5 Al, 0.5 Fe, bal Co.
Sheet 160,000 TS; 100,000 YS, 10 El
At 1800°F: 35,000 TS; 22,000 YS, 70 El.
For jet engine and gas turbine components.
Resists sulphur attack up to 2200°F
Corrosion and oxidation resistant.

AIRESIST 215.
M-1491; 0.3 C, 19 Cr, 4.5 W, 4.3 Al, 0.35 C, 0.5 Ni, 0.10 Y, 7.5 Ta, 0.5 Fe, 0.1 Zr, bal Co.
Resists oxidation and sulphidation.

AIREX
M-35; 0.55 C, 2 Si, 0.75 Mn, bal Fe
For chisels, tools; tough, shock resistant.

AIR-HARD.
M-32, 1.0 C, 5 Cr, 1.5 Mo, bal Fe
For tools, dies, wear resistant, air hardening.

AIR HARD.
M-1482; 1.5 C, 0.8 Mo, 0.5 V, 0.7 Mn, 12 Cr, bal Fe
For dies, cams, punches, blanking and forming tools, air hardened, non-deforming

AIR-HARD
M-115, 1.0 C, 0.3 Si, 0.7 Mn, 5.25 Cr, 1.1 Mo, 0.25 V, bal Fe
Annealed: 55,000 YS, 18 El, 38 RA, 223 Brin.
Hardened· 184,000 YS, 5 El; 14 RA; C 46-54 Rock.
For trimming and blanking dies, cold shears, gauges, punches
Air hardening, non-deforming, wear resistant.

AIR HARDENING.
M-97, C, Cr, W, V, bal Fe.
Water hardened 214,000-120,000 TS; 192,000-102,000 YS; 20-12 El; 57-38 RA, 415-255 Brin
For tools, dies; air hardening.

AIR HARDENING.
M-260, M-38; 1 C, 5 Cr, bal Fe
For tools, dies, air hardened

AIR HARDENING.
M-1424; 1.0 C, 0.7 Mn, 0.3 Si, 5.25 Cr, 0.3 V, 1.15 Mo, bal Fe.
AISI Type A2 air hardening tool steel

AIRITE NO. 21
Eng; Ni alloy
For compressor blades, aircraft rotor discs, corrosion and heat resistant

AIRKOOL.
M-38, M-1214; 1 C, 5 Cr, 0.4 V, 1.1 Mo, bal Fe
For dies, gauges, punches, shears, broaches; air hardened, non-deforming.

AIRKOOL-S.
M-38; 1 C, 5.2 Cr, 0.3 V, 1.1 Mo, 0.15 S, bal Fe
For blanking and forming dies, punches, air hardened, non-deforming. AISI A2.

AIRKOOL-V.
M-38; 2.25 C, 5.25 Cr, 4.75 V, 1 Mo, 1 W, bal Fe.
Heat treated· 650 Brin.
For blanking dies, brick mold liners; oil hardened, non-deforming.

AIRLOY.
M-1; 1.0 C, 3.0 Mn, 1.0 Cr, 1.0 Mo, bal Fe
For dies, gauges, thread roller dies, blanking and forming punches; air hardening.

AIRMO
M-57; 1.0 C, 2 Mn, 1 Cr, 1 Mo, bal Fe.
For cold work dies, crimpers, cold work steel, air hardened.

AIRMOLD
M-38, 0.1 C, 5 Cr, 0.5 Mo, bal Fe.
Hardened· 157,000 TS; 110,000 YS; 17 El; 60 RA; 321 Brin
For cold hubbed plastic molds, deep hardening.

AIROLITE.
M-1463; C, alloy, bal Fe.
For high temperature applications, heat resistant.

AIROMAT 33 SELF-HARDENING.
M-353, 0.33 C, 2.5 Cr, 0.75 Mn, 1.0 Mo, 0.75 Si, 0.5 Cu, bal Fe
For shock tools, dies, punches, shears, air hardening.

AIRQUE-4.
M-140, 1.0 C, 2.5 Mn, 1.1 Cr, 1.1 Mo, bal Fe
Air hardening tool steel; AISI A4.

AIRQUE.
M-140; 1 C, 0.7 Mn, 5.25 Cr, 0.25 V, 1.15 Mo, bal Fe.
For gauges, punches, shear blades, dies, air hardened, non-deforming.

AIRQUE SPECIAL
M-140; 0.8 C, 0.7 Mn, 5.2 Cr, 0.25 V, 1.15 Mo, bal Fe.
For blanking and trimming dies, punches, shears; air hardened, nondeforming, tough.

AIRQUE-V
M-140; 1.25 C, 5.25 Cr, 1.15 Mo, 1.0 V, bal Fe
For thread rolling dies, blanking and forming dies; air hardened, non-deforming

AIRPLANE BABBITT.
M-665, 16 Sn, 10 Sb, 72 Pb, 2 Cu, Bi.
For bearings; M P 600-700°F

AIR SERVICE ALUMINUM ALLOY NO. 1.
Eng; 92 Al, 8 Cu
For light alloy parts, airplane construction, non-hardenable.

AIR SERVICE ALUMINUM ALLOY NO 2
Eng, 88.5 Al, 10 Cu, 0.25 Mg, 1.25 Fe
For aircraft parts, light alloy parts, non-hardenable

AIR SERVICE ALUMINUM ALLOY NO. 3.
Eng., 95.75 Al, 2.5 Cu, 0.5 Mg, 1.25 Fe
For aircraft parts, heat treatable

AIR SERVICE ALUMINUM ALLOY NO. 4.
Eng; 94 Al, 5 Cu, 1 Si
For aircraft parts, age-hardenable

AIR SERVICE ALUMINUM ALLOY No. 5.
Eng; 93 Al, 4 Cu, 3 Si
For aircraft parts, age-hardenable

AIR SERVICE ALUMINUM ALLOY No. 6.
Eng.; 4 Cu, 1-5 Mg, 2 Ni, bal Al.
For aircraft parts; age-hardenable

AIR SHOCK.
M-341; 0.50 C, 0.7 Mn, 3.25 Cr, 1.4 Mo, bal Fe.
Air or oil hardening.
For rivet sets, hot gripper dies, punches, chisels, plastic mold, die casting dies.
Type S7 shock resisting tool steel.

AIRTEM.
M-688; 1.3 C, 0.5 Mn, 5 Cr, 0.3 V, 1.25 Mo, 1.0 Si, bal Fe.
For dies, punches, knives; air hardened.

AIR-TOUGH
M-32; 0.7 C, 2 Mn, 1 Cr, 1.25 Mo, bal Fe.
For tools, dies, air hardening, tough.

AIRTREAT A.H.
M-1423, C, alloy, bal Fe
For dies; air hardened.

AIR-TRUE.
M-1015; 1.0 C, 3.0 Mn, 1.0 Cr, 1.0 Mo, bal Fe.
For dies, templates, gauges, punch and die facings; air hardening, non-deforming

AIRVAN
M-57, 1 C, 5.25 Cr, 1.15 Mo, 0.25 V, bal Fe.
Air hardened 615 Brin.
For tools, cutters, cold work dies, shear blades, gauges, punches, air hardening, non-shrinking.

AIR-WEAR
M 32, 1.5 C, 12 Cr, 1 V, bal Fe
For tools, dies, wear resistant, air hardening

AITCH METAL
Eng; 59 Cu, 40 Zn, 1 Fe
For hydraulic cylinders and forgings, high strength

AJAX
English, 70-30 Fe, 25-50 Ni, 5-20 Cu
For bearings

AJAX 1
M-114, 1 C, 4 Cr, 0.5 V, 0.4 Mo, bal Fe
For tools, dies; air hardened

AJAX 2
M-114, 1 C, 4 Cr, 0.5 V, 0.4 Mo, bal Fe
For tools, forging mandrels, hot work steel

AJAX 7½ PHOSPHOR COPPER
M-346, 7.5 P, bal Cu
Phosphor additive to copper alloys and brazing alloys

AJAX 15% PHOSPHOR COPPER
M-346, 15 P, bal Cu
Deoxidizer for copper and copper alloys, Phosphorous additive to copper alloys and brazing alloys

AJAX ANTI-ACID METAL
M-123, 77 Cu, 8 Sn, 15 Pb
Cast 34,000 TS, 17,000 YS, 20 El, 60 Brin
Corrosion resistant, for chemical equipment, mine water pumps, bearings.
Good bearing bronze where acid resisting metal is required.

AJAX BULL
M-123, 17 Sb, 7 Sn, bal Pb
Cast 30,000 TS, 20,000 YS
For bearings, bearing liners, anti-friction

AJAX DRILL ROD
M-339, 1.1 C, bal Fe.
For drills, taps, water hardening

AJAX DRILL ROD.
M-1703, 0.95-1.05 C, 0.3-0.5 Mn, 0.15-0.3 Si, bal Fe
Water hardening tool steel; AISI W1.

AJAX GOLDEN GLOW BRASS
M-123; 64.5 Cu, 2.5 Pb, 33.0 Zn
Cast· 40,000 TS; 18,000 YS, 32 El; 39 Brin.
Normally chillcast, corrosion resistant
For automobile trim, typewriter parts.

AJAX MANGANESE BRONZE XX.
M-123; 60-68 Cu, 2-4 Fe, 3-7.5 Al, 3.5-5 Mn, bal Zn.
Cast: 110,000 TS; 60,000 YS; 12 El, 210 Brin.
For propellers, gears, cams, gibs; corrosion resistant, heavy duty bronze.

AJAX NICKALLOY BRONZE, GRADE 23.
M-123; 61 Cu, 13 Zn, 23 Ni, 3 Al.
Chill cast: 80,000 TS; 60,000 YS; 5 El; 130 Brin.
For automobile trimming, typewriter parts, milking machine parts; corrosion resistant

AJAX PLASTIC BRONZE GR A
M-123, 25 Pb, 5 Sn, 1 Ni, bal Cu.
Cast. 22,000 TS; 12,000 YS, 15 El, 50 Brin.
For car and locomotive bearings, bushings, heavy duty.

AJAX PLASTIC BRONZE GR B
M-123, 20 Pb, 7 Sn, 1 Zn, bal Cu
Cast 30,000 TS, 16,000 YS, 22 El, 54 Brin.
For bearings, bushings; resists severe loads and shock.

AJAX STRUCTURAL BRONZE, GRADE "X"
M-123, 57 Cu, 40 Zn, 3 special hardeners.
Chill cast: 75,000 TS, 33,000 YS, 25 El, 100 Brin
For structural work, corrosion resistant

AJAX T-M
M 1673, 0.40 C, 0.5 Mn, 1.0 Si, 3.3 Cr, 2.5 Mo, 0.35 V, bal Fe
For extrusion and forging dies, hot punches and shears
Hot work die steel, tough, shock resistant

AJAX TOOL STEEL
M-39, 0.9 C, 3.7 Cr, 0.3 V, bal Fe
For tools, compression tools, dies, bolt and rivet headers, shear blades, hot die steel

AKRIT
U.S., 38 Co, 30 Cr, 16 W, 10 Ni, 4 Mo, 2.5 C
For tools, high speed cutting tips on lathe tools, corrosion and heat resistant

AKRO 6
M-1308, 0.12 max C, 0.8 Al, 6.5 Cr, bal Fe
For oil refinery equipment, creep and heat resistant

AKRON
Eng., 63 Cu, 1 Sn, 36 Zn
For fittings, hardware, corrosion resistant

A-L 18 NiCoMo(250)
M-1, 0.02 C, 0.08 Mn, 0.08 Si, 0.003 P, 0.007 S, 18.5 Ni, 7.5 Co, 4.8 Mo, 0.40 Ti, 0.01 Zr, 0.003 B, bal Fe
Hot rolled 165,100 TS, 132,600 YS, 10% El, 53.4% RA
Heat treated 252,000 TS, 245,000 YS, 9.5% El; 46.5% RA
Uses rocket cases, aircraft landing gears, crimping dies
Maraging steel Strengthened by precipitation hardening

A-L 18 NiCoMo(300)
M-1; 0.02 C, 0.08 Mn, 0.08 Si, 0.005 P, 0.005 S, 18.5 Ni, 9.0 Co, 5.0 Mo, 0.6 Ti, 0.01 Zr, 0.003 B, bal Fe
Annealed 150,000 TS, 120,000 YS, 18% El, 75% RA, Rock C 28
Heat treated 306,000 TS, 303,000 YS, 12% El, 60 RA
Uses Rocket cases, aircraft landing gears
Maraging steel Strengthened by precipitation hardening

A-L 20 Ni(250).
M-1, 0.02 C, 0.08 Mn, 0.08 Si, 0.007 P, 0.002 S, 20 Ni, 1.4 Ti, 0.20 Al, 0.50 Cb, bal Fe.
Annealed: 148,500 TS; 110,900 YS; 26.4% El; 68.9% RA, Rock C 29.
Hardened: 269,000 TS; 263,000 YS; 12% El; 59% RA, Rock C 53.
Uses: Rocket cases, aircraft landing gears.
Maraging steel Strengthened by precipitation hardening.

A-L 25 Ni(250).
M-1; 0.02 C, 0.08 Mn, 0.08 Si, 0.008 P, 0.002 S, 25.3 Ni, 1.4 Ti, 0.20 Al, 0.50 Cb, bal Fe
Annealed 105,000 TS; 38,000 YS, 34% El, 77.3% RA, Rock B 89.
Heat treated: 286,000 TS, 276,000 YS, 12% El; 57% RA; Rock C 54.
Uses. Rocket cases, aircraft landing gears.
Maraging steel Strengthened by precipitation hardening

A L 46
M-1, 1.24 C, 4.0 Cr, 3.15 V, 2.0 W, 8.25 Mo, 8.25 Co, bal Fe
High speed steel, molybdenum-cobalt type; AISI M-46

A L 75
M-106, 2.8-3.8 Cu, 4-6 0.3-0.6 Mn, bal Al
Chill cast: 36,000-40,000 TS; 14,500-16,800 YS, 8-10 El, 70-80 Brin; 3.5 Izod.
Gravity die aluminum castings requiring strength and ductility.
Gen Eng BS 1490 LM 22-W.

A L-602
M-1, 0.50 C, 0.7 Mn, 1.7 Si, 0.12 V, 0.4 Mo, bal Fe.
AISI Type S5 Shock resisting tool steel.

A L-609.
M-1, 0.60 C, 0.8 Mn, 2.0 Si, 0.25 Cr, 0.2 V, 0.25 Mo, bal Fe
AISI Type S5 shock resisting tool steel.

ALACRITE NO 52N
M-1115, 55 Co, 26 Cr, 7 W, 10 Ni, 0.5 C.
For hard facing electrode, corrosion and wear resistant.

ALACRITE NO 165 ND.
M-1115; 64 Co, 28 Cr, 5 Mo, 2 Ni, 0.3 max C, 2 max Fe
For hard facing electrode, corrosion and wear resistant

ALACRITE NO. 502
M-1115, 55 Co, 30 Cr, 13 W, 1.0 C, 2 max Fe
For hard facing electrode, corrosion and wear resistant

ALACRITE NO 554
M-1115, 60 Co, 30 Cr, 8 W, 1.8 Fe, 2.0 C
For hard facing electrode, corrosion and wear resistant

ALACRITE NO 602.
M-1115, 66 Co, 27 Cr, 5 W, 1.0 C, 2 max Fe
For hard facing electrodes, corrosion and wear resistant

ALADAR.
Eng., 0.13 Cu, 0.40 Fe, 12.5 Si, 0.09 Mn, bal Al.
For light alloys, castings, same as "Alpax," "Alcoa No. 47," and "Silumen."

ALADDIN
M-666; Al, Cu, bal Zn
For welding rod, for white metal die castings.

ALAIS 4N2
M-678, 0.07-0.13 C, 1.3-2.3 Ni, 0.5 Mn, bal Fe.
Annealed 64,000 TS; 47,000 YS, 25 El
Hardened. 121,000 TS, 99,500 YS, 12 El
For exhaust valves, gears, shafts, case-hardening steel

ALAIS 5C1.
M-678; 0.09-0.15 C, 0.6-1.0 Cr, 0.6-0.9 Mn, bal Fe
Annealed: 71,100 TS, 42,600 YS; 20 El.
Hardened: 114,000 TS, 78,000 YS; 12 El.
For shafts, axles; case-hardening steel.

ALAIS 5N2.
M-678; 0.18-0.25 C, 1.3-2.3 Ni, 0.5 Mn, bal Fe
Annealed: 78,000 TS, 60,000 YS, 20 El.
Hardened: 160,000 TS; 128,000 YS; 8 El.
For gears, shafts, case-hardening steel.

ALAIS 5NC3.
M-678; 0.08-0.13 C, 0.6-0.9 Cr, 2.5-3.0 Ni, 0.35-0.65 Mn, bal Fe
Annealed: 71,000 TS; 57,000 YS; 25 El
Hardened: 140,000 TS; 102,000 YS, 12 El
For shafts, gears; tough, case-hardening.

ALAIS 5½C1
M-678; 0.25-0.30 C, 0.8-1.2 Cr, 0.6-0.9 Mn, bal Fe.
Annealed: 78,000 TS, 48,400 YS; 16 El
Hardened. 128,000 TS, 85,300 YS, 10 El.
For tools, shafts, gears; case-hardening steel

ALAIS 5½NCD1
M-678; 0.07-0.13 C, 0.4-0.7 Cr, 1-1.3 Ni, 0.1-0.2 Mo, 0.5-0.9 Mn, bal Fe.
Annealed: 78,000 TS
Hardened: 140,000 TS, 100,000 YS, 10 El
For shafts, gears; tough, case-hardening

ALAIS 6CD1.
M-678, 0.08-0.16 C, 0.8-1.2 Cr, 0.15-0.30 Mo, 0.6-0.9 Mn, bal Fe.
Annealed: 78,000 TS; 50,000 YS; 25 El
Hardened. 170,000 TS, 114,000 YS; 8 El
For shafts, gears, case-hardening steel

ALAIS 6½
M-678; 0.38 C, bal Fe
Rolled 85,000-121,000 TS, 57,000-83,000 YS; 16-12 El.
For shafts, tools; water hardening

ALAIS AE4
M-678, 0.1 C, bal Fe
Rolled: 50,000-60,000 TS, 35,000 YS, 30 El
For forgings, shafts, weldable.

ALAIS AE4½
M-678; 0.12 C, bal Fe
Rolled. 57,000-72,000 TS, 40,000 YS; 22 El
For forgings, shafts, weldable

ALAIS AE5.
M-678, 0.18 C, bal Fe
Rolled 64,000-100,000 TS, 37,000-60,000 YS, 23-15 El
For forgings, axles, shafts, case hardening

ALAIS AE6
M-678, 0.32 C, bal Fe
Rolled: 78,000-114,000 TS, 50,000-79,000 YS, 20-13 El.
For shafts, axles, water hardening

ALAIS AES7
M-678; 0.4-0.5 C, 1.6-2.1 Si, 0.4-0.8 Mn, bal Fe
Annealed: 99,500 TS, 60,000 YS; 20 El.
Hardened: 210,000 TS, 160,000 YS, 5 El.
For tools, dies, shock resistant.

ALAIS AES8.
M-678; 0.52-0.58 C, 1.5-1.9 Si, 0.5-0.9 Mn, bal Fe.
Annealed 120,000 TS; 64,000 YS, 15 El.
Hardened: 200,000 TS, 160,000 YS, 6 El.
For tools, springs, dies; shock resistant.

ALAIS HC3
M-678; 0.10 C, bal Fe
Rolled. 47,000-72,000 TS; 34,000-43,000 YS; 34-30 El
For case hardened parts; carburized.

ALAIS HC4.
M-678; 0.12 C, bal Fe
Rolled: 57,000-85,000 TS; 28,000-47,000 YS; 30-22 El.
For case hardened parts; carburized.

ALAIS HCC1.
M-678; 0.09-0.15 C, 0.6-1.0 Cr, 0.6-0.9 Mn, bal Fe.
Annealed 74,000 TS; 50,000 YS; 22 El.
Hardened: 93,000 TS, 78,000 YS; 20 El.
For gears, shafts; for carburized parts.

ALAIS HCCD1.
M-678; 0.08-0.16 C, 0.8-1.2 Cr, 0.15-0.30 Mo, 0.6-0.9 Mn, bal Fe
Annealed. 78,000 TS, 50,000 YS, 25 El
Hardened: 170,000 TS; 114,000 YS; 8 El
For gears, shafts; case-hardening steel.

ALAIS HCN2.
M-678; 0.07-0.13 C, 1.3-2.3 Ni, bal Fe
Annealed: 60,000 TS; 45,500 YS; 30 El
Hardened: 99,500 TS; 71,200 YS; 26 El.
For gears, shafts, case-hardening steel

ALAIS HCN5.
M-678, 0.07-0.13 C, Ni, bal Fe
Annealed. 72,000 TS, 57,000 YS, 23 El
Hardened 160,000 TS, 128,000 YS, 10 El
For gears, shafts, case-hardening steel

ALAIS HCNC1½
M-678, 0.11-0.18 C, 0.8-1.2 Cr, 1.2-1.6 Ni, bal Fe.
Hardened. 170,000-200,000 TS; 140,000 YS; 6 El.
For gears, shafts, case-hardening steel

ALAIS HCNCD1
M-678, 0.07-0.13 C, 0.20 Cr, 0.8-1.2 Ni, 0.1-0.2 Mo, 0.4 Mn, bal Fe
Annealed 78,000 TS
Hardened. 155,000 TS, 99,500 YS, 10 El
For gears, shafts, case-hardening steel

ALAKRON
M-187, 5 Si, bal Al.
For decorative light alloy castings, corrosion resistant

ALAMO
M-325, M-559; 0.3 C, 0.6 Mn, 1.0-1.5 Al, 0.6-1.0 Mo, bal Fe
Heat treated 160,000 TS; 135,000 YS, 18 El, 60 RA, 340 Brin
For gears, pinions, shafts, cams; nitriding steel

ALAR 00.5
M-137, M-1272, 0.1 Cu 0.1 Mg, 4.5-6.0 Si, 0.6 Fe, 0.5 Mn, 0.1 Ni, 0.1 Zn, bal Al
Sand cast: 17,000 TS, 8000 YS, 3 El, 40 Brin
Permanent mold 20,200 TS, 9000 YS, 4 El, 50 Brin.
For general purpose light castings, good castability, corrosion resistant

ALAR 00.12
M-137, M-1272, 0.4 C, 0.15 Mg, 10-13 Si, 0.7 Fe, 0.5 Mn, 0.1 Ni, 0.2 Zn, 0.2 Ti, bal Al
Sand cast 23,400 TS, 8000 YS, 3.5 El, 55 Brin
Permanent mold: 27,000 TS; 9000 YS, 5 El, 60 Brin.
For general purpose light castings, corrosion resistant, good castability

ALAR 21.
M-1272, 2-4 Cu, 4-6 Si, 0.8 Fe, 0.4 Mn, 0.3 Zn, 0.2 Ti, bal Al.
Sand cast 20,200 TS; 89,000 YS, 2 El; 65 Brin
Permanent mold 22,400 TS; 11,200 YS; 2 El; 70 Brin.
For crankcases, gear cases, covers, housings; age-hardenable, good castability.

ALARGAN.
Eng.; Ag-Al.

ALASKA WHITE BRASS.
U.S.; Zn, Ni, bal Cu.
For bearings, bushings; heavy duty.

ALA-ZE 63
M-1639; 5-6 Zn, 2-3 rare earth metals, 0.4-1.0 Zr, bal Mg.
Sand Cast: 45,000 TS; 25,000 YS; 8 El.
For general purpose castings, oil pans, cases, housings.
Hydrogen heat treated, high strength and good ductility, pressure tight.

ALBA.
M-296; 30 Pd, 60 Ag, 5 Au, and other elements.
For fountain pen points, dental industry; corrosion resistant, heat treatable

ALBALOY.
M-580; 55 Cu, 30 Sn, 15 Zn.
For bright alloy plating, corrosion resistant

ALBANOID.
M-121, 20 Ni, 62 Cu, 18 Zn.
For architectural and sanitary cast fittings.

ALBANY.
M-1, 0.75 C, 0.90 Cr, 0.20 V, 0.60 Mn, bal Fe
For shear blades, dies, punches, knives, collets, cutlery dies, machine tool parts, great toughness and resistance to impact.

ALBATRA METAL.
U.S., 57.5 Cu, 22.5 Zn, 18.75 Ni, 1.25 Pb
For automobile trimmings, hardware, fittings, (Albata)

ALBIDUR-ALUMINUM
Eng., Al alloy
For light alloy parts, non-hardenable

ALBIN.
Eng., Zn, Ni, bal Cu
For fixtures, hardware, fittings white brass

ALBION HIGH SPEED
M-340, 0.4 C, 0.05 Mn, 2.3 Cr, 15.54 W, bal Fe.
For tools, high speed cutters; high speed steel

ALBION SPECIAL.
M-340, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed cutting tools, high speed steel

ALBION TOOL.
M-340, 1.27 C, 0.33 Mn, bal Fe.
For tools, drills, reamers, water hardening

ALBONDUR
M-116, 1.5 max Mn, 1.0 max Mg, 1.2 max Si, bal Al
For tanks, furniture, marine parts, good formability and weldability.

ALBONDUR
M-1548, 3.5-5.5 Cu, 0.3-0.5 Si, 0.3-1.0 Mn, 0.2-0.7 Mg, bal Al.
Heat treated 74,000-80,000 TS; 57,000-63,000 YS; 8-12 El, 130-150 Brin
For general purpose applications
Age hardenable, high strength.

ALBOR.
M-261; 0.9 C, 1.2 Cr, bal Fe.
For dies for cold stamping white gold and all hard metals, oil hardening.

ALBOR DIE.
M-261, 0.85 C, 0.7 Cr, 0.2 Mo, bal Fe
For coining and medal dies, cutlery dies; deep hardening.

ALBOR DIE.
M-694; 0.85 C, 0.3 Mn, 0.7 Cr, 0.2 Mo, bal Fe.
For cutting tools, dies; oil hardening.

ALBRO.
M-593; 10 Al, 1 Fe, bal Cu.
For acid resisting castings; corrosion resistant.

ALCALOY.
Eng., 9-11 Al, bal Cu.
Cast: 85,000 TS; 41,000 YS; 20 El; Rockwell B50-80.
For safety tools, chains, fittings, hand tools; corrosion resistant, Al-bronze.

ALCALOY.
M-1276, 87-89 Cu, 9-11 Al, 1-2 Fe, 0.1-0.5 Be.
Cast: 85,000 TS; 41,000 YS; 20 El; 83-150 Brin.
For safety tools, chains, chain fittings, hand tools; non-sparking, corrosion resistant.

ALCAN 1S.
M-219, M-643; 99.5 Al, 0.02 max Cu, 0.15 max Si, 0.15 max Fe, 0.03 max Mn, 0.06 max Zn, others 0.2 max.
Wrought: O Temper: 7500-13,500 TS; 29-35 El; 18 Brin.
H4 Temper: 13,500-17,000 TS; 5-8 El; 33 Brin
H8 Temper 18,000 TS; 3-5 El; 44 Brin.
For food and chemical plant equipment, food containers, atomic energy, compression accessories for electrical conductors. Available as sheet and forgings Not heat treatable.

ALCAN C1S
M-219, M-643; 99.5 Al, 0.04 max Cu, 0.1 max Si, 0.4 max Fe
Extrusions Not heat treatable.
M Temper 8500 TS, 25 El.
H2 Temper 12,000 TS, 15 El.
For electrical conductors; bus bar, overhead lines, windings, insulated cable.

ALCAN 2S
M-219, M-643; 99.0 Al, 0.10 max Cu, 0.5 max Si, 0.7 max Fe, 0.1 max Mn, 0.1 max Zn. others 1.0 max.
Sheet, plate extrusions, tube; not heat treatable
O Temper: 10,000-15,000 TS; 20-30 El; 21 Brin.
H4 Temper 15,000-20,000 TS, 3-5 El; 36 Brin.
H6 Temper 17,800-21,300 TS; 2-4 El, 42 Brin.
H8 Temper 20,000 TS, 2-4 El; 46 Brin.
For paneling and mouldings, lightly stressed and decorative assemblies, food and brewing equipment

ALCAN 3S
M-219, M-643, 0.8-1.5 Mn, 0.1 max Cu, 0.1 max Mg, 0.7 max Fe, 0.2 max Zn, bal Al.
Sheet. O. 12,800-18,500 TS; 20-24 El, 27 Brin.
H4: 20,000-25,000 TS, 3-6 El, 46 Brin.
H6 22,800-27,700 TS, 2-4 El, 50 Brin.
H8 25,000 TS, 2-4 El, 57 Brin
For building sheet, vehicle paneling and sheet metal work, packaging, hollow-ware, not heat treatable.

ALCAN 16S
M-219, 2.5 Cu, 0.7 max Fe, 0.3 Mg, 0.7 max Si, bal Al
S-T Temper: 43,000 TS.
For aircraft and structural rivets; heat treatable

ALCAN 17S
M-219, M-643; 3.8-4.5 Cu, 0.5-0.8 Mg, 0.5-0.7 Mn, 0.5 max Fe, bal Al.
Forgings: TB Cond, 67,000 TS; 31,000 YS; 14 El; 31,000 SS, 120 Brin
For stressed parts in aircraft and other structures; heat treatable.

ALCAN 18S
M-219, 4 Cu, 0.6 Mg, 0.9 max Si, bal Al.
S-T Temper 55,000 TS; 40,000 YS; 10 El; 100 Brin
For forgings for light temp service; heat treatable.

ALCAN D19S.
M-219, M-643; 2.5 Cu, 1.5 Mg, 1.3 Ni, 1.0 Fe, bal Al
Plate and forgings
Plate: Ht. Tr to TF Cond 61,000 TS, 54,000 YS, 5 El
Heat treatable
Aircraft structural parts operating up to 200°C; good strength at 200°C

ALCAN 24S
M-219, M-643, 3.8-4.9 Cu, 1.2-1.8 Mg, 0.5 max Si, 0.5 max Fe, 0.3-0.9 Mn, 0.2 max Zn, bal Al
Sheet and plate, heat treatable.
Sheet. O 31,000 max TS
TB· 61,000 TS; 40,000 YS, 120 Brin
For all types of stressed components in aircraft and general engineering.

ALCAN 24S ALCLAD.
M-219, M-643, 3.8-4.9 Cu, 1.2-1.8 Mg, 0.5 max Si, 0.5 max Fe, 0.3-0.9 Mn, 0.2 max Zn, bal Al
Sheet and plate, heat treatable
Sheet: 0. 31,000 max TS
TB 61,000 TS, 40,000 YS, 15 El
For all types of stressed components in aircraft and general engineering

ALCAN 26S
M-219, M-643, 3.9-5.0 Cu, 0.2-0.8 Mg, 0.5-1.0 Si, 0.7 max Fe, 0.4-1.2 Mn, 0.2 max Zn, 0.1 max Cr, bal Al
Plate, extrusions and forgings, heat treatable
Plate TB 54,700 TS, 34,800 YS, 10-14 El
Ht. Tr to TF 62,500 TS, 54,000 YS, 6-9 El
For stressed components of all types in aircraft and general engineering

ALCAN B26S
M 219, M-643; 3.9-5.0 Cu, 0.2-0.8 Mg, 0.5-1.0 Si, 0.7 max Fe, 0.4-1.2 Mn, 0.2 max Zn, bal Al
Sheet 0 25,500 TS; 18-20 El
Ht Tr to TF cond 61,000 TS, 53,000 YS, 6-7 El, 145 Brin
For stressed components of all types in aircraft and general engineering Heat treatable

ALCAN B26S ALCLAD
M-219, M-643, 3.9-5.0 Cu, 0.2-0.8 Mg, 0.5-1.0 Si, 0.7 max Fe, 0.4-1.2 Mn, 0.2 max Zn, 0.1 max Cr, bal Al
Sheet 0 24,000 TS, 18-20 El (est)
Ht Tr to TF Cond 57,000 TS, 46,000 YS, 7-8 El
For parts requiring good strength plus good corrosion resistance, heat treatable

ALCAN 28S
M-219, M-643; 5.6 Cu, 0.2-0.6 Pb, 0.2-0.6 Bi, 0.7 max Fe, 0.4 max Si, 0.3 max Zn, bal Al.
Extrusions 41,000-44,000 TS, 27,000-35,500 YS, 6 El, 25,000-26,000 SS (as heat treated)
For repetition machined parts, free machining screw machined parts, heat treatable.

ALCAN 50S
M-219, M-643; 0.10 max Cu, 0.4-0.9 Mg, 0.3-0.7 Si, 0.40 max Fe, 0.2 max Zn, bal Al
Extrusions, tube, forgings, heat treatable.
Extrusions· Ht. Tr to TF cond. 26,000 TS, 22,700 YS; 7-8 El 75 Brin
Architectural members as window frames, window-screen sections, road transport.

ALCAN C50S.
M-219, M-643; 0.45-0.85 Mg, 0.2-0.6 Si, 0.05-0.2 Cu, 0.15 max Fe, bal Al.
Extrusions Sol Tr TB Cond· 17,800 TS; 16 El.
Ht. Tr. to TF Cond: 26,000 TS; 22,700 YS; 10 El.
Heat treatable
Excellent formability, takes good finish.
For motor car trim and other applications requiring bright finish even with anodizing.

ALCAN D50S.
M-219, M-643, 0.04 Cu, 0.4-0.9 Mg, 0.3-0.7 Si, 0.5 Fe, bal Al
Extrusions. Ht Tr to TF Cond 26,000 TS; 22,700 YS; 7-8 El
Best combination of electrical conductor and mechanical prop, 55% conductivity. Heat treatable
For bus bars, electrical conductors and fittings.

ALCAN B51S
M-219, M-643, 0.10 Cu, 0.5-1.2 Mg, 0.7-1.3 Si, 0.5 max Fe, 0.4-1.0 Mn, 0.2 max Zn, 0.25 max Cr, bal Al
Sheet, plate, extrusions, tube, forgings
Plate Ht Tr to TF Cond 42,000 TS, 34,000 YS, 8 El, 95 Brin
Medium strength, good properties, heat treatable
For structural applications as bridges, cranes, transport equipment, roof trusses

ALCAN B53S
M-219, M-643, 0.10 Cu, 3.1-3.9 Mg, 0.5 max Si, 0.5 max Fe, 0.5 max Mn, 0.2 max Zn, 0.25 max Cr, bal Al
Sheet, plate, extrusions, tube, forgings
Plate, rolled 30,000 TS approx, 75 Brin
Not heat treatable, used in as-rolled or as-forged for road and rail transport, pressure vessels, good weldability and corrosion resistance

ALCAN B54S
M 219, 4.4 Mg, 0.3 Mn, bal Al
F-temper 43,000 TS, 31,000 YS, 16-20 El, 70 Brin
For shipbuilding, structural members, good formability

ALCAN D54S
M-219, M-643, 4.0-4.9 Mg, 0.4 max Si, 0.4 max Fe, 0.5-1.0 Mn, 0.2 max Zn, 0.25 max Cr, bal Al
Sheet, plate, extrusions, forgings
Rolled plate 40,000 TS approx, 10-12 El, 65-70 Brin
Not heat treatable, used in road transport equipment and in ship building, weldable, good resistance to marine atmospheres

ALCAN 55S
M-219, 1.2 Mg, 0.3 Cr, bal Al
For rivets for aircraft, S S 20000

ALCAN 56S
M-219, 5 Mg, 0.1 Mn, 0.1 Cr, bal Al
S-O Temper 42,000 TS, 20,000 YS, 35 El
S-H Temper 58,000 TS, 48,000 YS, 15 El
For rivets, wire products, resists sea water corrosion

ALCAN A56S
M-219, 5 Mg, 0.3 Mn, bal Al
F-temper 38,500 TS, 23,000 YS, 28 El, 70 Brin.
For shipbuilding, structural members, extrusions, good formability.

ALCAN L57S
M-219, M-643, 99.8 Al, 0.8 Mg
Sheet 0: 22,000 max TS
H4· 22,000 29,000 TS.
H6 26,000-33,000 TS
H8 30,000 TS
Excellent formability, takes good finish, For motor car trim and other applications requiring a bright finish, hollow ware; not heat treatable.

ALCAN M57S.
M-219, M-643; 0.1 Cu, 1.7-2.4 Mg, 0.5 max Si, 0.5 max Fe, 0.5 max Mn, 0.2 max Zn, 0.25 max Cr, bal Al.
Sheet, plate.
Plate: 0: 22,700-28,500 TS, 8500 YS; 18-20 El.
H4: 32,000-39,000 TS: 25,000 YS; 3-5 El.
Not heat treatable, good weldability and corrosion resistance, used in panelling and structures for boats, road transport, and aircraft.

ALCAN 61S.
M-219; 0.3 max Cu, 0.6 Mg, 1 Si, 0.3 Cr, bal Al.
S-T Temper: 44,000 TS; 34,000 YS, 14 El, 90 Brin
For automotive and aircraft forgings; heat treatable

ALCAN 65S.
M-219; 0.3 Cu, 1 Mg, 0.6 Si, 0.3 max Cr, bal Al.
S-O Temper 18,000 TS, 8000 YS, 22 El, 30 Brin.
S-W Temper 35,000 TS, 21,000 YS, 22 El; 65 Brin.
S-T Temper. 45,000 TS, 40,000 YS; 12 El, 95 Brin
For structures; heat treatable, corrosion resistant

ALCAN 75S
M-219; 1.5 Cu, 2.5 Mg, 5.6 Zn, 0.3 Cr, 0.2 max Ti, bal Al
S-O Temper 33,000 TS. 15,000 YS, 17 El.
S-T Temper 82,000 TS, 72,000 YS, 11 El, 150 Brin
For aircraft, structures, heat treatable

ALCAN 75S ALCLAD
M-219, 1.5 Cu, 2.5 Mg, 5.6 Zn, 0.3 Cr, 0.2 max Ti, bal Al
S-O Temper 32,000 TS, 14,000 YS, 17 El.
S-T Temper 76,000 TS, 67,000 YS, 11 El
For aircraft, structures, heat treatable, corrosion resistant

ALCAN C75S
M-219, M 643, 5.2-6.2 Zn, 2.2-3.2 Mg, 0.3-0.7 Cu, 0.3-0.7 Mn, 0.5 max Si, 0.5 max Fe, 0.3 max Ti, 0.1 max Ni, bal Al
Forging TF 70,000 TS, 64,000 YS, 6 El, 160 Brin
Heat treatable, for aircraft and other structures where strength/weight ratio is of prime importance

ALCAN M75S
M-219, M 643; 5.3-6.5 Zn, 2.2-3.2 Mg, 0.3-1.5 Cu, 0.3 Mn, 0.1 Ni, 0.5 Si, 0.5 max Fe, 0.3 max Ti, bal Al
Sheet and plate, heat treatable
Sheet O 27,000 TS, 18-20 El, 15,600 SS
Ht Tr to TF: 70,000 TS, 61,000 YS, 8 El, 40,000 SS
Very high strength, for aircraft and other structures where strength/weight ratio is of prime importance

ALCAN M75S ALCLAD
M-219, M-643, 5.3-6.5 Zn, 2.2-3.2 Mg, 0.3-1.5 Cu, 0.3 Mn, 0.1 Ni, 0.5 Si, 0.5 max Fe, 0.3 max Ti, bal Al
Sheet and plate, heat treatable, coated with corrosion resistant mat

ALCAN 99.8
M-219, 99.8 Al, total all others 0.2 max
Sheet 0 13,000 TS max, 16 Brin
H4 13,500-17,000 TS, 28 Brin
H8 18,000 TS, 40 Brin
For fully supported roofing and flashing, collapsible tubes, atomic energy equipment; ann material is very ductile, malleable and durable Not heat treatable

ALCAN 100
M-219, M-643; 99.5 Al, total all others 0.50 max.
Casting: 8500 TS; 24 Brin
For unstressed castings in food and chemical industries and electrical equipment

ALCAN GB-B110.
M-643; Cast aluminum alloy
Heat treat(TF): 47,000 TS, 36,000 YS, 110 Brin
For decorative castings and those requiring both strength and surface suitable for polishing and anodizing.

ALCAN A111.
M-219, 1.2 Cu, 1 Fe, 1 Ni, 2.5 Si, bal Al

ALCAN 117.
M-219, 3 Cu, 0.1 Mg, 0.5 Mn, 4.5 Si, bal Al.
Cast 25,000 TS; 16,000 YS; 3-5 El, 50 Brin.
Cast: 29,000 TS, 17,000 YS, 4 El; 65 Brin
For sand and permanent mold castings; for medium stresses

ALCAN GB-117
M-643, Al-Si5-Cu3 Mn.
Aluminum alloy casting
As cast 22,400 TS, 2 min El; 85 Brin
Heat treated (TF). 40,000 TS; 115 Brin
For gear boxes, clutch housings, oil sumps, gear covers, water pumps, valve covers.

ALCAN 123
M-219; 5 Si, 0.2 max Ti, bal Al.
Cast: 19,000 TS, 9000 YS, 6 El; 40 Brin
Cast: 24,000 TS, 9000 YS, 10 El; 40 Brin
For sand and permanent mold castings; for thin sections

ALCAN 125
M-219, 2.0-4.0 Cu, 4.0-6.0 Si, 0.8 max Fe, 0.3-0.7 Mn, bal Al
Cast. 23,000 TS, 15,000 YS, 2 El, 85 Brin
Cast and aged 40,000 TS, 115 Brin
General purpose castings forlight weight and low cost, gear boxes, clutch housings, valve bodies, radiators, non-solution heat treatable

ALCAN GB-C125
M 643, Al Si5 Cu 1.5 Mg
Aluminum alloy casting
Heat treated, TF 47,000 TS; 37,000 YS, 115 Brin
For cylinder heads, valve bodies water-jackets, hose couplings, can be cast into intricate shapes, high strength at moderate cost

ALCAN D135
M-219, M-643, 0.1 max Cu, 0.20-0.45 Mg, 6.5-7.5 Si, 0.5 max Fe, 0.1 max Ni, 0.3 max Mn, bal Al
Cast 22,700 TS, 12,000 YS, 3 El, 60 Brin
Ht Tr to TF; 40,000 TS; 35,000 YS, 2 El, 95 Brin
Castings for engine components, cylinder blocks, chemical and food equipment, heat treatable

ALCAN GB-D135
M-643, Al-Si7 Mg
Aluminum alloy casting
As cast, (M) 23,000 TS, 12,000 YS; 60 Brin.
Heat treated(TF) 40,000 TS, 36,000 YS 115 Brin
For engine cylinder blocks, chemical and food equipment, many uses

ALCAN A-143
M-219, M-643, 8.5-10.5 Si, 2.0-4.0 Cu, 0.5-1.5 Mg, 0.5-1.5 Ni, 1.0 max Fe 0.5 max Mn, 0.5 max Zn, 0.2 max Ti, bal Al
Cast: heat treated 30,000 TS, 23,000 YS, 105 Brin
Low thermal expansion, good strength and frictional properties, mainly for automotive pistons

ALCAN 160
M-219, M-643, 0.1 Cu, 0.1 max Mg, 10.0-13.0 Si, 0.6 max Fe, 0.5 max Mn, 0.1 Ni, 0.1 Zn, 0.2 Ti, bal Al
Cast. 26,000 TS, 10,500 YS, 6 El; 60 Brin
Not heat treatable, for large castings, general purpose, marine and electrical, valve bodies, radiators, grids and grills.

ALCAN 160N.
M-219; 12 Si, bal Al.
Sand cast: 25,000 TS; 12,000 YS; 8 El; 50 Brin.
For castings; high fluidity.

ALCAN 160X.
M-219; 12 Si, bal Al.
Die cast: 37,000 TS; 18,000 YS; 2 El.
For die castings, instrument cases; for thin wall sections.

ALCAN 162.
M-219; 1 Cu, 1 Mg, 12 Si, bal Al.
Permanent mold: 36,000 TS, 28,000 YS; 0.5 El, 105 Brin.
For permanent mold castings, pistons; low coef. expansion.

ALCAN GB 162 (or A162)
M-643, Al-Si 11.5 Ni2 Cu Mg.
Aluminum alloy casting
Cast, HT to TF: 42,000 TS; 38,000 YS, 130 Brin
For pistons, engine components; low thermal expansion and good high temperature strength.

ALCAN 225.
M-219; 4.5 Cu, 1.5 max Si, 0.2 max Ti, bal Al.
T-22 Temper: 39,000 TS, 28,000 YS, 5 El; 80 Brin.
For sand castings; stressed parts, heat treatable.

ALCAN 236
M-219; 0.65-0.80 Cu, 0.95-1.4 Fe, 1-3 Si, 0.2 max Ti, bal Al.
Cast: 22,000 TS; 14,000 YS; 2 El; 65 Brin.
For sand castings, good machinability.

ALCAN 250
M-219; 10 Cu, 1.5 max Fe, 0.2 Mg, 0.6 max Si, 0.2 max Ti, bal Al
A62 Temper: 25,000 TS; 20,000 YS; 1 El; 75 Brin.
T25 Temper: 36,000 TS, 30,000 YS, 1 El; 100 Brin.
For engine parts, heat treatable

ALCAN A 320.
M-219, 4 Mg, 0.5 Si, 0.2 max Ti, bal Al.
Cast· 25,000 TS; 12,000 YS; 9 El; 50 Brin.
For architectural usage, ornamental and marine parts; sand casting, corrosion resistant

ALCAN 340.
M-219; 8 Mg, bal Al.
Die cast: 42,000 TS, 23,000 YS; 7 El.
For die castings; corrosion resistant.

ALCAN 350.
M-219; 10 Mg, bal Al.
Cast, T4: 47,000 TS, 26,000 YS; 17 El, 75 Brin
For sand castings, heat treatable, corrosion resistant.

ALCHROME 3.
M-61; 14 Cr, 3 Al, bal Fe
For resistors, heating elements, operating below 1500°F.

ALCHROME 6.
M-61; 19-21 Cr, 5.25-6.5 Al, bal Fe.
Annealed: 100,000 TS, 18 El.
For electrical resistors and heating elements, resists S atm.

ALCHROME-D.
M-61; 79.5 Fe, 15 Cr, 5.5 Al.
Wire. Specific resistivity. 137 micro ohm/cm; temperature coefficient· ±20 × 10^{-6} ohm/ohm/°C.
For resistance elements; high specific electrical resistance.

ALCO.
M-144; 0.5 C, 1 Si, 1.7 Cr, 2.2 W, 0.2 V, 0.5 Mo, bal Fe.
For tools, chisels, punches, pneumatic drills; for hot and cold work.

ALCO.
M-594; Zn, bal Cu.
For metalware.

ALCOA 2EC.
M-4; 0.4 Si, 0.6 Mg, bal Al.
T6-temper: 32,000 TS; 29,000 YS; 19 El.
T62-temper: 30,000 TS, 25,000 YS. 20 El.
T64-temper: 17,000 TS, 9000 YS; 24 El
For electrical conductors, good electrical conductivity and mechanical properties. AA 6101.

ALCOA 13.
M-4; 12 Si, 88 Al
Die cast: 43,000 TS; 21,000 YS, 2.5 El; 80 Brin
For carburetor frames, brake shoes, adding machine frames, die casting M.E-10,000,000. AA 413.0.

ALCOA A13.
M-4; 11-13 Si. bal Al.
Die cast· 38,000 TS; 21,000 YS, 2.0 El
For low stressed castings, good castability AA 413.0.

ALCOA 43.
M-4, 5 Si, bal Al
Sand cast: 19,000 TS, 8,000 YS; 6 El, 40 Brin.
Permanent mold: 23,000 TS, 9000 YS, 10 El, 45 Brin.
Die cast· 33,000 TS, 16,000 YS; 9 El; 50 Brin.
For instrument housings, marine castings, cooking utensils; corrosion resistant, good castability AA 443.0.

ALCOA 050
M-1715, 99.5 min Al
Ann(0)· 13,700 TS max; 22-32 El
Max cold work (H8). 19,500 TS min, 3-4 El.
Good corrosion resistance and ductility.
For formed parts for chemical plant, dairy, brewery and bakery equipment
B S 1470, 1471, 1472, 1474

ALCOA 051
M-1715, 99.5 min Al, Cu + Si + Fe 0.05 max.
Extruded· 9500 TS, 4500 YS, 25 El H2 Cond. 12,200 min TS, 15 El
Electrical conductivity 60% I A C.S. min For electric purposes, bus bars B S 2898· E1E

ALCOA 102
M-1715; 99.0 min Al
Ann 13,000 TS, 5,000 YS; 45 El
Good corrosion resistance.
For equipment for chemical, petroleum, pharmaceutical, brewery and food industry, panelling and fully supported roof cladding
B S 1470, 1471, 1474

ALCOA 108
M-4, 4 Cu, 3 Si, bal Al
Sand cast 21,000 TS, 14,000 YS; 2.5 El, 60 Brin.
For light alloy parts; sand castings. AA 208.0

ALCOA A-108
M-4, 4.5 Cu, 5.5 Si, bal Al.
Cast Permanent Mold 28,000 TS; 16,000 YS; 2 El; 65-80 Brin.
For permanent mold castings; intricate. AA 308.0.

ALCOA C-113.
M-4, 7.0 Cu, 3.5 Si, bal Al
Cast: 30,000 TS; 24,000 YS, 1.5 El; 70-90 Brin
For permanent mold castings, non-hardenable. AA 213.0.

ALCOA 122
M-4; 0.5 Si, 10 Cu, 1.2 Fe, 0.2 Mg, bal Al
T-61 Temp: 41,000 TS; 40,000 YS; 0.5 El, 115 Brin.
T-65 Temp. 48,000 TS; 36,000 YS; 0.5 El; 140 Brin.
T-551 Temp: 37,000 TS; 25,000 YS; 0.5 El; 115 Brin.

For pistons, valve guides, cam shaft bearings; wear resist castings, age-hardenable. AA 222.0

ALCOA-A-132.
M-4, 12 Si, 1 Cu, 1 Mg, 2.5 Ni, 0.6 Fe, bal Al.
T551-Permanent mold. 36,000 TS, 28,000 YS, 0.5 El, 105 Brin.
T65-Permanent mold. 47,000 TS, 43,000 YS, 0.5 El, 125 Brin.
Automotive engine pistons and sleeves, permanent mold castings, low expansion alloy; similar to Lo-Ex. AA 332.0.

ALCOA F132.
M-4, 2-4 Cu, 8.5-10.5 Si, 0.5 max Ni, 0.2 Ti, 1.0 max Zn, bal Al
T5-temper 36,000 TS, 28,000 YS, 1 El, 105 Brin
For pistons, cylinder heads; age-hardenable, permanent mold. AA F332.0

ALCOA 138
M-4, 10.0 Cu, 4.0 Si, 0.3 Mg, bal Al
Cast 30,000 TS, 24,000 YS, 1.5 El, 85-110 Brin
For permanent mold castings, retains hardness at high temperatures AA 238.0.

ALCOA 142.
M-4, 4 Cu, 2 Ni, 1.5 Mg, 0.7 Si, bal Al
Sand cast T-21: 27,000 TS, 18,000 YS, 1 El, 70 Brin
Sand cast T-571 32,000 TS; 30,000 YS, 0.5 El; 85 Brin
Permanent mold T-61 47,000 TS; 42,000 YS; 0.5 El; 110 Brin.
Permanent mold T-571 40,000 TS, 34,000 YS, 1 El, 105 Brin
For pistons, air cooled cylinder heads, bearings, retains strength at high temperatures, age-hardenable AA 242.0

ALCOA A 142
M-4, 3.7-4.4 Cu, 0.8 max Fe, 0.5 max Si, 1.4-1.8 Mg, 1.1 max Zn, 1.8-2.2 Ni, 0.7-0.15 Ti, bal Al
Sand cast-T 75-temper 32,000 TS, 28,000 YS, 1 El, 85 Brin
For pistons, cylinder heads, low coefficient of thermal expansion, wear resistant. AA 242

ALCOA 190
M-1715, 0.6 max Si, 0.7 max Fe, 0.8-1.5 Mn, 0.1 max Cu, 0.1 max Mg, 0.2 max Zn, bal Al.
Cond O. 13,000-19,000 TS, 20-25 El
Cond H8 25,400 min TS, 2-4 El
For general purpose non-heat treatable parts and
Good corrosion resistance
assemblies B S 1470. NS3.

ALCOA 195
M-4, 4.5 Cu, 0.75 Si, 0.5 Fe, 0.2 Zn, bal Al
T-4 Temp. 32,000 TS, 16,000 YS, 8.5 El, 60 Brin
T-6 Temp 36,000 TS, 24,000 YS, 5.0 El, 75 Brin
T-62 Temp: 41,000 TS, 32,000 YS; 2.0 El, 90 Brin
For crankcases, general castings, housings, gear cases; age-hardenable. AA 295.0

ALCOA B-195
M-4; 4.5 Cu, 2.5 Si, bal Al
T4-Temper. 37,000 TS, 19,000 YS, 9 El; 75 Brin
T6-Temper: 40,000 TS; 26,000 YS, 5.0 El, 90 Brin
For permanent mold castings; age-hardenable AA B295.0.

ALCOA 214.
M-4, 4.0 Mg, bal Al.
Sand Cast: 25,000 TS; 12,000 YS; 9 El, 50 Brin
For corrosion resistant light alloy castings;
C U. S. 50000; S. S. 20000; C. Y. P. 12000.
AA 514.0.

ALCOA B214
M-4; 3.8 Mg, 1.8 Si, bal Al.
Sand Cast: 20,000 TS; 13,000 YS; 2 El; 50 Brin.
For pipe fittings. AA B514.0.

ALCOA F 214.
M-4, 0.1 max Cu, 0.3 max Fe, 0.3-0.7 Si, 0.3-1.0 Mn, 3.5-4.5 Mg, 0.2 max Ni, 0.1 max Zn, bal Al
Sand cast-F temper: 21,000 TS, 12,000 YS; 3 El; 50 Brin
For architectural applications; corrosion resistant. AA F 514.

ALCOA 218.
M-4, 8 Mg, 0.2 max Cu, 0.3 max Mn, 0.1 max Ni, bal Al.
Die cast 45,000 TS; 27,000 YS, 8 El, 75 Brin.
For airplane wheel flanges and brake shoes; die casting, corrosion resistant. AA 518.0

ALCOA 220.
M-4, 10 Mg, bal Al
T4—Sand Cast 48,000 TS, 26,000 YS, 16 El, 75 Brin
For aircraft castings, high strength, corrosion resistant. AA 520.0

ALCOA 319
M-4, 3.5 Cu, 6.3 Si, bal Al
Sand cast-F temper: 27,000 TS, 18,000 YS; 2.0 El; 70 Brin
T 6-temper 36,000 TS, 24,000 YS; 2.0 El; 80 Brin.
T 5 temper 30,000 TS, 26,000 YS, 1.5 El; 80 Brin
For general utility sand castings, age-hardened AA 319.0

ALCOA 333
M-4, 3.8 Cu, 9.0 Si, bal Al.
F-temper 34,000 TS; 19,000 YS, 2.0 El, 90 Brin

M-4, 6.5 Sn, 2.5 Si, 1.0 Cu, 0.5 Ni, bal Al.
T5-Temper 20,000 TS, 11,000 YS, 5El, 45 Brin
For bearings, cast. AA A850.0

ALCOA B750.
M-4, 6.5 Sn, 2 Cu, 0.75 Mg, 1.2 Ni, bal Fe.
Permanent mold-T5 32,000 TS, 25,000 YS; 5.0 El, 70 Brin
Sand cast T5 27,000 TS, 22,000 YS, 2.0 El.
For bearings, castings for high bearing pressures. AA B850.0

ALCOA 800
M-1715, 5.0-6.0 Cu, 0.4 max Si, 0.7 max Fe, 0.2-0.7 Pb, 0.2-0.7 Bi, bal Al
Cond TD 53,000 TS, 45,000 YS, 11 El
Cond TF 56,000 TS, 43,000 YS, 13 El
A free machining, heat treatable aluminum alloy for high speed automatic work
Nearest U.S. Spec AA 2011

ALCOA 910
M-1715, 0.10 max Cu, 0.4-0.9 Mg, 0.3-0.7 Si, 0.4 max Fe, bal Al
Cond O 14,500 TS, 30-32 El
Cond TF 37,000 TS 32,000 YS, 13-14 El
A general purpose weldable, heat-treatable alloy for glazing bars, window frames
B.S. 1471 HT9 etc, nearest U.S. Spec AA 6063

ALCOA 920
M-1715, 0.10 max Cu, 0.5-1.2 Mg, 0.7-1.3 Si, 0.5 max Fe, 0.4-1.0 Mn, 0.25 max Cr bal Al
Cond O 18,000 TS, 9,400 YS, 26-28 El
Cond TF 49,000 TS, 43,000 YS, 10-12 El
Heat treatable, forgeable, weldable alloy for structural sections subject to stresses and shock loading such as lorry body components
B.S. 1470 HS 30 etc

ALCOA 945
M-1715, 0.15-0.40 Cu, 0.8-1.2 Mg, 0.4-0.8 Si, 0.5 max Fe, 0.1 max Mn, 0.1 max Cr, bal Al
Cond TB 31,000 TS, 19,000 YS, 19 El
Cond TF. 45,000 TS, 40,000 YS; 12 El.
For structural road transport sections, forgeable, weldable, heat-treatable

ALCOA 946
M-1715, 0.15-0.40 Cu, 0.8-1.2 Mg, 0.4-0.8 Si, 0.5 max Fe, 0.4-0.7 Pb, 0.4-0.7 Bi, bal Al
Free machining version of Alcoa 945.

ALCOA 1060
M-4, 99.60 min Al.
O-temper: 10,000 TS, 4000 YS, 43 El, 19 Brin.

H14-temper. 14,000 TS; 13,000 YS, 12 El; 26 Brin.
H18-temper. 19,000 TS, 18,000 YS; 6 El; 35 Brin.
For chemical applications; corrosion resistant. AA 1060.

ALCOA 1100.
M-4, 99.0 min Al, 1 max Si + Fe, 0.2 max Cu.
O-temper 13,000 TS, 5000 YS, 35 El; 23 Brin
H18-temper 24,000 TS; 22,000 YS; 5 El; 44 Brin.
H12-temper· 16,000 TS, 15,000 YS, 12 El, 28 Brin.
For containers, tanks, trim, chemical equipment; corrosion resistant, good formability. AA 1100.

ALCOA 1260
M-4, 99.60 min Al.
O-temper 10,000 TS, 4000 YS, 43 El; 19 Brin
H18-temper· 19,000 TS, 18,000 YS, 6 El, 35 Brin
For chemical equipment, corrosion resistant AA 1260.

ALCOA 2011
M-4, 5.5 Cu, 0.5 Pb, 0.5 Bi, bal Al
T3-temper 55,000 TS, 43,000 YS, 15 El, 95 Brin.
T6-temper· 57,000 TS, 39,000 YS, 17 El, 97 Brin.
For automatic screw machine products; free-cutting. AA 2011.

ALCOA 2014
M-4, 4.4 Cu, 0.8 Si, 0.8 Mn, 0.4 Mg, bal Al
T6-Temper: 70,000 TS; 60,000 YS, 13 El, 34 RA, 135 Brin
T4-Temper· 62,000 TS, 42,000 YS, 20 El, 105 Brin
For light alloy parts, aircraft propellers, forgings; S S 38000, End Lim 20000 AA 2014

ALCOA 2017
M 4, 4 Cu, 0.5 Fe, 0.6 Si, 0.5 Mn, 0.5 Mg, bal Al
O-temper 26,000 TS, 10,000 YS, 22 El, 45 Brin
T4-temper 62,000 TS, 40,000 YS, 22 El, 105 Brin
For aircraft structures and floats, screw machine products age-hardenable, high strength AA 2017

ALCOA 2018
M-4, 4 Cu, 0.6 Mg, 2 Ni, bal Al
T 61 Temper 63,000 TS, 47,000 YS, 16 El; 115 Brin
For light alloy pistons, age-hardened AA 2018

ALCOA 2024
M-4, 3.8-4.9 Cu, 1.2-1.8 Mg, 0.3-0.9 Mn, bal Al
O-Temper 27,000 TS, 11,000 YS, 19 El, 47 Brin
T3-Temper 70,000 TS, 50,000 YS, 18 El, 120 Brin
T36-Temper 72,000 TS, 57,000 YS, 14 El, 130 Brin
For aircraft structures, wings, high strength, age-hardened AA 2024

ALCOA ALCLAD 2024
M-4, Aluminum 2024 core with Al coating
T4 Temper 64,000 TS, 42,000 YS, 19 El
T36-Temper 67,000 TS, 53,000 YS, 11 El
T81-Temper 65,000 TS, 60,000 YS, 6 El
T86-Temper 70,000 TS; 66,000 YS, 6 El
For aircraft structures, wings, pontoons; corrosion resistant AA 2024

ALCOA 2025
M-4; 0.8 Mn, 0.8 Si, 4.5 Cu, bal Al
T6 temper 58,000 TS, 37,000 YS, 19 El, 110 Brin AA 2025
For forged propeller blades, forging alloy, age-hardenable

ALCOA 2117.
M-4, 2.5 Cu, 0.5 Fe, 0.6 Si, 0.5 Mn, 0.3 Mg, bal Al
T4 temper 43,000 TS, 24,000 YS, 27 El, 70 Brin
For rivets, age-hardenable, high strength AA 2117

ALCOA 2218.
M-4; 1.5 Mg, 2 Ni, 4 Cu, bal Al
T72-temper. 48,000 TS, 37,000 YS; 11 El, 95 Brin
T6-temper: 60,000 TS; 37,000 YS; 11 El; 95 Brin.
For aircraft cylinder heads, engine parts; age hardenable, good high temperature strength AA 2218.

ALCOA 2618
M-4, 1.1 Fe, 1.3 Cu, 1.6 Mg, 1.1 Zn, 0.07 Ti, bal Al.
For aircraft forgings; high strength. AA 2618.

ALCOA 3003
M-4, 1.25 Mn, 0.11 Cu, 0.52 Fe, 0.22 Si, bal Al.
O-temper 16,000 TS, 6000 YS, 30 El, 28 Brin
H18-temper· 29,000 TS, 27,000 YS; 4 El, 55 Brin.
H12-temper 19,000 TS; 18,000 YS; 10 El; 35 Brin
For structures, tank cars, pipes, containers; corrosion resistant, good formability AA 3003.

ALCOA 3004.
M-4, 1.25 Mn, 1.0 Mg, bal Al
O-Temper 26,000 TS, 10,000 YS; 20 El, 45 Brin.
H34-Temper 35,000 TS, 29,000 YS, 9 El; 63 Brin.
H38-Temper 41,000 TS, 36,000 YS, 5 El; 77 Brin
For fuel lines, fan blades, sheeting for roofs, light sockets, underground cable sheeting, high resistance to weather corrosion. AA 3004.

ALCOA 4032
M-4, 12 Si, 1 Mg, 0.8 Ni, 0.9 Cu bal Al
T-6 Temper 55,000 TS, 46,000 YS; 9 El, 120 Brin.
For aircraft pistons, forged, low coefficient of expansion AA 4032

ALCOA 4043
M 4, 5 Si, bal Al
F temper 19,000 TS, 8000 YS, 8 El, 40 Brin
For welding wire, marine castings, corrosion resistant AA 4043.

ALCOA 5005
M-4, 0.8 Mg, bal Al
O-temper 18,000 TS, 6000 YS, 30 El, 28 Brin
H34-temper 23,000 TS, 20,000 YS, 8 El, 41 Brin.
H38-temper 29,000 TS, 27,000 YS, 5 El, 51 Brin.
For light reflectors, refrigerator shelves, utensils, good forming properties. AA 5005

ALCOA 5050
M-4, 1.4 Mg, bal Al
O-temper 21,000 TS; 8000 YS, 24 El 36 Brin.
H38-temper 32,000 TS, 29,000 YS, 6 El, 63 Brin
For vessels, tanks, containers, good corrosion resistance and formability AA 5050

ALCOA 5052
M-4, 2.5 Mg, 0.25 Cr, bal Al
O-Temper 28,000 TS, 13,000 YS; 25 El, 47 Brin.
H 34 Temper 38,000 TS, 31,000 YS, 10 El, 68 Brin
For camera cases, deck housings, marine applications, gasoline tanks, resists corrosion AA 5052

ALCOA 5056
M-4, 5.2 Mg, 0.1 Mn, 0.1 Cr, bal Al
O-temper 42,000 TS, 22,000 YS, 35 El, 65 Brin.
H18-temper 63,000 TS, 59,000 YS, 10 El, 105 Brin.
H38-temper 60,000 TS, 100 Brin
For rivets, marine construction, corrosion resistant. AA 5056

ALCOA 5083.
M-4; 0.8 Mn, 4.45 Mg, 0.10 Cr, bal Al.
O-temper. 42,000 TS, 21,000 YS; 22 El.
H113-temper 46,000 TS, 23,000 YS; 16 El.
For welded structures; high strength AA 5083

ALCOA 5086.
M-4, 0.45 Mn, 4.0 Mg, 0.10 Cr, bal Al.
O-temper· 38,000 TS, 17,000 YS, 22 El.
H34-temper 47,000 TS, 37,000 YS, 10 El.
H112-temper 39,000 TS, 19,000 YS; 14 El.
For welded structures, medium strength. AA 5086.

ALCOA 5154.
M-4; 3.1-4.9 Mg, 0.15-0.35 Cr, 0.2 max Ti, bal Al.
O-temper: 35,000 TS; 17,000 YS; 27 El; 58 Brin.
H34-temper: 42,000 TS; 33,000 YS; 13 El; 73 Brin.
H38-temper: 48,000 TS; 39,000 YS; 10 El; 80 Brin.
For unfired pressure vessels, heat exchangers; good low temperature properties.

ALCOA 5254.
M-4; 3.5 Mg, 0.02 Cu, 0.23 Fe, 0.14 Si, 0.25 Cr, bal Al.
O-temper: 35,000 TS; 17,000 YS; 27 El; 58 Brin.
H-38 temper: 48,000 TS; 39,000 YS, 10 El, 80 Brin.
H-112 temper: 35,000 TS, 17,000 YS; 25 El; 63 Brin.
For welding wire, light alloy parts; corrosion resistant. AA 5254

ALCOA 5356.
M-4; 0.05-0.20 Mn, 4.5-5.5 Mg, 0.05-0.20 Cr, 0.2 Ti, 0.0005 Be, bal Al.
H311-temper 38,000 TS; 22,000 YS, 8 El
For welding wire, for welded structures AA 5356

ALCOA 5357.
M-4; 0.30 Mn, 1.0 Mg, bal Al.
O-temper: 19,000 TS; 7000 YS, 25 El; 33 Brin.
H36-temper. 28,000 TS; 26,000 YS, 7 El, 50 Brin.
H38-temper: 32,000 TS; 30,000 YS, 6 El, 55 Brin.
For decorative trim, refrigerator trays; transportation; good formability, takes high polish. AA 5357.

ALCOA 5454.
M-4, 2.75 Mg, 0.8 Mn, 0.1 Cr, bal Al
O-temper. 36,000 TS, 17,000 YS, 22 El; 62 Brin
H-36 temper. 49,000 TS, 48,000 YS, 8 El,
H-112 temper. 36,000 TS, 18,000 YS; 18 El, 62 Brin.
For welded aluminum structures, storage tanks, high strength and corrosion resistance. AA 5454.

ALCOA 5456.
M-4, 5.25 Mg, 0.8 Mn, 0.1 Cu, 0.1 Cr, 0.1 max Ti, bal Al AA 5456.
H-311 temper: 47,000 TS, 33,000 YS, 18 El, 86 Brin
H-321 temper: 51,000 TS, 37,000 YS, 16 El, 90 Brin.
O-temper: 45,000 TS, 23,000 YS, 24 El; 75 Brin.
For pressure vessels, gun mounts, deck houses, overhead cranes, good weldability and corrosion resistant

ALCOA 5554
M-4, 0.8 Mn, 2.7 Mg, 0.1 Cr, 0.1 Ti, bal Al
For Al welding wire, corrosion resistant AA 5554.

ALCOA 5556.
M-4, 0.8 Mn, 5.2 Mg, 0.1 Cr, 0.1 Ti, bal Al.
For Al welding wire; corrosion resistant to sea water. AA 5556.

ALCOA 5652
M-4; 2.5 Mg, 0.25 Cr, bal Al
O-temper: 28,000 TS; 13,000 YS; 25 El, 47 Brin
H32-temper: 33,000 TS, 28,000 YS, 12 El, 60 Brin
H38-temper: 42,000 TS, 37,000 YS, 7 El, 77 Brin.
For welded structures; good strength AA 5652.

ALCOA 6053.
M-4; 0.7 Si, 1.3 Mg, 0.25 Cr, bal Al.
0-Temper: 16,000 TS, 8000 YS, 35 El; 26 Brin.
T-4 Temper 33,000 TS; 20,000 YS, 22 El; 65 Brin
T-6 Temper: 32,000 TS, 32,000 YS, 13 El, 80 Brin
For rivets, forgings. AA 6053

ALCOA 6061.
M-4; 1 Mg, 0.6 Si, 0.25 Cu, 0.25 Cr, bal Al
O-temper: 18,000 TS, 8,000 YS; 25 El; 30 Brin.
T4-temper: 34,000 TS, 21,000 YS, 25 El, 65 Brin
T6-temper: 45,000 TS; 40,000 YS; 17 El, 95 Brin.
For marine constructcion, aircraft fairings, engine baffles; age-hardenable, corrosion resistant.

ALCOA ALCLAD 6061.
M-4; 6061 core with 7072 cladding.
O-temper: 17,000 TS; 7,000 YS; 25 El.
T4-temper: 33,000 TS; 19,000 YS; 22 El.
T6-temper: 42,000 TS; 37,000 YS, 12 El.
For truck body siding; corrosion resistant, age-hardened.

ALCOA 6063
M-4; 0.4 Si, 0.7 Mg, bal Al
O-temper: 13,000 TS, 7000 YS; 25 Brin
T6-temper: 35,000 TS; 31,000 YS, 12 El; 75 Brin.
T835-temper: 48,000 TS; 43,000 YS, 8 El, 105 Brin. AA 6063
For architectural and building applications; good finish.

ALCOA 6151.
M 4, 1.0 Si, 0.6 Mg, 0.25 Cr, bal Al.
T6-Temper: 48,000 TS, 43,000 YS, 17 El, 100 Brin.
For forgings; S. S. 32,000, End. Lim. 11,000, AA 6151.

ALCOA 6463
M-4, 0.7 Mg, 0.4 Si, bal Al.
O-temper 13,000 TS, 7000 YS, 25 Brin.
T-4 temper. 25,000 TS, 13,000 YS, 22 El.
T-6 temper 35,000 TS; 31,000 YS, 12 El, 73 Brin.
For architectural, automotive and appliance parts; heat treatable, extruded products AA 6463.

ALCOA 6951
M-4, 0.15-0.40 Cu, 0.8 max Fe, 0.2-0.4 Si, 0.4-0.8 Mg, 0.2 max Zn, bal Al.
T 4-temper 24,000 TS
T 6-temper 35,000 TS.
For core of brazing sheet, age-hardenable AA 6951

ALCOA 7072
M-4, 0.7-1.2 Zn, bal Al.
For Alclad liner for sheet Al products; corrosion resistant AA 7072.

ALCOA 7075.
M-4, 1.6 Cu, 2.5 Mg, 5.6 Zn, 0.3 Cr, bal Al
O-temper 33,000 TS, 15,000 YS, 17 El; 60 RA
T6-temper 83,000 TS, 73,000 YS, 11 El, 150 RA.
For aircraft parts; high strength, age hardened AA 7075.

ALCOA ALCLAD 7075.
M-4; 5.7 Zn, 1.6 Cu, 2.5 Mg, Ti, bal Al
O-Temper 32,000 TS, 14,000 YS, 17 El
T6-Temper 76,000 TS, 67,000 YS, 11 El.
For structural parts for aircraft; high strength.

ALCOA 7076
M-4, 7.5 Zn, 1.6 Mg, 0.6 Cu, bal Al
T-6 Temper 70,000 TS, 60,000 YS, 14 El; 140 Brin.
For forgings, age-hardenable. AA 7076.

ALCOA 7079
M-4, 4.3 Zn, 3.3 Mg, 0.6 Cu, 0.2 Cr, 0.2 Mn, bal Al.
T6-temper. 78,000 TS, 68,000 YS, 14 El, 145 Brin AA 7079
For highly stressed aircraft forgings, high strength, age-hardenable

ALCOA 7178.
M-4, 1.6-2.4 Cu, 2.4-3.1 Mg, 0.18-0.40 Cr, 6.3-7.3 Zn, 0.2 max Ti, bal Al
T6-temper. 88,000 TS, 78,000 YS; 10 El, 160 Brin.
O-temper: 33,000 TS, 15,000 YS; 15 El, 60 Brin
For airframes, aircraft structural members; age-hardenable; formerly 78S

ALCOA ALCLAD 7178
M-4; 7178 core with 7072 cladding.
O-temper: 32,000 TS, 14,000 YS; 16 El.
T6-temper: 81,000 TS, 71,000 YS; 10 El.
For aircraft structures; high strength, age-hardened

ALCOA 7277.
M-4; 0.8-1.7 Cu, 1.7-2.3 Mg, 0.18-0.35 Cr, 3.7-4.3 Zn, bal Al.
For large rivets; for heavy duty, age hardened. AA 7277.

ALCOA AZ31B.
M-4, 3.0 Al, 0.4 Mn, 1.0 Zn, bal Mg.
Annealed: 38,000 TS; 28,000 YS, 14 El; 50 Brin.
For formed parts, sheets, extrusions.

ALCOA AZ61A
M-4; 6 Al, 1 Zn, 0.30 Mn, bal Mg.
Extruded: 45,000 TS, 33,000 YS; 16 El; 60 Brin.
For light alloy parts, extruded and pressed.

ALCOA AZ80A.
M-4, 8.9 Al, 0.30 Mn, 0.45 Zn, bal Mg
Forged 49,000 TS, 36,000 YS; 11 El, 60 Brin.
T 5-Temper 55,000 TS, 38,000 YS, 6 El, 82 Brin.

ALCOA AZ91A
M-4, 9 Al, 0.6 Zn, 0.10 Mn, bal Mg
Die cast: 38,000 TS, 24,000 YS, 4.5 El, 60 Brin
For pressure die castings, strong

ALCOA AZ92A.
M-4; 9 Al, 1 Zn, 0.10 Mn, bal Mg.
F-temper: 24,000 TS, 14,000 YS, 2 El, 65 Brin.
T 6 temper 38,000 TS, 22,000 YS; 3 El, 80 Brin
For permanent mold castings, heat treatable.

ALCOA EC
M-4, 99.6 min Al
O-Temper 12,000 TS; 4,000 YS, 23 El.
H-18 Temper 21,000 TS, 19,000 YS; 1.5 El.
For wire for trolleys, electrical conductors, high electrical conductivity. AA EC

ALCOA NO 360
M-4, 9-10 Si, 0.5 Mg, 2 max Fe, bal Al
Die cast 47,000 TS, 25,000 YS, 3.0 El
For die castings, corrosion resistant AA 360.0.

ALCO BRONZE
M-404, 10 Sn, 5 Ni, bal Cu
For ships forgings, propellers, skates, surgical instruments, tough, hard, corrosion resistant.

ALCODIE
M 35, 0.35 C, 5 Cr, 0.4 V, 1.5 W, 1.5 Mo, bal Fe
Oil or air hardening tool steel for die casting dies, hot blanking and forging dies, shear blades, AISI H12

ALCOLOY
M-279, 22.7 Zn, 3.4 Al, 0.4 Co, bal Cu
Annealed 78,000-82,000 TS, 47,000-55,000 YS, 36-39 El
Spring temper 120,000 TS; 108,000 YS; 1.5 El
For springs, diaphragms, connectors
Readily deep drawn, good corrosion and stress-corrosion resistance

ALCOLOY R 688
M-279, 73.5 Cu, 22.7 Zn, 3.4 Al, 0.4 Co.
Ann. 77,000-87,000 TS, 47,000-62,000 YS; 30-40 El
Cold rolled 87,000-140,000 TS, 63,000-120,000 YS; 2-29 El
Excellent corrosion resistance, high strength.
For relay springs, electric terminals, shells, connectors.

ALCO M replaced by CYCLOPS S1

ALCO S replaced by CYCLOPS S1

ALCOMAX-I.
M-1010, 25 Co, 11.5 Ni, 7.5 Al, 3 Cu, 1.5 Ti, bal Fe.
For magnetic and electrical equipment.
Permanent magnet. High permeability.

ALCOMAX-II.
M-1010, 8.1 Al, 11.9 Ni, 21 Co, 4 Cu, bal Fe.
For magnetic and electrical equipment.
Permanent magnet, high coercive force.

ALCOMAX III
M 1010; 13.5 Ni, 25.5 Co, 3 Cu, 7.5 Al, 0.9 Cb, 0.17 Si, bal Fe.
For magnets for motors, loud speakers, permanent magnet

ALCOMAX IV
M-1010; 7.4 Al, 13.3 Ni, 24.5 Co, 3 Cu, 2.5 Cb, bal Fe.
For magnets for cycle dynamos; permanent magnet.

ALCONIT-0
Germ.; Ni, Al, bal Fe
For permanent magnets

ALCONIT-10
Germ., Ni, Al, bal Fe
For permanent magnets.

ALCONIT 16
German; Ni, Al, bal Fe.
For permanent magnets.

ALCONITE
M-1464, C, alloy, bal Fe
For castings

ALCO NO 716.
M-4, 10 Si, 4 Cu, bal Al.
For brazing alloy, wire

ALCOP BRONZE
M-508, 62 Cu, 2.5 Al, 35.5 Zn, 0-15 Pb.
Cast 73,000 TS, 37,000 YS, 35 El, 150 Brin
For centrifugal castings, bushings, liners, bearing cages, heavy duty.

ALCOP NO 3
M-1168, 61.5-63.5 Cu, 35-38 Zn, 0.75-1.25 Pb, 0.9-1.3 Al
Cast 63,000 TS, 35,000 YS; 30 El; 102 Brin
For hardware, die castings, leaded bronze, free-cutting

ALCRES
U S; 12 Cr, 5 Al, 83 Fe
For electrical resistances, heat resisting.

ALCRESS
Eng., 70 Fe, 20 Cr, 5 Al
For electrical resistors, heat resistant

ALCROSIL 5
M-376, 0.15 max C, 0.50 max P, 0.50-1.0 Si, 4-6 Cr, 0.45-0.65 Mo, 0.30-0.70 Al, bal Fe.
Annealed 60,000 TS, 25,000 YS, 30 El, 163 Brin.
For high temperature applications, corrosion, heat resistant.

ALCUFONT 4.5
M-1176, 4.5 Cu, 0.8 max Fe, 1 max Si, 0.2 max Ti, bal Al
Heat treated 36,000-43,000 TS, 28,000-33,000 YS; 4-2 El, 75-95 Brin.
For light alloy parts, age-hardenable

ALCUFONT 8
M-1176, 7.0-8.5 Cu, 0.2 max Ti, 0.5 max Si, 0.6 max Fe, bal Al
Heat treated. 20,000-26,000 TS, 11,000-13,500 YS; 5-2 El, 55-70 Brin
For pistons, light alloy parts, age-hardened

ALCUFONT 10
M-1176, 9.3-10.7 Cu, 0.5-1.3 Fe, 0.2-0.4 Mg, bal Al.
Heat treated 40,000-51,200 TS, 34,000-37,000 YS; 0.5-0.2 El, 125-150 Brin.
For pistons, high strength.

ALCUFONT 12.
M-1176; 11.0-12.5 Cu, 0.2 Ti, 1 Fe, bal Al.
Heat treated: 38,400-42,700 TS; 22,800-25,600 YS; 1.5-1.0 El; 110-125 Brin.
For pistons; high strength.

ALCUMAN.
M-1548; 4.8-6.0 Cu, 0.2 max Si, 0.5 Mn, 1.5 Mg, bal Al.
Heat treated: 60,000-71,000 TS; 50,000-57,000 YS; 5-10 El; 120-140 Brin.
For screw machine products, construction and transportation equipment. Age-hardenable. High strength.

ALCUNIC.
M-102; 80 Cu, 1 Ni, 2 Al, 17 Zn.
Hard: 103,000-112,000 TS, 94,000-106,000 YS; 3.5-3.0 El, 200-220 Brin.
For condenser tubing, belt buckles; corrosion resistant.

ALCUNIC "G."
M-102; 70 Cu, 1 Ni, 2 Al, bal Zn.
Soft. 59,000 TS, 20,000 YS; 56 El.
Hard: 100,000 TS, 95,000 YS; 3 El
For condenser tubes, belt buckles; corrosion resistant.

ALCUPLATE
M-926; Cu clad to 2S aluminum alloy
Soft: 17,000 TS; 7800 YS; 33 El
Hard 30,000 TS; 25,000 YS; 5 El.
For electrical contacts, Al alloys plated by lamination with copper, 80% Al-20% Cu

ALDA.
M-667, 0.1-0.2 C,, bal Fe
For welding rods; copper coated.

ALDAL.
M-767; 3.5-4.5 Cu, 0.4-1.0 Mn, 0.3-0.75 Mg, bal Fe.
60,000 TS, 22 El; 120 Brin
For light alloy parts, aircraft construction, Duralumin type.

ALDECOR
M-97, 0.12 max C, 0.35-0.60 Cu, 0.16-0.28 Mo, 0.25-1.50 Cr, 0.25-1.50 Ni, bal Fe
Hot rolled 70,000 TS, 50,000 YS; 22 El.
For transportation equipment, bus and truck bodies, good forming and welding characteristics.

ALDIVAN
M-73; 0.4 C, 2.5 Cr, 0.3 V, bal Fe
For tool steel for Al die castings, hot work steel

ALDREL
Italy, Si, Mg, bal Al
42,500-51,000 TS, 38,000-44,000 YS; 5-9 El.
For light alloy parts

ALDREY.
M-249, M-264, 0.2-1.0 Si, 0.4 Mg, 0.3 Fe, bal Al.
Heat treated. 44,000-49,000 TS, 38,000-43,000 YS; 9-5 El, 90-100 Brin
For auto engine parts, electric transmission wires and cables, age-hardenable

ALDREY.
M-1548; 0.5-0.6 Si, 0.4-0.5 Mg, bal Al.
Heat treated: 43,000-50,000 TS, 38,400-44,000 YS, 5-9 El. 70-80 Brin.
For general structural members, aircraft and aerospace components.
Age hardenable, corrosion resistant

ALDREY 14.
M-624; M-1634, M-541; 0.4-0.6 Si, 0.4-0.6 Mg, 0.3 max Fe, 0.3 max Ti, bal Al.
Annealed: 11,400-17,000 TS; 4300-7100 YS; 20-3 El.
THA16 Temper: 42,700-50,000 TS; 38,400-44,100 YS; 4-9 El.
For marine structures and hardware, architectural applications. Heat treatable.

ALDUR.
Austrian; 0.16 C, 0.24 Si, 1 Mn, 0.055 Al, 0.02 S, bal Fe
69,000-85,000 TS, 47,000 YS, 33 El.
For welded structures.

ALDUR 50
Austrian, Swiss; 0.20 max C, 0.45 Si, 0.95 Mn, bal Fe
Rolled: 70,000-85,000 TS.
For welded structures; good weldability.

ALDUR 58
Austrian, Swiss, 0.20 max C, 0.45 Si, 1.4 Mn, 0.35 Cu, bal Fe.
Rolled: 82,000-96,500 TS; 57,500 YS, 22 El
For welded structures; good weldability.

ALDURAL
M-338; Al clad Duralumin.
For aircraft structures; clad with 99.7 Al.

ALDURAL E.
Eng.; Al clad Al alloy core - 3.0-4.5 Cu, 1.0 max Si, 1.0 max Mg, 1.2 max Mn, 1.0 max Fe, bal Al.
50,000 TS, 38,000 YS; 8 El.
For light metal parts, age hardenable

ALDURAL-G
M--338, 4.5 Cu, 0.6 Mn, 1.5 Mg, bal Al.
Annealed 27,000 TS; 11,000 YS; 20 El, 47 Brin.
Heat treated 72,000 TS, 57,000 YS, 13 El, 130 Brin
For aircraft components, fittings, rivets, fasteners
Age hardenable High fatigue and tensile strength.

ALDURAL K
M-338, 0.4 C, 2.7 Mg, 0.5 Mn, 5.3 Zn, bal Al
Heat treated: 67,000-72,000 TS, 58,000-60,000 YS, 8 El
For aircraft structures; age hardenable, high strength

ALDURAL-L
M-338, 0.4 Cu, 2.7 Mg, 0.5 Mn, 5.3 Zn, bal Al.
Age hardened 72,000 TS, 61,000 YS, 8 El
For high strength applications, manifolds, cylinders. Responds to age hardening.
Sheets and plates, DTD 687A spec.

ALDURAL-LC.
M-338, 0.4 Cu, 2.7 Mg, 0.5 Mn, 5.3 Zn, bal Al.
Age hardened 70,000 TS; 60,000 YS, 10 El
For high strength application, manifolds, cylinders
DTD 687A spec Age-hardenable

ALDURAL Q
M-338; 3.5-5.0 Cu, 0.4-1.2 Mg, 0.7 Si, 0.7 Fe, 0.4-1.2 Mn, 0.2 Ti, bal Al
Heat treated 53,800 TS, 31,400 YS; 10-12 El,
For structural members, age-hardened, high strength.

ALDURAL S.
M-338; 3.5-4.8 Cu, 0.8 Mg, 0.9 Si, 1 Fe, 1.2 Mn, 0.3 Ti, bal Al
W-temper: 54,800 TS, 31,400 YS, 15 El
WP-temper 58,300 TS, 44,800 YS, 8 El
For structural members, age-hardened, high strength.

ALDURAL Z
M-338, 3.5-4.8 Cu, 0.6 Mg, 1.5 Si, 1 Fe, 1.2 Mn, 0.3 Ti, bal Al
WP-temper: 60,500 TS; 47,000 YS, 8 El
For structural members; age-hardened, high strength.

ALDURBRA
M-282, M-150, 76 Cu, 22 Zn, 2 Al.
80,000 TS; 44,000 YS; 16 El; 130 Brin.
For condenser tubes; corrosion resistant.

ALEMITE.
M-595; 10 Si, bal Al.
For light alloy parts; die casting.

ALFENIDE.
59.1 Cu, 30.12 Zn, 9.7 Ni, 1.0 Fe.
For ornaments, hardware, fittings; nickel silver.

ALFENOL.
M-38; 16 Al, bal Fe.
For electrical equipment; high permeability.

ALFENOL-16.
M-32; 16 Al, 84 Fe.
For relays, gyros, signal generators, servo mechanisms; soft magnetic material, high permeability.

ALFER.
M-926; low C-steel clad with Al alloy.
For electron tubes.

ALFER.
Japan; 12-14 Al, bal Fe.
For permanent magnets; high permeability.

ALFERIUM.
M-533, 3.5-4.5 Cu, 0.4-1.0 Mn, 0.3-0.75 Mg, bal Al.
Heat treated: 55,000 TS; 31,000 YS, 16 El
For airplane and dirigible parts, similar to "Duralumin."

ALFERON.
M-44; 23 Cr, 5 Al, bal Fe.
Rolled 110,000 TS; 60,000 YS; 20 El.
For electric resistances; magnetic.

ALGIERS (ALGERS) METAL.
Eng.; 94.5 Sn, 0.5 Sb, 5 Cu.
For bearings; anti-friction.

ALGIERS METAL-1
Eng; 90 Sn, 10 Sb
For bearings, corrosion resistant.

ALGIERS METAL-2
Eng, 75 Sn, 25 Sb
For bearings, corrosion resistant.

ALGO-LOY 1315
M-1253; 0.10-0.20 C, 1.1-1.65 Mn, 0.40 max Cu, bal Fe
Rolled 70,000 TS, 50,000 YS; 22 El
For gears, cams, camshafts, bolts; case hardened, tough

ALGO-LOY 1317
M-1253, 0.25 max C, 1.65 Mn, 0.20 min Cu, 0.05 max Mo, 0.30 max Cr, 0.30 max Ni, bal Fe.
Rolled. 70,000 TS, 50,000 YS; 22 El.
For gears, cams, camshafts, crankshafts; case hardened, tough.

ALGOMA 1315
M-1253, 0.10-0.20 C, 1.1-1.65 Mn, 0.15-0.35 Si, 0.40 Cu, bal Fe.
Rolled: 70,000 TS; 50,000 YS; 22 El.
For compressed gas cylinders, dished heads; good formability and drawability.

ALGOMA 1317.
M-1253; 0.25 max C, 1.65 max Mn, 0.20 min Cu, 0.3 max Ni, 0.3 max Cr, 0.05 max Mo, bal Fe
Rolled: 67,000 TS; 46,000 YS; 20 El.
For highway guard rails, transportation equipment, cars; structural steel.

ALGOMA-AR.
M-1253; 0.35-0.50 C, 1.2-2.0 Mn + Cr, bal Fe.
250 Brin.
For conveyors, chutes, road machinery, dredging equipment; tough and abrasion resistant.

ALGONQUIN.
M-435; 1.0 C, 0.25 Mn, 0.2 Si, bal Fe.
For dies; water hardened.

A-L Grade 173.
M-1; 0.40 C, 0.55 Mn, 1.0 Si, 3.3 Cr, 0.5 V, 2.5 Mo, bal Fe.
Oil hardening hot work tool steel, chromium type; AISI H10.

ALHEAD.
M-1; 1.0 C, 1.5 W, 1.5 Co, 0.15 max Mo, bal Fe.
Annealed: 217 Brin.
Heat treated: 600 Brin.
For cold heading dies; wear and abrasion resistant.

ALIDIE
M-275; 1.5 C, 12 Cr, 0.2 V, 1 Mo, bal Fe.
For blanking and forming dies, punches; Type D2; air hardened, non-deforming.

ALJEP.
France; 3.8 Cu, 1.3 Mg, 1.5 Ni, 0.5 V, bal Al.

ALKADUR 300.
M-1548, 3.5-4.5 Cu, 0.2-1.0 Si, 0.3-1.2 Mn, 0.4-1.4 Mg, bal Al.
Heat treated: 62,700-71,100 TS; 48,000-57,000 YS; 5-15 El, 110-150 Brin.
For aircraft components, fittings, fasteners, rivets.
Heat treatable High strength and fatigue.

ALKALI-RESISTING METAL.
Eng.; 95 Fe, 5 Ni.
For corrosion resisting parts, chemical apparatus, corrosion resistant.

ALKROHMIT 140.
M-27; 0.8 C, 20 Cr, 5 Al, bal Fe.
For electric resistances; heat and oxidation resistant.

ALKRONID
M-1331, 0.34 C, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment, creep resistant.

ALKROTHAL-14
M-1150; 4 Al, 15 Cr, bal Fe
Rolled: 90,000 TS; 70,000 YP; 20 El, 220 Brin
For electrical resistances
For service up to 1920°F

ALKUMAG 302.
M-324, 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
For aircraft structures and parts, age hardenable.

ALKUMAG 303.
M-324; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
For aircraft structural parts; age hardenable

ALKUMAG 311
M-324; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
For aircraft structures and parts; age hardenable.

ALLADIN
Eng; Zn alloy.
For welding rod; for white metal die castings.

ALLAN NO. 2 BRONZE
U.S., 66 Cu, 9 Sn, 25 Pb.
For bearings, hardware, tough.

ALLAN NO. 2 RED METAL.
M-124; 60 Cu, 40 Pb.
For high speed bearings, piston wearing rings.

ALLAN RED BRONZE.
U.S.; 70-55 Cu, 20-40 Pb, 10-5 Sn, 1 S.
For bearings, hardware; tough.

ALLAN RED BRONZE
U.S.; 62.5 Cu, 30 Pb, 7.5 Sn.
For bearings, hardware; tough.

ALLAN RED METAL.
M-124; 50 Pb, 50 Cu.
13.5 Brin.
For bearings, crank-pins for facing pistons; not a true alloy but a mechanical mixture.

ALLAUTAL.
M-116; surface of pure Al on base of "Lautal."
Annealed: 20,000 TS; 25 El.
Normalized: 60,000 TS; 18 El.
For light alloy parts; similar to "Alclad."

ALLAUTAL.
M-1548; 4.5-5.5 Cu, 0.2-0.5 Si, bal Al.
Heat treated: 60,000-71,000 TS; 42,000-57,000 YS; 2-10 El; 120-140 Brin.
For aircraft components, fasteners, fittings, rivets.
Age-hardenable, high tensile and fatigue strength.

ALLCAST.
M-906; 2.5-3.5 Cu, 4.5-6.0 Si, 0.15 max Mg, 1.0 max Fe, 0.2 max Ni, 0.5 max Mn, bal Al.
Cast: 24,000 TS; 12,000 YS; 2 El; 60 Brin.
Heat treated: 30,000 TS; 18,000 YS; 2.5 El; 75 Brin.
For sand and permanent mold castings; age-hardenable.

ALLCAST-46.
M-130; 0.6 max Cu, 6.5-7.5 Si, 0.2-0.4 Mg, 0.5 max Zn, 0.75 max Fe, 0.1-0.2 Ti, bal Al.
Cast: 23,000 TS; 12,000 YS; 3.5 El; 55 Brin.
T6 Temper: 33,000 TS; 24,000 YS; 4 El; 70 Brin
For instrument cases, gear cases, fittings, crankcases, oil pans.
Heat treatable. Similar to aluminum 356.
Corrosion resistant.

ALLCAST-46A.
M-130; 0.20 max Cu, 6.5-7.5 Si, 0.25-0.40 Mg, 0.3 max Zn, 0.5 max Fe, 0.25 max Ti, bal Al.
Permanent Mold Cast: 25,000 TS; 13,000 YS; 7 El; 65 Brin.
T6 Temper: 40,000 TS; 27,000 YS; 5 El; 90 Brinell
For permanent mold castings, oil pans, instrument cases, crankcases.
Heat treatable. Similar to Aluminum 356.

ALLCAST 46-10.
M-130; 0.10 max Cu, 6.5-7.5 Si, 0.28-0.40 Mg, 0.1 max Zn, 0.15 max Fe, 0.2 max Ti, bal Al.
Permanent Mold Cast: 27,000 TS, 14,000 YS; 8 El, 55 Brin.
T61 Temper: 43,000 TS; 28,000 YS; 12 El; 90 Brin.
For gear housings, fittings, oil pans, crankcases, instrument housings.
Heat treatable, permanent mold. Similar to Aluminum A356.

ALLCAST 50.
M-130; 3.5-4.5 Cu, 2.5-3.5 Si, 0.10 max Mg, 1.0 max Zn, 1.0 max Fe, 0.2 max Ti, bal Al.
Permanent Mold Cast: 27,000 TS; 16,000 YS; 3 El; 65 Brin.
T6 Temper: 40,000 TS; 26,000 YS; 4 El; 85 Brin.
For casings, housings, oil pans, manifold and valve bodies, machine frames, piano plates and frames.
Heat treatable, permanent mold. Similar to Aluminum 108.

ALLCAST 51.
M-130; 3.5-4.5 Cu, 5.5-6.5 Si, 0.1 max Mg, 1.0 max Zn, 1.0 max Fe; 0.2 max Ti, bal Al.
Cast: 28,000 TS; 16,000 YS; 2 El; 70 Brin.
T6. 45,000 TS; 28,000 YS; 4 El; 105 Brin.
For permanent mold castings, housings, oil pans, casings, fittings.
Heat treatable. Similar to Aluminum A108.

ALLCAST 52.
M-130; 4-5 Cu, 1.5 max Si, 0.5 max Zn, bal Al.
T6 Temper: 37,000 TS; 24,000 YS; 5 El; 75 Brin.
At 600°F: 4000 TS; 3000 YS; 75 El.
For flywheel housings, aircraft wheels, fittings, crankcases, instrument cases.
Heat treatable. Similar to Aluminum 195
Strong and rugged.

ALLCAST 52A.
M-130, 4-5 Cu, 1.5 max Si, 0.35 max Zn, 0.8 max Fe, 0.25 max Ti, bal Al.
T4 Temper: 32,000 TS; 16,000 YS; 8 El; 60 Brin.
T62 Temper: 41,000 TS, 32,000 YS; 2 El; 95 Brin.
For flywheel housings, crankcases, aircraft and bus wheels
Heat treatable. Strong and rugged.
Similar to Aluminum 195.

ALLCAST 53
M-130; 4.0-5.0 Cu, 2.0-3.0 Si, 0.5 max Zn, 0.35 max Ni, 0.2 max Ti, 1.0 max Fe, bal Al.
Cast: 30,000 TS; 14,000 YS, 3.5 El; 70 Brin.
T6: 40,000 TS, 26,000 YS; 5 El, 90 Brin.
For aircraft fittings and wheels, fuel pump bodies, seat frames.
Heat treatable, permanent mold. Similar to Aluminum B195.

ALLCAST 59A.
M-130, 3.5-4.5 Cu, 0.6 max Si, 1.3-1.8 Mg, 0.25 max Cr, 1.7-2.3 Ni, 0.25 max Ti, bal Al.
Cast. 34,000 TS, 24,000 YS, 1 El; 105 Brin.
T6: 54,000 TS; 51,000 YS; 0.8 El; 120 Brin.
For air cooled cylinder heads, diesel engine pistons, generator housings.
Heat treatable, permanent mold Similar to Aluminum 142.

ALLCAST 60
M-130, 6 Si, 3.5 Cu, bal Al.
F-temper: 27,000 TS; 16,000 YS, 2.5 El; 65 Brin.
T6-temper: 35,000 TS; 24,000 YS, 3.5 El; 85 Brin
For pressure tight castings, heat treatable.

ALLCAST 70.
M-130; 6 Si, 3.5 Cu, bal Al
F-temper: 26,000 TS, 16,000 YS; 2.0 El, 70 Brin.
T6-temper: 36,000 TS; 24,000 YS, 2.0 El, 80 Brin.
For pressure tight castings, heat treatable.

ALLCAST 78
M-130; 3.0-4.0 Cu, 7.5-8.5 Si, 1.0 max Zn, 0.6 max Fe, 0.25 max Ti, bal Al.
Die cast: 43,000 TS, 26,000 YS; 2 El.
At 300°F: 37,000 TS; 24,000 YS; 4 El.
For motor frames, hand truck wheels, oil pans, ornamental parts.
Good high temperature strength.

ALLCAST 125.
M-130, 9.7-10.5 Mg, 0.25 max Ti, bal Al.
T4 Temper: 57,000 TS; 25,000 YS; 30 El; 80 Brin.
For aircraft fittings, car frames, marine parts, lever brackets.
Age hardenable, corrosion resistant, shock resistant, tough.

ALLCAST 400.
M-130; 3.6-4.2 Mg, 0.5 max Si, 0.5 max Zn, 0.6 max Mn, 0.5 max Fe, 0.25 max Ti, bal Al.
Cast (Sand). 25,000 TS; 12,000 YS; 9 El; 50 Brin.
At 300°F: 22,000 TS; 12,000 YS, 7 El.
For food handling equipment, cooking utensils, chemical and textile plant equipment, marine hardware. Similar to Aluminum 214, good corrosion resistance. Not heat treatable.

ALLCAST 405.
M-130; 4.0-5.0 Zn, 0.5 max Si, 1.0 max Fe, 0.2 max Ni, 0.15 max Mn, 0.9-1.4 Sb, bal Al.
Die Cast: 22,000 TS; 11,000 YS; 10 El.
For oil pans, instrument cases, housings, ornaments.
Good corrosion resistant.

ALLCAST 417.
M-130; 6.5-7.5 Mg, 0.12 max Si, 0.10-0.25 Mn, 0.10-0.25 Ti, bal Al.
Sand Cast: 36,000 TS; 19,000 YS; 10 El; 70 Brin.
For automotive and marine castings, cooking utensils, gasoline fuel gages, textile machinery
Similar to Aluminum 2185P and Almag 35. High strength and shock resistant.

ALLCAST 418.
M-130; 7.5-8.5 Mg, 0.3 max Si, 0.9-1.3 Fe, 0.30 max Mn, 0.10 max Ni, bal Al.
Die Cast: 43,000 TS; 25,000 YS; 5 El, 80 Brin
For cylinder blocks, marine fittings, hardware, brake shoes, wheel flanges. Similar to Aluminum 218. Good strength and corrosion resistance.

ALLCAST 420
M-130, 9.7-10.5 Mg, 0.15 max Si, 0.20 max Fe, 0.25 max Ti, bal Al.
T4 Temper: 46,000 TS, 25,000 YS, 16 El; 75 Brin
T5 Temper 35,000 TS, 110 Brin.
For aircraft fittings, marine parts, railroad car frames.
Sand castings Similar to Aluminum 220
High strength and corrosion resistance.

ALLCAST 440
M-130; 0.5-0.65 Mg, 5.2-6.0 Zn, 0.4-0.6 Cr, 0.15-0.25 Ti, 0.4 max Fe, bal Al.
Cast 28,000 TS, 16,000 YS; 12 El, 55 Brin
Aged 36,000 TS; 25,000 YS; 6 El, 75 Brin
For manifolds, aircraft components, transmission housings, tight castings
Self-aging sand casting Natural aging
Similar to Aluminum 40 E.

ALLCAST 470.
M-130, 0.4-1.0 Cu, 0.25-0.50 Mg, 7.0-8.0 Zn, 0.8 max Fe, 0.25 max Ti, bal Al
Sand Cast: 28,000 TS; 15,000 YS, 8 El, 55 Brin.
Aged 34,000 TS, 23,000 YS; 5 El; 75 Brin.
For housings, machinery parts, fittings, hardware, automobile parts Similar to Tenzalloy Ages at room temperature

ALLCAST 700
M-130, 2-3 Cu, 0.7 max Si, 0.9-1.5 Ni, 0.20 max Ti, 6.0-7.5 Sn, bal Al
T5 or T533 Temper 20,000 TS, 16,000 YS; 7 El, 55 Brin
For bearings, bushings. Heat treatable

ALLCAST 700A
M-130; 0.7-1.3 Cu, 5.5-7.0 Sn, 0.7 max Si, 0.2 max Ti, 0.7-1.3 Ni, bal Al.
T5 or T533 Temper: 20,000 TS, 8500 YS, 10 El; 55 Brin.
For bearings. Similar to Aluminum 750 Good imbeddability.

ALLCAST D400
M-130; 1.6-2.0 Si, 3.6-4.5 Mg, 0.5 max Fe, 0.6 max Mn, 0.25 max Ti, bal Al.
Sand Cast 20,000 TS; 13,000 YS; 2 El; 50 Brin.
Permanent Mold: 22,000 TS, 13,000 YS; 2 El; 50 Brin.
For cooking utensils, marine fittings.
Similar to Aluminum B214. Good corrosion resistance. Not heat treatable.

ALLCAST P400.
M-130; 3.6-4.5 Mg, 1.5-2.0 Zn, 0.5 max Si, 0.5 max Fe, 0.6 max Mn, 0.25 max Ti, bal Al.
Permanent Mold: 27,000 TS; 16,000 YS; 7 El; 60 Brin. Die Cast: 40,000 TS; 22,000 YS; 10 El; 65 Brin.
For food and dairy handling equipment, chemical and textile plant equipment, marine hardware.
Similar to Aluminum A214. Not heat treatable, corrosion resistant.

ALLCAST SC8.
M-130; 2.5-4.0 Cu, 5.0-6.5 Si, 0.15 max Mg, bal Al.
Permanent mold cast: 28,000-36,000 TS; 15,000-20,000 YS; 2-3 El; 70-85 Brin.
For permanent mold castings, light alloy parts.

ALLCAST SC8.
M-906, 2.5-3.5 Cu, 4.5-6.0 Si, bal Al.
Cast: 24,000 TS; 12,000 YS, 2 El; 60 Brin.
T6-Temper: 30,000 TS; 18,000 YS; 2.5 El; 75 Brin.
For light alloy castings, sand and permanent mold, hardenable.

ALLCAST Z50
M-130; 3.0-4.0 Cu, 2.5-3.5 Si, 0.1 max Mg, 2.0-3.0 Zn, 1.0 max Fe, 0.2 max Ti, bal Al.
Permanent Mold Cast: 27,000 TS; 16,000 YS; 3 El; 65 Brin.
T6 Temper: 40,000 TS, 26,000 YS; 4 El, 85 Brin.
For casings, housings, fittings, crankcases, axle housings.
Heat treatable, permanent mold, corrosion resistant.

ALLCAST Z51.
M-130, 3.0-4.0 Cu, 5.5-6.5 Si, 0.1 max Mg, 2-3 Zn, 1.0 max Fe, 0.2 max Ti, bal Al.
Cast: 39,000 TS, 22,000 YS, 5.5 El; 90 Brin.
T6: 45,000 TS, 28,000 YS; 4 El, 105 Brin
For permanent mold castings, casings, housings, fittings, oil pans Heat treatable

ALLEGHENY 12
M-1, 0.15 max C, 1.0 max Mn, 11.5-13.5 Cr, bal Fe.
Annealed: 60,000 TS, 30,000 YS, 20 El; 50 RA; 200 Brin.
Hardened: 200,000 TS; 181,000 YS, 2 El; 51 RA, 400 Brin.
For valves, pump shafts, screens; corrosion resistant; Type No 410.

ALLEGHENY 16-16-1.
M-1, C, 16 Cr, 16 Mn, 1 Ni, bal Fe.
For chemical plant equipment, stainless

ALLEGHENY 18-8C.
M-1; 0.08 C, 17-19 Cr, 9-12 Ni, Cb = 12xC, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 40 El, 50 RA; 180 Brin.
For exhaust manifolds, fire walls; stabilized stainless; Type 307

ALLEGHENY 18-8SM.
M-1, 0.12 max C, 16-18 Cr, 14 max Ni, 2-3 Mo, bal Fe.
Annealed 73,000-85,000 TS, 35,000-45,000 YS; 45-60 El; 45-60 RA.
For stainless parts, austenitic.

ALLEGHENY 19-9 DL.
M-1, 0.30 C, 1.0 Mn, 0.5 Si, 19.0 Cr, 9.0 Ni, 1.4 Mo, 1.3 W, 0.4 Cb + Ta, 0.3 Ti, bal Fe.
Heat treated: 148,200 TS; 118,000 YS; 19% El.
Stress-Relieved: 118,500 TS; 69,000 YS; 58% El.
At 1500°F: 32,500 TS; 29,500 YS, 53% El.
Uses: Gas turbine and turbo supercharger component parts as rotors, buckets, fasteners, tail cones.
Stainless. High temperature properties. Heat resistant to 1200°F. Not hardenable.

ALLEGHENY 19-9DX.
M-1; 0.30 C, 1.0 Mn, 0.5 Si, 19.0 Cr, 9.0 Ni, 1.6 Mo, 1.3 W, 0.6 Ti, bal Fe.
Heat Treated: 148,200 TS; 118,000 YS; 19% El.
Stress-Relieved: 118,500 TS; 69,000 YS; 58% El.
At 1500°F: 32,500 TS; 29,500 YS; 53% El.
Uses: Gas turbine and turbo supercharger parts as rotors, buckets, fasteners, tail cones.
Stainless. High temperature properties. Heat resistant to 1200°F. Not hardenable.

ALLEGHENY 19-10M
M-1; 0.16 max C, 18-20 Cr, 14 max Ni, 3-4 Mo, bal Fe.
Cast: 70,000-80,000 TS; 35,000-45,000 YS, 45-60 El; 45-60 RA.
For stainless steel castings, resists sulfuric, nitric and acetic acids.

ALLEGHENY 19-10SM.
M-1; 0.12 max C, 18-20 Cr, 14 max Ni, 3-4 Mo, bal Fe.
Cast: 70,000-80,000 TS, 40,000-60,000 YS; 45-60 El; 45-65 RA.
For stainless parts; stainless steel castings

ALLEGHENY 20-10.
M-1; C, 20 Cr, 10 Ni, bal Fe.
For applications requiring max resistance to corrosion coupled with faculty of fabrication, corrosion resistant, stainless.

ALLEGHENY 20-10S.
M-1; 0.08 max C, 19-21 Cr, 10-12 Ni, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 40 El, 50 RA; 200 Brin.
For chemical equipment; Stainless Type 308

ALLEGHENY 20-25S.
M-1; 0.11 max C, 19-21 Cr, 24-26 Ni, bal Fe
Cast: 60,000-75,000 TS; 40,000-55,000 YS, 40-60 El; 40-60 RA.
For castings, stainless steel castings.

ALLEGHENY 20-25SM.
M-1, 0.11 max C, 19-21 Cr, 24-26 Ni, 2-3 Mo, bal Fe.
Cast 60,000-75,000 TS; 50,000-70,000 YS, 40-60 El, 40-60 RA.
For castings; stainless steel castings.

ALLEGHENY 21.
M-1; C, 18-23 Cr, bal Fe.
For high temperature service.

ALLEGHENY 22.
M-1; 19-22 Cr, 9-12 Ni, 0.08-0.20 C, bal Fe.
Annealed: 80,000 TS; 50 El; 60 RA; 140 Brin.
For chemical engineering equipment, sulfite paper industry, stainless and corrosion resistant.

ALLEGHENY 22 SP.
M-1; 19-22 Cr, 9-12 Ni, 0.11 max C, bal Fe.
Annealed: 75,000 TS; 50 El; 60 RA, 135 Brin.
For chemical engineering equipment; stainless and corrosion resistant.

ALLEGHENY 25-12.
M-1; 0.20 max C, 1.25 max Mn, 22-24 Cr, 12-15 Ni, bal Fe.
Annealed: 75,000 TS, 30,000 YS; 40 El; 50 RA; 200 Brin
For furnace parts, boiler baffles, pump parts; austenitic, resists heat to 2000°F

ALLEGHENY 25-12S
M-1; 0.11 max C, 22-26 Cr, 12-14 Ni, bal Fe.
Cast: 75,000-90,000 TS; 40,000-55,000 YS; 30-50 El; 30-50 RA.
For stainless steel castings; resists sulfuric, nitric and acetic acids.

ALLEGHENY 25-20.
M-1; 24-26 Cr, 19-21 Ni, 0.25 max C, bal Fe.
Annealed: 85,000-75,000 TS; 30,000 YS; 50-40 El; 60-50 RA; 150-180 Brin.
For chemical engineering equipment, furnace parts; stainless and corrosion resistant.

ALLEGHENY 25-20S.
M-1; 0.18 max C, 24-26 Cr, 19-21 Ni, bal Fe.
Cast: 60,000-75,000 TS; 40,000-55,000 YS; 40-60 El; 40-60 RA.
For castings, stainless steel castings.

ALLEGHENY 28.
M-1; 0.35 max C, 23-27 Cr, 0.25 max N, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 20 El; 40 RA; 200 Brin.
For furnace parts, boiler baffles; resists oxidation up to 2150°F.

ALLEGHENY 28-4
M-1; 0.25 max C, 0.15 N, 25-30, Cr, 3-5 Ni, bal Fe
Cast: 70,000-90,000 TS; 35,000-50,000 YS, 10-25 El; 10-25 RA.
For stainless steel castings, resists nitric and acetic acids.

ALLEGHENY 29-9
M-1, 0.20 max C, 27-31 Cr, 8-10 Ni, bal Fe
Cast: 80,000-95,000 TS, 45,000-70,000 YS; 20-30 El; 20-35 RA.
For stainless steel castings, resists nitric and acetic acids

ALLEGHENY 29-9S.
M-1, 0.12 max C, 27-31 Cr, 8-10 Ni, bal Fe
Cast: 75,000-95,000 TS, 36,000-46,000 YS, 20-40 El; 20-45 RA
For castings; stainless steel castings.

ALLEGHENY NO 33
M-1, 0.12 max C, 0.5 max Mn, 0.5 max Si, 12-15 Cr, bal Fe
Annealed: 77,300 TS, 40,600 YS, 37 El, 78.7 RA, 153 Brin
Heat treated: 178,750-109,000 TS, 161,500-91,000 YS, 15-23 El, 51-70 RA; 364-228 Brin
At 1000°C: 70,000 TS, 56.5 El; 92.5 RA;
For automotive parts, interval engine and steam engine parts, tanks, fans, blowers; corrosion resistant.

ALLEGHENY 33 FM
M-1; 12-15 Cr, 0.12 max C, 0.4 max S, bal Fe.
Annealed: 73,000 TS, 35 El, 75 RA, 150 Brin.
For chemical engineering equipment, corrosion resistant, free machining

ALLEGHENY 33 NH NON-HARDENING.
M-1, 11.5-13.5 Cr, 0.5 max Ni, 0.08 max C, 0.1-0.25 Al, bal Fe
Annealed: 70,000 TS; 39,000 YS, 30 El; 68 RA, 143 Brin.
For chemical engineering equipment, corrosion resistant.

ALLEGHENY 33 TURBINE
M-1; 11.5-13 Cr, 0.12 max C, bal Fe
Heat treated: 100,000 TS, 25 El, 70 RA; 200 Brin
For turbine blades, chemical engineering equipment; corrosion resistant; Iz-60 min.

ALLEGHENY 33 W.
M-1; 12-15 Cr, 0.12 max C, 2.5-3.5 W, bal Fe.
Annealed: 87,000 TS; 64,000 YS; 29 El; 64 RA; 170 Brin.
For chemical engineering equipment, high temperature service; corrosion resistant.

ALLEGHENY 34.
M-1; 0.12 max C, 14-16 Cr, bal Fe.
Annealed: 78,000 TS; 42,000 YS; 30 El; 65 RA; 156 Brin.
For corrosion resistant parts; corrosion resistant.

ALLEGHENY NO. 44.
M-1; 0.20 max C, 1.25 max Mn, 0.5 max Si, 22-26 Cr, 11-13 Ni, bal Fe.
Hot rolled: 130,500 TS; 107,300 YS; 31 El; 59.8 RA; 262 Brin.
Annealed: 96,000 TS; 45,000 YS; 62 El; 69 RA, 143 Brin.
For furnace and pump parts, boiler baffles, carburizing boxes, recuperators; high heat resistance; easy to fabricate.

ALLEGHENY NO. 46.
M-1; 0.11-0.25 C, 4-6 Cr, bal Fe.
Annealed: 60,000 TS; 25,000 YS; 30 El; 70 RA; 120 Brin
Water quenched: 177,000 TS; 144,000 YS; 18 El; 60 RA; 300 Brin.
For heat and corrosion resistant parts, furnace, heat exchanger, condenser and preheater tubes and parts, pumps, valves, tie-rods; heat, oxidation and corrosion resistant; resists heat to 1200°F.

ALLEGHENY 46M
M-1; 0.25 max C, 4-6 Cr, 0.4-0.6 Mo, bal Fe.
Annealed: 62,000 TS; 25,000 YS; 25 El, 60 RA; 180 Brin.
For corrosion resistant parts, oil cracking stills; corrosion resistant

63155

ALLEGHENY 46 TUNGSTEN.
M-1, 0.35 max C, 5-7 Cr, W, bal Fe.
For corrosion resistant parts, corrosion resistant.

ALLEGHENY NO. 55.
M-1; 0.35 max C, 1.0 max Mn, 0.6 max Si, 23-30 Cr, 0.6 max Ni, bal Fe.
Annealed forgings 75,000-100,000 TS, 45,000-60,000 YS; 24-35 El; 45-65 RA, 160-200 Brin
Annealed castings 40,000-80,000 TS, 30,000 70,000 YS; 2-5 El; 2-6 RA, 170-190 Brin
For furnace parts, boiler baffles, furnace dampers, recuperators, heat resistant, corrosion resistant to acid mine waters

ALLEGHENY NO. 66
M-1, 0.12 max C, 16-18 Cr, bal Fe.
Annealed 85,000-70,000 TS, 55,000-40,000 YS, 20-35 El; 85-75 RA, 156 Brin
For hardware, steam engine parts, fans, blowers, condensers, evaporators, corrosion resistant to HNO_3

ALLEGHENY 66W
M-1, 15-18 Cr, 0.12 max C, 2.5-3.5 W, bal Fe
Annealed 80,000 TS, 50,000 YS; 26 El; 50 RA; 170 Brin
For chemical engineering equipment, high temperature service; corrosion resistant

ALLEGHENY 67.
M-1; 18-23 Cr, 0.35 max C, bal Fe
Annealed. 82,000 TS, 52,000 YS, 25 El, 55 RA; 163 Brin
For chemical engineering equipment, corrosion resistant

ALLEGHENY 88X
M-1, 0.2-0.3 C, 10-12.5 Mn, 7-8.5 Ni, bal Fe
For large electrical transformers, switchboard parts, non-magnetic, high electric resistivity.

ALLEGHENY 216
M-1; 0.08 max C, 19.75 Cr, 8.25 Mn, 6.0 Ni, 2.5 Mo, 0.37 N, bal Fe.
Annealed: 100,000 TS; 55,000 YS, 45 El; B 92 Rock.
At 1000°F: 75,400 TS; 36,300 YS; 43.3 El, 67.8 RA.
For marine engineering components, space hardware, woven wire cloth, bushings, bolts, shafting, springs, valve seats. Stainless, improved high temperature strength and endurance limit.
Good weldability.

ALLEGHENY 216L.
M-1; 0.03 max C, 19.75 Cr, 8.25 Mn, 6.0 Ni, 2.5 Mo, 0.37 N, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 45 El; B 92 Rock.
For marine engineering components, space hardware, woven wire cloth, bushings, bolts, shafting, springs.
Good weldability, high fatigue strength. Stainless and corrosion resistant.

ALLEGHENY 303 EZ.
M-1; 0.08 C, 18 Cr, 9 Ni, 0.30 S, bal Fe
Annealed: 80,000 TS, 35,000 YS; 45 El; 175 Brin.
Cold Drawn: 135,000-208,000 TS; 100,000-185,000 YS.
For screw machine products, fasteners, shafts.
Free machining, stainless, austenitic.
Machinability rating of 70%.

ALLEGHENY 416 EZ.
M-1, 0.15 max C, 1.25 max Mn, 0.06 max P, 0.15 min S, 1.0 max Si, 12.0-14.0 Cr, bal Fe.
Annealed: 73,000 TS; 42,000 YS; 35 El, 170 Brin.
Hardened: 135,000 TS; 108,000 YS; 20 El; 285 Brin.
For screw machine products, hardware, fasteners, shafts.
Free machining, hardenable, corrosion resistant.

ALLEGHENY 433.
M-1; 0.05 C, 16.7 Cr, 1 Mo, 0.95 Cu, 0.5 Mn, 0.3 Si, bal Fe.
Annealed. 80,000 TS, 55,000 YS; 28 El.
For kitchen utensils, automobile trim, hub caps, cowls; good formability and weldability, corrosion resistant.

ALLEGHENY 4750
M-1, 47 Ni, bal Fe.
For transformers; high permeability.

ALLEGHENY A-286.
M-1, M-1214, 0.08 max C, 1-2 Mn, 13.5-16.0 Cr, 24-28 Ni, 1.3 Mo, 2.0 Ti, 0.3 V, 0.2 Al, bal Fe.
Rolled 135,000-160,000 TS; 85,000-115,000 YS, 30-20 El; 55-30 RA.
For jet engine and supercharger parts, after-burners; age-hardenable, austenitic, heat resistant.

ALLEGHENY AF-71
M-1; 0.25 C, 18 Mn, 12.5 Cr, 3 Mo, 0.2 B, 0.2 N, bal Fe
Heat treated 159,000 TS, 90,000 YS, 42 El, 37 RA.
For aircraft gas turbines, missiles, airframes; austenitic, age-hardenable.

ALLEGHENY AF-183
M-1; 0.30 C, 18.0 Mn, 12.5 Cr, 3.0 Mo. 0.2 N, 0.8 V, bal Fe
Bar. 137,000 TS. 82,000 YS, 33 El, 23 RA.
At 1500°F: 34,000 TS, 29,000 YS; 34 El, 58 RA.
For high temperature structural parts, gas turbine components, afterburners, nozzles, jet engines.
Good heat resistance. Good strength to 1500°F. Austenitic

ALLEGHENY ALMAR 362
M-1, 0.03 C, 0.10 Mn, 0.08 Si, 15 Cr, 6 Ni, 0.75 Ti, bal Fe.
Annealed: 125,000 TS; 108,000 YS; 16 El; 68 RA; C 25 Rock.
Heat Treated. 188,000 TS; 182,000 YS; 13 El; 54 RA, C 41 Rock.

For jet engine and space craft components, shafts, gears.
Martensitic, age hardening. Corrosion resistant.

ALLEGHENY ALX.
M-1; Cr, bal Co.
For cutting tools; cast to shape.

ALLEGHENY AM 357.
M-1; 0.21-0.26 C, 0.50-1.25 Mn, 13.5-14 5 Cr, 4.0-5.0 Ni, 2.5-3.25 Mo, 0.07-0.13 N, bal Fe.
Sheet: 309,000 TS; 303,000 YS, 4 El
At 1000°F: 158,000 TS; 141,000 YS; 5.5 El.
For valves, pressure tanks, aircraft and jet engine components, missiles.
Semi-austenitic, precipitation hardenable stainless steel.

ALLEGHENY AM-363.
M-1, 0 05 max C, 0.30 max Mn, 0 15 max Si, 11.0-12.0 Cr, 4.0-5.0 Ni, 0.3-0.6 Ti, bal Fe.
Hot Rolled· 138,000 TS; 131,000 YS; 11 El.
Annealed: 124,000 TS; 105,000 YS, 8 El
Aged: 124,000 TS; 118,000 YS; 11.5 El.
For automobile mufflers, jet engine and gas turbine components.
Precipitation-hardenable.
Ferromagnetic, stainless, maraging.

ALLEGHENY AM-367.
M-1; 0 02 C, 14 25 Cr, 3.4 Ni, 15 4 Co, 2.0 Mo, 0.35 Ti, 0.03 Al, bal Fe.
Sheet, cold rolled 50%, annealed and maraged.
At 80°F· 245,700 TS; 242,300 YS; 3 El.
At 100°F· 261,900 TS, 261,000 YS, 3 El.
For aircraft and missile industries, missile and gas turbine components.
Maraging steel, stainless, martensitic

ALLEGHENY ARMATURE.
M-1, 0.5 Si, bal Fe.
For motors, good permeability

ALLEGHENY AUDI TRASFORMER "A."
M-1; 3 5 Si, bal Fe
For audio transformers; high permeabilitv.

ALLEGHENY AUDIO TRANSFORMER "B"
M-1, 3 5 Si, bal Fe
For audio transformers, high permeability.

ALLEGHENY AUDIO TRASFORMER "C"
M-1, 3 5 Si, bal Fe
For audio transformers, high permeability

ALLEGHENY D979
M-1, 0.05 C, 15 Cr, 15 Ni, 4 Mo, 4 W, 1 Al, 3 Ti, 30 Fe, bal Ni.
Rolled· 200,000 TS; 142,000 YS; 17 El, 34 RA.
For aircraft and auto engine components; heat resistant to 1600°F

ALLEGHENY DYNAMO.
M-1; 2.5 Si, bal Fe.
For electric machinery; high permeability.

ALLEGHENY DYNAMO SPECIAL.
M-1; 3 25 Si, bal Fe
For transformers.

ALLEGHENY ELECTRIC METAL
M-1, 47 Ni, bal Fe.
For transformers; high permeability

ALLEGHENY ELECTRICAL SHEET STEEL.
M-1; 1 0 Si, bal Fe.
For motors.

ALLEGHENY G-192.
M-1; 0.60 C, 22.0 Cr, 8.5 Mn, 0.35 N, 0.50 Si, bal Fe.
At R.T.: 148,000 TS; 85,000 YS; 55 El.
At 1200°F: 92,000 TS, 37,000 YS; 15 El.
For high temperature applications, heat treating equipment.
Heat and corrosion resistant.

ALLEGHENY HTB-2.
M-1; 0.80 C, 4 Cr, 4 25 Mo, 1 V, bal Fe.
At 70°F: 412,000 TS; 338,500 YS; 1.6 El; 1.7 RA; 640 Brin.
At 1000°F: 309,000 TS; 250,000 YS; 6.1 El; 11.7 RA.
For punches, hot shears, upsetters; hot work steel, oil hardened

ALLEGHENY HTB-3.
M-1; 0.57 C, 1 15 Si, 4 75 Cr, 5.25 Mo, 0 55 V, bal Fe.
At 70°F 425,000 TS, 365,000 YS, 2.2 El; 3.0 RA; 650 Brin.
At 1000°F 342,500 TS; 313,500 YS; 7.2 El, 7 0 RA.
For punches, hot shears, upsetters; hot work dies, oil hardened.

ALLEGHENY LUDLUM 21-12N.
M-1; 0 2 C, 21 Cr, 12 Ni, 0 2 N, bal Fe.
Water quenched: 226 Brinell, at 1400°F 145 Brinell.
For valves and valve seats, valve heads for high temperature applications
Heat and corrosion resistant

ALLEGHENY-LUDLUM 88
M-1; 6 5-14 0 Ni, 5 0-12 0 Mn, bal Fe
For electrical apparatus, non-magnetic

ALLEGHENY LUDLUM 129
M-1; 0 70 C, 0.3 Mn, 1 0 Si, 12 Cr, 5 25 Mo, bal Fe
Ht Tr 322,000 TS, 265,000 YS, 4 El, C 58 Rock
For tools and bearings for high temperature applications
Stainless, wear resistant, hardenable
High oxidation resistant

ALLEGHENY LUDLUM 418.
M-1, 0 20 C, 1 Mn, 0 5 Si, 12.5 Cr, 3 W, bal Fe
For high temperature applications, heat resistant

ALLEGHENY LUDLUM 419.
M-1; 0 25 C, 1 Mn, 0 3 Si, 11 5 Cr, 0.5 Ni, 0 5 Mo, 2 5 W, 0 4 V, bal Fe
Heat treated. 204,000-272,000 TS, 134,000 206,000 YS, 5-33.5 El, 16-40 RA, 480-510 Brin
For high temperature applications, heat resistant, heat treatable

ALLEGHENY LUDLUM 901
M-1, 0 05 C, 1 5 Mn, 0 4 Si, 13.0 Cr, 43 0 Ni, 6 0 Mo, 2.8 Ti, 0 2 Al, 0 015 B, bal Fe
Bar 176,000 TS, 128,000 YS, 15 El.
At 1200°F 145,000 TS, 115,000 YS, 21 El
For high temperature applications, gas turbine and jet engine components
High strength, good creep and stress-rupture properties. Heat resistant.

ALLEGHENY LUDLUM 1251
M-1; 0.05 C, 1 5 Mn, 13 Cr, 6 Mo, 2.5 Ti, 0 2 Al, 0 01 B, 35 Fe, 43 Ni
At 70°F 165,000 TS, 110,000 YS, 14 El.
At 1200°F 135,000 TS, 100,000 YS, 20 El.
For high temperature applications; heat and oxidation resistant.

ALLEGHENY LUDLUM-LMW.
M-1, 0 8 C, 3.25-4.25 Cr, 1.25-2.0 W, 0.75-1.5 V, 7.5-9.5 Mo, bal Fe.
For reamers, drills, lathe tools, broaches, hobs, form tools.
Type M1 high speed steel. Good red-hardness.

ALLEGHENY LUDLUM-LXX.
M-1; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
Ht. Tr.: 512-715 Brin, 454,000 bend strength, 60 torsion impact.
For tools, dies, cutters, reamers, twist drills, broaches.
Type T 1 high-speed steel, high red-hardness.

ALLEGHENY-LUDLUM ML.
M-1; 0.8 C, 18 W, 4 Cr, 2 V, 0.75 Mo, bal Fe.
Hardened. C 64-66 Rock
For lathe tools, reamers, hobs, broaches, milling cutters.
Type T2 High speed tool steel.

ALLEGHENY LUDLUM-VLM.
M-1; 0.85 C, 8 Mo, 4 Cr, 2 V, bal Fe
Hardened: C 63-66 Rock.
For tools, cutters, reamers, twist drills, milling cutters.
Type M-10 high-speed steel.

ALLEGHENY M-17.
M-1; 0.65 C, 0.25 Mn, 0.40 Si, 17 Cr, bal Fe.
Annealed: 95,000 TS; 55,000 YS; 20 El; 40 RA; 240 Brin.
Hardened: 275,000 TS, 240,000 YS; 2 El; 550 Brin.
For cutlery, stainless.

ALLEGHENY M-252.
M-1; 0.15 C, 19.0 Cr, 55.0 Ni, 10.0 Co, 10.0 Mo, 2.5 Ti, 1.0 Al, 0.005 B, 2.0 Fe
Heat Treated: 178,000 TS, 128,000 YS; 21 El.
At 1500°F: 92,000 TS; 83,000 YS; 19 El.
For high temperature service
For jet engine turbine blades, fasteners, missile and space vehicle components.
Precipitation hardening Oxidation resistant.

ALLEGHENY METAL.
M-1; 0.20 C, 0.50 max Mn, 17-20 Cr, 7-10 Ni, bal Fe
Unannealed. 120,000 TS; 86,000 YS; 36 El; 52 RA; 253 Brin.
Annealed: 90,000 TS; 45,000 YS; 61 El; 75 RA; 135 Brin
At 500°C: 72,730 TS; 20,880 YS, 47 El; 69.5 RA.
At 900°C: 24,560 TS, 13,580 YS, 36 El; 57 RA.
For hardware, fittings, bumpers, automobile radiator shells, dairy and hospital equipment; corrosion resistant, austenitic

ALLEGHENY METAL 12 CAST.
M-1, 0.17 max C, 1.5 max Mn, 11.5-13.5 Cr, 0.75-1.25 Ni, bal Fe
For glass molds, paper and pulp industry equipment; corrosion resistant.

ALLEGHENY METAL L-12.
M-1, 0.15 min C, 12-14 Cr, 0.5 max Ni, bal Fe.
Annealed: 90,000 TS; 50,000 YS; 15 El, 40 RA; 240 Brin
For cutlery, Stainless Type 420; hardenable.

ALLEGHENY METAL 12-2.
M-1; 0.15 max C, 11.5-13.5 Cr, 1.2-2.5 Ni, 1 max Mn, 1 max Si, bal Fe.
Annealed: 100,000 TS; 65,000 YS; 25 El; 50 RA; 250 Brin.
Heat treated: 220,000 TS, 175,000 YS; 2 El; 440 Brin.
For valve parts, tie rods, pumps; AISI Type 414; corrosion resistant.

ALLEGHENY METAL 12 EZ.
M-1; 0.15 max C, 12-14 Cr, 0.07 min S, P, Se, 0.6 max Zr, Mo, bal Fe.
Annealed: 85,000 TS; 50,000 YS; 15 El; 40 RA; 180 Brin.
Hardened: 145,000 TS; 120,000 YS; 15 El; 65 RA; 280 Brin.
For screw machine products; corrosion resistant; Type 416.

ALLEGHENY METAL 12-NH.
M-1; 0.8 max C, 1.0 max Mn, 11.5-13.5 Cr, 0.10-0.30 Al, bal Fe.
Annealed: 60,000 TS; 32,000 YS; 20 El; 50 RA; 180 Brin.
For annealing boxes, quenching racks; corrosion resistant; Type 405.

ALLEGHENY METAL 12 PLURAMELT.
M-1; 0.15 max C, 1 max Mn, 11.5-13.5 Cr, bal Fe.
For petroleum refining equipment; corrosion resistant.

ALLEGHENY METAL 12-TB.
M-1, 0.15 max C, 1.0 Mn, 11.5-13 Cr, bal Fe.
Annealed: 60,000 TS; 200 Brin.
For turbine blades, buckets; corrosion resistant; Type 403.

ALLEGHENY METAL 12-W.
M-1; 0.15 max C, 2.5-3.5 W, 12-14 Cr, bal Fe.
Annealed: 75,000 TS, 40,000 YS; 20 El; 50 RA; 212 Brin.
Hardened: 200,000 TS; 180,000 YS; 10 El; 400 Brin
For oil refinery and chemical equipment; corrosion resistant, Type 418

ALLEGHENY METAL 15-35.
M-1; 14-16 Cr, 33-36 Ni, 0.25 max C, bal Fe.
Casting: 50,000-75,000 TS; 40,000-56,000 YS; 40-60 El; 40-60 RA.
For castings, stainless.

ALLEGHENY METAL 16-1.
M-1; 0.2 max C, 15-17 Cr, 1.2-2.5 Ni, 1 max Mn, 1 max Si, bal Fe.
Annealed: 105,000 TS, 90,000 YS; 20 El; 60 RA; 270 Brin
Heat treated: 220,000 TS, 185,000 YS; 10 El; 240 Brin.
For tie rods, pumps, valve parts; corrosion resistant.

ALLEGHENY METAL 17.
M-1; 0.12 max C, 1.0 max Mn, 1-18 Cr, bal Fe.
Annealed: 60,000 TS; 35,000 YS; 20 El; 40 RA; 200 Brin
Hardened: 150,000 TS; 110,000 YS; 3 El; 300 Brin.
For automotive trim, cold headed parts; corrosion and heat resistant; Type 340

ALLEGHENY METAL 17-7.
M-1; 0.08-0.2 C, 16-18 Cr, 6-8 Ni, 2 max Mn, 1 max Si, bal Fe
Annealed: 100,000 TS; 35,000 YS; 50 El; 60 RA; 180 Brin.
For household utensils, trim; stainless.

ALLEGHENY METAL 17EZ.
M-1, 0.12 max C, 14-18 Cr, 0.5 max Ni, 1.25 max Mn, P, S or Se, 0.07 min or 0.6 max Mo, bal Fe.
Annealed: 60,000 TS; 35,000 YS; 15 El; 40 RA.
Heat treated: 150,000 TS; 110,000 YS; 3 El; 300 Brin.
For screw machine products, cold headed parts; AISI Type 430F; free cutting.

ALLEGHENY METAL 17 PLURAMELT.
M-1; 0.12 max C, 1.0 max Mn, 14-18 Cr, bal Fe.
For tanks and parts in nitric acid industries; corrosion resistant.

ALLEGHENY METAL 18-8.
M-1; 0.08-0.20 C, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 50 El; 60 RA; 180 Brin.
For deep drawn parts; Stainless Type 302.

ALLEGHENY METAL 18-8 CAST.
M-1; 0.09-0.16 C, 18-20 Cr, 8-10 Ni, 1.5 max Mn, bal Fe.
Annealed: 73,500 TS; 154 Brin.
For pump and valve parts, chemical plant equipment; stainless, austenitic; Type 302.

ALLEGHENY METAL 18-8C CAST.
M-1; 0.10 max C, 1.5 max Mn, 17.5-20.0 Cr, 9-12 Ni, Cb = 8 × C, bal Fe.
Annealed: 73,500 TS; 145 Brin.
For pump and valve liners, chemical plant equipment; stainless welded structures; Type 347

ALLEGHENY METAL 18-8 C PLURAMET.
M-1; 0.08 max C, 17-19 Cr, 9-12 Ni, 2 max Mn, Cb = 10 × C, bal Fe.
For chemical industry equipment; austenitic, stainless.

ALLEGHENY METAL 18-8EZ.
M-1; O.15 max C, 17-19 Cr, 10-12 Ni, 0.07 min P, S, or Se, 0.6 max Zr or Mo, bal Fe.
Annealed: 80,000 TS; 3,000 YS; 40 El; 50 RA; 160 Brin.
For screw machine parts, bolts, screws, nuts, Stainless Type 303.

ALLEGHENY METAL 18-8FS
M-1; 0.12 max C, 17-19 Cr, 10-13 Ni, 2 max Mn, 1 max Si, bal Fe.
Annealed: 75,000 TS, 25,000 YS; 50 El, 60 RA; 180 Brin
For stainless structures; stainless

ALLEGHENY METAL 18-8M.
M-1; 0.10 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed: 75,000 TS, 30,000 YS; 40 El; 50 RA, 200 Brin.
For chemical equipment. Stainless Type 316

ALLEGHENY METAL 18-8MC.
M-1, 0.08 max C, 17-19 Cr, 10-14 Ni, 1.75-2.5 Mo, 0.5-0.7 Cb, bal Fe.
Annealed: 75,000 TS; 30,000 YS; 40 El, 50 RA; 200 Brin
For chemical equipment; resists pitting and intergranular attack.

ALLEGHENY METAL 18-8M CAST
M-1, 0.12 max C, 17.5-19.5 Cr, 8-12 Ni, 2-3 Mo, bal Fe.
Annealed: 83,000 TS; 161 Brin
For chemical plant equipment, mixers, agitators; acid resistant; Type 316, austenitic.

ALLEGHENY METAL 18-8M SPECIAL
M-1, 0.10 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, 2 max Mn, 1 max Si, bal Fe.
Annealed. 75,000 TS, 30,000 YS, 40 El; 50 RA, 200 Brin.
For pharmaceuticals production; stainless.

ALLEGHENY METAL 18-8 PLURAMELT
M-1; 0.08-0.20 C, 17-19 Cr, 8-10 Ni, 2 max Mn, bal Fe.
For cooking utensils; austenitic, stainless.

ALLEGHENY METAL 18-8S.
M-1; 0.08 max C, 18-20 Cr, 8-10 Ni, bal Fe
Casting: 70,000-85,000 TS, 35,000-46,000 YS, 50-75 El; 45-65 RA; 180 Brin.
For castings, stainless parts, stainless, resists acids

ALLEGHENY METAL 18-8S CAST.
M-1, 0.08 max C, 18-21 Cr, 8-10 Ni, 1.5 max Mn, bal Fe.
Annealed. 79,000 TS, 130 Brin.
For pump and valve parts, chemical plant equipment, stainless, austenitic; Type 304.

ALLEGHENY METAL 18-8 S PLURAMELT.
M-1; 0.08 max C, 18-20 Cr, 8-11 Ni, 2 max Mn, bal Fe.
For pans, trays, tanks, for chemical industry; austenitic, stainless.

ALLEGHENY METAL 18-8T.
M-1; 0.08 max C, 17-19 Cr, 8-11 Ni, Ti = 5 × C, 2 max Mn, bal Fe.
Annealed: 75,000 TS; 30,000 YS; 40 El; 50 RA; 200 Brin.
For exhaust manifolds, fire walls, pressure vessels; stainless.

ALLEGHENY METAL 18-11C.
M-1; 0.08 C, 17-18.5 Cr, 10 min Ni, Cb = 8 × C, bal Fe
Cast: 75,000-90,000 TS; 35-50 El; 40-50 RA.
For castings, stainless parts, stainless steel castings.

ALLEGHENY METAL 25-2
M-1, 0.3 max C, 25-30 Cr, 2-5 Ni, 2 max Mn, 0.05-0.15 N_2, bal Fe
For furnace parts, chemical industry; corrosion resistant.

ALLEGHENY METAL 25-2 CAST.
M-1; 0.30 max C, 2 max Mn, 0.05-0.15 N_2, 25-30 Cr, 2-5 Ni, bal Fe
For furnace parts, chemical plant and pulp equipment; corrosion resistant

ALLEGHENY METAL 25-12C.
M-1, 0.2 max C, 22-24 Cr, 12-15 Ni, 2 max Mn, Cb = 10 × C, bal Fe
Annealed. 75,000 TS, 30,000 YS, 40 El, 50 RA; 200 Brin
For stainless parts, resists intergranular corrosion

ALLEGHENY METAL 25-12 CAST.
M-1, 0.2-0.3 C, 2 max Mn, 23-25 Cr, 12-14 Ni, bal Fe
Annealed 80,000 TS, 163 Brin
For furnace parts, chemical plant equipment, corrosion and heat resistant, austenitic.

ALLEGHENY METAL 25-20 C
M-1, 0.15 max C, 23-26 Cr, 17-21 Ni, 1.5 max Mn, bal Fe
Cast. 80,000 TS, 163 Brin
For castings, chemical industry, corrosion resistant

ALLEGHENY METAL 25-20C CAST
M-1, 0.15 max C, 1.5 max Mn, 23-26 Cr, 17-21 Ni, bal Fe
Annealed 80,000 TS, 163 Brin
For furnace parts, chemical plant equipment; corrosion and heat resistant, austenitic

ALLEGHENY METAL 25-20 H
M-1, 0.25 max C, 23-26 Cr, 17-21 Ni, 1.5 max Mn, bal Fe
Cast: 80,000 TS, 163 Brin
For castings, chemical industry, furnace parts, corrosion resistant

ALLEGHENY METAL 25-20H CAST.
M-1; 0.25 max C, 1.5 max Mn, 23-26 Cr, 17-21 Ni, bal Fe
Annealed 80,000 TS, 163 Brin.
For furnace parts, chemical plant equipment; corrosion and heat resistant, austenitic

ALLEGHENY METAL 25-20 + Si.
M-1; 0.25 max C, 23-26 Cr, 19-22 Ni, 1.5-3 Si, 2 max Mn, bal Fe
Annealed: 75,000 TS, 30,000 YS, 40 El, 50 RA, 180 Brin.
For stainless and heat resistant parts; stainless, heat resistant.

ALLEGHENY METAL 28 PLURAMELT.
M-1; 0.35 max C, 1.5 max Mn, 0.25 max N_2, 23-27 Cr, bal Fe.
For furnace linings and parts; corrosion and heat resistant.

ALLEGHENY METAL 42.
M-1; 42 Ni, bal Fe.
Cold drawn: 70,000 TS; 50,000 YS; 28 El; 116 Brin.
For glass-to-metal seals; controlled expansion.

ALLEGHENY METAL 46SM.
M-1; 0.1 max C, 4-6 Cr, 0.5 max Ni, 1 max Mn, 0.4-0.6 Mo, bal Fe.
Annealed: 60,000 TS; 25,000 YS; 25 El; 60 RA; 180 Brin.
Heat treated: 150,000 TS; 110,000 YS; 15 El.
For oil refinery and chemical equipment; AISI Type 502 + Mo, corrosion resistant.

ALLEGHENY METAL 350
M-1; 0.10 max C, 16.5-17.5 Cr, 4.0-4.5 Ni, 2.5-3.0 Mo, bal Fe.
Heat treated: 161,000-200,000 TS; 45,000-142,000 YS; 22-8 El, 200-390 Brin.
For valves, springs, knife blades; for applications up to 1000°F

ALLEGHENY METAL 355
M-1, 0.13 C, 15.5 Cr, 4.35 Ni, 2.75 Mo, 1 N, bal Fe
SCT heat treatment: 190,000 TS, 165,000 YS, 10 El, 20 RA
For jet engine and missile components; high heat resistance.

ALLEGHENY METAL "A"
M-1, 17-19 Cr, 7-9 Ni, 0.11 max C, bal Fe
Annealed: 75,000 TS, 50 El, 60 RA; 130 Brin
For chemical engineering equipment; stainless, austenitic

ALLEGHENY METAL "A-Mo"
M-1, 17-19 Cr, 7-9 Ni, 2-4 Mo, 0.11 max C, bal Fe.
Annealed: 85,000 TS, 50 El; 60 RA, 145 Brin.
For chemical engineering equipment, stainless

ALLEGHENY METAL "A-Ti."
M-1, 17-19 Cr, 7-9 Ni, 0.2 max C, 1.0 Ti, bal Fe.
Annealed: 75,000 TS, 50 El, 60 RA, 130 Brin
For chemical engineering equipment, high temperature service, stainless, austenitic, range 800-1500°F

ALLEGHENY METAL "B."
M-1, 18-20 Cr, 8-10 Ni, 0.08-0.20 C, bal Fe.
Annealed: 80,000 TS, 50 El, 60 RA, 135 Brin
For chemical engineering equipment, stainless, austenitic

ALLEGHENY METAL B (SP)
M-1, 0.11 max C, 18-20 Cr, 8-10 Ni, bal Fe
Annealed. 75,000 TS, 50 El, 60 RA; 130 Brin.
For general engineering purposes, welding grade.

ALLEGHENY METAL "B-Ti"
M-1; 18-20 Cr, 8-10 Ni, 0.2 max C, 1.0 Ti, bal Fe
Annealed: 75,000 TS; 50 El, 60 RA; 130 Brin
For chemical engineering equipment, high temperature service, stainless, austenitic.

ALLEGHENY METAL "C"
M-1, 17-19 Cr, 7-9 Ni, 0.08-0.20 C, bal Fe
Annealed: 80,000 TS; 50 El; 60 RA; 135 Brin.
For chemical engineering equipment; stainless.

ALLEGHENY METALCLAD STEEL.
M-1, 20% of 18-8 stainless steel rolled out 80% of plain C steel.
For sheet or plate to resist corrosion; stainless.

ALLEGHENY METAL FM FREE MACHINING.
M-1; 17-19 Cr, 7-9 Ni, 0.08-0.20 C, 0.30 S, bal Fe.
Annealed: 75,000 TS; 25,000 YS; 50 El; 60 RA; 130 Brin.
For chemical engineering equipment; corrosion resistant; free machining.

ALLEGHENY METAL H-17.
M-1; 0.95-1.2 C, 16-18 Cr, bal Fe.
Annealed: 100,000 TS; 60,000 YS; 8 El, 35 RA; 240 Brin.
For nozzles, valves, valve seats; stainless; Type 440; hardenable.

ALLEGHENY METAL S-590.
M-1, 0.38-0.47 C, 1.0-2.0 Mn, 19-21 Cr, 19-21 Ni, 19-21 Co, 3.5-4.5 Mo, 3.5-4.5 W, 3.5-4.5 Cb, bal Fe.
Rolled: 152,000 TS; 80,000 YS, 19 El; 25 RA, 260 Brin
Aged: 140,000 TS, 42,000 YS; 20 El; 19 RA, 300 Brin
For turbine blades and wheels, super-charger and jet engine components.
Heat resistance to 1100-1400°F. Corrosion resistant

ALLEGHENY METAL S-816.
M-1, 0.4 C, 1.2 Mn, 20.0 Cr, 20.0 Ni, 43.0 Co, 4.0 W, 3.0 Fe, 4.0 Cb
Heat Treated: 140,000 TS; 67,000 YS; 31 El; 31 RA; 269 352 Brin.
For turbine blades, rotors, high temperature hardware, jet propulsion engine parts
High heat and corrosion resistant
For high temperature service to 1520°F.

ALLEGHENY METAL (TYPE 345).
M-1, 0.15 max C, 17-19 Cr, 8-12 Ni, (Cb 6 to 10 times the C), bal Fe
Annealed: 75,000 TS, 50 El; 60 RA, 130 Brin.
For corrosion resistant parts; immune to intergranular corrosion.

ALLEGHENY METAL (TYPE 346).
M-1, 0.15 max C, 19-20 Cr, 8-12 Ni, (Cb 6 to 10 times the C), bal Fe.
Annealed: 75,000 TS, 50 El, 60 RA, 130 Brin.
For corrosion resistant parts, immune to intergranular corrosion

ALLEGHENY METAL (TYPE 347)
M-1; 0.15 max C, 17-19 Cr, 8-12 Ni, (Cb over 10 times the C), bal Fe
Annealed: 75,000 TS, 50 El, 60 RA, 130 Brin.
For corrosion resistant parts, immune to intergranular corrosion

ALLEGHENY METAL TYPE 348)
M-1, 0.15 max C, 19-20 Cr, 8-12 Ni, (Cb over 10 times the C), bal Fe.
Annealed: 75,000 TS, 50 El, 60 RA, 130 Brin.
For corrosion resistant parts; immune to intergranular corrosion.

ALLEGHENY MF-1.
M-1, 0.045 max C, 11 Cr, 0.5 Ti, bal Fe.
Sheet: 65,000 TS, 35,000 YS, 30 El; B 80 Rock.
For automobile mufflers, cargo containers, drainage culverts, transformer cases.
Corrosion resistant. Good weldability.

ALLEGHENY MOLY IRON.
M-1; 0.02 C, 3 Mo, bal Fe
Annealed: 50,000 TS; 25,000 YS; 38 El; 62 RA; 107 Brin.
Rolled: 60,000 TS; 45,000 YS; 29 El; 55 RA; 185 Brin.
For D. C. relays, core material; low hysteresis loss.

ALLEGHENY N-155.
M-1; 0.15 C, 1.5 Mn, 21.0 Cr, 20.0 Ni, 20.0 Co, 3.0 Mo, 2.5 W, 1.0 Cb, 30.0 Fe.
At 70°F: 119,000 TS; 58,000 YS; 40 El; 48 RA.
At 1200°F: 80,000 TS; 43,000 YS; 32 El; 43 RA.
For high temperature service. Tail pipe and afterburner assemblies, combustion chambers, fasteners, turbine wheels and blades.
Austenitic, for service up to 1500°F.

ALLEGHENY R41.
M-1; 0.10 C, 19.0 Cr, 53.0 Ni, 11.0 Co, 10.0 Mo, 3.2 Ti, 1.6 Al, 0.005 B, 2.0 Fe.
Heat Treated: 206,000 TS; 154,000 YS; 14 El.
At 1600°F: 90,000 TS; 80,000 YS; 19 El.
For afterburners, turbine casings, combustion liners, high speed airframe components.
Precipitation hardening. Heat resistant.

ALLEGHENY RADIO TRANSFORMER.
M-1; 3.8 Si, bal Fe.
For electrical equipment, chokes, transformers; low induction.

ALLEGHENY S-816 + B.
M-1; 0.32-0.42 C, B, 19-21 Cr, 19-21 Ni, 3.5-5.0 W, 3.5-4.5 Mo, 3.0-4.5 Cb + Ta, 0.6-1.8 Mn, 5.0 max Fe, bal Co.
Heat treated: 140,000 TS; 67,000 YS; 31 El; 31 RA; 269-352 Brin.
For high temperature applications; age-hardenable, heat and corrosion resistant.

ALLEGHENY SUPER DYNAMO.
M-1; 2.5 Si, bal Fe.
For electrical equipment, transformers; low energy losses.

ALLEGHENY TRANSFORMER A.
M-1; 4-5 Si, bal Fe.
For electrical equipment, transformers; low energy losses.

ALLEGHENY TRANSFORMER AA.
M-1; 4-5 Si, bal Fe.
For power transformers; lowest energy losses.

ALLEGHENY TRANSFORMER B.
M-1; 4-5 Si, bal Fe.
For electrical equipment, transformers; low energy losses.

ALLEGHENY TRANSFORMER C.
M-1; 4-5 Si, bal Fe.
For electrical equipment; low energy losses.

ALLEGHENY TRC.
M-1; 0.10 max C, 15 Cr, 16 Mn, 1 max Ni, 0.15 N_2, bal Fe.
Annealed: 80,000-120,000 TS; 40,000 min YS; 50 min El; Rockwell B95.
For railroad cars and trailer truck bodies; stainless, austenitic, good formability.

ALLEGHENY Type 201.
M-1; 0.15 max C, 5.5-7.5 Mn, 16-18 Cr, 3.5-5.5 Ni, 0.25 max N_2, bal Fe.
Annealed: 115,000 TS; 50,000 YS; 50 El; B 91 Rock.
½ Hard: 159,000 TS; 125,000 YS; 20 El; C 36 Rock.
Hard: 191,600 TS; 148,500 YS; 9 El; C 44 Rock.
For railway cars, trailers, siding and roofing, auto wheel covers, kitchen utensils, tubular furniture.
Austenitic, stainless, non-magnetic.

ALLEGHENY Type 203 EZ.
M-1; 0.06 C, 17 Cr, 6 Ni, 6 Mn, 2 Cu, 0.30 S, bal Fe.
Bar Annealed: 84,000 TS; 40,000 YS; 58 El, 183 Brin.
Bar Cold Drawn: 135,000-208,000 TS.
For screw machine products, fasteners, hardware, shafts.
Austenitic, stainless, free-cutting.
Machinability rating 85%.

ALLEGHENY TYPE 418 SPECIAL.
M-1; 0.15-0.20 C, 12-14 Cr, 1.8-2.2 Ni, 0.5 max Mo, 2.5-3.5 W, bal Fe.
At 70°F: 140,000 TS; 118,000 YS; 20 El; 58 RA.
At 1200°F: 53,000 TS, 30 El; 87 RA.
For jet engine and high presure steam valves; corrosion and heat resistant.

ALLEGHENY V-36.
M-1; 0.25 C, 25 Cr, 20 Ni, 2 W, 4 Mo, 44 Co, 2 Cb, bal Fe.
For high temperature applications; oxidation and corrosion resistant.

ALLEN "B" METAL.
M-210; 0.22-0.27 C, 0.20-0.35 Si, 0.60-0.80 Mn, bal Fe.
For machinery parts, gears; castings

ALLEN CAST IRON SODER
M-242.
For soldering cast iron.

ALLEN C. Cu.
M-210, 0.30-0.35 C, 0.20-0.35 Si, 0.60-0.80 Mn, 0.80-1.1 Cu, bal Fe
For machinery parts, castings.

ALLEN Cr. Mo. 329.
M-210, 0.20-0.35 C, 0.20-0.35 Si, 0.40-0.60 Mn, 3.0-3.25 Cr, 0.45-0.55 Mo, bal Fe
For oil refinery equipment; castings

ALLEN Cr Mo./F Mo.
M-210, 0.50-0.55 C, 0.20-0.35 Si, 0.50-0.80 Mn, 0.7-0.9 Cr, 0.25-0.35 Mo, bal Fe.
For gears, shafts, axles, bolts, crankshafts; castings

ALLEN Cr. Mo "P."
M-210, 0.43-0.48 C, 0.20-0.35 Si, 0.50-0.80 Mn, 0.7-0.9 Cr, 0.25-0.35 Mo, bal Fe.
For gears, shafts, crankshafts, bolts, housings, castings.

ALLEN "C" STEEL
M-210; 0.30-0.35 C, 0.20-0.35 Si, 0.60-0.80 Mn, bal Fe.
For gears, pinions, machinery parts; castings.

ALLEN "D" STEEL
M-210; 0.40-0.50 C, 0.20-0.35 Si, 0.70-1.0 Mn, bal Fe
For gears, machinery parts, housings; castings.

ALLEN HI LUSTER.
M-242
For solder for stainless steel; bright finish.

ALLENITE A.S
M-210, WC.
For cutting tools; sintered carbide.

ALLENITE C.H.
M-210; WC.
For cutting tools for chilled iron rolls; sintered carbide.

ALLENITE D.N.
M-210, WC.
For drawing dies, wood working tools; sintered carbide.

ALLENITE E.S.
M-210; WC.
For cutting tools for finish machining; sintered carbide.

ALLENITE L.C.G.
M-210; WC.
For percussion drilling tools; sintered carbide.

ALLENITE N.
M-210; WC.
For cutting tools for cast iron; sintered carbide.

ALLENITE T.N.
M-210; WC.
For cutting tools for intermittent cuts; sintered carbide.

ALLENITE T.S
M-210; WC.
For cutting tools for rough machining; sintered carbide.

ALLEN MAGNESIUM SODER.
M-242.
For solder for magnesium.

ALLEN MT. Mo "P."
M-210, 0.18-0.25 C, 0.20-0.35 Si, 1.2-1.6 Mn, 0.2-0.3 Mo, bal Fe
For machinery parts, gears, camshafts; castings.

ALLEN MT. Mo "R."
M-210, 0.25-0.33 C, 0.20-0.35 Si, 1.2-1.6 Mn, 0.20-0.30 Mo, bal Fe.
For gears, shafts, crankshafts, castings

ALLEN MT. "P."
M-210, 0.22-0.27 C, 0.20-0.35 Si, 1.2-1.6 Mn, bal Fe.
For machinery parts, gears, camshafts, castings.

ALLEN MT. "R."
M-210, 0.25-0.33 C, 0.20-0.35 Si, 1.2-1.6 Mn, bal Fe
For machinery parts, camshafts, gears, castings.

ALLENOY
M-668, 0.35-0.40 C, 0.9 Mn, 0.2-0.3 Mo, bal Fe
Hardened 170,000 TS, 150,000 YS, 12 El, 35 RA, 400 Brin
For set and cap screws, water hardening

ALLENOY 1038
M-668, 0.35-0.42 C, 0.6-0.9 Mn, bal Fe
Heat treated 145,000-165,000 TS, 115,000-135,000 YS, 11 El, 35 RA, 350-40 Brin
For pipe plugs, similar to AISI 1038.

ALLENOY 4137
M-668, 0.35-0.40 C, 0.70-0.90 Mn, 0.80-1.1 Cr, 0.15-0.25 Mo, bal Fe
Heat treated 170,000-225,000 TS; 150,000-180,000 YS, 12-8 El, 35-25 RA, 400-500 Brin
For nuts, cap screws, set screws, similar to AISI 4137

ALLENOY 8650
M-668; 0.48-0.53 C, 0.75-1.0 Mn, 0.40-0.70 Ni, 0.40-0.60 Cr, 0.15-0.25 Mo, bal Fe.
For wrenches, similar to AISI 8650

ALLEN PRESTO SODER
M-242, Sn, Pb, Ag.
For solder.

ALLENS IMPERIAL SPECIAL
U.S.; 0.68 C, 0.29 Mn, 1.64 Cr, 19.1 W, 1.37 V, bal Fe.
For tools, cutters, dies, punches, high speed steel.

ALLENS OIL HARD.
U.S.; 0.80 C, 1.64 Mn, bal Fe.
For tools, dies, non-deforming.

ALLEN "T" STEEL.
M-210; 0.14-0.16 C, 0.20-0.35 Si, 0.40-0.50 Mn, bal Fe.
For gears, shafts, housings; castings.

ALLIAGE-30.
M-897; 2 Ni, bal Cu.
For heating elements; useful operating temperature to 300°C.

ALLIAGE-60.
M-897; 5-7 Ni, bal Cu.
For heating elements; useful operating temperature to 300°C.

ALLIAGE-90.
M-897; 11-13 Ni, bal Cu.
For heating elements; useful operating temperature to 400°C.

ALLIAGE-180.
M-897, 21-23 Ni, bal Cu.
For heating elements, useful operating temperature to 950°F.

ALLIS-CHALMERS X-1
M-642, C, alloy, bal Fe.
600 Brin.
For hard facing electrodes; for abrasion and mild impact.

ALLIS-CHALMERS X-2
M-642, C, Cr, Mo, bal Fe.
For hard surfacing arc-welding electrodes; resists abrasion, erosion and mild impact.

ALLIS-CHALMERS X-3.
M-642, C, Cr, Mo, bal Fe.
For hard surfacing arc-welding electrodes; resists severe abrasion, erosion and impact.

ALLISITE
M-642, 3 C, bal Fe
For machinery castings, high strength cast iron.

ALLITE.
M-1227, Zn alloy.
For forming and stamping dies.

ALLOY 3-2-1
M-151, 3.3-3.6 C, 2.75-3.25 Ni, 1.5-2.0 Cr, 0.7-1.1 Mo, 0.5-0.8 Mn, 0.3-0.6 Si, bal Fe.
Rockwell C55-62.
For ball mills, grinding balls, wear shoes, liners, chutes, abrasion resistant, martensitic white iron.

ALLOY 3-C DIE.
M-389, 0.9 C, 1.2 Mn, bal Fe.
For blanking and forming dies, punches, oil hardened, non-deforming

ALLOY NO. 4
England, 42-47 Ni, 4-6 Cr, bal Fe.
For glass to metal seals, controlled expansion.

ALLOY 4-22-19
U.S.; 0.35-0.50 C, 23-29 Cr, 13-17 Ni, 5.7 Mo, 2 max Fe, bal Co
For turbo supercharger and jet engine parts; corrosion and heat resistant.

ALLOY 4D.
M-28, 11-14 Si, bal Al.
For die castings, housings, cases; corrosion resistant.

ALLOY 8J
M-61; Ni-Fe.
For instruments, electrical equipment; constant modulus.

ALLOY 9Al-30Mn
M-747; 9 Al, 30 Mn, 1 Si, 1 C, bal Fe.
At room temperature: 120,000 TS; 70,000 YS; 70 El.
At 1200°F: 80,000 TS; 68,000 YS; 18 El.
For high temperature applications; austenitic, high temperature strength.

ALLOY 10.
M-140; 0.8 C, bal Fe.
For springs, punches, drills, taps; Type W1.

ALLOY-10.
M-926 and M-1562; 36 Ni, 64 Fe.
Annealed: 70,000 TS; 24,000 YP; 36 El; 143 Brin.
For instruments, geodetic equipment, textile machinery parts.
Controlled expansion, corrosion resistant.

ALLOY 12-2.
M-151; 1.1-1.4 C, 12-14 Mn, 1.9-2.1 Mo, 0.4-1.0 Si, bal Fe.
Heat treated: 130,000 TS; 70,000 YS; 30 El; 30 RA; 215 Brin.
For wear and abrasion resistant parts; wear and abrasion resistant.

ALLOY 15-3.
M-151; 3-4 C, 1 max Si, 0.5-0.9 Mn, 12-18 Cr, 2.4 Mo, bal Fe.
Cast: 550 Brin.
Heat treated: 620 Brin.
For sand pumps, chute liners, brick mold liners; tough and wear resistant cast iron.

ALLOY 17-W.
M-114; 0.5 C, 12 Cr, 19 Ni, 2.2 W, 1 Mo, bal Fe.
For supercharger wheels for jet engines; heat resistant.

ALLOY 19-9DL.
M-74; 0.3 C, 19 Cr, 9 Ni, bal Fe.
Annealed: 80,000 TS; 42,000 YS, 22 El, 20 RA; 230 Brin.
For gas turbine and jet engine components, corrosion and heat resistant.

ALLOY 19-9 DL.
M-114; 0.26-0.36 C, 8-10 Ni, 18-22 Cr, 1.0-1 5 Mo, 1.0-1.5 W, 0.2-0.8 Cb, 0 2-0 6 Ti.
For jet and gas engine parts, blades, buckets, wells, rockets; heat resistant.

ALLOY 19-9 WMo.
M-114; 0 08-0.12 C, 8-10 Ni, 18-22 Cr, 0.2-0.5 Mo, 1-1.5 W, 0.2-0.6 Cb, 0.2-0.6 Ti, bal Fe.
For jet engines, gas turbines, buckets, wheels, welding rod; heat resistant, cast alloy.

ALLOY 21VFS.
M-951, 2.5 Cu, 1.0-2.5 Ni, 0.5-2.0 Mg, Si, Fe, V, bal Al
For pistons, cylinder heads, age-hardened

ALLOY-30.
M-789; 97 Cu, 3 Ni.
Hard: 58,000-67,000 TS.
For electrical equipment and instruments.
Resistance alloy. Max working temperature to 250°C.

ALLOY 35.
M-118, 2.5 Ag, 0.25 Cu, bal Pb.
For solder; M.P. 304°C.

ALLOY 40N.
U S; 54 TiC, 40 Ni, 6 Cr_3C_2
For cutting tools, wear parts, sintered carbides.

ALLOY 41SM.
French; Al alloy.
For ornaments; corrosion resistant.

ALLOY 42B.
Mg, Si, Be, bal Al.
Sand cast· 46,000 TS, 36,000 YS; 5 El.
Permanent mold: 50,000 TS; 40,000 YS; 6 El.
For gear cases and housings, fittings; heat treatable, high strength.

ALLOP 42-C.
M-1131; 0.5 C, 0.6 Mn, 0.4 Si, 35 Ni, 15 Cr, 5 Mo, 5 W, 25 Co, bal Fe.
For jet engine and turbine blades; high heat resistance.

ALLOY 42-C.
Germany, 0.5 C, 35 Ni, 15 Cr, 5 Mo, 5 W, 25 C bal Fe.
For turbine blades, jet engine components; heat and oxidation resistant.

ALLOY 48S5.
U.S.; 0.15 C, 1.09 Mn, 0.09 V, 0.009 Ti, bal Fe.
For pressure vessels, impact resistant.

ALLOY 60 CASE.
M-1400; 0.60 C, bal Fe.
Heat treated: 600 Brin.
For shafts, rolls, piston rods, axles

ALLOY 61.
M-167, 0.42 C, 24 Cr, 1 Ni, 5 5 W, 1 Fe, 0 3 Mn, 0 6 Si, bal Co.
At 70°F 105,000 TS, 58,400 YS; 7 El, 11 RA
As 1000°F: 77,000 TS; 41,400 YS; 15 El; 25 R
At 1800°F. 33,000 TS.
For jet engine components; heat and oxidation resistant.

ALLOY 73J.
England, 0 73 C, 1 0 Mn, 23 Cr, 6 Ni, 6 Mo, 2 Ta, bal Co.
For valves, pump parts, age-hardenable, corrosion resistant.

ALLOY 89MC
M-69; C, alloy, bal Fe.
For machinery parts, oil hardened, tough.

ALLOY-90.
M-789, 89 Cu, 11 Ni
Hard 58,000-67,000 TS
For electrical equipment and instruments
Resistance alloy Max working temperature to 250°C

ALLOY 95-M-255
U S, 67 Ni, 1 Fe, 25 Mo, 6 Al
Cast.
For high temperature applications, high strength, heat resistant

ALLOY 100NT-2.
England, 1 0 C, 1 5 Mn 20 Cr, 30 Ni, 3 Mo, 2.2 W, 2 Ta, 20 Co, bal Fe
Heat treated. 100,000 TS, 1 5 El; 1 0 RA
For high temperature abrasion resistant parts; abrasion and corrosion resistant

ALLOY 110VT-2
England, 1 1 C, 20 Ni, 23 Cr, 6 Mo, 2 Ta, bal C
For high temperature applications, heat and corrosion resistant

ALLOY 150S.
M-1147, 1.0-1 8 Mg, 0 8 max Fe, bal Al
Annealed: 21,000 TS, 8500 YS, 25 El
Rolled· 32,000 TS; 29,000 YS, 5 El
For general purpose, trim molding, sheets

ALLOY 223
M-1197, 81 Cr, 16 Mo, 3 Si
For high temperature applications; oxidation and creep resistant

ALLOY 234A5
0 1 C, 19 Cr, 5 Ni, Mo, W, Cb, Ti, 4 Mn, bal F
For jet and turbine parts, high heat resistance.

ALLOY 234 A-5
M; 0.38 C, 4.2 Mn, 18.5 Cr, 4 5 Ni, 1.3 Mo, 1.3 W, 0.57 Cb, bal Fe.
For high temperature applications; heat resistant

ALLOY 300M.
M-24, M-114; 0.40-0.47 C, 1.4-1.8 Si, 1.6-2.0 Ni, 0.7-0.95 Cr, 0.30-0.45 Mo, 0.05 min V, bal Fe.
Heat treated: 290,000 TS; 250,000 YS; 20 El; 10 RA; 540 Brin.
For aircraft landing gears, bolts, fittings; fatigue and creep resistant.

ALLOY 325M.
M-24, M-114; C, alloy, bal Fe.
For aircraft landing gears, bolts; fatigue and creep resistance.

ALLOY 348.
Germ.; 46 Fe, 38 Ni, 16 Al.
For permanent magnet

ALLOY 348.
England; 46 Fe, 38 Ni, 16 Al
For permanent magnets; high permeability.

ALLOY 349
England, 78 Fe, 14 Ni, 8 Al.
For permanent magnets, high permeability.

ALLOY 349.
78 Fe, 14 Ni, 8 Al
For permanent magnet

ALLOY 422-19.
M-167, 0.4 C, 0.3 Mn, 0.5 Si, 25 Cr, 16 Ni, 6 Mo, 1 Fe, bal Co
At 70°F: 98, 100 TS, 55, 100 YS; 5 El; 12 RA
At 1500°F 64,000 TS, 47,000 YS, 3 El, 3.5 RA
At 1800°F 37,800 TS, 22 El, 39 RA.
For jet engine components, oxidation and heat resistant.

ALLOY #479
M-1295, 92 Pt, 8 W
Rolled 300,000 TS
For potentiometers, available bare or enamel insulated

ALLOY 694C
0.4 C, 24 Ni, 15 Cr, bal Fe
For furnace equipment, heat treat boxes; heat and corrosion resistant

ALLOY 713 C
M-937, M-167, M-84, M-1317; 0.08-0.2 C, 12-14 Cr, 3.8-5.2 Mo, 0.5-1.0 Ti, 5.5-6.5 Al, 1.0-3.0 Cb, bal Ni
Cast 123,000 TS, 107,000 YS, 8 El; C 30-42 Rock
At 1500°F. 120,000 TS, 95,000 YS, 6 El
For gas turbine blades in jet engines, high temperature bolting
Cast alloy with high rupture strength to 1700°F
High thermal fatigue resistance

ALLOY 713LC
M-937, M-167, M-84, M-1317; 0.05 C, 0.01 B, 0.1 Zr, 12 Cr, 4.5 Mo, 0.7 Ti, 6 Al, 2 Cb, bal Ni
Cast. 130,000 TS, 109,000 YS, 15 El; 21 RA.
At 1500°F. 123,000 TS, 99,000 YS; 15 El; 17 RA
For turbine wheels high temperature parts, turbine blading Casting alloy.
Good thermal fatigue
Combines good low temperature ductility and high temperature strength.

ALLOY 936
M-1295, 8 W, 92 Pt.
For high temperature applications; oxidation resistant.

ALLOY NO 1270.
M-607; 2 Ag, bal Cu.
For silver brazing, M.P. 1220-1270°F.

ALLOY 1751.
M-18; 23.2 Co, 76.8 Pt.
Rolled: $H_c = 4300$, $Br = 6450$, $(BH)\ max = 9.5 \times 10^6$.
For permanent magnets in watches, instruments.
High coercive force and high energy product.

ALLOY 2112.
U.S., 21 Cr, 12 Ni, 0.8 Si, 1.4 Mn, 2 C, bal Fe.
For exhaust valves; heat resistant, austenitic.

ALLOY 2129.
M-108; 45-50 Ni, bal Fe.
For magnetic applications; soft.

ALLOY 6059
M-167, M-31, 0.40 C, 33 Ni, 1 Fe, 25 Cr, 6 Mo, 0.3 Mn, 0.65 Si, bal Co
Cast. 82,500 TS, 46,900 YS, 7 El, 10 RA.
At 1500°F: 51,200 TS, 38,200 YS; 10 El; 14 RA
At 1800°F. 33,700 TS, 26 El 42 RA.
For jet engine components; high strength, heat resistant.

ALLOY 9257.
M-1405, 0.93 C, 0.23 Mn, 0.13 Cr, 0.2 Si, 0.2 V, bal Fe.
For cutters, punches, dies; oil or water hardened.

ALLOY A226.
England; C, alloy, bal Fe
Heat treated. 19,000 TS
For jet engine components; age hardenable, high heat resistance

ALLOY AP
England; 3.45 C, 1.6 Si, 1.0 Mn, 0.15 P, 1.2 Ni, 0.9 Cr, bal Fe
Cast.
For gears, shafts, machine tool housings, cast iron

ALLOY B.
M 114, 1.05 C, 0.35 Mn, 1.35 Cr, bal Fe
For forming rolls, deep drawing dies, oil hardening.

ALLOY B5
M-1270, 0.07 max C, 29 Ni, 20 Cr, 2-3 Mo, 4 Cu, bal Fe.
Cast 65,000-75,000 TS; 28,000-38,000 YS, 50-35 El, 50-40 RA, 120-150 Brin.
For chemical plant equipment, tanks, resists mixed acids, austenitic.

ALLOY B 1900.
M-114 and M-115; 0.10 C, 8 Cr, 10 Co, 6 Mo, 6 Al, 4.3 Ta, 1.0 Ti, 0.015 B, 0.07 Zr, bal Ni.
Hardened 125,000 TS; 110,000 YS; 5 min El
At 1600°F 97,000 TS, 83,000 YS, 1.5 min El
For turbine blades and other high temperature applications
Precipitation hardened. Vacuum-melted and vacuum-cast

ALLOY "B" FINISHING.
M-261, 1.4 C, 4.5 W, 0.8 Cr, bal Fe
For finishing tools, draw dies, wear resistant.

ALLOY BSZ
Italy For solder, soft

ALLOY "C"
M-261, 2.2 C, 13 Cr, bal Fe
For tools, dies, gauges, non-deforming

ALLOY C-422
U.S.; 0.2 C, 13 Cr, 1 Mo, 0.8 W, 0.25 V, bal Fe
For turbine wheels; corrosion and heat resistant.

ALLOY CB-7
M-48; 0.75 Zr, 7.5 Ti, bal Cb.
Rolled: 60,800 YS; 32 El
For high temperature applications; high temperature strength to 2000°F.

ALLOY CB-16.
M-48; 67 Cb, 10 Ti, 20 W, 3 V.
For high temperature applications; oxidation resistant to 2000°F.

ALLOY CB-22.
M-48; 94 Cb, 3 Al, 3 V.
For high temperature applications; oxidation resistant to 2000°F.

ALLOY CB-74.
M-48; 85 Cb, 10 W, 5 Zr.
At 2200°F: 44,800 TS; 42,400 YS
For high temperature applications; oxidation resistant to 2000°F.

ALLOY CH42.
M-694; 1.65 C, 0.45 Mn, 13 Cr, 0.3 V, 0 7 Mo, bal Fe.
For dies, air hardening

ALLOY CMI.
U S.; 65 TiC, 11 CbC, 11 Fe, 5.7 Cr, 5 6 Ni, 0.7 TaC
For cutting tools, wear parts, sintered carbides.

ALLOYCO 18-SMo.
M-1023; 0 07 max C, 19-21 Cr, 9-11 Ni, 2 Mo, bal Fe
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA, 160 Brin.
For valves, pumps; Type 316; stainless, austenitic

ALLOY CROSS CUTS.
M-69; 0.90 C, 0 35 Mn, 0 50 Cr, bal Fe
For saws; water hardened

ALLOY CSA-39
Eng.; 0.10 C, 27 Ni, 40 Fe, 19 Cr, 9 Mo, 3 W.
For jet engine components, high strength, heat resistant.

ALLOY CW.
0.10 C, 1.5 Mn, 0 5 Si, 21 5 Cr, 20 5 Ni, 20 Co, 3 Mo, 2 W, 1 Cb, 0 14 N, bal Fe
At 70°F 118,000 TS; 58,000 YS; 49 El.
At 1200°F: 73,500 TS, 37,600 YS, 28 El.
For jet engine components; oxidation and heat resistant.

ALLOY D-31.
U.S ; 10 Ti, 10 Mo, 80 Cb.
At 70°F 100,000 TS.
At 2000°F. 34,500 TS.
For high temperature applications; high oxidation resistance.

ALLOYED GENUINE WROUGHT IRON.
M-292, 5 max Ni, 0 05 Mn, 0.10-0 15 P, 0.05 C, 0-0.75 Cu, bal Fe.
50,000-60,000 TS, 30,000-45,000 YS.
For pipes, hull plates; tough

ALLOY EI 437B.
Russia; 0 05 C, 0 23 Mn, 20.5 Cr, bal Ni
For high temperature applications, high heat and oxidation resistance.

ALLOY FDP.
England; C, Cr, Ni, bal Fe.
For aircraft structures, austenitic, stainless.

ALLOY FINISHING
M-140, 1.4 C, 3 W, bal Fe
For cutting and finishing tools; non-deforming.

ALLOY H40.
English; 0 25 C, 3 Cr, 0.8 V, 0.5 W, 0.5 Mo, 5 Ni, bal Fe
For high temperature bolts, turbine wheels; ferritic, heat resistant.

ALLOY HTB-1.
M-1, M-38, M-115, M-376; 1 C, 1.45 Cr, 1 Al, bal Fe .
For high temperature bearings; heat and creep resistant

ALLOY HUBBING DIE.
M-24; 0.09 C, 0.48 Mn, 0.58 Cr, 1.25 Ni, bal Fe.
For hubbing dies; case hardened.

ALLOY I-336.
U.S ; 0.20 C, 50 Co, 15 Ni, 1 Fe, 20 Cr, 12 W, 1 Cb.
For high temperature applications; high strength, heat resistant.

ALLOY I-1360
U.S., 0.1 C, 70 Ni, 6 Fe, 10 Cr, 5 Mo, 2 Cb, 6 Al, 0.5 Be
Cast.
For high temperature applications; high strength, heat resistant.

ALLOY HIVT2-2
England; 1 11 C, 23 Cr, 6 Mo, 2 Ta, bal Co
Cast· 120,000 TS, 4 El, 1 RA
For valves, pump parts; corrosion, abrasion and heat resistant.

ALLOY IRON
M-139, C, Ni, Cr, bal Fe
Cast. 50,000 TS, 147-255 Brin.
For valve gates, castings

ALLOY L-251
U S , 0 40 C, 54 Co, 10 Ni, 1 Fe, 19 Cr, 14 W
Cast
For high temperature applications, high strength, heat resistant

ALLOY L605
M-1, M-114, 0 05 C, 10 Ni, 53 Co, 1 Fe, 20 Cr, 15 W
Rolled 160,000 TS, 85,000 YS, 55 El.
For gas turbine buckets, afterburners, heat resistant

ALLOY L-605.
M-114, 0.08 C, 21 Cr, 10.5 Ni, 1 6 Mn, 0 6 Si, 15 5 W, 1.6 Fe, bal Co
Rolled 160,000 TS, 85,000 YS, 55 El
For jet engine components, discs, buckets; oxidation and heat resistant.

ALLOY I M-5
40 Mo, 40 Si, 8 Cr, 2 B, 10 Al
Uses Coating for columbium alloys for high temperature applications.
High oxidation resistance

ALLOY L T C
M-1295; Ni, Cr, bal Au
For resistors, high electrical resistance

ALLOY-M.
M-926 and M-1562, .08 C, 18 Cr, 8 Ni, bal Fe.
Annealed: [illegible],000 TS, 35,000 YS; B 80 Rock.
For chemical plant equipment, mixers, digesters, tanks, agitators
Stainless, austenitic.

ALLOY M22 VC.
M-86, 0 08-0 16 C, 5 0-6.5 Cr, 5.9-6.6 Al, 1 5-2.5 Mo, 10 5-11 5 W, 2 6-3 4 Ta, 0.4-0 8 Zr, 1.0 max Fe, bal Ni.
High temperature applications.
Vacuum cast.

ALLOY M-115.
M-115; 1-2 Mn, bal Al.
For light alloy parts; corrosion resistant

ALLOY M-252.
M-1214, M-114, M-31, M-1; 0.2 C, 9-11 Co, 3 Fe, 18-20 Cr, 9-11 Mo, 2.5 Ti, 1 Al, bal Ni.
Annealed: 175,000 TS; 20 El.
At 1000°F: 165,000 TS; 93,000 YS.
At 1600°F: 70,000 TS; 60,000 YS; 35 El.
For jet engine buckets; high heat and corrosion resistant.

ALLOY M-255.
M-259; 0.5 Al_2O_3, bal Al.
At 70°F: 22,600 TS; 17,600 YS; 22 El.
At 300°F: 15,400 TS; 13,600 YS, 22 El.
For high temperature applications; powder metallurgy.

ALLOY M-257.
M-249; 7.8 Al_2O_3, bal Al.
Sintered: 40,000 TS; 26,000 YS; 14 El.
For high temperature applications; powder metallurgy.

ALLOY M-276.
M-249, 16.5 Al_2O_3, bal Al
Sintered. 54,000 TS; 35,000 YS, 3 El
For high temperature applications, powder metallurgy

ALLOY M-308
M-1, M-31, M-114, M-32, 0.08 C, 14 Cr, 33 Ni, 4 Mo, 0.25 Al, 0.25 Zr, 2 Ti, 6.5 W, bal Fe.
For jet engine parts; heat resistant.

ALLOY MC-102
M-86; 0.02-0.06 C, 0.1-0.4 Si, 0.1-0.5 Mn, 4.0 max Fe, 19.0-20.5 Cr, 5.0 max Co, 5.5-6.5 Mo, 6.2-6.7 Cb + Ta, 2.0-3.0 W, bal Ni
For gas turbine stator blades, turbine rotors, pre-combustion chambers of diesel engines.
Good oxidation resistance and strength to 900°C Age-hardenable.

ALLOY MCS
M-114, M-115, 0.70 C, 3.5 Cr, 5.5 Mo, 1 Si, bal Fe
For high temperature bearings; heat resistant.

ALLOYMET 1005.
M-1216, 4.5-5.5 Cr, bal Cu
For Cr additions to Cu alloys, master alloy.

ALLOYMET 1010.
M-1216, 9.5-10.5 Cr, bal Cu
For Cr additions to Cu alloys; master alloy.

ALLOYMET 1110
M-1216; 9-11 Fe, bal Cu
For Cu additions to steel and cast iron, master alloy

ALLOYMET 1115
M-1216, 4.5-5.5 Fe, bal Cu
For Cu additions to steel and cast iron, master alloy.

ALLOYMET 1130
M-1216; 28-32 Fe, bal Cu.
For Cu additions to steel and cast iron; master alloy

ALLOYMET 1230A.
M-1216, 28-32 Mn, bal Cu
For Mn additions for Ni alloys; hardener, deoxidizer.

ALLOYMET 1230B
M-1216, 23.5-26.5 Mn, 4-6 Fe, bal Cu.
For Mn additions to bronzes, hardener, deoxidizer.

ALLOYMET 1315
M-1216, 15 Ni, bal Cu
For alloying additions for bronzes.

ALLOYMET 1330.
M-1216; 30 Ni, bal Cu.
For alloying additions.

ALLOYMET 1350.
M-1216; 50 Ni, bal Cu.
For alloying additions.

ALLOYMET 1410
M-1216, 9-11 Si, bal Cu.
For high conductivity copper; master alloy.

ALLOYMET 1420.
M-1216, 18-22 Si, bal Cu.
For high conductivity copper; master alloy.

ALLOYMET 1430.
M-1216; 28-32 Si, bal Cu.
For high conductivity copper; hardener, master alloy.

ALLOYMET 2000.
M-1216; 100 Ni.
For anodes for plating.

ALLOYMET 2023.
M-1216; 60 Ni, 25 Cu, bal Mn, Si, Fe and C.
For Ni and Cu additions to steel and cast iron, alloying master alloy

ALLOYMET 2030
M-1216; 30 Cu, 70 Ni.
For Ni and Cu additions to steel and cast iron; alloying master alloy.

ALLOYMET 2030M.
M-1216, 65 Ni, 30 Cu, 2 max Fe, 1 max Mn, 0.15 max C
For Ni and Cu additions to steel and cast iron; alloying master alloys

ALLOYMET 2115
M-1216; 77 min Ni, 14-17 Cr, 6-10 Fe, 1 Mn, 0.5 max Cu
For alloying additions to stainless steels; for high temperature castings.

ALLOYMET 2115 WH
M-1216, 33-37 Ni, 14-17 Cr, 0.5-2.0 Mn, 0.8-2.5 Si, bal Fe.
For alloying additions to stainless steels; for high temperature castings

ALLOYMET 2120
M-1216, 77-79 Ni, 19-20 Cr, 1 Fe, bal Mn, C, Si.
For alloying additions to stainless steels, alloying master alloy.

ALLOYMET 2140
M-1216, 57 min Ni, 14-18 Cr, 3 max Mn, 1.5 max Si, bal Fe.
For alloying additions to stainless steels; alloying master alloy.

ALLOYMET 2200.
M-1216; 56 Ni, 23 Cu, 7.5 Cr, bal Fe.
For alloying additions

ALLOYMET 2350
M-1216; 47-50 Ni, bal Fe
For alloying for high permeability; soft magnets.

ALLOYMET 2364.
M-1216; 36 Ni, bal Fe
For alloying for low expansion applications; glass seals

ALLOYMET 2470.
M-1216; 30 Ni, 15 Cu, 0.2 Mn, bal Fe.
For glass to metal seals; low expansion.

ALLOYMET MG.
M-1216, 76 Ni, 14 Cu, bal Fe.
For high permeability alloys; low field strength

ALLOYMET PERMAG.
M-1216; 20 Ni, 60 Cu, bal Fe.
For permanent magnets.

ALLOY MN5.
Russia; Ni, bal Cu.
For high temperature applications; heat resistant.

ALLOY N-153.
M-114; 0.1 C, 1.5 Mn, 0.5 Si, 17 Cr, 15 Ni, 13 Co, 3 Mo, 2 W, 1Cb, 0.14 N, bal Fe.
For jet engine components; oxidation and heat resistant.

ALLOY N-155.
M-114; 0.1 C, 1.5 Mn, 0.5 Si, 21.5 Cr, 20.5 Ni, 20 Co, 3 Mo, 2 W, 1 Cb, 0.14 N, bal Fe.
At 70°F: 118,000 TS; 58,000 YS; 49 El.
At 1200°F: 73,500 TS; 37,600 YS, 28 El.
At 1600°F: 39,000 TS; 30,000 YS; 15 El.
For jet engine components, heat and oxidation resistant.

ALLOY S-844
U.S.; 0.30 C, 44 Co, 20 Ni, 2 Fe, 25 Cr, 3 Mo, 2 W, 2 Cb.
For high temperature applications, high strength, heat resistant.

ALLOY SHOE DIE.
M-38; 0.5 C, 0.7 Cr, 0.15 Mo, bal Fe.
For shoe dies; tough.

ALLOY SSMP.
England; 2.98 C, 1.14 Si, 1.1 Mn, 0.18 P, bal Fe.
Cast.
For gears, shafts, machine tool housings, cast iron

ALLOY TRIMMER.
M-357, C, alloy, bal Fe.
For tools, water or oil hardened.

ALLOY V814.
German; 45 VC, 45 TiC, 7 Ni, 3 Co
For cutting tools, bits, dies, sintered carbides.

ALLOY VCM
England, 0.28 C, 0.7 Mn, 1.0 Cr, 1.0 Mo, 0.7 Ni, bal Fe.
For gears, shafts, cams; nitriding steel

ALLOY-W
M-Germany; 0.5-0.9 Cu, 0.28-0.36 Ni, 0.25 Co, 0.16 Mg, V, W, Cr, Be, bal Al
For anodized die castings, housings

ALLOY-W.5
M-121; 4 Si, 0.5 Mn, bal Ni.
For spark plug electrodes
Resists high temperature corrosion

ALLOY-W 6.
M-121; 2.0 Si, 0.5 Mn, bal Ni.
For spark plug electrodes.
Resists high temperature corrosion.

ALLOY W 7
M-121; 1.0 Si, 2.5 Mn, bal Ni.
For spark plug electrodes.
Resists high temperature corrosion

ALLOY W.9
M-121; 1.0 Si, 4.5 Mn, bal Ni
For spark plug electrodes.
Resists high temperature corrosion.

ALLOY WF-31.
U.S; 0.15 C, 50 Co, 10 Ni, 5 Fe, 20 Cr, 3 Mo, 10 W.
For jet engine components, high strength, heat resistant.

ALLOY Z-FM.
M-353; 0.4 C, 1 Cr, 0.75 Ni, 0.35 Mo, 0.35 Pb, bal Fe.
Heat treated: 143,000 TS; 122,500 YS; 16 El; 52 RA; 300 Brin.
For machinery parts, gears, pins, shafting; oil hardened, shock resistant.

ALL-PO.
M-507; 0.90 C, 0.4 Si, 0.4 Mn, 9.5 Cr, 0.6 Mo, bal Fe.
Coated, hard facing electrode.
As arc welded: 185,000 psi, 52-55 Rc.
For overlay or buildup on scrapers, loaders, dozer bits, blades, shovels, buckets. Good abrasion resistance.

ALL-STATE HS-1.
M-1713; Cr, Mn, Ni.
Welded: 125,000 TS; 19 El; 260-320 Brin.
For hard facing electrode; abrasion and wear resistant, work hardening.

ALL-STATE NO. 4.
M-1713; Ni core
For welding electrode for cast iron; machinable.

ALL-STATE NO 7
M-1713, 40 Sn, 50 Pb, 20 Zn
For cast iron solder rod for repairing cracks in cast iron, corrosion resistant, M.P. 600°F

ALL-STATE NO 11
M-1713, 47 Cu, 43 Zn, 10 Ni.
For brazing, M.P 1665-1715°F

ALL-STATE NO 13.
M-1713; 48 Cu, 9.6 Ni, 0.29 Si, 0.18 Fe, 0.16 Mn, bal Zn
For brazing alloy, nickel silver.

ALL-STATE NO. 21
M-1713; 7 P, 0.5 Sn, bal Cu.
For brazing, M.P 1300-1415°F

ALL-STATE NO. 22
M-1713, P, Sn, bal Cu
Welded: 40,000 TS, 80 Brin
For welding electrodes, arc welding, corrosion resistant.

ALL-STATE NO 23
M-1713, 2 Ag, 7.3 P, bal Cu
For brazing, M.P 1175-1410°F

ALL-STATE NO. 24
M-1713, 7-9 Sn, 0.03-0.35 P, bal Cu.
Welded 45,000 TS; 80-160 Brin
For P-bronze welding electrodes, for welding steel, cast iron and copper alloys

ALL-STATE NO 31
M-1713, 11 Si, 1 Fe, bal Al
Welded 30,000 TS
For Al brazing, for gas welding, M.P. 950°F.

ALL-STATE NO 33.
M-1713; 11 Si, 1 Fe, bal Al
For Al welding rod, for gas welding

ALL-STATE NO. 37.
M-1713, 30 Cd, 28 Zn, 42 Sn.
For solder

ALL-STATE NO. 39.
M-1713, 59 Sn, 41 Zn.
For Al solder, low temperature rub-on solder

ALL-STATE NO 41.
M-1713, 58 Cu, 1 Sn, 1 Fe, bal Zn.
For brazing rod; for gas welding.

ALL-STATE NO. 53.
M-1713; 4 Pb, 3 Al, 2 Cu, bal Zn.
For Zn base welding rod for Zn alloys; for gas welding.

ALL-STATE NO. 61.
M-1713; 10 Al, 1 Zn, 89 Mg.
For magnesium alloy solder.

ALL-STATE NO. 100.
M-1713; 40 Ag, 30 Cu, 28 Zn, 2 Ni.
For brazing, silver solder; M.P. 1220-1435°F.

ALL-STATE NO. 101.
M-1713; 45 Ag, 18 Cu, 19 Zn, 18 Cd.
For brazing, silver solder; M.P. 1140-1190°F.

ALL-STATE NO. 164.
M-1713; 40 Ag, 30 Cu, 25 Zn, 5 Ni
For brazing; silver solder.

ALL-STATE NO. 430.
M-1713; Ag, 18 Cr, 8 Ni, bal Fe.
For stainless steel solder; stainless, austenitic.

ALLVAC 18-15B.
M-1490; 0.01 C, 18 Cr, 15 Ni, 0.8 B, bal Fe.
For neutron control rods, atomic energy uses; stainless, austenitic.

ALLVAC 500 ZB.
M-1490; 0.08 C, 19 Cr, 17 Co, 4 Mo, 54 Ni, 3 Ti, 3 Al, 0.006 B, 0.06 Zr
At R.T: 176,000 TS; 110,000 YS; 16 El.
At 1400°F: 151,000 TS, 106,000 YS; 21 El.
For missiles, space equipment, jet engine and gas turbine parts.
High corrosion and oxidation resistant
Good creep resistance and notch toughness.

ALLVAC 718.
M-1490; 0.03-0.10 C, 17-21 Cr, 2.8-3.3 Mo, 50-55 Ni, 5.0-5.5 Cb, 0.65-1.15 Ti, 0.4-0.8 Al, bal Fe
Heat Treated: 190-000-215,000 TS, 160,000-185,000 YS, 15-25 El, 20-30 RA, C-40-44 Rock
For heat resistant parts to 1300°F
Age hardening, high strength.
Corrosion and oxidation resistant

ALLVAC ASTROLOY
M-1490, 0.06 C, 15 Cr, 17 Co, 5 Mo, 3.5 Cb, 3.5 Ti, 4 Al, 0.03 B, 0.06 Zr, bal Ni
Heat treated: 205,000 TS; 152,000 YS; 12 El, 14 RA
At 1400°F: 160,000 TS; 132,000 YS; 15 El, 17 RA
For turbine wheels and blades, jet engine components, nozzles, compressor discs.
High heat and corrosion resistant
High creep and stress-rupture strength

ALLVAC I-700
M-1490, 0.13 C, 15 Cr, 29 Co, 3.75 Mo, 46 Ni, 2.55 Ti, 3.25 Al
At R.T: 170,000 TS, 103,000 YS, 25 El
At 1400°F: 127,000 TS; 8900 YS; 11 El
For jet engine and gas turbine components, space vehicles and missiles.
Oxidation and corrosion resistant.
Good creep resistance and notch toughness

ALLVAC M-252.
M-1490; 0.10-0.20 C, 0.5 max Mn, 18-20 Cr, 9-11 Co, 9-11 Mo, 2.25-2.75 Ti, 0.5-1.25 Al, 0.006 B, 5 max Fe, bal Ni.
Bar: 180,000 TS, 20 El; C 40 Rock, 122,000 YS.
At 1200°F: 168,000 TS; 108,000 YS; 11 El; C 33 Rock.
For heavy duty jet engine and gas turbine components.
High corrosion and heat resistance.
Age hardenable. Good creep strength.

ALLVAC-N.
M-1490; 0.05 C, 7 Cr, 16.5 Mo, 76.5 Ni, 10 ppm B.
At R.T.: 116,500 TS; 43,000 YS; 62.6 El.
At 1200°F: 96,300 TS; 35,500 YS; 54 El.
For high temperature applications and for equipment handling hot fluoride salts.
High heat, corrosion and oxidation resistant.

ALLVAC R-235.
M-1490; 0.12 C, 15.5 Cr, 5.5 Mo, 65 Ni, 2.5 Ti, 2 Al, 10 Fe.
At R.T: 160,000 TS; 100,000 YS; 30 El.
At 1500° F: 105,000 TS; 85,000 YS; 18 El.
For high temperature components.
Precipitation hardening. Good oxidation and corrosion resistance.

ALLVAC RENÉ 41.
M-1490; 0.09 C, 19 Cr, 11 Co, 10 Mo, 3 Ti, 1.5 Al, 0.006 B, bal Ni.
At 1400°F: 126,000 TS; 88,000 YS; 11 El
At R.T.: 170,000 TS; 103,000 YS; 25 El.
For jet engine and gas turbine components, afterburners, high temperature bolts.
High temperature, high strength properties.
Corrosion and oxidation resistant.

ALLVAC WASPALOY.
M-1490, 0.10 max C, 12-15 Co, 3.5-5.0 Mo, 2.6-3.2 Ti, 1.0-1.6 Al, 0.08 Zr, 0.008 B, 18-21 Cr, bal Ni.
Annealed: 121,000 TS; 70,000 YS; 54 El, B 90 Rock.
At 1400°F: 120,000 TS; 99,000 YS; 28 El, 42 RA.
For turbine engines, airframe assemblies, missile components, fasteners.
High stress-rupture strength and oxidation resistant.

ALMADUR MP6
German, Al alloy.
For bearings.

ALMADUR MZ3.
German; Al alloy.
For bearings

ALMAG
M-871; 3.5-4.5 Cu, 0.4-1.0 Mn, 0.3-0.75 Mg, bal Al.
Rolled: 54,000 TS; 22 El; 100 Brin
For light alloy parts, aircraft construction, Duralumin type.

ALMAG 35
M-1022; 0.1 Ti, 0.1 Mn, 0.05 Be, 6.5-7.5 Mg, bal Al.
Cast: 38,000-42,000 TS; 18,000-21,000 YS, 10-15 El, 70 Brin
For castings, ornaments, machine tool parts; not hardenable, corrosion resistant

ALMANITE-C.
M-82, C, Al, Mn, bal Fe
Cast: 90,000 TS; 15 El; 200-400 Brin.
For mill liners, grinding balls, mixer blades, work hardens, abrasion and wear resistant.

ALMANITE S.
M-82, C, Al, Mn, bal Fe
Cast: 90,000 TS; 12 El, 200 Brin
For mill liners, grinding balls, crushing rolls; austenitic, wear and abrasion resistant

ALMAR 15 (280 HT).
M-1, 0.03 max C, 0.10 max Mn, 0.10 max S, 0.01 max P & S, 15.0 Ni, 4.8 Mo, 0.7 Ti, 9.0 Co, 0.02 Zr, 0.003 B, bal Fe
Heat Treated: 299,700 TS; 293,700 YS; 10 El; 41.5 RA, Rock C 54-55.
For die casting inserts, pistons, cylinders, hot extrusion dies.
High yield strength and ductility.

ALMAR 18.
M-1; 0.03 C, 17.0-19.0 Ni, 7.0-9.5 Co, 3.0-5.2 Mo, 0.15-0.80 Ti, 0.05-0.15 Al, 0.02 Zr, 0.003 B, bal Fe.
Annealed: 148,000 TS; 105,000 YS; 16 El; 68 RA; C 30 Rock.
Aged: 286,000 TS; 280,000 YS; 11 El: 55 RA; C 54 Rock.
For rocket motor cases, airframes, airborne equipment, large machinery parts, bolts, cryogenic equipment, high temperature equipment.
Maraging steel, shock resistant.

ALMAR 18 (200).
M-1; 0.03 max C, 17-19 Ni, 8-9 Co, 3.0-3.5 Mo, 0.15-0.25 Ti, 0.02 Zr, 0.003 B, 0.05-0.15 Al, bal Fe.
Maraged: 210,000 TS; 200,000 YS; 15 El; 67 RA
For fuel rocket cases, aircraft landing gears, missiles and aircraft parts.
Maraging steel, high strength and toughness and ductility.

ALMAR 18 (250).
M-1; 0.03 max C, 17-19 Ni, 7.0-8.5 Co, 4.6-5.2 Mo, 0.3-0.5 Ti, 0.02 Zr, 0.003 B, 0.05-0.15 Al, bal Fe.
Maraged: 243,000 TS; 232,000 YS; 12 El, 57 RA; C 48 Rock.
For fuel rocket cases, aircraft landing gears, missile and aircraft components.
Maraging steel, high strength, ductility and toughness.

ALMAR 18 (300).
M-1; 0.03 max C, 18-19 Ni, 8.5-9.5 Co, 4.6-5.2 Mo, 0.5-0.8 Ti, 0.02 Zr, 0.003 B, 0.05-0.15 Al, bal Fe
Maraged: 295,000 TS; 292,000 YS, 11.5 El, 59 RA, C 48-50 Rock.
For rocket cases, aircraft landing gears, missile and aircraft components
Maraging steel, high strength, ductility and toughness.

ALMAR 20.
M-1, 0.03 max C, 19.0-20.0 Ni, 1.3-1.6 Ti, 0.15-0.30 Al, 0.5 Cb, 0.02 Zr, 0.003 B, bal Fe
Heat Treated: 253,000-265,500 TS, 244,000-260,000 YS; 10-13 El; 52-59 RA; C 49-53 Rock
For rocket motor cases, airframes, airborne equipment, large machinery parts, bolts, cryogenic and high temperature equipment.
Maraging steel, shock resistant

ALMAR 25.
M-1, 0.03 C, 25.0-26.0 Ni, 1.3-1.6 Ti, 0.15-0.30 Al, 0.02 Zr, 0.003 B, 0.50 Cb, bal Fe.
Heat Treated: 240,000-265,000 TS, 212,000-246,000 YS; 3-5 El.
For rocket motor cases, airframes, airborne equipment, large machinery parts, bolts, cryogenic equipment, high temperature equipment. Maraging steel, shock resistant

ALMAR 362.
M-1; 0.05 max C, 14.0-14.5 Cr, 6.25-7.0 Ni, 0.6-0.9 Ti, bal Fe.
Annealed. 125,000 TS; 108,000 YS, 16 El; C 25 Rock.
Age Hardened: 188,000 TS, 182,000 YS; 13 El, C 41 Rock.
For jet engine, aircraft and missile components, hydraulic and pneumatic equipment, valve and pump parts
Age-hardenable, martensitic, corrosion resistant

ALMAR 363
M-1; 0.04 C, 11.5 Cr, 4 Ni, 0.4 Ti, bal Fe.
Strip Annealed: 123,000 TS; 106,000 YS; 12 El; C 28 Rock.
At 600°F: 97,700 TS; 89,800 YS, 5 El.
For jet engine, missile and space components.
Maraging steel, good fracture toughness.
Corrosion resistant. Good fabricability.

ALMASILIUM.
M-767; 2 Si, 1 Mg, bal Al.
50,000 TS; 6 El; 90 Brin.
For light alloy parts; corrosion resistant.

ALMELEC.
M-979; 0.4-1.2 Mg, 0.5-1.2 Si, 0-0.3 Fe, bal Al.
44,600 TS; 6-8 El; 90 Brin.
For electrical transmission lines, heat treated wrought French alloy.

ALMET 1-8.
M-248; 0.2 max C, 18 Cr, 8 Ni, bal Fe
For stainless wire parts; Type 302 stainless.

ALMET 12
M-248; 0.12 C, 12-14 Cr, bal Fe
For corrosion resistant wire parts; Type 410 stainless.

ALMET 12 M.
M-248, C, 12-14 Cr, bal Fe
For corrosion resistant wire parts, Type 416 stainless, free machining

ALMET 17
M-248; C, 14-18 Cr, bal Fe
For corrosion resistant wire parts, Type 430 stainless

ALMET 17-7 PH.
M-248; 0.09 max C, 17 Cr, 7 Ni, 0.75-1.25 Al, bal Fe
Rolled 200,000-285,000 TS, 185,000-265,000 YS, 400 Brin
Heat treated 244,000-345,000 TS, 234,000-340,000 YS; 7-2 El; 480 Brin
For springs, clips, aircraft parts, age-hardened, stainless

ALMET 17 Cu.
M-248, C, 14-18 Cr, Cu, bal Fe
For corrosion resistant wire parts, Type 434 stainless.

ALMET 18 8 Cb
M-248; C, 18 Cr, 10 Ni, Cb, bal Fe
For stainless wire parts, Type 347 stainles

ALMET 18-8M.
M-248, C, 18 Cr, 8 Ni, bal Fe
For stainless wire parts, Type 303 stainless, free machining

ALMET 18-8S
M 248, 0.08 max C, 18 Cr, 8 Ni, bal Fe
For stainless wire parts, Type 304 stainless.

ALMET 18-8 Ti
M-248, C, 18 Cr, 10 Ni, Ti, bal Fe.
For stainless wire parts; Type 321 stainless.

ALMET 18-12 SMo.
M-248, C, 18 Cr, 12 Ni, 3 Mo, bal Fe.
For stainless wire parts, Type 316 stainless.

ALMET 20-10.
M-248, C, 20 Cr, 10 Ni, bal Fe
For stainless wire parts; Type 308 stainless.

ALMET 21.
M-248, C 21 Cr, bal Fe
For corrosion resistant wire parts; Type 442 stainless

ALMET 25-12
M-248, C, 25 Cr, 12 Ni, bal Fe.
For stainless and heat resistant wire parts; Type 30 stainless.

ALMET 25-20.
M-248; C, 25 Cr, 20 Ni, bal Fe.
For heat resistant wire parts; Type 310 stainless.

ALMET 28.
M-248; C, 25 Cr, bal Fe.
For heat resistant wire parts; Type 446 stainless.

ALMET 35-15.
M-248; C, 15 Cr, 35 Ni, bal Fe.
For heat resistant wire parts; Type 330 stainless.

ALMET 302.
M-248; 0.20 max C, 17-19 Cr, 8-10 Ni, bal Fe.
Soft: 105,000 TS; 70,000 YS; 35 El.
Hard: 330,000 TS; 310,000 YS; 2 El.
For springs, trim, wire parts; stainless, austenitic; Type 302.

ALMET 303.
M-248; 0.15 C, 17-19 Cr, 8-10 Ni, 0.07 min S or Se, bal Fe.
Soft: 100,000 TS; 45,000 YS; 25 El; 159 Brin.
Hard: 150,000 TS; 130,000 YS; 15 El, 240 Brin.
For screw machine products, stainless, austenitic, free-cutting.

ALMET 304.
M-248; 0.08 max C, 18-20 Cr, 8-10 Ni, bal Fe.
Soft: 90,000 TS; 35,000 YS; 55 El; 144 Brin.
Hard: 230,000 TS, 220,000 YS, 2 El, 430 Brin.
For woven wire, cold headed parts; stainless, austenitic, Type 304.

ALMET 305.
M-248; 0.12 max C, 18 Cr, 12 Ni, bal Fe
Annealed: 85,000 TS, 47,000 YS, 60 El; 77 RA; 144 Brin.
Soft: 100,000 TS, 54,000 YS; 58 El; 74 RA; 156 Brin.
For spun, cold drawn and cold headed parts; austenitic, stainless.

ALMET 308
M-249, 0.08 max C, 19-21 Cr, 10-12 Ni, bal Fe.
Soft: 85,000-105,000 TS, 35,000-40,000 YS, 25-55 El; 150 Brin.
Hard: 160,000-190,000 TS, 150-000-185,000 YS; 4-8 El; 380-430 Brin.
For electrical equipment; austenitic, stainless.

ALMET 309.
M-248; 0.20 max C, 22-24 Cr, 12-15 Ni, bal Fe.
Soft 85,000 TS; 35,000 YS, 55 El; 159 Brin
Hard: 190,000 TS; 185,000 YS; 4 El, 430 Brin.
For heat resistant parts, corrosion and heat resistant.

ALMET 310
M-248, 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Soft 85,000 TS, 35,000 YS, 25 El, 139 Brin.
Hard: 190,000 TS, 185,000 YS; 4 El, 430 Brin.
For heat resistant parts, corrosion and heat resistant.

ALMET 314.
M-248; 0.25 max C, 23-26 Cr, 19-22 Ni, 2-3 Si, bal Fe.
Soft: 85,000 TS; 35,000 YS; 25 El; 139 Brin
Hard: 190,000 TS, 185,000 YS; 4 El; 430 Brin.
For heat resistant parts; corrosion and heat resistant

ALMET 316.
M-248; 0.10 max C, 18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Soft: 85,000 TS; 35,000 YS; 25 El, 139 Brin.
Hard: 190,000 TS; 185,000 YS; 4 El; 430 Brin.
For acid and chemical equipment; stainless, austenitic.

ALMET 317.
M-248; 0.10 C, 18 Cr, 12 Ni, 3-4 Mo, bal Fe.
Soft: 85,000 TS; 35,000 YS; 25 El; 139 Brin.
Hard: 190,000 TS; 185,000 YS; 4 El; 430 Brin.
For welded stainless structures; stainless, austenitic.

ALMET 321.
M-248; 0.08 max C, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe.
Soft: 90,000 TS; 35,000 YS; 25 El; 137 Brin.
Hard: 230,000 TS; 220,000 YS; 2 El; 430 Brin.
For welded stainless parts; austenitic, stainless, stabilized.

ALMET 330.
M-248; 0.20 max C, 15-17 Cr, 34-36 Ni, bal Fe.
Soft: 85,000 TS; 35,000 YS; 25 El; 139 Brin.
Hard: 190,000 TS, 185,000 YS; 4 El; 430 Brin.
For carburizing and heat treating equipment; heat resistant, austenitic.

ALMET 347
M-248; 0.08 max C, 17-19 Cr, 9-12 Ni, Cb = 10 × C, bal Fe
Soft: 85,000 TS, 35,000 YS; 25 El; 139 Brin.
Hard: 190,000 TS; 185,000 YS; 4 El; 430 Brin.
For welded stainless parts; stainless, austenitic.

ALMET 405.
M-248; 0.05 max C, 11.5-13.5 Cr, 0.10-0.30 Al, bal Fe.
Soft: 75,000 TS; 35,000 YS; 20 El; 150 Brin.
Hard. 190,000 TS; 145,000 YS; 8 El; 300 Brin.
For chemical plant equipment, corrosion resistant.

ALMET 410.
M-248; 0.15 max C, 11.5-13.5 Cr, bal Fe.
Soft. 75,000 TS; 35,000 YS; 15 El, 150 Brin.
Hard: 190,000 TS; 145,000 YS; 8 El, 300 Brin.
For valve trim, cold headed parts; corrosion resistant.

ALMET 416.
M-248, 0.15 max C, 12-14 Cr, 0.07 min S or Se, bal Fe
Soft: 75,000 TS, 35,000 YS, 14 El, 150 Brin
½H-temper: 115,000 TS, 80,000 YS; 16 El; 185 Brin.
For valve trim, cold headed parts, corrosion resistant, free-cutting

ALMET 420.
M-248, 0.15 min C, 12-14 Cr, bal Fe.
Soft: 95,000 TS; 45,000 YS; 14 El; 176 Brin.
Hard: 250,000 TS, 230,000 YS, 5 El, 520 Brin.
For springs, dental instruments; hardenable, corrosion resistant.
Spring: 75,000 TS, 156 Brin
For costume jewelry, ornamental parts; brass.

ALMET 430.
M-248, 0.12 max C, 14-18 Cr, bal Fe
Soft: 75,000 TS; 40,000 YS; 15 El, 156 Brin
Hard. 140,000 TS; 130,000 YS; 4 El, 300 Brin.
For screws, rivets, formed parts; corrosion resistant, good formability

ALMET 434
M-248, 0.10 max C, 15-17 Cr, 0.75-1.10 Cu, bal Fe.
Soft 75,000 TS, 40,000 YS; 15 El; 156 Brin.
Hard: 140,000 TS; 130,000 YS; 4 El; 300 Brin.
For sponge wire, corrosion resistant

ALMET 442.
M-248, 0.35 max C, 18-23 Cr, bal Fe
Soft: 100,000 TS; 50,000 YS; 11 El; 156 Brin.
Hard 165,000 TS; 155,000 YS; 1 El; 260 Brin.
For heat resistant parts; corrosion and heat resistant.

ALMET 446.
M-248; 0.35 max C, 23-27 Cr, 0.25 max Ni, bal Fe.
Soft: 110,000 TS; 50,000 YS; 10 El; 156 Brin.
Hard: 175,000 TS; 160,000 YS; 1 El; 260 Brin.
For heat resistant parts; heat and oxidation resistant.

ALMET 1235.
M-248; 0.35 C, 12-14 Cr, bal Fe.
For corrosion resistant wire parts; Type 420 stainless.

ALMET C-20.
M-248; 0.07 max C, 29 Ni, 20 Cr, 3 min Cu, bal Fe.
Rolled: 85,000 TS; 35,000 YS; 35-50 El; 50-70 RA; 150-180 Brin.
For pump and valve parts; corrosion and heat resistant.

ALMINAL A2.
M-1273, M-1274; 0.02 Cu, 0.15 Si, 0.15 Fe, 99.8 min Al.
M-temper: 8000 TS; 30 El.
For structural members; corrosion resistant.

ALMINAL A3
M-1273, M-1274; 0.05 Cu, 0.3 Si, 0.4 Fe, 0.05 Mn, bal Al.
M-temper: 9000 TS; 25 El.
For structural members, corrosion resistant.

ALMINAL A4.
M-1273, M-1274, 0.1 Cu, 0.5 Si, 0.7 Fe, 0.1 Mn, bal Al.
M-temper: 9000 TS, 20 El.
For structural members, corrosion resistant.

ALMINAL C2
M-1273, M-1274; 0.7-2.5 Cu, 9-11 Si, 0.3 Mg, 1 Fe, 0.5 Mn, 1 Ni, 1.2 Zn, 0.2 Ti, bal Al
Sand cast: 18,000 TS
Permanent mold. 20,000 TS.
For pressure tight castings, corrosion resistant

ALMINAL C4.
M-1273, M-1274, 2-4 Cu, 4-6 Si, 0.15 Mg, 0.8 Fe, 0.6 Mn, 0.3 Ni, 0.5 Zn, 0.2 Ti, bal Al.
Sand cast. 20,000 TS; 2 El
Permanent mold: 22,400 TS; 2 El
For general castings, corrosion resistant.

ALMINAL C5
M-1273, M-1274; 0.1 Cu, 3-6 Mg, 0.3 Si, 0.6 Fe, 0.5 Mn, 0.1 Ni, 0.1 Zn, bal Al
Sand cast: 20,000 TS, 3 El
Permanent mold. 24,600 TS; 5 El
For structural members and castings, corrosion resistant.

ALMINAL C6
M-1273, M-1274; 0.1 Cu, 0.1 Mg, 10-13 Si, 0.5 Mn, 0.1 Ni, 0.1 Zn, bal Al
Sand cast: 23,500 TS, 5 El.
Permanent mold: 27,000 TS, 7 El.
For pressure tight castings, corrosion resistant

ALMINAL C7
M-1273, M-1274; 1.0-2.5 Cu, 0.2 Mg, 1.5-3.5 Si, 0.3-1.4 Fe, 0.5-1.7 Ni, 0.1 Mn, bal Al.
Sand cast: 20,000 TS; 2 El.
Permanent mold: 22,400 TS, 2 El.
For structural members and castings, pressure tight castings

ALMINAL C8.
M-1273, M-1274, 0.1 Cu, 0.4 Mg, 0.6 Fe, 4.5-6.0 Si, 0.4 Mn, 0.1 Ni, 0.1 Zn, bal Al
Sand cast: 24,600 TS; 2.5 El
WP-temper: 38,000 TS; 2.5 El
For pressure tight castings; corrosion resistant, good castability.

ALMINAL C9.
M-1273, M-1274; 0.1 Cu, 0.4 Mg, 0.6 Fe, 10-13 Si, 0.4 Mn, 0.1 Ni, 0.1 Zn, bal Al.
Sand cast: 24,600 TS, 1.5 El.
WP-temper: 42,500 TS.
For pressure tight castings; corrosion resistant, good castability

ALMINAL C10.
M-1273, M-1274; 0.1 Cu, 9.5-11 Mg, 0.35 Si, 0.3 Fe, 0.2 Ti, bal Al.
Sand cast: 40,000 TS; 8 El.
Permanent mold: 44,800 TS; 12 El.
For structural castings; corrosion resistant.

ALMINAL C11.
M-1273, M-1274, 4-5 Cu, 0.25 Si, 0.25 Fe, 0.2 T bal Al.
Sand cast: 40,000 TS; 7 El.
Permanent mold: 44,800 TS, 19 El.
For aircraft engine castings; age-hardened.

ALMINAL C12.
M-1273, M-1274; 9.0-10.5 Cu, 0.4 Mg, 2 Si, 0.5-1 Fe, 0.6 Mn, 0.5 Ni, 0.1 Zn, bal Al.
Sand cast: 100 Brin
Permanent mold: 150 Brin
For structural members and castings, age-harden

ALMINAL C13
M-1273, M-1274, 0.5-1.3 Cu, 0.8-1.5 Mg, 11-13 2-3 Ni, 0.8 Fe, 0.5 Mn, bal Al
Sand cast 24,500 TS; 100 Brin
Permanent mold 36,000 TS, 150 Brin.
For pressure tight castings, age-hardened, corros resistant.

ALMINAL C15.
M-1273, M-1274, 1.3-3.0 Cu, 0.5-1.7 Mg, 0.6-2.0 0.8-1.4 Fe, 0.5-2.0 Ni, 0.2 Ti, bal Al
Sand cast 40,400 TS; 100 Brin
Permanent mold 47,100 TS, 150 Brin
For structural members, age-hardened, high temperature uses

ALMINAL W4
M-1273, M-1274, 0.15 Cu, 1.75-2.25 Mg, 0.6 Si, 0.7 Fe, 0.5 Mn, 0.2 Ti, bal Al
M-temper 24,600 TS, 18 El
For structural members, corrosion resistant

ALMINAL W5
M-1273, M-1274, 3-4 Mg, 0.15 Cu, 0.6 Si, 0.7 1 Mn, 0.2 Ti, bal Al
M temper, 31,400 TS, 12,000 YS, 18 El
For structural members; corrosion resistant

ALMINAL W6.
M-1273, M-1274, 0.15 Cu, 4.5-5.5 Mg, 0.6 Si, 0.7 Fe, 1 Mn, 0.2 Ti, bal Al
M-temper: 36,000 TS; 17,000 YS; 18 El
For structural members, corrosion resistant

ALMINAL W7
M-1273, M-1274, 0.15 Cu, 6.5-7.5 Mg, 0.6 Si, 0.7 Fe, 1 Mn, 0.2 Ti, bal Al
M-temper 44,800 TS, 19,000 YS, 18 El
For structural members, corrosion resistant.

ALMINAL W9
M-1273, M-1274, 0.15 Cu, 0.4-0.9 Mg, 0.3-0.7 Si 0.6 Fe, 0.2 Ti, bal Al
M-temper 15,700 TS, 10,000 YS, 15 El
W-temper 19,500 TS, 11,000 YS, 18 El
WP-temper. 27,000 TS; 22,400 YS, 12 El
For structural members, age-hardened

ALMINAL W10
M-1273, M-1274, 0.15 Cu, 0.4-1.5 Mg, 0.75-1.3 0.6 Fe, 1 Mn, 0.2 Ti, bal Al
W-temper 27,000 TS, 15,700 YS, 18 El
WP-temper 40,400 TS; 33,600 YS; 10 El
For structural members; age-hardened

ALMINAL W11
M-1273, M-1274, 1-2 Cu, 0.5-1.25 Mg, 0.75-1.25 0.75 Fe, 1 Mn, 0.3 Ti, bal Al
W-temper: 38,100 TS; 22,400 YS, 15 El
WP-temper. 56,000 TS; 42,600 YS; 6 El.
For structural members, age-hardened

ALMINAL W12.
M-1273, M-1274; 1.8-2.5 Cu, 0.65-1.2 Mg, 0.55-1.2 Si, 0.6-1.2 Fe, 0.6-1.4 Ni, 0.2 Ti, bal Al
WP-temper: 60,500 TS; 47,100 YS; 10 El.
For aircraft engine components; age-hardened, high strength.

ALMINAL W14.
M-1273, M-1274; 3.5-5.0 Cu, 0.4-1.2 Mg, 0.7 Si, 0.7 Fe, 0.4-1.2 Mn, 0.3 Ti, bal Al.
Heat treated: 53,500-56,000 TS; 31,000-33,600 YS; 15-10 El.
For structural members; age-hardened.

ALMINAL W15.
M-1273, M-1274; 3.5-4.8 Cu, 0.6 Mn, 1.5 Si, 1 Fe, 1.2 Mn, 0.3 Ti, bal Al
W-temper 53,500-56,000 TS, 31,400-33,600 YS, 15-10 El
WP-temper: 62,700-67,200 TS, 53,800-58,000 YS; 8-6 El.
For structural members, age-hardened.

ALMINAL W16.
M-1273, M-1274; 3 Cu, 4 Mg, 0.6 Si, 0.6 Fe, 1 Mn, 0.2 Ti, 4.0-8.5 Zn, bal Al.
WP temper. 78,000-85,000 TS, 67,000-74,000 YS, 5-4 El
For structural members, age-hardened, high strength

ALMINAL W-17
M 1273, M-1274; 3.5-4.5 Cu, 1.2 Mg, 0.6 Fe, 0.6 Si, 0.3 Ti, 1.8-2.3 Ni, bal Al
WP-temper 49,300 TS, 8 El
For aircraft engine components, age-hardened, high temperature uses

ALMINAL W18
M 1273, M-1274, 1.8-2.5 Cu, 1.2-1.8 Mg, 0.5-1.3 Si, 0.6-1.2 Fe, 0.6-1.4 Ni, bal Al
WP-temper 53,800 TS, 6 El
For aircraft engine components, age-hardened, high temperature uses.

ALMINAL W150.
M 1273, M-1274; 4.8 Cu, 0.85 Mg, 0.9 Si, 0.3 Ti, 1.2 Mn, bal Al
W-temper 49,000-56,000 TS; 27,000-33,600 YS, 15-12 El
For structural members; age-hardened

ALMINAL W151
M-1274, 0.4 Si, 0.7 Fe, 5-6 Cu, 0.3 Zn, 0.4 Bi, 0.4 Pb, bal Al
Heat Treated 57,000 TS, 47,000 YS, 17 El, 97 Brin
For screw machine products, fasteners, screws, clips
Free-machining Heat treatable

ALMINAL W160
M-1273, M-1274, 1.5 Cu, 2.0-3.5 Mg, 0.5 Si, 0.5 Fe, 4.5-6.5 Zn, 0.3 Ti, 0.8 Mn, bal Al
WP-temper 72,000-78,500 TS; 60,000-67,000 YS, 7-5 El
For structural members, age-hardened

ALMOLD-20.
M-1, 0.30 C, 0.70 Mn, 0.50 Si, 1.70 Cr, 0.40 Mo, bal Fe
For zinc die casting dies and plastic molds
Type P20 tool steel, mold quality.

ALMOS
M-678; 0.08-0.16 C, 0.8-1.2 Cr, 0.15-0.30 Mo, 0.6-0.9 Mn, bal Fe
Annealed: 78,000 TS, 50,000 YS; 25 El.
Hardened: 170,000 TS, 114,000 YS, 8 El
For shafts, gears; case-hardening steel

ALNEON.
M-283; 70-90 Al, 2-3 Cu, 7-22 Zn, 0.4-1.0 other elements. 28,000-48,500 TS; 10,700-17,000 YS; 1-3 El; 100-150 Brin.
For light alloy parts; age-hardening, high endurance limit.

ALNESIUM
U.S.; 3 Mg, bal Al.
For cases, containers; corrosion resistant.

ALNI
M-271; 11-13 Al, 24-26 Ni, 0-0.5 Co, bal Fe.
For magnets, Alnico III.

ALNI.
Russia, 0.10 max C, 24 Ni, 13 Al, 3.5 Cu, bal Fe.
For permanent magnets, high permeability.

ALNICO
M-373, Al-Ni-Co-Fe.
For magnets

ALNICO.
Russia; 0.10 max C, 17 Ni, 10 Al, 12.5 Co, 6 Cu, bal Fe.
For permanent magnets, high permeability

ALNICO 1
M-38, 0.10 C, 22 Ni, 12 Al, 5 Co, bal Fe.
For permanent magnets, cast

ALNICO 1
M-670, 12 Al, 21 Ni, 5 Co, 3 Cu, bal Fe
Cast permanent magnet material
Cast: 7200 Residual Flux Density Br (gauss)
470 Coercive Force, Hc, (oersteds)
1.40 Max. Energy Product, (BH) max (MGO) (MG.Oe)-Megagauss oersteds.

ALNICO 1
M-1076, 12 Al, 21 Ni, 5 Co, 2 Cu, bal Fe
Cast permanent magnet, heat treated
Peak energy product, $(B_d H_d)$ max X 10^6 1.4
Residual Induction, Br, (kilogauss) 7.0
Coercive force Hc (oersteds) 440

ALNICO II
M-38, 0.10 C, 18.5 Ni, 10 Al, 13 Co, bal Fe
For permanent magnets, cast.

ALNICO 2
M-60; 10 Al, 17 Ni, 12.5 Co, 8 Cu, bal Fe.
Isotropic permanent magnet material
Cast 3100 TS; 450 Brin
Sintered. 6500 TS; 430 Brin
For permanent magnets, cast or sintered

ALNICO 2
M-670, 10 Al, 19 Ni, 13 Co, 3 Cu, bal Fe
Cast permanent magnet material
Cast 7500 Br, 560 Hc.; 170 (BH) max (MGO).

ALNICO 2
M-1076; 10 Al, 18 Ni, 13 Co, 4 Cu, bal Fe
Cast permanent magnet, heat treated
Peak energy product $(B_d H_d)$ max X 10^6 1.6
Residual Induction, Br (kilogauss) 7.2
Coercive force Hc (oersteds) 560

ALNICO 2 SINTERED
M-1076, 10 Al, 18 Ni, 13 Co, 4 Cu, bal Fe
Pressed from powder and sintered.
Peak energy product $(B_d H_d)$ max X 10^6 1.45
Residual Induction, Br, (kilogauss) 6.9
Coercive force Hc (oersteds) 520.
Permanent magnet.

ALNICO 3
M-60, 12 Al, 25 Ni, bal Fe.
Isotropic permanent magnet material
Cast: 1200 TS; 450 Brin.
For permanent magnets; hard, brittle.

ALNICO 3.
M-670; 12 Al, 25 Ni, 3 Cu, bal Fe.
Cast permanent magnet material.
Cast: 7000 Br.; 480 Hc; 1.35 (BH) max (MGO).

ALNICO 3.
M-1076; 12 Al, 25 Ni, 2 Cu, bal Fe.
Cast permanent magnet, heat treated.
Peak energy product (B_d H_d max X 10^6 1.35
Residual Induction, Br (kilogauss) 6.9
Coercive force Hc (oersteds) 470.

ALNICO III.
M-38; 12 Al, 25 Ni, 0.04 Si, bal Fe.
For permanent magnets; cast

ALNICO 4.
M-60; 12 Al, 28 Ni, 5 Co, bal Fe.
Isotropic permanent magnet material.
Cast: 9100 TS, 450 Brin.
For permanent magnets

ALNICO 4.
M-670; 12 Al, 27 Ni, 5 Co, bal Fe.
Cast permanent magnet material.
Cast: 5600 Br.; 720 Hc, 1.35 (BH) max (MGO).

ALNICO 4.
M-1076; 12 Al, 27 Ni, 5 Co, 2 Cu, bal Fe
Cast permanent magnet, heat treated.
Peak energy product (B_d H_d) max X 10^6 1.3
Residual Induction, Br (kilogauss) 5.5
Coercive force Hc (oersteds) 700.

ALNICO IV.
M-38; 8 Al, 15 Ni, 24 Co, 3 Cu, 1 Ti, bal Fe.
For permanent magnets; cast

ALNICO 4 SINTERED.
M-1076, 12 Al, 27 Ni, 5 Co, 2 Cu, bal Fe.
Pressed from powder and sintered.
Peak energy product (B_d H_d max X 10^6 1.2
Residual Induction, Br, (kilogauss) 5.2
Coercive force Hc (oersteds) 700.
Permanent magnet.

ALNICO 5.
M-60; 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe
Anisotropic permanent magnet material
Cast. 5400 TS, 500 Brin
Sintered 450 Brin.
Crystal oriented-cast, high energy product.

ALNICO 5.
M-670, 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe
Cast permanent magnet material.
Cast. 12,800 Br., 640 Hc, 5.50 (BH) max (MGO).

ALNICO 5.
M-1076, 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe.
Cast permanent magnet, cooled in magnetic field.
Peak energy product (B_d H_d) max X 10^6 5.25
Residual Induction, Br (kilogauss) 12.5
Coercive force Hc (oersteds) 600.

ALNICO V.
M-38; 8 Al, 14 Ni, 24 Co, bal Fe.
For permanent magnets, cast.

ALNICO 5-7.
M-1076; 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe.
Cast permanent magnet, cooled in magnetic field
Peak energy product B_d H_d) max X 10^6 7.50
Residual Induction Br (kilogauss) 13.4
Coercive force Hc (oersteds) 730.

ALNICO 5 Cb.
M-1192, 8 Al, 14 Ni, 24 Co, Cb, bal Fe.
For permanent magnets; high permeability

ALNICO 5 Col.
M-670; 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe.
Cast permanent magnet material.
Cast: 13,500 Br; 740 Hc.; 7.55 (BH) max (MGO).

ALNICO 5 DG.
M-670; 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe.
Cast permanent magnet material.
Cast: 13,300 Br.; 670 Hc.; 6.50 (BH) max (MGO).

ALNICO 5 SINTERED.
M-1076; 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe.
Pressed from powder and sintered.
Peak energy product (B_d H_d) max X 10^6 3.5
Residual Induction, Br, (kilogauss) 10.5
Coercive force Hc (oersteds) 600.
Cooled in magnetic field, permanent magnet.

ALNICO 6
M-60; 8 Al, 15 Ni, 24 Co, 1.2 Ti, bal Fe.
Anisotropic permanent magnet material.
Cast or sintered.
Cast: 2300 TS, 560 Brin.
High coercive force.

ALNICO 6.
M-670, 8 Al, 16 Ni, 24 Co, 3 Cu, 1 Ti, bal Fe
Cast permanent magnet material.
Cast 10,500 Br., 780 Hc; 3.90 (BH) max (MGO).

ALNICO 6
M-1076; 8 Al, 16 Ni, 24 Co, 3 Cu, 1 Ti, bal Fe
Cast permanent magnet, heat treated
Peak energy product (B_d H_d) max X 10^6 3.5
Residual Induction Br (kilogauss) 10.1
Coercive force Hc (oersteds) 750

ALNICO 6 SINTERED.
M-1076, 8 Al, 16 Ni, 24 Co, 3 Cu, 1 Ti, bal Fe.
Pressed from powder and sintered.
Peak energy product (B_d H_d) max X 10^6 2.76
Residual Induction, Br, (kilogauss) 8.8
Coercive force Hc (oersteds) 800
Cooled in magnetic field; permanent magnet

ALNICO VI
M-38, 15 Ni, 8 Al, 22 Co, bal Fe
Cast 20,000 TS.
For permanent magnets, cast, Br 10,100, Hc 750

ALNICO 7
M-60, 8.5 Al, 18 Ni, 24 Co, 3.25 Cu, 5 Ti, bal Fe
Anisotropic permanent magnet material.
Cast 600 Brin
High coercive force

ALNICO 7
M-670, 8.5 Al, 18 Ni, 24 Co, 3.25 Cu, 5 Ti, bal Fe
Cast permanent magnet material.
Cast 7700 Br, 1050 Hc., 2.85 (BH) max (MGO)

ALNICO 7C.
M-1192, Al-Ni-Co, bal Fe.
For magnetic structures and devices, high coercive strength.

ALNICO 7-5 Oriented
M-1076, 7 Al, 14 Ni, 31 Co, 4 Cu, 5 Ti, bal Fe
Cast permanent magnet, cooled in magnetic field
Peak energy product (B_d H_d) max X 10^6 3.7
Residual Induction Br (kilogauss) 8.57
Coercive force Hc (oersteds) 1040

ALNICO 7-5 Unoriented.
M-1076; 7 Al, 14 Ni, 31 Co, 4 Cu, 5 Ti, bal Fe
Cast permanent magnet, heat treated
Peak energy product (B_d H_d) max X 10^6 2.5
Residual Induction Br (kilogauss) 7.45
Coercive force Hc (oersteds) 890.

ALNICO 8.
M-60; Ni, Co, Al, Cu, Ti, Fe.
Anisotropic permanent magnet material.
Cast or sintered.
High energy product; high coercive force.

ALNICO 8.
M-670; 35 Co, 15 Ni, 4 Cu, 5 Ti, 7 Al, bal Fe.
Cast permanent magnet material.
Cast: 8200 Br.; 1650 Hc.; 5.3 (BH) max (MGO).

ALNICO VIII.
M-31, M-38; 7 Al, 15 Ni, 35 Co, 34 Fe, 4 Cu, 5 Ti.
Permanent magnets for motors, generators, focusing of electron beams, magnetic cores; high resistance to demagnitization.

ALNICO 8B.
M-1076; 7 Al, 15 Ni, 35 Co, 3 Cu, 5 Ti, bal Fe.
Cast permanent magnet, cooled in magnetic field.

Peak energy product (B_d H_d) max X 10^6	5.0
Residual Induction Br (kilogauss)	8.5
Coercive force Hc (oersteds)	1600

ALNICO 8H.
M-1076; 7 Al, 15 Ni, 35 Co, 3 Cu, 5 Ti, bal Fe.
Cast permanent magnet, cooled in magnetic field.

Peak energy product (B_d H_d) max X 10^6	5.0
Residual Induction, Br, (kilogauss)	7.0
Coercive force Hc (oersteds)	1900.

ALNICO 8HE.
M-1076; 7 Al, 15 Ni, 35 Co, 3 Cu, 5 Ti, bal Fe.
Cast permanent magnet, cooled in magnetic field.

Peak energy product (B_d H_d) max X 10^6	6.0
Residual Induction, Br, (kilogauss)	9.3
Coercive force Hc (oersteds)	1550

ALNICO 9.
M-60;
Anisotropic permanent magnet material.
Crystal oriented-cast only.
Highest energy product alnico material, high coercive force

ALNICO 9
M-670, 35 Co, 15 Ni, 5 Ti, 4 Cu, 7 Al, bal Fe
Cast permanent magnet material.
Cast: 10,500 Br, 1500 Hc; 9.0 (BH) max (MGO) (tentative properties).

ALNICO 9
M-1076, 33 Co, 15 Ni, 3 Cu, 5 Ti, 7 Al, bal Fe
Cast permanent magnet, cooled in magnetic field.

Peak energy product (B_d H_d) max X 10^6	10.0
Residual Induction, Br, (kilogauss)	10.5
Coercive force Hc (oersteds)	1600

ALNICO 160
M-1246, Al, Ni, Co.
For permanent magnets, sintered

ALNICO 350
M-Germany; 7.8 Al, 15 Ni, 34 Co, 3.5 Cu, 5 Ti, bal Fe
For electrical and magnetic equipment
Permanent magnet, high permeability.

ALNICO 400
M-Poland; 8 Al, 14 Ni, 24 Co, 3 Cu, 0.5 Ti, bal Fe.
For electrical and magnetic equipment.
Permanent magnet, high permeability.

ALNICUS GR. USM75.
M-1534; 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe
Cast: 5500 TS, 500 Brin
For magnetic chucks, meters, starting devices, electrocardiographs, permanent magnets, oriented

ALNICUS GR. USM65.
M-1534; 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe.
Cast: 5500 TS; 500 Brin.
For magnetic chucks, meters, starting devices, electrocardiographs; permanent magnets, oriented.

ALNIFER
M-926; low C-steel clad with Al on one side and Ni on other side.
For electron tubes.

ALOI.
M-575.
For single plates in textile industry; non-gassing, non-distorting.

ALOYCO 18-8 Mo.
M-1023; 0.2 C, 18 Cr, 8 Ni, 0.2 Mo, bal Fe.
For valves, fittings, corrosion resistant.

ALOYCO 18-8S.
M-1023; 0.07 max C, 0.7 Mn, 19-21 Cr, 8-10 Ni, bal Fe.
For valves, fittings; Type 304; stainless, autenitic.

ALOYCO-20
M-1023; 0.07 max C, 19-21 Cr, 28-30 Ni, 3.5-4.5 Cu, 2.5-3.0 Mo, 1.5 max Si, 0.7 Mn, bal Fe.
Water quenched: 75,000 TS; 35,000 YS; 45 El; 50 RA, 150 Brin.
For valves, castings, chemical equipment; austenitic, to handle H_2SO_4 solutions.

ALOYCO 25-20.
M-1023, C, 25 Cr, 20 Ni, bal Fe.
For valves, fittings; corrosion resistant.

ALOYCO 35
M-1023; 24-26 Cr, 19-21 Ni, 2.75-3.25 Mo, 2.5-3.0 Cu, 0.07 max C, bal Fe.
Water quenched: 75,000 TS; 40,000 YS; 45 El; 45 RA; 160 Brin.
For chemical equipment, to handle hot H_2SO_4 solutions.

ALOYCO 37.
M-1023; 0.07 max C, 20 Ni, 25 Cr, 3 Mo, 2.7 Cu, 3 Si, 0.7 Mn, bal Fe.
Annealed: 70,000 min TS, 40,000 min YS; 30 El; 45 RA; 145 Brin.
For chemical plant equipment; stainless, austenitic castings

ALOYCO N-2
M-1023; 0.07 C, 64 Ni, 28 Mo, 0.6 Mn, bal Fe
Cast: 82,000 TS; 57,000 YS; 9 El, 13 RA; 230 Brin.
For pump parts, valves, acid resistant.

ALOYCO N-3
M-1023, 15.5-17.5 Cr, 16-18 Mo, 3.75-5.25 W, 4.5-7.0 Fe, 0.1 max C, 0.2-0.4 V, 1 max Mn, bal Ni.
Water quenched: 75,000 TS; 45,000 YS, 12 El; 15 RA; 190 Brin
For chemical equipment, corrosion resistant to hot corrosive solutions.

ALOY-NUM
M-549, 4 Si, 2 Cu, bal Al.
For pistons, cylinder heads; age-hardenable.

ALPACCA
Eng; 65.9 Cu, 19.25 Zn, 14.6 Ni, 0.5 Fe.
For base for plated table ware, corrosion resistant.

ALPAKKA (Alpaca).
Eng, 60 Cu, 19 Zn, 15 Ni, 2 Ag.
For base metal for silver plated tableware; resists corrosion.

ALPAX.
M-75; 10-13 Si, 0.2-0.6 Mg, 0.3-0.7 Mn, bal Al.
Sand cast: 24,000 TS; 9,000 YS; 6-8 El; 55 Brin.
Chill cast: 30,500 TS; 12,500 YS; 10-12 El; 65 Brin.
For light corrosion resistant castings; corrosion resistant.

ALPAX
M-106; 10-13 Si, bal Al.
Sand cast, 23,500-26,800 TS; 6,700-7,800 YS; 5-8 El; 45-50 Brin; 4.5 Izod.
For castings of thin sections, hydraulic parts.
Gen. Eng. BS 1490; LM 6-M; BS 4L 33.

ALPAX.
M-137; 10-13 Si, 0.2 max Ti, 0.6 max Fe, 0.5 max Mn, bal Al.
Sand cast: 23,100 TS; 10,000 YS; 5-10 El; 50 RA; 60 Brin.
Permanent mold: 28,000 TS; 12,000 YS; 8-14 El; 60 RA, 65 Brin.
For water pumps, engine parts; corrosion resistant, good castability.

ALPAX.
M-620; 4.5 Cu, 0.5 Mg, 0.4 Ti, bal Al.
36,000-43,000 TS; 29,000-36,000 YS; 2-1 El.
For light alloy parts; age-hardenable.

ALPAX ALPHA.
M-75; 10-13 Si, 0.2-0 6 Mg, 0.3-0.7 Mn, bal Al.
Sand cast· 22,500 TS; 9,000 YS, 2-4 El, 64 Brin.
Chill cast: 3-5 El; 70 Brin.
For light corrosion resistant castings; corrosion resistant.

ALPAX ALPHA
M-137; 10-13 Si, 0 6 Mg, bal Al.
Sand cast· 22,000 TS; 2-4 El, 64 Brin.
Permanent mold: 30,000 TS; 3-5 El, 70 Brin.
For gear cases, instrument housings; corrosion resistant, good castability.

ALPAX "B" (ALPAX BETA).
M-106; 0 2-0.6 Mg, 10-13 Si, 0 3-0.7 Mn, bal Al
Sand cast: 24,600-29,000 TS; 14,500-16,800 YS, 1.5-3 El; 60-70 Brin; 1.5 Izod.
General purpose sand or chill cast aluminum.
Gen. Eng BS 1490: LM 9-P.

ALPAX BETA.
M-75; 10-13 Si, 0 2-0 6 Mg, 0.3-0.7 Mn, bal Al
Sand cast. 24,000 TS, 16,000 YS; 2-3 El; 75 Brin.
Chill cast: 34,000 TS, 20,000 YS, 2-4 El; 85 Brin.
For light corrosion resistant castings; corrosion resistant.

ALPAX BETA
M-137; 10-13 Si, 0 2-0 6 Mg, 0 6 Fe, 0 2 max Ti, bal Al
Sand cast: 26,000 TS; 16,000 YS, 2-3 El, 75 Brin.
Permanent mold: 34,000 TS; 18,000 YS, 2-4 El, 85 Brin.
For gear boxes, housings, general castings; corrosion resistant, good castability.

ALPAX "G" (ALPAX GAMMA)
M-106, 0.2-0 6 Mg, 10-13 Si, 0 3-0 7 Mn, bal Al.
Sand cast 35,000-37,000 TS, 29,000-31,000 YS; 0-2 El; 90-100 Brin; 0 9 Izod.
General purpose sand or chill cast aluminum
Gen Eng. BS 1490: LM 9WP, BS L 75.

ALPAX GAMMA.
M-75; 10-13 Si, 0 2-0.6 Mg, 0.3-0 7 Mn, bal Al
Sand cast: 38,000 TS; 32,000 YS, 1-2 El, 95 Brin
Chill cast: 36,000 TS; 1-3 El; 100 Brin
For light corrosion resistant castings, corrosion resistant

ALPAX GAMMA.
M-137; 10-13 Si, 0 6 Mg, bal Al.
Aged· 36,000 TS; 30,000 YS, 1-2 El; 95 Brin
For engine components, general castings; corrosion resistant, good castability.

ALPAX Hau COBALT.
M-75; 9 3 Si, 0.45 Co, 0.2 Mg, bal Al.
Cast: 48,000 TS; 26,000 YS; 4 El.
For light weight housings, casings, cover plates. Corrosion resistant.

ALFERM.
Japan, 14-16 Al, bal Fe.
For magnetic laminations; high permeability.

ALPHA.
M-1; High C, bal Fe.
For drills.

ALPHA GAMMA.
M-137; 10-13 Si, Mg, bal Al.
For light alloy castings; corrosion resistant.

ALPINE AHD.
M-1314; 0.5 C, 1 Cr, 0.1 V, bal Fe.
For gears, bolts, springs, crankshafts; oil hardened, shock resistant.

ALPINE AHK
M-1314; 0.55 C, 1 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, upsetters; oil hardened.

ALPINE AHKW
M-1314; 0.35 C, 1 Cr, 0 18 V, 1.85 W, bal Fe.
For cold work tools, upsetters, oil hardened.

ALPINE AKL
M-1314, 0 67 C, 1.3 Si, 0 5 Mn, 0.5 Cr, bal Fe.
For riveters, upsetters, springs, tough, oil hardened.

ALPINE ANP3
M-1314; 0 5 C, 1 Cr, 3 25 Ni, bal Fe
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant

ALPINE BEC60
M-1314, 0.15 C, 0 65 Cr, 0.5 Mn, bal Fe
For gears, cams, camshafts, fasteners; case hardened, tough

ALPINE BEC80
M-1314, 0 20 C, 1 25 Mn, 1 15 Cr, bal Fe
For gears, cams, camshafts, fasteners, case hardened, tough.

ALPINE BLH
M-1314, 0 2 C, 1 15 Cr, 1 25 Mn, bal Fe
For gears, cams, camshafts, fasteners; case hardened, tough.

ALPINE BR55
M-1314, 0 56 C, 0 3 Si, 0 55 Mn, bal Fe
Heat treated. 155,000 TS, 110,000 YS; 15 El, 45 RA, 350 Brin
For tools, hammers, shafts, axes, gears, bolts; water hardened.

ALPINE-EC3.
M-1314, 0.13 C, 0 4 Cr, bal Fe.
For gears, bolts, pinions, cams, camshafts
Case hardening, wear resistant

ALPINE ECR15
M-1314; 0 16 C, 1 15 Mn, 0 95 Cr, bal Fe
For gears, bolts, camshafts, shafts, case hardened.

ALPINE ECR20.
M-1314; 0 20 C, 1 25 Mn, 1 15 Cr, bal Fe
For gears, bolts, bearings, camshafts; case hardened.

ALPINE ED.
M-1314; 0.15 C, 0.25 Si, 0.37 Mn, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El, 60 RA, 145 Brin
For gears, shafts, machine tool parts, case hardened

ALPINE EFW.
M-1314, 0.15 C, 0.37 Mn, 0 25 Si, bal Fe.
Annealed. 70,000 TS, 40,000 YS; 25 El; 60 RA; 145 Brin.
For gears, shafts, machine tool parts; case hardened.

ALPINE EJR35.
M-1314; 0.13 C, 0.7 Cr, 3.5 Ni, bal Fe.
For gears, bolts, machine tool parts; case hardening steel, shock resistant.

ALPINE EJR45.
M-1314; 0.13 C, 4.5 Ni, 1.1 Cr, bal Fe.
For gears, bolts, cams, pinions, camshafts; case hardening steel, shock resistant.

ALPINE EJRA.
M-1314; 0.13 C, 0.7 Cr, 2.5 Ni, bal Fe.
For gears, pinions, cams, shafts, camshafts; case hardening steel, shock resistant.

ALPINE EL1.
M-1314, 0.13 C, 1.5 Ni, 0.2 Cr, bal Fe.
For gears, fasteners, crankshafts; case hardening steel, tough.

ALPINE ERJ15.
M-1314; 0.15 C, 1.55 Cr, 1.55 Ni, 0.50 Mn, bal Fe.
For gears, bolts, camshafts, cams; case hardened, shock resistant.

ALPINE ERJ20
M-1314; 0.18 C, 2 Cr, 2 Ni, 0.5 Mn, bal Fe.
For gears, bolts, camshafts; case hardened, shock resistant.

ALPINE ERM15.
M-1314, 0.15 C, Cr, Mo, bal Fe.
For gears, bolts, machine tool parts; case hardened, tough.

ALPINE ERM20.
M-1314; 0.20 C, Cr, Mo, bal Fe
For gears, bolts, machine tool parts; case hardened, tough.

ALPINE EXTRA M.
M-1314; 1.0 C, 0.25 Mn, 0.1 V, bal Fe
For drills, taps, reamers, broaches, Type W2; water hardened

ALPINE EXTRA MH.
M-1314, 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 110,000 TS, 58,000 YS, 19 El, 40 RA; 210 Brin.
For springs, tools, drills, taps, reamers, Type W1; water hardened

ALPINE EXTRA SPEZIAL ZH II
M-1314, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El, 30 RA; 400 Brin
For springs, taps, cutters, drills, Type W1; water hardened

ALPINE EXTRA ZAH.
M-1314, 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated. 175,000 TS; 128,000 YS, 12 El; 37 RA, 355 Brin
For rails, springs, axes, punches, Type W1, water hardened

ALPINE EXTRA ZH I.
M-1314; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS, 53,000 YS, 21 El, 42 RA; 200 Brin.
For drills, taps, cutters, hobs, reamers, Type W1; water hardened.

ALPINE EXTRA ZH II.
M-1314; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For cutters, drills, reamers, taps, hobs; Type W1; water hardened.

ALPINE EZH.
M-27; 0.9-1.0 C, bal Fe.
For tools, lathe and planer cutters; water hardened.

ALPINE FAM.
M-1314; 0.46 C, Mn, bal Fe.
Hot rolled: 98,000 TS; 60,000 YS; 24 El; 45 RA; 212 Brin.
For gears, bolts, machine tool parts; water hardened.

ALPINE FRS.
M-1314; 0.67 C, 1.3 Si, 0.5 Cr, bal Fe.
For punches, crimpers, upsetters; water or oil hardened.

ALPINE HIR15 W/H.
M-1314; 0.28-0.35 C, 0.35 Si, 0.6 Mn, 1.5 Ni, 0.5 Cr, bal Fe
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant.

ALPINE HIR 25.
M-1314, 0.28 C, 0.7 Cr, 2.5 Ni, bal Fe
For gears, bolts, machine tool parts; oil hardened, shock resistant.

ALPINE HIRA 35 W/H
M-1314; 0.22-0.30 C, 0.35 Si, 0.60 Mn, 0.7 Cr, 3.5 Ni, bal Fe
For gears, bolts, machine tool parts; oil hardened, shock resistant.

ALPINE HIRA 45.
M-1314; 0.35 C, 1.3 Cr, 4.5 Ni, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

ALPINE HIRA W/H
M-1314; 0.28-0.35 C, 0.7 Cr, 2.5 Ni, bal Fe
For gears, bolts, machine tool parts; oil hardened, shock resistant

ALPINE HMV15.
M-1314, 0.30 C, 1.35 Mn, 0.25 Si, bal Fe
For punches, crimpers, gears, bolts; oil hardened, tough.

ALPINE HMV25
M-1314, 0.41 C, 0.25 Si, 0.65 Mn, 1.0 Cr, bal Fe
For gears, bolts, machine tool parts; oil hardened, tough.

ALPINE HMV35
M-1314, 0.37 C, 1.25 Si, 1.25 Mn, bal Fe.
For punches, springs, upsetters; oil hardened, tough

ALPINE HMV42.
M-1314, 0.42 C, 0.25 Si, 1.75 Mn, 0.1 V, bal Fe.
For gears, punches, dies, tools; oil hardened, tough

ALPINE HMV50
M-1314, 0.50 C, 1.05 Cr, 0.1 V, 0.95 Mn, bal Fe
For springs, tools, gears, bolts, shafts, oil hardened, shock resistant

ALPINE HMV60
M-1314, 0.58 C, 1.0 Cr, 0.09 V, 0.95 Mn, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant

ALPINE HR10.
M-1314, 0.41 C, 1.0 Cr, 0.65 Mn, bal Fe.
For gears, bolts, shafts, fasteners; oil or water hardened.

ALPINE HRIM15
M-1314; 0.34 C, Cr, Ni, Mo, bal Fe.
For gears, bolts crankshafts; oil hardened, tough.

ALPINE HRIM20
M-1314; 0.30 C, 2 Cr, 0.3 Mo, 2 Ni, bal Fe.
For dies, shafts, crankshafts, upsetters; oil hardened, shock resistant.

ALPINE HRM15.
M-1314; 0.25 C, 1.0 Cr, 0.65 Mn, 0.2 Mo, bal Fe.
For gears, bolts, crankshafts;
oil hardened, tough.

ALPINE HRM35.
M-1314; 0.33 C, 0.65 Mn, 1.0 Cr, 0.2 Mo, bal Fe.
For gears, bolts, crankshafts, fasteners;
oil hardened, tough.

ALPINE HRM40.
M-1314; 0.42 C, 1.0 Cr, 0.2 Mo, 0.65 Mn, bal Fe.
For gears, bolts, crankshafts, fasteners;
oil hardened, tough.

ALPINE HRM45.
M-1314; 0.42 C, Cr, Mo, bal Fe.
For gears, bolts, crankshafts, axles;
oil hardened, tough.

ALPINE HRMV25.
M-1314; 0.30 C, 2.5 Cr, 0.2 Mo, 0.55 Mn,
bal Fe.
For header dies, upsetters, sprockets;
oil hardened, tough.

ALPINE KL3.
M-1314; 1.0 C, 1.55 Cr, 0.35 Mn, bal Fe.
For bearings, cutters, bushings; water or oil
hardened, wear resistant.

ALPINE MA3.
M-1314; 0.60 C, 0.80 Mn, 0.25 Si, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El;
40 RA; 325 Brin.
For hammers, axes, gears, machine tool parts,
water hardened.

ALPINE MA4.
M-1314; 0.45 C, 0.25-0.50 Si, 0.30-0.80 Mn,
bal Fe.
Hot rolled: 98,000 TS; 60,000 YS; 24 El; 45 RA;
215 Brin
For gears, bolts, shafts, fasteners;
water hardened

ALPINE MA5.
M-1314; 0.35 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 53 RA;
185 Brin.
For gears, bolts, shafts, fasteners; water hardened

ALPINE MA6
M-1314; 0.32 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Hot rolled: 83,000 TS; 51,000 YS, 32 El,
55 RA; 180 Brin
For gears, shafts, machine tool parts;
water hardened.

ALPINE MAC
M-1314; 0.41 C, 0.25 Si, 0.65 Mn, 1.0 Cr, bal Fe.
For gears, bolts, crankshafts, machine tool parts;
water hardened.

ALPINE MN13.
M-1314; 1.2 C, 12.5 Mn, 0.4 Si, bal Fe.
For rails, gauges, wear parts; wear and
abrasion resistant.

ALPINE NALH.
M-1314; 0.34 C, 1.4 Cr, 1.1 Al, 0.6 Mn, bal Fe.
For oil refinery equipment; heat and creep resistant.

ALPINE NALJ
M-1314; 0.33 C, 0.5 Mn, 1.1 Al, 1.7 Cr, bal Fe.
For oil refinery equipment; heat and creep resistant.

ALPINE NALM.
M-1314; 0.32 C, 1.1 Cr, 1.1 Al, 0.18 Mo,
bal Fe.
For oil refinery equipment; heat and creep resistant.

ALPINE NALW.
M-1314; 0.27 C, 0.6 Mn, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment, heat and creep resistant.

ALPINE NMV.
M-1314; 0.31 C, 0.18 Mo, 2.35 Cr, 0.13 V,
bal Fe
For gears, bolts, die casting dies,
oil hardened, tough.

ALPINE PRG.
M-1314; 0.90 C, 0.80 Cr, 0.30 Mn, bal Fe
For springs, tools, drills, taps, hammers;
Type Wl, water hardened.

ALPINE PRIMA-H.
M-1314; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For blanking and forming dies; Type Wl;
water hardened.

ALPINE PRIMA ZAH.
M-1314, 0.70 C, 0.25 max Si, 0.25 max Mn,
bal Fe
Heat treated 174,000-122,000 TS,
128,000-82,0000 YS; 12-22 El; 37-52 RA;
352-241 Brin.
For wheels, die blocks, girders, rails;
Type Wl; water hardened

ALPINE RAV
M-1314, 1.15 C, 0.65 Cr, 0.10 V, bal Fe.
For form rolls, blanking dies, bearings, oil hardened,
wear resistant

ALPINE SF
M-1314; 0.65 C, 1.7 Si, 0.70 Mn bal Fe
For springs, chisels, punches, oil hardened,
shock resistant

ALPINE WAM
M-1314; 0.30 C, 1.0 Si, 1.1 Cr, 0.18 V, 3.75
W, bal Fe
For extrusion dies, rams, liners, punches,
oil hardened, hot work steel

ALPINE WAMV
M-1314, 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe
For extrusion dies, rams, liners, punches;
oil hardened, hot work steel

ALPINE WKL3
M-1314; 1.05 C, Cr, bal Fe
For bearings, cutters, liners; water hardened

ALPINE WMC
M-1314; 0.55 C, 0.7 Cr, 0.18 Mo, 1.65 Ni,
0.10 V, bal Fe
For forging and heading dies, oil hardened, tough.

ALPINE WMC5
M-1314, 0.56 C, 0.90 Cr, 0.10 V, 0.20 Mo,
2.0 Ni, bal Fe.
For forging and heading dies, oil hardened, tough

ALPINE WMW
M-1314, 0.30 C, 2.65 Cr, 8.5 W, 0.35 V, bal Fe
For extrusion dies, rams, liners, punches;
oil hardened, hot work steel.

ALPINE WMWS
M-1314; 0.30 C, 2.0 Co, 2.4 Cr, 0.25 V,
8.5 W, bal Fe
For extrusion dies, rams, liners, punches;
oil hardened, non-deforming

ALPLATE
M-671; Al coated steel wire
For screens, electrical resistance heating elements;
corrosion resistant.

ALPRO NO. 4
M-126
For yellow brass fluidizer; contains small
amount of Al.

ALPRO NO. 11.
M-126.
For deoxidizer for Cu.

ALPRO NO. 12.
M-126; 10 P, 90 Cu.
For Cu deoxidizer.

ALPRO NO. 15.
M-126
For Ni degasifying alloy

ALPRO NO. 19 AX.
M-126; 30 Mn, 70 Cu, C-free.
For adding Mn to alloys.

ALPRO NO. 19 AZ
M-126; 30 Mn, 70 Cu, C-free.
For adding Mn to alloys.

ALPRO NO 19 BX.
M-127, 30 Mn, 0 15 max. C, 2.5 Fe, bal Cu
For adding Mn to alloys

ALPRO NO 19 CX.
M-126; 30 Mn. 0.25 max. C, 4 5 max Fe, bal Cu
For adding Mn to alloys

ALPRO NO 30A.
M-126; 50 Cu, 50 Al
For copper hardener for Al alloys

ALPRO NO. 31
M-126, 75 Al, 25 Mn.
For adding Mn to alloys

ALPRO NO. 34.
M-126, 20 Ni, 80 Al.
For hardeners for Ni-Al alloys

ALPRO NO 35.
M-126, 50 Si, 50 Al.
For Si hardener for Al alloys

ALPRO NO. 39
M-126, 10 Fe, 90 Al
For adding Fe in Al alloys

ALPRO NO 40
M-126; 25 Ni, 25 Cu, 50 Al
For hardeners for Ni-Al alloys

ALPRO NO 41.
M-126, 25 Ni, 25 Mn, 50 Al.
For hardeners for Ni-Al alloys

ALPRO NO 42
M-126, 25 Ni, 25 Sn, 50 Al.
For hardeners for Ni-Al alloys

ALPRO NO 44
M-126; 25 Cu, 50 Al, 25 Mn
For adding Mn to alloys

ALPRO NO 46
M-126, 25 Fe, 50 Al, 25 Mn
For adding Mn to alloys.

ALPRO NO 50 B.
M-126; 50 Ni, 50 Cu.
For addition of Ni to bronzes.

ALPRO NO. 55.
M-126; Ni-Cu
For deoxidizer of Cu alloys; red composition densifying alloy.

ALPRO NO 112.
M-126; 15 P, 85 Cu.
For Cu deoxidizer, for copper alloys.

ALPRO NO. 126 A.
M-126; Ni-Cu.
For hardener of Al bronzes.

ALPRO NO. 126 C.
M-126; Ni-Cu.
For hardener of Al bronzes.

ALPRO NO. 126 D.
M-126; Ni-Cu.
For hardener of Al bronzes.

ALPRO NO 139.
M-126; 20 Fe, 80 Al.
For adding Fe to Al alloys

ALPRO NO 140.
M-126; 20 Ni, 40 Cu, 40 Al.

ALPRO NO. 143.
M-126; 40 Ni, 20 Cu, 40 Al.
For hardener for Ni-Al alloys.

ALPRO NO. 146.
M-126; Ni, Cr, Fe.
For gray iron improver; hardener.

ALPRO NO. 157.
M-126; 50 Ni, 50 Fe
For gray iron improver, hardener.

ALPRO NO 158.
M-126; 50 Ni, 50 Mn
For adding Mn to alloys.

ALPRO NO. 159.
M-126, 75 Ni, 25 Cr.
For gray iron improver; hardener.

ALPRO NO 220.
M-126, 10 Al, 90 Cu
For gears, cams, valves, resists abrasion, wear and shock.

ALPRO NO. 221
M-126; 10 Al, 89 Cu, 1 Fe
For ball bearings; resists abrasion, wear and shock.

ALPRO NO 223
M-126; 10 Al, 87 Cu, 3 Fe.
For bearings

ALPRO NO 224
M-126; 10 Al, 86 Cu, 4 Fe
For bearings.

ALPRO NO 300
M-126; 8 Cu, 92 Al.
For general light alloy castings

ALPRO NO. 301.
M-126, Al alloy.
For castings to be forged or die pressed.

ALPRO NO 302
M-126; 10 Cu, 90 Al
For die castings, non-hardenable

ALPRO NO 304
M-126, 2 Si, 8 Cu, bal Al
For castings.

ALPRO NO 306.
M-126; 4 Si, 6 Cu, bal Al
For castings.

ALPRO NO. 307
M-126; Al alloy
For core boxes

ALPRO NO 308.
M-126; Al alloy.
For cast cooking utensils.

ALPRO NO. 309.
M-126; Al alloy
For pistons.

ALPRO NO. 310.
M-126; 7.5-8 5 Cu, 1 5 max Fe + Si, bal Al.
For castings; non-hardenable.

ALPRO NO. 311.
M-126; 9.5-10.5 Cu, 1.5 max Fe + Si, bal Al.
For die castings; non-hardenable.

ALPRO NO. 312.
M-126; 2 Si, 8 Cu, 2 Zn, bal Al.
For castings; non-hardenable.

ALPRO NO. 314.
M-126; 4 Si, 6 Cu, bal Al.
For castings.

ALPRO NO. 315.
M-126; 7.5-8.5 Cu, 1.75-2.25 Zn, 1.75 max Fe + Si, bal Al.
For castings, non-hardenable

ALPRO NO. 316.
M-126; 4 Si, 4 Cu, bal Al.
For castings.

ALPRO NO. 317
M-126; 2 Si, 6 Cu, bal Al.
For castings

ALPRO NO. 320.
M-126; Zn, bal Al.
For light alloy castings.

ALPRO NO. 330
M-126; Al alloy.
For match plates; low degree of top shrinkage.

ALPRO NO. 331.
M-126; Si, bal Al.
For marine castings, resists sea-water corrosion.

ALPRO NO. 332.
M-126; Si, bal Al.
For general utility castings, resists sea-water corrosion.

ALPRO NO. 333.
M-126; Al alloy.
For high pressure castings; tough, dense, strong.

ALPRO NO. 335.
M-126, 4.5-5.5 Si, 0.75 max. Fe, bal Al.
19,000-21,000 TS; 4-3 El; 37 Brin.
For marine parts, castings; corrosion resistant

ALPRO NO 338
M-126; 11.0-13.5 Si, 0.8 max. Fe, bal Al.
25,000-27,500 TS; 7-6 El, 45 Brin.
For die castings, corrosion resistant.

ALPRO NO. 351.
M-126, 5 Si, bal Al
For castings, sand or die cast.

ALPRO NO. 352.
M-126; 12 Si, bal Al
For castings, die cast

ALPRO NO 360
M-126; 2 Ni, 6 Cu, bal Al.
For castings

ALPRO NO 361
M-126; 2 Ni, 6 Cu, 2 Si, bal Al.
For castings.

ALPRO NO 362.
M-126, 4 Ni, 4 Cu, 92 Al
For pistons, light alloy parts

ALPRO NO. 363.
M-126; 2 Ni, 5 Cu, 2 Si, 91 Al
For castings.

ALPRO NO. 364.
M 126, 2 Ni, 4 Cu, 4 Si, 90 Al.
For castings; age-hardened.

ALPRO NO. 365.
M-126; 3 Ni, 5 Cu, 2 Si, 90 Al
For castings, age-hardened.

ALPRO NO. 370.
M-126, 4 Cu, 2 Ni, 1.5 Mg, 92.5 Al.
At 68°F., 29,000 TS. At 482°F, 25,500 TS
For aeronautical parts; similar to "Y" alloy.

ALPRO NO 371.
M-126, 2 Cu, 1.5 Ni, 1 Mg, 0.6 Si, 94.9 Al.
For pistons; similar to "Magnalite."

ALPRO NO 380.
M-126; Cu, Mn, bal Al.
For light alloy parts; modified duralumin type

ALPRO NO. 385
M-126, 6.5 Cu, 1.5 Ni, 0.1 Cr, 0.5 Mg, 0.5 Mn, 90.9 Al
For sand castings, modified Duralumin

ALPROPAT
M-1265, Cu, Si, bal Al
Cast: 27,000 TS, 15,000 YS, 4 El, 60 Brin
For match plates and patterns, low shrinkage

ALRAY A 8
M-248, 20 Cr, 80 Ni
For electrical resistance, heat resistant

ALRAY C
M-248, 15 Cr, 62 Ni, bal Fe
Annealed 95,000-175,000 TS, 35,000 YS, 35-40 El, 60 RA
For heat and corrosion resistant parts; corrosion and heat resistant

ALRAY D
M-248, 35 Cr, 18 Ni, bal Fe
Annealed 75,000-160,000 TS, 35-40 El, 60 RA
For heat resistant parts, corrosion and heat resistant

ALRONZE 619
M-279, 9.5 Al, 4 Fe 86.5 Cu
Aged 152,000 TS, 145,000 YS
For fuses, clips, springs, fasteners, terminals, diaphragms
High strength aluminum bronze

ALRONZE GUM
M-279, 9-10 Al, 3.5-4.5 Fe, bal Cu
Annealed: 85,000-100,000 TS, 45,000-65,000 YS, 30-35 El
Heat Treated 150,000-170,000 TS, 100,000-150,000 YS, 3 El
For fuses, clips springs
Heat treatable, high strength aluminum bronze, corrosion resistant

ALRONZE R 619
M-279, 86 Cu, 9 Al, 4 Fe
Ann. 85,000-100,000 TS, 45,000-75,000 YS, 25-35 El
Cold rolled 97,000-145,000 TS, 110,000-124,000 YS, 2-30 El
Very high strength after brazing, corrosion resistant

ALRONZE STANDARD.
M-279, 9-10 Al, 3.5-4.5 Fe, 0.8 max Zn, 0.01 max Pb, bal Cu
Annealed 85,000-100,000 TS, 45,000-65,000 YS, 30-35 El, Rock B 80-90
Hard Temper 112,000-130,000 TS, 90,000-110,000 YS; 10 El, Rock B 96-101
For fuses, clips, springs, fasteners
High strength aluminum bronze, corrosion resistant.

ALSEX.
M-621; 0.5 Si, 0.5 Mg, bal Al
Heat treated 29,000-42,500 TS; 25,000-35,000 YS; 7-5 El, 90 Brin
For light alloy parts, forgings; conductivity 52% of copper.

ALSIA.
M-672; 20 Si, 1 Cu, 0.7 Fe, bal Al.
Cast: 20,000 TS; 18,000 YS; 1-2 El; 80-90 Brin.
For pistons, same as "Alusil."

ALSICHROM-1 (CA30).
M-1309; 0.05 C, 0.6 Si, 0.35 Mn, 22.0 Cr, 0.5 Co, 5.2 Al, bal Fe.
For heating elements for electric furnaces.
Heat and oxidation resistant.

ALSICHROM-2 (CAF).
M-1309; 0.10 C, 0,8 Si, 0.3 Mn, 21.0 Cr, 4.6 Al, 0.5 Co, bal Fe
For heating elements for electric furnaces
Heat and oxidation resistant

ALSIFONT 5C
M-1176; 4 Cu, 5.5 Si, bal Al
Heat treated. 28,000-32,000 TS, 20,000-23,000 YS; 4-1.5 El; 55-75 Brin.
For light alloy parts, heat treatable

ALSILOY S-1.
M-158, 11.5-12.0 Si, 2 max Fe, 0.6 max Cu, bal Al.
Die cast 42,000 TS, 19,000 YS, 3.5 El, 80 Brin.
For die castings, corrosion resistant, good castability

ALSILOY S-5
M-158, 4-6 Si, 0.6 max Cu, 2 max Fe, bal Al
Die cast 30,000 TS; 16,000 YS, 9 El, 70 Brin.
For die castings, corrosion resistant, good castability

ALSIPLATE
M-926, Ag clad to 2S aluminum alloy
For electrical contacts, Al alloys plated by lamination with silver

ALSOCO M-1001
M-1158, Zn-Sn-Pb.
For aluminum solder, M.P. 728°F.

ALSOCO M-1002
M-1158, Zn-Sn-Pb
For aluminum solder, M.P. 680°F

ALSOCO M-1003
M-1158
For aluminum solder

ALTAM
M-109, 68-88 Ti, 11 Al, 1.25 Fe, 1.18 Si, bal TiO_2
For making ductile titanium

ALT BLITZ
M-1312, 0.79 C, 4.7 Co, 4.3 Cr, 0.7 Mo, 1.5 V, 18 W, bal Fe
For lathe and planer tools, hobs, reamers, taps; high speed steel

ALTEMP 19-9DL
M-1, 0.28-0.35 C, 18-20 Cr, 8-11 Ni, 1.0-1.7 Mo, 1.0-1.7 W, 0.4 Cb, 0.5 max Ti, bal Fe
Hot rolled 118,000 TS, 69,000 YS; 58 El; 55 RA, 216 Brin
Heat treated. 103,000 TS; 43,000 YS; 54 El; 57 RA; 189 Brin
For jet engine and gas turbine components, austenitic, heat resistant

ALTEMP 19-9DX.
M-1, 0.28-0.35 C, 18-20 Cr, 8-11 Ni, 1.2-2.0 Mo, 1.0-1.7 W, 0.6 Ti, 0.5 max Cu, bal Fe.
Hot rolled: 118,500 TS; 69,000 YS, 58 El; 55 RA; 216 Brin.
Heat treated 103,000 TS; 43,000 YS, 54 El; 57 RA, 189 Brin.
For jet engine and gas turbine components; austenitic, heat resistant.

ALTEMP A-286.
M-1; 0.08 max C, 15 Cr, 26 Ni, 1.2 Mo, 2 Ti, 0.3 V, 0.35 max Al, bal Fe.
Bar: 135,000-160,000 TS, 85,000-115,000 YS; 20-3.0 El; 30-55 RA.
At 1000°F: 131,000 TS; 87,500 YS; 18.5 El; 31.2 RA
At 1500°F: 36,500 TS; 68.5 El; 37.5 RA.
For turbine blades, bolting, jet and super-charger parts, austenitic, heat resistant.

ALTEMP D979
M-1; Fe, Cr, Mo, W, Ti, V, bal Ni
For high temperature applications, heat resistant.

ALTEMP-L605.
M-1; 0.15 C, 1.5 Mn, 20.0 Cr, 10.0 Ni, 15.0 W, bal Co
Annealed: 150,000 TS, 70,000 YS; 50% El, Rock C 23
At 1500°F 50,000 TS; 35,000 YS, 17 El
Uses: jet engine and gas turbine parts, afterburners, exhaust cone assemblies, valves, springs, buckets
High temperature alloy High mechanical, properties to 1800°F Heat and oxidation resistant

ALTEMP M-252
M-1; 0.15 C, 19 Cr, 10 Co, 10 Mo, 2.5 Ti, 0.8 Al, 5 max Fe, bal Ni
At 70°F: 193,000 TS
At 1000°F: 155,000 TS, 93,000 YS.
At 1400°F 122,000 TS, 80,000 YS
For jet engine and gas turbine buckets, heat and oxidation resistant.

ALTEMP S-590
M-1, 0.38-0.47 C, 20 Cr, 20 Ni, 20 Co, 4 Mo, 4 W, 4 Cb, bal Fe
Rolled 152,000 TS, 80,000 YS; 19 El, 25 RA.
Heat treated 140,000 TS, 42,000 YS, 20 El; 19 RA
At 1400°F 61,500 TS, 50,000 YS, 26.6 El; 34.8 RA
For supercharger and jet engine parts, turbine blades, age-hardenable, corrosion and heat resistant

ALTEMP S-816
M-1, 0.32-0.42 C, 20 Cr, 20 Ni, 42 Co, 4 W, 4 Mo, 4 Cb, 1.2 Mn, 5 max Fe
Heat treated 140,000 TS, 67,000 YS, 31 El, 31 RA, 269 Brin
At 1000°F 121,000 TS; 46,000 YS, 27 El, 23 RA.
At 1500°F 73,000 TS, 40,500 YS, 23 El, 24 RA
For jet engine and supercharger parts, turbine blades, age-hardenable, heat resistant.

ALTEMP V-36
M-1, 0.27 C, 24 Cr, 19 Ni, 4 Mo, 1.7 Cb, 2.3 W, 1.8 Fe, bal Co
For supercharger and jet engine components; heat resistant

ALTEN NO 11
M-1040, 1.7 Si, 0.5 Mn, 3.5 T.C., 2.7 Gr., 0.07 Cr, 0.03 Mo, bal Fe
For castings, gears, housings, cast iron.

ALTEN NO 15.
M-1040, 1.8 Si, 0.6 Mn, 3.5 T.C., 3.1 Gr., 1.4 Cr, 0.16 Ni, 0.6 Mo, 0.08 V, 0.04 Cu, bal Fe.
For castings, gears, housings; cast iron

ALTEN NO 18.
M-1040, 1.8 Si, 0.5 Mn, 3.7 T.C., 3 Gr., 1 Cr, 0.18 Ni, 0.04 Mo, 0.09 V, bal Fe.
For castings, stokers, grate bars; cast iron.

ALTEN TYPE 30.
M-1040, 3.3 C, 2.2 Si, 0.8 Mn, 0.2 max Ni, 0.1 max Cr, 0.1 max Mo, bal Fe.

Cast: 30,000 TS; 170-223 Brin.
For valve components, machinery castings;
cast iron; Tr.S. 2200; SAE 111.

ALTEN TYPE 35 HR.
M-1040; 3.4 C, 2 Si, 0.8 Mn, 1 Ni, 0.10 max Cr,
0.4 Mo, bal Fe.
Cast: 35,000 TS; 190-210 Brin.
For glass molds, stop cocks, heat resistant parts;
cast iron, heat resistant.

ALTENTYPE 45 HR.
M-1040; 3.4 C, 1.9 Si, 0.8 Mn, 1.2 Cr, 0.3 Mo,
0.2 max Ni, bal Fe.
Cast: 50,000 TS; 300-330 Brin.
For furnace parts, heat resistant parts;
cast iron, heat resistant.

ALTEN TYPE 45 WR
M-1040; 3.1 C, 2 Si, 0.7 Mn, 0.5 min Ni,
0.3 min Cr, 0.25 min Mo, bal Fe.
Cast: 45,000 TS; 205-230 Brin.
For valves, pressure castings, wear resistant parts;
cast iron, wear resistant; SAE 122.

ALTEN TYPE 50WR.
M-1040; 3.2 T.C., 0.7 C.C., 1.8 Si, 0.7 Mn,
0.2 Ni, 0.5 Cr, 0.5 Mo, 0.09 Cu, bal Fe.
Cast: 50,000 TS; 215 Brin
For valves, wear plates, superheaters,
wear and corrosion resistant; C.I.

ALTIOR BRAND ALUMINUM SOLDER.
M-577; Pb, bal Sn
Al solder

ALTIOR BRAND ANTIFRICTION METAL
M-577; Pb, Sb, bal Sn.
For bearings; white antifriction metal.

ALTMAG.
Russian; 5-8 Mg, 0.5-1.0 Mn, 0.1-0.5 Ti, bal Al.
For light alloy parts; age-hardenable.

ALTO.
M-15; C, alloy, bal Fe
Rolled: 151,000 TS; 98,000 YS, 51 El;
50 RA; 220 Brin.
Heat treated: 271,000 TS, 220,000 YS;
16 El; 49 RA; 555 Brin.
For axes, axles, drills, chisels, crowbars;
non-tempering, shock resistant, water hardened

ALTOLOY A.
M-15; C, alloy, bal Fe.
For pneumatic tools, chisels; shock resistant,
non-tempering, water hardening.

ALTOLOY B.
M-15; C, alloy, bal Fe.
For pneumatic tools, chisels; tough, oil hardening

ALUAL.
M-551; 99.9 Al.
For wire, strip; Al-products.

ALUCABLE.
M-673; 0.55 Si, 0.4 Mg, bal Al.
For light alloy parts; non-hardenable.

ALUCHROM O.
M-297, 30 Cr, 5 Al, bal Fe.
Annealed: 99,500-106,000 TS; 25 El.
For heat resistant parts, max operating
temp. 1300°C.

ALUCHROM I.
M-297; 22 Cr, 5 Al, bal Fe.
Annealed: 92,400-99,500 TS; 30-25 El.
For heat resistant parts; max operating
temp. 1250°C.

ALUCHROM II.
M-297; 8 Cr, 6 Al, bal Fe.
Annealed: 85,200-88,500 TS; 30-25 El.
For heat resistant parts;
max operating temp. 1100°C.

ALUDUR.
M-284; 0.5 Mg, 0.7 Si, 0.45 Fe, bal Al.
Heat treated: 50,000 TS, 6 El; 90 Brin.
For overhead transmission lines; self-aging alloy;
high corrosion resistant.

ALUDUR 275.
M-1376; 1.5-3.0 Mg, 0.5-1.5 Mn, 0.3 max Cr, bal Al.
For aircraft structural parts.

ALUDUR 300.
M-1376, 2-4 Mg, 0.4 max Mn, 0.4 max Cr, bal Al.
For aircraft structural parts.

ALUDUR 500
M-1376, 4-5 Mg, 0.8 max Mn, 0.3 max Cr,
bal Al.
Soft 42,000 TS, 22,000 YS; 35 El, 65 Brin.
Hard: 60,000 TS; 50,000 YS; 15 El; 100 Brin
For aircraft structures, light alloy parts;
corrosion resistant.

ALUDUR-533
M-1548, 0.3-1.0 Si, 0.3-0.8 Mn, 0.5-1.3 Mg, bal Al.
Soft 16,000-18,500 TS, 8,500-11,300 YS;
20-27 El; 30-40 Brin.
For structural fittings, hardware, aircraft
components Age-hardenable

ALUDUR NO. 533D
M-284, 0.8 Mg, 0.7 Si, bal Al.
Heat treated 45,000-50,000 TS; 10-8 El,
90-100 Brin
For overhead transmission lines, corrosion resistant

ALUDUR 570
M-1376, 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al
For light alloy parts, age hardenable

ALUDUR-570
M-1548, 3.5-5.5 Cu, 0.3-0.6 Si, 0.3-1.0 Mn,
0.3-0.7 Mg, bal Al
Annealed. 26,000 TS, 10,000 YS, 22 El; 45 Brin
Hardened 60,000 TS, 40,000 YS, 20 El, 105 Brin.
For construction and transportation equipment,
fittings, screw machine products
High strength, age-hardenable

ALUDUR NO 570D.
M-284, 0.8 Mg, 1.0 Si, bal Al
Heat treated 60,000 TS, 17 El, 90-100 Brin.
For overhead transmission lines, corrosion
resistant; self-aging alloy

ALUDUR-580.
M-1548, 3.5-5.5 Cu, 0.3-0.6 Si, 0.3-1.0 Mn,
0.3-0.7 Mg, bal Al
Annealed. 26,000 TS, 10,000 YS; 22 El; 45 Brin.
Hardened· 62,000 TS, 40,000 YS, 20 El, 105 Brin.
For construction and transportation equipment,
fittings, hardware, screw machine products,
fasteners.
High strength, age-hardenable.

ALUDUR 580
M-1376; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
For light alloy parts; age hardenable.

ALUDUR-630
M-1548; 3.5-5.5 Cu, 0.3-0.6 Si, 0.3-1.0 Mn,
0.3-0.7 Mg, bal Al.
Annealed· 26,000 TS; 10,000 YS; 22 El; 45 Brin.
Age-Hardened: 60,000 TS; 40,000 YS; 20 El;
105 Brin.
For fittings, hardware, screw machined
products, fasteners.
Age-hardenable, high strength.

ALUDUR 630/OM.
M-1376; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
For light alloy parts; age hardenable.

ALUDUR 700.
M-1376; 5.5-7.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al.
For light alloy parts, corrosion resistant.

ALUFER.
German: Al alloy.
For light alloy parts; non-hardenable.

ALUFLEX.
M-1444; 0.75 Mg, bal Al.
For electric conductors, electrical wires, and cable for braiding.
High electrical conductivity.

ALUFONT II.
M-249; 4 Cu, 2.0 Si, 0.6 Mn, 0.2 Mg, 0.15 Ti, bal Al
Heat treated: 33,000-55,000 TS; 27,000-45,000 YS
For castings where high strength, but no high corrosion resistance is required; high fluidity.

ALUFONT-II.
M-1548, 3.7-4.3 Cu, 2.0 Si, 0.5-0.7 Mn, 0.2 Mg, bal Al
Cast: 21,000 TS; 14,000 YS, 2.5 El; 55 Brin.
For manifold and valve bodies, machine frames, oil pans.
Good castability and machinability

ALUFONT 3
M-249, M-1605, M-1634, 4-5 Cu, 0.2-0.5 Ti, bal Al.
Sand cast: 41,000 TS; 28,000 YS; 6 El, 85 Brin.
Chill cast. 53,000 TS, 37,000 YS, 6 El, 100 Brin
For auto and aircraft construction; heat treatable

ALUFONT "H"
M-249, <0.4 Si, 1.4 Fe, 0.15 Mg, 2.0 Cu, 12 Zn, bal Al
Sand cast: 43,000 TS, 36,000 YS; 0.5 El
Chill cast: 44,000 TS, 42,000 YS, 1.5 El
For large castings for general purposes, corrosion resisting

ALUFONT "W"
M-249, 2.0 Si, 0.6 Fe, 0.5 Mn, 2.0 Cu, 12 Zn, bal Al.
Sand cast: 35,000 TS, 20,000 YS, 3.5 El
Chill cast: 40,000 TS, 35,000 YS; 3.5 El
For large castings, light alloy parts

ALUGIR
M-674, 3 Cu, 0.8 Mg, 1.2 Ni, bal Al.
57,000-64,000 TS, 16-22 El.
For light alloy parts, heat treatable

ALUMA
M-622, 1.5 Mn, bal Al.
14,500-18,500 TS, 7,000-9,000 YS; 40-30 El.
For light alloy parts, corrosion resistant.

ALUMAG
French; 4.5 Mg, 95.5 Al
For light alloy parts; superseded by "Duralinox"

ALUMAG 15
M-770, 1.5 Mg, 0.4 Mn, bal Al.
Annealed: 23,000 TS; 10,000 YS, 20 El; 32 Brin.
Hardened: 40,000 TS; 35,000 YS; 55 Brin
For light alloy parts; corrosion resistant.

ALUMAG 25.
M-770; 2.5 Mg, 0.4 Mn, bal Al.
Soft: 43,000 TS; 14,000 YS; 22 El; 40 Brin.
Hard: 60,000 TS; 39,000 YS; 67 Brin
For light alloy parts; corrosion resistant.

ALUMAG 35.
M-770; 3.5 Mg, 0.4 Mn, bal Al.
Soft: 36,000 TS; 17,000 YS; 25 El; 47 Brin.
Hard: 55,000 TS; 46,000 YS; 78 Brin.
For light alloy parts; corrosion resistant.

ALUAG 50.
M-770; 5 Mg, 0.4 Mn, bal Al.
Soft: 43,000 TS; 22,000 YS; 25 El; 53 Brin.
Hard: 64,000 TS; 54,000 YS; 95 Brin.
For light alloy parts; corrosion resistant.

ALUMAG 65.
M-770; 6.5 Mg, 0.4 Mn, bal Al.
Soft: 49,000 TS; 27,000 YS; 27 El.
Hard: 69,000 TS; 57,000 YS.
For high temperature applications; high temp. properties.

ALUMAG GRADE 1.
M-675; 4-5 Mg, bal Al.
For light alloy parts; high resistance to corrosion.

ALUMAG GRADE 2.
M-675, 8-10 Mg, bal Al.
For light alloy parts; high resistance to corrosion.

ALUMAGNESE 10
M-1444; Cu, Mg, Si, Fe, Mn, Ti, bal Al.
For light alloy parts; suitable for welding.

ALUMAGNESE 20
M-1275, 0.15 Cu, 1.75-2.25 Mg, 0.6 Si, 0.75 Fe, 0.5 Mn, 0.2 Ti, bal Al
M-temper. 24,600 TS; 18 El.
For structural members; corrosion resistant.

ALUMAGNESE 20
M-1444, 0.15 Cu, 1.75-2.75 Mg, 0.6 Si, 0.75 Fe, 0.5 Mn, 0.2 Ti, bal Al.
M-temper: 29,200 TS, 23 El.
For light alloy parts; corrosion resistant.

ALUMAGNESE 35
M-1275; 0.15 Cu, 3-4 Mg, 0.6 Si, 0.75 Fe, 1 Mn, 0.2 Ti, bal Al
M-temper: 31,400 TS, 11,200-13,500 YS; 18 El.
For structural members; corrosion resistant.

ALUMAGNESE 35
M-1444; 0.15 Cu, 3-4 Mg, 0.75 Fe, 0.6 Si, 1 Mn, 0.2 Ti, bal Al
M-temper. 36,000 TS; 18,000 YS; 23 El.
For light alloy parts; corrosion resistant.

ALUMAGNESE 50.
M-1275, 0.15 Cu, 4.5-5.5 Mg, 0.6 Si, 0.75 Fe, 1 Mn, 0.2 Ti, bal Al
M-temper: 36,000 TS; 15,700-18,000 YS; 16 El.
For structural members; corrosion resistant

ALUMAGNESE 50.
M-1444, 0.15 Cu, 4.5-5.5 Mg, 0.6 Si, 0.75 Fe, 1 Mn, 0.2 Ti, bal Al
M-temper: 42,600 TS, 27,000 YS; 21 El.
For light alloy parts; corrosion resistant.

ALUMALUN.
M-250; Al, Si alloy plus abrasive grains imbedded in wearing surface
For floor plates, stair treads, car steps; wear resistant; anti-slip.

ALUMAN.
M-249; M-624, M-493; 1.5 Mn, 0.25 max Si, 0.25 max Fe, 0.1 max Cu, bal Al.
Soft: 15,000 TS; 7000 YS; 30 El; 30 Brin.
Hard: 36,000 TS; 29,000 YS; 7 El; 50 Brin.
Extruded: 17,000 TS; 10,000 YS; 24 El; 35 Brin.
For panelling, roofing, containers, welded structurres; corrosion resistant, non-hardenable.

ALUMAN (AW15).
M-1548; 1.4-1.6 Mn, bal Al.
Soft: 17,000 TS; 7,000 YS; 35 El; 30 Brin.
Hard: 32,000 TS; 30,000 YS; 4 El; 60 Brin.
For heat exchangers, truck panels, tanks, reflectors, ducts.
Hardened by cold work only.

ALUMAN-30.
M-624, M-541; 1.0-1.5 Mn, 0.1 max Cu, 0.5 max Fe, 0.5 max Si, 0.05 max Ti, bal Al.
Annealed: 11,400-18,500 TS; 5,700-10,000 YS; 25-45 El; 25-35 Brin.
Hard: 27,000-35,600 TS; 24,200-35,600 YS; 3-8 El; 50-65 Brin.
For cooking utesils, heat exchangers, storage tanks, plumbing fixtures

ALUMAR 4043 etc. (15 alloys).
M-677; Aluminum Association Type 4043 and 15 other AA Type compositions.
Bare aluminum welding wire;-for welding similar aluminum alloys.

ALUMASOD
M-676; 76 Sn, 23 Zn, 1 Cd.
For Al solder.

ALUMAWELD.
M-393; Sn, Zn, Pb, and chemical catalyzer.
12,000 TS.
For soldering of all metals, especially Al and white metals.

ALUMAWELD ALL METAL SOLDER
M-393, Sn, Zn, Pb
For soldering Al and Mg alloys, M.P. 550°F, no flux required for Mg.

ALUMAWELD NO 1.
M-393
For solder for Al and Mg alloys; M.P. 364-620°F.

ALUMAWELD NO 2
M-393
For solder for Al and Mg foil capacitors, M.P 393-563°F.

ALUMAWELD H-3.
M-393.
For solder for Al, Mg, foil capacitors, M.P. 510-650°F.

ALUMAWELD H-6.
M-393.
For solder for Al and other metals; M.P 775-785°F, hard and strong.

ALUMAWELD NO. 7.
M-393.
For solder for Al-bronze, Mg, and cast iron, M.P. 333-620°F.

ALUMAWELD H-8.
M-393.
For solder for Al and other metals, M.P. 715-740°F; good for friction soldering.

ALUMAWELD NO. 22.
M-393
For solder for Al, Mg, foil capacitors; M.P. 393-635°F.

ALUMAWELD NO 23.
M-393.
For solder for Al, Mg, foil capacitors, M.P 336-414°F; good wetting power.

ALUMAWELD SPECIAL.
M-393; Sn, Zn, Pb.
For soldering Al and Mg alloys; M.P. 550°F.

ALUMBRO.
M-188, M-282; 76 Cu, 22 Zn, 2 Al.
Drawn: 88,000 TS; 67,000 YS; 10 El; 175 Brin.
Annealed: 54,000 TS; 50 El; 65 Brin.
For condenser tubing to resist sea water corrosion, plates; high resistance to corrosion.

ALUMEL.
M-65; 95 Ni, 2 Mn, 2 Al (plus 8 minor constituents).
Ann: 85,000 TS.
EMF: Negative.
Thermocouple wire,-used with Chromel P for temperature measurement to 2400°F.
Corrosion and heat resistant.

ALUMEND 1100.
M-677, 1.0 max Si + Fe, 0.2 max Cu, 99.0 min Al
For coated aluminum welding rod

ALUMEND 4043.
M-677; 4.5-6.0 Si, 0.8 max Fe, 0.3 max Cu, 0.2 max Ti, 0.1 max Zn, 0.05 max Mn, 0.05 max Mg, bal Al.
For coated aluminum welding rod

ALUMETAL.
M-597; 5 Si, bal Al
For Al solder; corrosion resistant.

ALUMINARK
M-118; 5 Si, bal Al.
For Al welding electrodes; coated

ALUMINITE
U.S., 73 Al, 23 Zn, 2.7 Cu, 0.4 Fe, 0.2 Si
For light alloy castings; non-hardenable

ALUMINUM CD1S
M-4, 99.6 min Al
O-temper 10,000 TS, 43 El, 19 Brin
H 14-temper: 14,000 TS, 12 El, 26 Brin
H 18-temper 19,000 TS, 18,000 YS, 6 El; 35 Brin
For pressure vessels, chemical plant equipment, corrosion resistant, good formability

ALUMINUM KO-1.
4.5-5.2 Cu, 0.4-1.0 Ag, 0.18-0.35 Mg, 0.15-0.35 Ti, 0.4 max Mn, 0.4 max Zn, bal Al.
Cast 62,000-66,000 YS, 72,300-73,000 TS, 10-11 El
At 350°F. 60,000 TS, 57,00 YS, 11 El.
At 500°F. 46,000 TS, 44,000 YS; 13 El.
Heat treated 65,000 TS, 55,000 YS, 3 El.
For impellers, throttle levers, fins
Age hardenable

ALUMINUM No 2EC.
M-4, 0.3-0.6 Si, 0.4-0.8 Mg, 0.3 max Fe, 0.05 max Cu, 0.01 max Mn, 0.05 max Zn, bal Al.
Annealed: 17,000 TS, 7500 YS, 35 El; 30 Brin
T6 Temper 29,000 TS, 25,000 YS
T61 Temper: 15,000-20,000 TS; 8000-15,000 YS.
T62 Temper. 27,000 TS, 22,000 YS
For electrical buses.
High strength and electrical conductivity.
Age hardenable. Corrosion resistant.

ALUMINUM 2EC.
M-1147, 99.45 min Al
T8-temper: 28,000 TS, 25,000 YS
For busways, conductors, 57% conductivity

ALUMINUM 3L-8.
M-86, M-28, 11-13 Si, bal Al.
Die cast. 24,500 TS; 15,500 YS; 1 El, 80 Brin.
Sand cast: 20,000 TS; 1 El; 75 Brin.
For housings, cases, general engineering castings; corrosion resistant, good castability.

ALUMINUM 4L-11.
M-28; 7 Cu, 0-2 Sn, 0-1 Zn, bal Al.
Sand cast: 17,000-20,000 TS; 12,000-14,500 YS; 2.5-1.5 El; 60-70 Brin.
For auto parts, general purpose castings; not hardenable.

ALUMINUM AS-5.
M-1219, M-1220, M-541; 0.6-0.9 Cu, 4.5-5.5 Si, 0.5 Mg, bal Al.
Cast: 35,600-45,600 TS; 25,600-29,900 YS; 4-5 El, 90-100 Brin.
For instrument housings, oil pans, crankcases, high fluidity and corrosion resistant.

ALUMINUM ALLOY BRITISH L-5.
M-92, 85 Al, 13-15 Zn, 2.5-3.0 Cu, traces Fe, Si
Sand cast: 24,500 TS, 3 El, 80 Brin.
For light alloy, parts, regular and intricate castings, sand castings.

ALUMINUM-G8A
M-158, M-4, M-671; 0.44 Si, 0.14 Cu, 1.72 Fe, 8.80 Mg, 0.02 Mn, 0.01 Ni, bal Al.
As Cast: 47,900 TS; 28,500 YS; 4.2 El
For die castings, instrument cases, housings
Corrosion resistant.

ALUMINUM ALLOY BRITISH L-8.
M-92; 89 Al, 10 Cu, 1 Sn.
20,000 TS,
For light alloys, parts; non-hardenable.

ALUMINUM L8N
M-1219, M-541, 11.0-12.5 Cu, 0.7 Fe, 0.5 Ni, bal Al
Cast: 38,400-42,700 TS; 22,800-25,600 YS; 1-2 El; 110-125 Brin
For light alloy castings, general purpose

ALUMINUM L8T
M-1219, M 541, 11.0 12.5 Cu, 1 Fe, 0.5 Si, 0.2 Ti, bal Al
Cast 38,400 42 700 TS; 22,800-25,600 YS, 1-1.5 El, 110-125 Brin
For light alloy castings; general purpose

ALUMINUM AS-10
M-1219, M-1220, M-541, 2.2 Cu, 10 Si, 1.4 Mg, 1 Ni, bal Al
Cast 32,700-35,600 TS, 27,000-32,700 YS; 0.5-0.7 El, 100 120 Brin
For pistons; high temperature resistance

ALUMINUM LAC 10.
M-28, 9.8 Cu, 0.25 Mg, 0.7 Fe, bal Al
Sand cast: 18,000 TS, 13,500 YS, 75 Brin.
WP-temper 31,400 TS, 25,400 YS, 120 Brin.
For general castings; age-hardened

ALUMINIUM H10
England, 0.07 Cu, 0.20 Fe, 0.58 Mn, 0.61 Mg, 0.94 Si, Ti, bal Al

ALUMINUM HD-11.
M-1389, Al alloy.
For impact extrusions; ductile.

ALUMINUM LM11.
M-England, 4.2-5.0 Cu, 0.15-0.35 Mg, 0.5 max Fe, 0.3 max Si, 0.3 max Ti, 0.1 max Zn, bal Al.
Chill cast. 40,000 TS, 9 El.
For pressure die castings, cases, housings
Heat treatable.

ALUMINUM-S-12A
M-158; 11.76 Si, 0.53 Cu, 0.81 Fe, 0.01 Mg, 0.19 C, Mn, 0.04 Ni, bal Al.
As Cast: 39,200 TS; 21,300 YS; 3.5 El
For die castings, instrument cases, housings.
High corrosion resistant, pressure tight

ALUMINUM-A13.
M-671; M-4; 1.0 Cu, 12 Si, bal Al.
Die Cast: 35,000 TS; 16,000 YS; 3.7 El; 80 Brin.
For general purpose high strength castings, typewriter frames, outboard motor pistons, dental equipment.
Excellent castability, pressure tight.

ALUMINIUM AW-15.
M-493; 1.5 Mn, bal Al.
Hard worked: 37,000 TS; 3 El; 59 Brin.
Annealed: 17,000 TS, 27 El; 32 Brin.
For deep drawing, stamping and pressing; weldable, corrosion resistant.

ALUMINIUM L-15.
Eng; 2-4 Mg, 1.2-1.5 Mn, 0-0.2 Sb or Ti, bal Al
For light alloy castings, resists sea water corrosion

ALUMINUM NO 16.
M-514; 4.5-5.5 Ni, 1.0 max Si, bal Al.
Die cast: 37,000 TS; 21,000 YS, 4.5 El, 80 Brin.
For die castings, stove burner heads; heat resistant.

ALUMINUM-D16T.
M-Russia, 4.4-4.52 Cu, 1.6 Mg, 0.7 Mn, 0.38 Fe, 0.26 Si, 0.01 Ni, 0.2 Zn, 0.03 Ti, bal Al.
Ht Tr: 70,000 TS; 56,000 YS; 130 Brin.
For aircraft structures, fittings, hardware, fasteners.
Heat treatable, high strength

ALUMINUM ECH17
M-4, 99.45 min Al
17,000 TS; 15,000 YS
For bus bars, special parts, 61% electrical cond

ALUMINUM DTD-25
England, 5 Si, bal Al
For instrument housings, gear cases, general castings; corrosion resistant.

ALUMINUM HS30
M-England, 0.1 Cu, 0.4-1.5 Mg, 0.6-1.3 Si, 0.6 Fe, 0.1 Zn, 0.4-1.0 Mn, 0.5 Cr, 0.2 Ti, bal Al.
W.P Temper 46,000 TS, 42,800 YS, 11 El.
At --320°F 61,600 TS, 51,100 YS, 17.8 El.
For aircraft and space vehicle structures and components.
Heat treatable Good weldability

ALUMINUM P35
M-624, 3.2-3.8 Mg, 0.5 Mn, 0.3 max Si, 0.4 max Fe, bal Al
For light alloy parts for marine service, corrosion resistant

ALUMINUM NO 37
M-514, 6.5-7.5 Si, 0.2-0.4 Mg, bal Al
Cast. 40 000 TS, 27,000 YS, 5 El, 90 Brin
For permanent mold castings, dense, C S. 24000.

ALUMINUM A-43
M-815, M 238, 5.3 Si, bal Al
Die cast 33,000 TS, 14,000 YS, 9 El, 50 Brin; 19,000 SS, 17,000 Fatigue St
For marine castings, water jackets, meter housings, carburetor bodies
High fluidity and castability Corrosion resistant Die casting alloy

ALUMINUM NO 46
M 514, 3.5-4.5 Cu, 2.5-3.5 Si, bal Al.
Cast: 28,000 TS, 16,000 YS, 2 El, 70 Brin.
For permanent mold castings, C.S. 16,000

ALUMINUM BA46
M-28; 0.1 Cu, 0.2-0.6 Mg, 4.5-6.0 Si, 0.4 Mn, 0.1 Ni, 0.6 Fe, bal Al
Heat treated: 33,600-39,000 TS; 31,400 YS; 70-75 Brin.
For crankcases, gear cases, covers, housings; age-hardenable, good castability.

ALUMINUM C46.
M-1219, M-541; 9.5-10.5 Cu, 0.8-1.2 Si, 0.3 Mg, 0.2 Ti, 1.5 Ni, bal Al.
Cast: 51,200-54,100 TS; 42,700-48,400 YS; 0.5-1.0 El; 125-140 Brin.
For light alloy castings; general purpose.

ALUMINUM 50S.
M-1147; 1.5 Mg, bal Al.
S-D Temper: 21,000 TS; 8500 YS; 25 El.
S-H 22 Temper: 23,500 TS; 16,500 YS; 13 El.
S-H 34 Temper: 28,000 TS; 24,500 YS; 6 El.
For kitchen utensils, deep drawn parts, commercial appliances; good finishing characteristics.

ALUMINUM 55EC.
M-1147; 99.45 min Al.
T8-temper: 29,000 TS; 25,000 YS.
For busways, conductor; 55% conductivity.

ALUMINUM A-57G.
M-France; 6.5-7 0 Si, bal Al.
Cast: 44,000 TS; 7 El; 100 Brin.
For sand and permanent mold castings, housings, casings
Corrosion resistant.

ALUMINUM C58.
M-4; 0.15-0 40 Cu, 0.40-0 80 Si, 0 80-1.20 Mg, 0 15-0.35 Cr, 0.70 max Fe, 0.15 max Mn, 0.20 max Zn, 0.15 max Ti, bal Al.
O-Temper: 18,000 TS, 8000 YS; 30% El; 30 Brin.
T4-Temper: 34,000 TS; 21,000 YS; 25% El; 65 Brin.
T6-Temper: 45,000 TS; 40,000 YS; 17% El; 90 Brin.
Uses: Porcelain enameled extruded parts.
Heat Treatable. Extrusion alloy.

ALUMINUM-AS62.
M-541, M-1219, M-1220; 6 Si, 2 Cu, 0.3 Mg, bal Al.
Cast: 27,000 TS, 18,000 YS; 70 Brin.
Ht.Tr.: 36,000 TS; 24,000 YS; 80 Brin.
For automobile cylinder heads, crankcases, housings.
Permanent molds, age-hardening

ALUMINUM XC65S.
M-4; Al alloy.
For ship structures, trailer truck frames; high rigidity and strength.

ALUMINUM CH-70.
M-4; 4 7 Cu, 0.79 Ag, 0.27 Mg, 0.27 Mn, 0 21 Ti, bal Al.
Ht.Tr: 60,000 TS; 50,000 YS, 5 El.
For wing-spar castings, aerospace and undersea equipment
Cast alloy, heat treatable.

ALUMINUM C81.
M-671; 99.8 Al.
For cladding uranium fuel plates in nuclear reactor units.

ALUMINUM SG-81.
M-158; 8.6 Si, 0 42 Cu, 0.75 Fe, 0 62 Mg, 0.46 Ni, 0.07 Zn, 0 16 Ti, 0.15 Be, bal Al
Die Cast. 46,300 TS, 49,200 YS; 4.8 El.
As Aged. 54,500 TS; 46,100 YS; 2.5 El.
At 500°F: 28,800 TS, 28,400 YS, 7 El.
For die castings, missiles, housings, cases
Good high temperature properties, corrosion resistant.

ALUMINUM-SC84A
M-158; 8 87 Si, 3.68 Cu, 1.05 Fe, 0.34 Mn, 0.14 Ni, 0.01 Mg, bal Al.
As Cast: 50,600 TS, 25,000 YS; 3.8 El.
At 500°F: 19,000 TS; 14,600 YS; 11.2 El.
For die castings, pistons, sole plates.
Corrosion resistant, pressure tight.
Good high temperature properties

ALUMINUM SC84A + Mg.
M-158; 8.8 Si, 4.4 Cu, 0.82 Fe, 0.27 Mg, 0.25 Mn, 0.01 Ni, bal Al.
Die Cast: 48,600 TS; 25,000 YS; 3 El.
At 400°F: 24,800 TS; 15,700 YS; 6 El.
For die castings, pistons, sole plates, housings.
Corrosion resistant, pressure tight.

ALUMINUM-CG86.
M-158; 0.20 Si, 8.28 Cu, 0.94 Fe, 6.13 Mg, 0.63 Mn, 0.48 Ni, bal Al.
As Cast: 53,000 TS; 42,100 YS; 1.0 El.
At 400°F: 44,500 TS; 31,800 YS; 1.5 El.
For die castings, pistons, housings.
Good high temperature properties.

ALUMINUM-CH91.
M-4; 6-8 Cu, 1-3 Si, 2 2 max Zn, 1.4 max Fe, bal Al.
Die Cast: 44,000 TS; 22,000 YS; 4 El; 28,000 SS.
For commercial die castings, large pressure tight engine covers, grills.
High strength. Similar to Aluminum 13.

ALUMINUM B-95.
Russia, 5-7 Zn, 1.8-2 8 Mg, 1 4-2 0 Cu, 0.2-0.6 Mn, 0 1-0.25 Cr, bal Al.
For high strength castings; age-hardenable.

ALUMINUM V-95.
Russian, Mg, Zn, Cu, bal Al
For aircraft parts; age-hardenable.

ALUMINUM-100
M-297; Mg, Zn, bal Al.
For light alloy parts; corrosion resistant.

ALUMINUM-100.
M-1565; 0.1 Cu, Fe = 1 5 × Si, min, bal Al.
Electric motor rotors.
High purity, corrosion resistant

ALUMINUM HZM-100.
M-1235, 7.3 Zn, 3 Mg, 2 Cu, 0 2 Cr, bal Al.
T-6 temper: 100,000 TS, 92,000 YS, 9 El, 160 Brin.
O-temper 40,000 TS; 26,000 YS, 10 El.
For aircraft parts and structures; age hardenable.

ALUMINUM XZM-100.
M-1235; Al alloy
Extruded 92,000 TS; 11 El
For light alloy parts

ALUMINUM-A108
M-671, M-4, 4 5 Cu, 5 5 Si, bal Al.
Cast. 28,000 TS, 16,000 YS, 2 El, 70 Brin.
For ornamental grilles, reflectors, general purpose castings.
Fair corrosion resistance

ALUMINUM 108-Z.
M-1279, 3-4 Cu, 2.5-3 5 Si, 2-3 Zn, 1 max Fe, 0.5 max Ni, 0 25 max Ti, 0.5 max Mn, bal Al.
For valve bodies, manifolds, truck wheels, piano frames, oil pans
Non-heat treatable

ALUMINUM LAC112A TYPE 1.
M-28; 1 1 Cu, 10 3 Si, bal Al.
Sand cast: 21,300 TS; 11,000 YS; 2 El; 70 Brin.
For pressure tight castings; corrosion resistant.

ALUMINUM LAC 112A TYPE 2.
M-28; 2.1 Cu, 10 3 Si, 0.9 Zn, bal Al.
Permanent mold: 25,300 TS, 12,000 YS; 2 El; 78 Brin
For pressure tight castings; corrosion resistant.

ALUMINUM C-113.
M-4; 6-8 Cu, 3-4 Si, 2.5 max Zn, 1 Fe, bal Al.
Permanent Mold: 30,000 TS; 2400 YS; 1.5 El; 85 Brin.

For washing machine agitators, automotive cylinder heads, timing gears.
Permanent mold, pressure tight.

ALUMINUM LAC 113B.
M-28; 3.5 Cu, 11 Zn, bal Al.
Sand cast: 24,600 TS; 13,500 YS; 1.5 El; 85 Brin.
For general castings; good corrosion resistance.

ALUMINUM-SC114A.
M-158; 11.42 Si, 3.25 Cu, 1.10 Fe, 0.04 Mg, 0.20 Mn, 0.38 Ni, bal Al.
As Cast: 49,700 TS; 25,300 YS; 3.4 El.
For die castings, instrument cases, housings, oil pans.
Corrosion resistant, pressure tight.

ALUMINUM-SC114A + Mg
M-158; 12.0 Si, 3.94 Cu, 0.97 Fe, 0.51 Mg, 0.30 Mn, 0.01 Ni, bal Al.
Die Cast: 48,200 TS; 27,400 YS; 2.0 El.
For die castings, instrument cases, housings, grills.
Corrosion resistant.

ALUMINUM-SN122A.
M-158; 12.0 Si, 0.79 Cu, 1.12 Fe, 1.23 Mg, 0.07 Mn, 2.5 Ni, bal Al.
As Cast: 46,600 TS; 34,700 YS; 0.9 El.
At 300°F 43,500 TS; 39,400 YS; 1.0 El.
For die castings, auto and diesel engine pistons, pulleys, sheaves.
Good high temperature strength.

ALUMINUM-A132.
M-1147, M-4, 0.8 Cu, 12.0 Si, 1.2 Mg, 2.5 Ni, bal Al.
T551: 36,000 TS; 28,000 YS; 0.5 El; 105 Brin.
T65: 47,000 TS; 43,000 YS; 0.5 El; 125 Brin.
For permanent mold castings, automotive and diesel engine pistons, pulleys, sheaves.
Age-hardenable Good high temperature properties.

ALUMINUM-AS132
M-541, M-1219, M-1220; 12 Si, 2 Cu, 0.3 Mn, 0.7 Fe, bal Al.
For crankcases, oil pump bodies, die castings for automobile components.
Die cast alloy

ALUMINUM D132
M-4; 2-4 Cu, 1.2 max Fe, 8.5-10.5 Si, 0.5-1.5 Mg, 0.5-1.5 Ni, 0.2 Ti, bal Al.
T5-temper: 36,000 TS; 28,000 YS; 1 El, 105 Brin.
For pistons, cylinder heads; age-hardenable.

ALUMINUM-D132.
M-1147; 3.5 Cu, 9.0 Si, 0.8 Mg, 0.8 Ni, bal Al.
T5: 36,000 TS; 28,000 YS, 1.0 El; 105 Brin
For permanent mold castings, pistons, crankcases, oil pans.
Age hardenable, corrosion resistant.

ALUMINUM-F132.
M-4; 9.3 Si, 2.9 Cu, 1.1 Mg, 0.3 Fe, bal Al.
Permanent Mold: 36,000 TS; 28,000 YS; 1 El; 105 Brin.
For automotive and diesel engine pistons, permanent mold castings, oil pans, crankcases.
Good casting qualities, pressure tight, corrosion resistant.

ALUMINUM-B133.
M-297; Mg, Zn, bal Al.
For light alloy parts; corrosion resistant.

ALUMINUM-A140.
M-4; 7-9 Cu, 5.5-6.5 Mg, 0.3-0.7 Mn, 0.3-07 Ni, 0.5 max Si, 0.5 max Fe, 0.1 max Zn, 0.2 max Ti, bal Al.
Cast: 33,000 TS; 28,000 YS; 1 El; 90 Brin.
At 600°F: 17,000 TS; 12,000 YS; 40 El.
For aircraft and missile components, cases, housings.
Non-heat treatable casting alloy.

ALUMINUM XA140.
M-4; 8 Cu, 6 Mg, 0.05 Mn, 0.5 Ni, B, Be, Ti, bal Al.
For components for aircraft and gas turbine engines; high strength at 400-600°F.

ALUMINUM-X149.
M-4; 4.25 Cu, 0.35 Mg, 3.0 Zn, 0.4 Mn, 0.25 Ti, bal Al.
Cast: 60,000 TS; 50,000 YS; 5 El.
For structural applications in aerospace and ordnance.
Good resistance to stress corrosion cracking in saline environment.

ALUMINUM K-155.
M-1147; 0.8 Mg, bal Al.
O-Temper: 18,000 TS; 6000 YS; 30 El; 28 Brin.
H18-temper: 29,000 TS; 28,000 YS; 4 El; 41 Brin.
H38-temper: 29,000 TS; 27,000 YS; 5 El; 51 Brin.
For light reflectors, refrigerator shelves; now Aluminum 5005.

ALUMINUM A.W. 160.
M-493; 1.0 Si, 0.7 Mn, 0.65 Mg, bal Al.
For light alloy parts; same as Anticorodal.

ALUMINUM K 183.
M-1147; 0.4 Si, 0.4 Fe, 0.1 Cu, 0.5-1.0 Mn, 4.0-4.9 Mg, 0.25 Cr, 0.25 Zn, 0.15 Ti, bal Al.
O-temper: 44,000 TS; 22,000 YS; 21 El; 73 Brin.
H 113-temper: 46,000 TS, 33,000 YS; 16 El.
For welded structures and girders; good weldability.

ALUMINUM K 186.
M-1147; 4 Mg, 0.45 Mn, 0.1 Cr, bal Al.
O-temper: 38,000 TS; 17,000 YS; 22 El.
H 112-temper. 39,000 TS; 19,000 YS; 14 El.
H 34-temper 47,000 TS; 37,000 YS; 10 El.
For pressure vessels, truck and trailer frames; good formability and weldability.

ALUMINUM A214.
M-4; 3.8 Mg, 1.8 Zn, bal Al
Permanent mold 27,000 TS, 16,000 YS; 7 El; 60 Brin.
Die cast: 40,000 TS; 22,000 YS; 10 El.
For cooking utensils; corrosion resistant.

ALUMINUM-A214
M-671; 4 Mg, 1.8 Zn, bal Al.
Cast: 27,000 TS, 16,000 YS; 7 El; 60 Brin.
For cooking utensils, architectural fittings.
Fair resistance to hot cracking.
Good corrosion resistance

ALUMINUM-F214.
M-671, M-4; 4 Mg, 0.5 Si, bal Al.
Cast. 21,000 TS; 12,000 YS; 3 El; 50 Brin.
For dairy and food handling equipment, cooking utensils, fittings for chemical and sewerage use.
Corrosion resistant. Resists hot cracking.

ALUMINUM-L214.
M-671, M-4; 0.10 Cu, 0.75 Si, 0.75 Fe, 0.5 Mn, 3.3 Mg, 0.1 Zn, 0.1 Ni, bal Al.
Cast: 41,000 TS; 10 El.
For hardware, support brackets.
Fair resistance to hot cracking.
Good corrosion resistance.

ALUMINUM B218.
M-4; 0.10 max Si, 0.12 max Fe, 0.05 max Cu, 6.5-7.5 Mg, 0.10-0.25 Ti, bal Al.
Cast: 38,000 TS; 19,000 YS; 10 El; 65 Brin.
For non-heat treatable sand and permanent mold castings
Fair resistance to hot cracking and fair fluidity.

ALUMINUM 218SP.
M-671, M-4; 6.7 Mg, 0.2 Si, 0.1 Mn, bal Al.
Cast: 36,000 TS; 18,000 YS; 9 El.

For dairy and food handling equipment, fittings for chemical and sewerage use, cooking utensils.
Corrosion resistant.

ALUMINUM X250.
M-4; 8 Mg, 0 15 Cu, 0.25 Mn, 1.5 Zn, bal Al.
T4-temper: 50,000 TS, 28,000 YS; 16 El, 85 Brin.
Aged: 58,100 TS, 33,500 YS; 18 El
For castings, aircraft engine cases and parts, age-hardenable, stress corrosion resistant.

ALUMINUM KS280
Germany; 21-22 Si, 1 5 Cu, 1 5 Ni, 0 6 Mn, 0 5 Mg, 1.2 Co, bal Al.
For bearings

ALUMINUM BA305
M-28, 3 5-4.8 Cu, 0.8 Mg, 0 9 Si, 1 Fe, 1.2 Mn, 0.3 Ti, bal Al.
Heat treated. 53,800-62,700 TS, 38,400-58,300 YS, 20-9 El, 115-135 Brin.
For aircraft parts; high strength, good ductility, heat treatable.

ALUMINUM 310
M-4; 10 5 Si, 1.0 Cr, 0.3 Mg, 1 0 Pb, 0 5 Bi, bal Al
Cast: 43,000 TS; 25,000 YS, 2 5 El, 80 Brin
For die castings, housings, containers, machine tools. Free-cutting.
Good strength, weldability and corrosion resistance

ALUMINUM 333.
Eng; Cu, Si, bal Al
Cast. 34,000 TS, 19,000 YS; 2 El, 90 Brin
For castings, pistons, sole plates; permanent molds

ALUMINUM 335
M-4, 8.0 Si, 0 5 Cu, 0.5 Mg, 1 0 Pb, 1 0 Bi, bal Al
Cast Sand 25,000 TS, 16,000 YS, 25 El: 64 Brin
T5 Temper 30,000 TS, 26,000 YS, 1 5 El, 80 Brin
T6 Temper: 35,000 TS, 25,000 YS, 3 El, 88 Brin
T61 Temper 40,000 TS, 30,000 YS, 3El, 90 Brin.
For permanent molds and sand castings in machine tools. Free machining
Good strength, weldability and corrosion resistance

ALUMINUM 344.
M-4, 7 Si, bal Al
For cooking utensils, corrosion resistant

ALUMINUM-A344
M-4; 6 5-7 5 Si, 0.5 max Fe, 0 3 max Mn, 0.2 max Cu, bal Al
Sand Cast 21,000 TS, 9,000 YS; 9 El
Permanent Mold 24,000 TS, 11,000 YS; 13 El
For bridge railing posts, permanent mold general castings.
High resistance to impact and to hot cracking Pressure tight.

ALUMINUM 354
M-4, 9 Si, 1.8 Cu, 0.5 Mg, bal Al
T61 Temper. 52,000 TS; 39,000 YS, 6 El.
T62 Temper· 55,000 TS, 45,000 YS, 3 El.
T61 P M., 55,000 TS, 41,000 YS; 6 El, 100 Brin.
For aircraft and missile applications
Sand, permanent mold or plaster castings
Good strength, weldability and corrosion resistance Heat treatable.

ALUMINUM BA355.
M-28, 3.5-4 8 Cu, 0 8 Mg, 0 9 Si, 1 Fe, 1 2 Mn, 0.3 Ti, bal Al
Heat treated: 53,800-58,200 TS, 34,400-52,800 YS; 20-9 El; 115-135 Brin
For aircraft parts, heat treatable, high strength

ALUMINUM-C355.
M-4; 1 3 Cu, 0.2 max Zn, 0.6 max Fe, 0 5 Mg, 5.0 Si, bal Al.
T6: 45,000 TS; 33,000 YS; 2 El; 90 Brin.
T62· 52,000 TS; 44,000 YS; 4 El; 100 Brin.
For general purpose castings; casings, housings, fittings, gear boxes.
Heat treatable. High strength and corrosion resistant.

ALUMINUM-A356.
M-4; 0 2 Cu, 7.5 Si, 0.4 Mg, 0.1 Zn, 0.2 Ti, 0.2 Fe, bal Al.
Permanent Mold (T6) 40,000 TS, 28,000 YS, 10 El.
For aircraft and jet engine castings.
Heat treatable Shock resistant

ALUMINUM HP356.
M-1147, M-4, 6 75-7.5 Si, 0 3 Mg, 0 2 max Cu, 0.15 max Fe, 0 3 max Mn, bal Al.
For aircraft fittings, pump parts, cylinder blocks, age-hardenable, good castability.

ALUMINUM 357
M-4, M-1147, 6 5-7 5 Si, 0 45-0 60 Mg, 0.10-0 20 Ti, 0 03 max Zn, 0 15 max Fe, bal Al
F-Temper 28,000 TS, 15,000 YS, 6 El.
Sand Cast (T6)· 50,000 TS, 43,000 YS, 2 El
Permnent Mold (T6) 52,000 TS, 43,000 YS, 5 El
For aircraft and missile structures, high velocity blowers and impellers
Heat treatable, corrosion resistant

ALUMINUM A357
M-4, M-1147, 0 2 Cu, 7 5 Si, 0 6 Mg, 0 1 Zn, 0 2 Ti, 0 2 Fe, bal Al
T6 Sand Cast 46,000 TS, 36,000 YS, 3 El, 85 Brin
T6 Permanent Mold 50,000 TS, 40,000 YS, 10 El, 100 Brin, 43000 S S
For cylinder heads gear cases, oil pans, super chargers, transmission cases
High strength pressure tight

ALUMINUM X357
M 1147, 6 5 7 5 Si, 0 45-0 60 Mg, 0 1-0 2 Ti, bal Al
Permanent mold 50,000 TS, 43,000 YS, 5 El, 100 Brin
Sand cast 52,000 TS, 43,000 YS, 2 El, 90 Brin
For aircraft and missile structures, impellers, age-hardenable

ALUMINUM 359
M-4, M-1147, 9 Si, 0 6 Mg, bal Al
T61 Temper 48,000 TS, 37,000 YS, 6 El
T62 Temper 50,000 TS, 42,000 YS, 5 El
For aircraft and missile applications
Sand, permanent mold or plaster casting
Good strength, weldability and corrosion resistant Heat treatable

ALUMINUM 360
M-4, M-1147, 9 5 Si, 0 5 Mg, bal Al
Die Cast 47,000 TS, 25,000 YS, 11 El
For general purpose die castings, marine and outboard motor parts.
High corrosion resistance and good mechanical properties

ALUMINUM A360
M-4, M-1147; 9-10 Si, 0 45-0 60 Mg, 0.6 max Fe, bal Al
Die Cast· 41,000 TS, 23,000 YS, 5 El, 75 Brin
For general die castings, instrument housings and cases, outboard motor and marine castings.
Corrosion resistant. Die cast.

ALUMINUM ALLOY B.E.S A. NO. 361
Eng, 6 8 Cu, 0 1 Zn, 1 0 max Fe, 1.0 max Si, bal Al
Chill cast· 20,160 YS, 3 El, 60 Brin.
Sand cast· 18,000 TS, 1-2 El
For general castings, cylinder heads; good machinability.

ALUMINUM ALLOY B.E.S.A NO. 362.
- Eng.; 11-13 Cu, 0.1 Zn, 1.0 max Fe, 1.0 max Si, bal Al.
- Chill cast: 20,160 TS; 80 Brin
- For permanent mold castings, pistons; non-hardenable.

ALUMINUM 363
- M-1147; 2.5-3.5 Cu, 4.5-6.0 Si, 0.6 Mn, 0.3 Mg, 3.0-4.5 Zn, bal Al.
- Sand cast: 30,000 TS; 20,000 YS; 3 El; 75 Brin
- T6-temper. 46,000 TS, 28,000 YS, 5 El, 90 Brin.
- For pressure tight castings; age-hardened, good castability.

ALUMINUM ALLOY B.E.S.A. NO. 363.
- Eng., 2.5-3.0 Cu, 12.5-14.5 Zn, 1.0 max Fe, 1.0 max Si, bal Al
- Sand cast 25,000-30,000 TS, 1 El, 70 Brin
- For sand castings, crankcases, non-hardenable

ALUMINUM-A380.
- M-4, M-1147, 7.5-9.5 Si, 3-4 Cu, 0.6 max Fe
- Die Cast 47,000 TS, 23,000 YS, 4 El, 80 Brin
- For general purpose die castings, instrument housings and cases
- Corrosion resistant

ALUMINUM 380B
- 3.5 Cu, 9.0 Si, 1.0 Fe, 0.5 Mn, 0.10 Mg, 2.0 Zn, 0.5 Ni, bal Al
- Cast 40,000 TS, 17,000 YS, 2.5 El
- For general purpose die castings.
- Corrosion resistant, high strength

ALUMINUM 380Z
- 3.5 Cu, 9.0 Si, 1.0 Fe, 0.5 Mn, 0.10 Mg, 3.0 Zn, 0.5 Ni, bal Al
- Cast 40,000 TS, 17,000 YS, 2.5 El
- For general purpose die castings
- Corrosion resistant, pressure tight

ALUMINUM 384
- M-4, 2.4 Cu, 11-13 Si bal Al
- Die Cast 47,000 TS, 25,000 YS, 1 El.
- At 400°F 28,000 TS, 20,000 YS, 8 El
- For large thin-walled castings
- Pressure tight die castings Good resistance to hot cracking

ALUMINUM 385
- M-4 5 Si, 3.7 Cu, 0.7 Sn, 0.7 Pb, 0.7 Cd, bal Al
- Die Cast 36,000 TS, 20,000 YS, 3 El 75 Brin
- For connecting rods, gear housings.
- High fatigue properties Good bearing surface

ALUMINUM 390
- M-4, M-671, 16-18 Si, 4.5 Cu, 0.45-0.65 Mg 0.6-1.1 Fe, 0.2 max Ti, bal Al
- -F Temper 40,500 TS, 35,000 YS, 1 El, 120 Brin
- T5 Temper 43,000 TS, 38,500 YS, 1 El
- For die cast engine blocks, pistons, cylinders
- Pressure-tight die casting, wear and corrosion resistant

ALUMINUM-A390
- M-4, M-671, 16-18 Si, 4-5 Cu, 0.45-0.65 Mg, 0.5 max Fe, 0.2 max Ti, bal Al.
- Permanent Mold T6 Temper 45,000 TS, 45,000 YS, 1 max El, 145 Brin
- As Cast 29,000 TS, 29,000 YS, 1 max El, 110 Brin
- For high strength castings, engine blocks, cylinders, pistons
- Heat treatable, good resistance to heat cracking, excellent fluidity

ALUMINUM 392
- M-4, 16 Si, bal Al
- Cast: 45,000 TS; 43,000 YS; 1 El
- For auto engine blocks, cylinders, pistons
- Wear resistant.
- Hard surface as cast. Die cast.

ALUMINUM DTD 424.
- M-28; 3 Cu, 5 Si, 0.5 Mn, bal Al.
- Sand cast: 20,200 TS, 12,300 YS; 2.5 El; 65 Brin.
- Permanent mold: 22,400 TS; 12,300 YS; 2.5 El, 70 Brin.
- For general castings, corrosion resistant.

ALUMINUM DTD428.
- M-28, 7 Cu, 3 Si, 3 Zn, bal Al
- Sand cast: 19,100 TS, 12,200 YS; 1 El, 73 Brin.
- Permanent mold 24,600 TS, 15,700 YS, 1 El, 80 Brin
- For general castings; pressure tight

ALUMINUM S457
- M-4; 0.05-0.20 Cu, 0.15-0.45 Mn, 0.8-1.2 Mg, bal Al
- For decorative trim, appliances, mirror-like finish

ALUMINUM-A612.
- M-4; 0.35-0.60 Cu, 7.0 Zn, 0.2 max Ti, 0.65-0.80 Mg, bal Al
- F-Temper: 35,000 TS, 25,000 YS; 5 El; 75 Brin
- For housings, fittings, machinery parts, airplane and and automobile structures.
- Cast alloy, excellent brazability.

ALUMINUM-C612
- M-671, M-4, 0.5 Cu, 6.5 Zn, 1.4 max Fe, 0.35 Mg, 0.35 max Si, 0.25 max Ti, bal Al
- Cast and Room Aged: 35,000 TS, 18,000 YS, 8 El, 70 Brin
- T5 34,000 TS, 18,000 YS, 7 El
- For general purpose castings Brazed assemblies.
- Good brazing properties, high strength and ductility.

ALUMINUM-D612
- M-671, M-1147, M-4, 0.15 max Si, 0.4 max Fe, 0.5-0.65 Mg, 0.1 max Mn, 0.4-0.6 Cr, 5.0-6.5 Zn, 0.15-0.25 Ti, 0.2 max Cu, bal Al
- Sand cast and aged 35,000 TS, 25,000 YS, 9 El, 75 Brin
- For general castings, transmission housings, manifolds, cylinder heads, ventilating fans.
- Self-aging No heat treatment required

ALUMINUM 613
- M-671, M-4, M-1147, 0.25 max Si, 0.8 max Fe, 0.25-0.50 Mg, 0.35 max Cr, 7-8 Zn, 0.2 max Ti, 0.4-1.0 Cu, 0.6 max Mn, bal Al
- Sand cast and aged 35,000 TS, 25,000 YS, 5 El, 74 Brin
- For general castings, machinery parts, fittings, brackets, auto and airplane parts
- Self-aging No heat treatment required

ALUMINUM 718
- M-4, M-1147, 0.3 max Cu, 0.8 max Fe, 11-13 Si, 0.2 max Zn, bal Al
- For brazing alloy, M.P 1070-1080°F

ALUMINUM A750
- M-4, M-1147, 2-3 Si, 0.7-1.3 Cu, 0.3-0.7 Ni, 5.5-7 Sn, bal Al
- Cast (T 5 Temper) 20,000 TS, 11,000 YS; 5 El, 45 Brin
- For bearings, large bearing for rolling mills.
- Resists galling and seizing Less hot-short than Aluminum 750

ALUMINUM B750
- M-4, M-1147, 1.7-2.3 Cu, 0.6-0.9 Mg, 0.9-1.5 Ni, 5.5-7.0 Sn, 0.4 max Si, 0.5 max Fe, bal Al.
- Cast (T 5 Temper): 27,000-32,000 TS, 22,000-23,000 YS, 2-5 El, 65-70 Brin
- For bearings and bushings carrying heavy loads.
- Resists galling and seizing
- Higher compressive strength than Aluminum 750.

ALUMINUM XB 805
- England, 6.5 Sn, 1 Ni, 1 Cu, bal Al
- For bearings; requires steel backing.

ALUMINUM C872.

M-4; 0.20-0.6 Si, 0.45-0.9 Mg, 0.35 max Fe, 0.10 max Cu, 0.10 max Ti, bal Al.
T42 Temper (min): 17,000 TS; 9000 YS, 12% El.
T5 Temper (min): 22,000 TS; 16,000 YS; 8% El.
T6 Temper (min): 30,000 TS; 25,000 YS; 8-10% El
For trim, architectural, decorations.
Extrusion alloy.

ALUMINUM C914.

M-4, 0 20-0.6 Si, 0.45-0 9 Mg, 0 35 max Fe, 0.10 max Cu, 0.10 max Mn, 0.10 max Zn, 0.10 max Cr, 0.10 max Ti, bal Al.
T5-Temper: 27,000 TS; 21,000 YS, 12% El, 60 Brin
T6-Temper: 35,000 TS; 31,000 YS; 10-12% El; 73 Brin.
O-Temper: 13,000 TS; 7000 YS; 25 Brin
For Constructional equipment and components.
Heat treatable extrusion alloy.

ALUMINUM C-960.

M-4; 16 Si, bal Al.
For automotive engines, pistons.
Cast: 45,000 TS; 42,000 YS; 1 El.
High corrosion resistance.

ALUMINUM C989.

M-4; 0.20-0.6 Si, 0.45-0.9 Mg, 0.35 max Fe, 0 10 max Cu, 0.10 max Ti, bal Al.
T42 Temper (min): 17,000 TS; 9000 YS, 12% El
T5 Temper (min): 22,000 TS, 16,000 YS; 8% El.
T6 Temper (min) 30,000 TS, 25,000 YS, 8-10 El
For trim, architectural, decorative applications.
Extrusion alloy, heat treatable.

ALUMINUM 1060.

M-4; 99 6 min Al, 0.25 max Si, 0 35 max Fe, 0 05 max Cu.
H12-temper: 12,000 TS; 11,000 YS; 16 El; 23 Brin
H18-temper 19,000 TS; 18,000 YS, 6 El; 35 Brin.
For conductors, parts for hydrogen peroxide service, high purity.

ALUMINUM-1145

M-4, M-671, 99 45 min Al, 0.55 Si + Fe
O-Temper. 11,000 TS, 5000 YS, 40 El, 20 Brin
H18 Temper: 24,000 TS; 21,000 YS, 4 El; 44 Brin.
For light sheet metal work, foil
Good corrosion resistance and weldability.

ALUMINUM 1180.

M-671; 0 09 Si, 0 09 max Fe, 0 01 max Cu, 0 02 max Ti, 99 80 min Al
For capacitor foil

ALUMINUM 1188

M-671, 0.06 Si, 0 06 Fe, 0 01 max Mn, 99.88 min Al.
For capacitor foil

ALUMINUM 1199

M-671; 0.006 Si, 0.006 Fe, 0 006 Cu, 99 99 min Al
For capacitor foils.

ALUMINUM 1230

M-671, 0 07 Si + Fe,, 0 10 max Cu, 99 30 min Al.
For cladding on Aluminum 2024.

ALUMINUM 1235

M-671; 0 65 Si + Fe, 0 05 max Cu, 99.35 min Al
For foil

ALUMINUM 1345

M-4, 0.30 max Si, 0.40 max Fe, 0 10 max Cu, bal Al
O-Temper. 12,000 TS, 4000 YS; 40 El, 22 Brin
H14-Temper 16,000 TS, 14,000 YS; 11 El, 30 Brin.
H19-Temper; 28,000 TS; 25,000 YS, 4 El, 52 Brin.
For non-electrical wire applications.
Wire, non-heat treatable

ALUMINUM 2020

M-4; 1 1 Li, 4.5 Cu, 0 5 Mn, 0 2 Cd, bal Al.
T-6 temper: 86,000 TS; 79,000 YS, 6 El, 150 Brin.
At 400°F: 61,000 TS; 57,000 YS; 7 El.
For aircraft components; for high temperature service.

ALUMINUM 2021.

M-4; 5 8-6.8 Cu, 0.2-0 4 Mn, 0 02-0 10 Ti, 0.1-0.25 Zr, 0.05-0.15 V, 0 05-0 20 Cd, 0 03-0.08 Sn, bal Al.
T8E31 Temper:(At RT)75,000 TS, 66,000 YS, 9 El.
(At-320°F) 90,000 TS, 80,000 YS; 9 El.
(At-423°F) 102,000 TS; 84,000 YS; 9 El
For cryogenic services, space vehicles, liquid-fueled low temp tanks
Tough, weldable, good corrosion resistance.

ALUMINUM 2219

M-4, M-671, 5.8-6.8 Cu, 0.2-0.4 Mn, 0 02-0 10 Ti, 0 20 max Si, 0.30 max Fe, bal Al
O-temper: 25,000 TS; 10,000 YS, 20 El
T62-Temper 61,000 TS, 42,000 YS, 11 El; 115 Brin.
T87-Temper: 70,000 TS, 58,000 YS, 10 El, 130 Brin.
For aircraft and automotive engine parts, missiles, space vehicles.
Heat treatable High creep resistance.

ALUMINUM X2219

M-4, 6 Cu, 0 3 Mn, 0 1 V, 0.15 Zr, bal Al.
Heat treated 62,000-38,000 TS, 43,000 YS, 16 El.
For aircraft and auto engine components, age-hardenable, high temperature use.

ALUMINUM 2319

M-4, 0 2 Si, 0 3 Fe, 5 8-6 8 Cu, 0 2-0.4 Mn, 0 02 Mg, 0 10 Zn, 0 1-0 2 Ti, 0 05 0 15 V, 0 10-0 20 Zr, bal Al
For filler wire for both gas metal-arc and gas tungsten arc welding of Aluminum 2021 Alloy
(Almigweld electrode)

ALUMINIUM 2364

M-1147, 3 5-5 0 Cu, 5 5-7 5 Si, 0 6 max Fe bal Al.
For general castings, corrosion resistant, cast

ALUMINIUM 2393

M-1147, 3-4 Cu, 7-9 Si, 0 6-1 0 Fe, bal Al
For pressure tight die castings, good castability, corrosion resistant

ALUMINUM 2618

M-1147, 2 5 Cu, 1 5 Mg, 0 15 0 25 Si, 1 2 Ni, 1 Fe 0 1 Ti, bal Al
T61 temper 64,000 TS, 54,000 YS, 11 El
For large engine components, for use up to 500°F, age-hardened

ALUMINUM 3002

M-4, 0 08 max Si, 0 1-0 25 Mn, 0 05-0 20 Mg, bal Al
O-Temper 14,000 TS, 6000 YS, 35 El, 25 Brin
H25-Temper 22,000 TS, 20,000 YS, 14 El
For Reflectors
High reflectivity

ALUMINUM 3005

M-4, 0 6 Si, 0 7 Fe, 0 3 Cu, 1 0-1 5 Mn, 0.2-0 6 Mg, 0 1 Cr, 0 25 Zn, bal Al
O-Temper 20,000 TS, 8000 YS, 25 El.
H-14 Temper 26,000 TS, 25,000 YS, 5 El
For sheet metal structures, commercial vehicles
Non hardenable, corrosion resistant.

ALUMINUM 3005.

M-238, 1 0-1 5 Mn, 0 06-0 20 Mg, 0.03 Ti, bal Al.
O-Temper 20,000 TS, 8000 YS, 25 El.
H14-Temper 26,000 TS; 25,000 YS, 5 El.
For reflectors. High reflectivity.

ALUMINUM 3105.
M-4, M-671; 0.30-1.5 Mn, 0.2-0.8 Mg, 0.6 max Si, 0.7 max Fe, 0.4 max Cu, 0.25 max Cr, 0.4 max Zn, 0.10 max Ti, bal Al.
H25 Temper: 26,000 TS; 24,000 YS; 8 El; 47 Brin.
For building products, boxes, covers, containers.
Good corrosion resistance and formability.
Non-heat treatable

ALUMINUM GM-3889M.
M-165; 4 Si, 1 Cd, bal Al.
For bearings; requires steel backing.

ALUMINUM 4043.
M-4; 4.5-6.0 Si, 0.8 max Fe, bal Al
Annealed: 19,000 TS; 25 El.
Cast Filler Metal: 19,000 TS; 8000 YS; 8 El; 40 Brin.
For welding wire, marine castings, filler metal
Corrosion resistant, low melting point.

ALUMINUM 4045.
M-4, M-671; 9.0-11.0 Si, 0.8 max Fe, 0.3 max Cu, 0.1 max Zn, 0.05 max Mn, 0.20 max Ti, bal Al
For brazing aluminum alloys, filler metal, for cladding Aluminum 6951 Alloy.
M P 1070-1100°F
AWS-ASTM BAlSi-5

ALUMINUM 4047.
M-4, M-671; 11.0-13.0 Si, 0.8 max Fe, 0.3 max Cu, 0.15 max Mn, 0.10 max Mg, 0.2 max Zn, bal Al.
For brazing aluminum alloys, filler metal.
M P 1070-1080°F
AWS-ASTM BAlSi-4.

ALUMINUM 4145
M-4, 9.3-10.7 Si, 0.8 Fe, 3.3-4.7 Cu, 0.15 Mn, 0.15 Mg, 0.2 Zn, 0.15 Cr, bal Al
For filler brazing aluminum alloys
M P 970-1085°F
AWS-ASTM BAlSi 3

ALUMINUM 4245
M-4, 9.3-10.7 Si, 0.8 max Fe, 3.3-4.7 Cu, 0.07 max Mn, 0.07 max Cr, 9.3-10.7 Zn, bal Al
For brazing aluminum alloys, filler metal
M P 960-1040°F

ALUMINUM 4543
M-4, M-671, 5-7 Si, 0.5 max Fe, 0.10-0.40 Mg, 0.10 max Ti, 0.10 max Cu, 0.05 max Cr, 0.10 max Zn, bal Al
T61 Temper 28,000 TS, 17,000 YS, 15 El
For extruded products, architectural trim and shapes
Age-hardenable, corrosion resistant

ALUMINUM 4643
M-4, 3.6-4.6 Si, 0.8 Fe, 0.1 max Cu, 0.05 Mn, 0.1-0.3 Mg, 0.15 Cr, 0.1 Zn, 0.15 Ti, bal Al
For weld filler metal in welding Aluminum 6061 T6 thick plates
Heat treatable

ALUMINUM 5039.
M-1147; 0.13 Si, 0.17 Fe, 0.06 Cu, 0.25 Mn, 3.75 Mg, 3.1 Zn, 0.08 Ti, 0.1 Cr, bal Al.
For weld filler alloy to join 7039 Aluminum Alloy
Self aging

ALUMINUM 5040.
M-4, 0.3 max Si, 0.7 max Fe, 0.25 max Cu, 0.9-1.4 Mn, 1.0-1.5 Mg, 0.1-0.3 Cr, 0.2 max Zn, bal Al.
O temper: 26,000 TS; 10,000 YS; 20 El, 45 Brin
H34-temper 35,000 TS, 29,000 YS, 9 El; 63 Brin.
For lamp bases, light gage sheet.

ALUMINUM 5056.
M-1147; 6 Mg, 0.05 Cu, 0.13 Fe, 0.08 Si, bal Al
O-temper: 42,000 TS; 22,000 YS, 35 El; 65 Brin.
H-38 temper: 60,000 TS; 50,000 YS; 15 El; 100 Brin.
For light alloy parts, marine hardware; corrosion resistant.

ALUMINUM 5080.
M-4; 0.5 Mn, 4.0 Mg, 0.1 Cr, 2.0 Zn, 0.1 Ti, bal Al.
For welding filler metal.
For use with Aluminum 7006.

ALUMINUM 5082.
M-4, 4.5 Mg, Mn, Cr, bal Al.
Rolled: 56,000 TS.
For packaging and decorating, beer cans, tab top can.
Sheet stock, corrosion resistant.

ALUMINUM 5083
M-1147; 0.4 Si, 0.4 Fe, 0.1 Cu, 0.5-1.0 Mn, 4-5 Mg, 0.25 Cr, 0.25 Zn, 0.15 Ti, bal Al.
O-temper: 44,000 TS; 22,000 YS; 21 El; 73 Brin.
H 113-temper: 46,000 TS; 33,000 YS; 16 El
For girders, marine assemblies, scaffolding; good weldability

ALUMINUM 5086.
M-1147; 0.4 Si, 0.4 Fe, 0.1 Cu, 0.2-0.7 Mn, 3.5-4.5 Mg, 0.25 Cr, 0.25 Zn, bal Al.
O-temper 38,000 TS; 17,000 YS, 22 El.
H 36-temper: 47,000 TS; 37,000 YS; 10 El.
H 112-temper: 39,000 TS; 19,000 YS; 14 El
For welded assemblies, pressure vessels, boat hulls, good formability and weldability

ALUMINUM 5154
M-1147, 3.5 Mg, 0.25 Cr, bal Al.
O-temper 34,000 TS; 16,000 YS, 27 El
H38-temper: 48,000 TS; 39,000 YS; 8 El.
For welded assemblies, pressure vessels, tanks, corrosion resistant; formerly A54S

ALUMINUM 5180
M-4, 2 Zn, 4 Mg, bal Al
For filler metal in welding Aluminum 7106, for low temperature applications High weld strength

ALUMINUM 5183
M-1147, M-4, 0.4 Si, 0.4 Fe, 0.1 Cu, 0.3-1.0 Mn, 4.5-5.2 Mg, 0.05-0.25 Cr, 0.15 max Ti, 0.0005 max Be, bal Al
For structural and marine applications, truck and trailer bodies, power shovels, good formability and weldability, welding electrodes

ALUMINUM 5205
M-4, M-671, 0.15 max Si, 0.7 max Fe, 0.03-0.10 Cu, 0.10 max Mn, 0.6-0.1 Mg, 0.1 max Cr, bal Al.
For auto trim, instrument panels
Sheet alloy, excellent formability, antiglare sheet.

ALUMINUM 5252
M-4, 2.2-2.8 Mg, 0.10 max Mn, 0.10 max Cu, 0.10 max Fe, 0.08 max Si, bal Al
H25 Temper 35,000 TS, 27,000 YS, 12 El.
H28 Temper 41,000 TS; 35,000 YS, 8 El
For auto exterior rolled moldings and stampings and trim
Non hardenable, corrosion resistant

ALUMINUM 5252.
M-1147, 2.2-2.8 Mg, 0.1 max Mn, 0.1 max Cu, 0.1 max Fe, 0.08 max Si, bal Al
For light weight parts, auto trim, good dent resistance

ALUMINUM 5257
M-4; 0.08 max Si, 0.2-0.6 Mg, 0.03 max Mn, bal Al.
H25 Temper: 19,000 TS; 16,000 YS; 14 El; 32 Brin
H28 Temper: 23,000 TS; 19,000 YS; 8 El; 43 Brin.
For deeply drawn parts, headlamps, tail lamp bezels, anodized auto trim.
Good formability.

ALUMINUM 5356.
M-4; 0.05-0.2 Mn, 4.5-5.5 Mg, 0.05-0.2 Cr, 0.06-0.2 Ti, bal Al.
For welding wire.

ALUMINUM 5357.
M-1147; 0.17 Fe, 0.15-0.45 Mn, 0.8-1.2 Mg, 0.12 max Si, bal Al.
O-temper: 19,000 TS; 7,000 YS; 25 El; 32 Brin.
H34-temper: 24,000 TS; 22,000 YS; 8 El; 45 Brin.
H38-temper: 32,000 TS; 30,000 YS; 6 El; 55 Brin.
For automobile trim, gift ware; formerly C57 alloy; takes bright polish.

ALUMINUM 5457.
M-4; 0.15-0 45 Mn, 0.8-1.2 Mg, 0.20 max Cu, 0.10 max Fe, bal Al.
Annealed: 16,000-22,000 TS; 16-20 El.
H38 Temper: 27,000 min TS; 2 min El.
For stampings and auto grills, automotive and appliance components.
Super bright anodized finished. Not heat treatable.

ALUMINUM 5556
M-4; 0.8 Mn, 5.25 Mg, 0.1 Cr, 0 1 Ti, bal Al.
For welding wire.

ALUMINUM 5557.
M-4; 0.10-0.40 Mn, 0.40-0 8 Mg, 0.10 max Si, 0.12 max Fe, 0.15 max Cu, bal Al.
O Temper· 16,000 TS; 6000 YS, 25 El; 27 Brin.
H25 Temper: 25,000 TS, 21,000 YS; 10 El; 46 Brin
H28 Temper· 30,000 TS, 28,000 YS, 8 El, 55 Brin.
For stampings and auto grills, automotive and appliance trim.
Good bright finish, corrosion resistant
Good formability and weldability.

ALUMINUM 5652.
M-4, M-671; 0 04 Cu, 0 01 Mn, 0 40 Fe + Si, 2 2-2 8 Mg, 0 10 Zn, 0 15-0 35 Cr, bal Al.
For hydrogen peroxide equipment.
Good corrosion resistance.

ALUMINUM 5657.
M-4, M-671; 0.6-1 0 Mg, 0 08 max Si, 0 10 max Fe, 0 10 max Cu, 0.03 max Zn, bal Al
H25 Temper: 23,000 TS; 20,000 YS, 12 El, 40 Brin.
H38 Temper: 28,000 TS, 24,000 YS; 7 El; 50 Brin
For deep drawn parts and stampings, interior and exterior trim for automobiles and appliances.
Bright, corrosion resistant.

ALUMINUM 5757.
M-4, 0.05-0 15 Cu, 0 6-1.0 Mg, 0 05-0 15 Cr, bal Al
For automobile and appliance grills, trim, auto bumpers, bright finish, fabricating trim

ALUMINUM 6003
M-671, 0 35-1 0 Si, 0.8-1.5 Mg, 0 6 max Fe, 0 35 max Cr, bal Al
For cladding on Alclad 2014 sheet and plate.
Corrosion resistant

ALUMINUM 6011
M-4, M-671; 0.9 Si, 0 6 Cu, 0 9 Mg, 1 5 Zn, bal Al
For moderate strength structural applications.
Sheet or plate. Corrosion resistant.

ALUMINUM 6051.
M-1147, M-4, 0.05 Cu, 0.6 Mg, 0 01 Mn, 0.4 Fe, 1 Si, bal Al
For light alloy parts; heat treatable

ALUMINUM 6063.
M-671, M-4, M-1147, 0 2-0 6 Si, 0.45-0.9 Mg, 0.35 max Fe, bal Al.
T5. 27,000 TS; 21,000 YS; 12 El, 60 Brin.
T6: 35,000 TS; 31,000 YS, 12 El; 73 Brin.
For architectural applications, portable irrigation systems, moldings and trim.
Heat treatable. Extrusion alloy AA-6063.

ALUMINUM S6063.
M-671; 0 5 Si, 0.8 Mg, 0.35 max Fe, bal Al.
T5: 27,000 TS; 21,000 YS; 12 El; 60 Brin.
T42: 25,000 TS; 13,000 YS; 22 El.
For architectural applications, portable irrigation systems, moldings and trim.
Heat treatable extrusion alloy.

ALUMINUM SS6063.
M-671; 0.5 Si, 0 8 Mg, 0.35 max Fe, bal Al.
T5 27,000 TS, 21,000 YS; 12 El; 60 Brin.
For architecctural applications, portable, irrigation systems, moldings and trim
Heat treatable extrusion alloy.

ALUMINUM T6063.
M-671; 0 5 Si, 0.8 Mg, 0 35 max Fe, bal Al.
T5: 27,000 TS, 21,000 YS, 12 El, 60 Brin.
For architectural applications, portable irrigation systems, molding and trim.
Heat treatable extrusion alloy.

ALUMINUM 6066
M-4, M-1235, 0 7-1,2 Cu, 0 9-1 8 Si, 0 8-1.4 Mg, 0 6-1.1 Mn, 0 2 Ti, 0 4 Cr, bal Al
O-temper· 22,000 TS, 12,000 YS; 18 El; 43 Brin
T-6 temper 62,000 TS, 55,000 YS, 12 El; 120 Brin
For truck and trailer bodies, aircraft construction; age hardened, good forming and welding properties

ALUMINUM 6070
M-4, 1 0-1.7 Si, 0 50 Fe, 0 15-0 40 Cu, 0.4-1 0 Mn, 0.50-1 2 Mg, 0 10 Cr, 0 25 Zn, 0 15 Ti, bal Al.
Extrusion (T6) 57,000 TS, 52,000 YS; 12 El
For light weight structural weldments, bridges, electrical towers
High strength extrusion alloy Heat treatable, corrosion resistant

ALUMINUM 6071
M 4, 1 1-1.9 Si, 0 50 Fe, 0.15-0 4 Cu, 0 40-1 0 Mn, 0 80-1 4 Mg, 0 10 Cr, 0 25 Zn, 0 15 Ti, bal Al
Rolled (T6) 50,000 TS, 48,000 YS, 6 El. (min)
For light weight structural weldments, commercial vehicles, process tanks
High strength sheet and plate
Heat treatable, corrosion resistant

ALUMINUM 6101
M-4, M-671, M-1147, 0 5 Mg, 0 5 Si, bal Al
T6 32,000 TS; 28,000 YS, 19 El, 70 Brin.
T63· 30,000 TS, 25,000 YS, 20 El, 65 Brin
T61: 25,000 TS, 20,000 YS, 22 El, 55 Brin
For bus conductors, electrical conductors
Maximum electrical conductivity with moderately high strength 55-59 5%

ALUMINUM 6151
M-1147, M-4, 0 05 Cu, 0 5 Mg, 0 01 Mn, 0 5 Fe, 1 1 Si, 0 2 Cr, bal Al
T-6 temper· 48,000 TS, 43,000 YS, 17 El; 100 Brin
For crankcases, fuse parts, marine and structural parts, heat treatable, good hot workability

ALUMINUM 6201
M-671, M-1147, 0.5-0.9 Si, 0.6-0 9 Mg, 0 5 max Fe, 0.3 max Mn, bal Al
T-81 Temper· 46,000-48,000 TS; 3 El
For electrical conductors
52 5% elect cond

ALUMINUM 6253.
M-671, 1.0-1.5 Mg, 0 15-0.35 Cr, 0.5 max Fe, 1.6-2.4 Zn, bal Al.
For cladding Aluminum 5056.

ALUMINUM 6262.
M-4; 0.4-0.8 Si, 0 15-0.40 Cu, 0.8-1.2 Mg, 0.04-0.14 Cr, 0 40-0.7 Pb, 0.40-0.7 Bi, bal Al.

T-9 Temper: 58,000 TS; 55,000 YS; 10 El; 120 Brin.
T-651 Temper: 45,000 TS, 40,000 YS; 17 El; 95 Brin.
For screw machine products, hardware, fittings, valves, camera and optcial parts.
Excellent resistance to general corrosion and stress corrosion Good weldability.

ALUMINUM 6351.
M-4, M-671; 0.6 Mg, 1.0 Si, 0.6 Mn, bal Al.
For heavy duty structures.
Corrosion resistant.

ALUMINUM 6463
M-1147, M-4; 0.20-0.6 Si, 0.45-0.9 Mg, 0.2 max Cu, 0.15 max Fe, 0.05 max Mn, bal Al.
T6 Temper 35,000 TS; 31,000 YS, 12 El, 74 Brin.
T5 Temper 27,000 TS, 21,000 YS; 12 El, 60 Brin.
For extruded trim and architectural components, window frames, panels. Age-hardenable.

ALUMINUM 6563
M-4, 0.20-0.45 Si, 0.35-0.70 Mg, 0.15 max Fe, 0.15 max Cu, 0.05 max Mn, bal Al
T6-temper. 28,000 TS; 21,000 YS, 12 El
For trim applications; heat treatable extrusions, bright luster for anodizing

ALUMINUM 6951
M-4, 0.2-0.5 Si, 0.15-0.40 Cu, 0.8 max Fe, 0.2 max Mn, 0.1 max Fe, bal Al.
O-Temper: 16,000 TS, 6000 YS, 30 El, 28 Brin.
T6-Temper 39,000 TS, 33,000 YS, 13 El, 82 Brin.
For brazed assemblies.
Heat treatable, clad with aluminum, 4343 or 4045 on one or both sides

ALUMINUM 7001
M-1235, M-4, 0.35 Si, 0.4 Fe, 1.2-2.6 Cu, 2.6-3.4 Mg, 0.18 0.40 Cr, 6.8-8.0 Zn, bal Al
T6-Temper. 98,000 TS, 88,000 YS, 10 El
For missile bodies, trailers, airframes, curtain walls; high strength

ALUMINUM 7002
M-671, M-4, 2.5 Mg, 3.5 Zn, 0.75 Cu, 0.20 Cr, bal Al
Heat Treated 67,000 TS, 57,000 YS; 12 El
For components of space equipment, armor plate for military vehicles and cryogenic uses
Heat treatable, weldable.

ALUMINUM 7004.
M-4, M-671, 1.4-2.0 Mg, 0.2-0.4 Mn, 4.0-4.6 Zn, 0.10 max Cu, 0.40 max Fe, 0.25 max Si, bal Al
Heat Treated 56,000 TS, 51,000 YS, 14 El
For large structures, dump truck bodies, railroad tank hopper cars
Heat treatable thru natural or artificial aging

ALUMINUM 7005
M-4, M-671, 0.20-0.70 Mn, 1.0 1.8 Mg, 4.2-5.0 Zn, 0.04 Ti, 0.1 Cr, O.1 Zr, bal Al.
T62-Temper 53,000, 45,000 YS, 14 El.
T53-Temper: 57,000 TS, 50,000 YS, 15 El.
T6-Temper 54,000 TS; 46,000 YS; 12 El
For brazing or soldering applications, and for extruded products, radiators and heat exchangers
Excellent resistance to stress corrosion.
Age-hardenable Readily brazable.

ALUMINUM 7006
M-4; 0.10 Si, 0.17 Fe, 0.04 Cu, 0.22 Mn, 2.24 Mg, 0.12 Cr, 4.10 Zn, 0.01 Ti, bal Al.
T-6 Temper: 65,200 TS, 58,600 YS; 10.5 El
T-63 Temper 62,000 TS, 57,000 YS; 15 El.
For welded structures, flight weight and cryogenic applications, missiles.
Excellent resistance to stress corrosion
Age-hardenable. Good weldability.

ALUMINUM 7007.
M-4; 1.4-2.2 Mg, 0.05-0.25 Cr, 6.0-7.0 Zn, 0.01-0.06 Ti, 0.05-0.25 Zr, bal Al.
T6 Temper: (At RT) 77,000 TS; 69,000 YS; 12 El.
(At -320°F) 93,000 TS; 83,000 YS; 5 El.
(At -423°F) 104,000 TS; 90,000 YS; 4 El.
For cryogenic services
Tough, weldable, good corrosion resistance, heat treatable

ALUMINUM 7038.
M-1147; 4-5 Zn, 3-4 Mg, 0.2 Si, 0.35 Fe, 0.10 Cu, 0.1-0.35 Mn, 0.5 Cr, 0.1 Ti, bal Al.
For cryogenic equipment, armor plate and aerospace equipment
High strength and good welding qualities.

ALUMINUM 7039
M-1147, M-4; 3.5-4.5 Zn, 2.3-3.3 Mg, 0.10-0.40 Mn, 0.15-0.25 Cr, 0.3 max Si, 0.4 max Fe, bal Al.
T6 Temper: 66,000 TS, 55,000 YS, 14 El; 145 Brin.
T61 Temper. 60,000 TS, 50,000 YS, 14 El, 140 Brin
For cryogenic equipment Armor plate on vehicle hulls, aerospace equipment.
Heat treatable
High strength and good welding qualities.

ALUMINUM 7072
M-4, 0.75 1.25 Zn, 0.1 max Cu, 0.1 max Mn, 0.6 max Fe, bal Al
For surface layer for clad alloys

ALUMINUM 7076
M 4, 0.4 max Si, 0.6 max Fe, 0.3-1.0 Cu, 0.3-0.8 Mn, 1.2-2.0 Mg, 0.2 Ti, 7.0-8.0 Zn, bal Al.
T6-tempered min 70,000 TS, 60,000 YS, 14 El, 140 Brin
For propellers, age hardenable, formerly 76S alloy.

ALUMINUM 7079
M-4, 0.3 Si, 0.4 Fe, 0.4-0.8 Cu, 0.1-0.8 Mn, 2.9-3.7 Mg, 0.1-0.25 Cr, 3.8-4.8 Zn, 0.1 Ti, bal Al
Plate T6 78,000 TS; 68,000 YS, 14 El, 145 Brin
For aircraft structures, mobile equipment, hydraulic units, bulkheads
Weldable, high strength forging alloy, age-hardenable

ALUMINUM 7080
M-4, 0.5-1.5 Cu, 1.5-3.0 Mg, 5.0-7.0 Zn, 0.1-0.7 Mn, 0.20 max Ti, bal Al
Forged T7 Temper 68,000 TS, 60,000 YS; 14 El.
For large airframe parts, aircraft landing components
Heat treatable, resists stress corrosion

ALUMINUM 7106.
M-4, 4.2 Zn, 2.2 Mg, 0.2 Mn, 0.1 Cr, bal Al
At 75°F 61,000 TS; 55,000 YS, 15 El
At −112°F. 64,000 TS; 60,000 YS, 15 El
For missile cases, space vehicle fuel and oxidizer tankage, large rocket motor cases.
Heat treatable. High fatigue strength.
Good weldability Good cryogenic toughness

ALUMINUM 7175.
M-4; 1.2-2.0 Cu, 2.1-2.9 Mg, 0.18-0.30 Cr, 5.1-6.1 Zn, 0.10 max Ti, bal Al.
For light weight structures; age-hardenable.

ALUMINUM 7178.
M-1147, M-4, 1.6-2.4 Cu, 2.4-3.1 Mg, 0.18-0.40 Cr, 6.3-7.3 Zn, 0.2 Ti, bal Al
Rolled. 84,000 TS; 73,000 YS; 8 El.
T6 Temper: 88,000 TS; 78,000 YS.
For aircraft structural members.
High strength, age-hardenable.

ALUMINUM 7179.
M-4; 0.4-0.8 Cu, 0.1-0.3 Mn, 2.9-3.7 Mg, 0.10-0.25 Cr, 3.8-4.8 Zn, bal Al. .
For aircraft components; age-hardenable.

ALUMINUM 7275.
M-1147; 1.2-2.0 Cu, 2.1-2.9 Mg, 0.18-0.40 Cr, 5.1-6.1 Zn, 0.10 max Ti, bal Al.
Age hardenable aluminum alloy for light weight construction.
T-6: 87,000 TS; 76,000 YS.

ALUMINUM 7277.
M-4; 1.25 Cu, 2.0 Mg, 4.0 Zn, 0.25 Cr, bal Al.
For light alloy parts, rivets; age-hardenable.

ALUMINUM 7279.
M-1147; 0.4-0.8 Cu, 0.1-0.3 Mn, 2.9-3.7 Mg, 0.10-0.25 Cr, 3.8-4.8 Zn, bal Al.
For aircraft components; age-hardenable.

ALUMINUM 8001.
M-4; 1.2 Ni, 0.6 Fe, 0.15 max Cu, 17 max Si, bal Al.
O-temper: 16,000 TS: 6000 YS, 40 El, 28 Brin.
H14-temper: 22,000 TS; 21,000 YS, 16 El; 40 Brin.
H18-temper· 29,000 TS; 27,000 YS; 10 El; 55 Brin.
For atomic energy reactor components, resists corrosive effects of high temperature water.

ALUMINUM 8002.
M-4, 1.2-1.6 Fe, 1.2-1.6 Ni, 0.05 max Cu, 0.25 max Si, bal Al
For light alloy parts.

ALUMINUM 8013.
M-1147; 0.20-0.50 Cr, 0.10 max Ti, 0.25 max Si + Fe, bal Al.
For light weight parts; corrosion resistant.

ALUMINUM 8081.
M-4, M-1625; 18-22 Sn, 0.7 max Si, 0.10 max Mn, 0.7 max Fe, 0.7-1.3 Cu, 0.10 max Ti, 0.15 max others, bal Al.
H25 Temper: 24,000 TS, 21,500 YS; 13 El
H112 Temper: 28,000 TS, 25,000 YS; 10 El.
For bearings. Steel backed automotive bearings, bearings for light duty diesel engines, gas turbines, farm tractors, improved corrosion resistance.

ALUMINUM 8212
M-1147, 0.10-0.40 Cu, 0.15-0.50 Mn, 0.05-0.35 Mg, 1.0 max Si, 1.0 max Fe, 1.0 max Zn, bal Al.
For light weight parts.

ALUMINUM 8280.
M-4, 6.5 Sn, 1.0 Cu, 0.5 Ni, 1.5 Si, bal Al.
O-temper. 21,000 TS; 8000 YS, 25 El; 75 Brin
H12-temper· 25,000 TS; 23,000 YS; 6 El; 95 Brin.
For bearings; cast alloy, maximum operating temperature of 300°F.

ALUMINUM 8280.
M-1625; 0.7-1.3 Cu, 0.2-0.7 Ni, 1.0-2.0 Si, 5.5-7.0 Sn, bal Al.
Annealed: 17,000 TS, 70,000 YS, 28 El; H 65 Rock.
H16 Temper 27,000 TS, 25,000 YS; 5 El; H 92 Rock.
For bearings made from continuous coils for automotive engines.
High load carrying capacity, excellent fatigue strength.

ALUMINUM ASCR.
M-1147; 99.9 Al.
For cables: high conductivity.

ALUMINUM BRASS.
M-33; 76 Cu, 22 Zn, 2 Al, 0.03 Sb.
Annealed: 57,000 TS; 23,000 YS; 53 El.
For condenser and heat exchanger tubes; corrosion resisting.

ALUMINUM BRASS.
M-102; 76 min Cu, 1.75-2.50 Al, bal Zn.
Annealed: 60,000 TS; 50 El.
Hard· 85,000 TS; 15 El.
For condenser tubes; corrosion resistant.

ALUMINUM BRONZE.
M-129; 87.5 Cu, 4.1 Al, 1.7 Fe, 6.6 Zn.
Hot rolled: 63,900 TS; 35,000 YS; 6.5 El.
Cold drawn: 98,000 TS; 90,500 YS; 13.0 El; 14.0 RA.
For bearings, gears; heavy duty.

ALUMINUM BRONZE.
M-508; 86-90 Cu, 1-4 Fe, 8-12 Al, 1-4 Mn.
Cast: 60,000-90,000 TS; 20-4 El; 150-250 Brin.
For centrifugal castings, valve seat rings, heat treatable.

ALUMINUM BRONZE NO. 1
M-1518, Al, Fe, bal Cu.
Cast. 71,700 TS, 20 El; 90-140 Brin.
For high strength castings, corrosion resistant, good strength at high temperature.

ALUMINUM BRONZE NO 2.
M-1518, Al, Fe, bal Cu.
Cast· 89,600 TS; 12 El; 156-187 Brin
For high strength castings; corrosion resistant, retains strength at high temperature.

ALUMINUM BRONZE 5%
M-8, 95 Cu, 5 Al
Hard· 105,000 TS, 5 El
Soft: 52,000 TS, 70 El
For diaphragms to withstand pressure, condenser tubes, M P 1060°C

ALUMINUM BRONZE 135
M-177, 10 Al, bal Cu
For hardware, Al-bronze

ALUMINUM BRONZE 136
M-177, 10 Al, 1 Fe, bal Cu.
For propellers, Al-bronze

ALUMINUM BRONZE 707.
M-141, 7.15 Al, 2 Si, bal Cu
Soft· 90,000 TS, 50,000 YS; 30 El, 165 Brin
For boat shafting, pump rods, gears, Al-bronze, corrosion resistant

ALUMINUM BRONZE E-707
M-1191, 6.2-8.0 Al, 1.6-2.2 Si, bal Cu
Forged 85,000-90,000 TS; 30,000-40,000 YS; 25-20 El; 120-142 Brin.
For marine hardware, propellers, gears, fasteners, bolts, high strength; corrosion resistant.

ALUMINUM BRONZE 712
M-141, 95.5 Cu, 1.0 Si, 3.5 Al
Spring: 114,000 TS, 80,000 YS, 3 El; B97 Brin.
Soft: 65,000 TS; 24,000 YS, 55 El, B60 Brin.
For spring contacts, diaphragms, bellows, spring properties, tough, 12% conductivity.

ALUMINUM BRONZE 715.
M-141, 2.9 Al, 0.35 Si, bal Cu.
Hard: 75,000 TS; 15 El
Soft· 40,000 TS; 55 El.
For bolts, nuts, screws, aluminum bronze, corrosion resistant.

ALUMINUM-EC.
M-4, M-671; 99.45 min Al
O-Temper: 12,000 TS, 4000 YS; 8000 SS.
H14 Temper: 16,000 TS, 14,000 YS, 10,000 SS.
H19 Temper: 27,000 TS; 24,000 YS; 15,000 SS.
For bus bars, electrical conductors.
High electrical conductivity.

ALUMINUM GENUINE.
M-565; Pb, Sb, bal Sn.
For bearings; Babbitt metal.

ALUMINUM IRON BRONZE "B."
85.16 Cu, 9.43 Al, 4.74 Fe, 0.38 Pb, 0.09 P.
For strong corrosion resistant structural parts;
corrosion resistant.

ALUMINUM IRON BRONZE "H."
89.43 Cu, 6.97 Al, 3.41 Fe.
For strong corrosion resistant structural parts;
corrosion resistant.

ALUMINUM IRON BRONZE "R."
85.16 Cu, 6.6 Al, 7.52 Fe, 0.5 Mn.
For strong corrosion resistant structural parts,
corrosion resistant

ALUMINUM-K
M-297; 11.5-13.5 Si, 0.4-1.5 Cu, 0.8-1.5 Mg,
1-2 Ni, 0.5 max Mn, bal Al.
At 75°F. 55,000 TS; 46,000 YS; 9 El; 120 Brin
At 700°F: 35,000 TS; 2000 YS, 90 El.
For forged pistons; for elevated temperature use.

ALUMINUM KSS
M-624, 1.7-2.3 Mg, 1.0-1.4 Mn, bal Al.
For light alloy parts for marine service;
corrosion resistant

ALUMINUM-NICKEL NiAl-14Ti
M-297; 4-5 Al, 0.5 Ti, bal Ni.
For heating elements, heat and corrosion resistant.

ALUMINUM OILITE.
M-211; Al alloy
For bearings, self-lubricating, porous

ALUMINUM-OY
Eng; 4 Cu, bal Al
For light alloy parts, age-hardened.

ALUMINUM RABC
M-671, Al
29,000 TS, 25,000 YS
For bus conductors, 55% electrical conductivity.

ALUMINUM "S"
M-963,
Silicon aluminum wire for metallizing gun,
for build up on aluminum parts

ALUMINUM SILICON BRONZE,
Copper Alloy No 637
M-33, 91 Cu, 7 Al, 2 Si
Light annealed 92,000 TS, 53,000 YS, 35 El,
51,000 shear, 93 Rock B
For bolts, connectors, sleeves, gears,
marine hardware, studs, pump parts.
ASTM B150 Alloy 1, CDA 637

ALUMINUM SOLDER (A).
30 Zn, 65 Sn, 5 Bi
For Al solder

ALUMINUM SOLDER (B).
50 Zn, 1.5 Cu, 33 Sn, 2 Sb, 12.5 Pb. Al solder.

ALUMINUM SOLDER (C).
57 Zn, 43 Cd.
For Al solder.

ALUMINUM SOLDER (D).
Eng; 67.5 Sn, 1 Cu, 16.5 Zn, bal Al
7,100 TS
For Al solder

ALUMINUM SOLDER (E).
Eng.; 53 Sn, 40 Zn, 7 Al.
6,700 TS
For Al solder.

ALUMINUM SOLDER, FRISMUTH (A).
47.5 Zn, 5.5 Cu, 31.5 Sn, 10.5 Al, 5.5 Ag.
For Al solder.

ALUMINUM SOLDER, FRISMUTH(B).
47.4 Zn, 5.3 Cu, 36.8 Sn, 10.5 Al.
For Al solder.

ALUMINUM SOLDER, FRISMUTH (C).
67 Sn, 27 Pb, 3 Al.
For Al solder.

ALUMINUM SOLDER, GRIMM'S (A).
69.1 Sn, 28.8 Pb, 1.44 Zn, 0.72 Ag.
For Al solder

ALUMINUM SOLDER, GRIMM'S (B).
50 Sn, 25 Pb, 25 Zn
For Al solder

ALUMINUM SOLDER RICHARDS
25 Zn, 71.5 Sn, 3.5 Al.
For Al solder

ALUMINUM TITANIUM BRONZE
U S; 90-89 Cu, 9-10 Al, 1 Fe, Ti
For propellers, strong, tough

ALUMINUM UNION NO. 3S.
M-644, 1.5 max Mn, bal Al.
Hard: 25,000 TS, 22,000 YS.
Soft: 14,000 TS, 5,000 YS
For light alloy body paneling and molding;
corrosion resistant.

ALUMINUM UNION NO 14S
M-644, 4.4 Cu, 0.35 Mg, 0.75 Mn, 0.8 Si, bal Al
Heat treated 62,000 TS; 18 El; 130 Brin.
For forged aircraft light alloy parts; heat treatable.

ALUMINUM UNION 17S.
M-644, 3.5-4.5 Cu, 0.4-0.7 Mn, 0.4-0.7 Mg,
bal Al.
For light alloy parts, aircraft, heat treatable

ALUMINUM UNION 22S
M-644, 3.5-4.7 Cu, 0.7-1.5 Si, 0.4-1.0 Mg,
0.4-1.5 Mn, bal Al.
Heat treated. 56,000 TS, 44,000 YS; 8 El.
For light alloy parts, aircraft, heat treatable

ALUMINUM UNION 24S
M-644, 3.5-4.8 Cu, 0.8-1.8 Mg, 0.3-1.5 Mn, bal Al.
Heat treated 56,000 TS, 35,000 YS, 15 El.
For light alloy parts, aircraft, heat treatable

ALUMINUM UNION 27S
M-644; 4.5 Cu, 0.8 Mn, 0.8 Si, 0.05 Sn, bal Al
Heat treated: 58,000 TS, 30,000 YS.
For forged aircraft parts, heat treatable

ALUMINUM UNION 35S
M-644, 10-13 Si, bal Al.
For light alloy paneling, non heat treatable.

ALUMINUM UNION 51S
M-644, 0.5-1.5 Si, O.5-1.5 Mg, bal Al
Heat treated: 40,000 TS, 31,000 YS, 8 El.
For light alloy architectural structure, heat treatable.

ALUMINUM UNION A51S
M-644; 0.6 Mg, 1.0 Si, 0.25 Cr, bal Al.
Heat treated: 40,000 TS; 15 El
For light alloy forgings; non-hardenable.

ALUMINUM UNION 57S.
M-644, 1.5-3.0 Mg, 0.1-0.35 Cr, bal Al.
Heat treated: 32,000 TS; 28,000 YS; 5 El.
For light alloy paneling, aircraft;
heat treatable.

ALUMINUM UNION 123.
M-644; 5 Si, bal Al.
Cast: 16,000 TS; 4 El; 40 Brin.
For light alloy castings, aircraft, corrosion resistant.

ALUMINUM UNION 125.
M-644; 4.5-5.5 Si, 1.0-1.5 Cu, 0.4-0.6 Mg, bal Al.
Heat treated: 30,000 TS; 22,000 YS.
For cylinder heads, valve bodies;
pressure proof castings.

ALUMINUM UNION 126.
M-644; 1.4 Cu, 0.5 Mg, 0.75 Mn, 0.75 Ni,
5.0 Si, bal Al.
Heat treated: 26,000-32,000 TS; 3-1 El.
For aircooled cylinder heads; heat treatable

ALUMINUM UNION 135.
M-644; 0.3 Mg, 7.0 Si, bal Al
Heat treated: 26,000-32,000 TS, 6-12 El.
For light alloy castings; corrosion resistant.

ALUMINUM UNION 160.
M-644; 12 Si, bal Al.
For light alloy castings, high fluidity

ALUMINUM UNION 162.
M-664; 12-15 Si, 1.5-2.5 Ni, 0.75-1.25 Mg,
0.5-1.0 Cu, bal Al
For pistons; low thermal expansion

ALUMINUM UNION 218
M-664; 4.0 Cu, 1.5 Mg, 2.0 Ni, bal Al
For pistons, cylinder heads, "Y" alloy

ALUMINUM UNION 225
M-664, 4 Cu, bal Al.
Heat treated: 36,000 TS, 4 El.
For aircraft light alloy castings, age-hardenable

ALUMINUM UNION 350
M-664; 8.5-11.5 Mg, bal Al.
Cast: 36,000 TS, 22,000 YS, 14 El
Heat treated 44,000 TS, 28,000 YS, 12 El.
For light alloy castings; highest strength,
ductility and impact.

ALUMINUM Y Ti
M-1219, M-1220, M-549, 3.8-4.2 Cu, 1.3-1.7 Mg,
0.2 Ti, 1.8-2.3 Ni, bal Fe
For pistons, cylinder heads, age hardenable,
heat resistant.

ALUMINWELD
M-578, 4.5 Si, 0.8 Fe, 0.3 Cu, 0.5 Mg,
0.10 Zn, 0.20 Ti, bal Al.
Aluminum alloy arc welding electrodes
AWS Class Al-43.

ALUNEON.
Al alloy
For light alloy parts.

ALUSIL
M-1548; 1.0-2.0 Cu, 20-21 Si, 0.7 max Ni,
0.7 max Fe, bal Al
For engine pistons, cylinder liners, pumps.
Low density and low expansivity.

ALUSIL N. 280
M-1548, 22 Si, 1 Cu, 1 Ni, 1 Co, 1 Mg,
0.5 Cr, bal Al
Cast. 25,000-35,000 TS, 100-140 Brin
For pistons in engines, pumps, cylinder liners
Low density and low expansivity.

ALUTIN 51-S.
M-717;
For soldering aluminum and other metals
Melts 320; 7,000 TS

ALUVAC.
M-679, 4 Cu, bal Al.
For light alloy parts; heat treatable.

ALUWANGAN.
M-1372; 0.5-1.5 Mn, 0.3 max Cr, bal Al.
Soft: 16,000 TS; 6000 YS; 40 El.
Hard. 29,000 TS; 27,000 YS; 10 El.
For cooking utensils, heat exchangers, tanks,
furniture; good welding and forming properties.

ALUWE-1.
M-1373, Al alloy.
For light alloy parts.

ALUWE-4.
M-1373; Al alloy.
For light alloy parts

ALUWE-6
M-1373, Al alloy.
For light alloy parts.

ALUWE-8.
M-1373, Al alloy
For light alloy parts

ALUWE-22
M-1373, Al alloy.
For light alloy parts

ALUWE-53
M-1373; Al alloy.
For light alloy parts

ALUWE-55
M-1373, Al alloy
For light alloy parts

ALUWE-57
M-1373, Al alloy
For light alloy parts

ALVA 36
German; 3 Pb, 3 Sb, 2 Cu, Mn, bal Al
Wrought 30-80 Brin
For bearings

ALVA ALLOY HOLLOW DRILL STEEL
M-38, 0.8 C, 0.3 Mn, 0.15 Si, 0.2 V, bal Fe
For hollow drill rod for detachable bits,
fatigue resistant

ALVA DUPLEX FORGING
M-38 0.40 C, 1.2 Cr, 0.2 V, bal Fe
Heat treated 130,000 TS, 112,000 YS, 20 El,
52 RA; 290 Brin
For axles, pins, shafts

ALVA EXTRA
M-38, 1.0 C 0.25 V, bal Fe
For blanking, threading, forming dies, taps,
1150°C max, water hardening W2

ALX CAST ALLOY.
M-1; 2 C, 17 W, 33 Cr, 40 Co, B, bal Fe
For cutting tool bits, fast cutting, centrifugally cast

ALZEN
French, 66.6 Al, 33.4 Zn
For strong light alloy parts, not hardenable

ALZEN 305
French, Zn, Al, bal Cu.
For bearings, bronze

ALZIN.
French; 20 Zn, bal Al
Cast. 18,000-28,000 TS, 2-3 El; 62-65 Brin
For light alloy parts, non-hardenable

ALZINC
French, 20 Zn, 80 Al.
21,000 TS; 2 El, 80 Brin.
For light castings; Sibley casting alloy

A M 1 SPECIAL.
M-210; 0.35 C, 1.0 Si, 1.35 W, 5.0 Cr, 1.5 Mo,
0.45 V, bal Fe.
For extrusion dies, heading dies, mandrels;
hot work steel, resists heat checking.

A.M. 3 DIE STEEL.
M-210; 0.40 C, 1.05 Si, 5.0 Cr, 1.35 Mo, 1.1 V, bal Fe.
For die casting dies, extrusion dies, upsetters; air hardened, resists heat checking

AM6.
German, 6 Ce, 2 Mn, bal Mg.
For light alloy parts for high temperature use; ASTM-EM62; cast and wrought.

AM10.
German; 10 Ce, bal Mg.
For pistons, supercharger impeller, ASTM-E10.

AM100A.
Various foundries; 10.0 Al, 0.10 min Mn, bal Mg
F-Temper. 20,000-22,000 TS, 10,000-12,000 YS, 0-2 El
T4-Temper· 34,000-40,000 TS; 10,000-13,000 YS; 6-10 El.
T6-Temper· 34,000-40,000 TS; 17,000-22,000 YS, 0-1 El
Magnesium permanent mold casting with good pressure tightness and strength and good weldability.
For housings for motors and power tools
ASTM B199-68; AMS 4483; QQ-M-55, SAE 502

AM503
M-325, 1.5 Mn, bal Mg
Plate, sheet, strip, extrusions
24,000-30,000 TS; 8,000-14,000 YS(est); 4-5 El, 35-55 VDH
Low strength alloy with very good welding characteristics, for fuel and oil tanks,

AM-537
German, Al, Zn, bal Mg
For light alloy parts, heat treatable

AMALLOY
M-1638, 7 Mg, 0.1 Mn, 0.15 Fe, 0.14 Ti, 0.01 Cu, bal Al
As Cast 34,000-38,000 TS, 19,000 YS, 7-10 El, 70 Brin
For dairy, agricultural, cookware, hardware, aircraft, transportation and oil field equipment
Corrosion and impact resistant
Sand, permanent mold and die castings

AMALOY.
M-132, 0.60-0.70 C, 0.70-0.90 Mn, Mo, bal Fe
For tools, dies, water hardened

AMALOY-1.
M-524, 97.5 Pb, 2.5 Sn
For protective coating against corrosion, applied to ferrous and copper alloys

AMALOY-2
M-524; 90-97.5 Pb, 2.5-10 Sn
For protective coating against corrosion, applied to ferrous and copper alloys

AMALOY-3.
U.S., Ni, Cr, W
For corrosion and heat resistant parts; corrosion and heat resistant

AMANIMPHY.
M-771; nickel alloy
For motors, electrical equipment, non-magnetic.

AMAX METAL
U.S.; 81 Cu, 11 Sn, 7.4 Pb, 0.3 P.
For bearings; heavy duty.

AMBEROID
M-135, 15 Ni, 23 Zn, bal Cu.
Annealed: 50,000 TS; 20,000 YS; 60 El; 63 Brin.
Hard: 114,000 TS; 110,000 YS; 2 El; 228 Brin.
For costume jewelry, hollowware, optical equipment; nickel silver.

AMBO AST.
M-1315, 0.45 C, Cr, Ni, W, bal Fe.
For machinery parts, tools and dies; oil hardening, tough.

AMBO BW1.
M-1315; 1.05 C, 1.0 Cr, 0.3 Mn, bal Fe.
For bearings, sleeves, liners, water hardened, wear resistant

AMBO BWC
M-1315, 1.0 C, 1.55 Cr, 0.35 Mn, bal Fe.
For bearings, sleeves, liners, water hardened, wear resistant.

AMBO BWG
M-1315; 0.90 C, 0.80 Cr, 0.3 Mn, bal Fe.
For bearings, cutters, dies, sleeves, water hardened, wear resistant.

AMBO BWW
M-1315, 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe.
For forming and blanking dies, bearings, water hardened, wear resistant

AMBO C15W3
M-1315, 0.15 C, 0.25 Si, 0.37 Mn, bal Fe
Annealed 70,000 TS, 40,000 YS, 25 El; 60 RA; 145 Brin
For gears, pinions, camshafts, cams; case hardening steel

AMBO C22W3
M-1315, 0.22 C, 0.25 Si, 0.45 Mn, bal Fe
Annealed. 75,000 TS, 43,000 YS, 20 El, 55 RA; 150 Brin
For gears, pinions, camshafts, cams, case hardening steel

AMBO C35W3
M-1315, 0.35 C, 0.25 Si, 0.55 Mn, bal Fe.
Hot rolled 85,000 TS, 54,000 YS, 30 El; 53 RA; 185 Brin
For gears, pinions, shafts, bolts, water hardened

AMBO C45W3
M-1315, 0.45 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled 98,000 TS, 59,000 YS, 24 El, 45 RA, 212 Brin
For gears, pinions, shafts, bolts, fasteners; water hardened.

AMBO C53W3
M-1315, 0.53 C, 0.38 Si, 0.55 Mn, bal Fe.
Normalized 100,000 TS, 55,000 YS, 18 El, 26 RA; 200 Brin.
For gears, pinions, shafts, axles, bolts, fasteners, water hardened

AMBO C60W3.
M-1315, 0.60 C, 0.25 Si, 0.65 Mn, bal Fe
Heat treated· 160,000 TS, 115,000 YS, 12 El; 40 RA; 325 Brin.
For springs, rails, machine tool parts, axes; water hardened

AMBO CMO
M-1315, 0.20 C, 1.25 Mn, 1.25 Cr, bal Fe.
For gears, cams, camshafts; case hardened, tough.

AMBO CMO4E
M-1315; 0.15 C, 1.0 Cr, 0.2 Mo, bal Fe.
For gears, bolts, machine tool parts; case hardened, tough.

AMBO CMO5E.
M-1315, 0.20 C, 1.0 Cr, 0.2 Mo, 0.25 Si, 0.65 Mn, bal Fe.
For gears, bolts, machine tool parts; case hardened, tough.

AMBO CMV.
M-1315; 0.25 C, 1.0 Cr, 0.2 Mo, bal Fe.
For gears, bolts, fasteners, machine tool parts; oil hardened, tough.

AMBO CMV25.
M-1315; 0.33 C, 1.0 Cr, 0.2 Mo, 0.65 Mn, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

AMBO CMV30.
M-1315; 0.42 C, 1.0 Cr, 0.2 Mo, 0.65 Mn, bal Fe.
For gears, studs, bolts, shafts, oil hardened, tough.

AMBO CMV50.
M-1315; 0.50 C, 1.0 Cr, 0.2 Mo, bal Fe
For gears, bolts, studs, shafts; oil hardened, tough.

AMBO CNM6
M-1315; 0.56 C, Ni, Cr, Mo, V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

AMBO CNMV.
M-1315, 0.55 C, 1.65 Ni, 0.9 Cr, 0.18 Mo, 0.1 V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

AMBO Cr13.
M-1315; 1.65 C, 11.5 Cr, 0.10 V, bal Fe.
For blanking and forming dies, punches, *air hardening, non-deforming.*

AMBO Cr13Co.
M-1315, 1.65 C, 11.5 Cr, Co, bal Fe
For blanking and forming dies, punches; air hardened, non-deforming.

AMBO Cr13MW.
M-1315, 1.65 C, 11.5 Cr, Mo, V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming.

AMBO CRT
M-1315; 0.90 C, 1.9 Mn, 0.1 V, bal Fe.
For punches, dies, upsetters, crimpers, oil hardened, non-deforming.

AMBO CrV50.
M-1315; 0.50 C, 0.95 Mn, 1.05 Cr, 0.1 V, bal Fe
For gears, springs, crankshafts, bolts, studs; oil hardened, shock resistant.

AMBO CrZ.
M-1315, 2.1 C, 11.5 Cr, 0.3 Mn, bal Fe
For blanking and forming dies, punches, oil hardened, non-deforming

AMBO CrZW.
M-1315, 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For blanking and forming dies, punches, oil hardened, non-deforming.

AMBO CSJ.
M-1315, 0.61 C, 1.18 Cr, 0.1 V, 0.7 Mn, 0.85 Si, bal Fe
For springs, valves, countershafts, oil hardened, shock resistant.

AMBO DCM.
M-1315; 0.40 C, Cr, Mo, Mn, bal Fe
For gears, bolts, crankshafts, fasteners, oil hardened, tough.

AMBO DCN3.
M-1315; 0.50 C, 1.05 Cr, 3.25 Ni, 0.50 Mn, bal Fe.
For gears, bolts, crankshafts, studs; oil hardened, shock resistant.

AMBO DCN4.
M-1315, 0.31 C, 0.7 Cr, 3.5 Ni, 0.6 Mn, bal Fe.
For gears, bolts, machine tool parts; oil hardened, shock resistant.

AMBO DCN4E.
M-1315; 0.4 C, 0.7 Cr, 3.5 Ni, 0.6 Mn, bal Fe.
For gears, bolts, crankshafts, fasteners, oil hardened, shock resistant

AMBO DCN5.
M-1315; 0.35 C, 1.1 Cr, 4.5 Ni, 0.6 Mn, bal Fe
For gears, bolts, crankshafts; oil hardened, shock resistant

AMBO DCN5E.
M-1315, 0.40 C, Cr, Mn, Mo, bal Fe
For gears, bolts, machine tool parts, oil hardened, tough

AMBO DCNV
M-1315, 0.36 C, 0.6 Mn, 0.7 Cr, 2.5 Ni, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant

AMBO DCZ
M-1315, 0.40 C, Cr, Mn, Mo, bal Fe
For gears, bolts, machine tool parts, oil hardened, tough.

AMBO DM2
M-1315, 0.15 C, 0.37 Mn, 0.25 Si, bal Fe.
Annealed 70,000 TS, 40,000 YS, 25 El; 60 RA, 145 Brin For gears, shafts, cams, camshafts; case hardening steel

AMBO DM3
M-1315, 0.35 C, 0.55 Mn, 0.25 Si, bal Fe
Hot rolled 85,000 TS, 54,000 YS, 30 El, 53 RA; 185 Brin
For gears, pinions, shafts, water hardened

AMBO DM4
M-1315, 0.45 C, 0.25 Si, 0.65 Mn, bal Fe
Hot rolled 98,000 TS, 59,000 YS, 24 El, 45 RA, 212 Brin
For gears, pinions, shafts, axles, countershafts, water hardened

AMBO DM5
M-1315, 0.60 C, 0.25 Si, 0.65 Mn, bal Fe
Heat treated. 160,000 TS, 113,000 YS, 12 El, 40 RA; 321 Brin
For axles, guides, punches, crimpers; water hardened

AMBO DM6
M-1315, 0.75 C, 0.38 Si, 0.70 Mn, bal Fe.
Heat treated: 175,000 TS, 130,000 YS, 12 El, 37 RA, 355 Brin.
For springs, tools, dies, punches, crimpers, Type WI; water hardened

AMBO DR5
M-1315; 1.3 C, 4.75 W, bal Fe
For cutters, form tools, fast finishing steel, water hardened.

AMBO EM3CV
M-1315; 1.0 C, 0.07 Mn, 1.1 Cr, bal Fe.
For bearings, liners, bushings, water hardened, wear resistant.

AMBO EM3 EXTRA.
M-1315; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed. 110,000 TS; 56,000 YS; 20 El; 40 RA; 210 Brin
For springs, cutters, reamers, taps, drills, hobs; water hardened, Type WI.

AMBO EM3 EXTRA EXTRA
M-1315, 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 56,000 YS; 20 El;
40 RA; 210 Brin.
For springs, cutters, reamers, taps, drills,
hobs; Type Wl; water hardened.

AMBO EM3 PRIMA.
M 1315; 0.75 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated: 180,000 TS; 135,000 YS;
12 El; 35 RA; 375 Brin.
For springs, rails, punches, upsetters,
Type Wl; water hardened.

AMBO EM3W.
M-1315, 1.2 C, 0.1 V, 0.2 Cr, 1.0 W, bal Fe
For bearings, cutters, tools, dies;
water or oil hardened, wear resistant

AMBO EM4 EXTRA
M-1315, 1.0 C, 0.25 Si, 0.25 Mn, bal Fe
Annealed 100,000 TS, 53,000 YS;
21 El, 42 RA; 200 Brin.
For drills, taps, springs, reamers, hobs,
Type W1, water hardened.

AMBO EM4 EXTRA EXTRA.
M-1315, 1.0 C, 0.25 Si, 0.25 Mn, bal Fe
Annealed 100,000 TS; 53,000 YS,
21 El, 42 RA; 200 Brin
For springs, drills, reamers, taps, Type Wl,
water hardened

AMBO EM4 PRIMA
M 1315, 0.60 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Heat treated 160,000 TS, 113,000 YS, 12 El,
40 RA, 325 Brin
For gears, bolts, crankshafts, rails, springs,
water hardened.

AMBO EM5 EXTRA
M-1315, 0.85 C, 0.25 Si, 0.25 Mn, bal Fe
Heat treated· 190,000 TS; 145,000 YS, 10 El;
30 RA, 400 Brin
For springs, tools, drills, dies, cutters;
Type Wl, water hardened

AMBO EM5 EXTRA EXTRA
M-1315, 0.85 C, 0.25 Si, 0.25 Mn, bal Fe
Heat treated. 190,000 TS, 145,000 YS, 10 El,
30 RA, 400 Brin
For springs, tools, drills, dies, cutters,
Type Wl, water hardened

AMBO EM5 PRIMA
M-1315, 0.45 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Hot rolled. 98,000 TS, 59,000 YS,
24 El, 45 RA, 215 Brin.
For gears, pinions, bolts, fasteners, shafts,
water hardened

AMBO EM6 EXTRA
M-1315, 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 175,000 TS, 128,000 YS, 12 El;
37 RA, 355 Brin.
For springs, rails, hammers, machine tool parts,
Type Wl; water hardened.

AMBO EM6 EXTRA EXTRA.
M-1315; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 175,000 TS, 128,000 YS,
12 El; 37 RA, 355 Brin.
For springs, rails, hammers, cutters, punches;
Type Wl, water hardened

AMBO EM6 PRIMA.
M-1315; 0.35 C, 0.25-0.50 Si, 0.3-0.8 Mn,
bal Fe
Hot rolled: 85,000 TS; 54,000 YS,
30 El; 53 RA; 185 Brin
For gears, bolts, fasteners, machine tool parts;
water hardened.

AMBO EMV.
M-1315; 1.0 C, 0.20 Si, 0.25 Mn, 0.1 V, bal Fe.
For drills, taps, reamers, broaches; Type W2;
water hardened.

AMBO HHCA8.
M-1315, 0.12 max C, 0.8 Al, 6.5 Cr, bal Fe.
For oil refinery equipment; creep and
heat resistant.

AMBO HHCA10.
M 1315; 0.12 max C, 1 Si, 1 Al, 18 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant.

AMBO HHCA12.
M-1315; 0.12 max C, 1.5 Si, 1.5 Al, 24 Cr,
bal Fe
For oil refinery equipment, creep and
heat resistant.

AMBO HHCN100
M-1315, 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed. 80,000 TS; 35,000 YS;
55 El; 75 RA; 150 Brin
For chemical plant equipment, tanks, mixers;
Type 302, stainless, austenitic.

AMBO HHCN120
M-1315, 0.15 C, 24 Cr, 19 Ni, bal Fe.
Annealed 100,000 TS, 45,000 YS, 50 El, 65 RA;
185 Brin
For valves, pumps, turbine and jet parts;
Type 310, corrosion and heat resistant

AMBO HHCN120S
M-1315, 0.2 C, 25 Cr, 4 Ni, 1.2 Si, bal Fe.
Cast 90,000 TS, 65,000 YS, 2 El, 212 Brin.
For cylinder linings, bushings, valve seats
and bodies, Type CC-50

AMBO Mn 12
M-1315, 1.2 C, 12.5 Mn, bal Fe
For wear plates, dipper teeth, rail frogs;
wear and abrasion resistant

AMBO MS4
M 1315, 0.53 C, 0.90 Si, 0.90 Mn, bal Fe
For punches, chisels, pneumatic tools, oil
hardened, tough

AMBO MS5
M-1315, 0.55 C, 1.7 Si, 0.70 Mn, bal Fe
For springs, chisels, punches, pneumatic tools,
oil hardened, shock resistant.

AMBO MSIN
M-1315, 0.65 C, 1.7 Si, 0.7 Mn, bal Fe.
For springs, punches, pneumatic tools; oil
hardened, shock resistant.

AMBO MSJ
M-1315, 0.53 C, 0.90 Si, 0.90 Mn, bal Fe.
Annealed· 96,000 TS; 52,000 YS, 16 El; 23 RA;
170 Brin
For axles, gears, bolts, tie-rods, bushings;
water hardened

AMBO MSO
M-1315; 0.90 C, 1.9 Mn, 0.10 V, bal Fe.
For blanking and forming dies, thread rolling dies;
oil hardened, non-deforming

AMBO NR2A.
M-1315; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed 80,000 TS; 35,000 YS; 55 El; 75 RA;
160 Brin.
For chemical plant equipment, tanks, fermenters;
Type 302; stainless, austenitic.

AMBO NR2AE.
M-1315, 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C,
bal Fe.

Annealed: 90,000 TS; 45,000 YS; 56 El; 65 RA; 160 Brin.
Cold drawn: 100,000 TS, 65,000 YS; 45 El; 60 RA; 205 Brin.
For welded chemical plant equipment, tanks, fixtures; Type 347, stainless, austenitic.

AMBO NR2AS.
M-1315; 0.07 C, 18 Cr, 9.5 Ni, bal Fe
Annealed: 85,000 TS, 35,000 YS; 60 El; 70 RA; 150 Brin
Cold drawn 180,000 TS, 125,000 YS; 10 El, 330 Brin.
For welded chemical plant equipment, tanks; Type 304; stainless, austenitic

AMBO NR2ATE.
M-1315, 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 55 El; 65 RA; 150 Brin.
Cold drawn: 95,000 TS, 60,000 YS; 40 El; 60 RA; 185 Brin.
For welded chemical plant equipment, tanks; Type 321, stainless, austenitic.

AMBO NR4AE
M-1315; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe
Annealed. 85,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin.
Cold drawn: 150,000 TS, 135,000 YS, 6 El, 300 Brin
For acid resistant equipment, welded, Type 316 Ti, stainless, austenitic.

AMBO NR4AS.
M-1315, 0.07 max C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin
Cold drawn: 150,000 TS, 135,000 YS, 6 El; 300 Brin
For acid resistant equipment, Type 316, stainless, austenitic.

AMBO PD4
M-1315, 0.28 C, Ni, Mo, bal Fe.
For gears, bolts, fasteners, shafts; oil hardened, tough

AMBO PDZ
M-1315, 0.28 C, Ni, Cr, Mo, V, bal Fe
For gears, bolts, shafts, crankshafts; oil hardened, shock resistant

AMBO SP1V
M-1315, 0.38 C, Si, Cr, V, bal Fe.
For springs, gears, crankshafts; oil hardened, shock resistant.

AMBO SP2V.
M-1315; 0.45 C, Si, Cr, V, bal Fe
For springs, gears, crankshafts, oil hardened, shock resistant.

AMBO SPW3.
M-1315, 1.42 C, W, V, bal Fe.
For blanking and forming dies, engravers' tools; water or oil hardened, wear resistant

AMBO SPW4.
M-1315, 0.45 C, 1.4 Cr, 0.70 Mo, 0.30 V, 0.7 Mn, bal Fe.
For forging and heading dies, upsetters, punches, oil hardened, tough.

AMBO SPW5
M-1315; 0.30 C, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For chisels, punches, pneumatic tools; oil hardened, shock resistant.

AMBO SPW6.
M-1315; 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, 0.3 Mn, bal Fe
For pneumatic tools, extrusion rams and dies, upsetters, oil hardened, shock resistant.

AMBO SPWD.
M-1315, 0.35 C, 0.90 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For pneumatic tools, punches, upsetters; oil hardened, shock resistant.

AMBO SPWH.
M-1315, 0.55 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For pneumatic tools, upsetters, rivet sets; oil hardened, shock resistant.

AMBO V25.
M-1315; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers; high speed steel.

AMBO V35.
M-1315, 0.86 C, 4.1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches, high speed steel.

AMBO V50
M-1315, 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe
For blanking and forming dies, engravers' tools, high speed steel

AMBO V66.
M 1315, 0.85 C, W, Mo, Cr, V, bal Fe
For lathe and planer tools, reamers, taps, drills, high speed steel

AMBO V111
M-1315, 0.95 C, 4 Cr, V, W, Mo, bal Fe
For lathe and planer tools, reamers, broaches; high speed steel

AMBO VANADIUM
M 1315; 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe
For lathe and planer tools, drills, taps, hobs, high speed steel

AMBO WCM1.
M-1315, 1.05 C, 1.0 Cr, 0.90 Mn, 1.15 W, bal Fe.
For cold work tools, cutters, form dies, oil hardened, tough

AMBO WMA
M-1315, 0.45 C, Cr, Ni, W, bal Fe
For upsetters, chisels, punches, pneumatic tools, oil hardened, tough

AMBO WMOV
M-1315, 0.45 C, 0.45 Mo, 1.35 Cr, 0.8 V, 0.45 W, bal Fe
For forging and heading dies, oil hardened, tough.

AMBO WOF
M-1315; C, Cr, Mo, bal Fe.
For machine tool parts, oil hardened, tough.

AMBRAC 850
M-8; 20 Ni, 4.4 Zn, 0.6 Mn, bal Cu.
Soft. 50,000 TS; 18,000 YS, 35 El
Hard. 70,000 TS; 60,000 YS; 20 El.
For plumbing, hardware, corrosion resistant

AMBRALLOY
M-292, 0.40 C, 0.7 Mn, 1.8 Ni, 0.8 Cr, 0.2 Mo, bal Fe.
Heat treated: 274,000 TS, 237,000 YS, 11 El; 35.4 RA.
For structural members, cranes, derricks, bridges; high strength plate, heat treated at mill.

AMBRALOY 606.
M-8; 5 Al, 95 Cu.
Soft: 55,000 TS; 22,000 YS; 65 El.
Hard: 92,000 TS; 65,000 YS; 7 El.
For condenser tubes, forged parts; corrosion resistant.

AMBRALOY 612.
M-8; 8 Al, 92 Cu.
Soft: 65,000 TS; 25,000 YS; 65 El.
Hard: 80,000 TS, 50,000 YS; 30 El.
For screw machine parts, wire, rod; corrosion resistant

AMBRALOY 614.
M-8; 7 Al, 2.75 Fe, bal Cu.
Plate 70,000 TS; 30,000 YS; 35 El.
For condenser tubes, heat exchangers; high corrosion resistance ABRALOY 930.

AMBRALOY 630
M-8, 82 Cu, 9.5 Al, 1.0 Mn, 5 Ni, 2.5 Fe.
Soft: 90,000 TS, 12 El
Hard: 105,000 TS, 12 El.
For forgings, heat treatable

AMBRALOY-687
M-8, 22 Zn, 2 Al, 0.04 As, bal Cu
Soft: 52,000 TS, 20,000 YS, 65 El
Hard 85,000 TS, 60,000 YS, 10 El.
For condenser tubes, ferrules; corrosion resistant.

AMBRAZE 35.
M-1483, 35 Ag, 26 Cu, 21 Zn, 18 Cd
For brazing alloy for torch brazing, BAg-2

AMBRAZE 45
M-1483; 45 Ag, 15 Cu, 16 Zn, 24 Cd
For brazing alloy for dissimilar metals, BAg-1, M.P. 1125°-1145°F.

AMBRAZE 50
M-1483, 50 Ag, 15.5 Cu, 16.5 Zn, 18 Cd
For general purpose brazing alloy for ferrous and non ferrous alloys, BAg-1A, M.P. 1160-1175°F

AMBRAZE 111
M-1483, Ni, Zn, bal Cu
Cast 80,000 TS
For brazing alloy, nickel silver, M.P. 1700°F, corrosion resistant

AMBRAZE 111FC
M-1483, Ni, Zn, bal Cu
For brazing alloy, nickel silver

AMBRAZE 131
M-1483, Ni, Zn, bal Cu
For brazing alloy, nickel silver

AMBRAZE 131 FC
M-1483, Ni, Zn, bal Cu
For brazing alloy; nickel silver

AMBRAZE 181
M-1483, 5 P, 15 Ag, bal Cu
For brazing alloy, self-fluxing

AMBRAZE-211
M-1483, 7 P, bal Cu.
For brazing copper.
Phos-copper, self fluxing

AMBRAZE-231.
M-1483; 7.3 P, 2 Ag, bal Cu
For brazing alloy
Self-fluxing.

AMBRAZE-311
M-1483; 12 Si, 4 Cu, 1 Fe, bal Al.
For brazing aluminum alloys, filler metal.
Corrosion resistant.

AMBRAZE-331
M-1483; 10 Si, 4 Cu, 0.5 Fe, bal Al.
For brazing cast aluminum alloy.

AMBRAZE-411
M-1483; 58 Cu, 1 Sn, 1 Fe, bal Zn.
For brazing bronzes, filler metal.
Corrosion resistant.

AMBRAZE-411FC.
M-1483; 58 Cu, 1 Sn, 1 Fe, bal Zn.
For brazing bronzes.
Flux coated, corrosion resistant.

AMBRAZE 430.
M-1483; Ag alloy.
For silver solder for stainless steel, M.P. 425°F.

AMBRAZE-611
M-1483; 9 Al, 0.15 Mn, 2 Zn, bal Mg.
For brazing magnesium alloys, filler metal.

AMBRAZE-1001
M-1483; 40 Ag, 30 Cu, 28 Zn, 2 Ni.
For brazing alloy, filler metal.
Corrosion resistant

AMBRAZE-1010.
M-1483; 45 Ag, 18 Cu, 18 Zn, 19 Cd
For brazing, filler metal.
Corrosion resistant

AMBRAZE-1110
M-1483, 41 Ag, 18 Cu, 15 Zn, 27 Cd.
For brazing, filler metal.
Corrosion resistant.

AMBRAZE-1201
M-1483, 20 Ag, 45 Cu, 30 Zn, 5 Cd
For brazing, filler metal
Corrosion resistant

AMBRAZE-1551
M-1483, 56 Ag, 22 Cu, 17 Zn, 5 Sn.
For brazing, filler metal
Corrosion resistant

AMBRO
2 Al, 76 Cu, 22 Zn
For condenser tubes, corrosion resistant

AMBRONZE 405
M-8, 4 Zn, 1 Sn, 0.03 P, bal Cu
Hard: 60,000 TS; 50,000 YS; 6 El, 125 Brin
Soft 40,000 TS, 15,000 YS; 40 El, 55 Brin.
For electrical springs, corrosion resistant

AMBRONZE 413
M-8; 7 Zn, 1 Sn, bal Cu
Hard. 63,000 TS; 55,000 YS, 7 El; 137 Brin
Soft. 42,000 TS, 16,000 YS; 40 El, 57 Brin
For strips, tubes, corrosion resistant

AMBRONZE 430
M-8, 11 Zn, 2 Pb, bal Cu.
Hard 73,000 TS; 65,000 YS; 10 El; 160 Brin.
Soft 46,000 TS, 18,000 YS, 50 El, 59 Brin
For springs, corrosion resistant

AMBRONZE-4222
M-8, 11 Zn, 1 Sn, bal Cu
Soft: 43,000 TS, 16,000 YS, 47 El
Hard 72,000 TS, 60,000 YS, 8 El
For weather strip; corrosion resistant.

AMBRONZE 4301
M-8, 10 Zn, 2 Pb, bal Cu.
Soft: 20,000-46,000 TS, 55 El; 59 Brin.
For condenser and heat exchanger tubes, corrosion resistant to mine waters.

A M C
M-365; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe
For tools, cutters, broaches; high speed steel.

AM C52S.
M-4; 3 Al, 1 Zn, bal Mg.
Extruded: 35,000 TS; 60 Brin.
For light alloy parts; sheets and extrusions.

AMCARB D-5.
M-1564; 3.5 Co, 96.5 WC.
Sintered: A 92.5 Rock, 170,000 Tr. S.
For extrusion and drawing dies, cutting tools.
Sintered carbide, wear and abrasion resistant.

AMCARB D-10.
M-1564; 95.5 WC, 4.5 Co.
Sintered: Rockwell A 92; 180,000 Tr. S.
For extrusion press nibs, drawing dies, cutting tools.
Sintered carbide, wear and abrasion resistant

AMCARB D-15.
M-1564; 6 Co, 94 WC.
Sintered: Rock 91.5 A, 225,000 Tr. S.
For drawing and extrusion dies, cutting tools.
Sintered carbides Wear and abrasion resistant.

AMCARB D-20.
M-1564; 6.0 Co, 94.0 WC.
Sintered: A 90.8 Rock, 275,000 Tr. S
For extrusion and drawing dies, cutting tools.
Sintered carbide, wear and abrasion resistant.

AMCARB D-30.
M-1564; 9.0 Co, 91.0 WC.
Sintered: A 89.5 Rock, 325,000 Tr. S
For extrusion and drawing dies, header punches, cutting tools.
Sintered carbide, wear and abrasion resistant.

AMCARB D-35
M-1564, 9.0 Co, 81.0 WC, 10.0 TaC.
Sintered: A 89.0 Rock, 325,000 Tr. S.
For extrusion and drawing dies, header punches, and inserts, cutters
Sintered carbide, wear and abrasion resistant

AMCARB D-40.
M-1564; 13 Co, 87 WC.
Sintered: A 88.5 Rock, 400,000 Tr. S.
For extrusion, drawing and header dies, cutters.
Sintered carbide, wear and abrasion resistant.

AMCARB D-43.
M-1564; 13 Co, 27 TaC, 60 WC
Sintered: A 88 Rock, 350,000 Tr S.
For extrusion and drawing dies.
Wear and abrasion resistant. Sintered carbide.

AMCARB D-50
M-1564; 15 Co, 85 WC.
Sintered: A 87 Rock, 425,000 Tr. S.
For extrusion, drawing and header dies, cutters.
Sintered carbide, wear and abrasion resistant.

AMCARB D-55.
M-1564; 16 Co. 57 WC, 27 TaC.
Sintered. A 86 Rock, 360,000 Tr. S
For extrusion, drawing and header dies, punches.
Sintered carbides, wear and abrasion resistant.

AMCARB D-57.
M-1564, 15.0 Co, 78.0 WC, 7.0 TaC.
Sintered: A 86.5 Rock, 350,000 Tr S.
For extrusion, drawing and header dies.
Sintered carbides, wear and abrasion resistant.

AMCARB D-60.
M-1564; 20 Co, 5 TaC, 75 WC.
Sintered: A 85 Rock, 390,000 Tr. S.
For extrusion, drawing and header dies-light impact.
Sintered carbides, wear and abrasion resistant.

AMCARB D-65.
M-1564; 20 Co, 80 WC.
Sintered: A 85 Rock, 400,000 Tr. S.
For extrusion, drawing and header dies-light impact.
Sintered carbides, wear and abrasion resistant.

AMCARB D-70.
M-1564; 25 Co, 5 TaC, 70 WC.
Sintered: A 83 Rock, 380,000 Tr. S.
For extrusion, drawing and header dies-normal impact.
Sintered carbides, wear and abrasion resistant.

AMCARB D-75.
M-1564; 25 Co, 75 WC.
Sintered: A 83 Rock, 390,000 Tr. S.
For extrusion, drawing and header dies.
Sintered carbides, wear and abrasion resistant.

AMCARB D-80.
M-1564; 27 Co, 5 TaC, 68 WC
Sintered: A 82 Rock, 375,000 Tr. S.
For extrusion, drawing and header dies-heavy impact.
Sintered carbides, wear and abrasion resistant.

AMCARB D-85.
M-1564; 30 Co, 5 TaC, 65 WC.
Sintered: A 81 Rock, 360,000 Tr. S.
For extrusion, drawing and header dies-very heavy impact.
Sintered carbides, wear and abrasion resistant.

AMCARB T-38
M-1564, 71 WC, 12 TaC, 8 TiC, 9 Co
Sintered: Rockwell A 92.5
For extrusion press nibs, drawing and header dies.
Sintered carbide, wear and abrasion resistant

AMCO COPPER.
M-558, Electrolytic tough pitch copper.
For electrical applications and general usage in sheet, strip and rod applications

AMCOH
M-365, 0.90 C, 1.15 Mn, 0.5 Cr, 0.5 W, bal Fe
Oil hardening tool steel, AISI 01

AMCOH EXTRA SPECIAL.
M-365, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe
For tools, cutters, hobs, high speed steel

AMCOH HOLLOW DIE
M-365, 0.8 C, 0.9 Cr, bal Fe
For hollow dies; oil hardening

AMCOH OIL HARDENING.
M-365, 0.9 C, 0.5 Cr, 0.5 W, 1.0-1.25 Mn, bal Fe
For tools, dies, punches, oil hardening

A M C.O H. SPECIAL
M-365, 0.9 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For die, punches; non-deforming

AMCOLOY.
M-365, 0.75 C, 0.75 Mn, 0.90 Cr, 1.75 Ni, 0.35 Mo, bal Fe.
Oil hardening steel for shafts, arbors, lathe centers, AISI L6

AMCOLOY 70
M-365; 0.75 C, 1.25 Ni, 0.80 Cr, 0.25 Mo, 0.15 V, bal Fe.
Heat Treated: 121,000-208,000 TS, 90,000-180,000 PL, C 29-45 Rock.
For brake dies, bushings, cams, shear blades, gears, set screws, forming and swaging dies, punches.
Type L 6, tough, oil hardening.

AMCO OFHC.
M-1508; 99.99 Cu.
For electronic and electrical equipment, magnetrons, triodes; oxygen free high conductivity copper.

AMCROM.
M-558a; 0.4-1.2 Cr, bal Cu.
Aged: 80,000 TS.
For electrical contacts, rocket nozzles, resistance welding tips, current carrying components.
80-90% elect, cond., age-hardenable, good resistance to softening at high temperatures.

A.M.D.
M-822; 0.34 C, 0.4 Mn, 4.75 Cr, 1.10 W, 1.45 Mo, bal Fe.
For hot work dies, hot work steel.

AMERA-MAG.
M-1057; 0.08-0.15 C, 1.2 Mn, 0.12 P, 0.05 Al, 0.1 max Ni, 0.1 max Mo, bal Fe.
Rolled: 70,000 TS; 50,000 YS; 34 El; 53 RA, 147 Brin.
For tanks, bodies; high tensile.

AMERCUT B-28
M-12; 0.08-0.13 C, 0.6-0.9 Mn, 0.09-0.13 P, 0.2-0.3 S, bal Fe.
Cold finish: 80,000-100,000 TS; 65,000-85,000 YS, 20-10 El; 50-40 RA; 170-200 Brin.
For automatic screw machine operations; approx machinability 215 ft/min

AMERCUT 1020
M-12; 0.18-0.23 C, bal Fe.
65,000-85,000 TS; 50,000-70,000 YS; 20-30 El, 45-55 RA; 155-185 Brin
For screw products, S.A.E 1020.

AMERCUT B-1111.
M-12; 0.08-0.13 C, 0.6-0.9 Mn, 0.09-0.13 P, 0.1-0.2 S, bal Fe
Cold finish 70,000-90,000 TS, 60,000-80,000 YS; 25-15 El; 50-40 RA; 160-190 Brin
For automatic screw machine operations, approx machinability 125 ft/min

AMERCUT B 1112
M-12, 0.08-0.13 C, 0.6-0.9 Mn, 0.09-0.13 P, 0.16-0.23 S, bal Fe
Cold finish. 80,000-100,000 TS, 65,000-85,000 YS, 20-10 El, 50-40 RA, 170-200 Brin
For automatic screw machine operations, approx machinability 180 ft/min

AMERCUT C-1115.
M-12, 0.13-0.18 C, 0.7-1.0 Mn, 0.13 P, bal Fe.
Rolled 10-20 El
For screw machine parts, bolts, nuts, screw, free-cutting

AMERCUT C-1117.
M-12, 0.14 0.20 C, 1.0-1.3 Mn, 0.08-0.13 S, bal Fe
Rolled: 15-25 El
For screw machine parts, bolts, nuts, screws; free-cutting.

AMERCUT C-1118
M-12, 0.14-0.20 1.3-1.6 Mn, 0.08-0.13 S, bal Fe.
Rolled: 15-25 El
For screw machine parts, bolts, nuts, screws, free-cutting

AMERCUT C-1120.
M-12, 0.18-0.23 C, 0.7-1.0 Mn, 0.08-0.13 S, bal Fe.
Rolled: 15-25 El.
For screw machine parts, bolts, nuts, screws, free-cutting.

AMERCUT C-1132.
M-12; 0.27-0.34 C, 1.35-1.65 Mn, 0.08-0.13 S, bal Fe.
Rolled: 15-25 El.
For screw machine parts, bolts, nuts, screws, free-cutting.

AMERCUT C-1137.
M-12; 0.32-0.39 C, 1.35-1.65 Mn, 0.08-0.13 S, bal Fe.
Rolled: 15-25 El.
For screw machine parts, bolts, gears, nuts, screws; free-cutting.

AMERCUT C-1141.
M-12; 0.37-0.45 C, 1.35-1.65 Mn, 0.08-0.13 S, bal Fe.
Rolled: 15-25 El.
For screw machine parts, bolts, gears, nuts, screws; free-cutting.

AMERHEAD C-1018.
M-12; 0.15-0.20 C, 0.6-0.9 Mn, 0.04 max P, 0.05 max S, bal Fe.
For screw machine parts, cold headed parts; wire.

AMERHEAD 1330.
M-12; 0.28-0.33 C, 1.6-1.9 Mn, 0.04 max P, 0.04 max S, bal Fe
For screw machine parts, cold headed parts; wire.

AMERHEAD 1335
M-12; 0.33-0.38 C, 1.6-1.9 Mn, 0.04 max S, 0.04 max P, bal Fe
For screw machine parts, cold headed parts; wire

AMERHEAD A-2317.
M-12; 0.15-0.20 C, 0.4-0.6 Mn, 3.25-3.75 Ni, bal Fe.
For screw machine parts, fasteners; wire.

AMERHEAD A-2330.
M-12, 0.28-0.33 C, 3.25-3.75 Ni, 0.6-0.8 Mn, bal Fe.
For screw machine parts, fasteners, wire.

AMERHEAD A-3115.
M-12, 0.13-0.18 C, 0.4-0.6 Mn, 0.55-0.75 Cr, 1.1-1.4 Ni, bal Fe
For screw machine parts, fasteners; wire.

AMERHEAD 4037
M-12, 0.35-0.40 C, 0.75-1.00 Mn, 0.2-0.3 Mo, bal Fe.
Drawn 85-000-100,000 TS, 75,000-85,000 YS, 15-25 El; 50-65 RA
For bolts, shafts, screws, water hardened

AMERHEAD 4140.
M-12, 0.38-0.43 C, 0.7-1.0 Mn, 0.8-1.1 Cr,, 0.15-0.25 Mo, bal Fe
For screw machine parts, cold headed parts; wire.

AMERHEAD 4615.
M-12, 0.13-0.18 C, 1.65-2.0 Ni, 0.2-0.3 Mo, bal Fe.
For screw machine parts, cold headed parts, wire

AMERHEAD 8620.
M-12, 0.18-0.23 C, 0.7-0.9 Mn, 0.4-0.6 Cr, 0.4-0.7 Ni, 0.15-0.25 Mo, bal Fe.
Drawn 78,000-93,000 TS, 68,000-80,000 YS; 15-25 El, 50-65 RA.
For bolts, shafts; case hardened

AMERICAN 10
M-991; 0.25 max C, 0.5-0.7 Mn, 0.2-0.6 Si, 0.4-0.6 Mo, bal Fe
Cast N-T: 65,000 TS; 35,000 YS, 20 El, 30 RA; 160-225 Brin
For high pressure and valve castings, high temperature steam resisting.

AMERICAN ALLOY
U S.; 95 Al, 3 Cu, 1 Mg, 1 Mn
For light alloy parts; heat treated.

AMERICAN BLACK HEART MALLEABLE IRON
M-113, M-24; 2.8-3.5 C, 0.6-0.8 Si, Mn, bal Fe.
20,000-46,000 TS; 0.2-15 El; 105-220 Brin
For plumbing, hardware, fittings, pipes, castings.

AMERICAN CA-14.
M-991, 0.15 max C, 0.85 max Mn, 1.0 max Si, 11.5-15.0 Cr, bal Fe.
Cast: 80,000 TS; 50,000 YS; 20 El; 30 RA.
For valve seats, chemical apparatus castings; corrosion resistant.

AMERICAN CA-15.
M-991; 0.15 max. C, 0.85 max. Mn, 1 max. Si, 11.5-14.0 Cr, bal Fe.
Cast: 90,000 TS; 65,000 YS; 18 El; 30 RA; 220 Brin.
For valve seats, chemical equipment; corrosion resistant.

AMERICAN CA-40.
M-991; 0.20-0.40 C, 0.85 max Mn, 1.0 max Si, 11-14 Cr, bal Fe.
Cast.
For valve seats, castings; corrosion resistant.

AMERICAN CB-30.
M-991; 0.30 max C, 18-22 Cr, bal Fe.
Normalized: 90,000 TS; 65,000 YS; 7 El; 8 RA; 130 Brin.
For heat resisting castings, valves, fittings; heat resistant.

AMERICAN CE-30.
M-991, 0.30 max C, 26-30 Cr, 8-11 Ni, bal Fe.
Cast W.Q.: 85,000 TS; 45,000 YS, 15 El; 15 RA; 170 Brin.
For paper mill and copper mine castings; corrosion resistant.

AMERICAN CF-7
M-991; 0.07 max C, 18-21 Cr, 8-11 Ni, bal Fe
Cast W.Q.: 70,000 TS; 30,000 YS; 45 El; 50 RA, 150 Brin.
For valves, fittings, pumps, castings; corrosion resisting to acetic acid.

AMERICAN CF-7C
M-991, 0.07 max C, 18-21 Cr, 9-12 Ni, Cb = 10 × C, bal Fe
Water quenched 2000°F. 71,000 TS, 35,000 YS; 45 El; 50 RA, 150 Brin
For stainless castings, valves, fittings; corrosion resistant, austenitic.

AMERICAN CF-7-M.
M-991; 0.07 max C, 18-21 Cr, 9-12 Ni, 1.7-3.1 Mo, bal Fe.
Cast W.Q.: 72,000 TS; 35,000 YS, 45 El, 50 RA, 160 Brin.
For valves, fittings, pumps, castings, corrosion resisting.

AMERICAN CF-7MC.
M-991, 0.07 max C, 18-20 Cr, 8-10 Ni, 2.5 Mo, Cb = 10 × C, bal Fe
Water quenched, 2000°F: 72,000 TS; 35,000 YS, 45 El, 50 RA, 160 Brin.
For stainless castings, corrosion and heat resistant, austenitic.

AMERICAN CF-20.
M-991; 0.20 max C, 18-21 Cr, 8-11 Ni, bal Fe.
Cast W.Q.: 70,000 TS, 30,000 YS, 40 El; 45 RA, 160 Brin
For corrosion resistant castings, valves, fittings; corrosion resisting.

AMERICAN CH-20.
M-991; 0.20 max C, 22-26 Cr, 12-15 Ni, bal Fe.
Cast W.Q.: 75,000 TS; 35,000 YS; 25 El; 25 RA; 160 Brin
For furnace castings, sulphide pumps; corrosion and heat resisting.

AMERICAN CK-20.
M-991; 0.2 max. C, 19-22 Ni, 23-27 Cr, bal Fe.
Cast: 72,000 TS; 33,000 YS; 25 El; 25 RA; 170 Brin.
For boiler feed pumps; corrosion resistant.

AMERICAN CK-25.
M-991; 0.25 max C, 23-27 Cr, 19-22 Ni, bal Fe.
Cooled from 1900°F: 70,000 TS; 30,000 YS; 25 El; 25 RA; 170 Brin.
For heat resistant castings; heat resistant.

AMERICAN CN-7.
M-991; 0.07 max C, 18-20 Cr, 23-26 Ni, Mo, bal Fe.
Water quenched, 2000°F: 70,000 TS; 35,000 YS; 45 El; 45 RA; 150 Brin.
For heat resisting castings; heat and corrosion resistant.

AMERICAN CT-7M.
M-991; 0.07 max C, 13-17 Cr, 34-37 Ni, 2.5 Mo, bal Fe.
Water quenched, 2000°F 65,000 TS; 35,000 YS; 45 El, 45 RA; 150 Brin.
For heat resisting castings, valves, fittings, pumps; heat and corrosion resistant to hot sulfuric and caustic solutions

AMERICAN HH.
M-991; 0.2-0.5 C, 24-28 Cr, 11-14 Ni, bal Fe.
For heat resisting castings, furnace parts; corrosion and heat resistant, austenitic.

AMERICAN HT.
M-991, 0.35-0.75 C, 33-37 Ni, 13-17 Cr, bal Fe.
Cast: 60,000 TS, 30,000 YS, 5 El, 5 RA
For furnace parts, heat treating pots, heat resisting

AMERICAN HYLASTIC
M-991, 0.26-0.36 C, 1.4-1.70 Mn, 0.1 V, bal Fe
Cast N-T 90,000 TS, 60,000 YS, 22 El, 45 RA; 180 Brin
For railroad and structural castings, tempered

AMERICAN MARINE
M-565; Pb-Sn-Sb
Cast 8,750 TS; 8,000 YS, 1.0 El; 0.7 RA, 30 Brin
For Babbitts, bearings; Babbitt metal

AMERICAN MARINE GENUINE
M-565
For bearings for marine engines and locomotives, Babbitt, shock resistant.

AMERICAN SILVER-1
U.S., 49.4 Cu, 20.7 Zn, 24.2 Ni, 1.3 Fe, 3.8 Mn, 0.5 Sn
For ornaments, hardware, corrosion resistant

AMERICAN SILVER-2
U.S., 59 Cu, 23 Zn, 11 Ni, 3 Pb, 1.5 Al, 5 P + Sn
For ornaments, hardware, corrosion resistant

AMERICAN SILVER-3
U.S., 58-49 Cu, 21-24 Zn, 15-24 Ni, <4 Mn + Sn + Fe + Al + Pb
For ornaments, hardware, corrosion resistant

AMERICAN SUPER-TENS.
M-12, 0.72-0.93 C, 0.4-1.1 Mn, 0.10-0.35 Si, bal Fe
Drawn: 250,000 min TS
For prestressed concrete

AMERICAN TYPE 12
M-991, 0.10-0.20 C, 0.6-0.8 Mn, 0.6 max Si, 2.5-3.0 Ni, bal Fe
Cast 70,000 TS; 40,000 YS; 26 El, 35 RA
For valves, fittings, pumps; high impact valve at low temperature.

AMERICAN TYPE 20
M-991; 0.20-0.25 C, 0.65-0.85 Mn, 0.20-0.50 Si, 0.65-0.85 Cr, 0.25-0.35 Mo, bal Fe
Cast N-T: 100,000 TS; 70,000 YS; 22 El, 35 RA; 202 Brin.
For valves, fittings, structural castings; in welded structures.

AMERICAN TYPE 22.

M-991; 0.15-0.30 C, 0.65-0.85 Mn, 0.6 max Si, 4.0-6.5 Cr, 0.4-0.6 Mo, bal Fe.

Cast N-T: 100,000 TS; 65,000 YS; 18 El; 30 RA; 250-300 Brin.

For oil refinery valves and fittings, pumps; high temperature steam and oil services.

AMERICAN TYPE 23

M-991; 0.25-0.35 C, 0.6-0.8 Mn, 0.6 max. C, 1.0-1.5 Ni, 0.5-0.8 Cr, bal Fe

Cast: 99,000 TS, 57,000 YS; 22 El; 40 RA; 200 Brin.

For gears, pinions, shafts, tough.

AMERICAN TYPE 31.

M-991; 0.20-0.30 C, 0.7-1.0 Mn, 2.5-3.0 Ni, 1.0-1.5 Cr, 0.2-0.4 Mo, bal Fe.

Cast N-T: 150,000 TS; 130,000 YS; 10 El, 20 RA; 300 Brin

For structural and aircraft castings; tough.

AMERICAN VALVE SPRING.

M-12; 0.6-0.75 C, 0.5-0.9 Mn, 0.12-0.30 Si, bal Fe.

Heat treated 195-000-300,000 TS, 48 El; 450 Brin.

For valve springs; oil tempered wire

AMER-LED A

M-12, 0.15 max C, 0.75-1.25 Mn, 0.15-0.35 Pb, 0.25 S, bal Fe

For screw machine products, screws, bolts; free-cutting

AMER-LED B

M-12, 0.15 max C, 0.85-1.35 Mn, 0.36 S, 0.15-0.35 Pb, bal Fe

For screw machine products, screws, bolts; free-cutting

AMERSTITCH

M-12, 0.40 0.95 C, 0.5-1.2 Mn, 0.1-0.3 Si, bal Fe

Drawn 190,000-360,000 TS

For metal stitching wire

AMERSTRIP

M-12, 0.05-1.35 C, bal Fe

For springs; water hardening

AMERVAN.

U.S., 63.5 Fe, 35 V, 1.5 Si

For alloy steel making, vanadium additions

A-METAL

Eng., 5-7 Cu, 44 Ni, bal Fe

For sound transmitting devices

A M I

M-210, C, alloy, bal Fe

For dies, tough and abrasion resistant.

AMINO 3

M-72, 0.38 0.43 C, 12.5-13.5 Cr, 0.6 Ni, bal Fe

For tools, cutlery, knives, corrosion resistant, hardenable

AMNIC.

M-558, M-238, 29-33 Ni, bal Cu

Hard 75,000 TS, 72,000 YS, 15 El; B 80 Rock

Soft. 54,000 TS, 180,000 YS, 45 El, B 35 Rock

For electronic equipment and high vacuum applications, electronic tubes.

High purity cupro-nickel, corrosion resistant

AMOL

M-1049; 0.8-0.9 C, bal Fe

For tools, cutters, water hardening.

AMOLA

M-680; 0.20-0.70 C, 0.70-0.90 Mn, 0.15-0.25 Mo, bal Fe

For gears, axles, shafts

AMOTUN.

M-353; 0.85 C, 4 Cr, 6 Co, 1.75 V, 1.5 W, 8 Mo, bal Fe.

For cutting tools; high speed steel.

AMOUTUN.

M-353; 0.80 C, 4 Cr, 8 Mo, 1.5 W, 1 V, bal Fe.

Hardened: C 64-66 Rock.

For lathe and planer cutters, drills, reamers, broaches, hobs, form cutters, taps.

Type M 1 high speed steel, high red-hardness.

AMPCO 12.

M-13; 8.0-9.5 Al, 2.25-3.25 Fe, bal Cu.

Cast: 60,000 TS; 30,000 YS; 40 El; 130 Brin.

For bushings, adjusting nuts, fittings, inlet hoppers, machinery parts.

Corrosion resistant.

AMPCO 16.

M-13; 9.3-10.3 Al, 2.75-4.0 Fe, bal Cu

Cast: 90,000 TS; 32,000 YS; 22 El; 155 Brin.

For bushings, gears, worm wheels, machinery parts, trolley shoes, trolley wheels.

Corrosion and shock resistant.

AMPCO 18.

M-13, 10.0-11.2 Al, 3.0-4.2 Fe, 0.5 max others, bal Cu

Cast. 77,000-90,000 TS, 37,000-42,000 YS, 10-14 El; 6-12 RA, 165-185 Brin

For acid equipment, gears, worm wheels, trolley shoes, piston rods, valve seats

Corrosion and shock resistant.

AMPCO 18-22

M-13, 10.0-11.2 Al, 3.0-4.2 Fe, bal Cu.

Heat treated 90,000-100,000 TS; 45,000-55,000 YS; 3-7 El, 3-7 RA; 202-223 Brin

For bearings, heat treatable, wear resistant, impact resistant.

AMPCO 18-23

M-13, 10.0-11.2 Al, 3.0-4.2 Fe, bal Cu

Heat treated 100,000 TS, 50,000 YS, 14 El; 14 RA; 179-207 Brin

For aircraft, propellers, motors, heavy duty worm gears, castings.

AMPCO 20

M-13, 11.0-12.2 Al, 3.2-4.5 Fe, bal Cu

Cast 83,000-90,000 TS, 40,000-43,000 YS, 4-6 El; 3.5 RA, 212-241 Brin

For cams, rollers, safety tools, welding jaws, worm gears, valve bodies

Corrosion and wear resistant

AMPCO 20-13

M-13, 11.0-12.2 Al, 3.2-4.5 Fe, bal Cu

Heat treated. 85,000-102,000 TS, 35,000-50,000 YS; 6-12 El, 192-207 Brin

For bearings, bushings, corrosion and wear resistant, non-seizing

AMPCO 21

M-13, 12.5-13.6 Al, 3.5-5.0 Fe, 0.5 max others, bal Cu.

Cast 75,000-95,000 TS, 55,000-60,000 YS; 1.5 El; 0.5 RA, 285-302 Brin

For valves, bushings, forming dies, slides, roller bushings, gears, worm gears.

Corrosion and wear resistant.

AMPCO 22

M-13, 13.6-14.6 Al, 4.0-5.2 Fe, 0.5 max others, bal Cu.

Cast: 85,000 TS, 70,000 YS; 0.5 El; 321-341 Brin.

For forming and drawing dies

Corrosion and wear resistant.

High compressive strength

AMPCO BERYLLIUM COPPER.
M-13; 97.5 Cu, 2.5 Be
90,000-125,000 TS; 85,000-100,000 YS; 1-0 El; 350-420 Brin.
For wire springs, forming dies, plastic dies, nonsparking tools, airplane propeller bushings; age hardening.

AMPCOLOY 3W1.
M-13; 64W, bal Cu.
Bars: 67,00-135,000 TS; 130-165 Brin.
For resistance welding electrodes in welding yellow brass and stainless steel.
43% elect. cond., corrosion and wear resistant.

AMPCOLOY 3W10.
M-13; 70 W, bal Cu.
Bars: 90,000-160,000 TS, 205-208 Brin
For resistance welding electrodes, for flash welding.
38% elect. cond., wear and corrosion resistant

AMPCOLOY 3W20.
M-13; 74 W, bal Cu.
Bars. 95,000-170,000 TS, 228-250 Brin.
For resistance welding electrodes, for heavy projection welding
30% elect cond., wear and corrosion resistance.

AMPCOLOY 3W-86.
M-13, Cu-W
120,000 TS, 210 Brin
For resistance welding electrode, heat treatable.

AMPCOLOY 10W-86.
M-13; Cu-W.
160,000 TS, 260 Brin
For resistance welding electrode; heat treatable.

AMPCOLOY 30
M-13; 9.1 Al, 9.1 Pb, bal Cu
45,000-50,000 TS, 18,000-20,000 YS; 32-35 El, 25-30 RA, 50-60 Brin
For bearings, formerly "Atlas 10"

AMPCOLOY 31.
M-13; 7.0-9.0 Pb, 7.0-9.0 Sn, 0-1 Ni, 0.65 max others, bal Cu.
Cast. 35,000 TS, 18,000 YS; 15 El, 10 RA, 55 Brin
For bearings and bushings in high speed and pressure services.
Resists mild acids

AMPCOLOY 32
M-13; 9-11 Sn, 8-11 Pb, 0-1 Ni, bal Cu
Cast 28,000-35,000 TS, 14,000-18,000 YS, 8-12 El, 8-12 RA, 50-65 Brin.
For spindle bearings, thrust rings, bushings, elevator nuts
Wear and corrosion resistant.

AMPCOLOY 34
M-13, 71.5 Cu, 23 Pb, 5.5 Sn
25,000-30,000 TS, 14,000-16,000 YS, 14-18 El; 12-14 RA; 50-60 Brin
For bearings, bushings; formerly "Atlas 20."

AMPCOLOY 35.
M-13; 6.25-7.5 Sn, 6.0-8.0 Pb, 2.0-4.0 Zn, 1.0 max others, bal Cu.
Cast: 45,000 TS; 20,000 YS, 20 El; 15 RA, 65 Brin
For lead screw nuts, bearings.
Low strength bearing alloy

AMPCOLOY 38
M-13; 6 Sn, 20 Pb, bal Cu.
Cast: 30,000 TS, 12,000 YS; 12 El; F 66 Rock.
For bearings, mine water pump parts, roll neck bearings.
Corrosion resistant, good embeddability.

AMPCOLOY 40.
M-13; 9.5-10.5 Al, 0.2 max Fe, bal Cu.
Cast: 65,000-70,000 TS; 24,000-28,000 YS; 15-30 El; 12-30 RA; 110-140 Brin.
For bushings, pump valves, resists H_2SO_4.

AMPCOLOY 42
M-13; 89 Cu, 10 Al, 1 Fe.
60,000-75,000 TS; 22,000-28,000 YS; 25-32 El; 25-30 RA; 110-135 Brin.
For propellers, nuts; corrosion resistant.

AMPCOLOY 43
M-13, 89 Cu, 10 Al, 1 Fe.
62,000-72,000 TS, 35,000-40,000 YS; 8-15 El; 9-16 RA, 126-156 Brin
For propellers, nuts, corrosion resistant.

AMPCOLOY 44.
M-13, 11-12 Al, 0.2 max Fe, bal Cu.
Cast: 60,000-70,000 TS, 30,000-50,000 YS; 3-5 El, 3 RA; 190-229 Brin
For welding dies, electrode holders, good electrical conductivity

AMPCOLOY 45
M-13, 9.7-10.9 Al, 2.0-3.5 Fe, 4.5-5.5 Ni, 1.5 max Mn, bal Cu, 0.6 max others.
Extruded: 118,000 TS; 75,000 YS, 15 El; 15 RA; 220 Brin
For bearings, sleeves, valve guides, shafts, heat treatable, corrosion resistant

AMPCOLOY 45-22
M-13, 9.7-10.9 Al, 2.0-3.5 Fe, 4.5-5.5 Ni, 1.5 max Mn, 0.6 max others, bal Cu
Wrought 115,000 TS, 66,000 YS, 15 El, 15 RA, 223 Brin.
For plunger tips, valve guides, shafts.
Corrosion resistant

AMPCOLOY 46
M-13, 2-6 Fe, 8-12 Al, 2-6 Ni, bal Cu
Ht Tr: 90,000-96,000 TS, 43,000-55,000 YS, 3-12 El, 10 RA, 180-235 Brin
For valve bodies, gears, sleeves, liners
Heat treatable castings

AMPCOLOY 46-22
M-13; 8-12 Al, 2-6 Fe, 2-6 Ni, 0-2 Mn, bal Cu
Cast 95,000 TS, 43,000 YS, 16 El, 16 RA; 234 Brin
For gears, shafts, valve bodies, shaft sleeves, liners, heat treatable, corrosion resistant

AMPCOLOY 50
M-13, 84 Cu, 10 Sn, 3.5 Ni, 2.5 Pb
Cast 47,000 TS, 24,000 YS, 10 El, 20 RA, 80 Brin
For worm gears, bushings, nuts, gears, elevating screw units

AMPCOLOY 53.
M-13, 5 Ni, 5 Sn, 2 Pb, bal Cu
Cast: 55,000 TS, 28,000 YS, 45 El, 100 Brin.
Ht. Tr. 95,000 TS, 65,000 YS, 15 El; 207 Brin.
For gate valves, bell bodies, valves, utility waterworks, pump impellers
Heat treatable, high strength
Good corrosion resistance

AMPCOLOY 54.
M-13; 10-11 Sn, 1.2 Ni, bal Cu
Cast: 47,000 TS; 24,000 YS; 15 El; 12 RA; 93 Brin
For rims.

AMPCOLOY 62.
M-13; 38-42 Zn, 1.5 Mn, 1.5 max Al, 1.0 Sn, 0.4-2.0 Fe, bal Cu, 1.4 max others.
Cast: 65,000-75,000 TS; 28,000-38,000 YS; 20-35 El; 20-35 RA; 110-135 Brin.
For castings, gears, cams; low tensile bronze.

AMPCOLOY 64.
M-13; 60-68 Cu, 3-7 Al, 2-4 Fe, 5 max Mn, bal Zn.
Cast: 95,000 TS, 50,000 YS; 25 El, 192 Brin.
For cast gears, gear cases, scrapers, housings.
Medium strength bronze.

AMPCOLOY 66.
M-13; 3-7 Al, 1-4 Fe, 5 max Mn, 20-30 Zn, 60-68 Cu.
Cast: 110,000-120,000 TS; 60,000-70,000 YS; 10-15 El; 8-14 RA; 217-235 Brin.
For castings; gears, high tensile bronze, nuts.

AMPCOLOY 71.
M-13; 86-90 Cu, 5.5-6.5 Sn, 1-2 Pb, 3-5 Zn, 1.0 max Ni.
Cast: 40,000 TS; 20,000 YS; 30 El; 30 RA; 70 Brin.
For pressure castings, gears, bearings, bushings; "Navy M" alloy.

AMPCOLOY 72.
M-13; 7.5-9 Sn, 3-5 Zn, bal Cu.
Cast: 46,000 TS; 24,000 YS; 26 El; 24 RA; 66 Brin
For castings; venturi meter bodies, slip rings.

AMPCOLOY 74.
M-13; 84-86, 4-6 Sn, 4-6 Pb, 4-6 Zn, 1.5 max Ni.
Cast. 38,000 TS; 20,000 YS; 26 El; 24 RA; 65 Brin.
For valves, pipe elbows, hydraulic parts; "Ounce Metal"; for high pressure service.

AMPCOLOY 79
M-13; 86-89 Cu, 9-11 Sn, 1-3 Zn.
Cast 46,000 TS; 22,000 YS; 24 El, 22 RA; 105 Brin
For gears, shafts, bearings, sleeves.
Hard bronze, wear and corrosion resistant.

AMPCOLOY 80
M-13, 2.0-2.75 Be, 0-1.25 Ni, bal Cu.
Heat treated 90,000-125,000 TS, 85,000-100,000 YS, 0-4 El, 0-4 RA; 350-420 Brin.
For castings.

AMPCOLOY 83
M-13, 0.25 Co, 1.8 Be, bal Cu
Wrought 190,000 TS, 120,000 YS, 2.5 El
For resistance welding parts, shafts, bushings.
Age-hardenable, high strength

AMPCOLOY 83-20
M-13; 1.70-2.05 Be, 0.10-0.35 Co, 0.60 max others, bal Cu
Extruded 190,000 TS, 120,000 YS; 2.5 El; 2.5 RA; 350 Brin
For plunger tips.
Age-hardenable, corrosion resistant.

AMPCOLOY 84
M-13, 2.0 Be, 1.0 others, bal Cu.
Cast 150,000 TS, 98,000 YS; 2 El.
For resistance welding parts, shafts, bushings, die inserts.
Age hardenable, wear resistant.

AMPCOLOY 84-20.
M-13; 1.5-2.0 Be, 1.5 max Co, 2.5 max others, bal Cu.
Cast 135,000 TS, 90,000 YS, 2 El; 2.5 RA, 351 Brin.
For plunger tips, die inserts, shafts, bushings.
Age hardenable, corrosion resistant.

AMPCOLOY 86.
M-13, 1.1-1.5 Ni, 2.25-3.0 Be, bal Cu.
Sand cast: 160,000 TS; 100,000 YS; 2.5 El; 2.5 RA; 393 Brin.
Centrifugal cast. 170,000 TS; 100,000 YS; 2.5 El; 2.5 RA; 393 Brin.
For welding dies, non-sparking safety tools; see "Ampco Beryllium Copper."

AMPCOLOY 86-20.
M-13; 1.1-1.5 Ni, 2.25-3.0 Be, bal Cu.
Sand cast: 160,000 TS; 100,000 YS; 2.5 El; 2.5 RA; 393 Brin.
For welding dies, safety tools; age-hardenable.

AMPCOLOY 90.
M-13; 0.25 max others, bal Cu.
Cast: 25,000 TS; 9,000 YS; 40 El; 40 RA; 45 Brin.
For transformer secondaries; cable attachments, bus bars; high conductivity.

AMPCOLOY 91.
M-13; 97 Cu, 2.6 Co, 0.4 Be.
Heat treated: 90,000-115,000 TS; 45,000-55,000 YS; 10-20 El; 200-240 Brin.
For welding electrodes; same as Ampco Trodaloy 1.

AMPCOLOY 92.
M-13; 11.6-12.2 Al, 0.35 max others, bal Cu.
Cast: 70,000 TS; 34,000 YS; 6 El; 150 Brin.
For resistance welding electrodes, hinges, bushings, shafts.
10-15% elect cond., corrosion resistant.

AMPCOLOY 92-H.
M-13; Al, bal Cu.
Cast. 75,000 TS; 2 El; 240 Brin.
For resistance welding electrode; 20% conductivity.

AMPCOLOY 92-S.
M-13; Al, bal Cu
Cast: 75,000 TS; 25 El, 137 Brin.
For resistance welding electrode; 20% conductivity

AMPCOLOY 94.
M-13, 1.5-2.5 Ni, 0.5 Si, 0.75 Al, bal Cu
Cast 65,000 TS, 45,000 YS, 15 El, 146 Brin
For resistance welding parts, shafts, bushings, plunger tips.
Medium conductivity, wear resistant.

AMPCOLOY 95.
M-13, 0.1-1.0 Be, 1.5-3 Co, bal Cu
Cast. 95,000 TS, 15 El; 396 Brin.
Wrought: 105,000 TS; 15 El.
For welding electrodes, age-hardenable.

AMPCOLOY 95-20.
M-13, 1.3-3.0 Co, 0.1-1.0 Be, bal Cu.
Cast 92,000 TS, 68,000 YS, 8 El, 9 RA; 217 Brin
For welding electrodes, shafts, bushings, age-hardenable, good electrical conductivity.

AMPCOLOY 97
M-13, 99.5 Cu, 4 Cr, 1 Be.
Cast. 40,000-50,000 TS; 35,000-40,000 YS, 10-15 El; 140-150 Brin.
For welding electrodes; same as Ampco Trodaloy 7.

AMPCOLOY 97-20.
M-13; 1.5 Cr, bal Cu, 0.5 max others.
Cast: 51,000 TS; 40,000 YS; 17 El, 35 RA; 105 Brin.
For welding electrodes, bushings, inserts; age hardenable, high electrical conductivity.

AMPCOLOY 99.
M-13, Cu alloy
Bars: 60,000-50,000 TS; 20,000-15,000 YS; 20-25 El; 100-115 Brin.
For resistance welding electrode, for terneplate and galvanized stock.

AMPCOLOY A-323.
M-13; 89 Cu, 10 Al, 1 Fe.
Heat treated: 80,000-90,000 TS; 40,000-50,000 YS; 22-30 El; 24-32 RA; 143-156 Brin.
For hardware; heat treatable; formerly "Atlas 89A323."

AMPCOLOY 342.
M-13; 4.25-5.5 Sn, 18-22 Pb, 0.5 max Zn, bal Cu.
For bearings, bushings; continuous cast rod.

AMPCOLOY 382.
M-13; 81-85 Cu, 6.2-7.5 Sn, 2-4 Zn, 6-8 Pb.
Cast: 30,000 TS; 14,000 YS; 12 El.
For bearings, bushings; continuous cast rod.

AMPCOLOY 405.
M-13; 7 Al, 2 Si, bal Cu.
Extruded: 85,000-87,000 TS; 50,000-53,000 YS; 30-28 El; Rockwell B86-84.
For valve stems, valve seats, gears, hardware, high strength, high ductility, wear resistant.

AMPCOLOY 483.
M-13; 9.0 Al, 4.5 Fe, 4.5 Ni, 1.0 Mn, bal Cu.
Cast: 100,000 TS; 43,000 YS; 25 El; 163 Brin.
For marine propellers, worm wheels, marine hardware.
Tough, strong, corrosion resistant.

AMPCOLOY 495.
M-13; 8 Al, 2.5 Fe, 2 Ni, 12.5 Mn, bal Cu.
Bar: 100,000 TS; 50,000 YS, 30 El; 187 Brin.
For pump and valve parts, propellers, hydraulic equipment
Corrosion resistant, tough, shock resistant.

AMPCOLOY 501
M-13, 0.7 Mn, 1.5 Si, bal Ni
Cast: 50,000 TS, 25,000 YS, 25 El; 100 Brin
For valve and pump bodies, food and drug handling equipment
Corrosion and heat resistant

AMPCOLOY 502.
M-13; 0.3 Mn, bal Ni
Forged: 75,000 TS; 35,000 YS, 30 El, 130 Brin
For valve trim, food and drug handling equipment
Corrosion and heat resistant.

AMPCOLOY 521
M-13; 30 Ni, 1 Mn, 0.5 Fe, 0.5 Si, bal Cu.
Cast: 63,000 TS; 32,000 YS; 35 El; 120 Brin.
For valve bodies and trim, valve stems for pipe fittings, propeller sleeves, pump impellers
Good corrosion resistance to 700°F.

AMPCOLOY 522
M-13, 0.5 Fe, 30 Ni, 0.5 Mn, bal Cu
Forged: 55,000 TS, 23,000 YS; 40 El, 85 Brin.
For valve bodies and trim, valve stems for pipe fittings, propeller sleeves, pump impellers
Corrosion resistant to 700°F.

AMPCOLOY 525.
M-13; 1.5 Fe, 10 Ni, 1 Mn, 0.1 Si, bal Cu
Cast. 42,000 TS, 19,000 YS; 35 El, 100 Brin
For oil refinery equipment, propeller sleeves, pump impellers, marine hardware
Corrosion resistant to 600°F.

AMPCOLOY 526.
M-13, 1.5 Fe, 10 Ni, bal Cu.
Forged: 40,000 TS; 18,000 YS, 45 El, B 35 Rock
For oil refinery equipment, propeller sleeves, pump impellers, marine hardware
Corrosion resistant to 600°F

AMPCOLOY 531.
M-13, 8 Fe, 1 Mn, 15 Cr, bal Ni.
Rolled. 100,000 TS; 60,000 YS, 35 El; 180 Brin.
For exhaust manifolds, furnace and heat treating equipment, jet engine parts, oil and gas burners.
For subzero and high temperature service.

AMPCOLOY 551.
M-13; 29 Cu, 3 Al, 1 Mn, bal Ni.
Rolled: 150,000 TS; 105,000 YS; 25 El; 280 Brin.
For pump and valve parts, scrapers.
High strength, wear and corrosion resistant. (K-Monel).

AMPCOLOY 552.
M-13; 30 Cu, 1.4 Fe, 1.0 Mn, bal Ni.
Forged: 80,000 TS; 45,000 YS; 35 El; 140 Brin.
For propeller shafts, valve seats and stems, pump and compressor parts.
Resists corrosion and elevated temperature (Monel).

AMPCOLOY 553.
M-13; 30 Cu, 2 Fe, 0.75 Mn, 4 Si, bal Ni
Cast: 125,000 TS; 100,000 YS; 2 El; 300 Brin.
For pump wear rings, valve trim, steam nozzles.
Non-magnetic, non-galling, corrosion resistant
Similar to S-Monel.

AMPCOLOY 557
M-13; 31 Cu, 2 Fe, 0.75 Mn, 3 Si, bal Ni
Cast: 100,000 TS; 65,000 YS, 8 El, 200 Brin.
For pump wear rings, valve trim, steam nozzles.
Corrosion resistant, non-magnetic.
Similar to H-Monel

AMPCOLOY 558
M-13; 33 Cu, 1.2 Fe, 0.8 Mn, 1.7 Si, bal Ni
Cast 75,000 TS; 35,000 YS; 30 El; 130 Brin
For pump impellers, valve bodies and trim, bubble caps, food machinery, steam ejectors
Weldable, corrosion resistant.

AMPCOLOY 559
M-13, 33 Cu, 1.2 Fe, 0.8 Mn, 1.7 Si, bal Ni
Cast 75,000 TS, 35,000 YS; 30 El; 130 Brin
For pump impellers, valve bodies, bubble caps, food machinery, steam ejectors.
Corrosion resistant, strong and tough

AMPCOLOY 561
M-13, 2 Cu, 30 Fe, 1 Mn, 3 Mo, 1 Ti, 1 Cr, bal Ni
Forged 95,000 TS, 48,000 YS, 43 El, 156 Brin
For agitators, valves, pump fittings, heat exchangers
Resists sulphuric and phosphoric acids
Corrosion resistant (Ni-O-Nel)

AMPCOLOY 570
M-13, 10 Al, 0.7 Fe, 15 Ni, 1.5 Co, bal Cu
Cast 94,500 TS, 55,000 YS, 5 El, 202 Brin
For glass mold service
Heat and corrosion resistant.

AMPCOLOY 666
M-13, 1.45-1.75 Al, 2.8 max Mn, 57-60 Cu, bal Zn, 1.7 max others.
Extruded 82,000-88,000 TS; 42,000-55,000 YS; 18-12 El; 170-187 Brin
For bushings, gears, bearings, cams, valve stems, connecting rods, high strength bearing bronze.

AMPCOLOY 668
M-13, 61 Cu, 2.5 Pb, 2.5 Mn, 1.0 Si, bal Zn.
Extruded 72,000-75,000 TS, 58,000-60,000 YS; 18-20 El, 162-144 Brin
For bushings, bearings, gears, cams, valve stems, lead screw nuts; free-cutting, leaded manganese bearing bronze.

AMPCOLOY 711
M-13; 11 Sn, 0.2 P, bal Cu.
Cast 55,000 TS, 30,000 YS; 16 El, 102 Brin.
For gears, worm wheels.
Gear bronze. Tough.

AMPCOLOY 712.
M-13, 1.5 Ni, 11.75 Sn, 0.2 P, bal Cu.
Cast: 60,000 TS; 32,000 YS; 16 El; 106 Brin.
For gears, worm wheels.
Gear bronze, tough.

AMPCOLOY 715.
M-13; 12 Sn, 0.2 P, bal Cu.
Cast: 60,000 TS; 32,000 YS; 16 El; 106 Brin.
For gears, worm wheels.
Gear bronze, tough, wear resistant.

AMPCOLOY 742.
M-13; 86-89 Cu, 9-11 Sn, 1-3 Zn, 0.3 max Pb.
Cast: 40,000 TS, 18,000 YS; 14 El; R80F Brin.
For gears, shafts; continuous cast rod.

AMPCOLOY 900.
M-13; 99.98 Cu.
Extruded: 30,000 TS; 10,000 YS; 40 El, 40 Brin.
For electric motor components, conductors.
Electrical cond 100 min
OFHC Copper.

AMPCOLOY 901.
M-13; 99.9 Cu, 30-oz/ton Ag
Cast: 26,000 TS; 8,000 YS, 40 El; 44 Brin.
Forged. 31,000 TS, 10,000 YS, 45 El; 47 Brin
For high temperature (600°F) electrical and acid resistant applications, heat exchangers, computor segments.
Electrical conductivity 95 min

AMPCOLOY 910
M-13, 0.12 Zr, 99.88 Cu
Forged 55,000 TS, 47,000 YS, 14 El, 100 Brin
Extruded 65,000 TS, 60,000 YS; 16 El; 119 Brin
For rotor wedges, commutators, collector rings, switch gears, soldering tips, welding electrodes
90% electrical conductivity.

AMPCOLOY A-1
M-13; 8.5 Al, 3.0 Fe, bal Cu
Cast 80,000 TS, 29,000 YS, 30 El, 135 Brin
For bushings, bearings, gears, wear plates, connecting rods.
Medium strength, light loads

AMPCOLOY A-2
M-13; 7.0-10.0 Al, 0.5-2.0 Fe, 0.6 max others, bal Cu
Cast 62,000 TS, 23,000 YS, 30 El, 30 RA, 101 Brin
For pickling hooks, bushings, marine hardware
Corrosion resistant

AMPCOLOY A-3
M-13, 9-10 Al, 1.3 max Fe, bal Cu
Cast 70,000-75,000 TS, 25,000-32,000 YS, 25-40 El, 25-40 RA, 115-140 Brin.
For gears, pumps, impellers, bearings, corrosion resistant

AMPCOLOY B2
M-13, 10 Al, 1 Fe, bal Cu.
Bar: 85,000 TS, 42,000 YS, 23 El, 170 Brin
Cast 77,000 TS, 29,000 YS, 30 El, 140 Brin.
For bearings, liners, pump parts, pump impellers, bushings Heat treatable, high strength.
Aluminum bronze. For use with medium loads and average speeds Corrosion resistant

AMPCOLOY C3
M-13, 10.5 Al, 3.0 Fe, bal Cu
Bar 100,000 TS, 48,000 YS; 12 El; 192 Brin.
Cast: 85,000 TS; 35,000 YS; 12 El, 183 Brin.
For bearings, bushings, gears, valve guides and seats, pump and hydraulic valves.
Aluminum bronze. Tough, corrosion and wear resistant.

AMPCOLOY D-4.
M-13; 10 Al, 5 Fe, 5 Ni, bal Cu
Bar: 105,000 TS; 46,000 YS; 18 El; 195 Brin.
Ht. Tr.. 120,000 TS; 70,000 YS, 18 El; 240 Brin.
For piston guides, valve seats, glands, pump fluid ends.
High strength, tough Al-bronze, heat treatable.

AMPCOLOY E-1.
M-13; 9.5-11 Al, 1.5 max Fe, bal Cu.
Cast: 70,000-80,000 TS; 40,000-45,000 YS; 12-20 El; 14-20 RA; 131-143 Brin.
For castings, power shovels, worm wheels, pistons, bushings; corrosion resistant.

AMPCOLOY E-5.
M-13; 9.0 Al, 3.0 Fe, bal Cu.
Bar: 90,000 TS, 48,000 YS; 18 El; 174 Brin.
For valve seats, guides, stems, gears, bearings.
Wear and corrosion resistant aluminum bronze. Tough.

AMPCOLOY E-117
M-13; 9-11 Al, 1.5 max Fe, bal Cu.
Cast 80,000 TS; 48,000 YS, 2-6 El, 3-7 RA; 227-255 Brin.
For propellers, bushings, slides.

AMPCOLOY E-123.
M-13, 9.5-11 Al, 1.5 Fe, bal Cu.
Cast: 85,000 TS, 42,000 YS, 15 El, 15 RA, 174 Brin
For propellers, liners, worm wheels, ball seats, bushings

AMPCOLOY F-6
M-13, 10 Al, 3 Fe, bal Cu
Cast: 85,000 TS, 31,000 YS, 20 El; 170 Brin
For bushings, bearings, gears, worm wheels, shifters.
Resists squashing under load

AMPCOLOY M-100
M 13, 100 Mo
Sintered 80,000 TS, 30 El; B 90 Rock.
For facings on spot welder tips.
High heat resistance

AMPCOLOY W-100
M-13;
Bars 50,000-200,000 TS, A 76 Rock.
For resistance welding electrodes for Red Brass weldings
RWMA Class B-13
30% elect cond, corrosion and wear resistance

AMPCO METAL
M-285; 82-88 Cu, 9-12 Al, 3.4-5.3 Fe.
Cast 75,000 TS, 20 El; 18 RA, 149 Brin
Forged 116,000 TS, 4 El, 16 RA, 340 Brin.
Hot rolled 100,000 TS, 20 El, 18 RA; 149 Brin.
For gears, forming dies, valves, bushings, tools, trolley shoes, and wheels, resists corrosion; shock resisting.

AMPCO METAL 8.
M-13, 6-8 Al, 1.5-3.0 Fe, bal Cu
Plate: 72,000 TS, 35,000 YS, 34 El, 130 Brin.
Extruded: 82,000 TS; 55,000 YS, 35 El, 149 Brin
For wear plate service, slides, gibs, bushings, bearings, bolts, fittings
Alpha phase, corrosion resistant.
High impact and fatigue strength

AMPCO METAL 15
M-13, 8.5-10.0 Al, 2.5-3.75 Fe, 0.5 max others, bal Cu.
Wrought. 92,000 TS; 46,000 YS; 25 El; 25 RA, 174 Brin
For valve stems, washers, worm gears, cam rollers, bushings, shear pins, studs.
Good bearing qualities, wear and corrosion resistant.

AMPCO-TRODE 10.
M-13; 9.0-11.0 Al, 1.5 max Fe, bal Cu.
Cast: 60,000-77,000 TS; 25,000-35,000 YS; 25-30 El; 28-30 RA; 110-130 Brin.
For bronze welding rod: aluminum bronze.

AMPCO-TRODE 12.
M-13; 10 Al, 1 Fe, bal Cu.
Cast: 50,000-60,000 TS; 100-115 Brin.
For bronze welding rod for cast iron;
now Ampco-Trode 10.

AMPCO-TRODE 16.
M-13; 9.2 Al, 4.8 Fe, bal Cu.
Cast: 60,000-70,000 TS; 10-20 El; 147-160 Brin.
For bronze welding rod; now Ampco-Trode 160.

AMPCO-TRODE 18.
M-13; 10.3 Al, 5.8 Fe, bal Cu
Cast: 70,000-80,000 TS; 8-14 El; 160-180 Brin.
For bronze welding rod; building up worn parts;
now Ampco-Trode 200.

AMPCO-TRODE 20.
M-13; 11.8 Al, 5.9 Fe, bal Cu.
Cast: 75,000-85,000 TS; 200-250 Brin.
For bronze welding rod; building up worn parts;
now Ampco-Trode 250.

AMPCO-TRODE 21.
M-13; 10 Al, 3 Fe, bal Cu.
Cast: 60,000-70,000 TS; 1.5-3 0 El; 275-310 Brin.
For bronze welding rods; building up worn parts

AMPCO-TRODE 22.
M-13; 11 Al, 2 Fe, bal Cu.
Cast: 65,000-75,0000 TS; 294-342 Brin.
For bronze welding rod; building up worn parts.

AMPCO TRODE 40
M-13; 7 0-8.0 Al, 2.0-3.0 Fe, 2.0-3.0 Ni,
11 0-12 0 Mn, 0.6 max others, bal Cu.
Wrought: 95,500 TS, 56,000 YS; 27 El;
38 RA; 185 Brin
For manganese bronze welding rod.
Wear resistant.

AMPCO-TRODE 160.
M-13; 11-12 Al, 3.0-4 25 Fe, bal Cu, 0.6 max others
Cast: 89,000 TS; 47,000 YS; 15 El; 17 RA;
177 Brin.
For welding electrodes, bearing overlay;
resists salt water and commercial acids.

AMPCO-TRODE 200.
M-13; 12-13 Al, 3-5 Fe, bal Cu, 0.6 max others.
Cast: 90,500 TS; 46,000 YS; 4 El; 5 RA; 212 Brin.
For welding electrodes, surfacing, overlays;
corrosion and acid resistant.

AMPCO-TRODE 250.
M-13, 13-14 Al, 3-5 Fe, bal Cu,
0 6 max others.
Cast: 77,000 TS; 54,000 YS; 1 El; 260 Brin
For welding electrodes, bushings, bearings, gears,
slides; free from galling and scuffing.

AMPCO-TRODE 300.
M-13; 14-15 Al, 3-5 Fe, bal Cu, 0.6 max others.
Cast: 80,000 TS, 69,000 YS; 0 El; 316 Brin.
For welding electrodes, for overlaying, drawing
and forming dies; wear resistant;
good bearing qualities

AMPHOS.
M-1508; 0.03 P, bal Cu.
For condenser tubes, heat exchangers, piping;
good hot and cold workability.

AMPHOS-40.
M-558; Oxygen free copper with added phosphorus.
For plating anodes.

AMS.
M-459, 0.55 C, 0.7 Cr, 1.7 Ni, 0 3 Mo,
0.1 V, bal Fe.
Oil hardening steel for drop forging dies;
tough, through hardening.

AMS EXTRA.
M-459; 0.55 C, 1.1 Cr, 1.7 Ni, 0.5 Mo,
0.1 V, bal Fe.
Oil hardening steel for drop forging dies;
tough, high red hardness.

AMSCO NO. 1.
M-9; 2.5 C, 31 Cr, 50 Co, 13 W.
Welded: 500-540 Brin.
For hard facing rod, valves and valve seats;
heat and corrosion resistant to 1200°F.

AMSCO NO. 6.
M-9; 1 C, 28 Cr, 60 Co, 5 W, bal Fe.
Welded: 3 El; 450 Brin.
For hard facing rod, valves and valve seats;
corrosion and heat resistant to 1200°F.

AMSCO 40.
M-9; 3.5 C, 2 Cr, 5 Mo, bal Fe.
Welded: 540 Brin.
For hard facing electrode; abrasion resistant.

AMSCO 53.
M-9, 3 C, 15 Cr, Mo, bal Fe.
Welded: 540 Brin.
For hard facing electrode; abrasion and
impact resistant

AMSCO 60
M-9, 2 C, 4 Cr, bal Fe.
Welded: 500 Brin
For hard facing electrode; abrasion and
impact resistant.

AMSCO NO 217.
M-9, 3 C, 15 W, 8 Cr, bal Fe.
Cast: 650 Brin
For welding rod for hard surfacing,
abrasion resistant to 1000°F.

AMSCO NO 459
M-9, 3 0 C, 4 Cr, 4 Mo, 1 Ni, bal Fe
Cast 600 Brin.
For hard facing rod for dipper teeth,
abrasion and impact resistant

AMSCO AIR HARDENING
M-9, 1 0-1 5 C, 2 Cr, 1 Mo, bal Fe
Cast. 450-550 Brin
For welding rod, abrasion and impact resistant
to 400°F, air hardening

AMSCO AW-79
M-9, 0 3 C, 4 Cr, 1 Mo, bal Fe.
Welded: 420 Brin.
For automatic submerged melt electrode,
hard facing tractor rollers and idlers.

AMSCO AW-THERMALLOY 4.
M-9, 0 8 C, 20 Cr, 8 Ni, Mo, bal Fe
Welded: 250 Brin
For automatic submerged melt electrode,
impact resistant at high temperature,
work hardens

AMSCO CHROMANAL.
M-9; 1-1 4 C, 10-14 Mn, 0 2-1.0 Si,
1 3 Cr, bal Fe.
Heat treated 95,000-145,000 TS, 53,000-65,000 YS;
63-27 El, 40-30 RA; 195-220 Brin.
For crushers, hammer mills, liners, castings;
work hardens up to 550 Brin.

AMSCO CHROMEFACE.
M-9; 4 C, 6 Mn, 2 Si, 30 Cr, bal Fe
Cast: 500-600 Brin.
For hardfacing electrodes; abrasion resistant
to 600°F, austenitic.

AMSCO CHROME MOLY BALL MILL GRATE STEEL.
M-9; 0 5-0.7 C, 0 5-1.5 Mn, 0.2-0 8 Si, 1.8-2.8 Cr, 0.2-0.5 Mo, bal Fe.
Heat treated: 145,000-175,000 TS; 90,000-130,000 YS; 11-8 El; 20-12 RA; 300-350 Brin
For ball mill grates, abrasion resistant

AMSCO CHROME MOLY BALL MILL LINER STEEL
M-9; 0.7-1 0 C, 0 5-1.5 Mn, 0 2-0 8 Si, 1.8-2 8 Cr, 0 2-0 5 Mo, bal Fe
Heat treated: 150,000-185,000 TS; 95,000-140,000 YS; 8-4 El, 10-4 RA; 300 350 Brin
For ball mill liners; abrasion resistant

AMSCO CM
M-9, 0 5-1 0 C, 0 5-1 5 Mn, 0 2-1.0 Si, 1 8-2 8 Cr, 0 2-0.5 Mo, bal Fe
Heat treated 125,000-185,000 TS; 80,000-150,000 YS; 13-2 El; 25-2 RA, 300-400 Brin
For rod and ball mill grates and liners, crushers, high abrasion and moderate impact resistance.

AMSCO-CMH
M-9, C, Cr, Mo, bal Fe
Heat treated· 155,000 TS; 130,000 YS, 6 El; 7 RA, 300-400 Brin
For castings, ball and rod mill shell liners, air hardened, wear resistant

AMSCO-CMI
M-9, C, Cr, Mo, bal Fe
Heat treated· 155,000 TS, 130,000 YS; 10 El, 15 RA, 275-375 Brin
For castings, trunnion liners, feeder scoops; air hardened, abrasion resistant

AMSCO CO MANG
M-9, 0 6 C, 13 Mn, 0 7 Mo, bal Fe
Welded 180 Brin
Worked 500 Brin
For welding electrodes for austenitic Mn steel, coating of Mn compounds and other alloys, composite electrode

AMSCO CS
M 9, 0 2-0 35 C, 0 7-1 5 Cr, 0 8-1 5 Mn, 0 2-0.8 Si, 0 3 0 8 Ni, 0 2-0.6 Mo, bal Fe
Heat treated 200,000-240,000 TS, 170,000-210,000 YS, 10-6 El, 30-10 RA; 300-500 Brin
For castings, dipper teeth, abrasion and wear resistant

AMSCO DIEWELD
M-9, 1 C, 3 5 Cr, 2 3 Mo, bal Fe
500-600 Brin
For welding rod for forging dies, punches, hard facing, coated, air hardened

AMSCO F-1
M-9, 15-18 Cr, 34-37 Ni, bal Fe
For electric furnace grids, hearth plates, rails, furnace chains, heat resisting, max operating temperature 2000°F

AMSCO F-1H
M-9; 0 4-0 6 C, 16 Cr, 35 Ni, bal Fe
For furnace parts, heat resisting

AMSCO F-1HH.
M-9; 0 60-0 85 C, 16 Cr, 35 Ni, bal Fe.
For furnace parts; heat resisting

AMSCO F-1-N
M-9, C, 15-18 Cr, 38-40 Ni, bal Fe
For retorts, muffles, furnace castings, hearth plates; heat and corrosion and shock resistant.

AMSCO F-2.
M-9, 21-24 Cr, 3-6 Ni, bal Fe
For furnace lead pots; heat resisting, max operating temperature 1800°F.

AMSCO F-3.
M-9, 26-29 Cr, 0-3 Ni, bal Fe.
For rabble arms, rabble blades, corrosion and heat resisting

AMSCO F-3H.
M-9; 0.4-0 6 C, 28 Cr, 2 Ni, bal Fe
For furnace parts, heat resisting.

AMSCO F-3HH.
M-9, 0.6-0 85 C, 28 Cr, 2 Ni, bal Fe
For furnace parts; heat resisting

AMSCO F-4
M-9; 6-9 Cr, 18-21 Ni, bal Fe
For high strength castings, corrosion resisting

AMSCO F-5
M-9; 16-19 Cr, 65-70 Ni, bal Fe
For carburizing boxes, oil burner parts; heat resisting, very tough

AMSCO F-6
M-9, C, 12-15 Cr, 58-64 Ni, bal Fe
For furnace parts, heat treating boxes, retorts, corrosion and heat resistant

AMSCO F-7H
M-9, 0 5 C, 25 Cr, 12 Ni, bal Fe
For furnace parts, heat resistant

AMSCO F 8
M-9, 17-22 Cr, 7-10 Ni, bal Fe
For pots in chemical plants, acid pumps, corrosion resisting

AMSCO F-10
M-9, 0 4 C, 28 Cr, 12 Ni, bal Fe
For furnace parts, dampers, valves, beams, heat resistant.

AMSCO F-10H.
M-9, 0 4-0 6 C, 28 Cr, 12 Ni, bal Fe.
For furnace parts; heat resistant.

AMSCO F-10HH
M-9, 0 6 0 85 C, 28 Cr, 12 Ni, bal Fe
For furnace parts, heat resistant

AMSCO F-12.
M-9, C, 27-30 Cr, 7-10 Ni, bal Fe
For heat treating furnaces, valves, creep resisting.

AMSCO F-13
M-9, C, 25-28 Cr, 34-37 Ni, bal Fe
For furnace parts, retorts, muffles, resists heat and S atmosphere to 2100°F.

AMSCO F-14
M-9, C, 24-27 Cr, 19-22 Ni, bal Fe
Cast
For furnace parts; heat resistant

AMSCO HC
M-9, C, Cr, Si, Mn, bal Fe.
Heat treated 60,000 TS, 7000 YS; 400-600 Brin.
For castings, chute plates, liners; cast iron, abrasion and wear resistant

AMSCO HC-250.
M-9, 2 0-3 0 C, 0 5-1 8 Mn, 0.2-1.0 Si, 22-30 Cr, 0.2-0 6 Mo, bal Fe
Heat treated. 60,000-100,000 TS; 50,000-75,000 YS; 450-550 Brin
For pump parts, liners; erosion and abrasion resistant.

AMSCO HF20.
M-9; steel core wire, coated with Cr, Mn, Mo, Si, V.
Welded: 600 Brin,
For hard facing electrode; hot wear resistant.

AMSCO HF-40.
M-9; 3.5 C, 0.5 Mn, 5.0 Cr, 4.0 Mo, bal Fe.
Cast: 500-580 Brin.
For hard facing electrode; martensitic cast iron, wear resistant.

AMSCO HF-60.
M-9; 1.6 C, 1.0 Mn, 3.0 Cr, bal Fe.
Cast. 450-555 Brin.
For hard facing electrode; abrasion resistant.

AMSCO-M.
M-9; 1.0-1.4 C, 10-14 Mn, 0.2-1.0 Si, bal Fe
Heat treated: 100,000-145,000 TS; 50,000-57,000 YS, 60-30 El, 40-30 RA; 195 Brin
For dipper buckets, crawler shoes, mill liners, screens, austenitic, work hardens, wear resistant

AMSCO MACHINE-FACE.
M-9; 0.4 C, 1 Cr, 0.2 Mo, bal Fe
Welded: 293-331 Brin
For hard surfacing electrodes, coated.

AMSCO MANGANESE STEEL
M-9, M-231, 10-14 Mn, 1-1.4 C, 0.2-1.0 Si, bal Fe
Heat treated 100,000-145,000 TS; 50,000-57,000 YS, 60-30 El; 40-30 RA; 155-200 Brin.
For steam shovel teeth rolls, ball mill liners, wheels, gears and pinions, tough and shock resisting, resists abrasion

AMSCO MM
M-9, 0.70-1.4 C, 10-14 Mn, 0.2-1.0 Si, Mo, bal Fe
Heat treated 90,000-160,000 TS, 45,000-75,000 YS; 65-30 El; 40-30 RA, 200 Brin.
For mining and construction equipment; abrasion and impact resistance with toughness, work hardens

AMSCO-MMH
M-9; C, Mo, Mn, bal Fe
Heat treated: 120,000 TS, 65,000 YS, 20 El, 18 RA
For castings, rolls, jaws, hammers, dipper teeth, wear resistant, austenitic

AMSCO-MML.
M-9, C, Mo, Mn, bal Fe.
Heat treated. 120,000 TS, 52,000 YS, 50 El, 40 RA
For castings, railroad frogs and crossings; austenitic, wear resistant

AMSCO-MNI.
M-9; C, Mn, Ni, bal Fe
Heat treated: 110,000 TS, 48,000 YS, 55 El, 40 RA
For railroad frogs and crossings, austenitic, wear resistant

AMSCO Mo-MANG.
M-9; 0.8 C, 14 Mn, 0.2 Mo, bal Fe.
Welded 200 Brin
For welding rod for building up worn parts, abrasion resistant, work hardens to 500 Brinell, austenitic

AMSCO-MY.
M-9, 1.0-1.4 C, 2.0 Cr, 10-14 Mn, bal Fe
Cast: 120,000 TS, 56,000 YS, 45 El; 30 RA, 200 Brin.
Heat treated. 150,000 TS, 65,000 YS; 30 El; 30 RA.
For castings, mill liners, screens, dipper teeth jaws,, hammers, austenitic, wear resistant

AMSCO NICKEL MANGANESE.
M-9; 0.7 C, 13-15 Mn, 0.9-1.2 Si, 2.5-3.5 Ni, bal Fe.
Welded: 200 Brin.
Hardened 550 Brin.
For crusher rolls, dipper teeth, dredge parts, austenitic, high work hardenability

AMSCO NICROMANG.
M-9, 0.8 C, 14 Mn, Ni, Cr, bal Fe
Welded: 120,000 TS, 70,000 YS; 40 El; 35 RA; 180 Brin
For weld electrode for Mn-steels; work hardens, high strength and ductility

AMSCO Ni-HARD
M-9, 3.5 C, 4.5 Ni, 1.5 Cr, bal Fe.
Welded 600-700 Brin
For welding rod for hard facing; abrasive resistant to 600°F.

AMSCO Ni-Mn STEEL
M-9, 0.75-0.95 C, 13-15 Mn, 0.90-1.20 Si, 3.5-4.5 Ni, bal Fe.
For welding rod for welding austenitic-manganese steel parts; abrasion resistant

AMSCO RAILFACE
M-9, 0.5 C, 1.5 Cr, 0.2 Mo, bal Fe
Welded: 325-380 Brin
For welding electrode for rails, composite coated electrodes, abrasion and impact resistant

AMSCO RESISTWEAR
M 9, 0.6 C, 6 Cr, 0.5 Mo, Mn, bal Fe
Welded 450-550 Brin
For welding electrode, hard surfacing, coated, composite electrode

AMSCO SA-33
M-9, 3 C, 12 Cr, Mo, V, bal Fe
Welded 550 Brin
For hard facing electrode, severe abrasion resistance

AMSCO SA-53
M-9, 3 C, 15 Cr, Mo, bal Fe
Welded: 460 Brin
For hard facing electrode, impact and abrasion resistant

AMSCO SA-BUILD UP
M-9, 0.5 C, Cr, V bal Fe
Welded 260 Brin
For electrode for carbon and low alloy steel build up

AMSCO SA MANGANESE
M-9, 0.6 C, 14 Mn, Mo, bal Fe
Welded 175 Brin
For electrode for Mn-steel repair, work hardens

AMSCO SUPER 20
M 9, 5 C, 20 Cr, 7 Mo, 5 W, bal Fe.
Welded 650 Brin
For hard facing electrode, abrasion resistant at normal and elevated temperature

AMSCO THERMALLOY 4
M-9, 0.6 C, 20 Cr, 8 Ni, Mo, bal Fe.
Welded 250 Brin.
For hard facing electrode, work hardens, impact resistant at high temperature

AMSCO TOOLFACE
M-9, 0.8 C, 4 Cr, 9 Mo, 1.5 W, 1 V, bal Fe
Welded: 575-675 Brin.
For welding rod, composite cutting tools; abrasion and impact resistant to 1000°F

AMSCO TRACKRAIL.
M-9; 0.5 C, Cr, V, bal Fe.
Welded: 295 Brin.
For automatic submerged melt electrode; build up for tractor track links.

AMSCO TUBE TUNGSITE
M-9, WC particles in matrix of W-steel or W-cast iron.
For hard facing welding rod for tipping tools; wear and abrasion resistant

AMSCO V-MANG
M-9; 0.8 C, 14 Mn, 1 Mo, bal Fe
Cast 200 Brin.
Heat treated 550 Brin
For hard surfacing electrode, for build up on Mn steels, austenitic

AMSIL.
M-558, 0.05 Ag, bal Cu.
Elect cond 101%
Wire 48,000 TS, 40,000 YP, 15 El, B 50 Rock
For rotor and stator windings in high speed generators, commutators
High creep resistance, freedom from embrittlement

AMSULF
M 1508, 0.3 S, bal Cu
Extruded 32,000 TS, 47 El; 60 RA
Cold drawn 57,000 TS, 6 El, 23 RA
For screw machine products, clamps, connectors, clips, high electrical conductivity, free cutting

AMTEL
M-558, 0.5 Te, bal Cu
Bar 50,000 TS, 40,000 YP, 12 El
For screw machine products, hardware, fasteners, welding tips and nozzles
Free machining, immune to hydrogen embrittlement

AMUTIT
M 27, 1.05 C, 0.9 Mn, 1.5 W, 1 Cr, bal Fe
For stay bolt taps, screw taps gages, broaches, reamers, milling cutters, oil hardened AISI 07

AMUTIT S
M-27, M-1182, 1C, 1 Mn, 0.5 Cr, 0.6 W, 0.1 V, bal Fe
For cold forming, blanking and bending dies, non deforming, oil hardening AISI 01

AMVILOY 1000
M 265, W, Ni, Cu
Sintered 112,000 TS, 270 Brin
For electrical upsets, 14% electrical conductivity

AMVILOY 2000
M-265, W, Ni, Cu
Sintered 110,000 TS; 290 Brin
For electrical upsets, 16% electrical conductivity

AMZIRC
M-1508, 0.7 Zr, bal Cu.
At 70°F, 72,000 TS, 62,000 YS, 12 El
At 750°F, 51,600 TS, 15 El
At 900°F 39,400 TS, 19 El
For rectifier bases, rotor wedges, resistance welding wheels and tips, high conductivity, good high temperature strength

AMZIRC-150
M-8, 0.17 Zr, 99.83 Cu.
At RT: 71,000 TS, 62,000 YS
At 752°F: 52,000 TS, 45,000 YS, 8 El
At 932°F 35,200 TS; 25,800 YS; 9 El
For resistance welding wheels and tips, commutators, contacts, switch blades
92% elect. cond. annealed.
Precipitation-hardening.

ANACONDA 61.
M-8; 63 Cu, 37 Zn.
Hard: 65,000 TS; 50,000 YS; 20 El; B75 Brin.
Soft: 46,000 TS; 17,000 YS; 60 El; B20 Brin.
For screw machine parts; yellow brass.

ANACONDA 66.
M-8; 60 Cu, 40 Zn.
Soft: 54,000 TS, 20,000 YS, 40 El, B45 Brin.
For hardware, condenser tubes, high strength.

ANACONDA 271
M-8, 62 Cu, 35 Zn, 3 Pb
Hard, 62,000 TS, 50,000 YS; 20 El, 77 RB
Soft: 47,000 TS, 32,000 YS, 60 El; 16 RB
For machined parts, hardware, free cutting.

ANACONDA 293
M-8, 39 Zn, 1 Pb, bal Cu.
Hard 80,000 TS, 60,000 YS, 6 El; 142 Brin
Soft 54,000 TS, 20,000 YS; 40 El, 79 Brin.
For hardware, architectural uses, leaded Muntz metal

ANACONDA 605.
M-8, 38.55 Zn, 0.75 Sn, 0.70 Pb, bal Cu.
Hard 63,000 TS; 35,000 YS; 28 El; 102 Brin.
Soft. 56,000 TS, 22,000 YS, 38 El; 83 Brin.
For hardware, screw machine products, Leaded Naval Brass.

ANACONDA 612
M-8, 60 Cu, 29.5 Zn, 2 Pb, 0.75 Sn
Hard 63,000 TS, 35,000 YS, 25 El, B65 Brin
Soft 56,000 TS, 22,000 YS, 35 El, B50 Brin
For screw machine parts, free cutting

ANACONDA 624
M-8, 60 Cu, 1 Sn, 1 Pb, 0.1 Al, 0.15 Si, bal Zn.
Die cast 55,000 TS, 35,000 YS, 8 El
For hardware, fixtures, free-cutting

ANACONDA 681
M-8, 57.8 Cu, 40.27 Zn, 0.95 Sn, 0.85 Fe, 0.10 Si, 0.03 Mn.
For oxyacetylene braze welding of steel, cast iron and copper alloys, and for bearing surfaces. Welding rods.
Low fuming bronze Melting point 870°C, corrosion resistant

ANACONDA-831.
M-8, 1 Pb, 1 Ni, 0.2 bal Cu
Bar 85,000 TS, 75,000 YS, 5 El
For fasteners, screw machine products, electrical contacts, connectors, free-cutting, corrosion resistant

ANACONDA 997
M-8; 40.3 Zn, 0.95 Sn, 0.85 Fe, bal Cu
For welding rod, low fuming

ANACONDA 1026
M-8, 81.5 Cu, 4.25 Sn, 0.15 Mn, bal Zn.
Die cast 85,000 TS, 50,000 YS, 8 El.
For hardware, fixtures; corrosion resistant

ANACONDA COPPER 189
M-8, 98.80 Cu, 0.75 Sn, 0.25 Si, 0.20 Mn.
For inert-gas and oxyacetylene welding of copper for ductile and strong welds, welding rods
Melting range 1075°C, corrosion resistant.

ANACONDA COPPER 372
M-8; 98.8 Cu, 0.75 Sn, 0.25 Si, 0.20 Mn
For welding rod, oxy-acetylene and inert gas arc welding of copper, M.P. 1967°F.

ANACONDA ELECTRO SHEET COPPER.
M-8; Cu
For weather proofing, printed circuits; furnace brazing.

ANATOMICAL ALLOY.
U.S.; 54 Bi, 19 Sn, 17 Pb, 11 Hg, Cd.
For fusible alloy for anatomical impressions and casts; fusible.

ANCHOR ALLOY NO 95/5.
M-1468; A refrigeration solder, contains Sn and Sb; used with copper sweat fittings; M.P.; 450°F.

ANCHOR ALLOY NO. 250.
M-1468; Aluminum solder; M.P.: 390°F.
For joining aluminum to aluminum.

ANCHOR ALLOY NO. 260.
M-1468; Aluminum solder; M.P.; 650°F
For joining aluminum to aluminum or to dissimilar metals, including castings, die cast parts and aluminum foil

ANCHOR ALLOY NO. 270
M-1468; Solder, M.P.: 507°F.
All purpose solder for all metals except magnesium, including aluminum, zinc die casting, copper, etc

ANCHOR ALLOY NO. 304
M-1468; Solder, contains Ag, no Cd.
M.P 430°F; 14,000-20,000 TS.
For joining stainless steels to dissimilar metals.

ANCHOR ALLOY NO. 520.
M-1468, Solder for repairing, sealing and filling cracks and blow holes in cast iron, M P . 500°F.

ANCHOR ALLOY NO. 530
M-1468, Solder for repairing zinc die castings as radiator grills, door handles M P . 700°F.

ANCHOR GALVANIZED BAR.
M-1468; Galvanizing repair solder, M P 550°F
For repairing damaged or burned galvanized surface; no flux required

ANCHOR REDIMIX SOLDER PASTE
M-1468, Solder paste for all metals except aluminum; contains solder and flux
M P · 370°F

ANCHOR-TITE.
M-598, WC
For tools, dies; cemented WC.

ANCOLOY.
M-1526; 1.75 Ni, 0.5 Mo, 0.02 C, 1.5 Cu, bal Fe.
Sintered· 54,400 TS, 41,500 YS; 1-2 El.
Heat Treated 115,000 TS, 104,000 YS, 0.3 El.
For general machinery parts
Heat treatable Prealloyed powder, high strength

ANDARD.
M-358; 1.1 C, bal Fe.
For tools, drills, water hardening.

ANGEL.
M-485, C, alloy, bal Fe.
For high speed tools; high speed steel.

ANGSBURG.
71.9 Cu, 27.6 Zn.
For tubes, fittings; brass.

ANHYSTER A.
M-771; 35 Ni, bal Fe.
For magnets; high permeability.

ANHYSTER B.
M-771; 35 Ni, bal Fe.
For magnets; high permeability.

ANHYSTER C.
M-104; 45-50 Ni, bal Fe.
For magnets, relays, transformers; high permeability.

ANHYSTER D.
M-104; 45-50 Ni, bal Fe.
For magnets, relays, transformers; high permeability.

ANHYSTER M.
M-104; 77 Ni, 1.6 Cr, 5 Cu, bal Fe.
For relays, transformers, magnetic amplifiers; high permeability.

ANHYSTER MAU MOLYBDENE.
M-104, 77 Ni, 3.9 Mo, 4 Cu, bal Fe
For relays, magnetic amplifiers; high permeability.

ANIBAL.
M-104, C, 42 Ni, 2 Cr, bal Fe.
For clocks, balance wheels, corrosion resistant

"A" NICKEL, ELECTRON GRADE replaced by NICKEL 205.

ANKA "H."
M-472, 0.13-0.20 C, 16-23 Cr, 7-11 Ni, bal Fe.
For heat and corrosion resistant parts; stainless; heat and corrosion resistant

ANKA STEEL
M-472; 0.2 C, 0.6 Si, 0.6 Mn, 6-10 Ni, 16-20 Cr, bal Fe.
Annealed 85,000 TS, 35,000 YS, 60 El, 70 RA; 150 Brin
Cold drawn 125,000 TS, 95,000 YS; 25 El, 55 RA; 277 Brin
For chemical plant equipment, tanks, vessels, fittings; Type 301, stainless, austenitic.

ANODE METAL-1
U S , 94 Pb, 6 Sb
For batteries, plates; hard

ANODE METAL-2
U S , 98.8 Pb, 1 Ag, 0.2 As
For lead storage battery parts, hard

ANOXIN 1
M-501: 0.15 max C, 18 Cr, 8.5 Ni, bal Fe
Annealed 80,000 TS, 35,000 YS; 55 El, 75 RA, 150 Brin
Cold drawn· 180,000 TS, 150,000 YS, 10 El, 250 Brin
For chemical plant equipment, tanks, mixers, agitators, filters, Type 302, stainless, austenitic.

ANOXIN-1F.
M-912, 0.15 max C, 16-18 Cr, 6-8 Ni, bal Fe.
Annealed 110,000 TS, 40,000 YS, 60 El, B 85 Rock.
Hard. 185,000 TS; 140,000 YS, 8 El, C 41 Rock.
For aircraft structural members, trailer bodies, auto wheel covers, household utensils.
Type 301 stainless steel, austenitic.
Work hardens rapidly.

ANOXIN 2
M-501; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS; 60 El, 70 RA; 150 Brin
Cold drawn· 180,000 TS, 125,000 YS, 10 El; 330 Brin.
For welded structures, chemical plant equipment, tanks; Type 304, stainless, austenitic.

ANOXIN 2G.
M-501, 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed. 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
Cold drawn 95,000 TS, 60,000 YS; 40 El, 60 RA; 185 Brin.
For welded structures, chemical plant equipment, Type 321; stainless, austenitic.

ANOXIN-2P.
M-1421; 0.08 max C, 18-20 Cr, 8-12 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 150 Brin.
Cold Drawn: 100,000-180,000 TS; 50,000-125,000 YS; 180-330 Brin
For architectural trim, chemical and pharmaceutical plant equipment.
Type 304 stainless steel, austenitic Good formability and weldability.

ANOXIN 3.
M-501; 0.08 C, 18 Cr, 8 Ni, bal Fe
Annealed. 85,000 TS; 35,000 YS; 60 El, 70 RA; 150 Brin.
Cold drawn· 180,000 TS, 125,000 YS; 10 El; 330 Brin.
For welded structures, chemical plant equipment, tanks, Type 304, stainless, austenitic

ANOXIN 4
M-501, 0.05 C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed 85,000 TS, 35,000 YS, 50 El, 60 RA; 160 Brin.
For welded acid resistant chemical equipment, tanks, Type 316Ti, stainless, austenitic

ANOXIN 4G
M-501; 0.15 C, 18 Cr, 8.5 Ni, 2 Mo, bal Fe
Annealed 85,000 TS, 35,000 YS; 50 El; 65 RA, 160 Brin.
Cold drawn 150,000 TS; 135,000 YS, 6 El; 300 Brin
For acid resistant chemical plant equipment, tanks, Type 316, stainless, austenitic.

ANOXIN-4P.
M-1421, 0.08 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed. 80,000 TS, 30,000 YS, 60 El, B 78 Rock
Cold Rolled 150,000 TS, 135,000 YS, 6 El, C 32 Rock
For chemical and textile plant equipment, agitators, kettles, valve trim, acid tanks and vessels
Type 316 stainless steel, austenitic, acid resistant

ANOXIN 5
M-501; 0.07 max C, 17.5 Cr, 17.5 Ni, 2 Mo, 2 Cu, Ti = 4 × C, bal Fe
For valves, pumps, chemical plant equipment; stainless, austenitic

ANOZIN 5G
M-501, 0.10 C, 18 Cr, 9 Ni, 2 Mo, Cu, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin
For chemical plant equipment, tanks, Type 316, stainless, austenitic

ANOXIN 8
M-501, 0.10 C, 18 Cr, 9 Ni, 2 Mo, Ti = 7 × C, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, 65 RA; 160 Brin
For acid resistant chemical plant equipment, welded structures, Type 316Ti, stainless, austenitic

ANOXIN 20
M-501, 0.07 max C, 18 Cr, 9.5 Ni bal Fe.
Annealed· 85,000 TS; 35,000 YS; 60 El, 70 RA; 150 Brin
Cold drawn· 180,000 TS, 125,000 YS, 10 El, 330 Brin
For welded chemical plant equipment, tanks, mixers, Type 304, stainless, austenitic.

ANOXIN 22.
M-501; 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 56 El; 65 RA; 160 Brin.
Cold drawn: 100,000 TS; 65,000 YS; 40 El; 60 RA; 202 Brin
For welded chemical plant equipment, tanks, mixers; Type 347; stainless, austenitic.

ANOXIN 40
M-501; 0.07 max C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA, 160 Brin.
Cold drawn: 150,000 TS; 135,000 YS, 6 El; 300 Brin
For acid resistant chemical plant equipment, tanks Type 316; stainless, austenitic.

ANOXIN 44
M-501; 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo, Cb = 8 × C, bal Fe.
Annealed 85,000 TS; 35,000 YS, 50 El; 65 RA, 160 Brin.
For welded chemical plant equipment, tanks, mixers, Type 316 Cb; stainless, austenitic.

ANOXIN 66
M-501, 0.05 C, 18 Cr, 9 Ni, Cu, bal Fe.
Annealed. 85,000 TS, 35,000 YS, 60 El; 70 RA, 150 Brin
For chemical plant equipment, pump parts, mixers; stainless, austenitic

ANOXIN 70.
M-912, 0.08 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe
Annealed 80,000 TS, 30,000 YS, 60 El; B 78 Rock.
Cold Rolled· 150,000 TS; 135,000 YS, 6 El, C 32 Rock
For chemical and textile plant equipment, agitators, kettles, acid tanks and vessels.
Type 316 stainless steel, austenitic, acid resistant

ANOXIN 77.
M-912, 0.10 C, 17.5 Cr, 13 Ni, 2.5 Mo, 0.8 Cb, bal Fe
Annealed. 84,000 TS, 40,000 YS, 50 El, B 82 Rock
For welded structures and tanks, mixers, agitators, digesters Welding grade, stabilized
Type 318 stainless steel, austenitic.

ANOXIN 200.
M-912, 0.03 max C, 18-20 Cr, 8-12 Ni, bal Fe.
Annealed 85,000 TS, 30,000 YS, 60 El, B 80 Rock
Cold Drawn. 150,000 TS, 90,000 YS; 30 El, C 25 Rock.
For welded structures, chemical plant equipment, vessels, tanks, trim
Type 304L stainless steel, austenitic, welding grade.

ANOXIN G
M-501, 0.15 C, 18 Cr, 8.5 Ni, bal Fe.
Annealed 80,000 TS, 35,000 YS, 55 El, 75 RA; 150 Brin
Cold drawn 180,000 TS, 150,000 YS, 10 El, 250 Brin
For chemical plant equipment, tanks, mixers, filters; Type 302; stainless, austenitic.

ANOXIN ULTRA-C
M-501, 55 Ni, 16 Cr, 17 Mo, 6 Fe, 4 W
For pumps, valves, pharmaceutical and chemical plant equipment
Heat and corrosion resistant.

ANSCOL 45.
M-568; 0.16 C, 0.70 Mn, 0.015 min Cb, bal Fe.
Plate: 60,000 TS; 45,000 YS, 30 El.
For railroad and mine cars, bridges, booms, pressure vessels, derricks.
Good fabricability and weldability.

ANSCOL 50.
M-568; 0.18 C, 0.70 Mn, 0.04 Si, 0.015 min Cb, bal Fe.
Plate: 63,000 TS; 50,000 YS; 30 El, 140 Brin.
For railroad and mine cars, bridges, booms, pressure vessels, derricks.
Good fabricability and weldability.

ANTACIRON.
M-639; 14.5 Si, 84.5 Fe.
Cast: 15,000-18,000 TS; 15,000-18,000 YS; 0 El; 0 RA; 450-475 Brin.
For equipment to resist corrosion acids carrying abrasive solids; finished by grinding

ANTI-ACID METAL
M-346, 75 Cu, 10 Sn, 15 Pb
For chemical apparatus; acid resistant.

ANTICORODAL.
M-493, 0.6-1.4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, bal Al
Annealed: 21,000 TS; 8000 YS, 24 El.
For window frames, fan blades, gutters, boats; good forming and welding properties

ANTICORODAL-5 Si.
M-249, M-1605, M-1634, 4-6 Si, 0.4-1.0 Mg, 0.5-1.0 Mn, bal Al.
Sand cast 30,000 TS, 23,000 YS; 3.5 El, 75 Brin.
Chilled cast. 40,000 TS, 37,000 YS; 2 El; 95 Brin
For architecture, ship and auto construction, chemical plants, heat treatable

ANTICORODAL-11
M-541, M-624, 0.6-1.2 Si, 0.5-0.85 Mg, 0.25-0.70 Mn, 0.45 max Fe, bal Al
TA16 Temper 42,000-50,000 TS, 36,000-46,000 YS, 12-20 El, 90-120 Brin.
For decorative parts, auto trim, metal furniture, marine structures
Corrosion resistant

ANTICORODAL 15
M-249, 0.5-1.5 Si, 0.2-1.0 Mn, 0.5-1.0 Mg, 0.5-1.5 Cd, bal Al
Heat treated 45,000-61,000 TS, 38,000-58,000 YS, 12-20 El, 90-120 Brin
For aircraft structures, highly stressed parts, corrosion resistant, for forgings and extrusions

ANTICORODAL 15.
M-1220, M-541, 4.2-5.2 Si, 0.6 Mg, 0.7 Mn, 0.15 Ti, bal Al
Cast 35,000-45,500 TS, 28,500-38,400 YS, 1-2 El, 90-105 Brin
For instrument housings, oil pans, crankcases, high fluidity and corrosion resistant

ANTICORODAL 15
M-1176; 4.5 Si, 0.65 Mg, 0.7 Mn, bal Al
Heat treated 36,000-46,000 TS, 26,000-36,000 YS, 2-1 El, 90-105 Brin
For light alloy parts, corrosion resistant.

ANTICORODAL-63
M-624, M-541, 0.2-0.6 Si, 0.45-0.85 Mg, 0.35 max Fe, 0.1 max Ti, bal Al.
Annealed 11,400-17,000 TS; 5700 10,000 YS; 25-40 El; 25-35 Brin
TA1[illegible]20 Temper: 37,000-42,700 TS, 32,700-40,000 YS; 2-6 El, 80 90 Brin
For marine structures and hardware Corrosion resistant.

ANTICORODAL—CASTING.
M-249; 2.25 Si, 0.45 Fe, 0.70 Mn, 0.70 Mg, 0.15 Ti, bal Al.
Chill cast: 20,000-28,000 TS; 16,000-22,000 YS; 1.5-5.0 El
Heat treated: 28,000-40,000 TS; 22,000-30,000 YS; 1.0-5.0 El.
For window frames, chemical industry, architecture; high corrosion resistance

ANTICORODAL G.
M-1176; 2 Si, 0.65 Mg, 0.7 Mn, bal Al.
Heat treated: 36,000-42,000 TS; 29,000-39,000 YS; 3-1 El, 90-105 Brin
For light alloy parts

ANTICORODAL G.
M-1220, M-541; 1.8-2.3 Si, 0.7 Mg, 0.7 Mn, bal Al
Cast: 35,600-42,700 TS; 31,300-39,900 YS; 1-3 El; 90-105 Brin.
For light alloy castings; general purpose.

ANTICORODAL SPECIAL.
M-249; 2 Mg, 1.5 Mn, bal Al.
Soft. 36,000 TS, 21,000 YS, 20 El
For punchings; same as Peraluman.

ANTICORODAL—WROUGHT
M-249; M-624; 0.5-1.5 Si, 0.2-1.0 Mn, 0.5-1 Mg, 0.3 Fe, bal Al
Soft. 17,000 TS, 9000 YS, 30 El; 35 Brin.
Hard 55,000 TS, 45,000 YS, 15 El, 105 Brin
For architecture, window frames, chemical plants; heat treatable

ANTIFRICTION METAL-A
M-561, 8 Cu, 83 Sn, 9 Sb
For special Admiralty bearings for heavy loads; Babbitt

ANTIFRICTION METAL-B
M-561, 1.4 Cu, 69 Sn, 29.6 Sb.
For special Admiralty bearings for under water, Babbitt

ANTIKLOR
Russia, 0.5 0.7 C, 13-16 Si, bal Fe
For cast pumps and conduits; acid resistant, cast

ANTIKORRO
M-1322, 0.9 C, 18 Cr, 1.1 Mo, 1 V, bal Fe
Annealed 107,000 TS, 62,000 YS, 18 El, 35 RA, 220 Brin
Heat treated 280,000 TS, 270,000 YS, 3 El, 15 RA, 555 Brin
For ball bearings, races, liners, sleeves, stainless, wear resistant

ANTIKORRO AK1B
M-1322; 0.1 max C, 17.5, Ti − 7 × C, bal Fe
Annealed 80,000 TS, 50,000 YS, 25 El, 50 RA, 150 Brin
For welded structures in chemical plants and oil refineries, corrosion and heat resistant

ANTIKORRO AK1W
M-1322, 0.12 max C, 13 Cr, 0.4 Si, bal Fe
Annealed 75,000 TS, 40,000 YS, 35 El, 70 RA, 155 Brin
Cold drawn 100,000 TS; 85,000 YS, 17 El, 60 RA; 205 Brin
For turbine blades, chemical plant equipment, cutlery, Type 410, corrosion resistant

ANTIKORRO AK2.
M-1322, 0.22 C, 17 Cr, 1.5 Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS, 20 El, 55 RA, 260 Brin
For oil refinery equipment; Type 431, corrosion resistant

ANTIKORRO AK2S.
M-1322; 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For turbine blades, cutlery, gauges, instruments; Type 420; corrosion resistant.

ANTIKORRO AK4.
M-1322; 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El; 55 RA; 200 Brin.
For cutlery, valves, surgical and dental instruments; Type 420; corrosion resistant.

ANTIKORRO AK5.
M-1322; 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El, 55 RA; 200 Brin.
For cutlery, valves, surgical instruments; Type 420; stainless.

ANTIKORRO AKC.
M-1322; 0.15 C, 24 Cr, 19 Ni, bal Fe.
Annealed: 100,000 TS, 45,000 YS; 50 El; 65 RA; 185 Brin.
For furnace parts, valves, pumps, turbine parts; Type 310, stainless, austenitic

ANTIKORRO AKC2
M-1322; 0 15 C, 19.5 Cr, 9.5 Ni, bal Fe
Annealed: 80,000 TS, 35,000 YS, 55 El; 75 RA, 150 Brin
For chemical plant equipment, tanks, vessels, Type 302; stainless, austenitic.

ANTIKORRO AKH
M-1322, 0 85 C, Cr, V, bal Fe
For cutting tools, bearings, dies, liners, water or oil hardened.

ANTIKORRO AKL
M-1322, 0 1 max C, 12 5 Cr, 12 Ni, bal Fe.
For valves, oil refinery equipment; corrosion resistant

ANTIKORRO AKSZ.
M-1322, 0 05 C, 18 Cr, 10 Ni, Cu, bal Fe
Annealed: 85,000 TS, 35,000 YS; 60 El, 70 RA, 150 Brin
For chemical plant equipment; stainless, austenitic.

ANTIKORRO AKV.
M-1322, 0 15 max C, 18 Cr, 8 5 Ni, bal Fe
Annealed 80,000 TS; 35,000 YS, 55 El, 75 RA; 160 Brin
For chemical plant equipment, tanks, mixers; Type 302, stainless, austenitic.

ANTIKORRO AKV EXTRA
M-1322, 0 12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed· 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin
Cold drawn· 150,000 TS; 135,000 YS, 6 El; 300 Brin.
For welded chemical plant equipment; Type 316 Ti; stainless, austenitic.

ANTIKORRO AKVM.
M-1322; 0 15 max C, 18 Cr, 8 5 Ni, bal Fe.
Annealed· 80,000 TS; 35,000 YS; 55 El, 75 RA; 160 Brin.
For chemical plant equipment, tanks; Type 302; stainless, austenitic.

ANTIKORRO AKVS.
M-1322; 0 12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe
Annealed: 90,000 TS; 45,000 YS; 56 El; 65 RA, 160 Brin.
Cold drawn: 100,000 TS; 65,000 YS; 45 El; 60 RA; 205 Brin.
For welded chemical plant equipment, tanks, fermenters; Type 347; stainless, austenitic.

ANTIKORRO AKX10.
M-1322; 0.12 max C, 18 Cr, 1 Al, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refinery and chemical plant equipment; corrosion resistant.

ANTIKORRO AKX12.
M-1322, 0.12 max C, 1.5 Al, 24 Cr, bal Fe.
Annealed: 90,000 TS; 50,000 YS, 30 El; 55 RA; 180 Brin.
For furnace parts, heat treating boxes, corrosion and heat resistant.

ANTIKORRO AKX SPEZIAL
M-1322; 0 2 C, 25 Cr, 4 Ni, bal Fe
Cast· 90,000 TS; 65,000 YS; 2 El; 212 Brin.
For furnace parts, grids, conveyors, heat treating boxes, corrosion and heat resistant

ANTIMONIAL ADMIRALTY.
M-33; 71 Cu, 1 Sn, 0 04 Sb, 27.96 Zn.
Annealed: 54,000 TS, 23,000 YS, 60 El
For condensers, tubes; Admiralty Brass.

ANTIMONIAL LEAD
M-88, 0-25 Sb, 75-100 Pb
For storage battery plates, fuses, bullets, type metal, pipes

ANTINIT 1KB2
M-27; 0 1 max C, 18 Cr, 8 5 Ni, bal Fe.
Annealed· 80,000 TS, 35,000 YS. 55 El, 75 RA, 150 Brin
For chemical plant equipment, tanks, Type 302; stainless, austenitic

ANTINIT 1KB4
M-27, 0 1 max C, 18 Cr, 9 5 Ni, 2 Mo, bal Fe
Annealed· 85,000 TS, 35,000 YS; 50 El, 65 RA; 160 Brin.
Cold drawn· 150,000 TS; 135,000 YS, 6 El; 300 Brin
For acid resistant chemical plant equipment, tanks, mixers, pumps, Type 316, stainless, austenitic.

ANTINIT AS2
M 27, 0 12 C, 17-19 Cr, 10-13 Ni, bal Fe
Annealed· 90,000 TS, 40,000 YS, 50 El; B 85 Rock
Cold Rolled: 180,000 TS; 150,000 YS; 10 El; C 42 Rock
For handling chemicals, vessels, tanks, valve trim, oil refinery and chemical plant equipment.
Type 302 stainless, austenitic, nonmagnetic

ANTINIT-AS2F
M-27; 0 15 C, 16-18 Cr, 6-8 Ni, bal Fe.
Annealed· 110,000 TS, 40,000 YS, 60 El, B 85 Rock.
Half Hard 150,000 TS; 110,000 YS, 15 El, C 32 Rock
For aircraft structures, railroad cars, trailer bodies, auto wheel covers, wire springs
Type 301 stainless steel, austenitic, nonmagnetic

ANTINIT AS2G.
M-27; 0.15 C, 18 Cr, 8.5 Ni, bal Fe
Annealed 80,000 TS, 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302, stainless, austenitic

ANTINIT AS2(H).
M-27; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS, 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302, stainless, austenitic.

ANTINIT AS2H.
M-27; 0.20 C, 19.5 Cr, 7.5 Ni, bal Fe.
Annealed: 92,500 TS; 49,800 YS; 180 Brin.
For rotating knives, from pulping engines, stainless, austenitic.

ANTINIT AS2K.
M-27; 0.20 C, 1.25 Mn, 18 Cr, 12 Ni, bal Fe.
Annealed: 78,300 TS; 35,600 YS; 160 Brin.
For bone surgery nails and wire; corrosion resistant.

ANTINIT AS 2 W.
M-27; 0.8 max C, 18 Cr, 10 Ni, bal Fe.
Water quenched: 80,000-102,000 TS; 32,000 YS; 55 El; 150 Brin.
For household utensils, trim; weldable, stainless, austenitic.

ANTINIT AS2Z.
M-27; 0.12 max C, 18 Cr, 8.5 Ni, 0.15 S, bal Fe.
Annealed: 78,300 TS; 35,600 YS; 160 Brin.
For bolts, screws, nuts, shafts, stainless, free-cutting.

ANTINIT AS3W.
M-27, 0.06 max C, 18 Cr, 8.5 Ni, 1.6 Mo, bal Fe.
Annealed: 78,300 TS; 31,300 YS; 160 Brin
For fittings for chemical plant equipment, stainless, austenitic.

ANTINIT AS4K.
M-27; 0.2 C, 18 Cr, 12 Ni, 2.1 Mo, bal Fe
Annealed: 78,300 TS, 35,600 YS; 160 Brin.
For parts for bone surgery; stainless, austenitic

ANTINIT AS4M.
M-27; 0.06 C, 17.5 Cr, 12.5 Ni, 2.8 Mo, bal Fe
Annealed: 78,300 TS, 31,300 YS, 160 Brin
For chemical plant equipment; stainless, austenitic

ANTINIT AS4W.
M-27, 0.07 max C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe
Annealed: 85,000 TS, 35,000 YS; 50 El, 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316, stainless, austenitic.

ANTINIT AS5W.
M-27; 0.05 max C, 17 Cr, 13.5 Ni, 4.7 Mo, bal Fe
Annealed: 92,500 TS; 32,800 YS, 180 Brin.
For chemical plant equipment; stainless, austenitic

ANTINIT ASA.
M-27, 0.1 C, 12 Cr, 12 Ni, bal Fe.
Water quenched, 78,000-100,000 TS; 31,000 YS; 56 El; 68 RA; 150 Brin
For tableware, cutlery, austenitic, stainless

ANTINIT EAS2
M-27; 0.03 C, 18-20 Cr, 9-12 Ni, bal Fe
Annealed: 85,000 TS, 35,000 YS, 60 El; 150 Brin
Cold Drawn 180,000 TS; 125,000 YS, 10 El, C 35 Rock
For welded equipment, tanks, vessels, architectural molding, processing equipment in food and chemical plants.
Type 304L stainless, austenitic, nonmagnetic.

ANTINIT EAS4
M-27; 0.03 C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed: 85,000 TS, 35,000 YS, 50 El; 165 Brin.
Cold Rolled: 150,000 TS; 135,000 YS, 6 El, 300 Brin.
For chemical plant equipment, evaporators, agitators, kettles, tanks,
Type 316L stainless, austenitic, nonmagnetic.

ANTINIT EAS4M.
M-27; 0.03 C, 16.5-18.5 Cr, 12.5-15 Ni, 2.5-3 Mo, bal Fe.
Annealed: 80-000-90,000 TS; 30,000-40,000 YS; 40-60 El; 70-80 RA; 135-185 Brin.
For chemical plant equipment, tanks, evaporators, digesters, and vessels.
Type 316L stainless steel, austenitic, nonmagnetic.

ANTINIT KW5.
M-27; 0.10 C, 14 Cr, bal Fe
Annealed: 64,000-80,000 TS; 42,700-50,000 YS; 25 El; 50 RA; 150-160 Brin.
For chemical plant equipment, shafts, fasteners; corrosion resistant; Type 430.

ANTINIT KW8.
M-27; 0.08 C, 12-14 Cr, bal Fe.
Annealed: 70,000 TS, 35,000 YS; 30 El; B 80 Rock.
Oil hardened: 110,000-190,000 TS, 85,000-145,000 YS; 15-23 El, 55-65 RA, 225-390 Brin.
For flat springs, knives, table flatware.
AISI Type 410 stainless, magnetic.

ANTINIT KW-10
M-27, 0.1 C, 14 Cr, 0.4 Ni, bal Fe.
Heat treated 85,400 TS; 64,000 YS; 200 Brin
For turbine blades, valve seats, pumps, shafts, piston rods, connecting rods; rust and abrasion resisting.

ANTINIT KW10Al
M-27, 0.07 max C, 14 Cr, 0.2 Al, bal Fe
Annealed: 64,000 TS, 42,700 YS; 150 Brin.
For turbine blades; corrosion and creep resistant

ANTINIT KW10M.
M-27; 0.10 C, 14 Cr, 1.2 Mo, bal Fe.
Heat treated: 99,600 TS; 71,200 YS; 230 Brin.
For steam turbine blades, used up to 930°F.

ANTINIT KW10 SPEZIAL
M-27; 0.20 C, 13 Cr, 1.15 Mo, bal Fe
Annealed. 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For turbine blades, cutlery, valves, pumps, knives; corrosion resistant, Type 420 Mo

ANTINIT KW10Z
M-27, 0.15 C, 12-14 Cr, 0.6 max Mo, 0.15 max S, bal Fe.
Annealed: 80,000 TS, 45,000 YS, 30 El, 165 Brin
Cold Drawn: 100,000 TS, 85,000 YS; 13 El, 205 Brin.
Heat Treated 160,000 TS, 130,000 YS, 15 El, 300 Brin
For screw machine products, fasteners, pump shafts, gears, valve seats.
Type 416 Stainless, magnetic.

ANTINIT KW15
M-27, 0.15 C, 14 Cr, bal Fe.
Heat treated: 99,600 TS, 71,200 YS; 225 Brin
For steam turbine blades, corrosion resistant

ANTINIT KW15M
M-27, 0.15 C, 13.5 Cr, 1.1 Mo, bal Fe
Heat treated: 106,700 TS; 78,300 YS; 245 Brin.
For steam turbine blades, used up to 1020°F

ANTINIT KW15Z.
M-27, 0.13 C, 13.5 Cr, 0.2 S, bal Fe.
Heat treated: 99,600 TS, 71,200 YS; 230 Brin.
For bolts, screws, nuts, shafts; stainless, free-cutting.

ANTINIT KW20.
M-27; 0.2 C, 13 Cr, 0.4 Si, bal Fe.
Annealed: 95,000 TS, 50,000 YS; 25 El; 55 RA; 195 Brin.
Heat treated: 107,000 TS; 78,000 YS; 245 Brin.
For turbine blades, surgical and dental instruments; corrosion resistant; Type 420.

ANTINIT KW20M.
M-27; 0.20 C, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.

Heat treated: 106,700 TS; 78,300 YS; 245 Brin.
For pumps, valves, turbine blades; corrosion resistant, used up to 1100°F.

ANTINIT KW30.
M-27; 0.30 C, 13.5 Cr, bal Fe.
Heat treated: 106,700 TS; 78,300 YS; 245 Brin.
For knife blades, scissors; corrosion resistant.

ANTINIT KW35M.
M-27; 0.35 C, 16.5 Cr, 1.15 Mo, bal Fe.
Heat treated: 113,800 TS; 85,400 YS; 260 Brin.
For heat treating boxes, furnace parts, corrosion resistant.

ANTINIT KW 40.
M-27; 0.4 C, 14 Cr, bal Fe.
For cutlery, surgical instruments; corrosion resistant, hardenable.

ANTINIT KW40M.
M-27, 0.40 C, 14.5 Cr, 0.6 Mo, bal Fe.
For surgical instruments, valves, corrosion resistant

ANTINIT KW50.
M-27; 0.50 C, 14.5 Cr, bal Fe
For surgical instruments, cutlery; corrosion resistant.

ANTINIT KW50M.
M-27, 0.54 C, 14.5 Cr, 0.55 Mo, bal Fe
For surgical instruments, cutlery, corrosion resistant.

ANTINIT KW 80
M-27, 0.8 C, 16 Cr, 1 Mo, 0.1 V, bal Fe.
For cutlery, ball bearings, surgical instruments, hardenable, stainless.

ANTINIT KW100.
M-27, 1.06 C, 18 Cr, 1.15 Mo, 1 V, 1.5 Co, bal Fe
Annealed: 110,000 TS, 65,000 YS, 18 El; 35 RA; 220 Brin
For bearings, valves, cutlery, surgical instruments, corrosion and wear resistant

ANTINIT KWA
M-27, 0.08 max C, 18 Cr, bal Fe
Annealed 75,000 TS, 43,000 YS, 30 El, 70 RA, 223 Brin
For tableware, auto trim, stainless, ferritic

ANTINIT KWB
M-27, 0.2 C, 18 Cr, 2 Ni, bal Fe.
Heat treated 142,000-170,000 TS; 92,000 YS, 17 El, 40 RA, 260-320 Brin.
For marine hardware, resists sea water corrosion

ANTINIT KWG.
M-27; 0.25 C, 14 Cr, 0.5 Ni, bal Fe
Annealed: 100,000-120,000 TS, 64,000 YS, 20 El; 190 Brin
For armature and turbine parts, resists oxidation and erosion

ANTINIT KWMZ
M-27, 0.18 C, 17.5 Cr, 1.8 Mo, 0.2 S, bal Fe
Annealed: 85,400 TS, 56,900 YS, 190 Brin
For bolts, nuts, screws, shafts, stainless, free-cutting.

ANTINIT KWZ.
M-27, 0.15 C, 17 Cr, 0.2 S, bal Fe
Annealed: 100,000-122,000 TS, 62,000 YS, 22 El, 60 RA; 235 Brin.
For screw machine products, free-cutting, stainless.

ANTINIT KWZA
M-27; 0.15 C, 16.5 Cr, 0.2 S, bal Fe.
Annealed 99,600 TS; 64,000 YS, 200 Brin.
For screw machine products, bolts, screws; corrosion resistant, free-cutting.

ANTINIT NG.
M-27; 0.15 C, 8.5 Ni, bal Fe.
Heat treated: 121,000 TS; 99,600 YS; 20 El; 55 RA; 280 Brin.
For rifle barrels; resists rusting.

ANTINIT RAM.
M-27; 0.10 max C, 27 Cr, 4.8 Ni, 1.5 Mo, bal Fe.
Annealed: 99,600 TS; 64,000 YS, 230 Brin.
For acetic acid plant equipment; resists acetic acid.

ANTINIT RS30.
M-27; 1.2 C, 29 Cr, bal Fe.
For crushers, ball mills, grates, baffles; heat and wear resistant.

ANTINIT RS 30 M.
M-27; 1 C, 30 Cr, 2 Mo, bal Fe.
Annealed: 64,000-85,000 TS.
For corrosion resistant castings; for bleaching equipment

ANTINIT SAS 2.
M-27, 0.1 max C, 18 Cr, 9 Ni, 1 Ta, Nb.
Water quenched: 85,000-106,000 TS; 35,000 YS; 50 El, 70 RA, 192 Brin
For stainless parts, sugar and food processing equipment; corrosion resistant, stabilized

ANTINIT SAS2 EXTRA
M-27, 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe.
Annealed 90,000 TS, 45,000 YS; 56 El; 65 RA; 160 Brin.
For welded structures, chemical plant equipment, tanks, Type 347; stainless, austenitic.

ANTINIT SAS4.
M-27, 0.1 max C, 18 Cr, 12 Ni, 1 TaNb, 2.2 Mo, bal Fe
Water quenched 85,000-106,000 TS, 40,000 YS, 46 El, 68 RA
For the paper and textile industry, stainless, austenitic

ANTINIT SAS4 EXTRA
M-27, 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo, Cb = 8 × C, bal Fe
Annealed 95,000 TS, 50,000 YS; 52 El, 60 RA; 180 Brin
For welded acid resistant chemical plant equipment; Type 316Cb, stainless, austenitic

ANTINIT SAS4M
M-27, 0.10 C, 16.5-18.5 Cr, 12-14 Ni, 2.5-3.0 Mo, Cb = 8 × C, bal Fe.
Annealed 85,000 TS; 40,000 YS, 50 El, B 82 Rock.
For welded structures, tanks, mixers, digesters, evaporators.
Welding grade, stabilized
Type 318 stainless, austenitic

ANTINIT SAS5.
M-27, 0.08 C, 17 Cr, 10 Ni, 2 Mo, bal Fe.
Annealed: 80,000 TS, 30,000 YS, 60 El; B 78 Rock.
For chemical plant equipment, acid containers, vessels, valve trim, digesters
Stainless steel Type 18-10 Mo, acid resistant

ANTINIT SAS5G
M-27, 0.07 max C, 17 Cr, 13 Ni, 4.7 Mo, bal Fe.
Annealed 95,000 TS, 50,000 YS, 50 El; 55 RA; 190 Brin.
For acid resistant chemical plant equipment, mixers; Type 317; stainless, austenitic.

ANTINIT SAS8
M-27, 0.1 max C, 17 Cr, 18 Ni, 2 Mo, 1 TaNb, 2 Cu, bal Fe.
Water quenched 85,-000-106,000 TS, 37,000 YS; 46 El; 68 RA.
For parts to resist reducing acids; austenitic, stainless.

ANTINIT SAS10.
M-27, 0.07 C, 17.5 Cr, 22 Ni, 3.5 Mo, 0.7 Cb, 1.8 Cu, bal Fe
Annealed: 78,300 TS, 39,900 YS; 160 Brin
For chemical plant equipment; corrosion resistant.

ANTINIT SAST2.
M-27; 0.08 max C, 18 Cr, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded structures, chemical plant equipment, tanks; Type 321; austenitic, stainless.

ANTINIT SAST4
M-27; 0.08 max C, 18 Cr, 10.5 Ni, 2 Mo, Ti = 4 × C, bal Fe.
Annealed. 78,000-95,000 TS; 38,000-50,000 YS; 52 El; 60 RA; 160-180 Brin.
For welded chemical plant equipment, tanks, filters, Type 316 Ti; stainless, austenitic.

ANTINIT SAST4M
M-27; 0.10 C, 16.5-18.5 Cr, 12-14.5 Ni, 2.5-3.0 Mo, Ti = 5 × C, bal Fe
Annealed: 80,000-90,000 TS, 30,000-40,000 YS, 40-60 El; 135-185 Brin.
For welded structures and equipment, tanks, digesters, evaporators
Type 316 Ti stainless, welding grade, austenitic, nonmagnetic

ANTINIT--SIL18
M-27, 0.15 C, 7.5-10.0 Mn, 17-19 Cr, 4-6 Ni, bal Fe
Annealed 100,000 TS, 50,000 YS, 60 El; B 90 Rock
For sinks, cooking utensils, dairy and hospital equipment, chemical handling equipment, springs, tubular furniture.
Type 202 stainless steel, austenitic, nonmagnetic

ANTINIT SKWA
M-27; 0.1 max C, 17.5 Cr, Ti = 7 × C, bal Fe
Annealed 71,000-80,000 TS; 42,700-50,000 YS, 25 El, 50 RA, 160-180 Brin.
For furnace parts, welded heat treating boxes; corrosion resistant.

ANTINIT SKWL
M-27; 0.1 max C, 17 Cr, 1.8 Mo, Ti = 7 × C, bal Fe.
Annealed: 71,200-80,000 TS, 42,700-50,000 YS; 25 El, 50 RA; 160-180 Brin
For chemical plant equipment, heat treating boxes, corrosion resistant

ANTINIT SKWN
M-27, 0.06 C, 17 Cr, 8 Ni, Cb, bal Fe.
Annealed 85,000 TS, 35,000 YP, 50 El, B 82 Rock
For welded structures, tanks, vessels, chemical plant equipment
Type 17-8 Cb stainless steel, stabilized, welding grade.

ANTIOX-1.
M-1117; 0.15 min C, 12-14 Cr, bal Fe
Annealed 95,000 TS; 45,000 YS; 25 El; 196 Brin
Oil Hardened: 250,000 TS, 215,000 YS; 8 El; 512 Brin
For cutlery, surgical instruments, gears, shafts, gauges, needle valves.
Type 420 stainless steel, hardenable

ANTIOX-2.
M-1117; 0.15 min C, 12-14 Cr; bal Fe
Annealed 95,000 TS, 45,000 YS, 25 El, 196 Brin
Heat Treated. 250,000 TS; 215,000 YS, 8 El, 512 Brin.
For cutlery, surgical instruments, gears, needle valves, gauges, shafts.
Type 420 stainless steel, heat treatable.

ANTIOX-3.
M-1117; 0.15 max C, 11.5-13.5 Cr, bal Fe.
Annealed: 75,000 TS, 40,000 YS; 30 El; B 82 Rock.
Cold Drawn: 95,000 TS; 80,000 YS; 15 El; B 92 Rock.
For flat springs, knives, tableware.
Type 410 stainless steel, hardenable.

ANTITHERM F
M-27; 0.08 max C, 18.5 Cr, 10.5 Ni, 0.5 Ti, bal Fe
Annealed. 85,400 TS, 38,400 YS; 165 Brin
For heat and corrosion resistant parts; used up to 1470°F.

ANTITHERM FA
M-27; 0.20 C, 1.1 Si, 25 Cr, 4.5 Ni, N, bal Fe.
Annealed: 92,500 TS; 57,000 YS; 200 Brin.
For heat resistant parts, furnace equipment; used up to 2010°F.

ANTITHERM FB7
M-27, 0.12 C, 2 Si, 3 Cr, bal Fe.
Annealed 71,200 TS, 50,000 YS, 165 Brin.
For heat resistant parts, used up to 1300°F.

ANTITHERM FB8
M-27, 0.08 max C, 0.5 Al, 6.5 Cr, bal Fe
Annealed: 70,000 TS, 50,000 YS, 28 El, 65 RA; 160 Brin.
For oil refinery equipment, heat and creep resistant, used up to 1470°F

ANTITHERM FB8G
M-27; 0.3 C, 6 Cr, 2.2 Si, bal Fe.
Annealed 80,000 TS; 40,000 YS, 20 El, 55 RA, 200 Brin
For oil refinery equipment, heat and creep resistant.

ANTITHERM FB9
M-27, 0.12 C, 1.2 Si, 1.0 Al, 13 Cr, bal Fe
Annealed 71,200 TS, 50,000 YS, 35 El, 70 RA, 190 Brin
For oil refinery equipment, heat and creep resistant, used up to 1740°F

ANTITHERM FB10
M-27, 0.1 C, 1 Si, 18 Cr, 1 Al, bal Fe
Annealed 100,000 TS, 50,000 YS, 200 Brin
For parts to resist SO_2 and H_2S atmosphere, heat resistant

ANTITHERM FB10G
M-27; 0.5 C, 1.5 Si, 17 Cr, bal Fe
For furnace parts, heat treating boxes, corrosion and heat resistant

ANTITHERM FB12
M-27, 0.12 max C, 1.5 Al, 24 Cr, bal Fe
Annealed 85,000 TS, 50,000 YS, 30 El, 55 RA, 180 Brin
For furnace parts, grates, baffles, heat resistant

ANTITHERM FB30G
M-27, 1 C, 28 Cr, bal Fe
For heat resistant castings, heat resistant to 2200°F

ANTITHERM FB 30 S
M-27, 0.20 C, 25 Cr, 3 Ni, 1 Si, bal Fe.
Water quenched 92,000-113,000 TS, 56,000 YS
For SO_2 and H_2S resistance to 2200°F, heat resistant.

ANTITHERM FB30SG
M-27; 0.4 C, 27 Cr, 4 Ni, bal Fe
Cast. 90,000 TS, 65,000 YS, 2 El, 212 Brin
For cylinders, liners, valve seats and bodies, furnace parts; heat and corrosion resistant

ANTITHERM FB95
M-27, 0.12 max C, 2.2 Si, 13 Cr, bal Fe
Annealed: 78,300 TS, 49,800 YS, 200 Brin
For heat resistant parts, used up to 1740°F.

ANTITHERM FB105
M-27, 0.12 C, 2 Si, 18 Cr, bal Fe
Annealed 80,000 TS; 50,000 YS; 25 El, 50 RA, 150 Brin.

For kitchen sinks, valves, pumps, furnace parts;
Type 430; corrosion resistant

ANTITHERM FBS90.
M-27, 0.12 max C, 2.3 Si, 6 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant.

ANTITHERM FBS95.
M-27, 0.12 max C, 2.2 Si, 13 Cr, bal Fe
Annealed: 75,000 TS, 40,000 YS; 35 El; 70 RA, 155 Brin.
For oil refinery and chemical plant equipment; corrosion and heat resistant

ANTITHERM-FBS105.
M-27, 0.06 C, 17 Cr, 10 Ni, bal Fe.
Annealed: 80,000 TS; 30,000 YP; 60 El; B 78 Rock
Cold Rolled 150,000 TS, 135,000 YP, 6 El, C 32 Rock
For chemical and textile plant equipment, digesters, tanks, filters, vessels
Type 17-10 stainless steel, austenitic

ANTITHERM FF
M-27, 0.15 C, 20 Cr, 12 Ni, bal Fe
Water quenched: 85,000-113,000 TS, 35,000 YS; 165 Brin
For heat resistant parts, heat resistant to 1920°F

ANTITHERM FFB
M-27, 0.2 C, 24 Cr, 20 Ni, 2 Si, 0.1 Ti, bal Fe
Water quenched 85,000-113,000 TS, 38,000 YS, 165 Brin
For heat resistant parts, heat resistant to 2200°F

ANTITHERM FFB 400
M-27, 0.12 max C, 2 Si, 21 Cr, 34 Ni, bal Fe
Annealed 92,500 TS, 38,500 YS, 165 Brin
For heat resistant parts, used up to 2200°F.

ANTITHERM FFBG
M-27; 0.4 C 2 Si, 26 Cr, 14 Ni, bal Fe
Cast 75,000 TS, 47,000 YS, 17 El, 25 RA, 200 Brin
For furnace parts, heat treating boxes, pump bodies, corrosion and heat resistant

ANTITHERM FFG
M-27, 0.4 C, 2 Si, 22 Cr, 9.5 Ni, bal Fe
Cast 85,000 TS, 45,000 YS, 35 El, 165 Brin.
For heat treating boxes, baskets, chains, burner tips, furnaces, Type HF, corrosion and heat resistant

ANTOXYD
M-96, 0.20 C, 21 Cr, 38.5 Ni, bal Fe
For heat and corrosion resistant parts, corrosion and heat resistant

ANVIL BRASS
U.S., 62.5 Cu, 37.5 Zn
For hardware, tubes, yellow brass

ANVIL HEADING DIE
M-387, 0.6 C, 0.8 Cr, 0.2 Mo, bal Fe
For tools, heading dies, oil hardened

ANVILOY 1100
M-265, 90 W, 4 Ni, 2 Fe, 4 Mo
Sintered, R.T. 125,000 TS, 95,000 YS, 5 El
1500°F 63,300 TS, 7 El
2000°F 25,000 TS; 3.6 El
Density 17.25; R.T. hardness: 30 Rc
For die casting dies; machinable

ANVILOY 1150
M-265, 90 W, 4 Ni, 2 Fe, 4 Mo
Sintered, R.T. 140,000 TS, 125,000 YS, 3 El
1500°F: 75,500 TS; 6.4 El.
2000°F 28,500 TS, 3.5 El.
Density: 17.25, R.T. hardness. 34 Rc
For die casting dies; machinable.

ANVILOY 1200.
M-265; 90 W, 4 Ni, 2 Fe, 4 Mo.
Sintered, R.T.: 150,000 TS; 140,000 YS; 2 El.
1500°F: 96,600 TS; 3 El.
2000°F. 34,600 TS; 3.5 El.
Density: 17.25, R.T. Hardness 36 Rc.
For die casting dies; machinable

A020 CHISEL and PUNCH.
M-365; 0.50 C, 1.5 Cr, 2.25 W, 0.25 V, bal Fe.
For tools, chisels, punches; hot work steel.

"AO" QUALITY.
M-179, Cu, bal Zn
Extruded. 55,000 TS, 35 El, 40 RA, 100 Brin
Drawn 65,000 TS, 30 El, 30 RA, 110 Brin.
For cold worked products.

A P 33
M-620, 4.5 Cu, 0.5 Mg, 0.4 Ti, bal Al
36,000-43,000 TS, 29,000-36,000 YS; 2-1 El
For light alloy parts, age-hardenable

AP33
French, 4 Cu, 0.25 Ti, bal Al
Heat treated 45,000-52,000 TS, 6-10 El
For light metal parts, gear cases, housings, heat treatable.

AP33M
French, 4-6 Cu, 0.5 Mg, 0.4 Ti, bal Al.
Heat treated 47,000 TS
For light metal parts, gear cases, heat treatable

APACHE
M-1, 0.70 C, 2.0 Mn, 0.3 Si, 1.0 Cr, 1.35 Mo, bal Fe
Heat treated 293,000 TS, 265,000 YS, 1 El; C 55 Rock
For dies and punches, blanking and forming dies, gages, shear blades, bending tools, stripper plates, master hubs, air hardening
Type A6 tool steel, wear resistant

APEX
M-688, 0.9 C, bal Fe
For tools, drills, punches, drill rod, water hardened.

APEX AS-1
M-130, 95 min Al
For deoxidizing steel

APEX ALLOY NO 2
M-130, 3.9-4.3 Al, 2.5-2.9 Cu, 0.02-0.05 Mg, 0.075 max Fe, 0.004 max Pb, 0.003 max Cd, bal Zn
Die cast 52,000 TS, 93,000 Com S, 7 El, 100 Brin, 46,000 SS
General purpose die casting, motor frames, household hardware, novelties

APEX AS-2
M-130, 92 min Al
For deoxidizing steel

APEX ALLOY NO 3.
M-130, 3.9-4.3 Al, 0.10 Cu, 0.025-0.05 Mg, 0.075 max Fe, 0.004 max Pb, 0.003 max Sn, bal Zn
Die cast. 41,000 TS; 60,000 Com S, 10 El; 76 Brin; 31,000 SS
For housings, cases, general die castings, motor frames, household hardware
ASTM B240-64, AG40A.

APEX AS-3
M-130, 90 min Al
For deoxidizing steel

APEX AS-4
M-130, 85 min Al.
For deoxidizing steel.

APEX ALLOY NO. 5.
M-130; 3.9-4.3 Al, 0.75-1.25 Cu, 0.03-0.06 Mg, 0.075 max Fe, 0.004 max Pb, 0.003 max Cd, bal Zn.
Die cast: 47,000 TS; 87,000 Com S; 7 El; 88 Brin; 38,000 SS
For housings, cases, general die castings, motor frames, radio parts, hardware.
ASTM· B240-64, AC41

APEX NO 6
M-130; 4.1 Al, 1 Cu, bal Zn.
DC-F temper: 43,500 TS; 7.3 El; 90 Brin
For die castings.

APEX ALLOY NO. 7.
M-130; 3.9-4.3 Al, 0.10 max Cu, 0.10-0.20 Mg, 0.075 max Fe, 0.004 max Pb, 0.003 max Cd, 0.005-0.020 Ni, bal Zn
Die cast 41,000 TS; 87,000 Com S, 14 El, 76 Brin, 31,000 SS.
General die casting, automotive.
SAE 903.

APEX NO. 7 ZINC BASE ALLOY
M-130; 4.1 Al, 2.7 Cu, bal Zn
Cast: 47,000 TS, 8 El; 83 Brin.
For die castings, housings, Iz-15

APEX 12.
M-130, 6.5 Cu, 3 Si, 2 Zn, bal Al
Sand cast 17,000-23,000 TS, 14,000-15,000 YS, 3-1 El, 65-70 Brin
For general castings, sand and permanent mold castings, non-hardenable.

APEX 12
M-564, 85 Cu, 5 Sn, 5 Zn, 5 Pb
24,000 TS; 12,000 YS, 16 El, 48 Brin
For pump bodies, valves, pressure or steam parts; "Ounce Metal"

APEX 12 PM.
M-130, 6.5 Cu, 3 Si, 2 Zn, bal Al
Sand cast 23,000 TS; 15,000 YS, 1.5 El, 70 Brin
Permanent mold· 29,000 TS, 22,000 YS, 1.0 El, 70 Brin
For sand and permanent mold castings, good machinability

APEX 13.
M-130; 11-13 Si, bal Al
Die cast· 45,000 TS, 25,000 YS, 4 El, 70 Brin
For die castings, housings, corrosion resistant

APEX 14.
M-564; 85 Cu, 15 Zn
For flanges which are brazed onto copper pipe, "Brazing Brass"

APEX 16.
M-564; 56 Cu, 41 Zn, 1 Fe, 1 Al, 0.5 Mn, 0.5 Sn
65,000 TS, 32,000 YS, 25 El, 110 Brin
For valve stems, gears, ship propellers, "Manganese Bronze"; tough

APEX 22
M-564, 86 Cu, 8 Sn, 2 Zn, 4 Pb.
28,000 TS, 15,000 YS, 17 El
For bearings for industrial equipment, heavy duty.

APEX 24 (COMPOSITION G).
M-564; 88 Cu, 10 Sn, 2 Zn.
40,000 TS; 22,000 YS; 24 El
For superheated steam or hydraulic castings, gears, heavy pressure bearings; pressure tight.

APEX 28
M-130; 1.7-2.3 Cu, 10.0 Si, bal Al.
For light alloy castings; high fluidity.

APEX Z28.
M-130; 1.7-2.3 Cu, 9.5-10.5 Si, 0.10 Mg, 2.0-3.0 Zn, 0.50 Mn, 0.50 Ni, bal Al.
Aluminum die casting.
As cast: 44,000 TS; 23,000 YS; 4.0 El; 75 Brin; 26,000 SS.
For housings, motor frames, radio parts, hardware.

APEX 32.
M-130; 1 Cu, 12 Si, 1.1 Mg, bal Al.
PM-F temper: 27,000 TS; 19,000 YS; 1.0 El; 88 Brin.
PM-T 65 temper 47,000 TS, 43,000 YS, 0.5 El, 125 Brin
PM-T 551 temper: 36,000 TS, 28,000 YS, 0.5 El; 105 Brin.
For pistons, high temperature uses; permanent mold, heat treatable.

APEX Z-33
M-130; 4 Si, 3 Cu, 3 Zn, bal Al
F-temper 24,000 TS, 13,000 YS; 3.5 El; 55 Brin.
T6-temper 30,000 TS, 16,000 YS, 3.0 El; 65 Brin
For sand and permanent mold castings; good castability

APEX 34
M-130, 3 Cu, 9 Si, 1 Mg, 1 Ni, bal Al
PM-F temper 35,000 TS, 26,000 YS; 1 El, 85 Brin.
PM-T 5 temper 36,000 TS, 28,000 YS, 1 El; 100 Brin
For pistons, permanent mold

APEX 35
M-130, 10 Cu, 0.3 Mg, bal Al
SC-F temper 26,000 TS, 21,000 YS, 0.5 El, 85 Brin
SC-T 6 temper. 40,000 TS, 30,000 YS, 0.5 El; 115 Brin.
PM-T 65 temper 48,000 TS, 36,000 YS, 0.5 El, 140 Brin
For sand and permanent mold castings, wear resistant.

APEX 36
M-130, 0.6 max Cu, 9-10 Si, 0.4-0.6 Mg, bal Al
Cast· 46,000 TS, 27,000 YS, 3.5 El, 75 Brin
For light alloy castings, high fluidity

APEX 37
M-130, 4.5 Cu, 4.5 Si, bal Al
SC-F temper 25,000 TS, 15,000 YS, 2 El, 65 Brin
PM-F temper 27,000 TS, 13,000 YS, 2.5 El, 70 Brin
For castings, sand and permanent mold

APEX 38
M-130, 10 Cu, 4 Si, 0.25 Mg, bal Al
PM-F temper 32,000 TS, 24,000 YS, 1.5 El, 100 Brin
For sole plates, permanent mold castings, retains hardness at elevated temperatures

APEX 39
M-130, 3.5 Cu, 9 Si, bal Al
DC-F temper 47,000 TS, 27,000 YS, 3.5 El, 80 Brin.
For die castings, good machinability

APEX 39-11
M-130, 3-4 Cu, 10.5-11.5 Si, 1 max Zn, 1 max Fe, 0.5 max Ni, bal Al
Die cast 44,000-46,000 TS; 23,000-27,000 YS; 2 El, 85 Brin
For general die castings; S.S. 28,000; Charpy 2.2.

APEX Z-39
M-130, 3-4 Cu, 8.5-9.5 Si, 2-3 Zn, 1 max Fe, bal Al
Die cast: 46,000 TS, 25,000 YS; 3 El; 80 Brin.
For general die castings, S.S. 29,000.

APEX Z-39-11
M-130, 3-4 Cu, 10.5-11.5 Si, 2-3 Zn, 1 max Fe, bal Al.
Die cast 46,000 TS; 27,000 YS, 2 El; 85 Brin.
For general die castings; S.S. 28,000.

APEX 39A.
M-130; 3-4 Cu, 8.5-9.5 Si, bal Al.
Cast: 44,000 TS, 26,000 YS; 3 El; 80 Brin.
For light alloy castings; high fluidity.

APEX 39-B.
M-130; 3.5-4.5 Cu, 8.9-9.5 Si, 1.5-2.5 Zn, 1.2 max Fe, 0.1 max Mg, bal Al.
Die cast: 43,000 TS; 22,000 YS; 3 El; 80 Brin.
For general die castings; corrosion resistant.

APEX 39 P.
M-130; 4 Cu, 8 Si, bal Al.
SC-F temper: 26,000 TS, 15,000 YS; 2 El; 65 Brin
PM-F temper: 32,000 TS; 20,000 YS; 2.5 El, 75 Brin.
PM-T 6 temper: 40,000 TS, 27,000 YS; 3.5 El, 95 Brin.
For sand and permanent mold castings; for thin sections

APEX 41.
M-130; 1.5 Cu, 5 Si, 0.5 Mg, bal Al.
SC-F temper: 25,000 TS; 12,000 YS, 2.5 El; 65 Brin
SC-T 6 temper: 35,000 TS, 25,000 YS; 2.5 El; 80 Brin
PM-T 6 temper: 43,000 TS, 27,000 YS; 4 El; 90 Brin.
For sand and permanent mold castings; heat treatable

APEX 41-10.
M-130, 1.0 1.5 Cu, 4.5-5.5 Si, 0.45-0.6 Mg, 0.1 Zn, 0.1 Mn, bal Al
Sand cast: 27,000 TS, 18,000 YS; 2.5 El; 65 Brin.
T6 temper 42,000 TS, 30,000 YS; 4.0 El; 90 Brin
Good pressure tightness, good resistance to hot cracking.
SAE 335, AMS 4215; ASTM B26-68 SC51B, ASTM B108-68 SC51B

APEX 41A
M-130, 1-1.5 Cu, 4.5-5.5 Si, 0.4-0.6 Mg, 0.25 max Cr, bal Al
T4-Temper: 25,000 TS, 14,000 YS, 3.5 El; 75 Brin
T6-Temper 35,000 TS, 25,000 YS, 2.5 El, 80 Brin
For light alloy castings, age-hardenable.

APEX 43
M-130, 5 Si, bal Al.
SC F temper: 21,000 TS, 10,000 YS, 5 El, 45 Brin.
PM-F temper: 25,000 TS, 9000 YS, 5 El; 45 Brin.
DC-F temper 30,000 TS; 14,000 YS, 7 El, 60 Brin
For castings; pressure tight, corrosion resistant.

APEX 43A
M-130, 0.10 max Cu, 4.5-6 Si, 0.3 max Zn, bal Al
Sand cast: 19,000 TS, 9000 YS, 7 El, 40 Brin
Permanent mold. 24,000 TS, 9000 YS, 9 El, 45 Brin.
For castings, corrosion resistant.

APEX 43C
M-130; 0.3 max Cu, 4.5-6 Si, 0.3 max Zn, bal Al
Sand cast. 19,000 TS; 9000 YS, 7 El; 40 Brin
Permanent mold: 24,000 TS; 9000 YS, 5 El, 65 Brin.
For castings, high fluidity.

APEX 44.
M-564, 70 Cu, 4 Sn, 26 Pb
For self-lubricating bearing bronze, heavy duty

APEX 45 ALLOY TERNALLOY.
M-130; 0.3 Cr, 1.5-2.5 Mg, 3.5-4.5 Zn, bal Al.
For light alloy parts

APEX 46-10.
M-130; 0.1 Cu, 6.5-7.5 Si, 0.28-0.4 Mg, 0.1 Zn, 0.1 Mn, bal Al.
Sand cast: 24,000 TS; 14,000 YS; 4 El, 55 Brin.
T6 temper: 40,000 TS; 30,000 YS; 5 El; 85 Brin
Good pressure tightness, good resistance to hot cracking.
SAE 336; ASTM B26-68 SG70B, ASTM B108-68 SG70B.

APEX 46 A.
M-130; 7 Si, 0.3 Mg, bal Al.
SC-F temper: 23,000 TS, 12,000 YS, 3.5 El; 55 Brin.
SC-T 6 temper: 33,000 TS; 24,000 YS; 4 El; 70 Brin
PM-T 6 temper 40,000 TS, 27,000 YS; 5 El, 90 Brin
For sand and permanent mold castings; pressure tight

APEX 50
M-130; 3.7-4.7 Cu, 2.5-3.5 Si, bal Al
SC-F-temper: 24,000 TS; 14,000 YS; 2.5 El, 60 Brin.
SC-T6-temper: 36,000 TS; 26,000 YS, 1.5 El, 85 Brin
PM-T6-temper 40,000 TS; 26,000 YS, 4 El; 85 Brin
For light castings; sand and permanent mold

APEX 50-50 COPPER ALLOY.
M-130, 50 Al, 50 Cu
For rich hardener; for alloying.

APEX Z 50
M-130, 3.5-4.5 Cu, 2.5-3.5 Si, 2.5 Zn, bal Al.
F-temper: 24,000 TS, 14,000 YS; 2.5 El, 60 Brin
T4 temper 30,000 TS; 18,000 YS, 4 El, 65 Brin.
T6-temper 36,000 TS, 26,000 YS; 1.5 El, 85 Brin
For sand and permanent mold castings, heat treatable

APEX 51.
M-130; 4.0 Cu, 6.0 Si, bal Al
SC-F temper 23,000 TS, 13,000 YS, 2 El; 55 Brin
PM-F temper 28,000 TS, 16,000 YS; 2 El; 70 Brin
PM-T 6 temper 45 000 TS, 28,000 YS; 4 El, 105 Brin.
For castings, sand and permanent mold

APEX Z-51.
M-130, 4-5 Cu, 5-6 Si, 1.5-2.5 Zn, 1 max Fe, 0.6 max Mn, bal Al
Cast 23,000 TS, 13,000 YS, 2 El, 55 Brin
Aged 24,000 TS, 16,000 YS, 1 El, 75 Brin
For gear cases, housings, machine tool castings, age hardenable

APEX 52
M-130, 4.4 Cu, bal Al
SC-F temper 22,000 TS, 10,000 YS, 3 El, 50 Brin
SC T 6 temper 36,000 TS; 24,000 YS, 5 El; 75 Brin.
SC-T 6Z temper 40,000 TS, 30,000 YS, 2 El, 95 Brin
For sand castings, age hardenable

APEX 52A
M-130, 4-4.8 Cu, 1.5 max Si, 0.2 max Ti, bal Al
T4-Temper 32,000 TS, 16,000 YS, 8.5 El, 60 Brin
T6-Temper: 36,000 TS, 24,000 YS, 5 El, 75 Brin
For castings, age-hardenable

APEX 53.
M-130, 4.5 Cu, 2.5 Si, bal Al.
PM-F temper 30,000 TS, 14,000 YS; 3.5 El, 70 Brin.
PM-T 6 temper. 40,000 TS, 26,000 YS, 5 El; 90 Brin.
For permanent mold castings, age-hardenable.

APEX 56.
M-130; 4 Cu, 5 Si, bal Al.
DC-F temper: 38,000 TS; 22,000 YS; 3 El; 70 Brin.
For die castings; good machinability.

APEX 56A.
M-130; 3-4 Cu, 4.5-5.5 Si, bal Al.
For castings; age-hardenable.

APEX 59.
M-130; 4 Cu, 2 Ni, 1.5 Mg, bal Al.
F-temper: 28,000 TS, 24,000 YS, 1 El; 80 Brin.
T6-temper: 54,000 TS, 51,000 YS, 0.8 El, 120 Brin.
For high temperature castings; heat treatable

APEX 59A.
M-130; 3.5-4.5 Cu, 0.6 max Si, 1.3-1.8 Mg, 1.7-2.3 Ni, 0.2 max Ti, bal Al
T4-Temper: 37,000 TS, 30,000 YS; 1 El; 95 Brin.
T6-Temper: 38,000 TS, 100 Brin
For castings, age-hardenable.

APEX 60
M-130; 3.0-4.0 Cu, 5.5-6.5 Si, 0.15 Mg, 1.0 Zn, 0.5 Mn, 0.3 Ni, bal Al
Sand cast, T6: 32,000-38,000 TS, 20,000-28,000 YS, 2.5-3.0 El; 90 Brin
Per mold cast, T61. 40,000-50,000 TS, 24,000-42,000 YS, 2 El; 100 Brin.
ASTM B 108-68 SC64D; ASTM B 26-68 SC64D.

APEX 60-40 COPPER ALLOY
M-130, 60 Al, 40 Cu.
For rich hardeners for Zn base die cast alloys

APEX 62
M-130, 11 Zn, 2.7 Cu, 0.3 Mg, bal Al
Sand cast 29,000 TS, 17,000 YS, 2.5 El, 70 Brin
Permanent mold. 35,000 TS, 30,000 YS, 1.0 El; 105 Brin
For castings, light alloy parts

APEX 66.
M-130; 5.5-5.7 Cu, 5.0-6.0 Si, 0.25-0.6 Mg, 0.8 Zn, 0.8 Mn, bal Al.
Per mold cast; T5 32,000-35,000 TS; 25,000-30,000 YS; 95 Brin.
Good fluidity, resistance to hot cracking
SAE 300, ASTM B108-68 CS66A.

APEX 66
M-564, 86 Cu 10 Al, 4 Fe
85,000 TS, 44,000 YS, 18 El.
For gears, bearings, non-sparking tools, strong, tough

APEX 70
M-130; 3.0-4.0 Cu, 5.5-6.5 Si, 0.1 Mg, 1.0 Zn, 0.5 Mn, 0.35 Ni, bal Al
Sand cast, T6 36,000 TS; 24,000 YS, 2.0 El, 80 Brin, 22,000 SS
Per mold cast, T6. 40,000 TS, 27,000 YS; 3.0 El; 99 Brin.
Good, strong, general purpose aluminum casting.
SAE 326, 329, ASTM B108-68 SC64D
ASTM B26-68 SC64D.

APEX 75.
M-130, 7 Cu, 5.5 Si, 0.5 Mg, bal Al
PM-T 6 temper: 35,000 TS; 27,000 YS; 90 Brin.
PM-T 51 temper 40,000 TS; 31,000 YS, 1.0 El; 100 Brin.
For pistons; permanent mold.

APEX 75-25 SILICON HARDENER.
M-130; 75 Al, 25 Si.
For rich hardener for alloying.

APEX 77.
M-130; 7 Cu, 2.5 Si, bal Al.
SC-F temper: 23,000 TS; 15,000 YS; 1.5 El; 70 Brin.
For patterns; sand cast.

APEX 78.
M-130; 4 Cu, 8 Si, bal Al
For match plates; plaster mold casting.

APEX 80/20 COPPER HARDENER.
M-130; 20 Cu, bal Al
For alloying hardener.

APEX 95-5 ALUMINUM SILICON ALLOY.
M-130, 4.5-6.0 Si, 1.0 Fe-Cu, 0.2 max Zn, bal Al.
17,000-21,000 TS; 9,000 YS, 4-2 El; 40 Brin.
For thin, intricate dense castings, easy to cast.

APEX 97 DC
M-130, 1 Mg, 97 min Al.
For alloying to zinc, shot

APEX 97 DCZ
M-130,
Zinc hardener.
ASTM ZG71A.

APEX 110
M-130, 10 Cu, bal Al.
SC-F temper: 23,000 TS, 16,000 YS; 1 El, 85 Brin
SC-T 61 temper. 36,000 TS; 32,000 YS, 0.5 El, 110 Brin
PM-F temper 27,000 TS, 19,000 YS, 1.5 El, 90 Brin.
For bearings, sand and permanent mold.

APEX 125
M-130, 9.7-10.5 Mg, 0.10 max Si, 0.25 max Ti, bal Al
T4 Temper 57,000 TS, 29,000 YS, 30 El, 80 Brin
For sand castings, instrument cases, housings, oil pans
Age-hardenable, corrosion resistant

APEX 400
M-130, 0.1 max Cu, 3.6-4.2 Mg, bal Al.
24,000-26,000 TS, 10,000 YS, 8-6 El, 50-60 Brin
For light alloy parts, cooking utensils, marine castings, similar to "Permbrite."

APEX D 400
M-130, 4 Mg, 1.8 Si, bal Al
DC-F temper 41,000 TS, 20,000 YS, 10 El
For die castings, corrosion resistant

APEX P 400
M-130, 4 Mg, 1.8 Zn, bal Al
PM-F temper: 27,000 TS, 16,000 YS, 7 El, 60 Brin
For castings, permanent mold

APEX 405
M-130, 5 Zn, 0.4 Mg, 0.2 Mn, bal Al.
For die castings.

APEX NO 405 ZINC BASE ALLOY.
M-130, 4.1 Al, 0.03 Mg, bal Zn
Cast. 36,000 TS, 4 El, 62 Brin.
For die castings, housings; 17-18.

APEX 417
M-130, 0.1 max Cu, 0.15 max Si, 6.0-7.5 Mg, 0.2 Ti, bal Al.
Cast. 40,000 TS; 21,000 YS; 13 El; 70 Brin.
For agricultural and aircraft castings, marine parts, corrosion and impact resistant.

APEX 418.
M-130; 8 Mg, bal Al.
DC-F temper: 43,000 TS; 27,000 YS, 8 El; 80 Brin.
For die castings; corrosion resistant.

APEX 420.
M-130; 10 Mg, bal Al.
SC-T 4 temper: 46,000 TS; 25,000 YS; 14 El; 75 Brin.
For sand castings; high strength, corrosion resistant.

APEX 440.
M-130, 0.20 max Cu, 0.50-0.65 Mg, 5.2-6.0 Zn, 0.4-0.6 Cr, 0.15-0.25 Ti, bal Al.
Cast: 28,000 TS; 16,000 YS; 12 El; 55 Brin.
Aged: 36,000 TS; 25,000 YS; 6 El, 75 Brin
For sand castings, housings, oil pans, instrument cases, gear cases. Self aging.

APEX 461.
M-130, 5.5 Zn, 1.4 Cu, 0.2 Mg, bal Al.
For general purpose castings, room temperature aging.

APEX 470.
M-130; 0.7 Cu, 0.4 Mg, 7.5 Zn, bal Al
For general purpose castings; room temperature aging

APEX 630
M-130; 6 Al, 3 Zn, bal Mg.
SC-F temper· 29,000 TS; 14,000 YS, 6 El; 50 Brin.
SC-T 4 temper 40,000 TS, 14,000 YS; 12 El, 55 Brin.
SC-T 6 temper 40,000 TS; 19,000 YS; 5 El, 70 Brin
For sand castings, heat treatable.

APEX 700
M-130, 2.5 Cu, 1.2 Ni, 7.5 Si, bal Al
PM-T 5 temper 20,000 TS, 85,000 YS; 10 El, 45 Brin
For bearings, permanent mold.

APEX 700A
M-130, 6.2 Sn, 1.0 Cu, 1.0 Ni, bal Al.
T5-temper· 20,000 TS, 8500 YS, 10 El, 55 Brin
For bearings; age-hardened

APEX 750
M 130, 0.7-1.3 Cu, 0.7 max Si, 0.10 max Mn, 0.7-1.3 Ni, 5.5-7.0 Sn, bal Al.
Sand or permanent mold cast
T5 Cond· 23,000 TS; 11,000 YS, 12 El, 45 Brin, 15,000 SS.
AA No 850.0 T5.

APEX A 750
M-130, 0.7-1.3 Cu, 2.0-3.0 Si, 0.10 max Mn, 0.3-0.7 Ni, 5.5-7.0 Sn, bal Al
Sand or permanent mold cast
T5 Cond 20,000 TS, 11,000 YS, 5.0 El, 45 Brin, 14,000 SS
AA No 850.OT5

APEX B750.
M-130, 1.7-2.3 Cu, 0.4 max Si, 0.6-0.9 Mg, 0.10 max Mn, 0.9-1.5 Ni, 5.5-7.0 Sn, bal Al
Sand or permanent mold cast
T5 Cond 32,000 TS, 23,000 YS; 5.0 El, 70 Brin, 21,000 SS 11,000 End Limit.
AA No. B850.OT5.

APEX NO 810.
M-130, 7.5 Al, 0.7 Zn, bal Mg.
For light alloy castings; heat treatable.

APEX 910.
M-130; 9 Al, 0.6 Zn, bal Mg
DC-F temper: 33,000 TS; 22,000 YS; 3 El; 60 Brin.
For die castings.

APEX 920.
M-130; 9 Al, 2 Zn, bal Mg.
SC-F temper· 24,000 TS, 14,000 YS; 2 El; 65 Brin.
SC-T 4 temper: 40,000 TS, 16,000 YS; 10 El, 65 Brin.
SC-T 6 temper: 40,000 TS, 23,000 YS; 2 El; 85 Brin
For castings; heat treatable.

APEX NO. 4100 ZINC BASE ALLOY.
M-130; 4.1 Al, 1.25 Cu, bal Zn
Cast 39,000 TS; 10 El; 71 Brin
For die castings, housings; Iz-18

APEX NO 4102 ZINC BASE ALLOY.
M-130, 4.1 Al, 1.0 Cu, bal Zn
Cast 41,000 TS, 4 El, 73 Brin
For die castings, housings; Iz-17.

APEX BRONZE.
M-545, 86 Cu, 9.5 Al, bal Fe.
For marine parts, hardware; Sillman Bronze

APEX DRILL RODS
M-688, 1.0 C, Mn, bal Fe
Type AISI W1 Water hardening tool steel.

APEX PATTERN ALUMINUM ALLOY.
M-130, 4.6 Cu, 2-3.5 Si, 1.5 Zn + Fe, bal Al.
16,000-22,000 TS, 16,000 YS, 3-1 El; 68 Brin
For matchplate and patterns, age-hardenable

APEX PISTON ALLOY.
M-130; 9.25-10.75 Cu, 0.2 max Zn, 0.15-0.35 Mg, 1.0-1.25 Fe, bal Al
Chill cast 34,000 TS, 1 El; 95-125 Brin
For pistons, heat treated.

APEX PRESSURE ALUMINUM ALLOY
M-130, 3.5 Cu, 2-4 Si, 1.2 Fe + Zn, bal Al
17,000-21,000 TS, 17,000 YS, 2 El, 60 Brin.
For castings requiring extreme density; age-hardenable

APEX "T" SERIES ZINC BASE ALLOY
M-130, Al, Cu, bal Zn
For castings, die casting.

APHIT.
70 Cu, 20 Ni, 5.5 Zn, 4.5 Cd
For condenser tubes, chemical equipment; corrosion resistant

APHTIT
Eng., 75.70 Cu, 20-21 Ni, 2.4-5.5 Zn, 1.8-4.5 Cd
For corrosion resistant parts; (Aphtit), corrosion resistant

APIS
M-501, 1.65 C, 12 Cr, Co, bal Fe
For blanking and forming dies, punches, cutters; air hardened, non-deforming.

APM M-257
M-4, 6 Al_2O_3, bal Al
Sintered 37,000 TS, 24,000 YS, 17 El, 70 Brin
For fasteners, fan blades, bolts, cylinder heads.
Sintered, dispersion hardening, high strength at 1000°F

APM-M-276
M-4, Al, Al_2O_3.
Sintered 51,000 TS, 34,000 YS, 7 El; 92 Brin.
For fasteners, fan blades, bolts, sintered, high strength at 1000°F.

APM M-430.
M-4, 14 Al_2O_3, bal Al.
For high temperature applications.
Dispersion hardened, heat resistant.

APM M-470.
M-4; 10 Al_2O_3, bal Al.
For high temperature applications.
Dispersion hardened. Heat resistant to 930°F.

APOLLO.
M-114; 0.45 C, 2.0 Cr, 0.20 V, bal Fe.
For die casting dies, flying shears; oil hardening.

APOLLO.
M-1705; 2.5 C, 12.0 Cr, 4.0 V, 0.8 Mo, bal Fe.
High carbon, high chromium tool and die steel; air or oil hardening. AISI D7.

APOLLO CHROMSTEEL.
M-687; Ni-Cr plated steel.
For heat resistant parts; heat resistant to 800°F.

APOLLOY.
M-131, 0.08 C, 0.25 Cu, bal Fe.
For building construction; corrosion resisting to weather

APOLLO CROM.
Eng ; Cr plated sheet Zn
For corrosion resistant parts; stainless and corrosion resistant

APS-10 M 4
M-884; 0.12 C, 2 Cr, 0.3 Mo, 0.3 Al, bal Fe.
Tube· 100,000 min TS, 80,000 min YS.
For gas well piping.
Resists H_2S corrosion and stress cracking

APW NO 129.
M-686, 60 Pd, 40 Ni.
For high temperature brazing; M P. 2260°F; good oxidation resistance

APW NO 133.
M-686, 80 Pd, 14.5 Ag, 5.5 Al
For high temperature brazing; M P 1925-2050°F, good oxidation resistance.

APW NO 200
M-686; 100 Au.
For brazing filler metal; M.P. 1945°F.

APW-B-217
M-686; 45 Ag, 17.6 Cu, 19.4 Zn, 18 Cd.
For silver brazing; M P. 1140°F-1190°F, obsolete

APW NO 238
M-686, 80 Au, 20 Cu
For brazing filler metal, M P 1620-1630°F.

APW NO. 241.
M-686, 50 Au, 50 Cu.
For brazing filler metal, M.P. 1697-1733°F

APW NO. 242.
M-686; 37.5 Au, 62.5 Cu
For brazing filler metal; M.P 1755-1815°F.

APW NO. 243.
M-686; 35 Au, 62 Cu, 3 Ni
For brazing filler metal, M P. 1815-1875°F

APW-C-250.
M-686, 40 Ag, 30 Cu, 28 Zn, 2 Ni
For silver solder for brazing carbide tips; M.P. 1220-1435°F; obsolete.

APW NO. 253.
M-686; 20 Au, 80 Cu.
For brazing filler metal; M.P. 1850-1880°F.

APW NO. 255
M-686; 82 Au, 18 Ni.
For brazing filler metal; M.P. 1742°F.

APW NO. 259.
M-686, 94 Au, 6 Cu.
For brazing filler metal; M.P. 1742-1796°F.

APW NO. 260.
M-686; 35 Au, 65 Cu.
For brazing filler metal; M.P. 1778-1850°F.

APW NO. 261.
M-686; 75 Au, 20 Cu, 5 Ag.
For brazing filler metal, M.P. 1640-1650°F.

APW NO. 265.
M-686; 72 Au, 22 Ni, 6 Cr.
For brazing filler metal; M.P. 1785-1835°F.

APW-G-355.
M-686; 56 Ag, 22 Cu, 17 Zn, 5 Sn
For silver solder, brazing, M.P 1145-1205°F;

APW 431.
M-686; 90 Ag, 10 Pd.
For high temperature brazing for honeycomb assemblies; M P 1850-1975°F; high oxidation resistance.

APW NO. 440.
M-686, 75 Ag, 20 Pd, 5 Mn
For high temperature brazing; M.P 1960-2050°F; high strength.

APW NO 441.
M-686, 64 Ag, 33 Pd, 3 Mn
For high temperature brazing, M.P. 2100-2250°F, high strength.

AQUATOUGH 70.
M 1724, 0.70 C, 0.30 Mn, bal Fe
Water hardening tool steel; for chisels, caulking tools, cold heading dies, rivet snaps.

AQUATOUGH 100
M-1724, 0.95 C, 0.30 Mn, bal Fe.
Water hardening tool steel, for arbors, dowel pins, files, lathe centers, knurling and engraving tools.

AQUATOUGH 100
M-1569; 0.95 C, 0.3 Mn, bal Fe.
Heat treated 184,000 TS, 118,000 YS; 10 El; 30 RA; 375 Brin.
For arbors, axes, forming dies, springs; water hardened, Type W1.

AQUILA.
M-1322; 0.15 C, Cr, Mo, bal Fe.
For cams, gears, camshafts; case hardening steel, tough

AR-213
M-U S ; 0.12 C, 20.3 Cr, 4.5 W, 4.8 Al, 2.3 Ta, 0.6 Fe, 0.34 Zr, bal Co
Age-hardened. C 47 Rock
For gas turbine components.
Age-hardenable, corrosion and heat resistant
Sulphidation and oxidation resistant.

A.R. ALLOY.
M-2a; 10 Sn, 2 Pb, bal Cu
10-5 El; 50-60 Brin
For bearings for cold rolling mills, landing gears for airplanes; tough, strong.

ARBOGA.
Eng; Tungsten carbide.
For tools, hard cutting tools; sintered alloy.

ARC M 990.
M-104; 0.70 C, 22 Cr, 5 Ni, Cu, bal Fe.
For nozzles, wear and heat resistant parts; heat and wear resistant.

ARC M1628.
M-104; 0.12 max C, 1 Cr, 65 Ni, 25 Mo, bal Fe.
For chemical plant equipment; corrosion and heat resistant.

ARC.2233 A2.
M-771; 0.03 max C, 1.8 Mn, 14 Ni, 17 Cr, 2.5 Mo, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 40 El; B 78 Rock.
Cold Rolled. 130,000 TS; 75,000 YS, 30 El; C 27 Rock
For chemical and pharmaceutical plant equipment, tanks, digesters, vessels
Stainless, austenitic, acid resistant
AISI Type 316L.

ARC.2233 A8.
M-771; 0.08 max C, 1.8 Mn, 14 Ni, 17 Cr, 2.5 Mo, bal Fe
Annealed: 85,000 TS; 35,000 YS, 50 El, B 82 Rock.
Cold Rolled 140,000 TS, 120,000 YS, 10 El, C 28 Rock
For chemical and pharmaceutical plant equipment, valve trim, tanks, digesters, evaporators
Stainless, austenitic, acid resistant
AISI Type 316.

ARC 2233 B6
M-771, 0.06 max C, 11.5 Ni, 19 Cr, 2.2 Mo, 0.5 Ti, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, B 82 Rock
Cold Rolled 140,000 TS; 120,000 YS, 10 El, C 28 Rock
For welded chemical and plastic plant equipment, digesters, tanks
Stabilized for welding, stainless, austenitic
AISI Type 316 Ti

ARC.2233 C8
M-771, 0.08 max C, 14 Ni, 18 Cr, 2.5 Mo, Cb = 10 × C, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, B 82 Rock
Cold Rolled 140,000 TS, 120,000 YS, 10 El, C 28 Rock
For welded chemical and plastic plant equipment, digesters, tanks
Stabilized for welding, stainless, austenitic
AISI Type 316 Cb

ARC 2266 A2
M-771, 0.03 max C, 1.2 Mn, 13 Ni, 19 Cr, 3 Mo, bal Fe
Annealed 85,000 TS, 40,000 YS, 60 El, 70 RA, 135 Brin.
Cold Rolled: 150,000 TS; 125,000 YS; 15 El, 300 Brin
For chemical and plastic plant equipment, digesters, mixers, agitators, valve trim, kettles, tanks.
Acid resistant, austenitic
AISI Type 317 L, weldable

ARC 2266 A6
M-771, 0.06 max C, 1.2 Mn, 13 Ni, 19 Cr, 3 Mo, bal Fe.
Annealed: 85,000 TS; 40,000 YS, 60 El, 135 Brin
Cold Rolled 150,000 TS, 125,000 YS; 15 El, 300 Brin
For chemical and plastic plant equipment, digesters, agitators, valve trim, tanks, vessels
Austenitic, acid resistant
AISI Type 317 Non-hardenable

ARC.2266 A8
M-771; 0.08 max C, 1.2 Mn, 12 Ni, 19 Cr, 3 Mo, bal Fe.
Annealed. 85,000 TS; 40,000 YS; 69 El; 135 Brin.
Cold Rolled: 150,000 TS; 125,000 YS, 15 El; 300 Brin.
For chemical and plastic plant equipment, digesters, agitators, valve trim.
Austenitic, acid resistant. Non-hardenable.
AISI Type 317.

ARC.2266 B6.
M-771, 0.06 max C, 12 Ni, 18.5 Cr, 3 Mo, 0.4 Ti, bal Fe.
Annealed 85,000 TS; 35,000 YS; 50 El; 160 Brin
Cold Rolled: 125,000 TS; 85,000 YS, 30 El; 240 Brin
For welded structures, chemical and plastic plant equipment, tanks, agitators
Stabilized welding grade, austenitic, stainless
AISI Type 316 Ti

ARC 2266 Cb
M-104, 0.10 max C, 18 Cr, 13 Ni, Mo, Cb, bal Fe.
For chemical plant equipment; Type 318; stainless, austenitic.

ARC 2266 TRS
M-104, 0.06 max C, 17 Cr, 12 Ni, 3 Mo, bal Fe.
Annealed. 85,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin
For chemiccal plant equipment, Type 316L, stainless, austenitic

ARC 2702 A2
M-771, 0.03 max C, 1.8 MN, 11 Ni, 19 Cr, bal Fe
Annealed 85,000 TS, 35,000 YS, 60 El; 150 Brin
Cold Drawn 140,000 TS, 90,000 YS, 30 El, 250 Brin
For architectural trim, kitchen equipment, chemical and pharmaceutical plant equipment.
Stainless, austenitic, good weldability
AISI Type 304L

ARC 2702 A8
M-771, 0.08 max C, 11 Ni, 18 Cr, bal Fe
Annealed 86,000 TS, 36,000 YS, 60 El, 150 Brin
Cold Drawn. 140,000 TS, 90,000 YS, 30 El, 250 Brin
For architectural trim, kitchen equipment, chemical and pharmaceutical plant equipment
Stainless, austenitic, nonmagnetic
AISI Type 304

ARC 2702 A12
M-771, 0.12 C, 9 Ni, 18.5 Cr, bal Fe
Annealed 90,000 TS, 40,000 YS, 50 El, B 85 min Rock
Cold Rolled 180,000 TS, 150,000 YS; 12 El, C 25 Rock
For food handling and chemical plant equipment, valve trim, fasteners
Stainless, austenitic, nonmagnetic
AISI Type 302.

ARC 2702B
M-771, 0.08 max C, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe.
Normalized 93,000 TS, 36,000 YS, 45 El, 60 RA, 165 Brin
Annealed. 87,000 TS, 33,000 YS, 57 El, 73 RA; 155 Brin
For chemical plant equipment, Type 321; stainless, austenitic

ARC 2702 B2
M-771, 0.03 max C, 11 Ni, 18 Cr, 0.2 Ti, bal Fe.
Annealed 85,000 TS, 35,000 YS, 55 El; 150 Brin.
Cold Drawn 95,000 TS, 60,000 YS; 40 El, 185 Brin.
For welded structures, oil refinery and chemical plant equipment, exhaust systems.
Stabilized stainless steel, welding grade, austenitic.
AISI Type 321.

ARC.2702 B6.
M-771; 0.06 max C, 10 Ni, 18 Cr, 0.4 Ti, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 150 Brin.
Cold Drawn· 95,000 TS; 60,000 YS; 40 El; 185 Brin.
For welded structures, chemical and oil refinery equipment, tanks, exhaust systems.
Stabilized stainless steel austenitic, nonmagnetic.
AISI Type 321.

ARC.2702 B8.
M-771, 0.08 max C, 10 Ni, 18 Cr, Ti = 5 × C, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 55 El, 150 Brin
Cold Drawn· 95,000 TS, 60,000 YS, 40 El; 185 Brin.
For welding structures, chemical and oil refinery equipment, tanks, vessels, shafts.
Stabilized, stainless steel, austenitic, nonmagnetic.
AISI Type 321.

ARC 2702 C8
M-771, 0.08 max C, 11 Ni, 18 Cr, Cb = 10 × C, bal Fe
Annealed. 85,000 TS, 35,000 YS; 60 El; B 80 Rock.
Cold Drawn 100,000 TS, 65,000 YS, 40 El, B 95 Rock.
For exhaust manifold, boiler and oil refinery tubes, radiant superheaters, aircraft collector rings, welded structures, stainless, austenitic
AISI Type 347.

ARC 2702 Cb
M-104, 0.10 max C, 18 Cr, 10 Ni, Cb, bal Fe
Annealed 90,000 TS; 45,000 YS, 56 El, 65 RA; 160 Brin
For welded, chemical plant equipment, Type 347, stainless, austenitic

ARC 2702 M
M-104, 0.03 max C, 18 Cr, 10 Ni, Ti, bal Fe
Annealed: 85,000 TS; 35,000 YS, 55 El, 65 RA, 150 Brin.
For welded, chemical plant equipment, Type 321, stainless, austenitic

ARC 2702 SP.
M-104, 0.06 max C, 18 Cr, 10 Ni, Ti, bal Fe
Annealed 85,000 TS, 35,000 YS, 55 El, 65 RA, 150 Brin
For welded, chemical plant equipment, Type 321; stainless, austenitic

A R.C 2702T
M-771, 0.08 max C, 18-20 Cr, 8-11 Ni, 2 max Mn, bal Fe
Annealed. 90,000 TS, 45,000 YS, 60 El, 135 Brin
Cold drawn. 180,000 TS, 150,000 YS, 10 El, 330 Brin
For chemical plant equipment, welded structures; Type 304; stainless, austenitic.

ARC 2702 TRS.
M-104; 0.04 max C, 18 Cr, 10 Ni, bal Fe.
Annealed: 85,000 TS, 35,000 YS, 65 El; 75 RA; 145 Brin
For chemical plant equipment; Type 304L, stainless, austenitic.

ARC-6015.
M-771, 60 Ni, 15 Cr, 15 Mo, 5 Fe, 5 W.
For pumps, valves, chemical and plastic plant equipment.
Heat and corrosion resistant.

ARC 6015.
M-104, 0.15 max C, 15 Cr, 60 Ni, 17 Mo, W, bal Fe
For chemical plant equipment; corrosion and heat resistant

ARC 7915.
M-104, 0.10-0.25 C, 15 Cr, 78 Ni, bal Fe
For chemical plant equipment, corrosion and heat resistant.

ARCALOY 308
M-1713, 0.07 C, 19 Cr, 9 Ni, bal Fe.
Welded 90,000 TS, 45 El.
For stainless welding electrodes, stainless steel

ARCALOY TYPE 316-ELC
M-1713, 0.04 max C, 18 Cr, 13 Ni, bal Fe.
Welded 85,000 TS, 45 El
For welding rod, stainless

ARCAST.
M-685, 3 C, 2 Si, bal Fe
For welding electrode, for cast iron.

ARCAST-67.
M-1662, 5-9 Zn, 0.96-1.4 Mg, 0.1-0.4 Ti, 0.025-0.15 Cr, bal Al
Cast, 67,000 TS, 57,000 YS; 7 El
For general purpose castings, casings, housings, hardware.
Good castability, heat treatable

ARCHANGEL
M-485, C, alloy, bal Fe
For high speed tools, high speed steel

ARCHITECTURAL BRONZE C 94
M-179, Mn, Zn, bal Cu
Extruded 86,000 TS, 38,000 YS, 25 El, 145 Brin
For casements, hand rails, show cases, panels, architectural, corrosion resistant

ARCHITECTURAL BRONZE 385
M-8, 56.0 Cu, 41.5 Zn, 2.5 Pb
Soft Rod 60,000 TS, 20,000 YS, 25 El, B 65 Rock
For ornamental hardware, architectural applications hinges, lock bodies, hardware
Free cutting, corrosion resistant

ARCHITECTURAL BRONZE-385
M-33, 58.5 Cu, 38.25 Zn, 3.25 Pb
As extruded 54,000 TS, 18,000 YS, 35 El, 32,000 shear, 54 Rock B
As extruded and stretcher straightened. 60,000 TS; 30,000 YS, 25 El, 35,000 Shear, 60 Rock B
For architectural parts and fittings, hinges, lock bodies, valve stems

ARCOLOY
M-684, 95 Cu, Si, P
55,000 TS
For range boilers, storage tanks, corrosion resistant

ARCOSARC 70
M-677, mild steel 70,000 psi
For flux-cored welding wire, class F70T-2

ARCOSARC 71
M-677, mild steel 70,000 psi
For flux-cored welding wire, class E70T-1

ARCOSARC 72
M-677, mild steel 70,000 psi, high impact strength.
For flux-cored welding wire, class F70T-1

ARCOSARC 70X.
M-677, mild steel 70,000 psi
For flux cored welding wire, multi-pass deposition without slag removal, class F70T-2

ARCOSARC 80.
M-677; 1.0 Ni steel, 80,000 psi, high impact strength
For flux-cored welding wire.

ARCOSARC 100.
M-677, 1.5 Mn, 0.5 Mo steel, 100,000 psi.
For flux-cored welding wire.

ARCOSARC 110T
M-677, 2.0 Ni, 1.0 Cr, 0.5 Mo steel, 110,000 psi.
For flux-cored welding wire.

ARCOSARC 1CM
M-677; 1.25 Cr, 0.5 Mo steel.
For flux-cored welding wire

ARCOSARC 2CM
M-677, 2.25 Cr, 1.0 Mo steel
For flux-cored welding wire

ARCOSARC 5M
M-677, 5 Cr, 0.5 Mo steel
For flux-cored welding wire.

ARCOSARC CI
M-677; cast iron.
For flux-cored welding wire.

ARCOSARC SS-1
M-677, type 308 stainless steel
For flux-cored welding wire.

ARCOSARC SS-2
M-677, type 309 stainless steel
For flux-cored welding wire

ARCOSARC SS 3
M 677 type 316 stainless steel
For flux-cored welding wire

ARCOSARC 410 Ni
M 677, 0.04 C, 0.6 Mn, 0.4 Si, 12 Cr,
4 Ni, 0.8 Mo, bal Fe
For flux-cored welding wire, welding
CA6NM castings

ARCTIC
M-748, 3.5-4 Ni, 0.4-0.7 Mn, 0.10 max C, bal Fe
Cast 60,000 TS, 40,000 YS, 35 El, 60 RA
For valves, fittings, for low temperature
service, Charpy 30

ARC WEL
M 683, Zn, bal Cu
For welding rod

ARC ZCr
M 104, 0.10 max C, 24 Cr, 5 Ni, Mo, bal Fe
For furnace parts and equipment, heat resistant

ARDAL METAL
M-581, 2 Cu, 1.7 Fe, 0.6 Ni, bal Al
31,000 TS, 17,000 YS, 15 El, 60 Bhn
For bearings, pistons, wire, tubes;
cannot be hardened by heat treatment

ARDENT
M 1411, 1.5 C, 4 W, 0.5 Cr, bal Fe
For upsetters, forging dies, high abrasion
resistance, cold work steel

ARDOLOY 1A
M-482, Sintered carbide tool material
Cutting tool for semi-finishing and finishing
cast iron and non ferrous materials, suitable for
milling For turning and reaming all
aluminum alloys
ISO K10

ARDOLOY 2A
M-482; Sintered carbide tool material.
Shock resistant grade of cutting tool
used largely for planing cast iron; and for
general wear resistant application
ISO K30.

ARDOLOY AD.
M-482, Sintered carbide tool material.
General purpose cutting tool for machining
cast iron and non-ferrous materials at
medium feeds and speeds.
ISO M10, M20

ARDOLOY AF.
M-482; Sintered carbide tool material.
Very hard grade of straight tungsten carbide,
particularly for finishing cast iron,
non-ferrous, plastics and abrasive non-metallics.
ISO KO5.

ARDOLOY AK.
M-482, Sintered carbide tool material
Very tough cutting tool for heavy roughing cuts
at slow speeds,-good on interrupted cuts
ISO P40, P50

ARDOLOY CNO1(B)
M-482, Sintered carbide tool material
Very hard and wear resistant straight tungsten
grade due to low cobalt content and fine grain
structure, for finishing and boring cast iron and
non-ferrous
ISO KO1

ARDOLOY CN10
M-482, Sintered carbide tool material
Hard and wear resistant grade of straight
tungsten carbide, for finish turning and boring
of cast iron and non-ferrous metals.
ISO K10

ARDOLOY CN20(K)
M-482, Sintered carbide tool material
General purpose cutting tool for use on
cast iron, non ferrous metals and on
stainless steel
ISO K20

ARDOLOY CN30(M)
M-482, Sintered carbide tool material
Tough, shock-resisting grade, used mainly
for planing cast iron
ISO K30

ARDOLOY CR10
M-482, Sintered carbide tool material.
High crater and wear resistant grades for
medium and high speed cutting speeds,
and finishing steel.
ISO P10.

ARDOLOY CR 20
M-482, Sintered carbide tool material
For general purpose, semi-finishing of steels,
good crater and wear resistance
ISO P20

ARDOLOY CR25(T)
M 482, Sintered carbide tool material
General purpose cutting grade for all types of steel
at medium speeds and feeds
ISO P20.

ARDOLOY CR30
M 482, Sintered carbide tool material
General purpose grade for roughing and
semi finishing all types of steel at
medium feeds and speeds
ISO P30.

ARDOLOY CR40(R)
M-482, Sintered carbide tool material.
Tough grade of cutting tool for roughing cuts
at slow speeds and heavy loads.
ISO P40

ARDOLOY ICC.
M-482; Sintered carbide tool material.
Grade of cutting tool for semi-finishing and finishing of cast iron and non-ferrous material; used on all aluminum alloys.
ISO K10.

ARDOLOY S3.
M-482; Sintered carbide tool material.
General purpose cutting tool for all types of steels at medium speeds and feeds
ISO P30.

ARDOLOY S48
M-482, Sintered carbide tool material.
Tough cutting tool for roughing operations, particularly on steel.
ISO P40.

ARDOLOY S200.
M-482; Sintered carbide tool material.
General purpose cutting tool particularly for lathe turning most metals. Resistant to wear and cratering.
ISO P20

ARDOLOY SK2.
M-482; Sintered carbide tool material
Titanium carbide grade for finish turning and boring steel, resists flank and crater wear.
ISO PO1

ARDORIT 6
M-1338; 0.12 max C, 0 8 Si, 0 8 Al, 6 5 Cr, bal Fe.
Bars: 70,000 TS, 30,000 YS; 28 El; 65 RA; 160 Brin.
For oil refinery equipment; creep and heat resistant.

ARDORIT 13A1
M-1338, 0.12 max C, 1 2 Si, 1 0 Al, 13 Cr, bal Fe
Annealed: 75,000 TS; 40,000 YS, 30 El, 70 RA, 160 Brin.
For oil refinery equipment, Type 410 Al, stainless, creep resistant.

ARDORIT 18A1
M-1338; 0 12 max C, 1 Si, 1 Al, 18 Cr, bal Fe
Annealed· 80,000 TS, 50,000 YS, 22 El; 48 RA; 150 Brin.
For oil refinery equipment, Type 430 Al, heat and creep resistant.

ARDORIT 20/10.
M-1338, 0 15 C, 19 5 Cr, 9 5 Ni, bal Fe.
Annealed· 80,000 TS; 35,000 YS, 55 El; 75 RA; 150 Brin.
Cold drawn 180,000 TS; 150,000 YS; 10 El; 250 Brin
For chemical plant equipment, tanks, mixers, agitators, Type 302, stainless, austenitic.

ARDORIT 24/20.
M-1338; 0 15 C, 2 Si, 24 Cr, 19 Ni, bal Fe
Annealed: 100,000 TS; 45,000 YS, 50 El; 65 RA, 185 Brin
For furnace parts, pumps, valves, turbine parts; Type 310; stainless, austenitic.

ARDORIT 25N
M-1338; 0.2 C, 1.2 Si, 25 Cr, 4 Ni, bal Fe
Aged. 115,000 TS; 80,000 YS, 15 El.
Cast: 70,000 TS; 65,000 YS; 2 El, 190 Brin.
For furnace parts, heat treat boxes, baffles; heat and corrosion resistant

AREMITE.
M-195, Synthetic cast iron.
30,000-50,000 TS; 165 Brin.
For pipes, fittings, hardware.

ARGAL.
M-1362; 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al.
Soft: 28,000 TS; 13,000 YS; 30 El; 47 Brin.
Hard· 40,000 TS; 35,000 YS; 10 El; 73 Brin.
For aircraft tanks and fittings, marine parts, fuel lines, resists sea water corrosion.

ARGALIUM
M-1367, 1.5-3 0 Mg, 0 6-1.3 Mn, 1.3 max Si, 0 3 Cr, 0 2 Ti, bal Al
Soft· 26,000 TS, 10,000 YS; 20 El, 45 Brin.
Hard: 41,000 TS, 36,000 YS; 5 El; 77 Brin
For roofing, hydraulic tubing, architectural trim; good forming and welding properties

ARGELITE
Eng.; 90 Al, 6 Cu, 2 Si, 2 Bi
For light alloy parts, non-hardenable

ARGENT
M-547, 2 Ag, bal Sn
6775 TS; 3 7 El.
Al-solder, Sc-14.

ARGENTAL
England, 60-75 Al, 15-16 Ag, 7-20 Zn, 3-5 Cu
For jewelry, corrosion resistant

ARGENTAL
10 Sn, 5 Co, bal Cu
For jewelry; corrosion resistant.

ARGENTALIUM
Eng ; < 5 Ag, 0 1-1 Mg, bal Al
For light alloy parts, non-hardenable

ARGENTAN
Eng , 48 35 Cu, 34 05 Zn, 17.60 Ni
For table cutlery, ornaments, high resistance to corrosion.

ARGENTAN
U S , 50-90 Cu, 3-40 Ni, 0-10 Al, 0-40 Zn
For cutlery, corrosion resistant

ARGENTAN.
M-547, 2 Al, 0 5 Ag, bal Cu
Rolled 23,660 TS, 2 3 El.
For contacts.

ARGENTAN, BERLIN
Ger · 55 5 Cu, 29 1 Zn, 15.5 Ni
For electrical resistances, corrosion resistant

ARGENTAN, CHINESE
China, 40.4 Cu, 25.4 Zn, 31 6 Ni, 2 6 Fe.
For ornaments, jewelry, hardware; corrosion resistant

ARGENTAN, ENGLISH
Eng., 63 36 Cu, 17 Zn, 19 13 Ni, 0.38 Fe
For domestic ware, corrosion resistant

ARGENTAN, FRENCH
French· 50 32 Cu, 30 94 Zn, 18 4 Ni
For electricol resistances; corrosion resistant.

ARGENTAN (NEUSILBER)
Germ ; 26 Ni, 56 Cu, 18 Zn
For chemical equipment construction; substitute for Ag, a nickel silver.

ARGENTAN, RUSSIAN.
Russia, 63.88 Cu, 17.58 Zn, 17.58 Ni, 0.33 Fe, 0.32 Pb.
For ornaments, architectural purposes; corrosion resistant.

ARGENTAN, RUSSIAN (CAST).
Russia; 57.52 Cu, 18.94 Zn, 20.35 Ni, 3.15 Fe.
For ornaments, hardware; corrosion resistant.

ARGENTAN, SHEET.
Russia; 40-65 Cu, 17-32 Zn, 15-30 Ni.
For ornaments, jewelry, hardware; corrosion resistant.

ARGENTAN, SOLDER.
Russia; 35 Cu, 57 Zn, 8 Ni.
For solder; corrosion resistant

ARGENTAN, VIENNA.
Austria; 55.6 Cu, 21.8 Zn, 22.2 Ni, 0.38 Fe.
For ornaments, jewelry, hardware; corrosion resistant.

ARGENT FRANCAIS.
France; Cu-Zn-Ni.
For jewelry, ornaments, Moussets Silver

ARGENTIN
Eng; 85 Sn, 14.5 Sb, 0.5 Cu
For bearings, antifriction.

ARGENTINE METAL.
U. S., 85.5 Sn, 14.5 Sb
For statuettes and small ornaments; expands on cooling.

W Nr 3956, AISI Type 305 stainless.

ARGESTE 80 FH
M-1333, 0.15 max C, 16-18 Cr, 7-9 Ni, bal Fe.
Austenitic, corrosion resistant, hardens readily by cold work
For cold worked wire and strip for springs for operation to 350°C
W Nr 4310, AISI Type 301 stainless

ARGESTE 80 K
M-1333, 0.12 max C, 17-19 Cr, 8-10 Mo, bal Fe.
Ann 50-70 Kg/mm^2 TS, 22 Kg/mm^2 YS, 50 El.
Austenitic, hardenable only by cold work, corrosion resistant
For dairy equipment, food handling, dental instruments
W Nr. 4300, AISI Type 302 stainless

ARGESTE 80 LC.
M-1333; 0.03 max C, 17-20 Cr, 10-12.5 Ni, bal Fe.
Austenitic, weldable, corrosion resistant.
For welded assemblies for food, dairy and chemical industries.
W. Nr. 4306; AISI Type 304L.

ARGESTE 80 Mn.
M-1333; 0.20 max C, 17.0-20.0 Cr, 7.5-9.5 Ni, 5.5-7.5 Mn, bal Fe.
Welding wire.
W. Nr. 4370.

ARGESTE 80 Nb.
M-1333; 0.10 max C, 17-19 Cr, 9-11.5 Ni, Nb = 8 × %C, bal Fe.
Austenitic, weldable, corrosion resistant.
For welded assemblies for food, chemicals, and for operation at elevated temperature.
W. Nr. 4550; AISI Type 347 stainless.

ARGESTE 80 P.
M-1333, 0.07 max, 17-20 Cr, 9-11.5 Ni, bal Fe
Austenitic, hardenable by cold work only, corrosion resistant, weldable.
For food processing equipment, dairy equipment.
W. Nr. 4301; AISI Type 304 stainless

ARGESTE 80 PX.
M-1333, 0.08 max C, 18-20 Cr, 8.5-10.5 Ni, bal Fe.
Welding wire.
W. Nr. 4302.

ARGESTE 80 PXLC.
M-1333; 0.025 max C, 18-20 Cr, 9-11 Ni
Welding wire.
W. Nr. 4316, AISI Type 304L stainless.

ARGESTE 80 SG
M-1333; 0.09 max C, 16.0-18.0 Cr, 6.5-7.75 Ni, plus special additions, bal Fe.
Austenitic, corrosion resistant.
W. Nr. 4568.

ARGESTE 80 T
M-1333, 0.10 max C, 17-19 Cr, 9-11.5 Ni, Ti = 5 × %C, bal Fe.
Austenitic, weldable, corrosion resistant
For welded assemblies for food, chemicals, and for operation at elevated temperatures
W. Nr. 4541, AISI Type 321 stainless

ARGESTE 80 U
M-1333, 0.15 max C, 17-19 Cr, 8-10 Ni, 0.1-0.2 S, bal Fe.
Ann: 50-70 Kg/mm^2 TS, 22 Kg/mm^2 YS, 50 El.
Austenitic, free machining, corrosion resistant
For stainless bolts, nuts, studs, shafts made on automatic screw machines.
W. Nr. 4305, AISI Type 303 stainless.

ARGESTE 80 UZ
M-1333, 0.15 max C, 17.0-19.0 Cr, 8.0-10.0 Ni, 0.1-0.2 S (plus special additions) bal Fe.
Austenitic, free machining, corrosion resistant.
For stainless screw machine parts, as fasteners.

ARGESTE 80 X
M-1333, 0.07 max C, 18-20 Cr, 8-10 Ni, Nb = 12 × %C min, bal Fe.
Welding wire.
W. Nr. 4551.

ARGESTE 82 LC.
M-1333, 0.03 max C, 16.5-18.5 Cr, 2.0-2.5 Mo, 11.0-14.0 Ni, bal Fe
Austenitic, very good resistance to corrosion.
For parts and apparatus of chemical and textile industry.
W. Nr. 4404, AISI Type 316L stainless.

ARGESTE 82 Nb.
M-1333; 0.10 max C, 16.5-18.5 Cr, 2.0-2.5 Mo, 10.5-13.5 Ni, Nb = 8 × %C, min, bal Fe.
Austenitic, weldable, very good resistance to corrosion.
For welded assemblies in chemical industry.
W. Nr. 4580.

ARGESTE 82 P.
M-1333; 0.07 max C, 16.5-18.5 Cr, 2.0-2.5 Mo, 10.5-13.5 Ni, bal Fe
Austenitic, very good resistance to corrosion
For parts and apparatus for textile industry.
W. Nr. 4401; AISI Type 316 stainless.

ARGESTE 82 PX.
M-1333; 0.06 max C, 18-20 Cr, 2.0-2.5 Mo, 9.0-11.0 Ni, bal Fe
Welding Wire
W. Nr 4402

ARGESTE 82 PXLC.
M-1333, 0.025 max C, 17-19 Cr, 2.0-2.5 Mo, 9.5-11.5 Ni, bal Fe.
Welding wire
W. Nr 4428

ARGESTE 82 SG
M-1333; 0.09 max C, 14.0-16.0 Cr, 2.0-2.5 Mo, 6.5-7.75 Ni, plus special additions, bal Fe
Austenitic, corrosion resistant
W. Nr. 4532

ARGESTE 82 T.
M-1333, 0.10 max C, 16.5-18.5 Cr, 2.0-2.5 Mo, 10.5-13.5 Ni, Ti = 5 × %C min, bal Fe.
Austenitic, weldable, very good resistance to corrosion
For welded assemblies for chemical, textile, and cellulose industries.
W. Nr 4571

ARGESTE 82 X
M-1333, 0.07 max C, 18-20 Cr, 2.0-2.5 Mo, 9.5-11.5 Ni, Nb = 12 × %C min, bal Fe
Welding wire
W. Nr 4575.

ARGESTE 83 LC
M-1333, 0.03 max C, 16.5-18.5 Cr, 2.5-3.0 Mo, 12.5-15.0 Ni, bal Fe
Austenitic, weldable, very good resistance to corrosion
For welded assemblies requiring good corrosion resistance
W. Nr 4435

ARGESTE 83 Nb
M-1333, 0.10 max C, 16.5-18.5 Cr, 2.5-3.0 Mo, 12.0-14.5 Ni, Nb = 8 × %C min, bal Fe.
Austenitic, weldable, very good resistance to corrosion
For parts and assemblies for textile, fuel and rubber industries.
W. Nr 4583

ARGESTE 83 P.
M-1333, 0.07 max C, 16.5-18.5 Cr, 2.5-3.0 Mo, 12.0-14.5 Ni, bal Fe
Austenitic, weldable, very good resistance to corrosion
For welded assemblies requiring corrosion resistance
W. Nr. 4436

ARGESTE 83 PX
M-1333, 0.06 max C, 18-20 Cr, 2.5-3.0 Mo, 10.0-12.0 Ni, bal Fe.
Welding wire.
W. Nr. 4403.

ARGESTE 83 PXLC.
M-1333; 0.025 max C, 17-19 Cr, 2.5-3.0 Mo, 10-13 Ni, bal Fe.
Welding wire.
W. Nr. 4430.

ARGESTE 83 T.
M-1333; 0.10 max C, 16.5-18.5 Cr, 2.5-3.0 Mo, 12-14 Ni, Ti = 5 × %C min, bal Fe.
Austenitic, weldable, very good resistance to corrosion.
For parts and assemblies in chemical, textile and cellulose industries.
W. Nr. 4573.

ARGESTE 83 X.
M-1333, 0.07 max C, 18-20 Cr, 2.5-3.0 Mo, 10-13 Ni, Nb = 12 × %C min, bal Fe.
Welding wire.
W. Nr 4576.

ARGESTE 120.
M-1333, 0.10 max C, 11.5-13.5 Cr, 12.0-14.0 Ni, bal Fe
Austenitic, good corrosion resistance
For cutleries, jewelry, stamped articles
W Nr 4307

ARGESTE 135 P
M-1333; 0.07 max C, 16.0-18.0 Cr, 4.0-5.0 Mo, 12.5-14.5 Ni, bal Fe
Austenitic, good corrosion resistance
For parts and apparatus with high pitting stability.
W Nr 4449

ARGESTE 135 PX
M 1333, 0.06 max C, 17-19 Cr, 4.0-5.0 Mo, 12.5-15 Ni, bal Fe.
Welding wire
W Nr 4447

ARGESTE 180 K
M-1333, 0.03 max C, 15.5-16.5 Cr, 17.5-18.8 Ni, bal Fe
Austenitic, good ductility, corrosion resistant
For cold headed stainless parts
W Nr 4321

ARGESTE 180 M
M-1333, 0.15 max C, 11.0-13.0 Cr, 0.3-0.8 Mo, 1.5-2.5 Ni, 17-19 Mn, bal Fe
Austenitic, corrosion resistant
For high-temperature parts against organic acids
W Nr 4451

ARGESTE 182 Nb
M-1333; 0.07 max C, 16.5-18.5 Cr, 2.0-2.5 Mo, 19.0-21.0 Ni, Cu, Nb, bal Fe
Austenitic, ductile, corrosion resistant
For parts in chemical industry in contact with sulphuric acid
W Nr 4505

ARGESTE 182 RT
M-1333, 0.07 max C, 16.5-18.5 Cr, 2.0-2.5 Mo, 19.0-21.0 Ni, Cu, Ti, bal Fe
Austenitic, ductile, corrosion resistant
For parts in chemical industry in contact with sulphuric acid
W Nr 4506

ARGESTE 182 RX
M-1333; 0.06 max C, 17.5-20.0 Cr, 2.0-2.5 Mo, 20.0-22.0 Ni, 1.8-2.2 Cu, Nb = 12 × %C min, bal Fe
Welding wire
W. Nr. 4507

ARGESTE K 15.
M-1333, 0.12-0.17 C, 12.0-14.0 Cr, bal Fe.
Magnetic, hardenable, corrosion resistant
For structural parts and turbine blades.
W. Nr. 4024.

ARGESTE K 15L.
M-1333; 0.12-0.17 C, 12.0-14.0 Cr, 1.0-1.3 Mo, bal Fe.
Magnetic, hardenable, corrosion resistant.
For steam turbine blades and similarly stressed parts.
W. Nr. 4119.

ARGESTE K 20
M-1333, 0.17-0.22 C, 12.0-14.0 Cr, 1.0 max Mn, 1.0 max Si, bal Fe.
Magnetic, hardenable, corrosion resistant.
For structural parts requiring higher strength
W Nr 4021; Nearest AISI 420

ARGESTE K 20L.
M-1333, 0.17-0.22 C, 12.0-14.0 Cr, 1.0-1.3 Mo, bal Fe
Magnetic, hardenable, corrosion resistant
For high quality structural parts as turbine blades.
W Nr 4120

ARGESTE K 20N.
M-1333, 0.17-0.25 C, 16.0-18.0 Cr, 1.0-2.5 Ni, bal Fe.
Magnetic, hardenable, corrosion resistant
Heat treated parts have good strength to 500°C.
W Nr 4057, AISI Type 431.

ARGESTE K 35L.
M-1333, 0.33-0.43 C, 15.5-17.5 Cr, 1.0-1.3 Mo, bal Fe
Magnetic, hardenable, corrosion resistant.
For arbors, spindles, bolts operating at elevated temperatures.
W Nr 4122

ARGESTE K 40.
M-1333, 0.40-0.50 C, 12.0-14.0 Cr, bal Fe
Magnetic, hardenable, corrosion resistant.
For high temperature parts, arbors, spindles, bolts, shafts
W Nr 4034

ARGESTE K 50
M-1333, 0.50-0.60 C, 13.0-15.0 Cr, 0.5-0.6 Mo, bal Fe
Hardenable, magnetic, corrosion resistant.
For cutlery, table knives, instrument parts, requiring hard, stainless surfaces.
W. Nr 4110.

ARGESTE K 90L
M-1333, 0.85-0.95 C, 17.0-19.0 Cr, 1.0-1.3 Mo, bal Fe
Magnetic, hardenable, corrosion resistant
For cutlery, kitchen knives, hardened shafts operating at elevated temperature
W Nr 4112, AISI Type 440B stainless

ARGESTE K 100
M-1333, 1.0-1.1 C, 16.0-17.0 Cr, 0.4-0.6 Mo, bal Fe.
Magnetic, hardenable to file hardness, corrosion resistant
For stainless ball bearings, races, hardened shafts, safety razor blades.
W Nr. 4125, AISI Type 440C stainless

ARGILITE
French, 90 Al, 6 Cu, 2 Si, 2 Bi
For automotive engine parts.

ARGOFIL
M-282, 0.25 Mn, 0.25 Si, bal Cu.
For filler rod for argon-arc and inert gas shielded metal arc welding of copper.
M.P. 1083°C.

ARGO HIGH SPEED.
Eng.; 0.82 C, 0.17 Mn, 1.74 Cr, 4.87 W, 0.10 V, bal Fe.
For tools, cutters, dies, reamers, gages, punches; high speed steel.

ARGOID METAL.
Eng.; 52.6 Cu, 25.8 Zn, 21.6 Ni.
For ornamental parts; Nickel Silver.

ARGOZOIL.
U.S.; 54 Cu, 28-20 Zn, 14 Ni, 2 Sn, 2-10 Pb.
For ornamental parts; corrosion resistant.

ARGUS.
M-548; Pb, Sb, bal Sn.
For bearings; antifriction Babbitt.

ARGUZOID.
Germ.; 48-56 Cu, 13-21 Ni, 23-31 Zn, 0-4 Sn, 0-4 Pb.
For cutlery, ornaments, utensils; German Silver.

ARGYROID (ARGIROIDE).
Eng.; Cu, Ni, Zn.
For resistances, ornaments; Nickel Silver.

ARGYROLITH.
Eng.; 50-70 Cu, 10-20 Ni, 5-30 Zn.
For resistances, ornaments; Nickel Silver.

ARGYROPHAN.
Eng.; Cu, Ni, Zn.
For resistances, ornaments; Nickel Silver.

ARISTALOY.
M18; Sn, Cu, Zn, bal Ag.
For dental amalgams and dies; corrosion resistant

ARISTOLOY
M-18; 67-70 Ag, 25-29 Sn, 5-3 Cu, 0-1 Zn.
For dental amalgams and dies; U S P. 1963085.

ARISTOLOY 4-6 Cr-Mo.
M-682; 4-6 Cr, 0.15 max C, 0.4-0.6 Mo, bal Fe
For oil tubes, stills, oil refineries; heat and creep resistant.

ARISTOLOY 7-9 Cr-Mo.
M-682; 7-9 Cr, 0.15 max C, Mo, bal Fe.
For oil tubes, stills, oil refineries; creep and heat resistant

ARISTOLOY 302.
M-682; 17.0-19.0 Cr, 8-10 Ni, 0.08-0.20 C, 2 max Mn, 1 max Si, bal Fe.
For stainless parts; Type 302; resists scaling to 1450°F.

ARISTOLOY 303.
M-682; 17.0-19.0 Cr, 8-10 Ni, 0.15 max C, S or Se or Zr, bal Fe
For stainless parts; Type 303; free machining.

ARISTOLOY 304.
M-682; 18-20 Cr, 8-11 Ni, 0.08 max C, 2 max Mn, 1 max Si, bal Fe.
For stainless parts; Type 304; heat and corrosion resistant.

ARISTOLOY 305.
M-682; 17-19 Cr, 10-13 Ni, 0.12 max C, 2 max Mn, 2 max Si, bal Fe.
For stainless parts, Type 305; corrosion resistant.

ARISTOLOY 306.
M-682; 18-20 Cr, 9-11 Ni, 0.08 max C, 2 max Mn, bal Fe.
For stainless parts for welding; Type 306; heat and corrosion resistant.

ARISTOLOY 307.
M-682; 20-22 Cr, 10-12 Ni, 0.08-0.20 C, 1.5 max Mn, bal Fe.
For stainless parts; Type 307; corrosion resistant

ARISTOLOY 308.
M-682; 19-21 Cr, 10-12 Ni, 0.08 max C, 1.5 Mn, bal Fe.
For stainless parts; Type 308; heat and corrosion resistant.

ARISTOLOY 309.
M-682, 22-24 Cr, 12-15 Ni, 0.20 max C, 2.0 max Mn, bal Fe.
For stainless parts; resists scaling to 1800°F.

ARISTOLOY 310.
M-682; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
For heat and corrosion resisting parts; resists scaling to 2000°F.

ARISTOLOY 316.
M-682; 16-18 Cr, 10-14 Ni, 0.10 max C, 2.0 max Mn, 2-3 Mo, bal Fe.
For stainless parts; heat and corrosion resistant.

ARISTOLOY 317.
M-682; 18-20 Cr, 11-14 Ni, 0.10 max C, 2.0 max Mn, 3-4 Mo, bal Fe.
For stainless parts; heat and corrosion resistant.

ARISTOLOY 321.
M-682; 0.08 max C, 2 max Mn, 1 max Si, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe.
For heat and corrosion resisting parts; heat and corrosion resisting.

ARISTOLOY 347.
M-682, 17-19 Cr, 9-12 Ni, Cb, 0.10 max C, 2 max Mn, 1 max Si, bal Fe
For stainless parts; heat and corrosion resistant

ARISTOLOY 410.
M-682; 11.0-13.5 Cr, 0.15 max C. 1 max Mn, 1 max Si, bal Fe.
For corrosion resistant parts; resists scaling to 1250°F

ARISTOLOY 414.
M-682, 11.0-13.5 Cr, 1.2-2.5 Ni, 0.15 max C, bal Fe.
For corrosion resistant parts, resists scaling to 1250°F.

ARISTOLOY 416
M-682; 12-14 Cr, 0.15 max C, 0.60 max Mo, 0.07 S, 0.07 Se, bal Fe
For corrosion resistant parts; free machining.

ARISTOLOY 420
M-682, 0.15 max C, 0.7 max Mn, 0.5 Si, 12-14 Cr, bal Fe
For corrosion resisting parts, air or oil hardening.

ARISTOLOY 430.
M-682; 14-18 Cr, 0.12 max C, 1 max Mn, 1 max Si, bal Fe
For corrosion resistant parts; stainless

ARISTOLOY 446.
M-682, 0.35 max C, 23-27 Cr, bal Fe.
For heat and corrosion resisting parts, resists scaling to 2000°F

ARISTOLOY 4027 Leaded
M-682; 0.25-0.30 C, 0.7-0.9 Mn, 0.2-0.3 Mo, 0.15-0.35 Pb, bal Fe.
Annealed. 80,000 TS, 65,000 YP; 25 El; 220 Brin.
Hardened 250,000 TS; 210,000 YS; 8 El; 477 Brin
For gears, shafts for truck and automobile transmissions.
Free-cutting, water or oil hardening.

ARISTOLOY 4140.
M-682; 0.40 C, 0.80-1.1 Cr, 0.15-0.25 Mo, bal Fe.
Rolled· 130,000 TS; 95,000 YS; 15 El; 40 RA; 270 Brin.
Annealed: 90,000 TS; 65,000 YS; 27 El; 55 RA; 185 Brin.
For gears, shafts, axles, fittings, bolts; oil hardened

ARK.
M-261; 0.7 C, 3.7 Cr, 0.6 Mo, 14 W, 1 V, bal Fe.
For tools, cutters, punches; high speed steel.

ARK HIGH SPEED.
M-261; 0.84 C, 1.53 Mn, W, Cr, bal Fe.
For tools, high speed cutters, high speed steel.

ARKIT.
French; 38 Co, 30 Cr, 16 W, 10 Ni, 4 Mo, 2.5 C.
For high speed cutting tips of lathe tools; high heat resistance.

ARKO.
U.S.; 80 Cu, 20 Zn.
For tubes, fittings, hardware, drawn and spun.

ARK SUPERIOR.
M-261; 0.76 C, 4.25 Cr, 0.6 Mo, 1.4 V, 18 W, bal Fe
For drills, broaches, reamers, hobs, gear cutters; high speed steel

ARK SUPERIOR EXTRA.
M-261, 0.78 C, 4.25 Cr, 0.6 Mo, 1.4 V, 22 W, bal Fe.
For form cutters, tools for chilled roll turning; high speed steel

ARK SUPERLATIVE
M-261; 0.8 C, 4.8 Cr, 0.6 Mo, 1.6 V, 18.5 W, 5.7 Co, bal Fe.
For tools, cutters, milling cutters, high speed steel.

ARK SUPREME
M-261; 0.8 C, 22 W, 5 Cr, 17 Co, 1.7 V, 0.6 Mo, bal Fe
For tools, cutters, planing and boring tools; high speed steel

ARK TRIUMPH
M-261, M-486, 1.2 C, 4.35 Cr, 4.5 V, 14 W, bal Fe
For form tools, broaches, reamers, high speed steel

ARKTURUS
M-1306, 0.55 C, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, headers, upsetters, oil hardened, tough

ARM 4
M-Russia; 0.08-0.14 C, 0.3-1.0 Mn, 0.6 max Si, 14-16 Cr, 14-16 Ni, 1.8-2.2 Mo, 0.8-1.2 W, 2.5-3.0 Co, 0.3 Ti, bal Fe
Annealed 90,000 TS; 40,000 YS; 40 El, B 82 Rock
For high temperature applications, welded structures, agitators
Heat and corrosion resistant.

ARM 6.
M-Russia, C, 16 Cr, 14 Ni, 2.5 Mo, 6 W, 1 Cb, 0.4 V, bal Fe
Annealed 85,000 TS; 35,000 YS, 50 El, B 80 Rock
For high temperature applications, chemical plant equipment, fasteners, mixers
Heat and corrosion resistant

ARM 12
M-Russia, 0.20 C, 11.5 Cr, 0.5 max Ni, 0.5 Mo, 0.25 V, 2.5 W, 2.2 Co, 0.01 B, bal Fe.
For high temperature applications, furnace parts.
Heat resistant to 600°C, corrosion resistant

ARMACAST.
M-112; 0.25-0.30 C, 2.65-3.15 Cr, 0.45-0.55 Mo, bal Fe.
Cast: 110,000 TS, 90,000 YS; 20 El; 45 RA; 200-225 Brin.
For road construction and railway equipment castings, tough.

ARMALOY.
M-132; C, alloy, bal Fe.
For cutting tools, bits, blades, ratchets, wrenches; cast alloy.

ARMASTEEL.
M-690; 2.7 C, 1.2 Si, 0.15 S, bal Fe.
Cast: 55,000-108,000 TS; 42,000-95,000 YS; 8-1.5 El; 143-285 Brin.
For gears, rocker arms, universal joints, camshafts; pearlitic, malleable iron.

ARMASTEEL GM 84 M.
M-690; 2.55 C, 1.4 Si, 0.45 Mn, 0.12 S, 0.05 P, bal Fe Pearlitic malleable cast iron
100,000 TS, 80,000 YS, 2 El; 241-269 Brin.
For parts requiring good strength; e.g. connecting rods
SAE Grade 70002; ASTM Grade 80002

ARMASTEEL GM 85 M.
M-690, 2.55 C, 1.4 Si, 0.45 Mn, 0.12 S, 0.05 P, bal Fe Pearlitic malleable cast iron.
80,000 TS, 60,000 YS, 3 El, 197-241 Brin
This grade preferred for additional local rehardening by flame or induction; as for planet carriers.
SAE & ASTM Grade 60003.

ARMASTEEL GM 85 M Modified
M-690, 2.55 C, 1.4 Si, 0.45 Mn, 0.12 S, 0.05 P, bal Fe. Pearlitic malleable cast iron
90,000 TS, 60,000 YS, 3 El; 217-269 Brin
For automotive crankshafts.
SAE & AST Grade 60003

ARMASTEEL GM 86 M
M-609, 2.55 C, 1.4 Si, 0.45 Mn, 0.12 S, 0.05 P, bal Fe Pearlitic malleable cast iron
70,000 TS, 48,000 YS; 4 El, 163-207 Brin.
For lightly stressed automotive type parts; e.g certain compressor crankshafts.
SAE Grade 48005; ASTM Grade 48004

ARMASTEEL GM 88 M
M-690; 2.55 C, 1.4 Si, 0.45 Mn, 0.12 S, 0.05 P, bal Fe Pearlitic malleable cast iron
105,000 TS, 85,000 YS, 2 El; 269-302 Brin
Compressive strength 250,000 psi ultimate
For parts requiring good strength and wear resistance, gears ASTM Grade 80002.

ARMATURE ELECTRIC
M-806; 0.04 C, 0.5 Si, bal Fe
Annealed: 45,000 TS, 25,000 YS; 25 El.
For rotating equipment and field poles, high permeability.

ARMCO 4-79 Ni.
M-10, 4 Mo, 79 Ni, bal Fe
For electrical equipment, high permeability

ARMCO 9% NICKEL A353
M-10, 0.13 max C, 0.90 max Mn, 0.15-0.30 Si, 8.5-9.5 Ni, bal Fe
2" max thickness. 100,000-120,000 TS; 75,000 YS; 20 El
Heat treated nickel alloy steel, weldable; for storage and process vessels for liquified gases to −320°F. Double normalized and tempered

ARMCO 9% NICKEL A553 GRADE A
M-10; 0.13 max C, 0.90 max Mn, 0.15-0.30 Si, 8.5-9.5 Ni, bal Fe
2" max thickness. 100,000-120,000 TS; 100,000 YS, 20 El
Quenched and tempered: nickel alloy steel, weldable; for storage and process vessels, for liquified gases to −320°F.

ARMCO 15-5 PH.
M-10; 0.07 C, 14.0-15.5 Cr, 3.5-5.5 Ni, 2.5-4.5 Cu, bal Fe
Martensitic stainless, precipitation hardenable.
Cond H 900: 204,000 TS; 182,000 YS; 14 El
For springs, strong stampings; better transverse ductility and toughness than 17-7 PH.

ARMCO 17-4 PH.
M-10; 0.05 C, 17 Cr, 4 Ni, 4 Cu, bal Fe.
Age-hardened: 210,000 TS; 200,000 YS; 6-15 El; 450 Brin.
For gears, cams, chains, valves, pump parts; stainless, age-hardenable.

ARMCO 17-7 PH.
M-10, 0.09 C, 16.0-18.0 Cr, 6.5-7.75 Ni, 0.75-1.25 Al, bal Fe.
Semi-austenitic; precipitation hardened.
Annealed: 130,000 TS; 40,000 YS; 35 El.
Hardened: 200,000-265,000 TS; 185,000-260,000 YS; 2-9 El, (wire can be stronger).
For springs, instrument stampings as gears, levers, cams, fasteners; stainless.

ARMCO 17-10P.
M-10; 0 15 max C, 16 0-18 0 Cr, 9 5-12.0 Ni, 0.2-0 4 P, bal Fe.
Austenitic stainless; precipitation hardenable
Sol Tr: 89,000 TS; 38,000 YS; 70 El; 143 Brin.
Double aged. 144,000 TS; 99,000 YS, 20 El; 31 Rock C; 70,000 psi endurance limit.

ARMCO 18-2 Mn
M-10; 0.10 max C, 18.0 Cr, 1.6-2.0 Ni, 0 034 N, bal Fe
Austenitic stainless steel, non-hardenable by heat treatment.
Annealed· 120,000 TS, 65,000 YS, 55 El; 96 Rock B.
High yield strength in annealed condition.

ARMCO 18-9 LW.
M-10, 0.10 max C, 2.0 max Mn, 1.0 max Si, 17-19 Cr, 8-10 Ni, 3-4 Cu, bal Fe.
Annealed: 78,000 TS.
Cold drawn 152,000 TS.
For cold formed parts, fasteners, ferrules; good formability, stainless, austenitic.

ARMCO 18 SR.
M-10; 0.05 C, 0.5 Mn, 1.0 Si, 18 0 Cr, 0.5 Ni, 2.0 Al, 0 4 Ti, bal Fe.
Ferritic stainless sheet and strip, weldable.
Room temp· 80,000-90,000 TS; 60,000-70,000 YS, 25-30 El; 90 Rock B
1000°F. 48,700 TS, 33,900 YS; 30 El
For industrial ovens, heaters, furnace tubes, annealing boxes, baffle plates, pyrometer tubes; resists scaling at high temperature

ARMCO 20-10 Mn TYPE 307
M-10, 0 08-0.20 C, 19-22 Cr, 9-12 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 70 RA; 150 Brin.
For chemical plant equipment; Type 307; stainless.

ARMCO 21-6-9.
M-10, 0 08 C, 19.0-21.5 Cr, 5.5-7.5 Ni, 8.0-10 0 Mn, bal Fe.
Austenitic stainless steel; non-hardenable by heat treatment.
Annealed. 100,000 TS; 51,000 YS; 75 El.
High strength austenitic type with good resistance to oxidation and toughness at sub-zero temperatures.

ARMCO 22-4-9.
M-10; 0.45-0.60 C, 7-10 Mn, 20-23 Cr, 3-5 Ni, 0.4 N, 0.12 max C, bal Fe.
Heat treated: 162,000 TS; 102,000 YS; 9.0 El; 9.0 RA; 344 Brin.
At 900°F: 114,000 TS; 58,000 YS; 20.0 El; 21.0 RA; 236 Brin.
At 1600°F: 38,000 TS; 25,000 YS; 27.0 El; 39.0 RA; 177 Brin.
For high temperature steam valves and gas turbines; age hardenable, corrosion, wear and heat resistant.

ARMCO 22-13-5.
M-10; 0.06 max C, 20.5-23.5 Cr, 11.5-13.5 Ni, 4.0-6.0 Mn; 1.5-3.0 Mo, 0.2-0.4 N, 0.1-0.3 Cb, 0.1-0.3 V, bal Fe.
Austenitic stainless steel; non-hardenable by heat treatment.
Annealed: 120,000 TS; 65,000 YS; 45 El; 98 Rock B.
For parts requiring higher yield strength than AISI 304.

ARMCO 48 Ni.
M-10; Nickel-Iron alloy.
High permeability, low coercive force, low hysteresis loss.
For instrument transformers, generators, and motors, soft magnetic alloy.

ARMCO 48 Ni-R.
M-10; Nickel-Iron alloy.
High permeability, low coercive force, low hysteresis loss.
For instrument transformers, generators and motors; soft magnetic alloy.

ARMCO TYPE 301.
M-10, 0 10-0 15 C, 16-18 Cr, 6-8 Ni, bal Fe.
Annealed. 90,000 TS, 45,000 YS, 55 El; 65 RA; 143 Brin.
For chemical plant equipment, Type 301; stainless, austenitic

ARMCO TYPE 302 B
M-10; 0 08-0 15 C, 17-19 Cr, 8-10 Ni, 2-3 Si, bal Fe
For heat resistant parts; Type 302 B, heat and corrosion resistant

ARMCO TYPE 303.
M 10; 0.15 max C, 17-19 Cr, 8-10 Ni, 0 07 max S, P, Se, 0 6 max Zr, Mo, bal Fe
Cold drawn· 100,000 TS, 60,000 YS, 40 El, 53 RA; 212 Brin.
Annealed. 90,000 TS, 35,000 YS, 50 El, 55 RA; 160 Brin.
For screw machine products, hardware, bolts, nuts, screws, Type 303, stainless, free-cutting

ARMCO TYPE 303 Se
M-10; 0.15 max C, 17-19 Cr, 8-10 Ni, 0 15 min Se, bal Fe.
Annealed· 80,000 TS; 35,000 YS, 50 El, 70 RA; 150 Brin
For stainless parts, screw machine products; Type 303 Se, stainless, free-cutting

ARMCO 304
M-10, 0 08 max C, 18 0-20 0 Cr, 8 0-10 5 Ni, bal Fe
Austenitic stainless steel, non-hardenable by heat treatment.
Annealed· 85,000 TS, 35,000 YS; 60 El; 150 Brin
Good grade of 18-8 type stainless steel; for food, beverage, meat handling equipment AISI 304.

ARMCO 304 L.
M-10, 0.03 max C, 18 0-20 0 Cr, 8 0-10.0 Ni, bal Fe.
Austenitic stainless steel, non-hardenable by heat treatment
Annealed: 80,000 TS, 30,000 YS; 60 El; 140 Brin.
For welded assemblies without subsequent heat treatment; for food, beverage, meat processing equipment AISI 304L.

ARMCO 305.
M-10; 0.12 max C, 17 0-19.0 Cr, 10 5-13.5 Ni, bal Fe.
Austenitic stainless steel; non-hardenable by heat treatment.
Annealed· 85,000 TS; 35,000 YS; 60 El; 140 Brin.
Low work hardening rate; for spinning, deep drawing and cold heading work. AISI 305.

ARMCO TYPE 308
M-10; 0.08 max C, 19-21 Cr, 10-12 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 50 El; 65 RA; 165 Brin.
For chemical and plastic plant equipment; stainless, austenitic

ARMCO TYPE 309.
M-10, 0.20 max C, 22-24 Cr, 12-15 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El, 55 RA; 150 Brin
For furnace parts, heat treating boxes, Type 309, heat and corrosion resistant.

ARMCO TYPE 310
M-10, 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe
Annealed 95,000 TS, 40,000 YS, 45 El; 65 RA; 185 Brin
Cold drawn. 125,000 TS, 90,000 YS, 20 El; 60 RA, 220 Brin
For furnace equipment, chemical plant equipment; Type 310, stainless, austenitic

ARMCO TYPE 316
M-10, 0.10 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe
Annealed: 80,000 TS, 30,000 YS, 60 El, 70 RA; 150 Brin
Cold drawn. 90,000 TS, 60,000 YS; 45 El; 60 RA, 180 Brin
For chemical and textile plant equipment, Type 316, stainless, austenitic

ARMCO 316 L
M-10, 0.03 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe
Annealed 80,000 TS, 30,000 YS, 60 El, 70 RA, 140 Brin
Cold drawn 90,000 TS, 60,00 YS, 45 El, 60 RA, 190 Brin
For chemical and textile plant equipment, welded structures, Type 316L, stainless, austenitic

ARMCO TYPE 321
M-10, 0.08 max C, 2 max Mn, 0.75 max Si, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe
Annealed 90,000 TS, 35,000 YS, 55 El, 60 RA, 160 Brin.
For high temperature service and welded corrosion resistant, stabilized, austenitic, stainless

ARMCO TYPE 348
M-10, 0.10 max C, 1.5 max Mn, 17-19 Cr, 9-12 Ni, Cb = 10 × C, bal Fe.
Annealed 85,000 TS, 40,000 YS, 45 El, 65 RA, 140 Brin
Cold drawn 110,000 TS, 65,000 YS, 40 El, 60 RA, 220 Brin
For welded structures, chemical plant equipment, stainless, austenitic

ARMCO 400
M-10, 0.05 max C, 1.0 max Mn, 1.0 max Si, 12.0-13.0 Cr, 0.5 max Ni, 0.5 max Al, bal Fe
Ferritic stainless, non hardenable, weldable
Room temp 61,500 TS, 29,500 YS; 35 El
1200°F 15,000 TS, 10,000 YS; 63 El
For office furniture, dryer drums, air conditioning panels, sink strainers, resists scaling up to 1300°F.

ARMCO TYPE 405
M-10, 0.08 max C, 11.5-13.5 Cr, 0.2 Al, bal Fe
Annealed 75,000 TS, 45,000 YS, 30 El, 65 RA, 160 Brin
Cold drawn: 85,000 TS, 70,000 YS, 20 El, 60 RA, 185 Brin.
For pumps, valves, tanks, Type 405, corrosion resistant.

ARMCO 409.
M-10; 0.05 max C, 10.0-12.0 Cr, 0.50 Ti, bal Fe.
Ferritic, non hardenable stainless.
Sheet: 68,000 TS; 40,000 YS.
Low cost stainless sheet; formable.

ARMCO TYPE 410.
M-10; 0.15 max C, 11.5-13.5 Cr, bal Fe.
Annealed 75,000 TS; 41,000 YS; 35 El; 70 RA; 155 Brin.
Cold drawn: 110,000 TS; 85,000 YS; 23 El, 65 RA; 230 Brin
For pumps, valves, pressure vessels, motor shafts; Type 410, corrosion resistant.

ARMCO 410 Cb
M-10; 0.15 max C, 11.5-13.5 Cr, 0.25 max Cb, bal Fe.
Martensitic stainless steel, magnetic, hardenable
Hardened, tempered 500°F 195,000 TS, 161,000 YS; 16 El, 43 Rock C; 65 Ft lbs Charpy impact
Tempered 1100°F 137,000 TS; 121,000 YS, 19 El; 277 Brin, 73,000 psi endurance limit

ARMCO TYPE 410 Se
M-10, 0.15 max C, 12-14 Cr, 0.15 min Se, bal Fe
For corrosion resistant parts, Type 416 Se; corrosion resistant

ARMCO TYPE 414.
M-10, 0.15 max C, 11.5-13.5 Cr, 1.25-2.5 Ni, bal Fe
Annealed 120,000 TS, 95,000 YS, 20 El, 60 RA; 250 Brin
Cold drawn. 130,000 TS, 115,000 YS, 15 El, 58 RA, 270 Brin
For valves, propeller shafts, exhaust port inserts, Type 414, corrosion resistant.

ARMCO TYPE 416
M-10, 0.15 max C, 12-14 Cr, 0.07 max P, S, Se, Mo, 0.6 max Zr, bal Fe
Cold drawn, 100,000 TS, 85,000 YS, 13 El, 40 RA, 205 Brin.
Annealed 75,000 TS, 40,000 YS, 30 El, 60 RA; 105 Brin
For screw machine products, screws, shafts, gears, Type 416, corrosion resistant, free-cutting

ARMCO TYPE 420
M-10, 0.15 min C, 12-14 Cr, bal Fe
Annealed 95,000 TS, 50,000 YS, 25 El, 55 RA; 195 Brin
Cold drawn 105,000 TS, 85,000 YS, 17 El; 50 RA, 215 Brin
For cutlery, ball bearings, surgical instruments, Type 420, corrosion resistant

ARMCO TYPE 420 F
M-10, 0.15-0.45 C, 12-14 Cr, 0.18-0.35 Se, bal Fe
Annealed. 95,000 TS; 50,000 YS, 20 El, 50 RA, 195 Brin
For cutlery, ball bearings, dental and surgical instruments, Type 420 F, free-cutting, corrosion resistant

ARMCO TYPE 430
M-10, 0.12 max C, 14-18 Cr, bal Fe
Annealed 75,000 TS, 50,000 YS, 30 El, 65 RA, 155 Brin
Cold drawn 85,000 TS, 70,000 YS, 20 El, 60 RA; 185 Brin
For trim, hardware, fixtures, industrial equipment, Type 430; corrosion and heat resistant

ARMCO TYPE 431
M-10, 0.2 max C, 15-17 Cr, 1.5-2.5 Ni, bal Fe
Annealed 125,000 TS, 95,000 YS, 20 El, 55 RA; 250 Brin
Cold drawn 130,000 TS, 110,000 YS, 15 El, 35 RA; 270 Brin
For aircraft and marine parts, bolts; Type 431, corrosion resistant.

ARMCO TYPE 440 A.
M-10; 0.60-0.75 C, 16-18 Cr, 0.75 max Mo, bal Fe.
Annealed: 105,000 TS; 60,000 YS, 20 El, 45 RA; 215 Brin.
For cutlery, ball bearings, pump shafts, valves; Type 440 A, corrosion resistant, hardenable.

ARMCO TYPE 440 B.
M-10, 0.75-0.95 C, 16-18 Cr, 0.75 max Mo, bal Fe
Annealed: 107,000 TS, 62,000 YS; 18 El; 35 RA, 220 Brin.
For cutlery, ball bearings, pump shafts, valves; Type 440 B; corrosion resistant, hardenable.

ARMCO TYPE 440 C.
M-10, 0.95-1.2 C, 16-18 Cr, 0.75 max Mo, bal Fe.
Annealed: 110,000 TS; 65,000 YS; 14 El, 25 RA, 230 Brin
For cutlery, ball bearings, pump shafts, valves; Type 440 C; corrosion resistant, hardenable

ARMCO TYPE 440 F.
M-10; 0.95-1.2 C, 16-18 Cr, 0.75 max Mo, 0.2 S, bal Fe
Annealed 110,000 TS; 65,000 YS, 12 El, 20 RA, 230 Brin.
For cutlery, bearings, pump shafts, valves, Type 440 F, corrosion resistant, hardenable.

ARMCO TYPE 440F Se
M-10, 0.95-1.2 C, 16-18 Cr, 0.60 max Mo or Zr, bal Fe
For bearings, races, Type 440 FSe, corrosion resistant

ARMCO TYPE 446
M-10; 0.35 max C, 1.0 Si, 23-27 Cr, bal Fe.
Annealed. 80,000 TS, 50,000 YS, 23 El, 55 RA, 175 Brin
For furnace parts, heat treating boxes, Type 446; heat resistant.

ARMCO A-286
M-10, 0.05 C, 1.45 Mn, 0.5 Si, 14.75 Cr, 25.25 Ni, 1.3 Mo, 2.15 Ti, 0.15 Al, 0.3 V, 0.005 B, bal Fe
Austenitic, precipitation hardenable, stainless
Annealed 90,000 TS, 35,000 YS, 45 El; 83 Rock B
Sol tr & aged: 150,000 TS, 100,000 YS, 25 El; 34 Rock C
Very good high temperature properties as creep strength, fatigue, scaling, impact up to 1300°F, for high temperature fasteners, etc.
AMS 5731, 5732 etc.

ARMCO ALUMINIZED STEEL
M-10, sheet steel coated with Al
Rolled 45,000 TS, 30,000 YS, 15 El, 120 Brin
For structural uses, mufflers, corrosion resistant

ARMCO ABRASION RESISTING STEEL.
M-10; 0.43 max C, 1.4-2.0 Mn, 0.15-0.35 Si, bal Fe
As rolled 225-285 Brinell; good abrasion resistance for chutes, hoppers, spouts, truck bodies, ore cars, weldable with special precautions.

ARMCO BETA 3
M-10; 11.5 Mo, 6 Zr, 4.5 Sn, bal Ti.
Wrought: 100,000-110,000 TS; 90,000 YS, 15 El
Beta alloy: good cold formability, age hardenable to 135,000 TS AMS 4977

ARMCO DI-MAX M-15.
M-10,
Hot rolled silicon sheet steel, non-oriented, low core loss
For high efficiency distribution transformers and large power transformers.

ARMCO DI-MAX M-19.
M-10;
Hot rolled or cold finished silicon sheet steel; non-oriented; low core loss.
For 2, 4 or many pole large rotating machine laminations.

ARMCO DI-MAX M-22.
M-10;
Hot rolled or cold finished silicon sheet steel; non-oriented; low core loss.
For transformers, radio chokes, large rotating machines.

ARMCO DI-MAX M-27.
M-10,
Hot rolled or cold finished silicon sheet steel; non-oriented, low core loss
For transformers, radio chokes, domestic appliance motors

ARMCO DI-MAX M-36
M-10,
Hot rolled or cold finished silicon sheet steel, non-oriented, low core loss
For transformers, magnetos, motor laminations

ARMCO DI-MAX M-45
M-10,
Cold finished silicon sheet steel; low core loss, non-oriented
For generators, motor laminations

ARMCO ELECTROMAGNET IRON
M-10, 0.03 max C, bal Fe
Rolled 44,000 TS, 23,000 YS, 37 El, 70 RA; 83 Brin
Cold drawn 73,000 TS, 69,000 YS, 12 El, 63 RA, 142 Brin
For cores of DC electrical and magnetic equipment, high permeability.

ARMCO ENAMELING IRON
M-10, 0.1 max C, bal Fe
For enameling purposes, sheets

ARMCO HIGH STRENGTH A
M-10, 0.12 max C, 0.6 max Mn, 0.25-0.7 Si, 0.50-1.0 Cr, 0.8 max Ni, 0.1 max Mo, 0.3-0.5 Cu, 0.07 max Ti, bal Fe
½" max thickness 70,000 TS, 50,000 YS; 21 El
(thicker metal has higher C, Mn, and lower strength)
For bridges, buildings, railroad cars, agricultural equipment, vent stacks.
ASTM Standards A242, A588

ARMCO HIGH STRENGTH B
M-10, 0.22 max C, 0.85-1.25 Mn, 0.30 max Si, 0.2 min Cu, 0.02 min V, bal Fe.
¾" max thickness 70,000 TS, 50,000 El
(thicker metal has lower strength).
For bridges, buildings, railroad cars, dam components, tractors, trailers
ASTM Standard A441

ARMCO HIGH STRENGTH C-42
M-10, 0.21 max C, 1.35 max Mn, 0.3 max Si, 0.005-0.05 Cb or 0.01-0.10 V, bal Fe
60,000 TS, 42,000 YS, 24 El
For truck trailers, auto parts, utility poles.
ASTM Standard A572.

ARMCO HIGH STRENGTH C-45
M-10; 0.22 max C, 1.35 max Mn, 0.30 max Si, 0.005-0.05 Cb or 0.01-0.1 V, bal Fe.
60,000 TS, 45,000 YS; 19 El (8 in gage).
For miscellaneous structural work on bridges, buildings, railroad cars
ASTM Standard A572.

ARMCO HIGH STRENGTH C-50.
M-10; 0.23 max C, 1.35 max Mn, 0.30 max Si, 0.005-0.05 Cb, and/or 0.01-0.1 V, bal Fe.
65,000 TS, 50,000 YS; 18 El (8 in. gage).
For miscellaneous structural work on bridges, buildings, truck and trailer bodies.
ASTM Standard A572.

ARMCO HIGH STRENGTH C-55.
M-10; 0.25 max C, 1.35 max Mn, 0.30 max Si, 0.005-0.05 Cb and/or 0.01-0.1 V, bal Fe.
70,000 TS; 55,000 YS; 17 El (8 in. gage).
For miscellaneous structural work on bridges, buildings, railroad cars, trucks and trailers.
ASTM Standard A572.

ARMCO HIGH STRENGTH C-60
M-10; 0.26 max C, 1.35 max Mn, 0.30 max Si, 0.005-0.05 Cb and/or 0.01-0.10 V, bal Fe
75,000-TS; 60,000 YS, 15 El (8 in. gage).
For miscellaneous structural work on bridges, buildings, railroad cars, tanks, trucks
ASTM Standard A 572.

ARMCO HIGH STRENGTH C-65.
M-10; 0.26 max C, 1.35 max Mn, 0.30 max Si, 0.005-0.05 Cb, and/or 0.01-0.10 V, bal Fe.
80,000 TS, 65,000 YS, 15 El (8 in gage).
For miscellaneous structural work on bridges, transmission towers, utility poles, buildings
ASTM Standard A 572

ARMCO HIGH STRENGTH C-70.
M 10, 0.26 max C, 1.35 max Mn, 0.30 max Si, 0.005-0.05 Cb, and/or 0.01-0.10 V, bal Fe
85,000 TS, 70,000 YS.
For miscellaneous structural work on bridges, transmission towers, buildings, railroad cars, truck and trailer bodies, tanks

ARMCO HIGH STRENGTH D.
M 10; 0.28 max C, 1.1-1.6 Mn, 0.3 max Si, 0.20 min Cu, bal Fe
¾" max thickness 70,000 TS, 50,000 YS, 18 El
For bolted or riveted bridges, buildings, mining applications
ASTM Standard A440

ARMCO HY-80.
M-10, 0.18 max C, 0.10-0.40 Mn, 0.15-0.35 Si, 2.0-3.25 Ni, 1.0-1.8 Cr, 0.2-0.6 Mo, bal Fe
⅝" max thickness· 80,000-100,000 YS, 19 El
For submarine hulls, deck and hatch sections, diving bells, helicopter decks, other navy and marine applications, weldable.
MIL-S-16216 G (ships), (plate).

ARMCO HY-100.
M-10; 0.20 C, 0.10-0.40 Mn, 0.15-0.35 Si, 2.25-3.50 Ni, 1.0-1.8 Cr, 0.2-0.6 Mo, bal Fe.
⅝" max thickness 100,000-120,000 YS, 18 El.
For submarine hulls, marine diving bells, deck sections, weldable
MIL-S-16216 G (Ships), (plate)

ARMCO INGOT IRON.
M-10; 0.012 C, 0.017 Mn, 0.005 P, 0.025 Si, bal Fe
Treated: 38,000-45,000 TS; 20,000-25,000 YS, 40 El, 50 RA, 85 Brin.
Annealed· 38,000 TS, 19,000 YS, 40 El, 50 RA; 85 Brin.
For pipes, roofing, tanks, culverts, stoves, metal furniture, ductile.

ARMCO LO-TEMP, GRADE A.
M-10, 0.20 max C, 0.70-1.35 Mn, 0.15-0.50 Si, 0.25 max Cr, 0.25 max Ni, 0.08 max Mo, 0.35 max Cu, bal Fe.
1¼" max thickness: 70,000-90,000 TS; 50,000 YS; 18 El (8 in. gage).
Weldable, fine-grain, good toughness to −75°F.
For off shore platforms, ships, process and pressure tanks, storage tanks.
ASTM Standard A537.

ARMCO LTM.
M-10; 0.14 max C, 0.9-1.35 Mn, 0.15-0.30 Si, bal Fe
¾" max thickness· 62,000-82,000 TS; 42,000 YS; 20 El (8 in. gage).
For pressure vessels; fine grain; weldable.
Good toughness to −75°F. for pipes, tanks, refrigerated containers.

ARMCO ORIENTED M-3.
M-10,
Iron-silicon electrical steel sheet with oriented properties; low core loss; thickness 9 mils.

ARMCO ORIENTED M-4.
M-10,
Iron-silicon electrical steel sheet with oriented properties; low core loss, thickness 11 mils

ARMCO ORIENTED M-5.
M-10;
Iron silicon electrical steel sheet with oriented properties; low core loss; thickness 11, 12 mils.

ARMCO ORIENTED M-6
M-10,
Iron silicon electrical steel sheet with oriented properties, low core loss; thickness 12, 14 mils.

ARMCO ORIENTED M-7
M-10,
Iron silicon electrical steel sheet with oriented properties, low core loss; thickness 14 mils.

ARMCO ORIENTED M-8.
M-10,
Iron silicon electrical steel sheet with oriented properties; low core loss.

ARMCO ORIENTED T.
M 10,
Thin iron silicon sheets, electrical steel, with directional magnetic properties, good permeability; for transformers, yoke cores.

ARMCO ORIENTED TG.
M-10,
Thin iron-silicon sheets, electrical steel, with directional magnetic properties, designed for 400 Hz and higher frequency service

ARMCO ORIENTED T-S.
M-10;
Thin iron-silicon sheets, electrical steel, with directional magnetic properties, designed for 400 cycle service at inductions above 16 kilogausses

ARMCO PH 13-8 Mo.
M-10, 0.05 max C, 12.25-13.25 Cr, 7.5-8.5 Ni, 2.0-2.5 Mo, 0.9-1.35 Al, bal Fe
Martensitic stainless; precipitation hardenable.
Cond H 950, 225,000 TS, 205,000 YS; 12 El.
For springs, stampings, fasteners; better transverse properties than 17-7 PH

ARMCO PH 14-8 Mo
M-10; 0.05 C, 13.5-15.5 Cr, 7.5-9.5 Ni, 2.0-3.0 Mo, 0.75-1.25 Al, bal Fe
Semi-austenitic, precipitation hardened.
Cond SRH 900; 230,000 TS; 215,000 YS; 6 El.
For springs, stampings, watch and instrument parts, fasteners; stainless

ARMCO PH 15-7 Mo.
M-10; 0.09 max C, 14.0-16.0 Cr, 6.5-7.75 Ni, 2.0-3.0 Mo, 0.75-1.50 Al, bal Fe.
Semi-austenitic; precipitation hardened.
Annealed: 130,000 TS; 55,000 YS; 35 El.
Hardened: 220,000-265,000 TS; 210,000-260,000 YS; 7-2 El; 45-50 Rock C.
For springs, watch and instrument parts as gears, cams, levers, fasteners; stainless.

ARMCO QTC.
M-10; 0.20 max C, 1.15-1.50 Mn, 0.20-0.50 Si, 0.20 max Cr, 0.15 max Ni, 0.08 max Mo, 0.20 min Cu, 0.0015 min B, bal Fe.
¾" max thickness: 100,000-120,000 TS; 80,000 YS, 18 El
Quenched and tempered, fine-grain, weldable, for off-shore platforms, ships, railroad cars.

ARMCO SSS 100A A 514, A517, Grade D
M-10; 0.20 max C, 0.40-0.70 Mn, 0.20-0.35 Si, 0.85-1.2 Cr, 0.15-0.25 Ni, 0.2-0.4 Cu, 0.04-0.1 Ti or V, 0.0015-0.005 B, bal Fe
1¼" max thickness 115,000-135,000 TS; 100,000 YS, 18-16 El
Quenched and tempered steel for bridges, buildings crane booms, ships, earth moving equipment.
ASTM Standard A514, A517.

ARMCO SSS 100, A514, A517, GRADE E
M-10; 0.20 max C, 0.40-0.70 Mn, 0.20-0.35 Si, 1.4-2.0 Cr, 0.4-0.6 Mo, 0.2-0.4 Cu, 0.04-0.1 Ti or V, 0.0015-0.005 B, bal Fe
2½" max thickness: 115,000-135,000 TS; 100,000 YS, 18-16 El
Quenched and tempered steel for bridges, buildings, crane booms, ships, earth moving equipment
ASTM Standard A514, A517.

ARMCO SSS 100B, A514, A517, Grade L.
M-10; 0.20 max C, 0.40-0.70 Mn, 0.20-0.35 Si, 1.15-1.65 Cr, 0.25-0.40 Mo, 0.20-0.40 Cu, 0.04-0.10 Ti or V, 0.0015-0.005 B, bal Fe
2" max thickness: 115,000-135,000 TS, 100,000 YS, 18-16 El
Quenched and tempered steel for buildings, bridges, ordnance, ships, earth moving equipment, crane booms
ASTM Standard A514, A517

ARMCO SUPER-LO-TEMP, GRADE B
M-10, 0.20 max C, 0.70-1.35 Mn, 0.15-0.50 Si, 0.25 max Cr, 0.25 max Ni, 0.08 max Mo, 0.35 max Cu, bal Fe
1¼" max thickness. 80,000-100,000 TS, 60,000 YS, 22 El.
Quenched and tempered, fine-grain, excellent low temperature properties For refrigerated storage tanks
ASTM Standard A537.

ARMCO Ti-5Al-2½ Sn
M-10, 4-6 Al, 2-3 Sn, bal Ti.
Wrought. 115,000 TS, 110,000 YS, 10 El
Forgeable, weldable, good creep resistance to 900°F; alpha alloy. For aircraft parts and low temperature equipment.
AMS 4926, 4966

ARMCO Ti-6Al-2Sn-4Zr-6Mo.
M-10, 6 Al, 2 Sn, 4 Zr, 2 Mo, bal Ti.
Heat treated: 130,000 TS; 120,000 YS; 10 El.
Alpha-beta alloy; good high temperature creep strength; for jet engine components.
AMS 4975.

ARMCO Ti-6Al-2Sn-4Zr-6Mo.
M-10; 6 Al, 2 Sn, 4 Zr, 6 Mo, bal Ti.
Heat treated: 170,000-180,000 TS; 160,000-170,000 YS; 10-8 El.
High strength titanium alloy.

ARMCO TI-6Al-4V.
M-10, 5.5-6.5 Al, 3.5-4.5 V, bal Ti
Wrought: 130,000 TS, 120,000 YS; 10 El
Alpha-beta alloy, weldable, heat treatable, good properties to 800°F; for compressor blades and wheels, spacers, cryogenic applications, rocket cases, marine equipment.
AMS 4928; MIL-T-9047, Type III Comp A.

ARMCO TI-6Al-6V-2Sn
M-10, 6 Al, 6 V, 2 Sn, bal Ti
Wrought: 140,000-150,000 TS; 130,000-140,000 YS; 10 El
Alpha-beta alloy; for rocket engine cases, ordnance and aircraft components.
AMS 4978; MIL-T-9047

ARMCO Ti-8Al-1Mo-1V
M-10, 7.5-8.5 Al, 0.75-1.25 Mo, 0.75-1.25 V, bal Ti
Wrought 130,000 TS, 120,000 YS, 10 El
Alpha-beta alloy, good creep properties at elevated temperature, for jet engine and aircraft parts
AMS 4972

ARMCO Ti 40
M-10, Essentially pure titanium.
Wrought 50,000 TS, 40,000 YS, 20 El
For aircraft ducting, corrosion resisting parts in chemical industry
AMS 4902 (sheet)

ARMCO Ti 55
M-10, Commercially pure titanium.
Wrought 65,000 TS, 55,000 YS, 18 El
For anodizing racks, welding wire, aircraft industry, chemical industry
AMS 4900 (sheet)

ARMCO Ti 70.
M 10, Commercially pure titanium
Wrought. 80,000 TS; 70,000 YS, 15 El.
For racks in chemical industry, anodizing racks, aircraft industry.
AMS 4921 (bar).

ARMCO TRAN-COR A-6
M-10
Hot rolled silicon sheet steel, non-oriented, low core loss transformer grade, for large magnetic amplifiers, saturable reactors.

ARMCO TRAN-COR M-14
M-10
Hot rolled silicon sheet steel, non-oriented, low core loss transformer grade, for distribution transformers and large power transformers

ARMCO TRAN-COR 72
M-10, 3.0-3.4 Si, bal Fe
For electrical purposes, large generators, transformers; for magnetic cores

ARMCO TRAN-COR T
M-10
Thin iron-silicon sheets, electrical steel, non-oriented; good permeability, for transformers, chokes, converters, generators

ARMCO VTN
M-10; 0.22 max C, 1.15-1.50 Mn, 0.15-0.30 Si, 0.04-0.11 V, 0.01-0.02 N, bal Fe.
80,000-100,000 TS; 60,000 YS; 23 El
For pressure vessels, truck bodies, heavy machinery, construction, farm equipment. Weldable, good shock resistance to −75°F.

ARMCO ZGPG ZINCGRIP-PAINTGRIP.
M-10; Galvanized sheet steel phosphated.
For structures, sheet metal work, mill bonderized.

ARMCO ZINC GRIP.
M-10, 0.03 max C, bal Fe
For roofing, culverts; galvanized sheets.

ARMCO ZINCGRIP PAINTGRIP.
M-10, galvanized steel.
For structures; discontinued.

ARMELEC
M-691; 0.5 Si, bal Fe.
For armatures, motors, good permeability.

ARMIDE
M-132; Carbide alloy TaC.
250,000 TS.
For tipped cutters and tools, hard, tough and wear resisting.

ARMIDE (78)
M-132; Sintered carbide tool material
For cutting tools, finishing and light roughing cuts on steel

ARMIDE (78B)
M-132, Sintered carbide tool material
For cutting tools, general purpose machining of steel

ARMIDE (350)
M-132, Sintered carbide tool material
For cutting tools, light roughing and general finishing cuts on steel

ARMIDE (370)
M 132, Sintered carbide tool material
Cutting tools for heavy roughing cuts on steel

ARMIDE (883)
M-132, Sintered carbide tool material
For cutting tools, general purpose cutting of cast iron and non-ferrous metals.

ARMIDE GRAY
M-132, carbide
For tipped tools, for machining cast iron and brass

ARMIDE RED.
M-132, carbide
For tipped tools, for machining steel.

ARMIN 90
M-1307, 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe
For engravers' tools, blanking and forming dies, high speed steel

ARMORLOY see McKAY ARMORLOY

ARMORLOY C
M-849, 0.09-0.15 C, 25 min Cr, 20 min Ni, bal Fe
Welded 87,000 TS, 60,000 YS, 45 El
For welding electrodes for armor, shielded arc, work hardenable

ARMSTEEL 88M
M-690, 3 C, Si, Mn, bal Fe
Cast. 105,000 TS, 85,000 YS, 2 El; 302 Brin
For transmissions gears and shafts, universal joints, pearlitic malleable iron.

ARMSTRONG.
U.S., 12 Cr, 5 Si, 0.5 C, bal Fe
For heat resisting steel parts; heat resisting stainless steel

ARMSTRONG-1.
U.S.; 3-50 Cr, 0.5-8 Si, C, bal Fe.
For heat and corrosion resisting parts; heat resisting.

ARMSTRONG-2.
U.S; 21.6 Cr, 3.4 Si, 2.35 C, 2.25 Mn, bal Fe.
For heat and corrosion resisting parts; heat resistant cast iron.

ARMSTRONG-3.
U.S., 12 Cr, 5 Si, 0.45 C, bal Fe
For heat and corrosion resisting parts; heat and corrosion resistant.

ARMSTRONG HIGH SPEED
M-132; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, cutters; high speed steel.

ARMSTRONG METAL.
Eng., 0.10 C, 4-6 Mn, 17 Cr, 8 Ni, 3 Cu, bal Fe
Annealed. 70,000 TS, 52 El, 71 RA, 126 Brin
For heat resisting parts; heat and corrosion resistant.

ARMSTRONG SELF HARDENING
M 132, C, alloy, bal Fe.
For tool shanks, oil hardening.

ARNE
M-111; 0.9 C, 1.2 Mn, 0.5 Cr, 0.5 W, 0.1 V, bal Fe
For dies, for cold work AISI O1.

ARNGRIM 2
M-111, 0.68 C, 0.25 Cr, 6 W, bal Fe
For permanent magnets.

ARNGRIM 3
M-111, 0.72 C, 0.65 Cr, 6 W, bal Fe
For permanent magnets

ARNOX-I
M-670, Barium ferrite + iron oxide
Hc = 1800, Hm = 10,000, Br 2200.
(BdHd) max 1,000,000; Bd = 1150
For magnets in door latches, holding assemblies, D C motors, focusing devices.
Permanent magnet, non conducting Non-oriented

ARNOX-III
M-670, Oxides
Hm = 8000; Br = 1500
Hc = 1100, Bd = 800
(BdHd) max = 400,000
For permanent magnets in toys and novelties, timing motors Non-oriented
Molded type magnet High coercive force and low residual induction and energy product

ARNOX-V
M-670, Barium ferrite.
Hm = 10,000, Br = 3950, Hc = 2200
(BdHd) max = 3,500,000; Bd = 2000
For permanent magnets in loudspeakers, motors, generators, magnetic separation applications
Ceramic magnet High coercive force
Magnetized in direction of orientation

ARNOX-Va
M-670, Barium ferrite.
Max energy product 3,500,000.
Remanence, Br, gauss 3850
Coercive force, Hc, oersteds 2000.
For permanent magnets (non-conducting)
Hard brittle ceramic, high coercive force, low flux density

ARO
M-1705, 0.50 C, 0.7 Mn, 0.7 Si, 0.2 V, 0.45 Mo, bal Fe.
Oil or water hardening shock resisting tool steel. AISI S2

AROSTIT C13
M-1325, 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed. 75,000 TS, 40,000 YS, 35 El; 70 RA; 180 Brin.
For turbine blades, chemical plant equipment; Type 410; corrosion resistant.

AROSTIT C13S.
M-1325; 0.12 max C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed. 70,000 TS; 40,000 YS; 30 El; 55 RA; 150 Brin.
Cold drawn: 130,000 TS; 120,000 YS; 2 El; 270 Brin.
For chemical plant equipment, bolts, oil refinery parts; Type 430F; corrosion and heat resistant.

AROSTIT C15.
M-1325; 0.25 C, 14.5 Cr, 1 max Ni, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El; 55 RA; 195 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For cutlery, valves, surgical instruments; Typt 420; corrosion resistant.

AROSTIT C18.
M-1325; 0.25 C, 17 Cr, 1 max Ni, bal Fe.
Annealed: 75,000 TS; 42,000 YS; 28 El; 53 RA; 160 Brin
For chemical plant equipment, bolts, shafts; Type 430; corrosion and heat resistant.

AROSTIT C20.
M-1325; 0.2 C, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For turbine blades, cutlery, surgical instruments, Type 420; corrosion resistant.

AROSTIT C20N.
M-1325; 0.20 C, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 20 El; 50 RA, 205 Brin.
For turbine blades, cutlery, valves; corrosion resistant.

AROSTIT C22K.
M-1325; 0.22 C, 17 Cr, 1.5 Ni, bal Fe.
Annealed 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
Cold drawn. 130,000 TS, 110,000 YS, 15 El, 35 RA; 270 Brin.
For pump shafts, marine hardware, valve trim; Type 431; corrosion and heat resistant

AROSTIT C22L.
M-1325, 0.35 C, 16.5 Cr, 1.15 Mo, bal Fe.
Annealed: 130,000 TS; 100,000 YS; 18 El, 52 RA; 275 Brin.
For pump shafts, marine hardware, valve trim, corrosion resistant.

AROSTIT C30.
M-1325; 0.4 C, 29 Cr, 1.3 Si, bal Fe.
For furnace parts and equipment, heat treat boxes; heat resistant, ferritic.

AROSTIT C30H.
M-1325; 1.2 C, 1.3 Si, 29 Cr, bal Fe.
For wear plates, rolls, crushers; corrosion and heat resistant.

AROSTIT C30N.
M-1325; 1.3 C, 1.3 Si, 29 Cr, 2 Mo, bal Fe.
For wear plates, rolls, crushers; corrosion and heat resistant.

AROSTIT C40.
M-1325; 0.4 C, 13 Cr, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 22 El; 52 RA; 200 Brin.
Cold drawn: 110,000 TS, 90,000 YS; 15 El; 45 RA; 225 Brin.
For turbine blades, gages, valve trim, cutlery; Type 420; corrosion resistant.

AROSTIT C90N.
M-1325; 0.9 C, 18 Cr, 1.15 Mo, 1 V, bal Fe.
Annealed: 107,000 TS; 62,000 YS; 18 El; 35 RA; 220 Brin.
For cutlery, valve parts, bearings, instruments; Type 440B; corrosion resistant, hardenable.

AROSTIT CK4.
M-1325; 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe.
For furnace equipment, heat treat boxes; heat resistant.

AROSTIT CK8.
M-1325; 0.15 C, 1.5 Si, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 50 El, 65 RA; 160 Brin.
For chemical plant equipment, tanks, mixers; Type 302; stainless, austenitic.

AROSTIT CK8 EXTRA.
M-1325; 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe
Annealed: 85,000 TS; 35,000 YS; 55 El, 65 RA; 150 Brin.
For welded structures, chemical plant equipment; Type 321, stainless, austenitic.

AROSTIT CK8SI.
M-1325, 0.1 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 85,000 TS, 35,000 YS, 60 El; 70 RA; 140 Brin.
For welded structures, chemical plant equipment; Type 302, stainless, austenitic.

AROSTIT CK9N
M-1325, 0.15 C, 2 Si, 2 Mo, 9.5 Ni, 18 Cr, bal Fe.
Annealed 80,000 TS, 30,000 YS; 60 El, 80 RA; 135 Brin
Cold drawn: 150,000 TS, 135,000 YS, 6 El, 300 Brin.
For acid resistant equipment, mixers, filters, agitators; Type 316; stainless, austenitic

AROSTIT CK9N EXTRA
M-1325, 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo, Ti = 4 × C, bal Fe
Annealed: 85,000 TS; 35,000 YS, 50 El; 75 RA; 160 Brin.
Cold drawn. 150,000 TS, 135,000 YS, 6 El, 30 Brin
For welded structures, chemical plant equipment; Type 316 Ti, stainless, austenitic

AROSTIT CK12.
M-1325; 0.17 max C, 17 Cr, 4.7 Mo, 13 Ni, bal Fe
Annealed: 90,000 TS; 40,000 YS; 45 El, 65 RA, 170 Brin
For acid resistant equipment, mixers, agitators, Type 317, stainless, austenitic.

ARPOCALLOY
M-1012; C, Ni, Mo, bal Fe.
For tool shanks, cast iron.

ARRESTITE
M-97; 0.9 C, 1.5 Mn, 0.2 Cr, bal Fe.
For general tools; non-deforming.

ARROW.
M-73; 0.3 C, 1.0 Cr, 0.6 Mo, 0.2 V, bal Fe.
For tools, dies; water hardening.

ARROW NO. 16.
M-341; 0.95 C, 1.2 Mn, 0.5 Cr, 0.5 W, 0.1 V, bal Fe.
For tools and dies; non-deforming oil hardening.

ARROW HIGH SPEED.
M-355; 0.7 C, 18 W, 4 Cr, 2 V, bal Fe.
For tools, dies, broaches, drills; high speed steel

ARROW OIL HARDENING.
M-336; 0.6 C, 1.5 W, 0.9 Mn, 3 Cr, IV, bal Fe.
88,800 TS; 55,100 YS; 30 El; 189 Brin.
For tools, dies, perforated dies, taps, intricate shapes; non-shrinking.

ARROW OIL HARDENING.
M-387; 0.7 C, 2 W, bal Fe
For tools, dies; oil hardened.

ARROW OIL HARDENING SWEDISH STEEL.
M-336; 0.95 C, 1.25 Mn, 0.5 Cr, 0.5 W, 0.1 V, bal Fe.
For thread gages, taps, master tools, dies; non-shrinking.

ARROW SPECIAL.
M-355; 1.1 C, bal Fe.
For tools, dies.

ARS.
M-373; 2.35 C, 12.0 Cr, 4.0 V, 1.0 Mo, bal Fe
Air or oil hardening cold work tool steel, chromium type, AISI D7

ARSENICAL ADMIRALTY 30.
M-141, 71 Cu, 1.0 Sn, 0.03 As, bal Zn.
Annealed 53,000 TS, 65 El
Drawn: 85,000 TS, 10 El
For condenser and heat exchanger, embrittlement free

ARSENICAL ADMIRALTY-443.
M-8; 71.0 Cu, 27.96 Zn, 1.0 Sn, 0.04 As
Soft: 48,000 TS, 18,000 YS, 65 El, B 25 Rock
For condenser tubes, heat exchangers.
Resists dezincification, corrosion resistant

ARSENICAL ALUMINUM BRASS 54.
M-141, 76 Cu, 2 Al, 0.03 As, bal Zn
Annealed 60,000 TS, 27,000 YS, 55 El
For condensers and heat exchangers, free of embrittlement

ARSENICAL ALUMINUM BRONZE 53
M-141, 5.5 Al, 0.25 As, bal Cu
Annealed 60,000 TS, 22,000 YS, 60 El
For condenser tubes, resists sea-water corrosion

ARSENICAL COPPER
M-33, 99.7 Cu, 0.2 As, 0.02 P
Annealed: 34,000 TS, 10,000 YS; 45 El
Drawn 55,000 TS, 50,000 YS, 8 El
For condenser, heat exchanger, boiler tubes, corrosion resisting.

ARSENIC BRONZE
U.S.; 80 Cu, 10 Sn, 9.2 Pb, 0.8 As
30,000 TS, 60 Brin
For bearings; heavy duty

ART DIE.
M-35; 0.95 C, 0.30 Cr, 0.02 V, 0.25 Mn, bal Fe
Annealed 170 Brin
For jewelers' dies; deep hardening.

ARZADE
M-14; 3 C, 1.5 Si, bal Fe
For castings; malleable cast iron.

ARZITE
M-14, 3 C, Si, Mn, bal Fe.
For gears, fittings, housings, malleable iron

ARZITE METAL.
M-14; 3.2 C, 1.5 Si, 1.5 Ni, 0.8 Cr, bal Fe.
For castings; corrosion resistant malleable iron.

ARZON METAL.
M-14, 0.90 Si, 0.85 Mn, 2.30 C, 0.09 S, 0.16 P, bal Fe.
Cast: 90,000 TS; 65,000 YS; 6 El, 200 Brin.
Treated: 100,000 TS, 80,000 YS; 5 El.
For malleable iron castings, fittings, plumbing; close grain, white fracture.

AS5.
M-1176; 1-3 Cu, 5 Si, 0.5 Mg, bal Al.
Heat treated. 50,000-57,000 TS; 40,000-46,000 YS; 5-2 El; 110-140 Brin.
For light alloy parts, age-hardenable.

A.S. NO 5.
M-694, 1.0 C, 0.7 Mn, 5 Cr, 0.25 V, 1.1 Mo, bal Fe.
For tools, dies, air hardening.

A.S NO 7
M-694; 0.45 C, 0.9 Si, 1.15 Cr, 0.2 V, 2.5 W, bal Fe.
For master hobs, shear blades, punches; Type S1, hot work steel

AS10.
M-1176; 2.0-2.5 Cu, 9.5-10.5 Si, 1.4 Mg, 0.8-1.2 Ni, bal Al
Cast: 36,000-50,000 TS; 34,000-42,000 YS; 0.5-0.3 El, 95-125 Brin
For light alloy parts; corrosion resistant.

A.S. NO 15
M-694, 0.5 C, 0.7 Mn, 0.8-1.1 Cr, 0.15 V, bal Fe.
For dies, pressure resisting steel

A.S NO 27
M-694, 0.95-1.1 C, 0.3 Mn, 1.5 Cr, 0.2 V, bal Fe
For tools, dies, pressure resistant steel.

A.S NO. 42.
M-694, 0.3 C, 0.2 Mn, 3.5 Cr, 9.75 W, 0.5 V, bal Fe
For hot dies, hot work steel

A.S NO 46 GREEN LABEL
M-694, 0.9 C, 1.1 Mn, 0.5 Cr, 0.5 W, 0.2 V, bal Fe
For gages, spindles, punches, forming and trimming dies, Type O1, non-deforming, oil hardened.

A.S NO 66
M-694 0.8 C, 4 Cr, 2 V, 4-5 Mo, 6 W, bal Fe.
For lathe and planer tools, drills, form cutters, hot punches, high speed steel

A.S NO 85
M-694, 0.55 C, 0.4 Mn, 0.3 Si, 1.0 Cr, 3.0 Ni, 0.3 Mo, bal Fe
Oil hardening steel for shafts, lathe centers, tool holders

A.S NO 121
M-694, 0.95 C, 2.0 Mn, 2.2 Cr, 1.1 Mo, bal Fe.
Air hardening, medium alloy tool steel, for cold working tools; AISI A4.

A.S NO 670
M-694, 0.38 C 1.0 Si, 5.25 Cr, 1.05 V, 1.25 Mo, bal Fe
Air hardening hot work tool and die steel, chromium type, AISI H 13

A.S ACK-LOW
M-694, 0.70 C, 2.1 Mn, 1.0 Cr, 1.3 Mo, bal Fe
Air hardening cold work tool steel
AISI A6

ASARCOLO 117
M-815, 23 Pb, 5 Cd, 45 Bi, 8 Sn, 19 In.
Cast 5400 TS, 12 Brin
For hermetic seals, heat transfer medium, fusible cores; M.P 117

ASARCOLO 158.
M-815, 27 Pb, 10 Cd, 50 Bi, 13 Sn
6000 TS, 9 Brin
For foundry cores, pipe bending, for anchoring; M.P 158°F; fusible alloy.

ASARCOLO 158-162.
M-815; 50 Bi, 25 Pb, 12.5 Cd, 12.5 Sn.
For fire protection devices; fusible alloy; M.P. 158-162°F.

ASARCOLO 158-190.
M-815; 42.5 Bi, 37.7 Pb, 11.3 Sn, 8.5 Cd.
5500 TS; 9 Brin.
For foundry patterns, coating core boxes, spotting fixtures; M.P. 158-190°F; fusible alloy.

ASARCOLO 205.
M-815; 52 Bi, 32 Pb, 16 Sn.
For fire protection devices; fusible alloy; M.P. 205°F.

ASARCOLO 205-215.
M-815, 50 Bi, 31 Pb, 19 Sn.
For fire protection devices; fusible alloy; M.P. 205-215°F.

ASARCOLO 217-440.
M-815, 28.5 Pb, 14.5 Sn, 9 Sb, 48 Bi.
13,000 TS, 19 El.
For anchoring punches in stamping dies, making chuck jaws; M.P. 217-440°F, fusible alloy.

ASARCOLO 243-260.
M-815, indium alloy.
For soldering and sealing; M.P. 243-260°F, fusible alloy.

ASARCOLO 255
M-815, 45 Pb, 55 Bi.
6400 TS; 10 Brin.
For foundry molds, dies, proof casting cavities, M.P. 255°F, fusible alloy.

ASARCOLO 255-300.
M-815; 50 Bi, 50 Pb
For fire protection devices; fusible alloy, M.P. 255-300°F.

ASARCOLO 281
M-815, 58 Bi, 42 Sn
8000 TS; 22 Brin.
For molds and patterns; M.P. 281°F; fusible alloy

ASARCOLO 281-338
M-815, 40 Bi, 60 Sn.
8000 TS; 22 Brin
For soldering and sealing, M.P. 281-338°F; fusible alloy

ASARCOLO 362
M-815, 38 Pb, 62 Sn.
For fire protection devices; fusible alloy; M.P. 362°F

ASARCOLOY NO 7.
M-314, 0.75-3.0 Ni, bal Cd
Cast: 164,000 TS; 117,000 YS, 19 El, 43 RA; 33 Brin
For bearings, for severe service

ASARCON 3
M-815, M-314, 4.15 Al, 0.5 Mg, bal Zn.
Die Cast: 40,000 TS, 63,000 CS; 8 El, 80 Brin
For die castings, hardware, door knobs, instrument cases, coin chutes, ornaments.
High fluidity and castability.

ASARCON 7.
M-815, M-314; 3.5-4.3 Al, 0.25 max Cu, 0.010-0.020 Mg, 0.005-0.020 Ni, 0.003 max Cd, bal Zn
Die Cast 41,000 TS; 14 El, 76 Brin
For die castings, hardware, instrument cases, ornaments, coin chutes.
High fluidity and castability

ASARCON 55.
M-314, M-815; 5 Sn, 5 Pb, 5 Zn, 85 Cu.
Cast: 43,000 TS; 21,400 YS; 28 El; 72 Brin.
For water pump impellers, bushings, fittings; SAE 40; leaded red brass.

ASARCON 59.
M-314, M-815; 5 Sn, 9 Pb, 1 Zn, bal Cu.
Cast: 38,000 TS; 21,000 YS; 20 El; 66 Brin.
For bearings, bushings, sleeves, SAE 66; leaded bronze.

ASARCON 61.
M-314, M-815; 6 Sn, 1.5 Pb, 4.5 Zn, 88 Cu
Cast: 45,000 TS; 23,000 YS; 35 El; 76 Brin.
For gears, bearings, bushings; SAE 622, continuous cast.

ASARCON 77.
M-314, M-815, 7 Sn, 7 Pb, 3 Zn, 83 Cu.
Cast 40,000 TS; 27,000 YS; 16 El, 72 Brin
For bearings, spring bushings, thrust washers, SAE 660; leaded bronze

ASARCON 80.
M-314, M-815; 8 Sn, 4 Zn, 88 Cu
Cast. 49,000 TS, 23,000 YS, 18 El; 77 Brin.
For gears, bearings, sleeves; SAE 620, hard bronze

ASARCON 100
M-314, M-815, 10 Sn, 2 Zn, 88 Cu
Cast 51,000 TS, 28,000 YS, 18 El, 92 Brin
For gears, bearings, liners, sleeves, SAE 62, hard bronze

ASARCON 102
M-314, M-815, 10 Sn, 2 Pb, 88 Cu
Cast 49,000 TS, 25,000 YS, 18 El, 86 Brin
For bushings, bearings, sleeves, SAE 63, leaded gun metal

ASARCON 102N
M-314, 84 Cu, 10 Sn, 2.5 Pb, 3.5 Ni, bal Zn
Cast 53,000 TS, 31,000 YS, 15 El, 92 Brin
For hardware, marine parts, liners, free-cutting, leaded bronze

ASARCON 110
M-314, M-815 11 Sn, 89 Cu
Cast: 51,000 TS, 29,000 YS, 18 El, 100 Brin
For gears, worms, shafts, Al-bronze, continuous cast

ASARCON 210
M-314, M-815, 2.5 Sn, 10 Pb, 7.5 Zn, 80 Cu
Cast: 34,000 TS, 18,000 YS, 22 El, 62 Brin
For bearings, bushings, liners; leaded bronze

ASARCON 230
M-815, M-314, 1.5-2.5 Sn, 27.0-35.0 Pb, 0.25-0.75 Ni, bal Cu
Cast 16,300 TS, 9000 YS, 10 El, 30 Brin
For self-lubricating bearings, bushings and seals, jet engine fuel pumps
Leaded bronze Free-machining

ASARCON 310 N
M-314, M-815, 77 Cu, 3 Sn, 10 Pb, 8 Zn, 2 Ni
Cast 48,000 TS; 28,000 YS, 8 El, 80 Brin
For bearings Continuous cast.

ASARCON 520.
M-314, M-815, 5 Sn, 20 Pb, 75 Cu
Cast: 28,700 TS, 22,800 YS, 8 El, 57 Brin
For bearings, bushings, liners, leaded bronze.

ASARCON 773
M-314, M-815, 7 Sn, 7 Pb, 3 Zn, 83 Cu
Cast 40,000 TS; 27,000 YS, 16 El, 72 Brin
For bearings, bushings, liners, SAE 660, leaded bronze.

ASARCON 1010.
M-314, M-815; 10 Sn, 10 Pb, 80 Cu.
Cast: 41,000 TS, 26,000 YS, 10 El; 80 Brin.
For bearings, bushings, liners; SAE 64 leaded bronze.

ASARCON 1010B.
M-815; 10 Sn, 10 Pb, bal Cu.
Cast: 45,000 TS; 29,000 YS; 5 El; 93 Brin.
For gears, bearings, bushings, shafts; continuous cast

ASARCO ZDC NO 7.
M-815, M-314; 3.5-4.3 Al, 0.25 max Cu,
0.005-0.020 Mg, 0.005-0.020 Ni, 0.003 max Cd,
bal Zn.
Die Cast. 41,000 TS; 10 El, 82 Brin.
For hardware, housings, instrument cases.
Die castings.

A.S BEARCAT.
M-694, 0.50 C, 0.70 Mn, 3.25 Cr, 1.4 Mo, bal Fe
Air or oil hardening tool steel; good resistance
to impact, AISI S7.

A.S BLUE LABEL
M-694, 1.0-1.1 C, 0.25 Mn, 0.25 Si, bal Fe
For taps, drills, reamers, hobs, broaches;
Type W1, water hardened

A.S BRAKE & DIE STEEL
M-694; 0.50 C, 1 Cr, 0.9 Mn, 0.2 Mo, bal Fe.
For press brakes for forming and bending,
resists shock and wear

ASC #1.
M-569, 0.25-0.30 C, 0.70 Mn, 0.40 Si, bal Fe
Ann 70,000 TS, 40,000 YS, 24 El, 150 Brin
Uses castings for construction, railroad

ASC #2
M-569; 0.40-0.50 C, 0.70 Mn, 0.40 Si, bal Fe
Ann 80,000 TS, 40,000 YS, 18 El, 170 Brin
Uses castings for dies
Flame hardenable, wear resistant

ASC #3
M-569, 0.60-0.80 C, 0.70 Mn, 0.40 Si, bal Fe
Norm & Temper 110,000 TS, 60,000 YS, 10 El,
190 Brin
Uses castings for dies
Flame hardenable, wear resistant

ASC #5
M-569, 0.20 C, 0.70 Mn, 0.50 Si, 1.5 Cr,
1.1 Mo, bal Fe
Norm & Temper 70,000 TS, 40,000 YS, 20 El,
160 Brin
Uses Turbine casings and supports
High temp steel castings

ASC #6
M-569, 0.18 C, 0.60 Mn, 2.5 Cr, 1.1 Mo, bal Fe
Norm & temper. 70,000 TS, 40,000 YS, 20 El,
160 Brin.
Uses Turbine casings and supports
High temp steel castings

ASC #7
M-569, 0.25 C, 0.60 Mn, 0.50 Si, 0.60 Mo, bal Fe.
Norm & Temper. 70,000 TS, 45,000 YS, 22 El,
160 Brin
Uses Turbine casings and supports.
High temp steel castings

ASC #8
M-569, 0.30 C, 1.30 Mn, 0.50 Si, 0.40 Mo, bal Fe
Norm & Temper 90,000 TS, 60,000 YS, 180 Brin
Quenched. 200,000 TS, 150,000 YS, 400 Brin
High strength castings—dies
Weldable, water hardenable.

ASC #11
M-569; 0.40 C, 1.15 Mn, 0.40 Si, 1.15 Cr,
0.40 Mo, bal Fe
Physicals depend on heat treatment.
High strength castings.
Similar to wrought AISI 4140.

ASC #15.
M-569; 0.40 C, 1.15 Mn, 0.40 Si, 1.15 Cr,
1.75 Ni, 0.40 Mo, bal Fe.
Physicals depend on heat treatment
High strength castings—dies.
Similar to wrought AISI 4340

ASC-B10
M-1248, 0.4 Be, 2.6 Co, bal Cu
Annealed· 50,000 TS; 25,000 YS; 30 El; 50 RA;
70 Brin
Aged 125,000 TS; 105,000 YS, 8 El, 10 RA;
240 Brin
For current carrying springs, switch parts;
heat treatable, corrosion and wear resistant.

ASC-B25
M-1248, 1.9 Be, 0.3 Co, bal Cu
Annealed. 75,000 TS, 30,000 YS, 50 El, 70 RA;
80 Brin
Aged 205,000 TS, 170,000 YS, 1 El, 3 RA,
380 Brin
For electrical contacts, springs, diaphragms;
age hardenable, corrosion resistant

ASC B165
M-1248, 1.7 Be, 0.2-0.35 Co, bal Cu
Annealed 60,000 TS, 28,000 YS, 60 El,
79 Brin
Aged 200,000 TS, 185,000 YS, 1 El, 410 Brin.
For electrical contacts, springs, slips, diaphragms,
heat treatable, corrosion and wear resistant

ASCO
M-351, 1.7-1.2 C, bal Fe
For general tools, water hardening

ASCOLOY NO 66
M-1, 0.12 C, 0.43 Si, 0.40 Mn, 18.5 Cr, bal Fe.
Hot rolled 65,000-85,000 TS, 45,000-55,000 YS;
35-25 El, 60 RA, 150-160 Brin
For furnace parts, changed to "Allegheny No 66";
corrosion and heat resistant

A.S CROMAT V
M-694, 0.35 C, 1.05 Si, 5.15 Cr, 0.3 V, 1.25 W,
1.55 Mo, bal Fe
Hot work tool steel for forging and
hot forming dies, chromium type, AISI H 12

ASCULOY
M-158, Si, Cu, bal Al
For die castings

A.S DURAMOLD B
M-694, 0.07 C, 0.3 Mn, 0.15 Si, 1.0 Cr,
0.25 Mo, B, bal Fe
For cold hubbing and case hardening for
plastic molds AISI P 2

ASH-21
M-1249, 3.0-3.6 C, 4.0-4.75 Ni, 1.4-3.5 Cr, 0.4-0.7 Si,
bal Fe
Sand cast 45,000 TS; 600 Brin
Permanent mold 55,000 TS, 675 Brin
For cams, dies, rollers, bearing races,
white cast iron, corrosion resistant, hard

ASHBERRY METAL-A
Eng., 80 Sn, 1 Zn, 14 Sb, 2 Cu, 2 Ni, Al
For tableware and utensils, same as "Brittania"

ASHBERRY METAL-B
Eng., 78-80 Sn, 0-2.8 Zn, 14-19 Sb, 0-3 Cu.
For utensils, bearings, Babbitt.

ASHBERRY METAL-C.
Eng., 80 Sn, 14 Sb, 2 Cu, 1 Zn, 3 Ni.
For utensils, bearings, Babbitt.

ASHBERRY METAL-D.
Eng.; 79 Sn, 15 Sb, 3 Cu, 2 Zn, 1 Ni.
For utensils, bearings; Babbitt.

A.S. HOBBING IRON.
M-694; 0.05 C, 0.1 Mn, bal Fe.
For tools, hobbing molds; case-hardened.

A.S. HOLLOW DIE.
M-694; 1.0 C, 0.4 Mn, 1.5 Cr, 0.2 bal Fe.
For dies; tough.

A.S. HOT DIE.
M-694; 0.45 C, 0.9 Si, 1.15 Cr, 0.25 V, 2.5 W, bal Fe.
For hot header dies, forming tools, piercers; hot work steel, oil hardened.

A.S LUSTRE-DIE
M-694, 0.50 C, 1.0 Mn, 0.3 Si, 1.1 Cr, 0.25 Mo, bal Fe.
Oil hardening steel for arbors, shafts, lathe centers.

ASM-122.
M-1646, 0.25 max C, 13 Cr, 0.5 Mo, bal Fe.
Annealed: 95,000 TS, 50,000 YS; 25 El; B 92 Rock.
For cutlery, surgical instruments, gauges, needle valves, bearings
Corrosion resistant, hardenable, heat treatable.

ASM-123.
M-1646; 0.30 max C, 13 Cr, 0.25 Mo, 1.25 Ni, bal Fe.
Annealed: 98,000 TS, 52,000 YS, 22 El, B 95 Rock
For bearings, cutlery, gauges, needle valves, surgical instruments
Corrosion resistant, hardenable

A.S NICKEL-CHROME HOBBING STEEL
M-694; 0.10 C, 0.5 Mn, 0.6 Cr, 1.25 Ni, bal Fe
For tools, hobbing molds, case-hardened

ASR 1.
French, 0.36 C, 18 Cr, 9 Ni, 10 W, 2 Ti, 12 Co, bal Fe
For gas turbine components, heat and creep resistant

ASR 2
French, C, 18 Cr, 8 Ni, 10 W + Co, bal Fe
For gas turbines; heat, creep and oxidation resistant

A.S SPECIAL HOBBING IRON
M-694; 0.05 C, 0.10 Mn, 0.10 Si, bal Fe
For cold hubbing, can be case hardened for molds. AISI P1.

ASTAR 811-C.
M-118; 8 W, 1 Re, 1 Hf, 0.025 C, bal Ta
For space power systems utilizing liquid alkali metals as coolants.
High creep resistance, good ductility and weldability.

ASTRA
M-1405, 0.55 C, 2 W, 0.5 Si, 1.0 Cr, bal Fe
For cold punches, shears, piercers; oil hardened, tough

ASTRALLOY.
M-24, M-97; 0.25 C, 3.5 Ni, 1.4 Cr, 0.28 Mo, bal Fe
Normalized Plate 241,000 TS, 157,000 YS; 11.7 El, 39 RA, C 47 Rock
Quenched: 250,000 TS, 191,000 YS; 30 El; 39 RA.
For shafts, abrasion-resistant parts, coal mine chutes and hoppers.
High impact strength, tough, wear resistant, good weldability.

ASTRALLOY Gr. 1.
M-24, M-176; 0.23-0.27 C, 0.7-1.0 Mn, 0.02 max P & S, 3.25-3.75 Ni, 1.25-1.75 Cr, 0.2-0.3 Mo, bal Fe.
Normalized: 241,000 TS; 157,000 YS, 39 RA; 477 Brin.
Quenched: 250,000 TS; 190,000 YS; 39 RA.
For paper and mining industry equipment, coal mine chutes and hoppers.
High toughness and ductility. Good weldability. Abrasion resistant.

ASTRALLOY Gr. 2.
M-24, M-176; 0.29-0.33 C, 0.7-1.0 Mn, 0.02 S & P, 3.25-3.75 Ni, 1.25-1.75 Cr, 0.2-0.3 Mo, bal Fe.
Normalized: 250,000 TS, 160,000 YS; 35 RA; 500 Brin.
For paper and mining industry equipment, coal mine chutes and hoppers.
High toughness and ductility. Good weldability, abrasion resistant

A.S TRI-ACK
M-694; 1.5 C, 0.3 Mn, 12 Cr, 0.2 V, 0.8 Mo, bal Fe
For dies, air hardening, nondeforming

A.S. TRI-Mo
M-694, 1.5 C, 12 Cr, 0.20 V, 0.8 Mo, bal Fe.
For threading dies, cutting tools, punches, dies; non-deforming

ASTROLOY
M-1490; 0.05 C, 15 Cr, 17 Co, 5 Mo, 3.5 Ti, 4 Al, 0.06 Zr, bal Ni.
At R.T.: 190,000 TS, 130,000 YS, 15 El
For turbine wheels and blades, jet engine components, nozzles, compressor discs
High heat and corrosion resistance
High creep and stress-rupture strength

A.S.V
M-57, 0.7 C, bal Fe
For tools, cutters, water hardened

A.S. WHITE LABEL
M-694, 1.1 C, 0.2 V, bal Fe
For blanking and forming dies, plug gauges, water hardened

A.T. 2 DIE
M-140, 2.2 C, 12 Cr, 0.25 V, 0.90 Mo, bal Fe
For blanking and forming dies, gauges, oil hardened, non-deforming

AT-3
M-Russia, 3.2 Al, 0.84 Cr, 0.40 Fe, 0.34 Si, 0.01 B, bal Ti
At 70°F 126,000 TS, 122,000 YS, 16 El, 52 RA
At 750°F 84,000 TS, 80,000 YS, 16 El, 67 RA
At 1110°F 62,000 TS, 60,000 YS, 21 El, 86 RA
For aircraft structures, high temperature fasteners
Pseudoalpha alloy. Corrosion resistant

AT-4
M-Russia, 4.4 Al, 0.79 Cr, 0.60 Fe, 0.40 Si, 0.01 B, bal Ti
At 70°F 147,000 TS; 146,000 YS, 12 El, 41 RA
At 750°F 100,000 TS, 92,000 YS; 15 El, 55 RA
At 1110°F 58,000 TS, 55,000 YS, 28 El, 84 RA.
For high temperature fasteners, aircraft structures.
Pseudoalpha alloy. Corrosion resistant.

AT-6
M-Russia, 5.8 Al, 0.64 Cr, 0.38 Fe, 0.32 Si, 0.01 B, bal Ti
At 70°F: 162,000 TS, 157,000 YS, 13 El, 36 RA
At 750°F. 102,000 TS, 91,000 YS, 12 El, 58 RA.
At 1110°F 90,000 TS; 84,000 YS; 20 El; 78 RA.
For high temperature fasteners, aircraft structures
Corrosion resistant.

AT-8.
M-Russia; 6.5 Al, 0.73 Cr, 0.39 Fe, 0.4 Si, 0.01 B, bal Ti
At 70°F: 162,000 TS, 156,000 YS; 15 El; 38 RA
At 750°F 119,000 TS, 109,000 YS, 10 El, 47 RA.
At 1110°F: 82,000 TS; 74,000 YS, 16 El; 67 RA.
For airplane structures, high temperature fasteners
Corrosion resistant.

ATG-M.
M-104; 35 Ni, 20 Cr, bal Fe.
For gas engine and turbine discs; heat resistant.

ATGS.
French; 0.10 C, 75 Ni, 20 Cr, 2 Ti, 2 Al.
For gas turbine components; heat and oxidation resistant.

ATHA NO. 2600.
M-38; 0.4 C, 22 Ni, 8 Cr, 1.75 Si, 1 Cu, bal Fe.
For furnace parts, heat treating boxes, acid tanks; heat resistant.

ATHA CHROME ROLL.
M-38; 0.9 C, 1.35 Cr, bal Fe.
For rolls for tire rims, drawing dies; oil hardening

ATHA PNEU.
M-38, 0.50 C, 2.75 W, 1.25 Cr, 0.25 V, bal Fe.
For pneumatic chisels, rivet busters, hot work steel.

ATHA RIM ROLL.
M-38; 1.0 C, 0.5 Cr, bal Fe.
For forming rolls; water hardening.

ATHOS
Eng., 22 Ni, 8 Cr, 1.75 Si, 1.0 Cu, 0.7 Mn, ≯0.5 C, bal Fe
For stainless parts; heat and corrosion resistant

ATLAN.
M-353; 0.90 C, 0.50 Cr, 1.15 Mn, 0.5 W, bal Fe.
For tools, cutters, drawing dies; non-deforming

ATLAN H.C.C. DIE
M-353, 1.5 C, 12 Cr, 1 V, 0.8 Mo, bal Fe
For tools, blanking dies; non-deforming.

ATLAN NON-SHRINK DIE
M-353, 0.9 C, 1.5 Mn, bal Fe.
For tools, dies; non-deforming.

ATLANTALOY NO. 10.
M-695; 58 Cu, 1 Sn, 0.9 Pb, bal Zn
Cast: 51,000 TS, 27,000 YS, 12 El, 100 Brin.
For brush boxes, gears, levers, yellow brass, free-cutting.

ATLANTALOY NO 12.
M-695, 56.7 Cu, 40 Zn, 1.2 Al, 0.75 Fe, 0.9 Mn
Cast 81,000 TS, 22 El; 111 Brin.
For castings, instrument parts, plaster mold

ATLANTALOY NO 20.
M-695, 82.5 Cu, 11.2 Al, 5 Fe, 1.2 Mn
Cast: 74,500 TS, 41,500 YS; 7 El, 160 Brin
For castings, instrument parts, plaster mold, corrosion resistant

ATLANTALOY NO. 21.
M-695, 89 Cu, 10 Al, 1 Fe.
Cast: 79,300 TS; 34,900 YS, 22 El; 156 Brin
For castings, plaster mold

ATLANTALOY NO. 22.
M-695, 91 Cu, 7 Al, 2 Si.
Cast 61,400 TS, 44.5 El; 95 Brin
For castings; plaster mold.

ATLANTALOY NO. 23.
M-695, 79 Cu, 11 Al, 5 Fe, 5 Ni
Cast. 77,600 TS; 55,500 TS, 5.5 El, 190 Brin.
For castings; plaster mold

ATLANTALOY NO. 24.
M-695; 86.75 Cu, 8.5 Al, 3.5 Fe, 1.25 Mn,
Cast. 66,200 TS; 28 El.
For castings; plaster mold.

ATLANTALOY NO. 25.
M-695; 78 Cu, 10.5 Al, 4 Fe, 1.25 Mn, 4 Ni,
Heat treated: 100,000 TS; 60,000 YS; 4 El.
For gears, fiixtures, hardware, machine parts; Al-bronze, heat treatable.

ATLANTALOY NO. 31.
M-695; 65 Cu, 5 Al, 2.5 Fe, 5 Mn, bal Zn.
Cast: 110,000 TS; 72,000 YS; 10 El; 205 Brin.
For gears, valve bodies, marine hardware; manganese bronze.

ATLANTALOY NO. 40.
M-695; 0.8 Cu, 8 Zn, bal Al.
Cast: 26,300 TS, 19,500 YS, 6 El.
For gears, housings, gear cases; natural aging alloy.

ATLANTALOY NO. 42.
M-695; 91 Cu, 3.25 Al, 1.25 Fe, 4.5 Si.
Cast: 65,800 TS; 42,800 YS; 10 El; 121 Brin.
For castings; plaster mold.

ATLANTALOY NO 60.
M-695; 1.3 Cu, 93.2 Al, 0.5 Mg, 5.0 Si.
Cast: 16,000 TS; 15,000 YS; 1.0 El.
For castings; plaster mold.

ATLANTIC.
M-353, 0.5 C, 18 W, 4 Cr, 1 V, 0.15 Mo, bal Fe.
For tools, cutters, high speed steel.

ATLANTIC NO 33.
M-353, 0.33 C, 0.75 Cr, 0.75 Mo, 0.75 Cu, bal Fe.
Heat treated: 135,000 TS, 116,000 YS; 18 El; 54 RA; 277 Brin.
For chisels, dies, blacksmith tools, hot work tools; water hardened, non-tempering.

ATLANTIC 33C.
M-353, 0.33 C, 0.76 Cr, 0.5 Co, 0.75 Mo, 0.75 Cu, bal Fe.
For rivet sets, pneumatic tools, blacksmith tools; nontempering, water hardening

ATLANTIC 44.
M-353, 0.44 C, 0.75 Cr, 0.4 Mn, 0.75 Mo, 0.6 Si, 0.7 Cu, bal Fe
For dies, shear blades, pneumatic tools; tough, shock resistant.

ATLANTIC C.
M-353, 0.65 C, 4 Cr, 4 Co, 18 W, 1 Mo, bal Fe.
For shaping tools, millers, cutters; high speed steel.

ATLANTIC N.T.
M-353, 0.40 C, 0.4 Mn, 0.65 Si, 1.0 Cr, 0.5 Ni, 0.75 Mo, 0.5 Cu, bal Fe.
Shock resisting tool steel.

ATLANTIC STANDARD.
M-353, 0.8-1.2 C, 0.25 Si, 0.25 Mn, bal Fe.
Water Hardened 166-000-216,000 TS, 110,000-150,000 YS; 11-15 El, 32-37 RA; 330-600 Brin.
For taps, drills, reamers, punches, stamps, knurls, mandrels
Type W1 water hardening

ATLANTIC "V."
M-353; 0.8 C, 4.25 Cr, 2 V, 18.5 W, 0.65 Mo, bal Fe.
For cutting tools, high speed steel.

ATLAS 4-79
M-435; 0.06 max C, 78-80 Ni, 0.85 Co, 0.3-0.8 Mn, bal Fe
For communication and telephone equipment; high permeability.

ATLAS 12-12
M-435, 0.12 max C, 12-14 Cr, 12-14 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 50 El; 60 RA; 135 Brin
For cutlery, valves, low rate of work hardening.

ATLAS 20.
M-435, 0.08 max C, 2 Mn, 19-21 Cr, 2-3 Mo, 27-30 Ni, 3-4 Cu, bal Fe.
For chemical and paper industries; high resistance to H_2SO_4.

ATLAS 40.
M-435; 0.24 C, 1.2 Cr, 0.26 Mo, 3.5 Ni, 1.2 Al, bal Fe.
For plastic molds, die casting dies; precipitation hardening.

ATLAS 45% Ni ALLOY.
M-435; 0.06 max C, 0.4-1.0 Mn, 43.5-46.5 Ni, 0.6 max Co, bal Fe.
½ Hard: 140,000 TS; 128,000 YS, 1.5 El; 331 Brin.
For telephone equipment; high permeability and high induction.

ATLAS NO. 50.
M-76; 0.35-0.40 C, 9.5-11.0 W, 3.5 Cr, 0.40 V, bal Fe
At 750°F: 238,500 TS; 3.5 El; 17 RA.
At 1400°F: 32,000 TS; 35.5 El; 89.8 RA.
For hot nut tools, hot header punches and swedging dies, forming dies; hot die steel, oil hardened; see Atlas Hot Die

ATLAS NO 50A.
M-1; 0.3 C, 3.5 Cr, 9 W, 0.4 V, bal Fe
For hot work tools, punches, hot work tool steel.

ATLAS NO. 50B
M-1, 0.4 C, 3 Cr, 11 W, 0.5 V, bal Fe.
For hot work tools, punches; hot work tool steel

ATLAS NO 57.
M-696; 82 Cu, 11 Sn, 3.5 Zn, 0.5 Pb, 3.0 Ni-Sn hardener
For gears, bearings; wear resistant.

ATLAS 78½ Ni ALLOY.
M-435, 0.06 max C, 77.5-79.5 Ni, 0.6 max Co, bal Fe
Annealed 86,000 TS, 35,000 YS, 41 El; 130 Brin
For communication circuits, high permeability.

ATLAS NO 83A
M-696, 85 Cu, 2 Sn, 5 Zn, 8 Pb.
For gears, worms, nuts, bearings

ATLAS 89F-123
M-13, 88.7 Cu, 10 Al, 1.0 Fe, 0.30 special elements
80,000-95,000 TS; 42,000-55,000 YS, 12-15 El, 13-17 RA, 160-180 Brin
For gears, bearings; heat treatable

ATLAS 90
M-13, 90 Cu, 10 Al
Cast 70,000 TS, 28,000 YS; 25 El, 25 RA, 120 Brin
For gears, corrosion resistant

ATLAS 93.
M-1; 0.55 C, 0.55 Mn, 0.2 Si, 0.7 Cr, 0.4 Mo, bal Fe
Shock resisting tool steel

ATLAS 301
M-435, 0.15 max C, 16-18 Cr, 6-8 Ni, bal Fe.
Annealed 110,000 TS, 40,000 YS, 60 El, 70 RA, 165 Brin.
For doctor blades and springs, auto and furniture trim, high strength and wear resistance, stainless

ATLAS 302
M-435; 0.08-0.20 C, 17-19 Cr, bal Fe.
Annealed 80,000 TS; 35,000 YS; 50 El, 70 RA, 150 Brin.
For chemical plant equipment, Type 302, stainless, austenitic

ATLAS 303.
M-435; 0.15 max C, 17-19 Cr, 8-10 Ni, 0.07 min Se, 0.09-0.17 P, bal Fe.
Annealed: 90,000 TS; 45,000 YS, 40 El, 60 RA; 170 Brin.
For screw machine products, shafts, fasteners; Type 303; stainless, free-cutting

ATLAS 304.
M-435, 0.08 max C, 2 max Mn, 18-20 Cr, 8-10 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 160 Brin.
Cold drawn: 180,000 TS; 125,000 YS; 10 El, 330 Brin.
For architectural molding and trim, kitchen equipment, chemical plant equipment; Type 304; stainless, austenitic

ATLAS 305.
M-435, 0.12 max C, 16-19 Cr, 8-11 Ni, bal Fe.
Annealed 85,000 TS, 38,000 YS; 50 El; 60 RA; 140 Brin.
For spinning, cold heading and drawing operations; low rate of work hardening, stainless

ATLAS 308
M-435, 0.08 max C, 19-21 Cr, 10-12 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS, 50 El; 60 RA; 150 Brin
For welding rods, heat and corrosion resistant

ATLAS 310
M-435, 0.25 max C, 2 max Mn, 24-26 Cr, 19-22 Ni, bal Fe
Annealed 100,000 TS, 45,000 YS; 50 El; 65 RA, 185 Brin
For furnace parts and equipment, heat treat boxes, baffles, Type 310, heat resistant, austenitic

ATLAS 316
M-435, 0.10 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo bal Fe.
Annealed 80,000 TS, 30,000 YS, 60 El, 80 RA, 150 Brin
Cold drawn: 150,000 TS, 135,000 YS, 6 El, 300 Brin
For chemical plant equipment, tanks, evaporators, valve trim, Type 316, stainless, austenitic

ATLAS 317
M-435, 0.10 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, bal Fe
Annealed 90,000 TS, 40,000 YS, 45 El, 160 Brin
For chemical plant equipment, tanks, high corrosion resistance

ATLAS D319.
M-435, 0.07 max C, 2 Mn, 17.5-19.5 Cr, 2.25-3.0 Mo, 13-15 Ni, bal Fe
For pulp and paper industry, high corrosion resistance.

ATLAS 321
M-435, 0.08 max C, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe
Annealed: 85,000 TS, 33,000 YS, 58 El, 75 RA, 180 Brin
Cold drawn. 95,000 TS, 60,000 YS, 40 El, 60 RA; 190 Brin
For welded structures, chemical plant equipment, tanks, Type 321, stainless, stabilized

ATLAS 330.
M-435, 0.25 max C, 14-16 Cr, 33-36 Ni, bal Fe
Annealed: 80,000 TS, 40,000 YS; 30 El, 30 RA; 185 Brin
At 1800°F: 147,000 TS, 43 El; 40 RA.
For furnace parts and equipment, cracking units, fixtures, Type 330, heat resistant, austenitic.

ATLAS 331.
M-435; 0.08 max C, 19-21 Cr, 30-34 Ni, bal Fe
Annealed: 95,000 TS, 45,000 YS; 45 El, 60 RA; 160 Brin
For carburizing boxes, heater tubing, nitriding fixtures, good resistance to thermal shock.

ATLAS 347.
M-435; 0.08 max C, 17-19 Cr, 9-12 Ni, Cb = 10 × C, bal Fe
Annealed: 90,000 TS; 35,000 YS; 50 El, 65 RA, 160 Brin.
Cold drawn: 100,000 TS; 65,000 YS; 40 El; 60 RA; 212 Brin.
For welded structures, chemical plant equipment; Type 347; stainless, stabilized.

ATLAS 403.
M-435; 0.15 max C, 11.5-13.5 Cr, bal Fe.
Annealed: 75,000 TS, 40,000 YS, 34 El, 72 RA, 155 Brin
Heat treated: 215,000 TS; 140,000 YS; 14 El; 54 RA; 415 Brin.
For dental and surgical instruments, valves, cutlery; Type 403; corrosion resistant, hardenable.

ATLAS 405
M-435, 0.08 max C, 11.5-13.5 Cr, 0.10-0.30 Al, bal Fe
Sub-annealed. 65,000 TS, 40,000 YS; 20 El, 50 RA; 165 Brin
For mufflers, oil refinery equipment, annealing boxes; creep resistant

ATLAS 410.
M-435, 0.15 max C, 11.5-13.5 Cr, bal Fe
Annealed 75,000 TS, 40,000 YS; 35 El, 70 RA, 155 Brin
Cold drawn. 100,000 TS; 85,000 YS, 60 El, 205 Brin
For flat springs, tableware, valve parts, turbine blades, Type 410, corrosion resistant, hardenable

ATLAS 416
M-435, 0.15 max C, 12-14 Cr, 0.18-0.35 S, bal Fe
Annealed 75,000 TS, 40,000 YS, 30 El, 60 RA, 155 Brin
Heat treated. 110,000 TS, 85,000 YS, 18 El, 55 RA; 230 Brin
For screw machine products, shafts, valve trim, Type 416, corrosion resistant, free-cutting

ATLAS 420
M 435, 0.15 min C, 12-14 Cr, bal Fe
Annealed 95,000 TS, 50,000 YS, 25 El, 55 RA, 196 Brin
Cold drawn 105,000 TS, 85,000 YS; 17 El, 50 RA, 215 Brin
For cutlery, surgical instruments, valve trim, Type 420, corrosion resistant, hardenable.

ATLAS 420F
M-435; 0.15 min C, 12-14 Cr, 0.18-0.35 S, bal Fe
Annealed 95,000 TS, 50,000 YS, 20 El, 50 RA, 196 Brin
Cold drawn 105,000 TS, 85,000 YS, 15 El; 45 RA, 215 Brin
For cutlery, surgical instruments, screw machine products, Type 420 F, corrosion resistant, free-cutting

ATLAS 430
M-435, 0.12 max C, 14-18 Cr, bal Fe
Annealed 70,000 TS, 40,000 YS; 30 El, 55 RA; 160 Brin
Cold drawn: 130,000 TS, 120,000 YS; 2 El, 190 Brin.
For oil refinery and chemical plant equipment, hardware, bolts; Type 430, corrosion resistant

ATLAS 431
M-435; 0.2 max C, 15-17 Cr, 1.2-2.5 Ni, bal Fe
Annealed 95,000 TS, 50,000 YS, 20 El; 50 RA; 195 Brin.
For oil refinery and chemical plant equipment; Type 431; corrosion resistant.

ATLAS 440A.
M-435; 0.6-0.75 C, 16-18 Cr, 0.75 max Mo, bal Fe.
Annealed: 95,000 TS; 55,000 YS; 20 El; 240 Brin.
Heat treated: 275,000 TS; 240,000 YS; 2 El; 555 Brin.
For bearings, cutlery, surgical instruments, pivots; Type 440A; corrosion resistant, hardenable.

ATLAS 440B.
M-435; 0.75-0.95 C, 16-18 Cr, 0.75 max Mo, bal Fe.
Annealed: 107,000 TS; 62,000 YS; 18 El; 35 RA; 220 Brin
Cold drawn. 120,000 TS; 95,000 YS, 9 El; 20 RA; 250 Brin.
For bearings, valves, surgical instruments; cutlery; Type 440B; corrosion resistant, hardenable.

ATLAS 440C.
M-435, 0.95-1.2 C, 16-18 Cr, 0.75 max Mo, bal Fe.
Annealed: 100,000 TS; 60,000 YS, 18 El; 200 Brin.
Heat treated: 280,000 TS, 250,000 YS; 2 El, 575 Brin
For bearings, cutlery, valves, pivots, surgical instruments; Type 440C; corrosion resistant, hardenable

ATLAS 442
M-435, 0.20 max C, 23-27 Cr, bal Fe.
Sub-annealed: 80,000 TS, 50,000 YS, 20 El; 50 RA; 165 Brin
For oil burner furnace and boiler parts, high corrosion and oxidation resistance

ATLAS 446
M-435, 0.35 max C, 23-27 Cr, bal Fe
Annealed 75,000 TS; 45,000 YS; 35 El; 65 RA; 160 Brin
Cold drawn 175,000 TS, 155,000 YS; 2 El, 25 RA; 250 Brin.
For oil burner parts, heat treat boxes, furnace equipment, Type 446, corrosion resistant

ATLAS 501.
M-435, 0.10 min C, 1 max Mn, 5 Cr, bal Fe
Annealed 70,000 TS, 30,000 YS; 28 El, 65 RA; 160 Brin
Heat treated 175,000 TS; 135,000 YS, 15 El, 50 RA, 370 Brin.
For oil refinery equipment, valve trim, furnace parts, good to 1200°F, creep resistant

ATLAS 502
M-435; 0.10 max C, 1 max Mn, 4-6 Cr, 0.5 Mo, bal Fe
Annealed 75,000 TS, 35,000 YS, 26 El, 62 RA; 170 Brin
Heat treated 175,000 TS, 135,000 YS, 15 El, 50 RA; 370 Brin.
For oil refinery equipment, valve trim, furnace parts; good to 1200°F, creep resistant

ATLAS A
M-1, 0.30 C, 3.5 Cr, 9 W, 0.45 V, bal Fe
For hot work tools, piercers, punches, dies; hot work steel AISI H 21

ATLAS ACX.
M-435, 0.83 C, 18.5 W, 4 Cr, 1.7 V, 1 Mo, 10.5 Co, bal Fe
For hogging cutters, tools; high speed steel.

ATLAS AHT-28.
M-435, M-1636, 0.30 C, 0.50 Mn, 1.4 Cr, 4 Ni, 2 Mo, bal Fe.
Heat treated 241,000 TS; 204,000 YS, 12.5 El, 477 Brin.
For gears, rolls, camshafts, transmission components, carbide bit holders, oil or air hardenable.

ATLAS ALPHA.
M-435, 0.8 C, bal Fe.
For punches, dies, blacksmith tools; water hardened.

ATLAS ALPHA-8.
M-435; 0.8 C, 0.3 Mn, bal Fe.
For hammer dies, picks, set screws, wedges; water hardening, shock resistant.

ATLAS B.
M-1; 0.40 C, 3 Cr, 11 W, 0.5 V, bal Fe.
For hot work tools, dies, punches; hot work steel.

ATLAS BRAKE DIE.
M-435; 0.50 C, 1.1 Mn, 0.65 Cr, 0.15 Mo, bal Fe.
Heat treated: 130,000 TS; 118,000 YS, 20 El; 262 Brin.
For brake press dies, gears, drive shafts; high toughness and wear resistance.

ATLAS-CM.
M-435, M-1636; 0.40 C, 1.2 Mn, 0.15 Mo, 0.6 Cr, bal Fe.
Normalized: 100,000 TS; 65,000 YS; 24 El; 53 RA; 217 Brin.
For machinery parts, bolts, axles, jigs, fasteners, gears, shafts.
Shock resistant, tough, water hardening.

ATLAS CW26.
M-435; 2.4 C, 0.40 Mn, 8.15 Cr, 1.1 Mo, 5 V, bal Fe.
For drawing and stamping dies; high abrasion and wear resistance.

ATLAS DIE CASTING STEEL.
M-435; 0.4 C, 0.7 Mn, 0.6 Cr, 0.15 Mo, 1.25 Ni, bal Fe.
For die casting dies; oil hardened.

ATLAS EXTRA.
M-435; 1.05 C, 1.25 Mn, bal Fe.
For tools, shear blades, cutters; oil hardening.

ATLAS FNS.
M-435; 1.5 C, 12 Cr, 0.8 Mo, bal Fe.
For tools, lamination dies, hot work steel.

ATLAS HOBBING IRON.
M-435; 0.05 C, 0.2 Mn, 0.15 Si, bal Fe
For plastic mold dies; hubbed cavity

ATLAS HOT DIE.
M-253, M-1; 0.5 C, 4 Cr, 18 W, 1 V, bal Fe
For hot dies, punches, shears; hot work steel

ATLAS HW-7.
M-435, 0.45 C, 1 Si, 5 Cr, 3.75 W, 1 Mo, 0.5 V, 0.5 Co, bal Fe
At 1000°F: 217,000 TS; 8.5 El; 40 RA; 477 Brin.
For hot punches, shears, forging dies, cold punches; high hot strength and shock resistance.

ATLAS-KK.
M-435, 1.1 C, 1.7 Cr, 0.4 Mo, 1.4 V, bal Fe.
For bearings, machinery parts; oil hardening.

ATLAS M-4.
M-435; 1.25 C, 6 W, 4.25 Cr, 4.75 Mo, bal Fe
For reamers, tool bits, form rolls, drills; high abrasion and wear resistance.

ATLAS M-34.
M-435; 0.90 C, 1.45 W, 3.75 Cr, 8.7 Mo, 8.25 Co, 2.05 V, bal Fe.
For tool bits, reamers, form tools; high red hardness.

ATLAS NN
M-435; 2.2 C, 12 Cr, bal Fe.
For tools, dies, blanking dies; non-deforming.

ATLAS NON-MAG.
M-435; 0.40 C, 11.5-12.5 Mn, 7.0-8.5 Ni, bal Fe.
For transformer parts, retainer rings; low magnetic permeability.

ATLAS "Q."
M-435; 1.2 C, 0.5 Cr, bal Fe.
For tools, taps, reamers; water hardening.

ATLAS ROLL.
M-1636; 1.05 C, 0.3 Mn, 0.015 S, 0.02 P, 1.45 Cr, bal Fe.
Annealed: 95,000 TS; 54,000 YS; 26 El; 55 RA; 192 Brin.
Hardened: 189,000 TS; 131,000 YS; 14 El, 35 RA; 331 Brin.
For rolls, feed and pinch rolls, bearings, flaring tools.
Water hardening; wear and fatigue resistant.

ATLAS SPECIAL ALLOY 8.
M-435; 0.8 C, 0.2 Mn, 0.2 V, bal Fe.
For impact tools, rivet sets; water hardened, shock resistant.

ATLAS SPECIAL ALLOY 10.
M-435; 1.05 C, bal Fe
For tools, striking dies, water hardening.

ATLAS-SPS.
M-1636, M-435; 0.40 C, 0.75 Mn, 0.60 Cr, 1.25 Ni, 0.15 Mo, bal Fe.
Annealed· 105,000 TS, 70,000 YS; 25 El, 212 Brin.
Hardened 145,000 TS; 132,000 YS; 20 El; 293 Brin
For heavy duty shafts, gears, axles, spindles, tool holders, feed screws
Oil hardening, shock resistant.

ATLAS STAINLESS NO 20.
M-435, 0.07 C, 29 Ni, 20 Cr, 2-3 Mo, 4 Cu, bal Fe.
Cast· 65,000-75,000 TS; 28,000-38,000 YS, 50-35 El, 50-40 RA, 120-150 Brin
For chemical plant equipment, resists mixed acids, austenitic.

ATLAS SUPERIOR.
M-1474, Sn, bal Cu
For springs, bearings, corrosion resistant.

ATLAS TRIPLE EXTRA.
M-435, 1.3 C, 3.5 W, bal Fe
For fast finishing tools, drills, water hardening.

ATLAS SUPERIOR.
M-1636; 0.40 C, 1.1 Mn, 0.08 S, 0.02 P, 0.15 Mo, bal Fe.
Rolled· 108,000 TS, 84,000 YS; 18 El, 46 RA, 229 Brin.
For arbors, bolts, camshafts, collets, compressor shafts, guide bars, mandrels
Free-machining, water hardening.

ATLAS WEFINED-8.
M-435; 0.8 C, 0.3 Mn, bal Fe
For flaring tools, vise jaws, sledges, drills; water hardening.

ATLAS WEFINED-10.
M-435, 1.0 C, 0.25 Mn, bal Fe.
For stamping and blanking dies, arbors, lathe centers, drills; water hardening

ATLAS X-10
M-435; 1.05 C, 0.25 Mn, bal Fe.
For shear blades, die and cutting tools; water hardening.

ATLAS X-12
M-435; 1.2 C, 0.25 Mn, bal Fe
For drills, taps, reamers, files, cold forming dies, water hardening.

ATLAS XLO.
M-435, 0.55 C, 0.7 Mn, 0.8 V, 2 Cr, 0.55 Mo, bal Fe.
For drop forging die blocks, oil hardening

ATLAS XX-95.
M-435; 0.95 C, bal Fe.
For cold beading dies; water hardened.

ATLAS XXX.
M-435; 1.35 C, 3.75 W, bal Fe.
For tools, forming rolls; maximum wear resistance.

ATLOY D.D.
M-353; C, alloy, bal Fe.
Heat treated: 310,000 TS
For bushings, gears, clutches, gages, spindles; tough, non-deforming

ATLOY FM.
M-353, C, B, Pb, alloy, bal Fe.
For gears, arbors, worms, collets, motor shafts; free-cutting, fatigue and wear resistant

ATLOY H.T.
M-353, C, Cr, Mn, bal Fe.
Heat treated: 260-000-112,000 TS, 230,000-95,000 YS; 9.5-21.5 El; 26-62.5 RA; 514-241 Brin.
For arbors, axles, bolts, cams, gears, jaws; fatigue and wear resistant.

ATLOY Z.
M-353; C, B, alloy, bal Fe
Heat treated. 280,000 TS.
For gears, axles, connecting rods, propeller shafts; high strength

ATMODIE.
M-35; 1.5 C, 12 Cr, 0.8 Mo, 0.85 V, bal Fe.
For blanking and forming dies, punches, shear blades, tough and wear resistant; air hardening; AISI Type D2

ATMODIE SMOOTHCUT.
M-35; 1.5 C, 12 Cr, 0.9 Mo, 1.0 V, S, bal Fe.
For drawing and blanking dies, punches, mandrels, gages; air or oil hardening, free machining, wear and corrosion resistant
AISI D2.

ATMOS
M-1422, C, alloy, bal Fe
For dies, punches, air hardened

AT-NICKEL.
M-121; 99.0 min Ni.
For chemical plant equipment.
Welding grade Good resistance to alkaline salts and organic acids

ATR ALLOY.
M-83, M-1637, 0.5 Cu, 0.5 Mo, 1.5 Sn, 0.12 Fe, 0.10 Cr, 0.05 Ni, bal Zr
For nuclear reactors
Resists CO_2 corrosion.

ATRIX 1.
M-501; 0.19 C, 0.5 Si, 1.15 Mn, bal Fe.
For gears, shafts, machine tool parts, case hardening steel

ATRIX 3R.
M-501; 0.12 C, 1.15 Si, 2.5 Cr, 0.45 Mo, bal Fe.
For gears, cams, camshafts, pinions; case hardening steel, tough.

ATRIX 4R.
M-501; 0.15 C, 0.30 Mo, 0.60 Mn, 0.25 Si, bal Fe.
Annealed: 70,000 TS; 40,000 YS, 25 El; 60 RA; 145 Brin.
For gears, shafts, camshafts, bolts; case hardening steel, tough.

ATRIX 5R.
M-501; 0.13 C, 0.85 Cr, 0.45 Mo, bal Fe
For gears, cams, camshafts; case hardening steel, tough.

ATRIX 10A.
M-501; 0.24 C, 1.15 Cr, 0.25 Mo, bal Fe.
For gears, bolts, cams, camshafts; case hardening or water hardening steel.

ATRIX 10E.
M-501; 0.16 C, 1.05 Cr, 0.25 Mo, bal Fe.
For gears, bolts, camshafts, cams; case hardening steel, tough.

ATRIX 10S.
M-501; 0.34 C, 1.55 Cr, 1.55 Ni, 0.2 Mo, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant.

ATRIX 10SS.
M-501, 0.28 C, 0.55 Mn, Ni, Cr, 0.2 Mo, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant.

ATRIX 12
M-501; 0.24 C, 1.15 Cr, 0.25 Mo, 0.55 Mn, bal Fe.
For gears, bolts, crankshafts, fasteners; oil or water hardened, tough.

ATRIX 15A
M-501; 0.24 C, 1.25 Cr, 0.4 Mo, 0.55 Mn, bal Fe.
For gears, bolts, fasteners, pinions; oil or water hardened, tough.

ATRIX 15E
M-501, 0.16 C, 1.05 Cr, 0.45 Mo, 0.65 Mn, bal Fe.
For gears, cams, camshafts, machine tool parts; case hardening steel.

ATRIX 15S.
M-501, 0.28 C, 1.15 Cr, 1.15 Ni, 0.45 Mo, bal Fe.
For gears, bolts, fasteners, oil refinery equipment; oil hardened, shock resistant

ATRIX 15SS.
M-501, 0.28 C, 1.25 Cr, 0.35 Mo, 0.45 Mn, 1.15 Ni, bal Fe
For gears, bolts, fasteners, shafts; oil hardened, shock resistant

ATRIX 20
M-501, 0.24 C, 1.35 Cr, 0.55 Mo, 0.2 V, bal Fe
For gears, bolts, machine tool parts, shafts, oil hardened, shock resistant.

ATRIX N9
M-501, 0.2 C, 3.25 Cr, 0.5 Mo, 0.5 V, bal Fe
For oil refinery equipment, evaporators, heat exchangers, heat and creep resistant

ATRIX N10.
M-501, 0.21 C, 3 Cr, 0.4 Mo, 0.8 V, 0.4 W, bal Fe.
For oil refinery equipment, heat exchangers, heat and creep resistant

ATS
M-459, 0.05 C, 1.27 Mn, 16.5 Cr, 12.3 Ni, 1,1 Cb, bal Fe.
For turbine blades and nozzles.
Austenitic, corrosion and heat resistant

ATS2.
M-459, 0.08 C, 1.3 Mn, 17 Cr, 2.2 Mo, 13.5 Ni, 0.9 Cb or Ta, bal Fe.
For valves, jet engine components; high temperature resistant

ATS6.
M-459, 0.08 C, 1.3 Mn, 17 Cr, 1.4 Mo, 13 Ni, 0.7 V, 0.9 Cb, N_2, bal Fe.
For jet engine and missile components; high heat resistant.

ATS-103.
M-459; 0.38-0.47 C, 1.0-2.0 Mn, 19-21 Cr, 19-21 Ni, 19-21 Co, 3.5-4.5 Mo, 3.5-4.5 W, 3.5-4.5 Cb, bal Fe.
Rolled: 152,000 TS; 80,000 YS; 19 El; 25 RA; 260 Brin.
Aged. 140,000 TS; 42,000 YS; 20 El; 19 RA; 300 Brin.
For supercharger and jet engine components, turbine blades and wheels.
Corrosion and heat resistant.

ATS-113.
M-459; 0.4 C, 1.2 Mn, 20 Cr, 20 Ni, 43 Co, 4 W, 3 Fe, 4 Cb.
Heat Treated· 140,000 TS; 67,000 YS; 31 El; 31 RA; 269-352 Brin
For turbine blades and rotors; high temperature hardware, jet engine parts
High heat and corrosion resistant to 1500°F.

ATS-360.
M-459; 13-16 Cr, 18-22 Co, 4-5 Mo, 0.2 max C, 4.6 Al, 1.2 Ti, bal Ni.
At 20°C: 144,000 TS; 116,000 YS; 7 El, 7 RA
At 500°C· 132,000 TS, 105,000 YS, 8 El, 12 RA
For gas turbine and jet engine components, fasteners.
Similar to Nimonic 105 High creep and oxidation resistance

ATS-390
M-459, 14-16 Cr, 13-17 Co, 3.6 Mo, 5 Al, 4 Ti, 0.12-0.20 C, 0.02 B, 0.2 Zr, bal Ni
Heat treated 180,000 TS, 125,000 YS; 27 El, 28 RA; 370-440 Vickers
At 800°C: 147,000 TS, 109,000 YS, 19 El, 19 RA.
For gas turbine and jet engine components, missiles, space equipment.
Similar to Nimonic 115, high creep and oxidation resistance

ATSCO.
M-353; C, alloy, bal Fe
For tools, water hardening.

ATSCO AR.
M-353, 0.9 C, 0.7 Mn, 0.3 Mo, 1.1 Cr, bal Fe.
For shovel teeth, bucket lips; water hardened, abrasion resistant

ATSCO EXTRA.
M-353, 0.8-1.1 C, 0.25 Si, 0.25 Mn, bal Fe
Water hardened 166,000-216,000 TS, 110,000-150,000 YS, 11-15 El; 32-37 RA, 330-600 Brin.
For taps, drills, reamers, punches, stamps, knurls, mandrels
Type W1 water hardening

ATSCO SPECIAL
M-353; 0.5-1.0 C, 0.5-1.0 Mn, 0.3 Mo, bal Fe.
For rock drills, concrete wreckers, demolition tools; water hardening

ATSIL
M-353; 0.5 C, 0.6 Mn, 0.5 W, 0.3 Mo, 1.3 Si, bal Fe.
For shear blades, rivet sets, cutting tools; shock resisting

A.T. STEEL.
M-32; 0.35 C, 0.5 Mn, 0.3 Si, 1.5 Cr, 3.5 Ni, bal Fe.
Air hardening tool steel.

ATV-3.
M-104; 35 Ni, 11 Cr, 3 W, bal Fe.
For turbine and gas turbine parts; heat resistant.

ATV-R.
M-104; 30 Ni, 15 Cr, Mo, Al, bal Fe.
For turbine and gas engine parts; heat resistant.

ATV-S.
M-104; 35 Ni, 11 Cr, 0.15 C, 1 Al, 1 Ti, bal Fe.
For turbine and gas engine parts; heat resistant.

ATV-S7.
M-104; 30 Ni, 15 Cr, 20 Co, 0.12 C, 0.2 Ti, bal Fe.
For gas turbine discs; heat resistant

A-U4G1.
M-Russia; 4.36 Cu, 1.5 Mg, 0.6 Mn, 0.5 Si, bal Al.
Ht. Tr. 75,000 TS, 58,000 YS; 135 Brin.
For aircraft structures, fittings, hardware, rivets, fastenings.
Similar to Aluminum 2024, age-hardenable, high strength

A-U4SG
M-Russia, 4.35 Cu, 0.85 Si, 0.8 Mn, 0.5 Mg, bal Al
Ht Tr.: 70,000 TS, 60,000 YS, 12 El, 135 Brin.
For hydraulic fittings, structures, hardware, engine components
Similar to Aluminum 2014, age-hardenable, high strength.

AUBERT & DUVAL-56R
M-115, 0.08 C, 12 Cr, 1 Mo, 0.25 V, 1.0 W, bal Fe.
Annealed· 75,000 TS, 35,000 YS, 30 El, 70 RA, B 82 Rock.
Cold Drawn 95,000 TS; 80,000 YS; 15 El, 60 RA; B 92 Rock
For springs, table flatware, knives, oil refinery and chemical plant equipment.
Corrosion resistant.

AUBERT & DUVAL-56TS
M-1115, 0.20 C, 11 Cr, Mo, V, bal Fe.
Annealed 95,000 TS, 40,000 YS, 25 El, B 92 Rock.
Hardened 240,000 TS, 205,000 YS, 8 El, C 50 Rock
For valves, bearings, cutlery, surgical instruments, gears Corrosion resistant, hardenable

AUBERT & DUVAL 819B
M 1115; 0.3-0.4 C, 3.65-4.0 Ni, 1.5-2.0 Cr, 0.15-0.35 Mo, bal Fe
For gears, shafts, machinery parts, oil hardened, shock resistant.

AUBERT & DUVAL 897D
M-1115, 0.25-0.35 C, 3.0 3.5 Ni, 0.5-1.0 Cr, 0.8 Mn, bal Fe
For crankshafts, axles, connecting rods, AISI 3335, oil hardened, shock resistant

AUBERT & DUVAL AD3
M-1115, 0.12 max C, 3.0-3.5 Ni, 0.5-1.0 Cr, 0.5 Mn, bal Fe
For shafts, cams, camshafts, machinery parts, AISI 3310, case hardened, shock resistant

AUBERT & DUVAL APX
M-1115; 0.10-0.20 C, 1.5-3.0 Ni, 16-19 Cr, bal Fe
Annealed 107,000 TS, 62,000 YS, 18 El, 35 RA; 220 Brin
For cutlery, valves, surgical instruments, ball bearings, Type 431; corrosion resistant

AUBERT & DUVAL APZ
M-1115, 0.6-0.8 C, 1-2 Ni, 18-21 Cr, bal Fe.
Heat treated 143,000 TS
For exhaust valves, corrosion and heat resistant.

AUBERT & DUVAL CNS
M-1115, 0.3-0.4 C, 0.9-1.4 Ni, 0.5-1.0 Cr, 0.8 Mn, 0.5 Si, bal Fe.
For crankshafts, axles, bolts, gears, AISI 3135; oil hardened, shock resistant.

AUBERT & DUVAL CNS3
M-1115, 0.5-0.6 C, 0.8-1.3 Ni, 0.5-1.0 Cr, bal Fe.
For die blocks, hot work steel, oil hardened.

AUBERT & DUVAL F65.
M-1115, 0.34-0.40 C, 1.0-1.5 Cr, 0.10-0.30 Mo, 0.8 Mn, bal Fe.
For axles, gears, machinery parts; AISI 4137, oil hardened.

AUBERT & DUVAL F66.
M-1115; 0.28-0.34 C, 1.0-1.5 Cr, 0.10-0.30 Mo, 0.8 Mn, bal Fe.
For gears, shafts, machinery parts; AISI 4130, oil hardened.

AUBERT & DUVAL F66S.
M-1115, 0.21-0.28 C, 1.1-1.5 Cr, 0.10-0.30 Mo, 0.8 Mn, bal Fe
For gears, shafts, machinery parts; AISI 4125, tough

AUBERT & DUVAL FAD.
M-1115, 0.17 max C, 3.0-3.5 Ni, 0.80-1.3 Cr, bal Fe
For gears, cams, crankshafts, AISI 9315; case hardened, shock resistant

AUBERT & DUVAL FDMA
M-1115, 0.25-0.35 C, 3.2-3.7 Ni, 1.0-1.5 Cr, 0.3-0.6 Mo, bal Fe
For crankshafts, gears, connecting rod, oil hardened, shock resistant

AUBERT & DUVAL GK3
M-1115, 0.25-0.35 C, 2.75-3.3 Cr, 0.20-0.50 Mo, 0.4 max Al, bal Fe
For gears shafts, axles, machinery parts; nitriding steel

AUBERT & DUVAL GK5
M-1115, 0.15-0.25 C, 2.7-3.3 Cr, 0.2-0.5 Mo, 0.8 Mn, bal Fe
For gears, shafts, machinery parts, nitriding steel

AUBERT & DUVAL LK3
M-1115, 0.40-0.50 C, 1.5-2.0 Cr, 0.5-1.1 Al, 0.10-0.40 Mo, bal Fe
For gears, axles, machinery parts; nitriding steel

AUBERT & DUVAL LK5
M-1115, 0.25-0.35 C, 1.5-2.0 Cr, 0.10-0.40 Mo, 0.5-1.1 Al, bal Fe
For gears, shafts, machine tool parts, nitriding steel

AUBERT & DUVAL MEP
M-1115, 0.4-0.5 C, 1.0-2.0 Cr, 2.0-3.0 W, bal Fe
For impact tools, rivet sets, chisels, dies, cold work steel, oil hardened

AUBERT & DUVAL MES
M-1115, 0.3-0.4 C, 2.5-3.0 Cr, 2.5-3.0 W, bal Fe.
For rivet sets, extrusion rams and dies, hot work steel, oil or air hardened

AUBERT & DUVAL MMR0
M-1115, 0.20 max C, 1.1-1.6 Ni, 0.5-1.0 Cr, 0.8 Mn, bal Fe
For shafts, cams, gears, axles, machine tool parts, AISI 3120, case hardened shock resist.

AUBERT & DUVAL MMR1
M-1115, 0.17 max C, 1.1-1.6 Ni, 0.5-1.0 Cr, bal Fe.
For gears, cams, camshafts, AISI 3115 case hardened

AUBERT & DUVAL MMR3
M-1115, 0.13 max C, 1.1-1.6 Ni, 0.5-1.0 Cr, bal Fe
For gears, cams, camshafts; AISI 3115, case hardened

AUBERT & DUVAL MOC2
M-1115, 0.4-0.5 C, 1.0-1.5 Cr, 0.10-0.30 Mo, bal Fe
For gears, axles, shafts, bolts, spindles, AISI 4145, oil hardened

AUBERT & DUVAL MUV.
M-1115, 0.9-1.1 C, 0.1-0.4 V, bal Fe.
For punches, dies, threading taps, drawing dies; water hardened, Type W2

AUBERT & DUVAL NC36.
M-1115; 0.35-0.45 C, 0.5-1.0 Cr, 3.0-3.5 Ni, 0.8 Mn, bal Fe.
For gears, shafts, machinery parts; AISI 3340; oil hardened, shock resistant.

AUBERT & DUVAL NCAV.
M-1115; 0.14 max C, 3.0-3.5 Ni, 0.5-1.0 Cr, 0.5 Mn, bal Fe.
For cams, gears, camshafts, machinery parts; AISI 3310, case hardened, shock resistant.

AUBERT & DUVAL NCAV2.
M-1115, 0.17 max C, 3.0-3.5 Ni, 0.5-1.0 Cr, bal Fe.
For shafts, gears, camshafts, machinery parts; AISI 3316; case hardened, shock resistant.

AUBERT & DUVAL NCAV4.
M-1115, 0.20 max C, 3.0-3.5 Ni, 0.5-1.0 Cr, 0.5 Mn, bal Fe.
For camshafts, cams, gears, machinery parts, AISI 3316, case hardened, shock resistant.

AUBERT & DUVAL NCAV5
M-1115; 0.22 max C, 3.0-3.5 Ni, 0.5-1.0 Cr, bal Fe.
For camshafts, cams, gears, machinery parts; AISI 3320, case hardened, shock resistant.

AUBERT & DUVAL R2C
M-1115; 0.90-1.1 C, 1.8-2.2 Cr, bal Fe
For stamping tools, dies, jigs, templates, oil hardened

AUBERT & DUVAL R12S
M-1115, 0.6-0.7 C, 0.4-0.8 W, 0.15-0.40 V, bal Fe.
For punches, dies, chisels, impact tools, water hardened, tough

AUBERT & DUVAL RAD
M-1115, 0.9-1.2 C, 1.4-1.9 Cr, 0.5 Si, 0.8 Mn, bal Fe.
For roller bearings, thrust bearings, AISI 52100, water hardened, wear resistant

AUBERT & DUVAL SM1
M-1115, 0.6 C, 2.25-3.30 Ni, 0.6-1.0 Cr, 0.40 Mo, bal Fe
For die blocks, hot work steel, air hardened

AUBERT & DUVAL SMV
M-1115, 0.3-0.4 C, 4.5-5.5 Cr, 1-2 Mo, W, V, bal Fe.
For forging dies, punches, mandrels, hot shear blades, air hardened, hot work steel

AUBERT & DUVAL SYCOB
M-1115, 2.0-2.5 C, 11-13 Cr, V, Co, bal Fe
For cutting, pressing and stamping tools, drawing dies, oil or air hardened, non-deforming

AUBERT & DUVAL V300
M-1115; 0.4-0.5 C, 1.3-1.8 Si, 0.5-1.0 Cr, 0.1-0.3 Mo, bal Fe
For suspension springs, torsion bars, AISI 9245; tough

AUBERT & DUVAL VCD
M-1115, 0.3-0.4 C, 1.0-1.5 Cr, 0.2-0.4 V, bal Fe
For punches, rivet sets, dies, impact tools, water hardened, shock resistant

AUBERT & DUVAL X13
M-1115, 0.25-0.35 C, 12-14 Cr, 0.8 Mn, bal Fe
For valves, cutlery, turbine blades, surgical instruments, Type 420, corrosion resistant.

AUBERT & DUVAL X13M.
M-1115, 0.15 max C, 12-14 Cr, 0.8 Mn, bal Fe
For valves, cutlery, surgical instruments; Type 410; corrosion resistant

AUBERT & DUVAL X18
M-1115, 0.12 max C, 8-11 Ni, 17-20 Cr, bal Fe.
Annealed 80,000 TS, 35,000 YS, 55 El, 75 RA, 150 Brin
For chemical plant equipment, tanks, mixers; Type 302; stainless, austenitic.

AUBERT & DUVAL X18BC.
M-1115; 0.05 max C, 10-13 Ni, 17-22 Cr, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
For chemical plant equipment, tanks, mixers; Type 304; austenitic, stainless.

AUBERT & DUVAL X18MBC.
M-1115; 0.05 max C, 10-13 Ni, 16-19 Cr, 2-3 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El, 65 RA; 160 Brin.
For acid resistant chemical plant equipment; Type 316; stainless, austenitic.

AUBERT & DUVAL X18P.
M-1115, 0.12 max C, 9-12 Ni, 17-20 Cr, Ti = 5 × C, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, mixers, tanks; Type 321; stainless, austenitic

AUBERT & DUVAL X20T.
M-1115; 0.2-0.3 C, 7-11 Ni, 19-23 Cr, 1 75-3 75 W, bal Fe.
Heat treated· 114,000 TS; 65,000 YS; 40 El.
For valves for diesel engines; austenitic, corrosion and heat resistant.

AUBERT & DUVAL X25
M-1115, 0 15 max C, 18-20 Ni, 24-26 Cr, bal Fe.
Annealed: 100,000 TS, 45,000 YS; 50 El, 65 RA; 185 Brin.
For furnace parts, valve parts, jet engine parts; Type 310, stainless, austenitic

AUBURN CAST.
M-697; 0 7-1 0 C, bal Fe.
For tools, drills, taps; water hardened.

AUBURN EXTRA
M-697; 0 8-1 2 C, bal Fe.
For tools, drills, taps; water hardened

AUBURN HOT DIE
M-697, 0 5 C, 4 W, bal Fe.
For tools, hot shears; hot work steel

AUBURN PERFECTION.
M-697, C, alloy, bal Fe.
For tools, punches; water hardened.

AUBURN SPECIAL.
M-697, 0 7-1.4 C, bal Fe
For tools, drills, taps; water hardened.

AUBURN STANDARD
M-697, 0 7-0 9 C, bal Fe.
For tools, drills, taps, water hardened.

AUBURN TOOL MAKER.
M-697, 0 9 C, 1.2 Mn, bal Fe
For tools, dies, punches, non-deforming

AUDIO 52
4.5-4 75 Si, bal Fe.
For laminations for electrical equipment, high permeability.

AUDIO 58.
3 5-3.75 Si, bal Fe.
For laminations for electrical equipment, high permeability.

AUDIO 65.
3.25-3 75 Si, bal Fe
For laminations for electrical equipment, high permeability.

AUDIO 72.
3 25-3.75 Si, bal Fe.
For laminations for electrical equipment, high permeability.

AUDIO 82.
2.25-2.75 Si, bal Fe.
For laminations for electrical equipment; high permeability.

AUDIO 101.
2 25-2.75 Si, bal Fe.
For laminations for electrical equipment; high permeability.

AUDIO 117.
1-1.5 Si, bal Fe.
For laminations for electrical equipment; high permeability

AUDIO 130.
0.5-0.75 Si, bal Fe.
For laminations for electrical equipment, high permeability

AUDIO 145.
0.25-0 5 Si, bal Fe.
For laminations for electrical equipment; high permeability.

AUDIO 165
Under 0 25 Si, bal Fe
For laminations for electrical equipment, high permeability.

AUDIOLOY
M-38, 48 Ni, 52 Fe
For magnets, high permeability.

AUER METAL-A
Germ , 35 Fe, 65 Ce.
For gas and cigarette lighters, pyrophoric.

AUER METAL-B
Germ , 53 Fe, 30 Mn, 10 Sb, 7 Misch metal
For gas and cigarette lighters, pyrophoric, sparking alloy

AUER METAL-C
Germ,, 35 Fe, 35 Ce, 29 Misch metal
For gas and cigarette lighters, pyrophoric

AUER METAL-D
Germ , 35 Fe, 35 Ce, 24 La, 3 Yb, 2 Er.
For gas and cigarette lighters, pyrophoric

AUFRILOY.
M-681; Pb, Sn, bal Cu
For bearings, bushings, heavy duty

AUGER
M-289, C, bal Fe
For machine tool parts, water hardened

AUGER SECTION A
M-289, 0 75 C, bal Fe
For tools, mining drills, water hardened.

AUGER SECTION B.
M-289, 0 75 C, bal Fe
For tools, mining drills; water hardened.

AURIGA MARK I
M-476, 0 25 C, 0.7 Mn, bal Fe.
Annealed 67,200-78,500 TS, 34,000 YS, 20 El.
For structural castings, water hardening

AURIGA MARK III.
M-476, 0 4 C, 0 7 Mn, bal Fe.
Annealed 83,000-101,000 TS; 42,000 YS; 15 El.
For gears and wear resistant castings; water hardening.

AURIGA MARK VIII.
M-476; 0.20 C, Mo, bal Fe.
Normalized: 67,200 TS; 40,300 YS, 20 El.
For high temperature castings to 1020°F, heat resistant.

AURIGA MARK VIII A.
M-476; 0.15 C, Cr, Mo, bal Fe.
Normalized: 78,000 TS; 44,800 YS; 15 El.
For castings; high creep strength to 1020°F.

AURIGA MARK IX.
M-476; 0.3 C, Cr, Mo, bal Fe.
Hardened: 102,000-141,000 TS; 78,000-101,000 YS; 15-12 El.
For high strength castings; oil hardened.

AURIGA MARK X.
M-476, C, 11-14 Mn, bal Fe.
For wear resistant castings; Mn steel.

AURIGA MARK XV.
M-476, 0.3 C, 3 Cr, Mo, bal Fe
Hardened 102,000-141,600 TS, 78,000-101,000 YS, 15-12 El
For high strength castings; oil hardened.

AURIGA MARK XVI.
M-476; 0.3 C, Cr, Ni, Mo, bal Fe.
Hardened 102,000-141,600 TS, 78,000-100,000 YS, 15-12 El
For high strength castings; oil hardened.

AURIGA MARK XVII
M-476, 0.15 C, 18 Cr, 8 Ni, 1.5 W, bal Fe.
Annealed
For heat resistant castings, corrosion and heat resistant.

AURIGA MARK XXI.
M-476, 0.2 C, 5 Cr, Mo, bal Fe
Hardened 90,000 TS; 60,000 YS; 18 El
For castings for high temperature service, heat resistant.

AURIGA MARK XXII
M-476, 0.2 C, 9 Cr, 1.2 Mo, bal Fe.
Hardened. 90,000 TS, 60,000 YS, 18 El
For castings for high temperature service, heat resistant

AURIGA MARK XXIII
M-476, 0.2 C, 13 Cr, bal Fe
Hardened. 78,500 TS, 49,600 YS, 20 El.
For castings; corrosion resistant.

AURIGA MARK XXIV B
M-476, 0.15 C, 18 Cr, 8 Ni, Cb, bal Fe
Annealed 68,500 TS, 30,300 YS, 20 El
For castings, stainless, austenitic

AUR-O-MET 11B.
M-603, 10.5 Al, 1.0 Fe, bal Cu
Sand Cast: 75,000-85,000 TS; 32,000-42,000 YS, 20-35 El, 71-81 Rb.
Heat treatable aluminum bronze, corrosion resistant
For gears, worm wheels, valve seats, valve guides, shafts
ASTM B148-52-9B, SAE 68 B

AUR-O-MET 56.
M-603; 10.5 Al, 4.75 Ni, 4.25 Fe, bal Cu.
Sand Cast: 90,000-100,000 TS, 50,000-60,000 YS, 5-10 El, 89-93 Rb
For gears, machine and structural parts, impellers; corrosion and wear resistant
ASTM B148-52-9D

AUR-O-MET 115.
M-603, 5 Sn, 5 Pb, 5 Zn, bal Cu.
Cast: 32,000-38,000 TS; 15,000-17,000 YS; 20-40 El, B 24 Rock.
For water pump impellers, fittings for gasoline and oil lines, bushings, miscellaneous castings.
Red brass, free-cutting, good castability. SAE 40.

AUR-O-MET 123.
M-603; 3 Sn, 7 Pb, 9 Zn, bal Cu.
Sand cast: 29,000-39,000 TS; 13,000-17,000 YS; 18-30 El, 22 Rb (approx.).
Semi-red brass for general purpose plumbing and machine parts; ductile and corrosion resistant, free machining
ASTM B145-52 (5A).

AUR-O-MET 141.
M-603, 59 Cu, 39.5 Zn, 1.5 Si.
Cast 70,000-78,000 TS, 40,000-35,000 YS, 15-20 El, B 78-82 Rock.
For fittings, hardware, permanent mold and shell mold castings Yellow Brass, corrosion resistant.

AUR-O-MET 145.
M-603; 14 Zn, 5 Si, bal Cu
Die cast 70,000-92,000 TS, 40,000-60,000 YS, 20-15 El; 20 RA, 128-160 Brin.
For gears, water pumps, impellers, marine parts; corrosion and wear resistant

AUR-O-MET 150.
M-603, 60 Cu, 39.5 Zn, 0.5 Al
Cast: 40,000-45,000 TS; 11,000-14,000 YS, 23-28 El; B 40-50 Rock
For fittings, hardware, permanent and shell mold castings.
Yellow brass, corrosion resistant

AUR-O MET 305.
M-603, 10 Sn, 10 Pb, bal Cu, 0.25 max P.
Cast 27,000-39,000 TS, 15,000-22,000 YS; 26-34 El; B 27 Rock.
For wrist pins, piston pins, bushings, bearings
Good antifriction qualities
High leaded tin bronze
ASTM B144-52 (3A)

AUR-O-MET 315.
M-603, 7 Sn, 7 Pb, 2 Zn, bal Cu
Cast: 30,000-38,000 TS, 17,000-21,000 YS, 12-20 El, B 20 Rock
For bearings, spring bushings, thrust washers
High leaded tin bronze, SAE 660

AUR-O-MET 403.
M-603, 1.0 Sn, 3.0 Pb, 29 Zn, bal Cu.
Cast 30,000-38,000 TS, 11,000-15,000 YS, 20-35 El, B 10 Rock
For commercial bronze castings, radiator parts, fittings, battery terminals Good machinability
Yellow brass leaded, SAE 41

AUR-O MET 420.
M-603; 0.75 Sn, 0.75 Pb, 37.0 Zn, 1.25 Fe, 0.75 Al, 0.5 Mn, bal Cu
Cast 60,000-78,000 TS, 20,000-40,000 YS, 15-30 El, B 40-51 Rock
For propellers, marine hardware, shafts, gears, fittings. Good corrosion resistance
Manganese Bronze, high strength.
ASTM-B147-52 (7A)

AUR-O-MET 421.
M-603, 39.25 Zn, 1.25 Fe, 1.25 Al, 0.25 Mn, bal Cu.
Cast. 65,000-80,000 TS, 25,000-40,000 YS; 20-40 El; B 54-68 Rock
For gear shift forks, spiders, fittings, brackets, landing gears
Good corrosion resistance, high strength.
Manganese bronze, SAE 43

AUR-O-MET 424.
M-603, 26.0 Zn, 3.0 Fe, 5.5 Al, 3.5 Mn, bal Cu.
Cast 110,000-120,000 TS, 70,000-85,000 YS, 15-18 El, B 89-97 Rock.
For propellers, impellers, gears, fittings, marine hardware.
Good corrosion and wear resistance.
Manganese bronze, high strength. SAE 430-B.

AUSCO 80.
M-1152; 1.3-1.4 C, 0.7 Si, 0.9 Mn, 0.10 max Cr, 0.10 max Cu, 0.5 Ni, 0.15 Mo, bal Fe.
Heat treated: 110,000 TS; 80,000 YS; 7 El; 270 Brin.
For crankshafts; castings.

AUSTALON.
M-937; 0.08 C, 18 Cr, 8 Ni, 2 Mo, bal Fe
For orthodontic and denture applications; stainless, austenitic.

AUSTINOX.
M-884; 0.06 C, 18 Cr, 10 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 60 El; 70 RA; 150 Brin.
For chemical plant equipment, tanks, vessels, filters; Type 304; stainless, austenitic.

AUSTINOX B
M-884; 0.06 C, 18 Cr, 12 Ni, 2-3 Mo, bal Fe
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin
For acid resistant chemical plant equipment; Type 316; stainless, austenitic.

AUSTINOX S.
M-884; 0.08 C, 18 Cr, 10 Ni, Ti = 5 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, mixers, tanks, Type 321; stainless, austenitic.

AUSTINOX SB.
M-884; 0.08 C, 18 Cr, 12 Ni, 2-3 Mo, Ti = 5 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El, 65 RA; 160 Brin
For welded acid resistant chemical plant equipment, Type 316 Ti; stainless, austenitic

AUSTRIAN ALLOY (SPANDAU).
Austria; 4-6 Cu, 2-3.5 Al, bal Zn
For die castings; Spandau Alloy.

AUSTRIAN (GERSDORF).
Austria; 60-50 Cu, 20-25 Zn, 20-25 Ni
For costume jewelry, German silver.

AUSTRIAN JOURNAL BOX.
Austria, 92.5 Cu, 7.5 Zn.
For bearing purposes; gilding metal

AUTO.
M-1322; 0.41 C, 1.1 Cr, 0.7 Mn, 0.25 Si, bal Fe
For gears, bolts, shafts, axles, bolts; oil or water hardened, shock resistant

AUTO NO. 1.
M-38; 0.5 C, 1.8 Ni, 1 Cr, bal Fe
For punches, shock tools; tough.

AUTOCHROM CV4
M-1322; 0.5 C, 0.85 Mn, 1 Cr, 0.09 V, bal Fe.
For gears, bolts, springs, crankshafts; oil hardened, shock resistant.

AUTOCRAT.
M-565; alloy, bal Cu.
For bearings.

AUTOCRAT BUSHING BRONZE.
M-565; P, Sn, bal Cu.
34,000 TS, 10 El; 68 Brin.
For bushings, bearings; bearing bronze.

AUTO DIE.
M-260, M-38, C, alloy, bal Fe.
For tools; oil hardening.

AUTO EXTRA N.C.
M-27; 0.30 C, 0.75 Cr, 3.5 Ni, bal Fe.
Heat treated: 150,000 TS; 106,000 YS; 14 El; 50 RA; 310 Brin.
For crankshafts, axles, valves, connecting rods, gears; oil hardened.

AUTO EXTRA NC W/H.
M-501, M-912; 0.22-0.30 C, 0.8 Cr, 3.5 Ni, bal Fe.
Heat treated: 135,000-142,000 TS; 92,500-113,800 YS.
For gears, bolts, studs, shafts, fasteners; oil hardened, shock resistant.

AUTO EXTRA PA.
M-27, 0.25 C, 1.3 Cr, 0.1 Mo, 4.5 Ni, bal Fe
Heat treated: 142,300 TS; 113,800 YS
For gears, bolts, crankshafts, fasteners, oil hardened, shock resistant.

AUTO FIRST QUALITY N.C.
M-27; 0.30 C, 0.50 Cr, 1.5 Ni, bal Fe.
For crankshafts, axles, connecting rods; gears; water hardened.

AUTO LITE Al-5
M-851; 4.5-6.0 Si, 2 max Fe, bal Al.
Cast: 30,000 TS; 5 El.
For die castings; high fluidity

AUTO LITE Al-6
M-851; 11-13 Si, 2 max Fe, bal Al
Cast: 37,000 TS, 1.8 El
For die castings, high fluidity.

AUTO-LITE Al-9
M-851, 7.5-9.5 Si, 3-4 Cu, 2 max Fe, bal Al
Cast: 43,000 TS, 2 El
For die castings; high fluidity.

AUTO-LITE Z-3
M-851, 3.5-4.2 Al, 0.03-0.08 Mg, bal Zn
Cast 43,000 TS, 10 El, 82 Brin
For die castings

AUTOMATIC AW-79
M-9, 0.3 C, 2 Mn, 4 Cr, 1 Mo, bal Fe
Welded 450 Brin
For tractor rolls and idlers, steel car wheels, hard facing electrode.

AUTO NC W/H.
M-501, M-912, 0.28-0.35 C, 0.7 Cr, 2.5 Ni, bal Fe
For gears, bolts, shafts, axles, crankshafts, oil hardened, shock resistant.

AUTOPAN
M-297; 0.6-1.0 Mg, 0.6-1.2 Si, 0.3 max Cr, 0.5-2.5 Pb, Sn, Cd, Bi, bal Al
Annealed 21,000 TS, 8000 YS, 20 El.
For screw machine products, fasteners, free-cutting

AUTO PRIMA NC W/H
M-27, 0.28-0.35 C, 0.5 Cr, 1.5 Ni, bal Fe.
Heat treated. 120,000-128,000 TS; 71,200-85,000 YS
For gears, bolts, shafts, axles, crankshafts, oil hardened, shock resistant.

AUTO SPEZIAL 2
M-1337, 0.45 C, W, Cr, V, bal Fe
For rams, punches, shears, crimpers, upsetters, hot work steel, oil hardened.

AUTO SUMUS.
M-1337, 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, drills, reams, taps, high speed steel.

AUTOTHERMIC
Eng., steel coated with Al.
For fire walls; heat resistant.

AUTOVALVE STEEL.
M-32; Ni, C, bal Fe.
For valves, spark plugs; low coefficient of res.; corrosion resistant.

AVESTA 248 SV.
M-16; 0.05 max C, 16 Cr, 5 Ni, 1 Mo, bal Fe.
Heat treated: 128,000 TS; 100,000 YS; 20 El;
280 Brin.
Weldable, hardenable stainless steel. As rolled for pressure vessels and as cast for propellers, turbines, valves etc. Corrosion resistant, austenitic-martensitic-ferritic.

AVESTA 249 MV.
M-16; 0.05 C, 17 Cr, bal Fe.
Annealed: 74,000 TS; 52,000 YS; 30 El, 150 Brin
Pressed and welded articles subject to slight corrosion attack. Oil refinery equipment, oil burners.
Corrosion resistant, type 430, ferritic.

AVESTA 252 M
M-16; 0.07 C, 23 Cr, 14.5 Ni, bal Fe
Annealed: 100,000 TS; 50,000 YS; 40 El, 170 Brin.
For furnace parts, heat treating boxes, oil burners; Type 309S, corrosion and heat resistant; austenitic.

AVESTA 252 S.
M-16, 0.03 max C, 21.5 Cr, 15 Ni, 2.7 Mo, 0.2 N, bal Fe
Annealed: 106,000 TS, 50,000 YS, 50 El, 190 Brin
Pipes, fittings, valves etc mainly for salt water application. Corrosion resistant, austenitic.

AVESTA 254
M-16, 0.10 C, 19.5 Cr, 20.5 Ni, bal Fe
Annealed 85,000 TS, 36,000 YS; 54 El, 160 Brin
For furnace parts. Low sensibility to sigma phase formation Corrosion and heat resistant, austenitic

AVESTA 254 EM.
M-16, 0.08 max C, 25 Cr, 21 Ni, bal Fe
Annealed: 93,000 TS; 43,000 YS; 50 El, 170 Brin
For annealing boxes, tanks, recuperators, Type 310 S, corrosion and heat resistant, austenitic.

AVESTA 254 SLX
M-16, 0.02 max C, 20 Cr, 25 Ni, 4.5 Mo, 1.5 Cu, bal Fe
Annealed 85,000 TS, 36,000 YS, 50 El,
155 Brin.
For pumps, chemical plant equipment, resists H_2SO_4, corrosion resistant, austenitic

AVESTA 393.
M-16; 0.12 C, 13.5 Cr, bal Fe.
Annealed. 78,000 TS, 50,000 YS, 30 El, 190 Brin
Heat treated 185,000 TS, 157,000 YS, 17 El,
390 Brin
For press and caul plates in hardboard, chipboard and plastic laminating ind
Type 410, hardenable, corrosion resistant

AVESTA 393 M
M-16; 0.07 max C, 14 Cr, bal Fe.
Annealed: 74,000 TS, 47,000 YS, 26 El, 150 Brin
For table flatware, wood pulp conveyor screws, steam and water turbine parts Recuperators Non-hardenable, corrosion resistant

AVESTA 453 E
M-16; 0.09 C, 26 Cr, 4.5 Ni, bal Fe
Annealed: 100,000 TS; 70,000 YS, 25 El, 210 Brin.
For furnace plates, lead and salt bath crucibles.
Ferritic-austenitic, heat resistant.

AVESTA 453 S.
M-16; 0.08 C, 26 Cr, 5 Ni, 1.5 Mo, bal Fe.
Annealed: 100,000 TS, 70,000 YS; 23 El; 220 Brin.
For valves, pumps, shafts and equipment in the cellulose, dyeing, chemical and dairy industries Corrosion resistant, ferritic-austenitic (Type 329).

AVESTA 453 SG.
M-16, 0.04 max C, 22 Cr, 6.0 Ni, 1.7 Mo, bal Fe.
Annealed: 90,000 TS; 56,000 YS; 20 El;
220 Brin.
Cast material, for ships propellers. Corrosion resistant, ferritic-austenitic.

AVESTA 664 M.
M-16, 0.07 max C, 17 Cr, 5.5 Ni, 6.5 Mn, bal Fe.
Annealed: 100,000 TS, 50,000 YS; 70 El;
190 Brin.
For sinks, food processing equipment, in the architecture
For Type 202, corrosion resistant, austenitic

AVESTA 664 MV.
M-16, 0.05 max C, 18 Cr, 5 Ni, 8 Mn, bal Fe.
Annealed: 106,000 TS, 54,000 YS; 60 El, 190 Brin.
For nitric acid and brewery equipment Type 204, corrosion resistant, austenitic.

AVESTA 739 G
M-16; 0.12 C, 13 Cr, 1 Ni, bal Fe.
Annealed. 100,000 TS, 64,000 YS; 20 El; 210 Brin.
For castings, water turbine parts, vanes, bottom plates, corrosion resistant

AVESTA 739 S
M-16, 0.14 C, 13.5 Cr, 1 Mo, bal Fe.
Annealed. 93,000 TS, 64,000 YS, 18 El, 190 Brin.
Hardened 192,000 TS, 128,000 YS, 10 El,
385 Brin
For paper mill knives, ship propellers, corrosion resistant, hardenable

AVESTA 739 SG
M-16, 0.12 C, 13 Cr, 1 Ni, 1 Mo, bal Fe
Annealed 92,000 TS; 58,000 YS, 16 El; 50 RA;
190 Brin
For castings, ship propellers, corrosion resistant

AVESTA 831
M-16; 0.2 C, 1.0 Si, 25 Cr, 0.8 Ni, bal Fe.
Annealed. 83,000 TS, 57,000 YS; 30 El, 175 Brin
For furnace equipment, Type 446, heat resistant, non-hardenable

AVESTA 832 H
M-16, 0.11 C, 17 Cr, 8 Ni, bal Fe
Annealed: 107,000 TS, 50,000 YS, 65 El, 200 Brin
For press and caul plates in hardboard, chipboard and plastic laminating ind and chain type bottle conveyors Type 302, corrosion resistant, austenitic

AVESTA 832 M
M-16, 0.05 max C, 18 Cr, 9 Ni, bal Fe
Annealed 85,000 TS, 40,000 YS, 70 El; 155 Brin
Cold strip rolled For household articles and in the architectural industry For equipment in the food-processing industry. Type 304, corrosion resistant, austenitic

AVESTA 832 MV.
M-16; 0.05 max C, 18 Cr, 9 Ni, bal Fe.
Annealed: 83,000 TS; 37,000 YS; 62 El; 150 Brin.
Hot rolled For welded structures, acid vessels and other equipment in food processing and chemical ind Type 304, corrosion resistant, austenitic.

AVESTA 832 MVN.
M-16; 0.05 max C, 18.5 Cr, 8.5 Ni, 0.20 N, bal Fe.
Annealed 90,000 TS; 48,000 YS; 50 El;
160 Brin.
High proof stress stainless steel. Cryogenic applications Corrosion resistant, austenitic.

AVESTA 832 MVNb.
M-16; 0.08 max C, 17.5 Cr, 9.5 Ni, Cb, bal Fe.
Annealed: 86,000 TS; 40,000 YS; 56 El; 160 Brin.
For nitric acid ind., aircraft internal combustion and jet engine parts. Furnace equipment, Type 347, corrosion resistant, austenitic.

AVESTA 832 MVR.
M-16; 0.03 max C, 18.5 Cr, 10 Ni, bal Fe.
Annealed: 77,000 TS; 36,000 YS; 60 El; 150 Brin.
For nitric acid equipment, nuclear ind. Type 304 L, corrosion resistant, austenitic.

AVESTA 832 MVRN.
M-16; 0.03 max C, 18.5 Cr, 10.5 Ni, 0.20 N, bal Fe.
Annealed: 88,000 TS; 40,000 YS; 50 El; 150 Brin.
High proof stress stainless steel. Equipment in the chemical ind. Corrosion resistant, austenitic.

AVESTA 832 MVT.
M-16; 0.08 max C, 17.5 Cr, 10 Ni, Ti, bal Fe
Annealed: 86,000 TS; 40,000 YS; 55 El; 160 Brin.
For nitric acid ind.; aircraft internal combustion and jet engine parts. Furnace equipment. Type 321, corrosion resistant, austenitic.

AVESTA 832 SF.
M-16; 0.05 max C, 17 Cr, 11 Ni, 2.3 Mo, bal Fe.
Annealed: 85,000 TS; 42,000 YS; 58 El; 150 Brin.
Equipment in the chemical, cellulose and food processing ind. Type 316, corrosion resistant, austenitic.

AVESTA 832 SFR.
M-16, 0.03 max C, 17 Cr, 11.5 Ni, 2.3 Mo, bal Fe.
Annealed: 83,000 TS; 42,000 YS; 58 El; 150 Brin
Equipment in the chemical and food processing ind. Type 316 L, corrosion resistant, austenitic

AVESTA 832 SFT.
M-16, 0.08 max C, 17 Cr, 12 Ni, 2.3 Mo, Ti, bal Fe.
Annealed: 85,000 TS; 42,000 YS; 55 El, 160 Brin.
Equipment in the chemical ind., Type 316 T, corrosion resistant, austenitic.

AVESTA 832 Si
M-16; 0.02 max C, 4 Si, 17.5 Cr, 14.5 Ni, bal Fe.
Annealed 96,000 TS; 42,000 YS, 55 El; 160 Brin.
Vessels, pipes, valves etc. Especially good resistance against highly concentrated nitric acid. Austenitic.

AVESTA 832 SK.
M-16, 0.05 max C, 17 Cr, 11.5 Ni, 2.7 Mo, bal Fe.
Annealed: 85,000 TS; 42,000 YS; 58 El, 150 Brin.
Main type for the chemical and cellulose ind. Type 316, corrosion resistant, austenitic.

AVESTA 832 SKER (832 SKR-5)
M-16; 0.03 max C, 17.5 Cr, 13.5 Ni, 2.7 Mo, bal Fe
Annealed. 85,000 TS; 40,000 YS; 58 El; 150 Brin.
Low ferrite grade mainly for the urea and acetic acid ind. (Type 316) corrosion resistant, austenitic.

AVESTA 832 SKNb.
M-16; 0.06 max C, 17 Cr, 13 Ni, 2.7 Mo, Cb, bal Fe.
Annealed: 85,000 TS; 42,000 YS; 55 El; 160 Brin.
For equipment in the chemical ind. Type 316 Cb, corrosion resistant, austenitic.

AVESTA 832 SKR.
M-16; 0.03 max C, 17.5 Cr, 13 Ni, 2.7 Mo, bal Fe.
Annealed, 85,000 TS; 42,000 YS; 57 El; 150 Brin.
For equipment in the chemical ind. Type 316 L, corrosion resistant, austenitic.

AVESTA 832 SKRN.
M-16; 0.03 max C, 17.5 Cr, 13 Ni, 2.7 Mo, 0.2 N, bal Fe.
Annealed: 90,000 TS; 50,000 YS; 50 El; 160 Brin.
High proof stress stainless steel. Equipment in the chemical and cellulose ind. For chemical tankers. Corrosion resistant, austenitic.

AVESTA 832 SKT.
M-16; 0.08 max C, 17 Cr, 13 Ni, 2.7 Mo, bal Fe.
Annealed: 85,000 TS; 42,000 YS; 55 El; 160 Brin.
For equipment in the chemical ind. Type 316 Ti, corrosion resistant, austenitic.

AVESTA 832 SL.
M-16; 0.05 max C, 16.5 Cr, 15 Ni, 4.3 Mo, bal Fe
Annealed: 88,000 TS; 46,000 YS; 51 El; 150 Brin.
For equipment in the chemical ind. Highly resistant to acids, austenitic.

AVESTA 832 SN.
M-16; 0.5 max C, 18.5 Cr, 14.5 Ni, 3.3 Mo, bal Fe.
Annealed. 85,000 TS, 43,000 YS; 50 El; 150 Brin.
For sulfite digesters and equipment in the chemical ind. Type 317, corrosion resistant, austenitic.

AVESTA 832 SNR
M-16, 0.03 max C, 18.5 Cr, 14.5 Ni, 3.3 Mo, bal Fe.
Annealed: 85,000 TS, 43,000 YS; 50 El, 150 Brin
For sulfite digesters and equipment in the chemical ind Type 317 L, corrosion resistant

AVESTA 832 SV.
M-16; 0.05 max C, 17.5 Cr, 9.5 Ni, 1.5 Mo, bal Fe.
Annealed 84,000 TS, 40,000 YS; 61 El, 150 Brin.
For equipment in the cellulose and food processing industry. Window frames Corrosion resistant, austenitic.

AVESTA 832T/NB.
M-16, 0.10 C, 18 Cr, 9.5 Ni, Cb, bal Fe.
Annealed 90,000 TS, 45,000 YS, 56 El, 65 RA; 150 Brin
For welded chemical plant equipment, tanks, mixers, Type 347, corrosion resistant

AVIAL.
M-698, 0.5 Si, 2.5 Cu, 0.6 Mg. 1.0 Ni, 0.7 Cr, bal Al.
Heat treated 57,000 TS; 26 El
For light alloy parts; hardenable.

AVIALITE-915.
M-8; 89.25 Cu, 9.25 Al, 0.4 Sn, 0.5 Ni, 0.6 Fe
Soft 80,000 TS, 40,000 YS, 22 El
Hard: 95,000 TS, 55,000 YS, 16 El.
For valve seats, spark-plug bushings in aircraft engines, same as "Millard Metal."

AVIOL.
Russia, 0.7 Si, 0.6 Mg, bal Al.
Annealed: 17,000 TS, 7000 YS; 27 El, 40 Brin
For aircraft parts

AVIONAL.
M-493, M-541, M-1548, 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
Annealed: 27,000 TS, 11,000 YS; 22 El, 47 Brin.
Heat Treated. 72,000 TS; 57,000 YS; 130 Brin.
For aircraft structures and fittings, age-hardenable.

AVIONAL.
M-624; 3-4 Cu, 0.6 Mg, 0.6 Mn, 0.3 max Si, 0.3 max Fe, bal Al.
For aircraft parts; age hardenable.

AVIONAL-14
M-624, M-249, M-541; 4.4 Cu, 0.8 Si, 0.4 Mg, 0.8 Mn, bal Al.
Annealed: 27,000-30,000 TS; 11,400-17,800 YS; 12-18 El; 45-55 Brin.
TA-Temper. 67,500-75,400 TS; 58,300-64,000 YS; 6-9 El; 125-140 Brin.

For aircraft structures, general engineering components.
Age hardenable; high strength.

AVIONAL-20.
M-249; Cu, Mg, bal Al.
For clad sheets for orthopedics; age-hardened, malleable as heat treated.

AVIONAL-21.
M-624, M-541; 2.5 Cu, 0.3 Si, 0.3 Mg, bal Al.
Annealed: 14,200-21,400 TS, 5700-10,000 YS; 25-40 El; 35-45 Brin.
TN-Temper: 38,400-50,000 TS; 21,500-28,400 YS; 16-23 El; 80-90 Brin.
For aircraft components, marine and transportation equipment

AVIONAL-22.
M-249, M-541; 3.5-5.0 Cu, 1 max Si, 0.2-1.5 Mn, 0.2-1.5 Mg, bal Al.
Annealed: 22,750 TS; 8500 YS; 30 El, 45 Brin.
Heat Treated: 62,500 TS; 42,500 YS, 20 El; 120 Brin.
For aircraft and bus construction, machine tool parts; age hardened, high fatigue strength.

AVIONAL-23
M-249, 3.5-5.0 Cu, 0.2-1.5 Mg, 0.2-1.5 Mn, 0-1 Si, bal Al
Annealed 27,000 TS; 11,500 YS; 20 El, 50 Brin
Heat treated 71,000 TS; 48,250 YS, 20 El, 125 Brin.
For aircraft construction, machine tool parts; age-hardened, high fatigue strength

AVIONAL-24
M-249, M-541, 3.5-5.0 Cu, 0.1 Si, 0.2-1.5 Mn, 0.2-1.5 Mg, bal Al
Annealed. 28,500 TS, 12,750 YS, 22 El, 55 Brin.
Heat Treated: 74,000 TS; 51,000 YS; 15 El, 150 Brin
For aircraft and bus construction, machine tool parts, age-hardened, high fatigue strength

AVIONAL-25
M-249, Cu, Mg, bal Al
Annealed 22,750 TS; 8500 YS, 30 El, 50 Brin.
Heat treated. 74,000 TS, 68,250 YS, 10 El, 150 Brin.
For aircraft and bus body construction, age-hardened, corrosion resistant

AVIONAL 411.
M-249, 1.0 Si, 4.8 Cu, 0.5 Mg, 0.8 Mn, bal Al
Heat treated 64,000-74,000 TS, 54,000-63,000 YS, 8-12 El, 115-130 Brin
For light alloy parts, hardenable

AVIONAL D
M-249, M-624, 3.5-5.0 Cu, 0.2-1.5 Mg, 0.2-1.5 Mn, 0-1 Si, bal Al
Soft: 25,000 TS, 11,000 YS, 22 El, 50 Brin.
Heat treated. 58,000-87,000 TS; 38,000 YS; 21-2 El, 105 Brin.
For aviation and automobile parts; corrosion resisting; heat treatable.

AVIONAL D Ti
M-249, 0.2 Si, 3-8 Cu, 0.5 Mn, 0.5 Mg, 0.2 Fe, 0.16 Ti, bal Al
For aircraft parts, age-hardenable

AVIONAL M.
M-249; 0.7 Si, 4.2 Cu, 0.65 Mg, 0.7 Mn, bal Al.
Heat treated: 57,000-65,000 TS; 40,000-44,000 YS; 16-20 El; 105-120 Brin.
For aircraft parts; age hardened.

AVIONALPLAT.
M-249; Al alloy.
For light alloy parts; Avional coated with Al.

AVIONAL S.
M-249; 3.5-5 Cu, 0.2-1.5 Mg, 0.2-1.5 Mn, 0.2 Fe, 0.1-1.0 Si, bal Al.
Extruded: 71,000 TS; 54,000 YS; 15 El; 125 Brin.
For aircraft parts, auto construction; heat treatable.

AVIONAL SK.
M-249; 3.5-5.0 Cu, 0.5-0.8 Mn, 0.5-0.8 Mg, bal Al.
Sheets. 65,000-72,000 TS; 48,000-56,000 YS; 18-14 El.
For light alloy parts; age-hardenable.

AVIONAL Z
M-249, 0.4 Si, 0.3 Fe, 0.75 Mn, 0.80 Mg, 4.5 Cu, bal Al.
Wrought: 62,700-71,500 TS; 37,000-46,000 YS; 15-12 El.
For aviation and automobile parts; similar to "Duralumin."

AVONMOUTH
M-699, Al alloy.
For light alloy parts.

AVROCAN M7-12
M-435; 0.40 C, 1.0 Si, 5.0 Cr, 1.4 Mo, 0.5 V, bal Fe
Heat Treated. 225,000-305,000 TS; 195,000-255,000 YS, 8-15 El; 30-50 RA; C 45-56 Rock.
For extrusion dies, forging dies and inserts, hot punches, header and gripper dies.
Tough, hot work tool steel, Type H11.

AVS METAL.
M-700, 0.2-0.4 C, bal Fe.
For structural parts, water hardened

"A W 70-90" TYPE A
M-537, 0.25 max C, 0.7 Mn, 0.1 P, 0.5 Cu, bal Fe.
90,000 TS, 70,000 YS, 20 El
For sheets, plates, easy to weld

A.W 70-90 TYPE B.
M 537, 0.25 max C, 0.7 Mn, 0.1 P, 0.5 Cu, bal Fe.
Rolled, 65,000 TS; 50,000 YS, 20 El.
For structural work, transportation industry, truck and tank truck bodies, weldable, atmospheric corrosion resistant

AWARNITE (NATURAL).
Eng., 75 Ni, 25 Fe
For heat and corrosion resistant parts, heat and corrosion resistant.

AWCO-07.
M-982, 7 Mg, 0.25 Mn, bal Al.
For welding rod

AWCO-21.
M-982, 2.25 Mg, 0.4 Mn, bal Al.
Annealed: 26,000 TS, 11,200 YS; 48 Brin.
Hard: 45,000 TS, 40,000 YS, 85 Brin.
For wire, corrosion resistant

AWCO-24
M-982, 0.5 Mg, 0.5 Si, bal Al.
S.T.-temper 27,000 TS, 13,500 YS, 50 Brin.
S.T.A.-temper. 33,600 TS, 27,000 YS, 70 Brin.
Drawn 47,000 TS, 40,000 YS; 90 Brin.
For wire; heat treatable.

AWCO-25.
M-982; 0.7 Mg, 1 Si, bal Al.
S.T.-temper: 33,600 TS, 20,000 YS, 60 Brin.
S.T.A.-temper: 45,000 TS; 40,000 YS; 95 Brin.
For wire, heat treatable.

AWCO-27
M-982; 3.5 Mg, 0.5 Mn, bal Al.
Annealed 35,000 TS; 16,200 YS; 55 Brin.
Hard: 51,000 TS; 43,500 YS; 100 Brin.
For wire; corrosion resistant.

AWCO-28.
M-982; 5 Mg, 0.35 Mn, bal Al.
Annealed: 40,000 TS; 18,000 YS; 65 Brin.
Hard: 60,000 TS; 49,000 YS; 115 Brin.
For weaving wire, rivets; corrosion resistant.

AWCO-31.
M-982; 5 Cu, bal Al.
For welding rod.

AWCO-35.
M-982; 3 Cu, 0.6 Mg, 0.6 Sb, 0.15 Sn, bal Al.
Drawn: 53,000 TS; 49,200 YS; 110 Brin.
For machined parts; free-cutting, heat treatable.

AWCO-40.
M-982; 10-13 Si, bal Al.
For welding rod.

AWCO-45
M-982; 4.5-6.0 Si, bal Al.
For welding rod.

AWCO-60.
M-982; 1.25 Mn, bal Al.
Annealed: 15,700 TS; 7800 YS; 30 Brin.
Hard: 33,600 TS; 25,800 YS, 60 Brin
For wire; corrosion resistant.

AWCO-301.
M-982, 4.1 Cu, 0.6 Mg, 0.45 Si, 0.5 Mn, bal Al
S.T.A.-temper: 61,500 TS; 36,000 YS; 105 Brin.
For wire, rivets, heat treatable

AWCO-303.
M-982; 4.5 Cu, 0.5 Mg, 0.75 Si, 0.75 Mn, bal Al
S.T.-temper: 62,500 TS, 38,000 YS; 115 Brin.
S.T.A.-temper. 69,000 TS; 58,000 YS, 135 Brin.
For wire, bolts, heat treatable

AWCO-304
M-982; 2 Cu, 0.4 Mg, bal Al.
S.T.A.-temper: 43,500 TS, 22,200 YS, 80 Brin
For wire, rivets

AWCO-EP.
M-982, 99.5 min Al.
23,000-28,000 TS
For conductors, cables, high conductivity.

AWCO-SP
M-982, 99.99 min Al
Annealed: 8500 TS
Hard: 16,000 TS
For wire, high conductivity

AWCO-SP12
M-982, 1.25 Mg, bal Al.
Rolled: 29,200 TS.
For costume jewelry.

AWCO-SP16
M-982; 0.25 Cu, 0.7 Mg, 0.3 Si, bal Al
Rolled: 45,000 TS
For costume jewelry, pens, bracelets;
good for anodizing.

A.W. DYNALLOY.
M-537, 0.12 C, 0.75 Mn, 0.7 Ni, 0.07 Mo, bal Fe.
65,000-80,000 TS; 50,000 YS; 25 El
For railroad equipment, trucks, buses, smoke
chambers, stacks, good weldability.

AW DYNALLOY 50.
M-537; 0.13 C, 0.9 Mn, 0.35 Cu, 0.45 Ni, 0.08 Mo,
bal Fe.
Plate 50,000 min YS; 70,000 min TS; 22 min El.
For railroad gondola and hopper cars,
automobile and truck bodies and frames,
lift trucks, conveyors, bridges, buildings.
Good forming and welding properties
ASTM A242 High strength, low alloy steel.

AW-TEN.
M-537; 0.18 C, 0.75 Mn, 0.04 Si, 0.02 Cb, 0.25 Cu,
bal Fe.
Hot Rolled: 70,000 min TS; 50,000 min YS;
18 min El.
For mine cars, bridges, railroad cars, booms,
agriculture equipment.
Good formability and weldability.
High strength, low alloy structural steel.

AW V-STEEL.
M-537, 0.22 max C, 1.25 max Mn, 0.02 min V,
bal Fe.
V-45 Plate: 65,000 min TS, 45,000 min YS
V-50 Plate 70,000 min TS, 50,000 min YS
V-55 Plate: 70,000 min TS, 55,000 min YS.
V-60 Plate 75,000 min TS; 60,000 min YS.
V-65 Plate: 80,000 min TS, 65,000 min YS.
For railroad and mine cars, truck and bus bodies.
High strength, low alloy steel. Tough
Readily workable and weldable

AWX-45
M-537, 0.14 C, 0.50 Mn, 0.04 Si, 0.02 Cb, bal Fe
Rolled 63,000 TS, 45,000 min YS, 25 El,
B 78 Rock
For trucks, plow frames, pressure vessels
Good weldability and formability.

AWX-50
M-537, 0.14 C, 0.50 Mn, 0.04 Si, 0.02 Cb, bal Fe
Plate 50,000 min YS; 67,000 TS, 22 El;
B 81 Rock
For trucks, plow frames, pressure vessels.
Good formability and weldability.
High strength, low alloy steel

AWX-55
M-537, 0.14 C, 0.50 Mn, 0.04 Si, 0.02 Cb, bal Fe.
Plate 55,000 min YS, 71,000 TS, 20 El, B 83 Rock
For trucks, plow frames, pressure vessels
Good formability and weldability
High strength, low alloy steel

AXALOY
M-702, 0.4 C, bal Fe
For truck axles; water hardened

AXITE
M-703, Co-Cr-W
For valve seats, hard facing electrodes;
wear resistant

AXLE STEEL
M-618, 0.35-0.45 C, 1.2 Mn, 1 Ni, 0.3 max Si,
bal Fe.
Heat treated 89,000-112,000 TS, 22 min El,
46 min RA, 174-223 Brin
For axles, gears, shafts, oil or water hardened

AXLOY 20
M-703, 3.6 C, 2.5 Si, 0.6 Mn, bal Fe
Cast 20,000 TS; 163 Brin.
For glass molds, soft cast iron.

AXLOY 30
M-703, 3.4 C, 1.8 Si, 0.7 Mn, 0.25-1.0 Ni, 0.4 Cr,
0.4 Mo, bal Fe.
Normalized 30,000-35,000 TS, 180 Brin
For machinery castings, gears; cast iron,
wear resistant.

AXLOY 30 CN
M-703, 3.2 C, 2.5 Si, 1.5 Ni, bal Fe.
For hydraulic cylinders, valves, cast iron.

AXLOY 30 CNM.
M-703, 3.3 C, 0.25-1.00 Ni, 0.25-1.00 Cr
0.25-1.00 Mo, bal Fe
Cast: 35,000 TS; 207 Brin.
For liners, cams, cylinder blocks, gears; cast iron.

AXLOY 30 CRN.
M-703; 3.2 C, 1 5 Ni, 0.8 Cr, 2 5 Si, bal Fe.
Cast: 30,0000 TS.
For oil field valves, pump liners; cast iron, corrosion resistant.

AXLOY 35.
M-703; 3.2 C, 1.9 Si, 0.85 Mn, bal Fe.
Normalized 35,000-45,000 TS, 220 Brin.
For machinery castings, gears; cast iron, wear resistant

AXLOY 35 CN.
M-703; 3 C, 2 Si, 2 Ni, 1 Cr, bal Fe.
Cast· 35,000 TS.
For brake drums, gears, pump liners; abrasion and wear resistant

AXLOY 50
M-703, 3.0 C, 2 2 Si, 1 Mn, bal Fe.
Normalized: 50,000-60,000 TS, 240 Brin
For gears, machinery castings, cast iron

AXLOY 50 CN.
M-703, 3 2 C, 2 2 Si, 2 Ni, 1 Cr, bal Fe
Cast 50,000 TS
For hydraulic cylinders, valves, steam chests, cast iron

AXLOY 50 CNM.
M 703, 3 2 C, 2 Si, 2 Ni, 1 Cr, bal Fe
Cast. 50,000 TS.
For cylinder heads, pressure gates; cast iron.

AXLOY CNM.
M-703, 3 C, 2 Si, 1 Ni, bal Fe.
Cast 35,000 TS
For dies, pistons, liners, cams, wear resistant

AZ
M-699, Al alloy
For light alloy parts.

A-Z5G
French, 5 Zn, 0 5 Mg, 0.2 Ti, 0 3 Cr, bal Al
Aged 31,300-35,600 TS, 18,500 22,800 YS, 5-9 El, 70 Brin
For aircraft components, high strength castings, age-hardenable, shock resistant

AZ8GU
French, 7 0-8 5 Zn, 1 7-3.0 Mg, 1-2 Cu, 0 2 Cr, 0 4 Mn, bal Al
Hardened 95,000 TS, 85,000 YS, 8 El.
For light alloy parts, age-hardenable

AZ 31
M-325, 1 0 Zn, 0 3 Mn, 3 0 Al, bal Mg
Plate, sheet, strip, extrusions
28,000-34,000 TS, 14,000-20,000 Proof stress; 8-12 El; up to 20,000 fatigue strength
Good general purpose alloy with medium strength and good corrosion resistance, weldable

AZ31A.
M-43, 2.5-3 5 Al, 0 6-1.4 Zn, 0 20 min Mn, bal Mg
Heat treated· 32,000-40,000 TS, 16,000-29,000 YS, 12-4 El
For aircraft structural parts; age hardenable.

AZ31B.
M-43; 3 0 Al, 1 0 Zn, bal Mg.
O-temper. 32,000-37,000 TS, 18,000-22,000 YS; 21-12 El; 56 Brin.
F-temper: 32,000-36,000 TS; 16,000-24,000 YS; 6-18 El; 46 Brin.
H24-temper. 37,000-42,000 TS, 24,000-32,000 YS; 6-19 El; 73 Brin.
Sheet, extrusions; formable, weldable; for use to 300°F.
ASTM B107-69; QQ-M-31b.

AZ61A.
M-43, 6.5 Al, 1.0 Zn, bal Mg.
F-temper· 36,000-45,000 TS; 16,000-33,000 YS, 7-16 El; 50-60 Brin.
General purpose alloy for use up to 300°F
Used as welding rod and wire, extruded bars and plate and tube, and forgings.
ASTM B107-69, B91-68, A5 19-69.

AZ63A (Mg Ingot)
M-43; 5.5-6 5 Al, 0 18 min Mn, 2.7-3.3 Zn, 0 04 max Cu, 0.01 max Ni, 0.20 max Si, 0 30 max other, bal Mg.
Ingots for remelting. ASTM B93-66.

AZ63A.
Various foundries; 6 0 Al, 3.0 Zn, 0 15 min Mn, bal Mg.
F-temper· 24,000-29,000 TS; 10,000-14,000 YS; 4-6 El.
T6-temper: 34,000-40,000 TS, 16,000-19,000 YS; 3-5 El.
Sand and permanent mold castings, are hardenable, good corrosion resistance; pressure tight.
For airplane wheel and brake castings, gear housings
ASTM B93-66, AMS 4420, 4422, QQ-M-55b; SAE 50

AZ80A
M-43; 8 5 Al, 0.5 Zn, bal Mg.
T5-temper 48,000-55,000 TS, 33,000-40,000 YS, 4-7 El, 82 Brin
Extruded rods and forgings; good strength.
ASTM B107-69, B91-68, AMS 4360

AZ81A
Various foundries, 7.6 Al, 0 7 Zn, 0 13 min Mn, bal Mg
T4-temper 34,000-40,000 TS, 10,000-12,000 YS; 7 15 El
Sand and permanent mold castings, age hardenable, good corrosion resistance
For aircraft equipment where good elongation and toughness are required.
ASTM B80-69; QQ-M-56, QQ-M-55; SAE 505

AZ91A (Mg Ingot)
M-43, 8 5-9 5 Al, 0 0003-0 001 Be, 0 15 max Mn, 0 45-0 9 Zn, 0 08 max Cu, 0 08 max Ni, 0 20 max Si, 0 30 other, bal Mg
Ingots for remelting
ASTM B93-66.

AZ91A
Various foundries, 9.0 Al, 0 7 Zn, 0 13 min Mn, bal Mg
F-temper: 34,000 TS, 23,000 YS; 3 El
Magnesium die cast alloy with good pressure tightness and corrosion resistance
For housings and small precision parts
ASTM B94-57, QQ-M-38, AMS 4490, SAE 501

AZ91B
Similar to AZ91A

AZ91B (Mg Ingot).
M-43, 8 5-9 5 Al, 0 0003-0 001 Be, 0.15 min Mn, 0 50-0 90 Zn, 0 25 max Cu, 0 01 max Ni, 0 20 max Si, 0 30 max other, bal Mg
Ingots for remelting for die casting and permanent mold casting use only
ASTM B93-66.

AZ91C (Mg Ingot).
M-43, 8 3-9.2 Al, 0.15 min Mn, 0.45-0.90 Zn, 0.04 max Cu, 0 01 max Ni, 0.20 max Si, 0.30 max other, bal Mg
Ingot for remelting.
ASTM B93-66.

AZ91C.
Various foundries; 8.7 Al, 0.7 Zn, 0.13 min Mn, bal Mg.
F-temper: 18,000-24,000 TS; 10,000-14,000 YS; 0.2 El.
T6-temper: 34,000-40,000 TS; 16,000-19,000 YS; 3-5 El.
Sand and permanent mold castings,-good pressure tightness; age hardenable.
For light weight housings for motors and various accessories.
ASTM B80-69; QQ-M-56; QQ-M-55; SAE 504

AZ92A (Mg Ingot).
M-43; 8 5-9.5 Al, 0.13 min Mn, 1.7-2.3 Zn, 0.04 max Cu, 0.01 max Ni, 0.20 max Si, 0.30 max other, bal Mg.
Ingot for remelting. ASTM B93-66.

AZ92A.
Various foundries; 9.0 Al, 2 0 Zn, 0 10 min Mn, bal Mg
F-temper: 20,000-24,000 TS, 10,000-14,000 YS, 1-2 El.
T4-temper: 34,000-40,000 TS; 10,000-14,000 YS; 6-9 El.
Sand and permanent mold castings with good balance of strength, ductility and pressure tightness, for motor housings for portable power tools
ASTM B80-69,B199-68; SAE 500,503.
AMS 4434,4484; QQ-M-56; QQ-M-55

AZ100A (Mg Ingot).
M-43; 9 4-10.6 Al, 0.13 min Mn, 0.20 max Zn, 0 04 max Cu, 0 01 max Ni, 0 20 max Si, 0 30 max other, bal Mg
Ingots for remelting ASTM B93-66

AZA.
M-1638; 0 45-0 85 Cu, 0 5 Fe, 0 15 Si, 7 1-7 8 Zn, 0 2-0 5 Mg, 0 1-0 2 Ti, 0 3 Mn, 0 2 Cr, 0 003 Be, 0 05 Ni, bal Al
Aged. 38,000 TS, 26,000 YS, 5 El, 77 Brin.
For hardware, aircraft and oil field equipment, dairy and agriculture equipment.
Pressure tight castings

A.Z. ALLOY.
M-591, 33 Zn, 1 Pb, bal Cu
For plates for photoengraving, free-cutting.

AZM.
M-325, 1.0 Zn, 0 3 Mn, 6.0 Al, bal Mg.
Extrusions and forgings.
30,000-36,000 TS; 20,000-22,000 Proof stress, 7-10 El, 55-70 VDH.
Medium strength alloy, machines readily, difficult to cold form and to weld; may need protection against corrosion.

AZOWIT 25 S.
M-1326; 0 30-0 37 C, 0 60 0.90 Mn, 0 80-1.10 Al, 1.0-1.3 Cr, bal Fe
Oil hardenable; to be casehardened by nitriding, good core hardness and strength.
DIN 34 Cr Al S5.

AZOWIT 30 M
M-1326; 0.20-0.34 C, 2.3-2 7 Cr, 0.15-0.25 Mo, 0.10-0.20 V, bal Fe.
Oil hardenable; to be case hardened by nitriding to surface hardness of 47-56 Rock C.
DIN 31 Cr Mo V 9.

AZOWIT 30 ML.
M-13[illegible]; 0.30 C, 0.25 Si, 0.50 Mn, 2 5 Cr, 0.20 Mo, 0.15 V, bal Fe.
Alloy steel, case hardenable by nitriding.
DIN 31 Cr Mo V 9; Werkstoff Nr. 1.8514.

AZOWIT 32 M.
M-1326; 0.28-0.35 C, 2.8-3.3 Cr, 0.3-0.5 Mo, bal Fe.
Oil hardenable; to be case hardened by nitriding to 48-57 Rc surface hardness.
DIN 32 Cr Mo 12.

AZOWIT 35
M-1326; 0.30-0.37 C, 0 60-0.90 Mn, 0 80-1.10 Al, 1 20-1.50 Cr, bal Fe.
Oil hardenable; to be case hardened by nitriding; good core hardness and strength.
DIN 34 Cr Al 6.

AZOWIT 35 M.
M-1326, 0.30-0.37 C, 0.60-0.90 Mn, 0.80-1 10 Al, 1 0-1.3 Cr, 0 15-0.25 Mo, bal Fe.
Oil hardenable; to be case hardened by nitriding, good core hardness and strength
DIN 34 Cr Al Mo 5

AZOWIT 35 ML
M-1326, 0 32 C, 0 25 Si, 0 60 Mn, 1.10 Cr, 0 20 Mo, 1 1 Al, bal Fe
Alloy steel, case hardenable by nitriding
DIN 34 Cr Al Mo 5, Werkstoff Nr 1 8544

AZOWIT 38 M
M-1326, 0 30 0 37 C, 0 80-1.10 Al, 1.50-1.80 Cr, 0 15-0 25 Mo, 0 90-1 10 Ni, bal Fe
Oil hardenable, to be case hardened by nitriding; good core hardness and strength
DIN 34 Cr Al Ni 7.

AZZALON.
M-96, 0 75-0 85 C, 0 05 Si, bal Fe
For welding rod

B NO 4
M-114, 0 7 C, 18 W, 4 Cr, 1 V, bal Fe
For drills, reamers, cutters, hobs, taps, broaches, high speed steel, oil hardened.

B NO 9
M-114, 0 7 C, 9 5 Mo, 1 5 W, 4 Cr, 1 V, bal Fe
For drills, reamers, hobs, broaches, taps, cutters, high speed steel, oil hardened

B9-HIGH SPEED
M-114; 8 84 C, 4 2 Cr, 18 5 W, 2 V, bal Fe
For tools, taps, reamers, high speed steel

B-10 HIGH SPEED STEEL
M-114; 0 8 C, 4 5 Cr, 18 5 W, 2 V, 9 Co, bal Fe.
For lathe and form tools, reamers, broaches, high speed steel for heavy cuts

B-47 HOT WORK
M-1, 0 40 C, 0 35 Mn, 4 2 Cr, 4 2 W, 4 2 Co, 2 2 V, 0 4 Mo, bal Fe
At 800°F 178,000 TS, 9 El; 36 RA
At 1200°F 110,000 TS, 16 5 El; 37 RA.
For hot work tools and dies, press dies, hot punches; hot work steel, AISI type H 19.

B-50
M-1683, 0 50 C, 0 85 Mn, 1.1 Cr, 0.15 V, 0 25 Mo, bal Fe.
Oil hardening tool steel for shafts, arbors, lathe centers

"B.50" QUALITY.
M-179; 60 Cu, 1 Pb, bal Zn.
Extruded· 55,000 TS; 30 El; 30 RA; 110 Brin.
Drawn: 64,000 TS; 26 El; 25 RA; 115 Brin.
For screw machine products, hardware; yellow brass.

B-76.
(See Heppenstall B76).

B-1900.
M-1491; 0.10 C, 8 Cr, 10 Co, 6 Mo, 1 Ti, 6 Al, 0.015 B, 0.10 Zr, 4 Ta, bal Ni.
At R.T.: 141,000 TS; 120,000 YS; 8 El.
At 1400°F: 138,000 TS; 117,000 YS; 4 El.
For high temperature applications, jet engines, turbines.
Heat and corrosion resistant.
Casting alloy. Good thermal fatigue and creep resistance.

B.A. 20.
M-28; 1.3 Mg, 1.0 Mn, bal Al.
Annealed: 23,000-15,500 TS; 11,000 YS; 18-15 El; 35 Brin.
For light alloy parts; architectural uses; wrought.

BA.21.
M-28, 1.5-2 5 Mg, 0.5 max Mn, bal Al.
O-temper: 24,500 TS; 11,000 YS, 18 El, 45 Brin.
½ H-temper: 33,500 TS; 27,000 YS; 5 El, 70 Brin.
Extruded: 24,500 TS; 14,500 18 El; 48 Brin
For marine applications; good corrosion resistance.

B.A.-23.
M-28; 1.0-1.5 Mg, 0.5-0.75 Si, bal Al
Sand cast: 14,000 TS, 7,500 YS; 3 El, 50 Brin
Hardened· 36,000 TS, 26,000 YS; 12 El; 85 Brin
For electrical fittings, architectural purposes; sand or dies cast, age-hardenable.

B A 24.
M-28; 0.5 Mg, 0 5 Si, bal Al
Annealed 26,000 TS, 16,000 YS, 18 El, 52 Brin
Aged· 36,000 TS, 29,000 YS, 8 El, 75 Brin.
For light alloy parts, aircraft components, age-hardenable, extruded

B.A. 24-MS.
M 28, 0.5 Mg, 0 5 Si, bal Al
Heat treated: 33,000 TS, 29,000 YS, 12 El, 90 Brin.
For light alloy parts, age-hardenable.

B.A.25.
M-28, 1 Mg, 1 Si, 0 5 Mn, bal Al
Heat treated 47,000 TS, 41,000 YS, 10 El, 110 Brin
For structural parts, age-hardenable

BA 27
M-28, 3-4 Mg, 1 0 max Mn, bal Al
O-temper 31,500 TS, 13,500 YS, 18 El, 55 Brin
½ H-temper. 40,500 TS, 33,500 YS, 5 El, 95 Brin
Extruded· 31,500 TS, 13,500 YS, 18 El, 55 Brin
For marine applications, good corrosion resistance

BA.28.
M-28, 4 5-5.5 Mg, 1 0 max Mn, bal Al
O-temper: 38,000 TS, 18,000 YS, 18 El, 65 Brin
½ H-temper· 45,000 TS; 38,000 YS, 5 El, 105 Brin
Sand cast 20,000 TS; 11,000 YS; 3 El, 54 Brin.
Extruded· 36,000 TS, 18,000 YS, 18 El; 60 Brin.
For architectural trim, moderately stressed parts, good corrosion resistance.

B A. 29.
M-28; 10-11 Mg, bal Al.
Heat treated. 36,000-40,000 TS, 24,000-29,000 YS, 7-12 El, 95-105 Brin.
For light alloy castings; sand and permanent mold, age-hardenable

BA-31.
M-28; 5-6 Cu, bal Al
Cast· 25,000 TS, 4 El, 65 Brin.
For light alloy parts, shock resistant.

BA.32.
M-28; 4-5 Cu, bal Al.
Cast: 31,500 TS, 18,000 YS; 7 El; 80 Brin.
Hardened: 47,000 TS; 47,000 YS; 1 El; 135 Brin.
For aircraft and transport castings; age-hardenable.

BA.33.
M-28; 3.5-4.5 Cu, 1.8-2.3 Ni, 1.2-1.7 Mg, bal Al.
Cast: 22,500 TS; 21,500 YS; 1 El; 90 Brin.
Heat treated: 31,500 TS; 30,000 YS; 1 El; 105 Brin.
For engine parts, pistons, cylinder heads; age-hardenable.

B.A.-34.
M-28; 9-11 Cu, 1 0-1.3 Fe, 0.2-0.3 Mg, bal Al.
Cast· 24,000 TS; 22,000 YS; 1.0 El; 105 Brin.
Hardened: 46,000 TS, 36,000 YS; 0.5 El; 140 Brin.
For pistons; age hardenable.

BA35.
M-28; 3 Cu, 0.5 Mg, 0.6 Sb, 0.2 Sn, bal Al.
Extruded· 36,000 TS; 15,500 YS; 10 El; 80 Brin.
For machinery parts, fasteners; free-cutting.

B.A.-37.
M-28; 7.5-8 5 Cu, 1.5-2 5 Si, bal Al.
Cast: 20,0000-26,000 TS; 1.5-3.0 El; 75 Brin.
For light alloy parts; sand and die casting.

BA 40
M-28; 10-13 Si, bal Al.
Sand cast 23,500 TS; 9000 YS, 5 El; 55 Brin
Chill cast· 27,000 TS, 10,000 YS, 7 El; 60 Brin.
For marine and general engineering castings; good corrosion resistance.

B.A./40D ALLOY.
M-28; 10-13 Si, bal Al.
Sand cast 23,500-24,000 TS; 11,000-13,500 YS, 8-5 El; 50-55 Brin
Chill cast 29,000-31,300 TS; 12,000-14,500 YS 15-8 El, 55-60 Brin
For light alloy parts, wrought forms, corrosion resistant castings, resists sea water corrosion modified alloy.

B A./40 J
M-28; 8 Si, bal Al
Sand cast 20,000-22,000 TS, 9,500-10,000 YS; 11-6 El, 47 Brin
For medium strength castings, corrosion resistant.

B A. 40M
M-28, 10-13 Si, bal Al
Cast 24,000-33,000 TS; 4-5 El, 70-75 Brin.
For light alloy parts, die castings

BA 41.
M-28, 10-13 Si, 0 6 max Mg, 0 6 max Mn, bal Al.
Aged 24,500 TS, 15,500 YS, 1 5 El; 75 Brin.
Hardened 34,500 TS; 34,500 YS; 1 0 El, 105 Brin.
For marine and general engineering castings; age-hardenable.

BA42
M-28, 12-14 Si, 1-3 Ni, 0.8-1 3 Mg, 0 7-1.2 Cu, bal Al.
Sand cast 24,000 TS; 0.5 El, 130 Brin.
Permanent mold· 36,000 TS; 0 5 El, 140 Brin.
For pistons, cylinder heads; low expansion, corrosion resistant.

BA 45.
M-28. 4.5-5.5 Si, bal Al
Sand cast: 18,000 TS; 9000 YS, 4 El, 40 Brin.
Chill cast 22,500 TS; 10,000 YS, 6 El; 50 Brin.
For hollowware, castings; good corrosion resistance.

BA46
M-28; 0.5 Mg, 5.0 Si, 0.35 Mn, bal Al.
P-temper. 21,300 TS, 1 El.
WP-temper: 33,600 TS; 2 El.
For general engineering castings; corrosion resistant, age-hardenable.

BA.60.
M-28; 1.0-1.5 Mn, bal Al.
O-temper: 13,500 TS; 8500 YS; 30 El; 30 Brin.
H-temper: 26,000 TS; 25,000 YS; 3 El; 51 Brin.
Extruded: 13,500 TS; 8000 YS; 20 El; 30 Brin.
For sheets and coiled strip, roofing; high corrosion resistance.

B.A./60A ALLOY.
M-28, 1.25 Mn, bal Al.
Hard: 29,000 TS; 25,000 YS; 5-3 El; 28 Brin.
Soft: 14,000 TS; 5000 YS; 40 El; 55 Brin
For light alloy parts, tubes, sections; corrosion resistant.

BA.301.
M-28; 3.5-5.0 Cu, 0.4-1.2 Mg, 0.4-1.2 Mn, 0.7 max Si, bal Al.
Solution treated: 54,000 TS; 31,500 YS, 15 El; 105 Brin.
For aircraft, road and rail transport, structures, high strength, heat treatable.

BA. 303.
M-28, 3.5-4.8 Cu, 0.6 max Mg, 1.2 max Mn, 1.5 max Si, bal Al.
Solution treated: 54,500 TS; 31,500 YS; 15 El; 115 Brin.
Aged: 62,500 TS; 51,500 YS; 8 El, 135 Brin
For aircraft, road and rail transport, structures, heat treatable, high strength.

BA 306.
M-28; 1.7 Cu, 0.7 Mg, 1 Si, 0.6 Mn, bal Al
W-temper: 44,800 TS, 27,000 YS, 15 El.
WP-temper 58,000 TS; 49,000 YS, 8 El
For light alloy parts; age-hardened

BA.352
M-28, 3.5-5.0 Cu, 0.4-1.2 Mg, 0.4-1.2 Mn, 0.7 max Si, bal Al.
Solution treated 54,000 TS, 31,500 YS; 15 El
For aircraft, road and rail transport structures; heat treatable, high strength.

BA.353.
M-28; 3.5-4.8 Cu, 0.6 max Mg, 1.5 max Si, 1.2 max Mn, bal Al.
Solution treated: 54,000 TS, 31,500 YS; 15 El
Aged 58,000 TS; 45,000 YS, 8 El.
For aircraft, road and rail transport, structures, heat treatable, high strength.

BA. 701.
M-28, 1.3 Cu, 2.9 Mg, 0.4 Mn, 5.7 Zn, 0.1 Cr, bal Al.
WP-tempered 81,000 TS, 69,400 YS, 9 El
For light alloy parts, age-hardened

BA 703
M-28; 1 Cu, 2.6 Mg, 0.25 Mn, 5.7 Zn, 0.1 Cr, bal Al
WP-temper 78,000 TS, 67,000 YS, 7 El.
For light alloy parts, age-hardened

BA. 704.
M-28; 1 Cu, 3 Mg, 0.25 Mn, 6 Zn, 0.1 Cr, bal Al
WP-temper: 85,000 TS, 74,000 YS, 5 El.
For light alloy parts, age-hardened.

BA.751.
M-28; 4.5-6.5 Zn, 2.0-3.5 Mg, 1.5 max Cu, 0.3-1.0 Mn, bal Al.
Age hardened 67,000-71,500 TS; 58,000-60,500 YS, 8 El.
For aircraft structures; age-hardenable.

B.A C. BRIGHTRAY.
M-121; 80 Ni, 20 Cr.
For fusion coating of poppet valves; resists heat and corrosion.

BACHITE.
M-704; 0.2 C, 18 Cr, 8 Ni, bal Fe.
For stainless parts, chemical equipment; austenitic.

BACK CASE METAL.
Eng; 62 Cu, 20 Zn, 18 Ni
For heat and corrosion resistant parts.

BADALL.
M-1535, 0.25 C, 0.028 S, 0.65 Si, 0.15 Mo, 0.85 Mn, 0.60 max Cr, 0.0025 max B, bal Fe.
Plate: 245,000 TS; 210,000 YS, 11 El; 44 RA, 500 Brin.
Plate: 190,000 TS; 175,000 YS, 16 El; 55 RA; 360-400 Brin
For severe service applications, pressure vessels, wear plates.
Heat treated, wear resistant plates.

BADGER.
M-73; 0.95 C, 0.3 Si, 1.2 Mn, 0.5 W, 0.5 Cr, bal Fe.
Heat Treat: 250,000 TS, 225,000 YS, 8 El; 16 RA; 50 Rock C
For blanking dies, punches, reamers, threading dies, non-deforming, oil hardening tool steel, AISI 01

BADGER
M-435, 1.2 C, 1.5 W, 0.4 Cr, 0.2 V, bal Fe
For tools, cutters, broaches, hot work tools, non-deforming.

BADGER DRILL ROD
M-1702, 0.94 C, 1.2 Mn, 0.3 Si, 0.5 Cr, 0.5 W, bal Fe
Oil hardening tool steel, AISI 01

BADGER FLAT GROUND
M-1702, 0.94 C, 1.2 Mn, 0.3 Si, 0.5 Cr, 0.5 W, bal Fe
Oil hardening tool steel, flat ground condition, AISI 01

BADGER STEEL
M-253, 0.9 1.2 C bal Fe
For taps, reamers, threading dies

BAHNALUMINIUM
M 621, 6 Cu, bal Al
Extruded 29,000 TS, 13,000 YS, 20 El, 50 Brin
Cold drawn: 36,000 TS; 17,000 YS, 10 El; 70 Brin
For light alloy parts, electric pantographs

BAILY'S METAL
Eng, 82.1 Cu, 12.8 Sn, 5.1 Zn
For bearings, corrosion resistant castings, corrosion resistant

BAKER NO 175L
M-18, 60 Ag, 20 Cu, 20 Zn
Annealed. 78,600 TS, 18 El
For coined parts, bearings, Silver solder, M P. 680°C.

BAKER ALLOY NO. 934
M-18, Pt alloy
For electrical resistances; resistance wire.

BAKER ALLOY NO. 1534
M-18, 8.5 Pt, 72.5 Au, 4 Ag, 14 Cu, 1 Zn.
Wire 182,500 TS, 1.3 El.
For electrical resistances; resistance wire.

BAKER 1729
M-18, 40.5 Pd, 10 Fe, bal Au.
Wire: 200,000-220,000 TS
For resistors; high electrical resistance.

BAKER ALLOY 1757.
M-18; 79 Pt, 15 Rh, 6 Ru.
Wire. 278,000 TS, 1.8 El.
For electrical contact equipment.
Corrosion resistant.

BAKER ALLOY NO 1765.
M-18; 92 Pt, 8 W.
300,000 TS, 2 El.
For electrical resistances; resistance wire.

BAKER 1780.
M-18; 40 Au, 10 Fe, bal Pd.
Wire: 175,000-210,000 TS.
For resistors; high electrical resistance.

BAKER CONTACT ALLOY NO. 846.
M-18, 50 Pt, 26 Pd, 20 Au, 4 Ag
Annealed: 107,000 TS; 85,000 YS; 25 El.
Hard 171,000 TS; 163,000 YS; 3 El.
For electrical contacts; heat resistant.

BALCO.
M-61; 30 Fe, bal Ni.
Rolled 70,000 TS.
For voltage resistors
Magnetic, high permeability

BALCO
M-897; 29-31 Fe, bal Ni.
Annealed: 80,000 TS, 55,000 YS; 25 El.
For thermometer bulbs, ballast tubes; heat resistant to 590°C.

BAL-CUT 1035
M-516, 0.15-0.25 Pb, 0.30-0.40 C, bal Fe.
For gears, shafts, free machining

BAL CUT X-1314
M-516, 0.10-0.20 C, 1.0-1.3 Mn, 0.15-0.25 Pb, bal Fe
For gears, shafts, free machining

BAL-CUT X-1335.
M-516, 0.15-0.25 Pb, 0.30-0.40 C, 1.35-1.65 Mn, bal Fe.
For gears, shafts, free machining.

BALDER
M-111, 0.05 C, 0.1 Si, 0.1 Mn, bal Fe
For electrical equipment, soft magnet iron

BALDWIN NO 1
M-1510, 0.75 C, 0.91 Cr, 0.40 Mo, 0.81 Mn, 1.78 Ni, bal Fe
For dies, punches, shear blades, knives, rolls; oil hardened, shock resistant

BALDWIN NO 711
M-1510, 0.35 C, 0.86 Cr, 0.81 Mn, 0.35 Mo, 0.48 Si, 0.34 Cu
Heat treated 267,000-275,000 TS, 209,000-221,000 YS; 13-15 El; 37-51 RA; 560-580 Brin
For chisels, punches, hard tools, furnace bars, dies, shears, non-tempering, water hardened.

BALDWIN AH
M 1510, 1.1 C, 0.75 Mn, 5.5 Cr, 0.3 V, 1.2 Mo, bal Fe
For dies, gages, forming rolls, master hobs, cutters, non-deforming, air hardened

BALDWINS P 25.
M-1417, 0.35 max C, 25 Cr, bal Fe
Annealed 85,000 TS, 50,000 YS, 30 El, 55 RA, 180 Brin
For furnace parts and equipment, heat treating boxes, Type 446, heat resistant

BALDWINS P 25-12.
M-1417, 0.20 max C, 24 Cr, 12 Ni, bal Fe.
Annealed 90,000 TS, 40,000 YS, 50 El, 65 RA, 170 Brin
For furnace parts, pumps, oil burners; Type 309; heat resistant.

BALDWINS P 25-22
M-1417; 0.25 max C, 25 Cr, 20 Ni, 1.5-3.0 Si, bal Fe
For furnace parts, Type 314; heat resistant.

BALDWINS P E.C
M-1417, 0.08 max C, 18 Cr, 9 Ni, Cb, bal Fe.
Annealed: 90,000 TS, 45,000 YS, 50 El; 65 RA; 160 Brin.
For welded chemical plant equipment, tanks; Type 347; stainless, austenitic.

BALDWINS P.E.H.
M-1417; 0.17-0.25 C, 18 Cr, 8 Ni, bal Fe.
Annealed 85,000 TS, 40,000 YS; 50 El; 70 RA; 170 Brin.
For chemical plant equipment, tanks, mixers, Type 302; stainless, austenitic.

BALDWINS P.E.L.
M-1417, 0.10 C, 18 Cr, 8 Ni, bal Fe.
Annealed 80,000 TS, 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, filters, Type 302; stainless, austenitic.

BALDWINS P E T.
M-1417, 0.08 max C, 18 Cr, 8 Ni, Ti, bal Fe.
Annealed. 85,000 TS; 35,000 YS, 55 El, 65 RA; 150 Brin.
For welded chemical plant equipment, tanks, mixers, Type 321; stainless, austenitic.

BALDWINS P.K.H
M-1417, 0.26-0.37 C, 13 Cr, bal Fe
Annealed: 100,000 TS, 55,000 YS, 22 El, 52 RA; 210 Brin
For valves, cutlery, surgical and dental instruments, Type 420; corrosion resistant

BALDWINS P.K I
M-1417, 0.07-0.12 C, 17 Cr, bal Fe.
Annealed 80,000 TS, 50,000 YS, 25 El, 50 RA; 160 Brin.
For oil refinery equipment, oil burners and heaters, bolts; Type 430, corrosion resistant

BALDWINS P K L
M 1417, 0.13-0.18 C, 13 Cr, bal Fe.
Annealed 75,000 TS, 40,000 YS, 35 El, 70 RA, 155 Brin
For turbine blades, valves, cutlery, surgical instruments, Type 410, corrosion resistant

BALDWINS P K M
M-1417, 0.19-0.25 C, 13 Cr, bal Fe
Annealed 95,000 TS, 50,000 YS, 25 El, 55 RA, 195 Brin
For valves, cutlery, surgical instruments, Type 420; corrosion resistant

BALDWINS P K N
M-1417, 0.25 max C, 17 Cr, 2 Ni, bal Fe
Annealed 125,000 TS, 95,000 YS, 20 El, 55 RA; 260 Brin
For pumps, marine hardware, valves, Type 431, corrosion and heat resistant

BALDWINS P M H
M 1417, 0.12 max C, 18 Cr, 10 Ni, 2.5 Mo, bal Fe
Annealed: 85,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin.
For acid resistant chemical plant equipment, mixers, Type 316, stainless, austenitic.

BALDWINS P.M.L.
M-1417, 0.07-0.12 C, 18 Cr, 9 Ni, 1.5 Mo, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, 65 RA; 160 Brin.
For acid resistant chemical plant equipment, Type 316, stainless, austenitic

BALDWINS P T L.
M-1417, 0.08-0.16 C, 12 Cr, 10 Ni, bal Fe
For valves, pump parts, corrosion resistant

BALFORS ULTRA-CAPITAL +1.
Eng., C, alloy, bal Fe.
For cutters, tools, high speed steel

BALFOSTEEL
M-359, 0.7-1.2 C, bal Fe.
For punches, dies, reamers, saws; water hardening.

BALFOUR 4.T.S.S.
M-1112; 1.25 C, 1.2 Cr, 4.5 W, 0.25 V, bal Fe.
For reamers, rolls, punches, drawing dies; oil hardened, abrasion resistant.

BALFOUR 227.
M-1112; 0.28 C, 9 W, 3 Cr, 0.3 V, bal Fe.
For bolt headers, extrusion dies and liners; hot work steel, tough.

BALFOUR 293.
M-1112; 0.36 C, 3 Cr, 9 W, 0.3 V, bal Fe.
Annealed: 230 Brin.
For extrusion and hot piercing dies, rams, liners; hot work steel, oil hardened.

BALFOUR 351.
M-1112; 0.5 C, 1 Cr, 2 W, 0.3 V, bal Fe.
For punches, forging dies, shear blades; hot work steel, oil hardened.

BALFOUR A.B.75.
M-1112; 0.6 C, 2 Si, 0.85 Mn, 0.25 Cr, bal Fe.
For pneumatic chisels, shear blades, punches; oil hardened, tough.

BALFOUR A.G.S.
M-1112; 1.05 C, 1.3 Cr, 0.35 Mn, 0.25 Si, bal Fe.
Annealed: 210 Brin.
For forming rolls, cams, jigs, trimming dies; oil hardened, tough.

BALFOUR BLUE LABEL.
M-1112; 0.7-0.8 C, 0.3 Mn, bal Fe.
For drills, taps, punches, crimpers; Type W1; water hardened.

BALFOUR DARWINS AR1.
M-1725;
Corrosion resistant alloy useful in handling sulphuric acid.

BALFOUR DARWINS AR2.
M-1725;
Nickel-chromium-copper-molybdenum alloy for resistance to hot concentrated sulphuric acid.

BALFOUR DARWINS AR3.
M-1725;
Nickel-chromium-copper-iron alloy for resistance to sulphuric and phosphoric acids; used in pickling processes and in drainage disposal plants.

BALFOUR DARWINS AR4A.
M-1725;
Nickel-molybdenum-iron alloy for use with hydrochloric and sulphuric acids.

BALFOUR DARWINS AR5B.
M-1725;
Nickel-molybdenum-iron alloy; higher molybdenum than AR4A for greater corrosion resistance.

BALFOUR DARWINS AR6C.
M-1725;
Nickel-molybdenum-chromium-iron alloy for handling oxidizing acids as nitric acid and mixed acids and salts containing free chlorine.

BALFOUR DARWINS AR7.
M-1725;
A duplex, age-hardenable, corrosion-resistant stainless steel with good strength, weldability, resistance to corrosion and galling; used particularly in wood pulp processing.

BALFOUR DSW.
M-1112; 1.3 C, 4.5 W, bal Fe.
For dies, cutters; water or oil hardened.

BALFOUR E.X.D.I.
M-1112; 0.33 C, 1.5 Cr, 5.5 W, 3.75 Ni, bal Fe.
For extrusion dies, upsetting dies, mandrels; hot work steel, oil hardened.

BALFOUR NSS3.
M-1112; 0.95 C, 2.0 Mn, 0.3 Si, bal Fe.
For punches, reamers, taps, dies, cams, pawls; oil hardened, non-deforming.

BALFOUR OO.
M-1112; 0.6 C, 1 Cr, 2 W, 0.3 V, bal Fe.
For dies, punches, trimmers; oil hardened, non-deforming.

BALFOUR P.R.N.2.
M-1112; 1.05 C, 1.1 Mn, 1.5 Cr, bal Fe.
For blanking and forming dies, master hobs; oil hardened, abrasion resistant.

BALFOUR R.9030.
M-1112; 0.30 C, 0.75 Cr, 0.5 Mo, 2.75 Ni, bal Fe.
For plastic mold dies, piercing punches; hot work steel, oil hardened.

BALFOUR R9030.
M-1112; 0.95 C, 1.25 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, dies, punches, forming dies, crimpers, upsetters; oil hardened, non-deforming.

BALFOUR RSD.
M-1112; 0.95 C, 1.25 Mn, 0.5 W, 0.5 Cr, bal Fe.
For tools, dies, punches, headers, upsetters; non-deforming, oil hardened.

BALFOUR SC13.
M-1112; 2.15 C, 11.5 Cr, 0.75 Mo, bal Fe.
For blanking and forming dies, engravers rolls, hobs, nondeforming, air hardened

BALFOUR S.C.25.
M-1112; 1.5 C, 0.25 V, 0.75 Mo, 12 Cr, bal Fe
For blanking and forming dies, shear blades, air hardened, non-deforming

BALFOUR S.C.26.
M-1112; 1.8 C, 12 Cr, 0.3 Mn, 0.2 Si, bal Fe
For rolling dies, shear blades, rim rolls; air hardened, non-deforming.

BALFOUR SCP.
M-1112; 0.9 C, 0.15 V, bal Fe.
For chisels, drills, taps, punches, reamers, hobs; Type W2; water hardened.

BALFOUR S.D.20.
M-1112, 0.35 C, 0.60 Mn, 1.2 Cr, 1.75 Ni, bal Fe.
Annealed. 200 Brin.
For plastic mold dies, punches, extrusion dies; oil hardened, shock resistant.

BALFOUR S.I.W
M-1112, 0.65 C, 1.1 Si, 0.70 Mn, 0.2 Cr, 1.3 W, bal Fe.
Annealed: 220 Brin.
For pneumatic chisels, rivet snaps, shear blades; oil hardened, fatigue resistant.

BALFOURS SHOE DIE
M-350; 0.5 C, 0.6 Cr, 0.3 Mo, bal Fe.
For tools, leather cutters, oil hardened

BALFOUR TIO.H.
M-1112; 0.9 C, 1.2 Mn, 0.4 Cr, 0.5 W, bal Fe
For blanking and forming dies, cams, pauls; oil hardened, non-deforming

BALFOUR TSS.
M-1112; 1.3 C, 4.5 W, bal Fe.
For dies, cutters; water or oil hardened

BALLAST.
M-897; 99.8 Ni.
Soft: 60,000 TS; 18,000 YS; 50 El.
For cathodes and filaments for electronic tubes; heat resistant.

BALLAST NICKEL.
M-61; 99.6 Ni.
Annealed: 56,000 TS.
For ballast wire for voltage control electrical equipment; resistance 52 ohms/mil. ft.

BALL BEARING STAINLESS STEEL.
M-521; 0.4 C, 0.25 Si, 0.3 Mn, 11.5 Cr, bal Fe.
Annealed: 110,000 TS; 72,000 YS; 20 El; 240 Brin.
For ball bearings; corrosion resistant

"B" ALLOY.
U.S., 25 Zn, 3 Cu, bal Al.
For light alloy parts; non-hardenable.

BA.LM8.
M-28; 0.3-0.8 Mg, 3.5-6.0 Si, 0.5 max Mn, bal Al.
Sand Cast: 17,920 min TS; 11,200 PS, 2 min El.
WP-Sand Cast 33,600 min TS; 31,400 PS, 5 min El
WP-Chill Cast: 40,320 min TS; 31,400 PS; 2 min El.
For cylinder heads, propeller gear boxes, gear housings, crankcases
Pressure-tight leak-proof castings.

BALTIC C.D V.1.
M-1406; 2.25 C, 11.5 Cr, 0.5 Mo, 0.3 V, bal Fe.
For blanking and extrusion dies; oil hardened, non-deforming.

BALTIC C.D.V 2.
M-1406, 1.6 C, 12 Cr, 0.8 Mo, 0.5 V, bal Fe.
For blanking and extruding dies, gages, shear blades; air hardened, non-deforming

BALTIC C.L. 15
M-1406, 0.38-0.42 C, 3.0-3.5 Ni, 0.60 max Mn, bal Fe.
For chisels, snaps, tools, punches, tough and shock resistant

BALTIC C L 40T.
M-1406, 0.55 C, 2 Si, 0.90 Mn, 0.30 Cr, 0.20 V, bal Fe.
For punches, shear blades, concrete breakers, tough, shock resistant

BALTIC C.L 45.
M-1406, 0.50 C, 1.2 Cr, 0.7 Mn, 0.2 V, bal Fe.
For chisels, pneumatic tools, pistons, tough, shock resistant.

BALTIC C L.60
M-1406, 0.60 C, 0.60 Cr, 0.70 Mn, bal Fe
For vice grips, general tools; water hardened.

BALTIC C L 222.
M-1406, 0.35 C, 0.80 Cr, 0.70 Mo, 0.50 W, bal Fe
For punches, snaps, shear blades, pneumatic tools; non-tempering, water hardened.

BALTIC C.L 224.
M-1406, 0.55 C, 1.5 Ni, 0.75 Cr, 0.3 Mo, bal Fe
For drop forging dies, tough and wear resistant.

BALTIC C L 225
M-1406; 0.50 C, 0.50 Mn, 1.25 Ni, 0.50 Cr, 0.25 Mo, bal Fe
For drop forging dies; tough and wear resistant.

BALTIC C.L 400.
M-1406, 0.9 C, 3.75 Cr, 0.5 Mo, 0.5 V, bal Fe
For forging and extrusion dies, hot shears and punches, hot die steel, air or oil hardened.

BALTIC C L.444.
M-1406; 0.35 C, 5 Cr, 0.9 Si, 1.5 Mo, 1.25 W, 0.3 V, bal Fe.
For forging and extrusion dies, hot shears and punches; shock resistant, hot die steel.

BALTIC C.L.444W.
M-1406; 0.35 C, 0.90 Si, 5 Cr, 5 W, 0.30 V, bal Fe
For hot heading and gripping dies; oil hardened, hot die steel.

BALTIC C.L.666.
M-1406; 0.60-0.70 C, 0.40 Mn, 6 W, 0.6 Cr, bal Fe.
For coal cutters, picks; air or oil hardened.

BALTIC L.C.H D.
M-1406; 0.30 C, 9-10 W, 2.75 Cr, 0.4 V, bal Fe.
For dies, inserts and liners, oil hardened, hot die steel.

BALTIC P C S K.
M-1406; 0.45 C, 2 W, 1.5 Cr, 0.25 V, bal Fe.
For chisels, snaps, pneumatic tools, tough and shock resistant.

BALTOC.
M-260, M-38, 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe
For hogging tools for heavy cuts; high speed steel.

BAND FILE
M-38; 1.25 C, 0.5 Cr, bal Fe.
For files; water or oil hardening

BARAL.
M-511, up to 50 Ba, bal Al.
For getters in electrical discharge devices and vacuum tubes; good stability in air.

BARE-BRITE A632
M-663; Bare wire for inert gas welding of T1 steel, HY-80 and similar grades.
MIL-E-19822A, Type B88.

BARE-BRITE AX-90.
M-663, Low alloy bare wire for welding high strength low alloy steel for 100,000 psi TS in weld area Used for ships, military vessels and equipment, earth moving equipment.
MIL-E-23765/2 Type 100 S-1

BARE BRITE AX-110
M-663, Low alloy bare wire for welding high strength low alloy steel for 120,000 psi TS in weld area
MIL-F-23765/2 Type 120S-1.

BARE-BRITE AX-140
M-663, 0.10 C, 1.8 Mn, 0.35 Si, 2.25 Ni, 1.0 Cr, 0.55 Mo, bal Fe
Low alloy bare wire for welding high strength low alloy steel for 140,000 psi TS in weld area.
MIL-E-24355 Type 140S.

BARIO
Eng; 21.4 Cr, 57.4 Ni, 1 Fe, 15.4 W, 0.3 C
For resistor elements, stainless and corrosion resisting

BARIO, HARD
30 Co, 30 Cr, 25 W, 10 Mn, 5 Ti.
For tools, high temperature applications, corrosion and heat resistant.

BARIO, SHEET
90 Ni, 4.3 Cr, 1.2 W, 0.3 Si, traces Co, Cu, Fe
For tools, high corrosion resistant parts; stainless and corrosion resistant.

BARIO, SOFT.
60 Co, 20 Cr, 20 W
For tools, heat and corrosion resistant parts, corrosion and heat resistant.

BARIUM 13 Cr.
M-705, 0.12 C, 12-15 Cr, bal Fe
Annealed: 65,000-75,000 TS; 40,000-45,000 YS; 30 El, 60 RA.
For stainless parts; corrosion resistant.

BARIUM 17 Cr.
M-705; 0.10 C, 16-23 Cr, bal Fe.
Annealed: 70,000-80,000 TS, 40,000-45,000 YS; 28 El; 55 RA.
For stainless trim; corrosion resistant.

BARIUM 18-8.
M-705; 0 05-0 20 C, 16-23 Cr, 7-11 Ni, bal Fe.
Annealed: 80,000-89,000 TS; 35,000-45,000 YS, 50-60 El; 55-65 RA.
For stainless utensils; heat and corrosion resistant.

BARIUM DIE STEEL.
M-705; 0.4-0.6 C, 1-2 Ni, 0 5-1 0 Cr, 0.2-0.3 Mo, bal Fe.
For forging dies; in 3 grades of varying hardness.

BARMAG.
M-511; 35 Ba, bal Mg
For getters in electrical discharge devices and vacuum tubes

BARNITE.
Eng ; 5 5 Cu, Mg, Cr, Si, Ti, bal Al
For light alloy parts, age-hardenable.

BAROS
M-104; 90 Ni, 10 Cr.
For pen points, balance weights, heat resisting

BARR ALLOY NO. 00C.
M H ALLOY NO 00C.
M-212; 84 Cu, 16 Sn.
Cast 25,000-35,000 TS, 20,000-28,000 YS, 1-2 El; 80-100 Brin
For bearings for turn tables and movable bridges, compression of 0 1%-18000.

BARR ALLOY NO. 1
M H ALLOY NO 1.
M-212; 88 Cu, 8-10 Sn, 2-4 Zn
Cast 40,000-50,000 TS, 18,000-22,000 YS; 20-40 El, 20-30 RA, 65-74 Brin
For steam and hydraulic castings, air valves, small gears, U S.N "G" Bronze, "Gun Metal", "SAE No 62."

BARR ALLOY NO 4
M H ALLOY NO 4
M-212, 80 Cu, 10 Sn, 10 Pb
Cast 30,000-50,000 TS, 19,000-21,000 YS, 20-10 El, 20-10 RA, 55-65 Brin.
For high speed bearings, for high pressures

BARR ALLOY NO 5
M H ALLOY NO. 5
M-212; 85 Cu, 5 Sn, 5 Pb, 5 Zn.
Cast. 30,000-38,000 TS, 15,000-19,000 YS, 15-20 El, 15-20 RA, 50-59 Brin
For bearings, pumps, steam valves, carburetors, "Ounce Metal."

BARR ALLOY NO 9
M H ALLOY NO. 9
M-212, 58 Cu, 40 Zn, 1 5 Fe, 0.5-1.5 Al, 0 0-0 25 Mn
Grade A· 70,000-80,000 TS; 30,000-34,000 YS; 25-40 El, 100 Brin.
Grade B· 80,000-90,000 TS, 40,000-45,000 YS; 15-25 El, 120 Brin
For propeller blades and hubs, valve stems, engine framing, compression of 0 1%-20000

BARR ALLOY NO 11
M H ALLOY NO 11
M-212; 89 Cu, 10 Al, 1 Fe.
Cast: 65,000-80,000 TS, 23,000-27,000 YS; 20-27 El, 20-27 RA; 93-100 Brin.
Heat treated. 75,000-95,000 TS; 55,000-65,000 YS, 3-15 El; 140-200 Brin.
For gears, feed nuts, bearings; resists wear, repeated shock and corrosion.

BARR ALLOY NO. 14
M H ALLOY NO. 14.
M-212; 90 Cu, 6.5 Sn, 1.5 Pb, 2.0 Zn.
Cast; 34,000-40,000 TS, 16,000-19,000 YS; 23-35 El; 23-53 RA; 50-60 Brin.
For plain bearings, backs of Babbit-lined shells; low coefficient of friction and expansion.

BARR ALLOY NO. 15
M H ALLOY NO. 15.
M-212, 88 5 Cu, 11 Sn, 0.25 Pb, 0.25 P.
Sand cast: 33,000-40,000 TS; 21,000-24,000 YS; 10-15 El; 8-15 RA, 70-80 Brin.
Chill cast. 50,000 TS, 30,000 YS; 6 El; 100 Brin.
For worm gears mating with hardened worms; "SAE-65"; compression of 0.1%-17000.

BARR ALLOY NO 20
M H ALLOY NO 20.
M-212, 65 Cu, 23 Zn, 2 Fe, 3 Mn, 7 Al
Cast: 90,000-100,000 TS, 50,000-60,000 YS, 20-5 El; 180-200 Brin
For general castings, compression of 0.1%-65000.

BARR ALLOY NO 25 B
M H ALLOY NO. 25 B.
M-212, 69 Cu, 5 Sn, 25 Pb, 1 Ni
20,000-24,000 TS, 14,000-16,000 YS, 16-12 El
For general castings, bearings, acid resisting

BARR ALLOY NO. 48
M H ALLOY NO. 48
M-212, 84 Cu, 10 Sn, 2 5 Pb, 3 5 Ni
Sand cast· 40,000 50,000 TS, 25,000-28,000 YS, 25-15 El, 20-10 RA, 80-93 Brin
For gears, compression of 0 1%-20000-24000

BARRONIA METAL
M-20, 83 Cu, 0 5 Pb, 4 Sn, bal Zn
Cast 42,400 TS, 20,400 YS, 38 El, 33 RA, 72 Brin
Drawn 84,000 TS, 74,000 YS, 18 El, 46 RA; 171 Brin
For condenser tubes, heat exchangers, evaporators, fittings, for superheated steam work

BARROW B H BRAND PIG IRON
M-619, approx 4 0 T C , 1 5-4 0 Si, 0 025 max S, 0 03 max P, 0.25-1 5 Mn, bal Fe.
For metallurgical applications, for making steel and cast iron

BARROW B H R BRAND (CUPOLA GRADE)
M 619, 3 25-3 45 T C , 0 5 1.1 Si, 0 12-0 18 S, 0 045 P, 0 25 Mn, bal Fe
For metallurgical applications, for malleable foundries, various grades

BARROW B H S BRAND BESSEMER HAEMATITE PIG IRON
M-619, approx 4 0 T C , 1 5-4 5 Si, 0 03 max S, 0 035 max P, 0 25 1 2 Mn, bal Fe.
For metallurgical applications, for making steel.

BARROW B H S BRAND FOUNDRY HAEMATITE PIG IRON
M-619, approx 3 85 T C , 2 0-3 5 Si, 0 035 max S, 0 03 max P, 0 6-1 0 Mn, bal Fe
For metallurgical applications, for general foundry work

BARROW BRAND FOUNDRY HAEMATITE PIG IRON
M-619, approx 4 0 T C , 1 5-3 0 Si, 0 02 max S, 0 03 P, 0 90-1 25 Mn, bal Fe
For metallurgical applications, for heat resisting castings, for making alloy steels.

BARROW B X. BRAND PIG IRON.
M-619, approx 4 0 T C , 1 5-4.0 Si, 0 02 max S, 0 025 max P, 0.25-1 5 Mn, bal Fe.
For metallurgical applications, for making steel and cast iron.

BARROW B X.X BRAND PIG IRON.
M-619; approx 4.0 T C , 1.5-3 0 Si, 0.02 max S, 0 02 max P, 0 25-1 5 Mn, bal Fe.
For metallurgical applications; for making steel and cast iron.

BARROW B.X.X. BRAND PIG IRON "SWEDISH."
M-619, approx 4.0 T.C., 1.0-2.5 Si, 0.012 max S, 0.02 max P, 0.25 max Mn, bal Fe.
For metallurgical applications; for making steel and cast iron.

BARROW S P. BRAND FOUNDRY PIG IRON.
M-619; 3.5-3.75 T.C., 1.5-4 Si, 0.2-0.03 S, 0.1-0.3 P, 1.0-1.5 Mn, bal Fe.
For foundry iron for cylinders, valves, pumps, steam chests; for making steel and cast iron.

BARTO
M-32; 0.50 C, 0.50 Mn, 0.25 Si, 1.0 Cr, 1.75 Ni, bal Fe
Heat treated: 310,000 TS; 240,000 YS; 5 El; C 56 Rock.
For expander punches, feeder rolls, clutch parts, vice jaws, chuck jaws.
Tough, shock resistant

BARWORTH B.C.M
M-1407, 1.0 C, 1.5 Mn, 0.5 Cr, 0.4 Si, bal Fe.
For press tools, gages, taps, dies; non-deforming, oil hardened.

BARWORTH B M S
M-1407, 0.30-0.35 C, 3 Ni, 1 Cr, 0.4 Mo, bal Fe
For plastic mold dies, oil hardened

BARWORTH B.S C.C
M-1407, 1.5 C, 1 Mn, 1 Cr, 0.5 W, bal Fe
For press tools, taps, dies; oil hardened, wear resistant.

BARWORTH B S W 5Co
M-1407, 0.8 C, 20 W, 4.5 Cr, 1.5 V, 1 Mo, 5 Co, bal Fe.
For cutters, drills, reamers, hobs, broaches, high speed steel.

BARWORTH B S W.6/6/2
M-1407, 0.80-0.87 C, 4 Cr, 6.5 W, 2 V, 5 Mo, bal Fe
For lathe and planer tools, reamers, drills, hobs, high speed steel

BARWORTH B S W 10Co
M-1407, 0.8 C, 22 W, 4.5 Cr, 1.5 V, 1 Mo, 10 Co, bal Fe
For cutting tools, reamers, hobs, broaches, high speed steel

BARWORTH B S W.14
M-1407, 0.65 C, 14 W, 3.75 Cr, 0.5 V, bal Fe
For drills, turning tools, hot punches, die cores, high speed steel

BARWORTH B S W 16
M-1407, 0.75 C, 16 W, 4.5 Cr, 1 V, 1.5 Mo, bal Fe
For lathe and planer tools, drills, punches, taps, high speed steel

BARWORTH B S W 18
M-1407, 0.75 C, 18 W, 4.5 Cr, 1 V, 0.5 Mo, bal Fe
For lathe and planer tools, hot punches, high speed steel

BARWORTH B S W. 18V2
M-1407, 0.75-0.80 C, 18 W, 4.5 Cr, 2 V, 0.5 Mo, bal Fe
For lathe and planer tools, drills, reamers, taps, high speed steel

BARWORTH B S.W. 22.
M-1407, 0.76 C, 22 W, 4 Cr, 1.25 V, bal Fe.
For drills, turning tools, cutters, hot punches, high speed steel.

BARWORTH C.D S H
M-1407; 2 C, 13 Cr, bal Fe
For forging and blanking dies, punches; oil or air hardened, abrasion resistant

BARWORTH C.R.V.
M-1407; 0.45-0.50 C, 2 Cr, 0.2 V, bal Fe.
For die casting dies; oil hardened, for short runs.

BARWORTH C.T.S.
M-1407; 0.50-0.55 C, 1 Cr, 2 W, 1 Si, 0.6 Mn, bal Fe.
For hot stamping and pressing dies, pneumatic tools; cold work steel.

BARWORTH H.D.3.
M-1407, 0.35 C, 3.5 Cr, 3 W, 0.3 V, bal Fe.
For hot and cold stamping dies, extrusion dies, hot work steel, oil hardened.

BARWORTH J.H D.
M-1407, 0.3 C, 3 Cr, 10 W, 0.2 V, bal Fe
For stamping, pressing and extrusion dies; hot work steel, oil hardened

BARWORTH J H.D.N.
M-1407, 0.3 C, 3 Cr, 10 W, 0.2 V, 2 Ni, bal Fe
For stamping, pressing and extrusion dies, hot work steel, oil hardened.

BARWORTH N T. TYPE A
M-1407; 0.4 C, 0.3 Mn, 0.6 Cr, bal Fe
For chisels, shock tools; water hardened, tough

BARWORTH N T. TYPE B
M-1407, 0.4 C, 0.7 Mn, 1.0 Cr, bal Fe.
For chisels, pneumatic tools, oil hardened, shock resistant

BARWORTH S C R.
M-1407, 1.0 C, 1.0 Mn, 0.8 Cr, bal Fe
For press tools, taps, dies; oil hardened, wear resistant.

BARWORTH T C.
M-1407, 0.40 C, 5 Cr, 2 W, 1 Mo, bal Fe.
For die casting dies, oil hardened, for long runs.

BASCH METAL
M-92, 91 Al, 7 Cu, 0.8 Mg, 0.2 Mn, 1.4 Ni
Chill cast: 23,000 TS, 2 El, 90 Brin
Heat treated chill castings, light weight

BATH METAL-1
Eng., 83 Cu, 17 Zn
For plumbing, pipe, red brass

BATH METAL-2
Eng 55 Cu, 45 Zn
For bath fixtures, yellow brass

BATTERIUM
M-21, 89 Cu, 9 Al, 1 Ni, and 1 other metal.
78,000-101,000 TS, 35-48 El, 158-168 Brin
For chemical apparatus, valves, plug cocks, plate terminals, non-corrodible, acid resistant

BATTERY COPPER.
U S., 94 Cu, 6 Zn
For batteries, gilding metal

BATTERY PLATES
U S., 94 Pb, 6 Sb
For storage battery plates, hard

BAUDRINS METAL
Eng., 72 Cu, 7.10 Zn, 17 Ni, 2.5 Fe, 1.8 Co, 0-0.5 Al
For ornamental and corrosion resistant parts, corrosion resistant

BAUDRINS METAL NO 1
72 Cu, 16.6 Ni, 2.5 Sn, 7.1 Zn, 1.8 Co
For ornamental and corrosion resistant parts, corrosion resistant

BAUDRINS METAL NO 2
0.5 Al, 75 Cu, 1.5 Fe, 16 Ni, 2.75 Sn, 2.25 Zn, 2 Co
For ornamental and corrosion resistant parts; corrosion resistant.

BAUSH A-5 CASTING METAL.
M-254; 3 Cu, 2 Ni, bal Al.
Cast: 24,000 TS; 0.5 El; 100 Brin.
Heat treated: 30,000 TS.
For heat treating castings; highly resistant to corrosion.

BAUSH DURALUMIN GRADE A.
M-254; 3 Cu, 0.3 Mg, Fe, Si, bal Al.
Annealed: 22,000-28,000 TS; 14-10 El; 54-60 Brin.
Heat treated: 50,000-55,000 TS; 25,000-30,000 YS, 18-15 El; 83-93 Brin.
For light alloy parts for airplanes, dirigibles and automobiles; age-hardening

BAUSH DURALUMIN GRADE B.
M-254; 4 0 Cu, 0 6 Mn, 0 5 Mg, Fe, Si, 0 10 Cr, bal Al.
Annealed: 25,000 TS; 14 El; 60 Brin.
Heat treated 55,000-62,000 TS; 30,000-36,000 YS; 25-18 El; 93-100 Brin.
For light alloy parts for automobiles, airplanes, dirigibles; age-hardening; sheet grade.

BAXTRON-DBA.
M-522; WC + Ceramic + metal
For cutting tool inserts; milling cutters, wear components.
Ceramic-carbide composite.

BAXTRON-DBW.
M-522; WC + Oxide + metal.
Sintered: 539,000 Tr R., 91.8 Ra.
For cutting tools, dies, wear components, punches
High strength and hardness at elevated temperatures.
Composite.

B.A./"Y" ALLOY
M-28, 4 Cu, 2 Ni, 1.5 Mg, bal Al, 0-0 7 Si, 0-0.75 Fe
Hot rolled: 39,400 TS; 26,900 YS, 20 El, 30 RA
Cold rolled. 54,000 TS, 34,000 YS, 23 El, 33 RA
Heat treated· 35,000-50,000 TS, 30,000-36,000 YS; 1.5-6 5 El, 90-110 Brin,
Chill cast· 27,000 TS; 22,000 YS, 3 3 1 0 El, 105-85 Brin
For pistons in gasoline engines, reciprocating parts in aero engines, air cooled cylinder heads, similar to Duralumin, high strength at elevated temperatures.

BAZAR.
M-135, 10 Ni, Zn, bal Cu
For domestic utensils, ornaments; nickel silver.

B B.
M-261, 0 6 C, 9.5 W, 2 5 Cr, 0 1 V, bal Fe.
For tools, dies; hot die steel.

B & B.
30 Co, 15 Cr, 5 Mo, 2 5 Ti, 3 Al, 0 5 B, bal Ni
For jet engine components, buckets, high heat resistance.

BBB WELDING ELECTRODE.
M-706, 0.2 C, bal Fe
For welding electrode.

B.B D.C. STANDARD ALLOY
Eng; 88 5 Cu, 0.25 Pb, 1 Ni, 10 Sn, 0.25 P
For gears, bearings; tough.

B.B. HOT DIE.
M-261, 0 4 C, 10 W, 3.5 Cr, 0 5 V, bal Fe.
For hot dies, punches; hot die steel.

B.C. NO. 8.
M 50; 0.8 C, 0 2 Mn, bal Fe
For tools; general.

B.C. NO. 10.
M-50; 1 0 C, 0.2 Mn, bal Fe.
For tools, general.

BC-NO. 10V.
M-1724; 1.0 C, 0.22 V, 0.2 Mn, bal Fe.
For coining and embossing dies, engraving tools; Type W2; water hardening.

B.C. NO. 12.
M-50; 1.2 C, 0.2 Mn, bal Fe.
For tools; general.

BD.30.
M-341, 0.51 C, 0 95 Cr, 0.87 Mn, 0.20 Mo, bal Fe (typical).
Prehardened to 248-293 Brin.
For dies for hand operated and mechanically press brakes for forming operations

B-D Cu.
M-8, 0 010 B, bal Cu
Hard· 48,000 TS; 40,000 YS; 6 El; B 50 Rock.
Soft: 33,000 TS; 10,000 YS; 45 El; F 45 Rock
For electrical and electronic equipment, magnetrons, vacuum switchgear.
High resistance to grain growth and resistance to thermal stress cracking.

B E NO. 4 ALLOY.
U S, 4 Cu, 0 25 Mg, ≯ 0 5 Fe, ≯ 0 1 Si, bal Al
For boxes, covers, face-plates, U.S N. Bureau of Engineering Alloy.

BEACON.
M-433, 0.8-1 0 C, bal Fe
For tools, dies, springs; water hardening

BEARCAT.
M-24, 0.5 C, 0 7 Mn, 0 3 Si, 3 25 Cr, 1.4 Mo, bal Fe
Heat treated 342,000-145,000 TS, 205,000-130,000 YS, 4-20 El, 7-60 RA; 590-310 Brin
For rivet sets, punches, chisels, hobs; shock resistant, air or oil hardened

BEARDSHAW H M 1
M-1406, 0 95 C, 1 6 Mn, 0 25 Mo, 0 25 V, bal Fe.
For punches, gages, shear blades, reamers, oil hardened, non-deforming

BEARING METAL NO 600
Eng, 59 7 Cu, 35 Zn, 0 2 Sn, 0 33 Pb, 2 6 Mn, 1 38 Al, 0 7 Si.
For bearings, bushings; tough

BEARINGOY
M-208, Pb, Cu, Sb, bal Sn
For machine bearings, long life under poor lubrication

BEARING (STANDARD)
M-24, 1 0 C, 0 35 Mn, 0 23 Si, 1 35 Cr, bal Fe
For tools, bearings; water hardening.

BEARITE
M-214, 80.1 Pb, 0 37 Cu, 0 13 Bi, 16 75 Sb, 2 65 hardener
At 70°F: 9750 TS, 1 5 El; 29 1 Brin
At 212°F · 24.5 Brin
For bearings not subject to vibration or pounding; high compressive value, low coef fric

BEARIUM B-4.
M-431; 70 Cu, 26 Pb, bal Sn.
Cast: 21,650 TS, 9750 YS, 16 El; 40 Brin.
For bearings, bushings, poor lubrication.

BEARIUM B-8
M-431, 70 Cu, 22 Pb, 8 Sn
Cast 24,500 TS; 11,500 YS, 12 El; 50 Brin.
For bearings, bushings, thrust washers; for heavy duty requirements.

BEARIUM B-10.
M-431; 20 Pb, 70 Cu, bal Sn.
Cast: 25,500 TS; 12,000 YS; 10 El; 55 Brin.
For bearings, bushings; non-scoring; severe applications.

BEARIUM B-11.
M-431; 17.5 Pb, 70 Cu, bal Sn.
Cast: 30,000 TS; 8 El, 195 Brin.
For bearings, bushings; severe applications.

BEAUCALLOY.
M-1183, 1.4 C, Ni, Cr, bal Fe.
Hardened: 175,000 TS; 150,000 YS; 400 Brin.
For conveyor chains; casting.

BEAVER.
M-370; 1.5-1.6 C, 0.30-0.45 Si, 0.2-0.3 Mn, 0.7-0.9 V, 11.5-12.5 Cr, 0.75-0.85 Mo, bal Fe
Corrosion resistant, high hardness, resistant to tempering, minimum distortion on heat-treating
For blanking trimming, drawing dies, thread rolling dies, gages, punches, shear blades.
Type D2 Air hardening cold work tool steel.

BEAVER
M-435, 0.68 C, 1 Si, 8.25 Cr, 1 V, 1.4 Mo, 1.5 Ni, bal Fe
For slitter knives, blanking dies, cold work tools; high wear resistance.

BEAVER BABBITT.
M-565, Sb, Pb, Sn.
For machinery bearings, Babbitt.

BEAVER D-2
M-52, 1.5 C, 12 Cr, 0.4 V, 1.0 Mo, bal Fe.
Air Hardened 288,000 TS, 215,000 YS; 1 El, C 58 Rock.
For blanking and drawing dies, punches, gages, broaches, hobs, shear blades
Precision ground flat stock, AISI Type D2, wear and abrasion resistant Air harden

BECKET ALLOY.
Eng., 25-30 Cr, 3 Si, 1.5-3.0 C, bal Fe
For stainless castings, corrosion resistant

BECKETT METAL
M-544; 60 Cu, 5 Sn, 35 Pb
21,000 TS, 13,500 YS, 15 El; 36 RA.
For bearings, heavy duty.

BEDCO ALLOY
M-1429; 0.55 C, 1 Mn, 2 Si, 0.4 Mo, 0.35 V, bal Fe.
Heat treated 350,000 TS, 295,000 YS, 6 El, 12 RA, 600 Brin
For chisels, punches, pneumatic and beading tools, shock resistant, oil hardened

BEDCO M-2
M-1429; 0.65 C, 4 Cr, 2 V, 6.5 W, 5 Mo, bal Fe.
Hardened: C58-60 Rock.
For hot extrusion dies, punches, shear blades, forging mandrels.
High speed steel for hot working, shock resisting.

BEDCO M-2 HIGH SPEED
M-1429, 0.82 C, 5 Mo, 6.5 W, 4 Cr, 2 V, bal Fe.
Oil Hardened: C63-65 Rock.
For lathe and planer cutters, drills, taps, chasers, drawing dies, punches, hobs
Type M2 high speed steel, high red-hardness.

BEDCO T1
M-1429; 0.75 C, 0.3 Mn, 1.3 Si, 4.0 Cr, 1.15 V, 18.0 W, bal Fe.
Standard grade of tungsten high speed steel for cutting tools; AISI T1.

BEDEL 1 COURONNES 0
M-455; C, bal Fe.
For wood tools without hardening; crucible steel.

BEDEL 1 COURONNES 1.
M-455; C, bal Fe.
For saws, lathe tools; crucible steel.

BEDEL 1 COURONNES 2.
M-455; C, bal Fe.
For cutlery, taps, chisels, mandrels, razors, metal saws; crucible steel.

BEDEL 1 COURONNES 3.
M-455; C, bal Fe.
For drills, borers, mining bars, chisels, engraving tools, stone tools, needle dies; crucible steel

BEDEL 1 COURONNES 4.
M-455; C, bal Fe.
For rams, shear blades, dies, hammers; crucible steel.

BEDEL 1 COURONNES 5.
M-455; C, bal Fe.
For surgical instruments, forge tools; crucible steel.

BEDEL 1 TREFLE 5.
M-455, C, Cr, 4.5 Ni, Mo, bal Fe.
Heat treated: 157,000 TS; 135,000 YS; 15 El.
For valves operating at high temperatures; heat resistant.

BEDEL 2 COURONNES 0.
M-455; C, bal Fe.
For wood tools used without hardening, crucible steel

BEDEL 2 COURONNES 1.
M-455, C, bal Fe
For saws for hard wood, lathe tools; crucible steel.

BEDEL 2 COURONNES 2.
M-455, C, bal Fe.
For general cutlery, chisels, mandrels, razors, metal saws; crucible steel.

BEDEL 2 COURONNES 3
M-455, C, bal Fe.
For drills, borers, mining bars, chisels, punches, stone tools; crucible steel.

BEDEL 2 COURONNES 4.
M-455; C, bal Fe
For shear blades, cutting and stamping dies, hammers, crucible steel.

BEDEL 2 COURONNES 5.
M-455, C, bal Fe.
For surgical instruments, forge tools, crucible steel

BEDEL 3 COURONNES 0.
M-455, C, bal Fe.
For wood tools used without hardening; crucible steel.

BEDEL 3 COURONNES 1.
M-455; 0.9-1.1 C, bal Fe
For saws for hard wood, lathe tools; crucible steel.

BEDEL 3 COURONNES 2.
M-455, 1.0-1.1 C, bal Fe.
For general cutlery, taps, chisels, mandrels, razors, metals saws; crucible steel

BEDEL 3 COURONNES 3.
M-455; 1.2-1.3 C, bal Fe.
For drills, borers, chisels, engraving tools, needle dies, stone tools; crucible steel.

BEDEL 3 COURONNES 4.
M-455; 0.9 C, bal Fe.
For hot and cold shear blades, hammers, cutting and stamping dies; crucible steel.

BEDEL 3 COURONNES 5.
M-455, C, bal Fe.
For forge tools, surgical instruments; crucible steel.

BEDEL 405.
M-455; 1.6 C, 4.5 Cr, 12 W, 0.4 Mo, 0.5 V, 5 Co, bal Fe.
For special tools, engravers tools; textile needles.
High carbon, high-speed steel, wear and abrasion resistant

BEDEL NO. 600 C.
M-455; low C, 1.5 Ni, Cr, Mo, V, bal Fe.
Heat treated· 150,000-177,000 TS; 143,000-157,000 YS, 12 El.
For crankshafts, general case hardened parts for severe service; case-hardening steel

BEDEL NO 644.
M-455; C, W, Cr, V, bal Fe.
For high speed cutters, high speed steel.

BEDEL BCN
M-455; 0 4 C, Cr, 2-3 Ni, bal Fe.
Heat treated. 242,000-135,000 TS, 213,000-121,000 YS; 10-15 El
For general engineering construction; oil hardening

BEDEL BCN 3 S 2
M-455, high C, Cr, 3 Ni, bal Fe
Heat treated: 270,000 TS; 242,000 YS; 6 El
For general engineering construction; oil hardening.

BEDEL BCN 4 S
M-455; C, Cr, 4 Ni, bal Fe
Air hardened. 270,000-260,000 TS; 235,000-220,000 YS, 6-8 El
For general engineering construction, air hardening

BEDEL BK 3 B.
M-455, low C, 3 5 Ni, Cr, bal Fe
Annealed: 78,000 TS, 58,000 YS, 30 El.
Heat treated 135,000 TS; 128,000 YS; 11 El
For crankshafts, general case hardened parts for severe service; case hardening steel

BEDEL BN 23.
M-455, C, 25 Ni, Cr, bal Fe
Annealed 100,000 TS; 45 El.
For chemical plant equipment, non-magnetic, corrosion and acid resistant

BEDEL BN 33
M-455, C, 33 Ni, Cr, bal Fe
Annealed· 115,000 TS; 30 El
For chemical plant equipment, high acid and corrosion resistant

BEDEL BNAV 0
M-455, C, Cr, 3 Ni, Mo, bal Fe.
Heat treated 228,000 TS, 199,000 YS, 9 El.
For general engineering construction, oil hardening

BEDEL BNAV 1.
M-455, C, Cr, 4 Ni, Mo, bal Fe
Heat treated· 315,000 TS, 260,000 YS; 6 El.
For general engineering construction, air hardening

BEDEL BNAV 2.
M-455, medium C, Cr, 4 Ni, Mo, bal Fe
Heat treated 242,000 TS, 228,000 YS, 9 El
For aircraft motor crankshafts; oil hardening

BEDEL BNAV 3
M-455, low C, 4 Ni, Cr, Mo, bal Fe.
Annealed: 107,000 TS.
Heat treated· 143,000 TS; 135,000 YS; 14 El
For crankshafts, general case hardened parts for severe service, case hardening steel.

BEDEL C.3
M-455, low C, 2.5 Ni, bal Fe
Annealed· 85,000 TS; 78,000 YS, 20 El
For aviation and marine case hardened parts, case-hardening steel.

BEDEL C.5.
M-455, low C, 5 Ni, bal Fe.
Annealed· 90,000 TS, 78,000 YS; 20 El.
For aviation and marine case hardening parts; case hardening steel.

BEDEL CHROME 4.
M-455; C, 2-3 Cr, bal Fe.
For cold stamping dies and punches; non-deforming

BEDEL CKN
M-455; low C, 3 Ni, Cr, bal Fe
Annealed 85,000 TS.
Heat treated· 164,000 TS, 143,000 YS; 9 El.
For crankshafts, general case hardened parts for severe service; case hardening steel.

BEDEL "DIAMONT BEDEL"
M-455, 4 W, 4 Cr, V, bal Fe
For cutting tools, oil hardened

BEDEL DOUBLE TREFLE
M-455, C, 14 W, Cr, bal Fe
For general usage, medium speed cutters; high speed steel

BEDEL DOUBLE TREFLE E
M-455, C, 15-16 W, bal Fe
For tools, dies, oil hardening

BEDEL INO 2
M-455, medium C, 13 Cr, bal Fe
Heat treated 170,000 TS, 157,000 YS; 5 El
For marine valves, corrosion resistant

BEDEL INO 3
M-455, C, 13 Cr, V, bal Fe
Heat treated 135,000 TS, 110,000 YS, 10 El
For automobile valves, corrosion resistant

BEDEL INO 6
M-455, C, 17 Cr, V, bal Fe
For cutlery, surgical instruments, high heat and corrosion resistant.

BEDEL INO 11
M-455, C, 6 Ni, 25 Cr, bal Fe
For rolled or forged parts, pump and furnace parts, valves, heat and corrosion resistant, non-hardenable

BEDEL INO 12
M 455, C, 20 Cr, 8 Ni, Mo, bal Fe
For valves operating up to 900°C, austenitic, heat resistant

BEDEL INO 13.
M-455; C, 8 Ni, 20 Cr, bal Fe
For carburizing boxes, recuperator tubes, salt bath pots, heat and corrosion resistant; non-hardenable

BEDEL INO 14
M-455, C, 6 Ni, 25 Cr, bal Fe
For carburizing boxes, recuperator tubes, salt bath pots, heat and corrosion resistant, non-hardenable.

BEDEL INO 15
M 455, C, 6 Ni, 25 Cr, bal Fe.
For carburizing boxes, recuperator tubes, salt bath pots, heat and corrosion resistant; non-hardenable

BEDEL INO 16
M-455, C, 6 Ni, 25 Cr, Si, bal Fe.
For carburizing boxes, recuperator tubes, salt bath pots, heat and corrosion resistant; non-hardenable

BEDEL INO 20.
M-455, C, 25 Cr, 20 Ni, bal Fe
For pump, furnace and valve parts, carburizing boxes, heat and corrosion resistant; non-hardenable

BEDEL INO 21.
M-455; C, high Ni, high Cr, bal Fe.
For pump, furnace and valve parts, carburizing boxes; heat and corrosion resistant; non-hardenable.

BEDEL INO 22.
M-455, C, 25 Cr, 20 Ni, bal Fe.
For pump, furnace and valve parts, carburizing boxes, heat and corrosion resistant; non-hardenable.

BEDEL INO 23
M-455; C, 20 Cr, 20 Ni, Si, bal Fe.
For pump, furnace and valve parts, carburizing boxes, heat and corrosion resistant; non-hardenable.

BEDEL INO 31.
M-455, C, 14 Cr, 15 Ni, W, Mo, bal Fe
For valves operating up to 900°C; austenitic, heat resistant.

BEDEL INO 32
M-455; C, 15 Cr, 20 Ni, Mo, bal Fe
For valves operating up to 900°C, austenitic, heat resistant

BEDEL INO 33.
M-455; C, 25 Ni, 10 Cr, W, bal Fe
For valves operating up to 900°C, austenitic, heat resistant

BEDEL INO 40
M-455, C, 35 Ni, 15 Cr, bal Fe
For turbine blading, marine parts; maximum heat and corrosion resistant.

BEDEL INO 41.
M-455, C, 40 Ni, 10 Cr, bal Fe
For marine parts; maximum heat and corrosion resistant

BEDEL INO 50
M-455, C, 15 Cr, 50 Ni, bal Fe
For carburizing boxes, furnace parts, maximum heat and corrosion resistant

BEDEL INO 51
M-455, C, 50 Ni, 15 Cr, bal Fe
For carburizing boxes, furnace parts, maximum heat and corrosion resistant.

BEDEL M.G.B.A
M-455, C, Co, bal Fe
For magnets, magnet steel

BEDEL M.G.B.C.
M-455, C, 35 Co, 8 W, bal Fe
For magnets, magnet steel

BEDEL M.G.B.S.
M-455; C, 5-6 W, Cr, bal Fe
For magnets, magnet steel.

BEDEL QUATRE TREFLES.
M-455, C, W, Cr, V, Co, bal Fe
For high speed cutters; high speed steel for extra hard pieces at high speed.

BEDEL QUATRE TREFLES C.
M-455; C, 10 Co, Mo, V, bal Fe
For tools, dies; oil hardening

BEDEL R.B 6
M-455, C, 2.5 Cr, 0.5 Ni, bal Fe.
For bearings, dies, punches; not shock resistant.

BEDEL R.B. 7.
M-455; high C, 1.5 Cr, bal Fe.
For bearings, dies, punches; not shock resistant.

BEDEL SOC.
M-455; C, 13 Cr, Mo, Co, bal Fe
Heat treated 145,000 TS; 130,000 YS; 6 El.
For valves operating at temperatures up to 800°C; very oxidation resistant.

BEDEL SOC 2.
M-455; C, 20 Cr, high Co, bal Fe.
Heat treated: 135,000 TS; 115,000 YS; 7.5 El.
For valves operating at temperatures up to 800°C; very oxidation resistant

BEDEL SPECIAL F.
M-455, C, 4 W, Cr, Mo, bal Fe
For wire drawing dies, cold drawn wire dies; non-deforming.

BEDEL SPECIAL FA.
M-455, C, 13 Cr, Ni, Mo, V, bal Fe
For dies and punches, non-deforming

BEDEL SPECIAL FB.
M-455; C, 13 Cr, Mo, V, bal Fe
For dies and punches, non-deforming

BEDEL SPECIAL FK.
M-455, C, 13 Cr, Mo, V, bal Fe
For dies and punches, non-deforming

BEDEL SPECIAL FL.
M-455, C, 13, bal Fe.
For wire drawing, dies for cold drawn hard steel; non-deforming

BEDEL SPECIAL 000.
M-455, C, 13 Cr, bal Fe
For dies punches, rolling mill rolls, non-deforming

BEDEL SPECIAL OZ
M-455, C, 10 W, Cr, V, bal Fe
For hot forging tools, stamping and punching, hot shear blades, hot work steel

BEDEL SPECIAL X.
M-455, C, Cr, V, bal Fe
For calipers, gages, dies, punches, non-deforming

BEDEL SPECIAL Y.2.
M-455, C, 3 Ni, 0.7 Cr, bal Fe.
For pneumatic or hydraulic rivet sets, tough.

BEDEL SPECIAL Y 5
M-455, C, 2 W, 1 V, bal Fe.
For pneumatic chisels, punches, shear blades, tough

BEDEL SPECIAL Z3
M-455, C, 10 W, Cr, Ni, V, bal Fe
For tools, dies, oil hardening

BEDEL SPECIAL Z4.
M-455; C, 10 W, Cr, V, Co, bal Fe
For tools, dies, oil hardening

BEDEL TRIPLE TREFLE
M-455, C, 18 W, Cr, bal Fe
For heavy roughing and milling cutters, high speed steel

BEDEL TRIPLE TREFLE E.
M-455, 0.75 C, 18 W, 5 Cr, 1 Mo, 1 V, bal Fe
For tools, cutters, drills, reamers, broaches, lathe and planer tools
High-speed steel, high red hardness

BEDEL TRIPLE TREFLE E S.
M-455, C, W, Cr, V, 6 Co, bal Fe.
For high speed cutters; super high speed steel.

BEDEL TRIPLE TREFLE ESD.
M-455, C, 5 Co, Mo, V, bal Fe.
For tools, dies; oil hardening

BEDEL TRIPLE TREFLE F.R.
M-455, C, high W, high Cr, bal Fe.
For taps, forming tools, bores, finishing tools; high speed steel.

BEDEL UN TREFLE 1.
M-455; C, 2-3 W, Cr, V, bal Fe.
For hot and cold forging punches, dies; hot work steel.

BEDEL UN TREFLE 2.
M-455; C, 4 Ni, Cr, Mo, bal Fe.
For hot stamping dies and punches, pipe mandrel, shear blades; shock resistant.

BEDEL UN TREFLE 3.
M-455; C, Cr, Ni, bal Fe.
For pneumatic chisels, hot slicing; shock resistant.

BEDEL UN TREFLE COURONNE.
M-455; C, 5-6 F, Cr, bal Fe.
For hot punches and dies for screw machines; hot work steel.

BELAIS WHITE GOLD-1.
M-237; 75-85 Au, 8-18 Ni, 4-14 Zn.
For jewelry, ornaments; corrosion resistant.

BELAIS WHITE GOLD-2.
M-237; 75-85 Au, 10-18 Ni, 2-9 Zn, 0.05-0 5 Pt or 0.5-2 0 Mn.
For jewelry, ornaments; corrosion resistant

BELECTRIC NO 1.
M-707; 3.25 C, 2 0 Si, bal Fe.
Cast: 35,000-42,000 TS; 200-220 Brin.
For gears, pinions, brake drums, brake shoes, pumps; cast iron.

BELECTRIC NO 2
M-707; 2.9 C, 2 0 Si, bal Fe.
Cast: 42,000-50,000 TS; 220-240 Brin.
For gears, pinions, brake drums, pumps, cast iron.

BELECTRIC NO. 3.
M-707, 3 C, 2 Si, alloys, bal Fe.
Cast· 50,000-65,000 TS, 230-300 Brin.
For gears, pinions, brake shoes, pumps; cast iron

B ELECTROMAL
M-707; 2 3-2.4 C, 1.2-1.3 Si, 1 Cu, 4 Ni, bal Fe.
Cast: 60,000-70,000 TS; 45,000 YS; 15 El, 143-170 Brin
For castings; malleable iron

BELGIAN ALUMINUM PISTON ALLOY
Belgium; 90.5 Al, 7 Cu, 2.5 Zn.
For pistons, non-hardenable

B-ELITE.
M-459, 0 10 C, 0.65 Mn, 0.12 Si, bal Fe.
For welding electrode; general purpose

B-ELITE HS.
M-459; 0 2 C, 1.5 Mn, 0.2 Si, 0.15 Al, 0.25 Ti, bal Fe.
For welding electrode, general purpose.

B-ELITE KVA.
M-27; 0 2 C, 1 Mn, 0.4 Zr, bal Fe.
Welded: 80,000 TS; 20-25 El.
For welding electrodes; cored, high ductility.

B-ELITE KVA.
M-459; 0 18 C, 1.1 Mn, 0.6 Si, 0.10 Al, 0 3 Zr, bal Fe.
For welding electrode; general purpose.

BELL BRAND.
M-368; 0.7-1.0 C, bal Fe.
For tools; water hardened.

BELL BRASS.
Eng.; 64 Cu, 35 Zn, 0.85 Sn.
For bells.

BELL BRONZE.
M-657; 80 Cu, 20 Sn.
For bells.

BELLER NO. 4.
M-1117; 0.75 C, bal Fe.
For tools, taps, springs, punches; water hardened.

BELL METAL-1.
Eng.; 83 Al, 10 Mn, 7 Cd
For bells, chimes, whistles, ornaments.

BELL METAL-2.
Eng; 85-60 Cu, 15-40 Sn.
For bells, chimes; hard bronze

BELL METAL, JAPANESE KARAKANE-1.
Japan; 72-61 Cu, 14-25 Sn, 0.14 Pb, 0-9.4 Zn, 0-3 Fe.
For bells; corrosion resistant

BELL METAL, JAPANESE KARAKANE-2.
Japan; 71 42 Cu, 14 2 Sn, 14.3 Pb.
For bells; free-cutting.

BELL METAL, JAPANESE KARAKANE-3.
Japan; 70 Cu, 19 Sn, 3 Zn, 8 Pb.
For bells; free-cutting.

BELL METAL, JAPANESE KARAKANE-4.
Japan, 65.95 Cu, 17 25 Sn, 3 45 Zn, 10.35 Pb
For bells, free-cutting

BELL METAL, JAPANESE KARAKANE-5.
Japan, 64 Cu, 24 Sn, 9 Zn, 3 Fe
For bells, corrosion resistant

BELL METAL, JAPANESE KARAKANE-6.
Japan; 61 Cu, 18 Sn, 6 Zn, 3 Fe, 12 Pb.
For bells; free-cutting

BELL METAL, MUSICAL
U S, 84 Cu, 16 Sn.
For bells, bronze

BELL SPECIAL
M-368, 1 2 C, 0.2 V, bal Fe
For tools, fixtures, jigs, water hardened

BELMALLOY
M-707, 2 15-2 35 C, 1.0 Si, 1 0 Mn, bal Fe
Cast 70,000-80,000 TS, 45,000-50,000 YS, 5-10 El, 179-207 Brin
For tractor parts, axle parts, pearlitic malleable cast iron.

BELMONT
M-1705, 0 90 C, 1 5 Mn, 0 25 Si, 0 3 Mo, bal Fe.
Oil hardening tool steel AISI 02

BELMONT NO. 40
M-1255
For aluminum solder, M P. 400°F.

BELMONT NO 60.
M-1255
For aluminum solder, M P. 650°F.

BELMONT HOLTITE.
M-1255, 50 Cu, 50 Zn, granular
For brazing all metals except aluminum

BELMONT MAB.
M-1255, For aluminum brazing, M P. 720°F.

BELMONT SUPERDIE
M-1255, Zinc base, plus Al, Cu, and Ti.
For cast stamping dies, blow molds.

BELT LACE
U.S.; 62 Cu, 38 Zn
For belt lacing, light alloy parts; high impact strength.

BEMIT.
GERMANY; 96.91 Al, 2 0 Cu, 0.45 Mn, 0 27 W.
For light alloy welded, drawn or stamped parts; also called "Benit;" German alloy.

BENDIX A2 FLAT GROUND STOCK.
M-1694; 1.0 C, 0.5 Mn, 5.0 Cr, 0.3 V, 1.25 Mo, bal Fe.
Air hardening tool steel. AISI A2.

BENDIX COMMERCIAL DRILL ROD.
M-1694, 1 0 C, 0.3 Mn, 0.2 Si, bal Fe.
Water hardening tool steel. AISI W1.

BENDIX D2.
M-1694; 1.5 C, 0 4 Mn, 0 3 Si, 12.0 Cr, 0.9 V, 0.8 Mo, bal Fe.
High carbon, high chromium tool steel AISI D2

BENDIX D2 FLAT GROUND STOCK
M-1694, 1.55 C, 0.25 Mn, 0 38 Si, 12 0 Cr, 0 8 V, 0 8 Mo, bal Fe
High carbon, high chromium tool steel. AISI D2.

BENDIX O1
M-1694, 0 90 C, 1 2 Mn, 0 35 Si, 0 5 Cr, 0.2 V, 0 5 W, bal Fe
Oil hardening tool steel. AISI O1.

BENDIX O1 DRILL ROD
M-1694, 0 90 C, 1 2 Mn, 0 5 Cr, 0.2 V, 0.5 W, bal Fe
Oil hardening tool steel AISI O1

BENDIX O1 FLAT GROUND STOCK.
M-1694, 0 90 C, 1 2 Mn, 0 35 Si, 0 5 Cr, 0 2 V, 0 5 W, bal Fe
Oil hardening tool steel AISI O1

BENECKE.
M-823, 0.7-1 0 C, alloy, bal Fe.
For tools, dies, oil hardening

BENEDICT METAL
M-98, 75 80 Cu, 20-25 Ni, 0 75 max Fe + Mn
Hard 88,300 TS, 83,000 YS, 6 El, 35 RA, 148 Brin
Annealed 50,000 TS, 30,000 YS, 46 El, 63 RA; 76 Brin
For condensers, feed water heaters, coinage, corrosion resistant

BENEDICT PLATE
Eng , 57 Cu, 28 Zn, 15 Ni
For white metal for flat work, corrosion resistant

BENSON
M-959, 10 Sn, 15 Sb, bal Pb
For bearings, bushings, Babbitt

BENUM
M-1405, 0 3 C, 0 5 Mn, 1 3 Cr, 0 3 Si, 0 3 Mo, 4 2 Ni, bal Fe
For molds, dies, air hardened, tough

BENZ AVIATEK
Eng , 80 Al, 6 Cu, 12 Zn, 1 5 Fe
For pistons, non-hardenable

BERA AUTO A
M-1261, 88 7 Sn, 7.8 Sb, 3 5 Cu
Cast 12,800 TS, 26 Brin
For engine bearings; M P 440-620°F, shock resistant

BERA AUTO SPECIAL.
M-1261, 90 3 Sn, 6.5 Sb, 3 Cu, 0 2 Ni
Cast 12,800 TS, 25 Brin
For engine bearings, M.P. 440-610°F; shock resistant

BERACO.
M-1260, M-1261, 10 Sn, 13 5 Sb, 0.5 Cu, 76 Pb.
Cast: 12,900 TS, 30 Brin
For transmission bearings; M.P. 470-705°F.

BERA COMMON A
M-1261, 55 Sn, 10 Sb, 2 5 Cu, 32 5 Pb.
Cast: 11,400 TS, 22 Brin
For refrigerator and generator bearings, M.P. 355-620°F; good castability.

BERA COMMON B.
M-1261; 24.5 Sn, 13 Sb, 0.5 Cu, 62 Pb
Cast: 12,800 TS; 26 Brin.
For refrigerator and generator bearings; M P. 355-535°F; good castability

BERA DIESEL
M-1261, 83.5 Sn, 8 Sb, 6 5 Cu, 2 Pb.
Cast: 17,100 TS; 31 Brin.
For diesel engine bearings; M P. 355-710°F; wear resistant.

BERALITE 35.
M-1011; 35 Be, bal Al.
Drawn: 62,800 TS, 58,400 YS, 1 5 El; 94 Brin.
Annealed 41,400 TS, 23,100 YS, 14 5 El; 68 Brin.
For instruments; corrosion resistant.

BERALOY 1
M-61, 1.8 2.4 Co, 0 3-0.5 Be, bal Cu.
Rolled 110,000 TS; 95,000 YS; 10 El; 200 Brin
For springs, 50% electrical conductivity.

BERALOY NO 25
M-61; 97 75 Cu, 2.0 Be, 0.25 Co.
Annealed: 66,000 TS
Heat treated 175,000 TS
For springs, electric contacts, diaphragm valves, bearings, age-hardenable

BERALOY A
M-897: 2 Be, 0 25 Co, bal Cu
Heat treated 180,000 TS, 95,000 YS, 1 El
For springs, corrosion resistant, hardenable

BERALOY A
M-61, 1 9-2 2 Be, 0.25-0 50 Co, bal Cu
Annealed 66,000 TS, 26,000 YS, 60 El.
Heat treated 200,000 TS, 179,000 YS, 2 El
For diaphragms, springs, age hardenable

BERALOY B
M-61, 1 9-2 2 Be, 0 25-0 50 Ni, bal Cu
Annealed 66,000 TS, 26,000 YS, 60 El
Heat treated 200,000 TS, 179,000 YS, 2 El.
For diaphragms, springs, age-hardenable

BERALOY C.
M-61, 0 4-0 5 Be, 2 5-2 7 Co, bal Cu
Annealed 30,000 TS
Heat treated 110,000 TS; 10 El
For springs, age-hardenable

BERALOY D
M 61, 1 6 1 8 Be, 0 25-0 50 Co, bal Cu
For springs, diaphragms, age hardened, corrosion resistant.

BERA MARINE
M-1261, 85 Sn, 10 Sb, 5 Cu
Cast 19,900 TS, 28 Brin
For engine bearings, M P 440-630°F, shock resistant

BERA STEAM A
M-1261, 80 Sn, 11 5 Sb, 5 5 Cu, 3 Pb.
Cast 17,800 TS, 34 Brin
For steam turbine and generator bearings; M P 355-675°F, wear resistant

BERA STEAM B
M-1261, 74 Sn, 9 Sb, 4 Cu, 13 Pb.
Cast: 14,200 TS, 28 Brin
For steam turbine bearings; M P. 355-625°F, wear resistant

BERDO ALLOY NO. 1
M-20; Cu, Sn, Pb, Ni
30,000 TS, 20,000 YS; 1.5 El, 2.6 RA; 99 Brin.
For bearings, heavy service, C.Y P.-38,000.

BERDO ALLOY NO. 2.
M-20; Cu, Sn, Pb, Ni.
75 Brin
For bearings; general service; C.Y.P -28,000

BERDO ALLOY NO. 3.
M-20, Cu, Sn, Pb, Ni
44 Brin.
For bearings; light service; C.P.Y.-14,000.

BERDO NO. 6.
M-20, Cu-Sn-Ni-Pb-P.
For mill bearings, rock drill parts, gears; wear resistant.

BERDO NO. 7.
M-20; Cu-Sn-Ni-Pb-P
For mill bearings, rock drill parts, gears, wear resistant

BERGAL.
M-708; 94.1 Al, 4.0 Cu, 0.8 Mg, 0.7 Mn, 0.4 Si
For light alloy parts, age-hardenable

BERGISCHE-CMVW11.
M-1290, 0.20 C, 12.5 Cr, 1.1 Mo, 0.6 Ni, 0.3 V, 0.5 W, bal Fe
Annealed: 95,000 TS; 40,000 YS, 25 El, 55 RA, B 92 Rock
Heat Treated 225,000 TS. 205,000 YS, 8 El, C 50 Rock.
For surgical instruments, hardware, oil refinery equipment, marine equipment.
Corrosion resistant, hardenable Cast alloy.

BERGISCHE-CMW11
M-1290, 0.20 C, 12.5 Cr, 1.1 Mo, 0.6 Ni, 0.3 V, bal Fe
Annealed 93,000 TS, 38,000 YS, 26 El, 52 RA, B 90 Rock
Heat Treated 240,000 TS, 205,000 YS, 9 El, 25 RA; C 50 Rock
For surgical instruments, gears, hardware, oil refinery equipment
Corrosion resistant, hardenable Cast alloy

BERGIT 1
M-1290, 0.10 C, Ni, Cr, Mo, Cu, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin
For acid resistant chemical plant equipment, stainless, austenitic

BERGIT A
M-1290, 0.10 C, Ni, Mo, bal Fe
For machine tool parts, cams, case hardened

BERGIT B
M-1290, 28.5 Mo, bal Ni
Sol ann & age 78,000-92,000 TS, 57,000 min YS, 8 min El
Corrosion resistant nickel base casting.
Werkstoff Nr. 2.4482, DIN G-X8NiMo6530

BERGIT C
M-1290, 19.0 Mo, 17.0 Cr, bal Ni
So. ann & age 71,000-85,000 TS, 57,000 min YS, 5 min El
Corrosion resistant nickel base casting
Werkstoff Nr. 2.4472, DIN G-X8NiMoCr6018

BERGSOE F.
M-1260; 88.7 Sn, 7.8 Sb, 3.5 Cu
Cast: 17,000 TS; 25 Brin
For engine bearings; M.P 440-620°F, shock resistant.

BERGSOE G.
M-1260, M-1261, 88 Sn, 8 Sb, 4 Cu
Cast: 18,500 TS; 27 Brin.
For engine bearings, M.P. 440-625°F, shock resistant

BERGSOE M.
M-1260, M-1261; 6 Sn, 16 Sb, 79 Pb.
Cast. 29 Brin.
For transmission bearings; M.P 470-520°F.

BERGSOE P.
M-1260, M-1261, 16 Sb, 84 Pb.
Cast: 19 Brin
For transmission bearings, M.P 475-520°F.

BERGSOE WM.
M-1260, M-1261, 5 Sn, 12 Sb, 83 Pb
Cast 25 Brin.
For transmission bearings, M.P. 470-490°F

BERGSOL Mn Cu.
M-1260, M-1261, 8 Sn, 14 Sb, 0.5 Cu, 77.5 Pb
Cast. 29 Brin
For transmission bearings, M.P. 470-715°F

BERGSTAHL AM16-13N
M-1290, 0.05 max C, 18 Cr, 8 Ni, 0.7 Cb, bal Fe
Annealed 90,000 TS, 45,000 YS, 56 El, 65 RA, 160 Brin
For chemical plant equipment, stainless, austenitic, Type 347

BERGSTAHL AM17
M-1290, 0.40 C, Mn, bal Fe
For gears, bolts shafts, machine tool parts, water hardened

BERGSTAHL AM17 13E
M-1290, 0.10 max C, 17 Cr, 13 Ni, 2 Mo, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin
Cold drawn 150,000 TS, 135,000 YS, 6 El, 300 Brin
For acid resistant chemical plant equipment, Type 316 stainless, austenitic

BERGSTAHL AM18 8
M-1290 0.18 max C, 18 Cr 8 Ni, bal Fe
Annealed 80,000 TS, 35,000 YS, 55 El, 75 RA, 150 Brin
Cold drawn 180,000 TS, 150,000 YS, 10 El, 250 Brin
For chemical plant equipment, tanks, mixers, filters, Type 302 stainless, austenitic

BERGSTAHL AM858
M-1290, 0.10 max C, Cr Ni Mn, bal Fe
Annealed 80,000 TS 35,000 YS, 55 El, 75 RA, 150 Brin
For chemical plant equipment, stainless

BERGSTAHL AMG10
M-1290, 0.3 C, Ni, Mn, Si, bal Fe
For machine tool parts, oil hardened

BERGSTAHL C1H
M-1290, 0.80 C, Cr, bal Fe
For bearings, liners, sleeves, bushings, water hardened

BERGSTAHL C2H
M-1290, 0.65 C, Cr, Ni, bal Fe
For springs, bolts, axes, hammers; oil hardened, tough

BERGSTAHL CM1
M-1290, 0.25 C, 1.2 Cr, 0.4 Mo, bal Fe
For gears, bolts, shafts, fasteners, oil hardened, tough

BERGSTAHL CM1B
M-1290, 0.35 C, 1.2 Cr, 0.25 Mo, bal Fe
For gears, bolts, shafts, machine tool parts, oil hardened, shock resistant

BERGSTAHL CM1H
M-1290, 0.45 C, 1.3 Cr, 0.4 Mo, bal Fe.
For gears, bolts, machine tool parts, oil hardened, shock resistant.

BERGSTAHL CM3.
M-1290; 0.15 C, Cr, Mo, bal Fe.
For gears, bolts, machine tool parts; case hardening steel.

BERGSTAHL CMVW2.
M-1290; 0.22 C, 0.75 Cr, 0.25 Mo, 0.3 V, bal Fe.
For gears, bolts, machine tool parts, case hardening steel.

BERGSTAHL CMW1
M-1290, 0.22 C, 1.2 Cr, 0.45 Mo, bal Fe
For gears, bolts, machine tool parts, case hardening steel.

BERGSTAHL CMW2.
M-1290, 0.22 C, 1.2 Cr, 0.45 Mo, bal Fe
For machine tool parts, gears, fasteners, case hardening steel

BERGSTAHL CMW3
M-1290, 0.10 C, Cr, Mo, bal Fe
For machine tool parts, gears, fasteners, case hardening steel

BERGSTAHL CMW4
M-1290, 0.22 C, Cr, Mo, V, bal Fe
For machine tool parts, gears, fasteners, case hardening steel

BERGSTAHL CN5
M-1290, 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe
Cast 90,000 TS, 65,000 YS, 2 El, 212 Brin
For cylinder liners, bushings, valve seats, Type CC-50, heat resistant

BERGSTAHL CN7
M-1290, 0.3 C, 1.3 Si, 22 Cr, 7 Ni, bal Fe.
For furnace parts, heat treat boxes, conveyors, heat and corrosion resistant

BERGSTAHL CN8
M-1290, 0.4 C, 22 Cr, 9.5 Ni, bal Fe
Cast: 85,000 TS, 45,000 YS, 35 El, 165 Brin
For heat treat boxes, burner tips, conveyors, chains, Type HF, corrosion and heat resistant

BERGSTAHL CN10
M-1290, 0.4 C, 22 Cr, 9.5 Ni, bal Fe
Cast 85,000 TS, 45,000 YS, 35 El, 165 Brin
For heat treat boxes, burner tips, conveyors, chains, Type HF, corrosion and heat resistant

BERGSTAHL CN15
M-1290, 0.4 C, 26 Cr, 14 Ni, bal Fe
Cast 75,000 TS, 47,000 YS, 17 El, 25 RA, 200 Brin
For heat treat boxes, furnace parts, conveyor belts, hearth plates, Type HH, corrosion and heat resistant

BERGSTAHL CN20
M-1290, 0.4 C, 25 Cr, 19 Ni, bal Fe
Cast 75,000 TS, 50,000 YS, 17 El, 170 Brin
For furnace parts, retorts, stack dampers, Type HK, corrosion and heat resistant

BERGSTAHL CN35
M-1290; 0.5 C, 25 Cr, 30 Ni, bal Fe
For retorts, heat treat boxes, dampers, corrosion and heat resistant

BERGSTAHL CN38.
M-1290; 0.25 C, 17 Cr, 38 Ni, bal Fe
Cast: 70,000 TS, 40,000 YS, 10 El, 12 RA, 170 Brin
For heat treat boxes, salt pots, furnace parts, Type HT, corrosion and heat resistant

BERGSTAHL CV1.
M-1290: 0.24 C, 1.0 Cr, 0.2 V, 0.6 Mn, bal Fe
For gears, bolts, machine tool parts, oil hardened, shock resistant.

BERGSTAHL CV1H
M-1290; 0.45 C, 1.0 Cr, 0.2 V, 0.6 Mn, bal Fe.
For gears, bolts, springs, crankshafts; oil hardened, shock resistant.

BERGSTAHL CV2
M-1290, 0.35 C, 1.2 Cr, 0.2 V, 0.6 Mn, bal Fe.
For gears, crankshafts, axles, bolts, oil hardened, shock resistant

BERGSTAHL E2
M-1290, 2.0 C, 11.5 Cr, bal Fe.
For blanking and forming dies, punches; oil hardened, nondeforming

BERGSTAHL E12.
M-1290, 1.25 C, 1 Cr, bal Fe
For bearings, cutters, bushings, liners, water hardened, wear resistant

BERGSTAHL E16
M-1290, 0.8 C, Cr, bal Fe
For bearings, liners, bushings; water hardened, wear resistant

BERGSTAHL F28
M-1290; 2.7 C, Cr, bal Fe
For liners, nozzles, abrasion resistant

BERGSTAHL MNA1
M-1290, 1.2 C, Mn, bal Fe
For dies, cutters, tools, oil hardened

BERGSTAHL MNA2
M-1290, 1.25 C, Mn, bal Fe
For dies, cutters, tools, oil hardened

BERGSTAHL MVW2
M-1290, 0.20 C, Mo, V, bal Fe
For gears, bolts, fasteners, shafts, case hardened

BERGSTAHL MVW4.
M-1290, 0.20 C, Mo, V, bal Fe.
For gears, bolts, fasteners, shafts, case hardened

BERGSTAHL MW2
M-1290, 0.22 C, 0.65 Mn, 0.4 Mo, 0.3 max Cr, bal Fe
For gears, bolts, machine tool parts; water hardened, tough

BERGSTAHL P6M
M-1290, 0.12 C, Cr, Mo, bal Fe
For gears, bolts, camshafts, cams, case hardened

BERGSTAHL P7M
M-1290, 0.12 C, Cr, Mo, bal Fe.
For gears, bolts, camshafts, cams, case hardened

BERGSTAHL SP120
M-1290, 1.2 C, 1.3 Si, 29 Cr, bal Fe.
For wear plates, crushers, rolls, abrasion and heat resistant

BERGSTAHL VCN170
M-1290, 0.40 C, Ni, Cr, bal Fe
For gears, bolts, crankshafts, oil hardened, tough

BERGSTAHL VMS
M-1290, 0.45 C, Mn, Si, bal Fe
Hot rolled 98,000 TS, 59,000 YS, 24 El, 54 RA; 212 Brin,
For gears, axles, bolts, shafts, water hardened.

BERGSTROM TYPE S
M-1128, C, Mn, Ni, bal Fe
300 Brin
For hard surfacing electrodes, work hardening rod.

BERKSHIRE.
M-32, 1.2 C, 1.34 W, bal Fe
For taps, cutters, engravers tools, fast finishing steel, water hardened

BERKSHIRE, HIGH MANGANESE.
M-32: 1.2 C, 1.0 Mn, 0.4 Si, 0.5 Cr, 0.2 V, 1.4 W, bal Fe.
Water or oil hardening high carbon tool steel, for shafts, arbors, drill bushings, lathe centers.

BERLIN NO. 1.
Germany; 56 Cu, 29 Zn, 16 Ni
For electrical resistances, ornaments; corrosion resistant

BERLIN NO. 2.
Germany, 48 Cu, 24 Zn, 24 Ni, 3.6 Fe
For ornamental parts; spinning, drawing, stamping

BERMAX
M-709, 5-7 Sn, 9-11 Sb, 0.5 max Cu, bal Pb
Cast: 11,000 TS; 4.5 El, 20 Brin,
For bearings; anti friction, non-magnetic

BERRYDUR
M-296, 15 Cr, 60 Ni, 16 Fe, 2 Mn, 7 Mo, 0.5 Be.
For heat and corrosion resisting parts, heat and corrosion resistant.

BERRYDUR CONTRACID.
Be, bal Cu
600 Brin
For springs.

BERRYDUR-Cu.
1 Be, bal Cu.
260 Brin.
For springs; non-magnetic.

BERRYDUR-Cu
2.5 Be, bal Cu
360 Brin
For springs, non-magnetic

BERRY METAL
M-1281, 10 Pb, 8 Ni, 2 Sb, bal Cu.
Cast: 20,000 TS, 13,000 YS, 6 El.
For bearings, wear resistant

BERSCH METAL.
Germ., 93 Al, 7 Ni
For bearings

BERTHIER'S ALLOY-1.
Eng., 68 Cu, 32 Ni
For evaporators, stills; corrosion resistant

BERTHIER'S ALLOY-2
Eng., 72 Cu, 25 Zn, 2 Pb, 1.2 Sn.
For screw machine products, free-cutting.

BERUDA ALLOY
Eng., Cu-Zn.
For strong corrosion resistant parts, high tensile brass, corrosion resistant.

BERYLCO 10
M-646, 0.4 Be, 2.6 Co, bal Cu.
Annealed: 50,000 TS; 25,000 YS; 30 El; 50 RA; 70 Brin
Heat treated: 125,000 TS; 105,000 YS, 8 El, 10 RA, 240 Brin
For springs, resistance welding electrodes; age-hardenable

BERYLCO 10 C.
M-646; 0.6 Be, 2.6 Co, bal Cu.
Cast. 60,000 TS; 30,000 YS; 20 El; 35 RA; 90 Brin.
Annealed: 40,000 TS; 20,000 YS; 30 El, 50 RA; 70 Brin.
Hardened: 90,000 TS; 75,000 YS; 10 El, 15 RA, 185 Brin.
For resistance welding parts, switches, contacts; age-hardenable, corrosion resistant.

BERYLCO 20C.
M-646, 2.0-2.25 Be, 0.35-0.60 Co, bal Cu.
Heat treated 110,000-160-000 TS; 95,000-140,000 YS; 8-2 El; 10-3 RA; 250-440 Brin.
For plastic molds, safety tools, cams, pump parts; wear and impact resistant, age-hardenable.

BERYLCO 20CR
M-646; 2.0-2.25 Be, 0.35-0.65 Co, bal Cu.
Cast: 70,000 TS; 40,000 YS, 15 El; 138 Brin.
Heat treated. 155,000 TS, 115,000 YS; 0 El; 380 Brin.
For plastic molds, safety tools, gears, bushings, bearings; age hardenable

BERYLCO 25.
M-646, 2 Be, 0.3 Co, bal Cu
Heat treated 200,000 TS; 170,000 YS, 2 El, 3 RA, 400 Brin.
For springs, diaphrams, age hardenable

BERYLCO 25S
M-646, 2 Be, 0.3 Co, bal Cu.
Annealed 165,000 TS, 135,000 YS, 5 El, 8 RA, 350 Brin
4 No Hard: 190,000 TS, 160,000 YS; 2 El, 3 RA, 400 Brin.
For springs, diaphragms, clips, bellows, corrosion and heat resistant

BERYLCO 40
M-646, 2 Be, 0.25 Co, bal Cu
Rolled 98,000 TS, 2 El
Heat treated 180,000 TS, 95,000 YS, 1 El
For springs; age-hardenable

BERYLCO 50
M-646, 0.3-0.55 Be, 1.4-1.7 Co, 1.0 Ag, bal Cu
Heat treated 110,000-95,000 TS, 90,000-65,000 YS, 5-10 El, 5-10 RA, 195-240 Brin
For springs, resistance welding electrodes and dies, age-hardenable

BERYLCO 70
M-646, 0.1 Be, 0.5 Cr, bal Cu
Heat treated 80,000 TS, 60,000 YS; 15 El; 25 RA; 150 Brin
For springs, current carrying parts, age-hardenable.

BERYLCO 165
M-646, 1.6-1.8 Be, 0.2-0.35 Co, bal Cu
Annealed 70,000 TS, 30,000 YS, 40 El, 45 RA, 95 Brin
Hardened 185,000 TS, 155,000 YS, 2 El, 3 RA, 355 Brin
For springs, terminal plugs, jewelry, clips, heat treatable, corrosion resistant

BERYLCO 185.
M-646, 1.5-2.0 Be, 0.5 max Ni or Co, 0.25 max Fe, bal Cu
Annealed. 68,000 TS; 49 El.
Heat treated 195,000 TS; 3 El
For springs, age-hardenable.

BERYLCO 200C
M-646, 2.05-2.25 Be, 0.35-0.65 Co, bal Ni.
For bearings, gears, cams, plungers, drawing dies, age-hardenable, corrosion and wear resistant

BERYLCO 250-C.
M-646, 2.6-2.8 Be, 0.35-0.65 Co, bal Cu
For bearings, gears, cams, valves, drawing dies; age-hardenable, corrosion and wear resistant

BERYLCO 275CR.
M-646, 2.6-2.8 Be, 0.35-0.65 Co, bal Cu.
Heat treated 125,000-175,000 TS, 110,000-145,000 YS; 5-2 El; 8-3 RA; 270-415 Brin.
For plastic mold dies, safety tools; age-hardenable, corrosion resistant.

BERYLCO-717.
M-646; 0.5 Be, 0.7 Fe, 30 Ni, bal Cu.
Bar: 110,000-140,000 TS; 10-15 El.
Age-hardened: 145,000 min TS; 125,000 min YS; 10 min El; C 29 Rock.
For marine hardware, piping, high velocity heat exchangers, hydrophone parts.
High sea water corrosion resistant. Age-hardenable.

BERYLCO-717 C.
M-646; 0.50 Be, 1.0 Fe, 0.95 Mn, 0.06 C, 29 Ni, bal Cu.
Cast: 76,000 TS; 44,700 YS; 14 El; 15.3 RA; B 82 Rock.
Heat Treated: 121,500 TS; 84,400 YS; 14.5 El; C 20 Rock.
For marine hardware, heat exchangers.
Age hardenable High sea water corrosion resistant

BERYLCO CR-1
M-646, 2 75 Be, 0 5 max C, bal Ni
Heat treated· 125,000-195,000 TS; 200,000-180,000 YS; 2-0 El; 300-520 Brin.
Cast: 115,000 TS, 60,000 YS, 5 El; 240 Brin
For aircraft fuel pumps, impellers, core drill bits; age hardened, corrosion resistant castings.

BERYLCO CR-2.
M-646, 2 75 Be, 0 75-1.1 C, bal Ni.
For aircraft fuel pumps, impellers, core drill bits; age hardened, corrosion and wear resistant.

BERYLCO HPA
98.0 Be, 1 8 BeO, 0 18 Fe, 0 15 Al, 0 08 Mg, 0 02 Mn, 0 02 Cu, 0 10 Si, 0 05 Zn, 0 06 Ni
Vacuum hot pressed 40,000 TS; 30,000 YS, 1 El; Rock B 80
Hot Extruded and Annealed· 70,000 TS, 45,000 YS, 10 El, Rock B 90
For nuclear space applications

BERYLCO NICKEL 440
M-646, 1 95 Be, 0.50 Ti, bal Ni
Annealed 105,000 TS, 45,000 YS, 40 El; B 70 Rock
Hard Drawn 170,000 TS, 165,000 YS, 2 El, C 35 Rock.
HT Temper 270,000 TS, 230,000 YS, 8 El, C 51 Rock.
For heat resistant springs, and switches, diaphragms, bellows, retainer clips, electrical shunts, contact springs
High strength and corrosion resistant Age-hardenable

BERYLDUR
M-646, 0.8-1 2 Be, 0 2 min Ni, 4 0 others, bal Cu
Annealed 55,000-65,000 TS, 18,000-30,000 YS; 40-60 El.
Aged 125,000 140,000 TS, 105,000 125,000 YS, 12-20 El, 230-300 Brin.
For springs, clips, connectors; age-hardenable, high strength, corrosion resistant

BERYLLIUM-ALUMINUM
M-646, 5 0 Be, 1 0 Mg, bal Al
For master alloy for remelting, pigs.

BERYLLIUM BRONZE 1.0% Be
M-198, M-296, 1.0 Be, bal Cu.
Untempered: 67,000 TS, 62,000 YS; 7.5 El.
For corrosion resistant parts; corrosion resistant

BERYLLIUM BRONZE 1 5% Be.
M-198, M-296, 1.5 Be, bal Cu.
Untempered· 68,000 TS, 45 El
Tempered. 94,000 TS; 8 El.
For corrosion resistant parts; corrosion resistant

BERYLLIUM BRONZE 2.0% Be.
M-198, M-296; 2.0 Be, bal Cu.
Untempered: 72,000 TS; 15,500 YS; 40 El.
Tempered: 121,000 TS; 100,000 YS; 1 El.
For corrosion resistant parts; corrosion resistant.

BERYLLIUM BRONZE 2.5% Be.
M-198, M-199, M-296; 97.5 Cu, 2.5 Be.
Soft: 62,000 TS; 20,000 YS; 52 El; 66 RA; 98 Brin.
Hard: 176,000 TS; 160,000 YS; 0.6 El; 396 Brin.
For springs and parts subjected to frictional wear; wear resistant.

BERYLLIUM-COBALT.
M-646; 50 Be, bal Co.
For master alloy for remelting.

BERYLLIUM-COPPER.
M-646; 4 0 Be, bal Cu.
Used to introduce Be in Cu alloys; master alloy.

BERYLLIUM COPPER NO. 175.
M-960; 2 15 Be, 0 35 Ni, bal Cu.
Heat treated: 160,000-185,000 TS; 140,000-160,000 YS; 5-2 El; 360-450 Brin
For springs, clips, diaphragms; age hardenable, high fatigue strength.

BERYLLIUM I-400
M-1037; 92 Be, 4.5 BeO, 0.2 max Al, 0.5 max C, 0 3 max Fe, 0.1 max Mg, 0.15 max Si.
Unnotched 129,000 TS; 86,400 YS; 10.6 El
Notched. 127,100 TS.
For super-critical gyro applications.
For aerospace structures, pressure vessels, jet engine turbine wheels and blades High stiffness-weight ratio.

BERYLLIUM-IRON.
M 646, 50 Be, bal Fe.
Used to introduce Be in Cu-Fe alloys; master alloy.

BERYLLIUM-MAGNESIUM-ALUMINUM.
M-646, 5 0 Be, 5 0 Mg, bal Al
For master alloy for remelting

BERYLLIUM MALLEABLE.
M-305, 99 8 Be, 0.2 Ti
For X-ray windows, camera shutters; very malleable

BERYLLIUM MANGANESE BRONZE 1.0% Be.
M-198, M-296, 1 0 Be, 10 Mn, bal Cu.
Untempered 74,000 TS, 38,000 YS, 22 El
Tempered 146,000 TS; 127,700 YS; 2 3 El
For corrosion resistant parts; corrosion resistant.

BERYLLIUM MANGANESE BRONZE 1.5% Be.
M-198, M-296, 1.5 Be, 3 Mn, bal Cu
Untempered 78,000 TS. 38,000 YS, 25 El.
Tempered 150,000 TS, 135,000 YS, 4 5 El
For corrosion resistant parts; corrosion resistant.

BERYLLIUM-NICKEL.
M-646, 50 Be, bal Ni.
Used to introduce Be in Cu-Ni alloys; master alloy.

BERYLLIUM S-200-C.
M-1037; 98 Be, 2 BeO, 0 16 max Al, 0.15 max C, 0 18 max Fe, 0 08 max Mg, 0 08 max Si.
Hot Pressed. 44,800 TS, 33,800 YS, 1.6 El.
For aerospace structures, pressure vessels, jet engine components. High stiffness-weight ratio.

BERYLLIUM-SILVER.
M-646, 50 Be, bal Ag.
For master alloy for remelting.

BESCOLOY
M-424, C, bal Fe
For piercer points.

BESPLATE
M-710; Ni
For Anodes.

BEST.
M-336, 1.0 C, 0.3 Mn, bal Fe.
78,000 TS; 41,600 YS; 28 El; 167 Brin.
For tools, taps, reamers, dies; "Soderfors Best"; non-deforming.

BEST.
M-364; 0.7-1.1 C, bal Fe
For general tools, taps, drills; water hardening.

BEST
M-459; 1.0 C, 0.1 V, 0.25 Mn, bal Fe.
For cutters, dies, tools, drills; Type W2; water hardened

BEST 2
M-1287; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 100,000 TS; 53,000 YS, 21 El, 42 RA; 200 Brin
For springs, drills, taps, reamers, broaches, Type W1, water hardened.

BEST 3K.
M-1287, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated 190,000 TS, 145,000 YS, 10 El, 30 RA; 400 Brin
For springs, drills, taps, punches, tools, Type W1; water hardened

BEST 4W
M-1287; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 174,000 TS; 128,000 YS, 12 El, 37 RA, 355 Brin
For springs, rails, hammers, crimpers, Type W1, water hardened

BEST BRONZE
Eng; 90 Cu, 10 Zn
For jewelry trade as base for fire enameling, primers, bullet shells, gilding brass

BEST (DISSTON).
M-357, 0.70-1.20 C, bal Fe
For tools, drills, taps, water hardened

BEST TYPE METAL
Eng; 50 Pb, 25 Sn, 25 Sb
For type metal

BETHADUR 301
M-24, 0.12 C, 17 Cr, 7 Ni, bal Fe
For stainless parts, cooking utensils, stainless, austenitic

BETHADUR NO 302
M-24, 0.12 C, 17-19 Cr, 9-10 Ni, bal Fe
Water quench 95,000 TS, 57,000 YS, 42 El, 75 RA, 152 Brin.
For ship fittings, food containers, ornamental trim, non-magnetic, austenitic, corrosion resistant

BETHADUR 304.
M-24; 0.08 C, 19 Cr, 10 Ni, bal Fe
For welded construction, chemical equipment, non-magnetic, austenitic, corrosion resistant.

BETHADUR 305
M-24; 0.10 C, 18 Cr, 12 Ni, bal Fe.
For welded construction followed by corrective treatment; non-magnetic, austenitic, corrosion resistant

BETHADUR 308.
M-24, 0.10 C, 20 Cr, 11 Ni, bal Fe
For welded construction, valves, non-magnetic, austenitic, corrosion resistant

BETHADUR 309.
M-24; 0.12 C, 23 Cr, 13.5 Ni, bal Fe
For furnace parts, petroleum stills, heat, stainless and corrosion resistant

BETHADUR 310.
M-24; 0.15 C, 1 Mn, 1 Si, 20.5 Ni, 25 Cr, bal Fe.
For furnace parts, heat exchangers; heat resistant.

BETHADUR 316.
M-24, 0.08 C, 17 Cr, 12 Ni, 2.5 Mo, bal Fe.
For chemical and textile equipment, corrosion and heat resistant

BETHADUR 317.
M-24; 0.08 C, 1 Mn, 0.75 Si, 12.5 Ni, 19 Cr, 3.5 Mo, bal Fe
For high temperature parts, corrosion and heat resistant

BETHADUR 321.
M-24, 0.08 C, 20 Cr, 11 Ni, Ti = 5 × C, bal Fe.
For stainless parts, welded parts; stainless, stabilized

BETHADUR 347
M-24, 0.08 C, 18 Cr, 10.5 Ni, Cb = 10 × C, bal Fe.
For stainless and heat resistant parts, stainless and heat resistant, stabilized

BETHADUR 348
M-24, 0.15 max C, 18-20 Cr, 8-12 Ni, Cb = 10 × C, bal Fe
For heat and corrosion resistant parts, stainless

BETHADUR 403
M-24, 0.10 C, 11.5-13.0 Cr, bal Fe.
For steam turbine blades, corrosion resistant

BETHADUR 405
M-24, 0.08 C, 0.4 Mn, 0.5 Si, 12.5 Cr, 0.2 Al, bal Fe
For turbine blades, annealing boxes; corrosion and heat resistant

BETHADUR 410
M-24, 0.10 C, 12 Cr, 0.3 Mo, bal Fe
Heat treated 100,000 TS, 70,000 YS, 20 El, 60 RA, 200-240 Brin
For turbine blades, valves, cutlery, bolts, corrosion resisting, hardenable

BETHADUR 414
M-24, 0.10 C, 0.4 Mn, 0.5 Si, 1.75 Ni, 12.25 Cr, bal Fe
For valve parts, scraper knives, spring parts, corrosion and heat resistant

BETHADUR 420
M-24, 0.3 C, 13 Cr, bal Fe
Heat treated 250,000 TS, 214,000 YS, 10 El, 22 RA, 514 Brin
For surgery and dental tools, table cutlery, corrosion resisting, hardenable

BETHADUR 425
M-24, 0.12 max C, 16-18 Cr, bal Fe
For corrosion resistant parts, corrosion resistant

BETHADUR NO 430
M-24, 0.10 C, 16 Cr, bal Fe.
Annealed 75,000 TS, 58,000 YS, 28 El, 62 RA; 170 Brin
For exterior trim, ornaments, cold rivets, tanks, retorts, nitric acid equipment; ductile, corrosion resistant

BETHADUR 431.
M-24, 0.15 C, 1.7 Ni, 16 Cr, bal Fe
For starter cylinders, valves, corrosion resisting

BETHADUR NO 440
M-24; 1.15 C, 17 Cr, bal Fe, 0.3 Mn
Annealed 118,000 TS, 78,000 YS, 16 El, 19 RA; 241 Brin
For ball bearings, cutlery, hard stainless parts; corrosion and abrasion resistant.

BETHADUR NO. 440-A.
M-24; 0.65 C, 15-18 Cr, bal Fe.
Oil treated: 258,000 TS, 195,000 YS; 3 El; 6 RA; 495 Brin.
For balls for ball bearings, ball races, cutlery, valves, instruments, hardened machine parts; corrosion, heat and abrasion resistant.

BETHADUR 440 B.
M-24; 0.85 C, 0.7 Mn, 0.4 Si, 17 Cr, bal Fe.
For cutlery, surgical instruments, hardenable, corrosion resistant.

BETHADUR 440 C.
M-24; 1.1 C, 0.4 Mn, 0.05 Si, 17 Cr, bal Fe
For needle valves, ball bearings, oil pumps, hardenable, corrosion resistant.

BETHADUR NO. 486
M-24; 0.25 C, 25 Cr, bal Fe
Water quench: 95,000 TS; 50,000 YS, 15 El, 20 RA; 187 Brin.
For protection tubes, conveyor chains, furnace parts, bolts, nuts, racks, corrosion and heat resistant to S-atm, discontinued.

BETHADUR 501
M-24, 0.16-0.20 C, 4-6 Cr, 0.5 Mo, bal Fe
Annealed 79,000 TS, 33,000 YS, 33 El, 75 RA; 143 Brin
For oil refinery equipment, corrosion resistant

BETHADUR 502
M-24, 0.08 C, 4-6 Cr, bal Fe
For oil refinery equipment, corrosion resistant

BETHALLOY.
M-24, 0.75 C, 0.75 Mn, 0.3 Si, 0.9 Cr, 0.37 Mo, 1.8 Ni, bal Fe
For tools, broaches, taps, slitting cutters, reamers, oil hardened, tough.

BETHALON NO 303
M-24, 0.08-0.20 C, 17-19 Cr, 8 Ni, 0.07 min S, P, Se, 0.6 max Zr, Mo, bal Fe
Soft. 95,000 TS, 57,000 YS, 35 El, 45 RA, 152 Brin
For stainless parts, automatic and screw machine parts, free machining, stainless

BETHALON 416
M-24 0.15 max C, 12-14 Cr, 0.6 max Mo, 0.07 min S, bal Fe
Annealed 75,000 TS, 40,000 YS; 30 El, 60 RA, 155 Brin
Heat treated: 200,000 TS, 150,000 YS, 12 El, 40 RA, 415 Brin
For screw machine products, valve trim, pump shafts, Type 416, stainless, hardenable

BETHALON 430F.
M-24, 0.12 max C, 16-18 Cr, Mo, S, Se, bal Fe
For automatic and screw machine parts, not to be welded; similar to Bethadur No 3 plus machinability.

BETHANIZED PRODUCTS.
M-24; Zn coated steel
For wire for severe duty and weather resistance, can be worked and deformed

BETHCO MACHINE SCREW
M-24, 0.3 C, bal Fe
For machine screws, special cold heading steel, special process.

BETHCO WOOD SCREW.
M-24; 0.25 C, bal Fe.
For wood screws; special cold heading steel, special process.

BETH-CU-LOY.
M-24, 0.3 Cu, 0.2 C, bal Fe.
For sheet metal construction, roofing, siding; resists atmospheric corrosion.

BETHLED.
M-24; C, Mn, S, Pb, bal Fe.
For screw machine products; free-cutting.

BETHLEHEM 33C.
M-24, 0.40 C, 1.3 Mn, 0.08 S, bal Fe.
Annealed: 90,000 TS; 62,000 YS; 26 El; 47 RA; 183 Brin.
Heat treated: 142,000-178,000 TS, 102,000-161,000 YS; 13-12 El, 39-36 RA, 285-375 Brin.
For screw machine products, bolts, nuts, hardware; free-cutting, water hardened.

BETHLEHEM 57
M-24, 0.35 C, 3.25 Cr, 0.3 V, 9 W, bal Fe.
For dies, trimmers, pliers, punches, shear blades, forming dies; hot work tool steel.

BETHLEHEM 57 SPECIAL.
M-24; 0.4 C, 3.5 Cr, 14 W, 0.3 V, bal Fe
For spike cutters, hot headers, punches, forming dies; hot work steel.

BETHLEHEM 66 HS
M-24, 0.83 C, 4 Cr, 5 Mo, 6.3 W, 1.9 V, bal Fe.
For tools, cutters, taps, reamers, broaches; high speed steel

BETHLEHEM 67 CHISEL.
M 24, 0.5 C, 2.5 W, 1.15 Cr, 0.75 Si, bal Fe.
Heat treated: 185,000-337,000 TS, 180,000-255,000 YS, 14-9 El, 47-27 RA, 420-670 Brin.
For chisels, rivet sets, pneumatic tools, upsetters, Type S1, shock resistant

BETHLEHEM 67 TAP
M 24, 1.2 C, 0.65 Cr, 0.25 Mn, 0.2 V, 1.4 W, bal Fe.
For dies, cutting tools, taps, drills; oil hardening

BETHLEHEM 71.
M-24, 0.60 C, 0.25 Ni, 0.9 Mn, 0.25 max Cr, 2 Si, bal Fe
For tools, hand and pneumatic chisels, shear blades, punches, resists shock.

BETHLEHEM 235
M-24, 0.35-0.50 C, 1.4-2.0 Mn, bal Fe
Rolled. 110,000 TS, 70,000 YS, 16 El; 220 Brin
Ht Tr. 155,000 TS, 130,000 YS, 10 El, 330 Brin.
For shovels, crushers, scraper blades, hoppers
Wear resistant Was Bethlehem Abrasion Resisting.

BETHLEHEM AH-5
1.0 C, 0.6 Mn, 5.25 Cr, 1.1 Mo, 0.25 V, bal Fe.
For cutters, tools, dies, punches, air hardening, tough wear resistant.

BETHLEHEM ALLOY HOLLOW DRILL STEEL
M-24, 0.28 C, 0.95 Mn, 0.65 Cr, 2.25 Ni, 0.3 Mo, bal Fe
For hollow drills and forged on bits, shock and wear resistant.

BETHLEHEM AUGER DRILL
M-24, 0.75 C, 0.2 Mn, 15 Si, bal Fe
For auger drills; water hardening

BETHLEHEM BEARING Cr-Mo
M-24, 1.0 C, 1.5 Cr, with or without V or Mo, bal Fe
For ball races, cups, cones, ball bearings, roller paths; water hardened, bearing steel.

BETHLEHEM BEST.
M-24, 0.7-1.1 C, 0.2 V, bal Fe.
For tools, punches, dies, broaches, reamers, shear blades, water hardened.

BETHLEHEM BFS.
M-24; 1.3 C, 4 W, bal Fe.
For tools, cutters, finishing tools, reamers, dies; smooth finishing steel.

BETHLEHEM BRAKE DIE.
M-24; 0.51 C, 0.95 Cr, 0.87 Mn, 0.2 Mo, bal Fe.
For dies, press brakes; pre-heat treated.

BETHLEHEM BROACHING STEEL.
M-24; 0.8 C, 0.20 Si, 0.25 Mn, bal Fe.
For stone working tools, drills; Type W1; water hardened.

BETHLEHEM BTR.
M-24; 0.7 C, 1.2 Mn, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
For tools, master tools and dies, taps, hobs, reamers, broaches; non-deforming; oil hardened.

BETHLEHEM CARBON.
M-24; 1.0 C, 0.25 Mn, 0.2 Si, bal Fe.
For cutting tools; water hardening.

BETHLEHEM COLD HEADER DIE.
M-24; 0.95 C, 0.40 Mn, 0.40 Si, bal Fe.
Heading dies, gripper dies, swaging and forming dies.

BETHLEHEM COMMERCIAL WATER HARDENING DRILL ROD.
M-24; 1.0 C, 0.30 Mn, 0.20 Si, bal Fe.
For automatic screw machine parts, dowel pins, mandrels, punches, small tools, dies.
AISI Type W1 water hardening tool steel.

BETHLEHEM Cr-Mo-V-HIGH V.
M-24; 0.38 C, 5.2 Cr, 1.2 Mo, 1 V, 1 Si, 0.4 Mn, bal Fe.
Heat treated: 220,000 TS; 185,000 YS; 12 El; 38 RA; 440 Brin.
For die casting dies, shear blades, header dies; hot work steel, shock resistant.

BETHLEHEM Cr-Mo-W
M-24; 0.33 C, 1.05 Si, 5 Cr, 1.6 Mo, 1.5 W, bal Fe.
For spike cutters, hot headers, trimmers, die casting dies; hot work steel.

BETHLEHEM CROMO-V.
M-24; 0.40 C, 0.37 Mn, 1.0 Si, 5.2 Cr, 1.2 Mo, 0.90 V, bal Fe.
For tools, die casting dies, hot shear blades; oil or air hardening, hot work steel.

BETHLEHEM HM.
M-24; 0.78 C, 8.5 Mo, 3.8 Cr, 1.1 V, 1.6 W, bal Fe.
For reamers, drills, lathe and planer tools, hobs, taps; Type M1; high speed steel.

BETHLEHEM H.T.W.
M-24; 0.9 C, 1.7 Cr, 0.2 V, bal Fe.
For bearings, bearing races; wear resistant.

BETHLEHEM M-10.
M-24; 0.7 C, 8 Mo, 4 Cr, 2 V, 1.5 W, bal Fe.
For lathe and planer tools, drills; high speed steel

BETHLEHEM 01 DRILL ROD.
M-24; 0.90 C, 1.2 Mn, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
For pin header, special punches, precision gages, dies, drills, plugs.
AISI Type 01 oil hardening tool steel.

BETHLEHEM PISTON.
M-24; 1.15 C, 0.6 Cr, 0.2 V, bal Fe.
For pistons, pneumatic chipping and riveting hammers; hard and tough.

BETHLEHEM PIVOT STEEL.
M-24; 1.2 C, 1.65 Cr, 0.4 Mo, bal Fe.
For pivot bearings; wear resisting.

BETHLEHEM SILICO-MANGANESE SPRING STEEL.
M-24; 0.7 C, 0.9 Mn, 0.2 Si, bal Fe.
Heat treated: 210,000-235,000 TS; 180,000-195,000 YS; 12-9 El; 30-35 RA; 415 Brin.
For springs; oil hardened.

BETHLEHEM SOLID DRILL.
M-24; 0.8 C, bal Fe.
For drills, bits, blacksmith tools; shock resistant.

BETHLEHEM SPECIAL HS.
M-24; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For turning, planing, drilling, tapping, and reaming tools; high speed steel.

BETHLEHEM STANDARD BEARINGS.
M-24; 1.0 C, 1.35 Cr, bal Fe.
For bearings, rollers, master gauges; bearing steel.

BETHLEHEM STONE DRESSING.
M-24; 1.15 C, 0.25 Mn, 0.20 Si, bal Fe.
For tools for stone dressing; water hardened.

BETHLEHEM SUPERIOR.
M-24, 0.7-1.3 C, 0.15-0.25 V, bal Fe.
For taps, reamers, cutters, punches, dies, broaches, chisels; tool steel, extra quality.

BETHLEHEM T1 HIGH SPEED (B.S.H.S.)
M-24; 0.73 C, 4.0 Cr, 1.1 V, 18.0 W, bal Fe
General purpose high speed cutting tool, all types of cutting operations.
AISI Type T1 high speed tool steel.

BETHLEHEM X
M-24; 0.7-1.1 C, bal Fe.
For general tools, quarrying tools, crow bars, soft rock drills, chisels; water hardening.

BETHLEHEM XLC
M-24; 0.8-1.2 C, bal Fe
For dies, cold cutters, chisels, punches, shear blades, regular quality carbon tool steel

BETHLEHEM XX.
M-24; 0.9-1.3 C, bal Fe.
For gripper and header dies, punches; Type W1; cold heading.

BETHLEHEM XXX SPECIAL.
M-24; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, finishing tools, cutters; high speed steel

BETHNAMEL.
M-24; 0.1 C, bal Fe.
Rolled: 26,000 TS; 43,000 YS, 38 El; 77 Brin.
For porcelain enameled articles; good drawability.

BF 4-6 CrMo.
M-139; 0.3 C, 4-6 Cr, Mo, bal Fe.
For castings; corrosion resistant.

BF 302 STAINLESS.
M-139; 0.08-0.20 C, 17-19 Cr, 8-10 Ni, bal Fe.
For castings; stainless.

BF 316 STAINLESS.
M-139; 0.2 C, 18 Cr, 8 Ni, 3 Mo, bal Fe.
For stainless parts; stainless, acid resistant.

BF 410 STAINLESS.
M-139, 0.15 max C, 2 max Mn, 1.5 max Si, 11.5-13.5 Cr, bal Fe.
For castings, corrosion resistant.

BF 954.
M-1154; 0.3 C, 13 Cr, bal Fe.
For knives, crusher jaws, guide plates, blasting nozzles; wear resistant.

BF-CrMo.
M-139; 0.3 C, 0.8 Cr, 0.2 Mo, bal Fe.
For castings; water hardening.

BFD.
M-373; 1.20 C, 0.35 Mn, 0.25 Si, 0.6 Cr, 0.2 V, 1.5 W, bal Fe.
AISI Type 07 oil hardening tool steel.

"B-F" HIGH SPEED see REPUBLIC T1.

B-F H.T. LOW CARBON.
M-139; 0.30 C, 0.6-0.8 Mn, bal Fe
Heat treated: 128,000-80,000 TS; 98,000-53,000 YS; 10-30 El; 18-65 RA; 250-165 Brin.
For general structural parts; cast metal; Iz-14-18

BF-MM
M-139; 0.25-0.35 C, 0.20-0.25 Mo, 1.0-1.25 Mn, 0.30 Si, bal Fe.
Heat treated: 90,000-210,000 TS; 65,000-183,000 YS; 25-7 El; 55-25 RA, 196-480 Brin
For power shovels, tractor tread steel, mine car wheels; resists shock and wear; IZ-3-56

B-F N.C.M.
M-139, 0.25-0.35 C, 0.15-0.25 Mo, 1.75-2.25 Ni, 0.75-1.0 Cr, bal Fe.
Heat treated 220,000-100,000 TS, 182,000-80,000 YS, 2-22 El; 14-55 RA; 460-220 Brin.
For dipper teeth, gears, rollers, wheels, resists abrasion and shock

BFS.
M-24, 1.3 C, 0.28 Mn, 3.50 W, bal Fe
Water or oil hardenable tool steel, high hardness and wear resistance as heat treated, for lathe centers, drill bushings.

"B-F" TOOL
M-97, 0.9-1.2 C, bal Fe
For tools, drills, taps, water hardening

B-F UNIQUE NO 20
M-97, C, Cr, V, bal Fe
For flying shears; tough

BHS
M-459; 0.25 C, 1.5 Mn, 0.2 Si, 0.15 Al, 0.25 Ti, bal Fe
For welding electrode

B.H.T.A. METAL
M-338, 2 Cu, 1.25-1.75 Ni, 1.75-2.0 Fe, 0.8 Mg, 0.5 max Si, bal Al
Heat treated 60,000 TS, 47,000 YS; 10 El.
For light alloy parts forgings; Duralumin type, age hardening

BICALOY
M-711; Cu alloy
For resistance welding electrodes, wear and deformation resistant

BICOP OXYGEN FREE COPPER.
Cu
For electrical motors, generators, high conductivity

BIDDERY, HEINIES
84.3 Zn, 11.4 Cu, 2.9 Pb, 1.4 Sn
For bearings, Babbitt

BIDERY (BIDDERY)
U.S., 90.2 Zn, 6.3 Cu, 2.6 Pb, 0.8 Sn
For buttons, ornaments, free-cutting

BIDERY BUTTONS "A."
48.5 Cu, 33.3 Zn, 6.06 Sn, 12.15 Pb.
For buttons, ornamental parts; free-cutting.

BIDERY BUTTONS "B."
48.5 Cu, 33.32 Zn, 6.06 Sn, 12.15 Pb.
For buttons; free-cutting

BIERMAN TUNGSTEN BRONZE
Germany; 95 Cu, 3.4 Sn, 1.6 W.
For strong corrosion resistant parts; corrosion resistant.

BIG J.
M-477; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tools; high speed steel.

BIH.
M-459; 0.3 C, 1.1 Mn, 0.2 Si, 1 Cr, 0.2 Ti, bal Fe.
For welding electrode.

BILAME A.
M-771, nickel alloy bimetal.
For thermostats, fire detectors; bimetal.

BILAME AS.
M-771; nickel alloy bimetal.
For thermostats, fire detectors, bimetal.

BILAME BC.
M-771, nickel alloy bimetal.
For thermostats, fire detectors; bimetal

BILGEN BRONZE.
Germany; 97 Cu, 1.9 Sn, 0.5 Fe, 0.2 Pb
For electrical bronze; corrosion resistant.

BINAL
M-1469; Sinter cast boron carbide.
(Made to customers requirement)

BINDING BRASS
U.S., 63.25 Cu, 35 Zn, 1.75 Pb.
For automatic screw machine products, free-cutting.

BINNEY NO 71
M-25; C, alloy, bal Fe.
For heat treating furnaces and equipment; heat resistant

BINNEY NO 73
M-25, C, alloy, bal Fe
For heat treating furnaces and equipment, heat resistant

BINNEY HEAT RESISTING ALLOY.
M-25, C, Cr, Ni, bal Fe
Cast
For furnace parts resists heat to 1400°F

BIRDSBORO 20A6
M-136, 0.25 max C, 0.90 Mn, 0.50 Cr, 0.50 Ni, 0.50 Mo, bal Fe
Cast: 80,000-120,000 TS, 50,000-90,000 YP, 150-210 Brin, 14-20 El
For general and structural applications, gears, shafts, housings Good weldability
AISI 8620 modified

BIRDSBORO-20 CN
M-136, 0.25 max C, 0.70 Mn, bal Fe.
Cast 60,000-75,000 TS, 30,000-45,000 YP; 115-140 Brin; 22-30 El
For general and structural applications, gears, housings Excellent weldability.
AISI 1020

BIRDSBORO-22 CMN.
M-136, 0.25 max C, 1.0 Mn, bal Fe
Cast 70,000-80,000 TS, 40,000-55,000 YP; 22-30 El; 30-50 RA
For general and structural applications, gears, housings.
ASTM A216, WCC

BIRDSBORO-25A6
M-136, 0.30 max C, 0.90 Mn, 0.50 Cr, 0.50 Ni, 0.50 Mo, bal Fe
Cast. 105,000-145,000 TS; 85,000-120,000 YP, 14-17 El; 30-35 RA
For general and structural applications, gears, housings, shafting.
AISI 8625 modified.

BIRDSBORO-25 CN.
M-136; 0.30 max C, 0.70 Mn, bal Fe.
Cast: 65,000-80,000 TS; 35,000-55,000 YP, 125-160 Brin; 24-30 El.
For general and structural applications, gears, housings.
Excellent weldability AISI 1025.

BIRDSBORO NO 30
M-136; 0.30 C, 0.20 Mo, 1.0 Cu, bal Fe.
85,000 TS; 55,000 YS; 22 El; 40 RA; 180 Brin.
For engineering construction; corrosion and fatigue resisting.

BIRDSBORO-30A1.
M-136; 0.35 max C, 0.90 Mn, 0.20 Mo, 1.0 Cu, bal Fe.
Cast: 80,000-105,000 TS; 50,000-90,000 YS, 150-210 Brin; 15-30 El; 30-40 RA
For general and structural applications, gears, housings. Good weldability.

BIRDSBORO-30A2.
M-136; 0.35 max C, 0.80 Mn, 0.95 Cr, 0.20 Mo, bal Fe
Cast 90,000-120,000 TS; 65,000-100,000 YP, 14-20 El, 30-40 RA; 180-260 Brin.
For general and structural castings, shafts, gears, housings: AISI 4130, shock resistant.

BIRDSBORO-30A3
M-136, 0.35 max C, 0.75 Mn, 0.85 Cr, 2.0 Ni, 0.3 Mo, bal Fe
Heat Treated. 120,000-145,000 TS, 95,000-120,000 YP, 14-20 El, 30-40 RA; 200-250 Brin
For general and structural castings, gears, shafting, housing
AISI 4330 Shock resistant

BIRDSBORO-30A4
M-136, 0.35 max C, 1.5 Mn, 0.5 Cr, 0.5 Ni, 0.5 Mo, bal Fe.
Cast: 120,000-150,000 TS; 95,000-125,000 YP, 9-14 El, 22-30 RA; 240-310 Brin.
For general and structural castings, shafts, housings, gears.
Tough, shock resistant.

BIRDSBORO-30A6.
M-136, 0.35 max C, 0.90 Mn, 0.50 Cr, 0.50 Ni, 0.50 Mo, bal Fe.
Cast 120,000-145,000 TS, 95,000-120,000 YP, 14-20 El, 30-40 RA.
For general and structural applications, gears, shafts, housings
AISI 8630 modified.

BIRDSBORO-30 CN
M-136, 0.35 max C, 0.70 Mn, bal Fe
Cast: 65,000-80,000 TS, 35,000-55,000 YP, 125-160 Brin, 22-30 El, 30-50 RA
For general and structural applications, gears, housings
Excellent weldability. AISI 1030.

BIRDSBORO 40.
M-136; C, alloy, bal Fe
For rolls; least susceptible to fire cracking

BIRDSBORO-40A2.
M-136, 0.45 max C, 0.80 Mn, 0.95 Cr, 0.20 Mo, bal Fe.
Cast: 90,000-165,000 TS; 60,000-140,000 YP, 9-20 El, 22-40 RA; 240-310 Brin.
For general and structural castings, gears, shafts, housings. AISI 4140, tough.

BIRDSBORO-40A3.
M-136; 0.45 C, 0.75 Mn, 0.85 Cr, 2.0 Ni, 0.30 Mo, bal Fe.
Ht Tr.: 180,000-210,000 TS; 150,000-180,000 YP; 20-25 RA; 330-400 Brin.
For general and structural castings, shafts, gears, housings. AISI 4340. Shock resistant.

BIRDSBORO-40A5
M-136; 0.45 max C, 0.95 Mn, 0.5 Cr, 0.5 Ni, 0.5 Mo, bal Fe
Cast: 120,000-150,000 TS, 95,000-125,000 YP; 9-14 El, 22-30 RA; 290-350 Brin
For general and structural castings, shafts, gears, housings
High strength, shock resistant
AISI 8640 Modified.

BIRDSBORO-40 CN.
M-136, 0.50 max C, 0.80 Mn, bal Fe
Cast: 80,000-95,000 TS, 40,000-60,000 YP; 140-180 Brin, 30-40 RA, 18-28 El
For general and structural applications, gears, housings. Weldable with caution. AISI 1040

BIRDSBORO-45A2
M-136, 0.50 max C, 0.80 Mn, 0.95 Cr, 0.20 Mo, bal Fe
Cast 120,000-165,000 TS, 95,000-140,000 YP, 14-9 El 22-30 RA, 300 Brin
For general and structural castings, gears, shafts, housings AISI 4145, tough

BIRDSBORO-45A7
M-136, 0.50 max C, 0.80 Mn, 2.0 Cr, 0.5 Mo, bal Fe
Ht Tr 175,000-210,000 TS, 145,000-180,000 YP, 6-12 El, 12-30 RA, 290-350 Brin
For general and structural castings, gears, shafts, housings Tough, shock resistant

BIRDSBORO-45 CN
M-136, 0.50 C, 0.80 Mn, bal Fe
Cast 80,000-95,000 TS, 40,000-60,000 YP, 140-180 Brin, 18-28 El, 30-40 RA
For general and structural applications, gears housings Weldable with caution

BIRDSBORO 50
M-136 C, alloy, bal Fe
For rolls, water hardening

BIRDSBORO-50 CN
M-136, 0.55 max C, 0.80 Mn bal Fe
Cast 80,000-95,000 TS, 50,000-65,000 YP, 22-30 El, 25-40 RA
For general and structural applications, gears, housings AISI 1050

BIRDSBORO-CMo
M-136, 0.25 max C, 1.0 Mn, 0.25 Mo, bal Fe
Cast 65,000-80,000 TS, 35,000-50,000 YP, 24-30 El, 35-50 RA
For general and structural applications, gears, shafts, housings
AISI 4024 modified, tough

BIRDSBORO-CNi
M-136, 0.45 max C, 0.8 Mn, 3.5 Ni, bal Fe
Ht Tr. 120,000-145,000 TS, 95,000-120,000 YP, 14-20 El, 30-40 RA
For general and structural castings, shafts, gears, housings
AISI 2340, tough, shock resistant

BIRDSBORO-CrMo1.
M-136, 0.25 max C, 0.5 Cr, 0.5 Mo, bal Fe
Cast: 70,000-80,000 TS; 45,000-55,000 YS; 22-30 El; 35-50 RA.
For general and structural castings, shafts, gears, housings.
ASTM A356, Alloy 5.

BIRDSBORO-CrMo2.
M-136; 0.20 max C, 0.65 Mn, 1.25 Cr, 0.5 Mo, bal Fe.
Cast: 70,000-80,000 TS; 45,000-55,000 YP; 22-30 El; 35 RA.
For general and structural castings, shafts, gears, housings.
ASTM A356 Alloy A.

BIRDSBORO-CrMo2 + V.
M-136; 0.18 max C, 0.55 Mn, 1.25 Cr, 0.50 Mo, 0.20 V, bal Fe.
Cast 70,000-80,000 TS; 40,000-55,000 YP; 20-30 El; 35-50 RA
For general and structural castings, shafting, gears, housings. Shock resistant

BIRDSBORO-CrMo3.
M 136; 0.18 max C, 0.55 Mn, 2.3 Cr, 1.0 Mo, bal Fe
Cast. 70,000-105,000 TS; 40,000-85,000 YP, 17-30 El; 30-45 RA
For general and structural castings, gears, shafts, housings Tough, shock resistant.
ASTM A217, Alloy WC9.

BIRDSBORO CrMo4.
M-136, 0.20 max C, 0.55 Mn, 5.25 Cr, 0.55 Mo, bal Fe
Cast: 90,000-120,000 TS, 60,000-95,000 YP, 18-25 El; 35-45 RA
For general and structural castings, gears, shafts, housings
ASTM A217 Alloy C5

BIRDSBORO DA
M 136, 0.2-0.3 C, 0.6 Cr, 0.4 Mo, 1.5 Mn, 0.7 max Ni, bal Fe
Normalized 110,000 TS, 85,000 YS, 17 El, 35 RA, 225 Brin
For rolls, wear resistant

BIRDSBORO-LC2
M 136 0.25 max C, 0.65 Mn, 2.5 Ni, bal Fe
Cast 80,000 TS, 50,000 YP, 24 El, 35 RA
For general and structural applications, gears, shafts, housings Shock resistant

BIRDSBORO-LC3
M-136, 0.15 max C, 0.65 Mn 3.5 Ni, bal Fe
Cast 60,000-80,000 TS, 40,000-55,000 YP, 24-30 El, 35-50 RA
For general and structural castings, gears, housings, shafts
ASTM A352, LC3, AISI 4812 Modified
Tough, shock resistant

BIRDSBORO METAL
M-136, 3.0 C, 1.5 Si, 0.8 Mn, alloy, bal Fe
For rolls, alloy cast iron

BIRDSBORO-MM.
M-136, 0.32 max C, 1.5 Mn, 0.50 Mo, bal Fe
Cast 80,000-120,000 TS, 50,000-90,000 YS, 14-22 El, 150-210 Brin, 30-35 RA
For general and structural applications, gears, housings Good weldability. ASTM A148

BIRMABRIGHT
M-106, 3-6 Mg, 0.3-0.7 Mn, bal Al
Sand cast 20,000-22,400 TS, 20,000-22,400 YS, 3-6 El, 55-60 Brin, 5.8 Izod.
Good corrosion resistance, takes good finish, for decorative parts
Gen. Eng Bs 1490 LM 5-M

BIRMABRIGHT.
M-325, M-137, 3-6 Mg, 0.25-0.75 Mn, bal Al.
Sand cast. 20,000-22,000 TS, 11,000-15,000 YS, 5.5-3.0 El; 54-60 Brin.
Drawn: 34,000-43,000 TS; 20,000-27,000 YS; 25.0-15.0 El; 70-80 Brin.
For tubes, rivets, bolts, nuts, screws, architectural metal work, corrosion resistant to salt water.

BIRMABRIGHT B.B. 1.
M-325, 1 Mg, bal Al.
Soft temper: 17,000 TS; 8000 YS, 22 El.
½ H temper: 22,000 TS; 10,000 YS, 4 El.
For light weight construction; corrosion resistant, easily weldable.

BIRMABRIGHT BB 1-X.
M-325, 1 Mg, bal Al.
Soft 15,000 TS; 7000 YS, 30 El.
¼ H 18,000 TS; 15,000 YS, 7 El.
¾ H: 24,000 TS, 21,000 YS, 4 El.
For marine parts; resists sea water corrosion.

BIRMABRIGHT BB 2
M-325, 2 Mg, bal Al.
Soft: 23,000 TS, 9000 YS; 22 El
½ Hard 32,000 TS, 27,000 YS; 5 El.
Extruded: 23,100 TS, 12,000 YS; 30 El
For marine construction, hardware, resists sea water corrosion.

BIRMABRIGHT BB 3
M-325, 3 Mg, bal Al
Soft 31,000 TS, 15,000 YS, 24 El.
½ Hard: 39,000 TS, 32,000 YS; 6 El.
Extruded 30,000 TS; 14,000 YS, 26 El.
For marine construction, hardware, resists sea water corrosion

BIRMABRIGHT BB 5.
M 325, 5 Mg, bal Al
Soft. 36,000 TS; 18,000 YS; 18 El.
½ Hard 45,000 TS, 36,000 YS, 12 El.
Extruded 34,000 TS; 18,000 YS, 17 El
For marine construction, hardware, fixtures, resists sea water corrosion

BIRMABRIGHT BB 7
M-325, 7 Mg, bal Al
Soft 44,000 TS, 20,000 YS, 20 El
Extruded 43,000 TS, 21,000 YS, 20 El
For marine construction, fixtures, resists sea water corrosion

BIRMABRIGHT-BB17
M-325, 0.5 Mg, bal Al
Sheet, soft 13,000-18,000 TS, 25-30 El
Sheet, ½ hard 19,000-26,000 TS, 12-20 El
For highly reflective surface parts, trim, architectural Not heat treatable.

BIRMAL
M-137; 2.6 Mg, 0.25-0.75 Mn, bal Al.
Cast 22,000 TS 15,000 YS, 3.0 El, 58 Brin
For light alloy parts, heat treatable

BIRMAL L4
M-137, 2-4 Cu, 0.5-1.5 Mg, 8.5-10.5 Si, 0.5-1.5 Ni, 0.2 Ti, bal Al.
Permanent mold 32,500 TS, 0 El, 120 Brin
For pistons, age-hardenable

BIRMAL MB7
M-137, 0.7-1.3 Cu, 0.75-1.2 Mg, 0.35-0.85 Si, 1.6 Ni, 7.0 Sn, 0.2 Ti, bal Al
Cast
For bearings, age-hardenable

BIRMAL P83
M-137, 3-4 Cu, 7.5-9.5 Si, 1.3 max Fe, 1.0 max Zn, bal Al
Die cast: 40,400 TS, 15,700 YS, 3 El; 85 Brin.
For general purpose die castings; SAE 306.

BIRMALITE.
M-137; 9-11 Cu, 0.1-0.5 Mg, 1.0 Fe, bal Al.
Cast: 19,000 TS; 17,000 YS; 0.5 El; 80 Brin.
Heat treated: 40,000 TS; 0.5 El; 150 Brin.
For pistons; heat treatable.

BIRMAMETAL BMB 761.
M-321; 1 Cu, 1 Mg, 1 Si, bal Al
W(T4): 38,100 TS; 22,400 YS; 15 El
WP(T6): 56,000 TS, 44,800 YS; 6 El
For structures, marine trim; age hardenable.

BIRMASIL.
M-137; 11-14 Si, bal Fe.
For light alloy castings, die cast alloy.

BIRMASIL SPECIAL.
M-137, M-325, 10-13 Si, 2.5-3.5 Ni, 0.2 Ti, 0.6 Mg, bal Al.
Chill cast. 42,000-36,000 TS; 22,000-16,000 YS; 3-6 El; 70-80 Brin
Sand cast 28,000-29,000 TS, 14,000-16,000 YS, 4-2 El; 52-60 Brin.
For automotive engine water cooled cylinder blocks, cylinder heads, fire brick molds, motor car fittings; British Patent 342, 152; good corrosion resistance.

BIRMETAL-230.
M-321, 2.5 Cu, 0.3 Mg, bal Al
Ht. Tr.: 43,000 TS, 24,000 YS, 27 El, 70 Brin.
For rivets.
Heat treatable, corrosion resistance.

BIRMETAL-477.
M-321, 4.4 Cu, 0.7 Mg, 0.3 Si, 0.6 Mn, bal Al
Ht Tr. 70,000 TS, 60,000 YS; 13 El, 135 Brin.
For rivets, fittings, hardware
High strength, age-hardenable, good fatigue strength

BIRMETAL-AM503
M-321, 1.5 Mn, bal Mg.
Plate. 29,000-40,000 TS, 11,000-22,000 YS, 5-14 El
Extrusion: 44,000 TS; 29,000 YS, 4 El, 55 Vickers.
For fuel tanks, oil tanks, welded structures, bearing housings, valve and pump bodies, trailer bodies Good weldability, shock resistant

BIRMETAL-AZ31.
M-321, 1.0 Zn, 0.3 Mn, 3.0 Al, bal Mg
Extrusion: 38,000 TS, 29,000 YS, 15 El, 49 Brin
H24 Sheet 42,000 TS, 32,000 YS, 15 El.
For general purpose component parts, truck cabs, shipping containers
Good corrosion resistance, good bendability

BIRMETAL-AZM.
M-321, 0.3 Mn, 6.0 Al, bal Mg
Extrusion. 38,000-49,000 TS, 24,000-31,000 YS, 10-18 El
For control levers, hardware, bearing caps and housings, fittings.
Medium strength, excellent machinability Needs protection from corrosion

BIRMETAL B.B. 016
M-325; 1 Mg, 0.6 Si, 0.25 Cu, bal Al
W-temper: 30,000 TS; 16,000 YS, 15 El
WP-temper: 40,000 TS, 30,000 YS, 13 El
For light weight construction; age-hardenable.

BIRMETAL BB. 016.
M 325; 0.016 Si, bal Mg.
Annealed: 24,000-30,000 TS, 12,000-20,000 YS; 20-12 El.
Aged: 32,000-44,000 TS; 20,000-36,000 YS; 20-10 El
For marine construction; resists sea water corrosion.

BIRMETAL B.B. 019.
M-325, 1.25 Mg, 0.9 Si, 0.15 Cu, 0.2 Ti, bal Al.
W-temper: 32,000 TS; 20,000 YS; 12 El.
WP-temper: 36,000 TS, 32,000 YS; 10 El.
For light weight construction; age-hardenable.

BIRMETAL BB .019
M-325; 0.019 Si, bal Mg.
Annealed. 24,000-36,000 TS; 18,000-24,000 YS; 20-12 El
Aged. 32,000-40,000 TS; 24,000-32,000 YS, 20-10 El.
For marine construction, resists sea water corrosion.

BIRMETAL B.B. 055.
M-325, 0.5 Mg, 0.5 Si, bal Al.
W-temper: 24,000 TS; 12,000 YS; 20 El
WP-temper 36,000 TS; 28,000 YS; 9 El.
For light weight construction, age-hardenable

BIRMETAL BB 055.
M-325, 0.055 Si, bal Mg
Annealed: 10,000-26,000 TS, 10,000-20,000 YS, 30-10 El.
Aged 24,000-36,000 TS, 20,000-30,000 YS, 20-10 El
For marine construction; resists sea water corrosion.

BIRMETAL BBZ 36
M 321, 0.3 Cu, 3.5 Mg, 0.3 Mn, 6.5 Zn, 0.3 Cr, bal Al
W P temper. 70,000-84,000 TS, 64,000-78,000 YS, 15-8 El
For light weight construction, heat treatable

BIRMETAL BMB 473
M 321, 4 Cu, 0.7 Mg, 0.7 Mn, 0.3 Si, bal Al
Quenched 40,000-50,000 TS, 11,000-30,000 YS, 15-8 El
For light weight construction, heat treatable

BIRMETAL BMB 551
M-321, 4.5 Cu, 0.5 Mg, 0.7 Mn, 1.0 Si, 0.75 Fe, bal Al
W P temper 52,000-64,000 TS, 40,000-56,000 YS, 10-8 El
For light weight construction, heat treatable

BIRMETAL BMB 1306
M-321, 0.75 Cu, 2.75 Mg, 0.5 Mn, 5.5 Zn, bal Al
W P temper. 64,000-70,000 TS, 56,000-60,000 YS, 10 El
For light weight construction, corrosion resistant, heat treatable

BIRMETAL BMB 2308
M 321, 1.75 Cu, 2 Mg, 0.2 Mn, 6.5 Zn, 0.15 Cr, bal Al
W P temper 70,000-76,000 TS, 60,000-66,000 YS; 5 El
For aircraft structures, heat treatable

BIRMETAL-ZW1
M-321, 1.2 Zn, 0.4-0.8 Zr, bal Mg
Extrusion 36,000-48,000 TS, 24,000-33,000 YS, 10-20 El, 60-75 Vickers
For structural components welded by argon-arc process, airframe structures, cowlings, window and door frames
Medium strength, high corrosion resistant. Good weldability.

BIRMETAL-ZW3
M321; 3.0 Zn, 0.4-0.8 Zr, bal Mg
Extrusion: 40,000-51,500 TS, 29,000-40,000 YS, 10-25 El; 65-75 Vickers.
Sheet 36,000-45,000 TS, 24,000-33,000 YS, 8-18 El
For structural and stressed components, airframes, cowlings, window and door frames.
High strength, excellent corrosion resistant.
Free from stress corrosion cracking

BIRMETAL-ZW6.
M-321; 5.5 Zn, 0.4-0.8 Zr, bal Mg.
Extruded: 49,000 TS; 38,000 YS, 10 El.
Heat Treated: 51,000 TS; 42,000 YS; 8 El.
For floor beams, aircraft structural members.
High strength, good corrosion resistant.
Shock resistant.

BIRMID D7.
M-137; 2-4 Cu, 4-6 Si, 0.3-0.7 Mn, 0.25 Ni, 0.3 Zn, 0.2 Ti, bal Al.
Sand cast: 20,200 TS; 2 El; 70 Brin.
Permanent mold: 22,400 TS, 2 El; 75 Brin.
For heavy duty castings; age-hardenable, good castability.

BIRMID D8.
M-137; 2-4 Cu, 4-6 Si, 0.3-0.7 Mn, 0.35 Ni, 0.3 Zn, 0.2 Ti, bal Al.
Sand cast: 20,200 TS, 89,600 YS, 2 El, 60 Brin
Heat treated: 47,000 TS; 40,000 YS; 1 El, 110 Brin.
For gears, cases, hardware, instrument housings; age-hardenable, good castability.

BIRMID 21.
M-137; 2-4 Cu, 0.3-0.7 Mn, 0.2 max Zn, 0.2 max Ti, bal Al
Sand cast: 21,300 TS, 9000 YS; 1.7 El; 60 Brin
Permanent mold· 27,000 TS, 10,000 YS, 2.0 El; 70 Brin.
For moderately stressed parts; not heat treatable

BIRMID 112.
M-137; 0.7-2.5 Cu, 9-11.5 Si, 0.2 max Ti, bal Al.
Cast 36,000 TS, 13,500 YS, 1.5 El; 70 Brin.
For instrument housings, die castings.

BIRMID 298/304.
M-137, 4-5 Cu, 0.05-0.30 Ti, 0.25 max Si, bal Al
Sand cast· 40,400 TS; 4 El
Permanent mold: 44,800 TS, 9 El
Heat treated. 42,600 TS; 27,000 YS; 5 El; 100 Brin
For high strength, shock resistant castings; age-hardenable

BIRMID 300.
M-137, 9.5-11 Mg, 0.2 Ti, 0.25 Si, 0.1 Mn, bal Al
Sand cast· 42,600 TS, 22,400 YS, 10 El, 76 Brin.
Permanent mold· 49,300 TS, 24,600 YS, 18 El; 80 Brin.
For high strength castings, age-hardenable

BIRMID 428.
M-137; 6-8 Cu, 2-4 Si, 2-4 Zn, 0.6 max Mn, 1 max Fe, bal Al
Cast· 24,600 TS, 14,600 YS, 1 El, 80 Brin.
For housings, gear cases, light stressed parts

BIRMIDAL
M-106, 0.3-0.8 Mg, 3.5-6 Si, bal Al
Four grades of castings of same compositions, 18,000-43,000 TS range
General purpose castings, properties vary with varying heat treatments
Gen. Eng BS 1490: LM 8 M, 8-P, 8-W, 8-WP.

BIRMIDAL.
M-137; 0.5 Mg, 3.5-6.0 Si, 0.2 max Ti, bal Al.
Cast: 25,000 TS; 15,000 YS; 2-10 El, 60 Brin.
Heat treated· 44,000 TS; 32,000 YS; 1-5 El; 95 Brin.
For gear cases, instrument housings, age-hardenable.

BIRMIDIUM "Y."
M-137; 3.5-4.5 Cu, 1.8-2.3 Ni 1.2-1.7 Mg, bal Al.
Sand cast: 25,000 TS, 20,000 YS; 0.5 El; 85 Brin.
Aged: 32,000 TS; 29,000 YS; 1.0 El; 100 Brin.
For pistons, cylinder heads, crankcases, oil pans; age-hardenable, heat resistant

BIRMIDIUM "Y" ALLOY.
M-325, M-137; 3.5-4.5 Cu, 1.8-2.3 Ni, 1.2-1.7 Mg, bal Al.
Heat treated: 35,000-42,000 TS; 2-3 El.
For automobile pistons, piston heads, crank cases; corrosion resistant.

BIRMINGHAM.
Eng.; 62-50 Cu, 32-20 Zn, 12-30 Ni.
For German silver; corrosion resistant.

BIRMINGHAM 21.
M-137; 2-4 Cu, 4-6 Si, 2 max Zn, 0.2 max Ti, 0.15 max Mg, bal Al.
Sand cast· 21,300 TS; 9000 YS; 1.7 El; 60 Brin.
Permanent mold· 27,000 TS; 11,000 YS; 2 El; 70 Brin.
For cast parts subject to moderate stress; sand and permanent mold castings.

BIRMINGHAM 298/304.
M-137, 4-5 Cu, 0.10 max Mg, 0.25 max Si, 0.05-0.30 Ti, bal Al
T4-temper· 34,800 TS; 14,000 YS; 12 El, 65 Brin.
T6-temper· 42,000 TS, 27,000 YS, 5 El; 100 Brin
For shock resistant castings; sand and permanent mold cast, age-hardenable.

BIRMINGHAM 300.
M-137, 0.1 max Cu, 9.5-11.0 Mg, 0.2 max Ti, 0.25 max Si, bal Al.
Sand cast: 43,000 TS; 22,400 YS; 10 El; 76 Brin.
Permanent mold. 49,000 TS; 25,000 YS, 18 El, 80 Brin
For highly stressed castings, solution heat treated only.

BIRMINGHAM 428
M-137, 6-8 Cu, 2-4 Si, 2-4 Zn, 0.2 max Ti, bal Al.
Permanent mold 25,000 TS, 12,500 YS, 1 El, 80 Brin.
For castings for light stress, permanent mold casting.

BIRMINGHAM L.4
M-137, 2-4 Cu, 8.5-5-10.5 Si, 1.2 max Fe, 0.5-1.5 Mg, 0.2 max Ti, bal Al.
Permanent mold. 32,000 TS, 0 El, 90-120 Brin.
For pistons, permanent mold castings.

BIRMINGHAM P.83
M-137, 3-4 Cu, 7.5-9.5 Si, 1.3 max Fe, 0.1 max Mg, 1 max Zn, 0.3 max Sn, bal Al.
Die cast· 40,400 TS, 16,000 YS, 3 El, 85 Brin.
For instruments, casings, die castings.

BIRSO.
M-577, C, bal Fe.
For gears, housings, castings.

BISBO ARMA.
M-1286; 2.5 T.C., 0.7 C.C., 1.4 Si, 0.4 Mn, 0.025 Bi, bal Fe.
Ht Tr· 70,000-100,000 TS; 48,000-80,000 YS; 2-4 El, 163-269 Brin.
For crankshafts, rocker arms, universal joint yokes, gears Pearlitic malleable iron.

BISCO
M-334, 0.9 C, 1.2 Mn, 0.5 Cr, bal Fe.
For ring dies, spacers, washers, tubing; non-deforming, oil hardening.

BISCO ANNITE NO 1
M-334; 2.25 C, 13 Cr, 0.2 V, Mo, bal Fe
For punches, dies, gauges; nondeforming.

BISCO ANNITE NO. 2.
M-334; 1.5 C, 11.5 Cr, 0.25 V, 0.8 Mo, bal Fe.
For punches, dies, gauges, nondeforming.

BISCO DIE.
M-334; W. C.
For dies, wire drawing dies and cutlery tools; sintered.

BISCO TOOL STEEL TUBING.
M-334; 1 C, 1.2 Mn, 0.5 Cr, bal Fe.
For tubing bushings, blanking dies, non-shrink, oil hardened.

BISHIRALLOY.
Lead infiltrated powdered iron; for gears, bushings, electrical conductors, sliding parts, valve guides, piston rings
Self lubricating.

BISMO 18-4-1
M-24; 0.7-0.9 C, 4 Cr, 1.5 W, 8.5 Mo, 1.5 V, bal Fe.
For tools, cutters, reamers; high speed steel.

BISMO M-3.
M-24, M-334; 1.0 C, 4 Cr, 6.2 W, 6.2 Mo, 2.4 V, bal Fe.
For lathe and planer tools, reamers, broaches, hobs; high speed steel, oil hardened

BISMUTH BRASS-1.
U.S., 52 Cu, 30 Ni, 12 Zn, 5 Pb, 1 Bi
For ornaments, hardware, corrosion resistant

BISMUTH BRASS-2
U.S., 47 Cu, 31 Ni, 21 Zn, 1 Bi, 1 Sn
For ornaments, hardware, corrosion resistant

BISMUTH BRONZE
U.S.; 45-53 Cu, 33-10 Ni, 20-22 Zn, 16-15 Sn, 1 Bi, 0-0.1 Al.
For ornaments, hardware; corrosion resistant

BISON
M-1705, 0.5 C, 0.75 Si, 1.15 Cr, 0.2 V, 2.5 W, bal Fe
Oil hardening shock resisting tool steel
AISI S1

B & K AZ-31A
M-1395; 2.5-3.5 Al, 0.6-1.4 Zn, 0.20 min Mn, bal Mg
32,000-40,000 TS, 16,000-29,000 YS, 12-2 El
For light alloy parts; readily formed

BKE
Russia; 3-4 Cd, bal Cu.
For electrical contacts, high conductivity

BKS
M-459, 0.85 C, 0.10-0.40 Si, 0.5-0.7 Mn, bal Fe
Heat treated 190,000 TS; 145,000 YS, 10 El; 30 RA, 400 Brin
For springs, tools, cutters, punches, Type W1, water hardened.

BKS-3.
M-459; 0.85 C, 1.0 Cr, bal Fe
For bearings, cutters, liners; water hardened, wear resistant

BKS EXTRA
M-459, 0.80 C, 1.1 Cr, 0.1 V, bal Fe
For bearings, liners, sleeves, cutters; water hardened, wear resistant

B K SPECIAL.
M-1260, 90.3 Sn, 6.5 Sb, 3 Cu, 0.2 Ni
Cast. 12,800 TS, 25 Brin
For engine bearings; M.P. 440-610°F; shock resistant.

BKS SPECIAL.
M-459, 0.85 C 0.1-0.4 Si, 0.5-0.7 Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS, 10 El; 30 RA; 400 Brin
For tools, dies, springs, cutters; Type W1, water hardened.

BLA-CALOY.
M-1254; 3.3 C, 0.7 Mn, 2 Si, 0.05 Mg, bal Fe.
For gears, shafts, cams, housings; ductile cast iro

BLACKALLOY see BLACKALLOY TX90.

BLACKALLOY-525
M-1095, 44 Co, 24 Cr, 20 W, bal Fe.
Cast C 63-65 Rock.
For cutting and boring tools
Hard, abrasion and heat resistant.

BLACKALLOY-TX90
M-1095; 42 Co, 24 Cr, 22 W, bal Fe
Cast: C 66-67 Rock.
For tools, cutters, form tools, reamers, drills
Centrifugally cast High heat and abrasion resista

BLACK BEAUTY.
M-691, 0.2 C, bal Fe
For construction steel, black oxide sheet

BLACK DEVIL.
M-712; 0.09 C, 0.3 Mn, bal Fe
For welding rod; E 6020

BLACK DEVIL NO 75
M-712, 0.09 C, 0.37 Mn, 0.2 Si, 0.56 Mo, bal
Welded. 70,000-74,000 TS, 57,000-62,000 YS, 34-27 El, 65-50 RA
For welding electrodes, E-7020

BLACK DEVIL E B
M-712, 0.07 C, 0.39 Mn, 0.21 Si, bal Fe
Welded 66,000 TS, 56,000 YS, 26 El, 45 RA
For welding electrodes, arc, E-6030

BLACK DIAMOND
M-38, 1.0 C, bal Fe
For tools, cutters, drillers, dies, hammers, water hardening

BLACK LABEL
M-341, 1.1 C, 0.5 Cr, 0.2 V, bal Fe
For tools and dies, water hardening

BLACK LABEL CAST (EXTRA)
M-261, C, bal Fe
For tools and dies, water hardening

BLACKOR.
M-26, 87 W, 9 C
For oilwell core bits, cutters, tools, W_2C hard facing compound

BLACKSKIN ADMIRALTY
M-319, 70 Cu, 29 Zn, 1 Sn
Cast 45,000-60,000 TS
For condenser tubes, corrosion resistant

BLACK STREAK ALNICO NO 4.
M-373, 12 Al, 28 Ni, 5 Co, bal Fe
For cast permanent magnets, high coercive for

BLANCO BA
M-1288, 0.10 C, 18 Cr, 8.5 Ni, bal Fe
Annealed: 80,000 TS; 35,000 YS; 55 El, 75 RA, 150 Brin
Cold drawn. 180,000 TS, 150,000 YS; 10 El, 250 Brin
For chemical plant equipment, tanks, fermente
Type 302; stainless, austenitic.

BLANCO BA88.
M-1288; 0.12 C, 18 Cr, 8 Ni, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 80,000 TS, 35,000 Ys; 40 El; 60 RA; 150 Brin
For screw machine products, fasteners; Type 3
stainless, free-cutting

BLANCO B SPEZIAL.
M-1288; 0.1 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
Cold drawn. 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, tanks, mixers, vessels; Type 302; stainless, austenitic.

BLANCO B SUPER.
M-1288, 0.1 max C, 18 Cr, 2 Mo, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin
Cold drawn. 150,000 TS; 135,000 YS; 6 El; 300 Brin.
For acid resistant chemical plant equipment, tanks; Type 316, stainles, austenitic

BLANCO CM2.
M-1288, 0.35 C, 16.5 Cr, 1.15 Mo, bal Fe
Annealed: 90,000 TS; 55,000 YS, 20 El; 45 RA; 180 Brin
For oil refinery equipment, furnace parts; corrosion and heat resistant.

BLANCO CN12.
M-1288, 0.1 max C, 12.5 Cr, 12 Ni, bal Fe.
For valves, pumps; corrosion and heat resistant

BLANCO CNM.
M-1288, 0.07 max C, 17 Cr, 13 Ni, 4.7 Mo, bal Fe.
Annealed 90,000 TS; 40,000 YS; 45 El, 60 RA; 180 Brin
For acid resistant chemical plant equipment, Type 317, stainless, austenitic

BLANCO CT
M 1288; 0.12 max C, 18 Cr, 19.5 Ni, Ti = 4 × C, bal Fe
Annealed 85,000 TS, 35,000 YS, 55 El, 65 RA, 150 Brin
For welded structures, chemical plant equipment; Type 321; stainless, austenitic.

BLANCO CT2N.
M-1288, 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe
Annealed 90,000 TS, 45000 YS, 56 El; 65 RA; 160 brin
Cold drawn 100,000 TS, 65,000 YS, 40 El, 60 RA, 202 Brin
For welded structures, chemical plant equipment, Type 347, stainless, austenitic.

BLANCO CU
M-1288, 0.07 max C, 17.5 Cr, 2 Mo, 17.5 Ni, 2 Cu, Ti = 7 × C, bal Fe
For valves, pumps, chemical plant equipment, corrosion and heat resistant

BLANCO F.
M-1314; 0.08 C, 17 Cr, bal Fe.
Annealed: 80,000 TS, 50,000 YS, 25 El, 50 RA; 150 Brin.
Cold drawn: 130,000 TS; 120,000 YS, 2 El, 200 Brin
For gears, shafts, furnace parts, heat treating boxes; corrosion and heat resistant, Type 430.

BLANCO G
M-1288, 0.20 C, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El, 55 RA; 196 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El, 50 RA; 215 Brin.
For turbine blades, cutlery, valves, instruments; Type 420; stainless, hardenable.

BLANCO H.
M-1314; 0.4 C, 13 Cr, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 20 El; 50 RA; 200 Brin.
For valves, cutlery, surgical and dental instruments; Type 420; stainless, hardenable.

BLANCO K(H).
M-1288, 0.4 C, 13 Cr, bal Fe.
Annealed: 100,000 TS; 55,000 YS, 20 El; 50 RA; 200 Brin.
For valves, cutlery, surgical and dental instruments, Type 420, stainless, hardenable.

BLANCO L1.
M-1288, 0.12 max C, 13 Cr, bal Fe
Annealed 75,5000 TS, 40,000 YS; 35 El; 70 RA; 155 Brin
Cold drawn 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For turbine blades, surgical instruments, Type 410; stainless.

BLANCO L2
M-1288; 0.12 max C, 13 Cr, bal Fe
Annealed: 75,000 TS; 40,000 YS, 35 El, 70 RA; 155 Brin.
Cold drawn 100,000 TS, 85,000 YS, 17 El, 60 RA, 205 Brin.
For turbine blades, cutlery, surgical and dental instruments, Type 410, stainless.

BLANCO L3
M-1288, 0.12 max C, 13 Cr, 0.4 Si, bal Fe.
Annealed 75,000 TS; 40,000 YS, 35 El, 70 RA; 155 Brin
Cold drawn 100,000 TS, 85,000 YS; 17 El; 60 RA; 205 Brin
For cutlery, turbine blades, instruments; Type 410, stainless

BLANCO M
M-1314, 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS, 50,000 YS, 25 El, 55 RA, 196 Brin.
Cold drawn 105,000 TS, 85,000 YS, 17 El; 50 RA; 215 Brin.
For cutlery, valves, turbine blades, knives; Type 420, stainless, hardenable.

BLANCO M1.
M-1288, 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed 95,000 TS, 50,000 YS, 25 El; 55 RA; 196 Brin.
Cold drawn 105,000 TS, 85,000 YS, 17 El, 50 RA, 215 Brin.
For cutlery, valves, turbine blades, knives; Type 420, stainless, hardenable.

BLANCO M2
M-1288, 0.22 C 0.4 Si, 17 Cr, 1.5 Ni, bal Fe.
Annealed. 125,000 TS, 95,000 YS, 20 El, 55 RA; 260 Brin
Cold drawn 130,000 TS, 110,000 YS, 15 El, 35 RA, 270 Brin.
For pumps, marine hardware, valve trim, shafts, Type 431, stainless.

BLANCO M3
M-1288, 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed 95,000 TS, 50,000 YS; 25 El, 55 RA; 195 Brin.
Cold drawn. 105,000 TS, 85,000 YS, 17 El; 50 RA; 215 Brin.
For valves, pumps, turbine blades, cutlery, knives; Type 420, stainless, hardenable.

BLANCO M3E.
M-1288; 0.9 C, 0.4 Si, 18 Cr, 1.15 Mo, 1 V, bal Fe.
For valves, bearings, instrument pivots, rollers; corrosion and wear resistant, hardenable.

BLANCO M4.
M-1288, 0.12 C, 16.5 Cr, 0.25 Mo, 0.20 S, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 160 Brin.
For gears, shafts, screw machine products; Type 430F; stainless, free-cutting.

BLANCO RCM.
M-1288; 0.20 C, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
For valves, cutlery, valve trim, turbine blades; Type 420 Mo; stainless, hardenable.

BLANCO SPEZIAL.
M-1288; 0.07 C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
Cold drawn: 180,000 TS; 125,000 YS; 10 El; 330 Brin.
For welded structures, chemical plant equipment, tanks: Type 304; stainless, austenitic.

BLANCO SPEZIAL.
M-1314; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, tanks; Type 302; stainless, austenitic.

BLANCO SUPER.
M-1288; 0.07 max C, 18 Cr, 2 Mo, 10.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
Cold drawn: 150,000 TS; 135,000 YS; 6 El; 300 Brin.
For acid resistant chemical plant equipment, tanks; Type 316, stainless, austenitic.

BLANCO SUPER EXTRA.
M-1288; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe
Annealed: 85,000 TS, 35,000 YS; 50 El; 65 RA; 160 Brin.
Cold drawn 150,000 TS; 135,000 YS; 6 El; 300 Brin.
For welded structures, chemical plant equipment, tanks: Type 316 Ti; stainless, austenitic.

BLANCO SUPER EZN.
M-1288, 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For welded structures, chemical plant equipment, tanks; Type 316 Cb; stainless, austenitic.

BLANCO T70.
M-1288; 0.1 max C, 17.5 Cr, Ti = 7 × C, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For heat treating boxes, furnace parts, rabble arms; Type 430 Ti; stainless, ferritic.

BLANCO W.
M-1288; 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El, 70 RA; 155 Brin
Cold drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For valve trim, turbine blades, cutlery; Type 410; stainless.

BLANKO-BLECH.
M-1288; 80 Cu, 20 Ni.
For turbine blades, condenser tubes; corrosion resistant.

BLATT (LEAF) GOLD.
Eng.; 77 Cu, 23 Zn.
For gold leaf substitute, signs; corrosion resistant.

BLATT (LEAF) SILVER.
Eng.; 91 Sn, 8.3 Zn, 0.4 Pb, 0.2 Fe.
For bearings, tin foil for wrappers; Babbitt.

BLAUPUNKT.
M-1331; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, drills, reamers, taps; high speed steel.

BLAW-KNOX C-1.
M-1222, M-112; 0.08-0.20 C, 0.5-1.1 Mn, 0.2-0.4 Si, bal Fe.
Cast: 55,000 TS; 27,000 YP; 25 El; 45 RA; 135-155 Brin.
For general machinery castings, housings, shafts, case-hardened parts.

BLAW-KNOX C-1-0.
M-1222, M-112, 0.3 max C, 0.7 max Mn, 0.35-0.45 Si, bal Fe.
Cast: 60,000 TS; 30,000 YS; 30 El, 45 RA; 135-155 Brinell.
For general machinery castings, gears, housings, casings. Water hardening

BLAW-KNOX C-1-1.
M-1222, M-112, 0.20-0.25 C, 0.6-0.8 Mn, 0.35-0.45 Si, bal Fe.
Cast: 60,000 TS; 30,000 YP; 30 El; 45 RA; 135-155 Brin.
For general machinery castings, gears, housings, casings. Water hardening.

BLAW-KNOX C-1-2.
M-1222, M-112, 0.20-0.30 C, 0.6-0.8 Mn, 0.30-0.45 Si, bal Fe
Cast: 65,000 TS, 33,000 YP, 26 El, 40 RA; 140-155 Brin.
For general purpose castings, gears, shafts, housings Water hardening

BLAW-KNOX C-1-3.
M-112, M-1222, 0.30-0.35 C, 0.65-0.85 Mn, 0.30-0.45 Si, bal Fe.
Cast: 70,000 TS, 35,000 YS; 24 El, 36 RA; 145-160 Brin
For general machinery castings, gears, shafts, casings. Water hardening.

BLAW-KOX C-1-4.
M-112, M-1222, 0.35-0.40 C, 0.7-0.9 Mn, 0.30-0.45 Si, bal Fe
Cast: 75,000 TS, 40,000 YP; 22 El; 33 RA; 150-165 Brin.
For general machinery castings, housings, gears, shafts. Water hardening.

BLAW KNOX C-1-5.
M-112, M-1222, 0.40-0.45 C, 0.7-0.9 Mn, 0.30-0.45 Si, bal Fe.
Cast: 80,000 TS, 42,000 YP; 20 El; 30 RA; 155-170 Brin.
For general machinery castings, housings, shafts, gears. Water hardening.

BLAW-KNOX C-1-6.
M-112, M-1222; 0.50-0.55 C, 0.7-0.9 Mn, 0.3-0.45 Si, bal Fe.
Cast: 85,000 TS; 45,000 YP; 18 El; 25 RA; 160-175 Brin.
For gears, shafts, housings, general purpose castings. Water hardening.

BLAW-KNOX C-2.
M-112, M-1222; 0.27-0.32 C, 0.9-1.3 Mn, 0.3-0.45 Si, 0.3-0.4 Ni, 0.10-0.18 Mo, bal Fe.
Cast: 85,000 TS, 62,000 YP; 22 El; 50 RA; 170-300 Brin.
For gears, countershafts, axles, housings, castings. Oil hardening, shock resistant.

BLAW-KNOX C-2-A.
M-112, M-1222; 0.32-0.38 C, 1.05-1.25 Mn, 0.3-0.45 Si, 0.3-0.4 Ni, 0.10-0.18 Mo, bal Fe.
Cast: 90,000 TS; 65,000 YP; 20 El; 45 RA; 185-310 Brin.
For gears, housings, shafts. Oil hardening.

BLAW-KNOX C-3-A.
M-112, M-1222; 0.35-0.40 C, 1.15-1.35 Mn, 0.3-0.45 Si, 0.20 Mo, bal Fe.
Cast: 95,000 TS; 65,000 YP; 20 El; 45 RA; 190-320 Brin.
For gears, axles, shafts, housings.
Oil or water hardening.

BLAW-KNOX C-4.
M-112, M-1222; 0.3-0.4 C, 1.0-1.2 Mn, 0.3-0.45 Si, 0.2 Mo, 0.1 V, bal Fe.
Cast: 80,000 TS; 50,000 YP, 22 El, 40 RA; 150-170 Brin
For gears, housings, axles, shafts.
Water or oil hardening.

BLAW-KNOX C-5.
M-112, M-1222, 0.25-0.35 C, 0.8-1.0 Mn, 0.3-0.45 Si, 0.7-0.8 Ni, 0.35-0.40 Mo, bal Fe.
Cast: 90,000 TS, 65,000 YP; 24 El, 50 RA; 180-330 Brin
For gears, shafts, axles, bolts
Water or oil hardening.

BLAW-KNOX C-6.
M-112, M-1222, 0.4-0.5 C, 0.5 Mn, 0.4 Si, 2.75-3.25 Cr, 0.3-0.4 Mo, bal Fe.
Cast: 110,000 TS, 90,000 YP, 16 El; 40 RA; 225-400 Brin
For gears, shafts, axles Oil hardening, tough

BLAW-KNOX C-6-M
M-112, M-1222, 0.25-0.30 C, 0.5-0.6 Mn, 0.3-0.45 Si, 2.75-3.25 Cr, 0.2-0.3 Mo, bal Fe
Cast 100,000 TS, 75,000 YP, 19 El, 50 RA, 225-350 Brin
For gears, shafts, housings
Oil hardening, shock resistant.

BLAW-KNOX C-7
M-112, M-1222, 0.3-0.4 C, 0.8-1.0 Mn, 0.3-0.45 Si, 0.8 Cr, 1.5 Ni, 0.4 Mo, bal Fe
Cast 125,000 TS, 100,000 YP, 15 El, 35 RA; 220-365 Brin.
For gears, shafts, housings Shock resistant, tough.

BLAW-KNOX C-8
M-112, M-1222, 0.25-0.35 C, 0.7-0.9 Mn, 0.30-0.45 Si, 0.50 Cr, 0.50 Ni, 0.4 Mo, bal Fe.
Cast 115,000 TS, 90,000 YP, 22 El, 50 RA; 200-325 Brin
For gears, shafts, housings
Shock resistant Water hardening

BLEIZINNBRONZE 7
M-1420, Zn, Sn, bal Cu
Cast 25,000 TS, 8 El, 100 Brin
For hardware, bronze

BLEIZINNBRONZE 8.
M-1420, Zn, Sn, bal Cu.
Cast: 22,000 TS; 8 El, 60 Brin.
For hardware; bronze.

BLEIZINNBRONZE 10
M-1420, Zn, Sn, bal Cu
Cast. 26,000 TS; 15 El, 70 Brin.
For hardware; bronze.

BLENDALLOY 22-1000 HIGH PURITY NICKEL.
M-1626, 0.005 max C, 0.005 max Fe, 99.98 Ni.
For plater bars, tube cathodes, fluorescent lamp components, and resistance thermometers.

BLENDALLOY 22-9604.
M-1626, 0.005 max C, 0.005 max Fe, 96 Ni, 4 W. (High purity product).
For specialized electronic and magnetic applications.

BLENDALLOY 22-9800.
M-1626, 0.005 max C, 0.005 max Fe, 98 Ni, 0.50 Ti, 0.25 Mg. (High purity product).
For springs requiring high electrical conductivity and parts requiring good thermal conductivity.

BLENDALLOY 25-4200 ("42-ALLOY").
M-1626, 0.005 max C, 42 Ni, 58 Fe (High purity product).
For electronic, magnetic and electrical applications. Glass sealing.

BLENDALLOY 25-4206.
M-1626; 0.005 max C, 43 Ni, 48 Fe, 2.5 Ti, 5 Cr, 0.5 Al. (High purity product).
For springs, mechanical filters, tuning forks.

BLENDALLOY 25-4601 FM
M-1626, 0.005 max C, 46 Ni, 53 Fe, 0.5 Mn, 0.10 Se, (High purity product).
For glass sealing applications

BLENDALLOY 25-4803
M-1626, 0.005 max C, 48 Ni, 49 Fe, 3 Mo. (High purity product).
High magnetic permeability with minimum energy loss For communication and electronic equipment.

BLENDALLOY 25-5000 (Orthonol).
M-1626, 0.005 max C, 50 Ni, 50 Fe. (High purtity product).
Soft magnetic alloy with very high squareness and high core gain For saturable reactors, magnetic amplifiers, switching devices, and power inverter-converter applications.

BLENDALLOY 25-5200 ("52" Alloy)
M-1626, 0.005 max C, 52 Ni, bal Fe (High purity product).
Precise thermal expansion, uniformly fine-grained microstructure, excellent electrical and thermal conductivity
For glass sealing in dry reed switches and mercury wetted relays

BLENDALLOY 25-7904 (Permalloy)
M-1626; 0.005 max C, 80 Ni, 15 Fe, 5 Mo (High purity product).
Soft magnetic alloy with high initial permeability. For use in transformers, reed relays, amplifiers, vacuum tubes, microphones, loud speakers, cables.

BLENDALLOY 25-8000.
M-1626, 0.005 max C, 80 Ni, bal Fe. (High purity product).
For electronic and magnetic applications

BLENDALLOY 25-8004 (Permalloy)
M-1626, 0.005 max C, 80 Ni, 15 Fe, 5 Mo (High purity product)
Soft magnetic alloy with high squareness and high core gain, low coercive force.
For preamplifiers and modifiers, converters

BLENDALLOY 25-8300
M-1626, 0.005 max C, 83 Ni, bal Fe. (High purity product).
For electronic and magnetic applications.

BLENDALLOY 32-9010
M-1626; 0.005 max C, 0.005 max Fe, 90 Co, 10 Ni.
For electronic, magnetic, magnetostrictive, and plating applications.

BLITZ FEE.
M-1312; 0.86 C, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel.

BLOCK BRASS.
U.S.; 66.5 Cu, 32 Zn, 1.5 Pb.
For free machining brass parts.

BLOCK'S ALLOY.
U.S.; 54 Co, 45 Ni, 0.9 Si.
For tools; corrosion and heat resistant.

BLOMBIT.
M-621; 2-7 Ag, 93-98 Cu.
Forged: 72,000-78,000 TS; 8-5 El; 120-140 Brin.
For electrodes and tips for spot welding, 83-90% conductivity.

BLUE ANCHOR DRILL ROD.
M-342; 1.20-1.35 C, bal Fe.
Cold drawn: 85,000 TS; 60,000 YS; 25 El; 50 Brin.
For tools, taps, drills, reamers, water hardening.

BLUE CHIP.
M-57; 0.70 C, 0.25 Mn, 4 Cr, 18 W, 1 V, bal Fe.
Annealed: 105,100 TS, 75,000 YS; 14 El; 17 RA, 230 Brin.
For tools, cutters, reamers, drills, punches, dies shears, taps, high speed steel.

BLUEDAC.
M-712, 0.08 C, 0.57 Mn, 0.21 Si, bal Fe.
Cast: 63,000 TS, 55,000 YS; 29 El; 55 RA.
Welded: 73,000 TS; 64,000 YS, 23 El; 35 RA
For welding electrodes; arc welding all positions; E-6011

BLUE DEVIL YOLOY.
M-712; 0.2 C, 0.5 Cu, bal Fe.
80,000 TS, 75,000 YS; 25 El; 53 RA
For welding rod; flux coated.

BLUE DIAMOND
M-542; C, alloy, bal Fe.
For road machinery cutting edges, wear resistant

BLUE DOT SPECIAL.
M-750, C, alloy, bal Fe.
For maintenance and repair operations; oil hardening.

BLUE EDGE
M-275, 0.5 C, 1 Cr, 1 W, bal Fe.
For pneumatic chisels, shear blades, cold rivet sets; shock resisting AISI S3

BLUE GOLD
U.S.; 75 Au, 25 Fe.
For ornaments, jewelry; corrosion resistant.

BLUE LABEL
M-341; 1.0-1.1 C, 0.15-0.25 V, Mn, Si, bal Fe.
For cold swaging dies, forming rolls, knives, punches, collets, pipe cutters, drill bushings
AISI W2 water hardening tool steel.

BLUE LABEL.
M-343, 0.8-1.1 C, bal Fe
For general tools; "Heller Special Tool."

BLUE LABEL.
M-350; C, bal Fe.
For tools, drills, taps; water hardened.

BLUE LABEL.
M-694; 1.0 C, 0.3 Mn, 0.25 Si, bal Fe.
Type W1 water hardening tool steel.

BLUE LABEL EXTRA.
M-373; 0.6-1.4 C, 0.25 Si, 0.25 Mn, bal Fe.
For drills, taps, cutters, punches; Type W1; water hardened.

BLUE LABEL SF-2.
M-341; same as Blue Label but surface finished on two sides.

BLUE RIBAND VICTORY NO. 7.
M-713; 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe.
For cutters, tools; hig speed steel.

BLUE SEAL.
M-510, 0.9-1.0 C, bal Fe.
For tools, gauges, springs; water hardened

BLUE STREAK 18-4-1.
M-822, 0.72 C, 4 Cr, 18 W, 1 V, bal Fe.
For cutting tools; high speed steel.

BLUE STREAK COBALT.
M-822, 1.25 C, 4.0 Cr, 3.0 V, 9.0 W, 3.0 Mo, 9.0 Co, bal Fe
High speed steel, extra wear and red hardness properties, tungsten-cobalt type.

BLUE STREAK MOLY
M-822; 0.8 C, 4 Cr, 5.75 W, 4.5 Mo, 1.6 V, bal Fe
For cutting tools, high speed steel

BLUE TIP NAVAL BRASS
M-266, 60 Cu, 0.75 Sn, bal Zn
Hard: 68,000 TS, 45,000 YS, 35 El
Annealed: 63,000 TS, 40,000 YS, 40 El.
For bolts, nuts, marine hardware, valve stems, corrosion resistant.

BM
M-459, 1.1 C, 13 Mn, 0.25 Si, bal Fe
For welding electrode

B-METAL (BAHN-METALL).
M-315, M-316, M-402, 0.03-0.05 Li, 0.68-0.76 Ca, 0.62-0.72 Na, 0.02-0.04 K, 0.2 Al, bal Pb
For locomotive bearings and journal bearings in railroad cars, retains high hardness at high temperature.

B MONEL.
M-61, M-68, 67 Ni, 30 Cu
For stainless parts, corrosion resistant

"B M S"
M-344, 0.7 C, 5 Cr, 1.5 W, bal Fe
For tools, chisels, hard punches, shear blades, air hardening

BMS
M-459, 1.1 C, 1.1 Cr, 1.1 W, bal Fe
For metal saws, water hardened

BMSC
M-459, 1.15 C, 0.65 Cr, 0.1 V, bal Fe
For bearings, sleeves, liners, oil or water hardened

BMS EXTRA
M-459, C, W, bal Fe.
For metal saws, water hardened.

BMSW.
M-459; 1.15 C, W, Cr, bal Fe.
For cutters, bearings, water hardened

"BNC" STEEL.
English, C, Cr, Ni, bal Fe.
Hardened: 194,000 TS, 15 El, 50 RA; 400 Brin
For gears, pinions; case hardening.

BND
M-345, M-1177, 0.7 C, Cr, bal Fe.
For tools, gripper dies; tough

B.N.F. COPPER-NICKEL-IRON ALLOY.
M-396, 5-10 Ni, 1-2 Fe, 0.3-0.8 Mn, bal Cu
For marine parts and hardware, resists sea water corrosion.

B.N.F. LEAD ALLOY NO. 1.
M-396, 0.25 Cd, 0.5 Sb, bal Pb.
For lead sheathing of electric cables

B.N.F. LEAD ALLOY NO. 2.
M-296; 0.25 Cd, 1.5 Sn, bal Pb.
For water pipes, lead sheathing of electric cables; corrosion resistant.

B.N.F. LEAD ALLOY NO. 3
M-396; 0.15 Cd, 0.4 Sn, bal Pb.
For sheathing of ship cables.

BOBIERRE'S METAL.
France; 66-58 Cu, 34-42 Zn.
For bolts, nuts, sheathing, yellow brass.

BOCHLET FCHD
M-1435, 0.14 max C, 17-19 Mn, 10-13 Cr, 0.5-2.0 Si, 0.6 Ti, bal Fe
For turbine blades, jet engine components; austenitic, heat resistant

BOCHUM 85C7
M-1331; 0.85 C, 1.75 Cr, 0.35 Mn, bal Fe.
For bearings, liners, forming dies; water hardened, wear resistant

BOCHUM BC13V.
M-1331, 1.15 C, 0.65 Cr, 0.1 bal Fe
For blanking and forming dies, water hardened, wear resistant.

BOCHUM BCMH.
M-1331, 1.0 C, 1.0 Mn, 0.37 Si, bal Fe
Annealed: 100,000 TS, 53,000 YS, 21 El, 42 RA, 200 Brin
For drills, taps, reamers, cutters, Type W1; water hardened

BOCHUM BCMW.
M-1331, 0.9 C, 0.37 Si, 1.0 Mn, bal Fe
Heat treated 190,000 TS, 145,000 YS, 10 El; 30 RA, 400 Brin
For drills, taps, reamers, broaches, hobs, Type W1, water hardened

BOCHUM BCR
M-1331; 0.85 C, Cr, bal Fe
For bearings, liners, sleeves, water hardened, wear resistant

BOCHUM BCVH
M-1331, 0.90 C, Cr, V, bal Fe.
For bearings, liners, sleeves; water hardened, wear resistant

BOCHUM BCVW
M-1331, 0.80 C, Cr, V, bal Fe
For bearings, liners, sleeves, water hardened, wear resistant

BOCHUM BFK6.
M-1331, 0.60 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Heat treated 160,000 TS, 113,000 YS, 12 El; 40 RA, 325 Brin.
For gears, rails, punches, hammers, water hardened.

BOCHUM BFK7
M-1331; 0.75 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated 185,000 TS; 140,000 YS; 15 El, 40 RA; 400 Brin.
For springs, tools, punches, crimpers, water hardened

BOCHUM BFK8.
M-1331; 0.90 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated: 190,000 TS, 145,000 YS, 10 El, 30 RA; 400 Brin.
For springs, tools, cutters, drills; Type W1; water hardened.

BOCHUM BGK9.
M-1331; 0.85 C, 0.1-0.4 Si, 0.5-0.7 Mn, bal Fe.
For springs, tools, drills, taps, reamers; water hardened; Type W1.

BOCHUM BSW10
M-1331; 1.2 C, W, Cr, bal Fe.
For cutters, bearings, water hardened, wear resistant.

BOCHUM BSW18.
M-1331; 1.2 C, W, Cr, bal Fe.
For cutters, bearings, water hardened, wear resistant.

BOCHUM C58G.
M-1331, 0.25 C, 14.5 Cr, 0.1 max Ni, bal Fe.
For cutlery, valves, surgical and dental instruments, stainless, hardenable

BOCHUM C68G
M-1331, 0.25 C, 17 Cr, 1.8 max Ni, bal Fe.
Annealed 125,000 TS; 95,000 YS, 20 El; 55 RA; 260 Brin.
For pumps, marine hardware, cutlery; corrosion and heat resistant.

BOCHUM CSG.
M-1331; 0.60 C, Cr, V, bal Fe.
For springs, gears, crankshafts; oil hardened, shock resistant.

BOCHUM D7.
M-1331; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS, 128,000 YS; 12 El; 37 RA, 355 Brin.
For rails, axes, hammers, crimpers, water hardened; Type W1

BOCHUM D8.
M-1331, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 190,000 TS, 145,000 YS; 10 El, 30 RA; 400 Brin
For drills, taps, springs, reamers, Type W1; water hardened

BOCHUM D10.
M-1331, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 100,000 TS, 53,000 YS, 20 El; 42 RA; 200 Brin
For springs, cutters, hobs, drills, taps, Type W1, water hardened.

BOCHUM D11
M-1331, 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 110,000 TS, 56,000 YS, 18 El; 40 RA, 210 Brin.
For springs, cutters, taps, drills, hobs; Type W1; water hardened.

BOCHUM D13.
M-1331, 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe
For engravers' tools, blanking and forming dies; Type W1, water hardened.

BOCHUM EK10
M-1331, 0.10 C, 0.25 Si, 0.37 Mn, bal Fe.
Cold drawn: 72,000 TS; 60,000 YS; 22 El; 58 RA; 145 Brin.
For gears, shafts, fasteners; case hardening steel.

BOCHUM EK15.
M-1331; 0.15 C, 0.25 Si, 0.37 Mn, bal Fe.
Annealed: 70,000 TS; 40,000 YS, 25 El; 60 RA; 145 Brin.
For gears, shafts, fasteners; case hardening steel.

BOCHUMER BC1.
M-1343; 1.0 C, 1.55 Cr, bal Fe.
For bearings, sleeves, liners, blanking dies; water hardened, wear resistant.

BOCHUMER BC2.
M-1343; 0.90 C, 0.8 Cr, 0.30 Mn, bal Fe.
For springs, tools, punches, dies, hammers; Type W1; water hardened.

BOCHUMER BCE SPEZIAL.
M-1343; 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe.
For bearings, liners, sleeves; water hardened, abrasion resistant.

BOCHUMER BCL200.
M-1343; 2.1 C, 11.5 Cr, 0.3 Mn, bal Fe.
For blanking and forming dies, punches; oil or air hardened, nondeforming.

BOCHUMER BCOL155.
M-1343; 1.65 C, 11.5 Cr, 0.3 Mn, bal Fe
For blanking and forming dies, punches; air hardened, nondeforming

BOCHUMER BCOV40.
M-1343, 0.45 C, 1.4 Cr, 0.7 Mo, 0.3 V, 0.7 Mn, bal Fe.
For gears, bolts, fasteners, machine tool parts, oil hardened, tough.

BOCHUMER BCS120.
M-1343, 1.25 C, 1.15 Si, 1.2 Cr, 0.7 Mn, bal Fe.
For bearings, sleeves, liners; water or oil hardened, wear resistant.

BOCHUMER BC SPEZIAL.
M-1343; 1.45 C, 0.6 Mn, 1.4 Cr, bal Fe.
For bearings, liners, sleeves; water hardened, abrasion resistant.

BOCHUMER BCSV/G.
M-1343, 0.61 C, 1.18 Cr, 0.1 V, 0.7 Mn, bal Fe
For springs, gears, crankshafts, oil hardened, shock resistant.

BOCHUMER BCSV/K
M-1343, 0.61 C, 1.18 Cr, 0.1 V, 0.75 Mn, bal Fe
For springs, gears, crankshafts; oil hardened, shock resistant.

BOCHUMER BCV115.
M-1343; 1.15 C, 0.65 Cr, 0.1 V, 0.3 Mn, bal Fe.
For cutters, dies, forming dies, water hardened, wear resistant.

BOCHUMER BCVOW.
M-1343; 0.45 C, 0.45 Mo, 1.35 Cr, 0.8 V, 0.45 W, bal Fe
For cold work tools, upsetters, headers; oil hardened, tough.

BOCHUMER BCWL200.
M-1343, 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For blanking and forming dies, punches, oil hardened, nondeforming.

BOCHUMER BFS5½.
M-1343; 0.46 C, 1.7 Si, 0.65 Mn, bal Fe.
For springs, punches, crimpers; oil hardened, tough.

BOCHUMER BFS5½+.
M-1343; 0.51 C, 1.7 Si, 0.65 Mn, bal Fe.
For springs, punches, crimpers; oil hardened, tough.

BOCHUMER BFS6.
M-1343, 0.6 C, Si, Mn, bal Fe.
Heat treated: 160,000 TS; 115,000 YS; 12 El, 40 RA; 325 Brin.
For springs, punches, crimpers; oil hardened, tough.

BOCHUMER BMS1.
M-1343; 0.53 C, 0.9 Si, 0.9 Mn, bal Fe
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 320 Brin.
For gears, springs, shafts; water or oil hardened.

BOCHUMER BMV85.
M-1343; 0.9 C, 1.9 Mn, 0.1 V, bal Fe.
For punches, forming dies, crimpers, upsetters; oil hardened, shock resistant.

BOCHUMER BNCO/G.
M-1343; 0.35 C, 0.25 Mo, 1.35 Cr, 3.9 Ni, bal Fe.
For gears, bolts, crankshafts, studs; oil hardened, shock resistant

BOCHUMER BNCO/K.
M-1343, 0.19 C, 1.25 Cr, 0.2 Mo, 3.75 Ni, bal Fe.
For gears, bolts, cams, studs, camshafts; case hardening steel, shock resistant.

BOCHUMER BVA3.
M-1343; 0.2 C, 0.55 Mo, 1.0 Mn, 0.25 Si, bal Fe.
For gears, bolts, cams, studs, camshafts; case hardening steel, tough

BOCHUMER BVT40.
M-1343, 0.16 C, 1.05 Cr, 0.45 Mo, 0.65 Mn, bal Fe
For gears, pinions, machine tool parts; case hardening steel, tough

BOCHUMER BVT40N.
M-1343, 0.16 C, Cr, Mo, V, bal Fe
For gears, machine tool parts, case hardening steel, tough.

BOCHUMER BVT50
M-1343, 0.24 C, 1.25 Cr, 0.45 Mo, bal Fe.
For gears, pinions, bolts, fasteners, shafts, oil hardened, tough

BOCHUMER BVT50N
M-1343; 0.22 C, Cr, Mo, V, bal Fe
For bolts, cams, camshafts, fasteners, case hardening steel, tough

BOCHUMER BVT60
M-1343, 0.24 C, 1.35 Cr, 0.55 Mo, 0.2 V, bal Fe
For bolts, machine tool parts, shafts, studs, oil hardened, tough

BOCHUMER BVT60N
M-1343, 0.22 C, 1.15 Cr, 0.25 Mo, 0.2 V, bal Fe.
For bolts, machine tool parts, shafts, studs, oil hardened, tough

BOCHUMER BVT90
M-1343; 0.18 C, Cr, Mo, V, bal Fe
For gears, bolts, machine tool parts; case hardening steel, tough

BOCHUMER BVT125 EXTRA
M-1343, 1.3 C, 4.75 W, 0.20 max Cr, bal Fe
For cutters, form cutters, engravers tools, water hardened

BOCHUMER BVT130
M-1343, 0.20 C, 1.25 Cr, 0.22 Mo, 0.55 Mn, bal Fe
For gears, bolts, machine tool parts, case hardening steel, tough.

BOCHUMER BVT130V.
M-1343; 0.22 C, 12 Cr, 1 Mo, 0.4 Ni, 0.3 V, bal Fe.
Annealed. 95,000 TS, 40,000 YS, 25 El, 55 RA, B 92 Rock
Heat Treated 240,000 TS; 20,000 YS; 10 El, 25 RA, C 50 Rock.
For cutlery, surgical instruments, knives, shafts, gears, scissors.
Corrosion resistant, hardenable.

BOCHUMER BVT130VSo.
M-1343; 0.20 C, 12 Cr, 1 Mo, 0.3 V, 0.5 W, bal Fe.
Annealed: 95,000 TS; 40,000 YS, 25 El; 55 RA; B 92 Rock.
Heat Treated: 240,000 TS; 200,000 YS; 10 El; 25 RA; C 50 Rock.
For gears, shafts, cutlery, hardware, surgical instruments
Corrosion resistant, hardenable.

BOCHUMER BWC100.
M-1343; 1.0 C, 0.9 Mn, 1 Cr, 1.15 W, bal Fe.
For cutters, dies, shears, upsetters; oil hardened, tough.

BOCHUMER BWCO SUPRA.
M-1343; 0.65 C, 3.75 Cr, 0.85 Mo, 0.7 V, 8.5 W, bal Fe.
For lathe and planer tools, reamers, taps, drills; high speed steel.

BOCHUMER BWCV25 EXTRA.
M-1343; 0.30 C, Cr, V, W, bal Fe.
For upsetters, crimmers, header dies; oil hardened, tough.

BOCHUMER BWCV25 SPEZIAL.
M-1343; 0.30 C, 1.0 Si, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For upsetters, riveters, header dies; oil hardened, tough.

BOCHUMER BWCV25 SUPRA.
M-1343; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion press dies and rams, upsetters; hot work steel, oil hardened.

BOCHUMER BWCV30 SPEZIAL.
M-1343; 0.35 C, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For header dies, upsetters, crimpers; oil hardened, tough.

BOCHUMER BWCV40 SPEZIAL.
M-1343; 0.45 C, 1.05 Cr, 0.2 V, 1.85 W, bal Fe.
For header dies, upsetters, crimpers; oil hardened, tough.

BOCHUMER BWCV50 SPEZIAL.
M-1343, 0.55 C, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For header dies, upsetters, crimpers, oil hardened, tough.

BOCHUMER BWV115.
M-1343, 1.2 C, 0.2 Cr, 0.1 V, 1.0 W, bal Fe.
For cutters, bearings, crimpers; water hardened, wear resistant

BOCHUMER CBV.
M-1343, 0.15 C, 0.65 Cr, 0.50 Mn, 0.25 Si, bal Fe.
For gears, bolts, machine tool parts, case hardened.

BOCHUMER CBV1
M-1343, 0.33 C, 1.0 Cr, 0.65 Mn, bal Fe.
For gears, bolts, fasteners, oil hardened, tough.

BOCHUMER CBV2.
M-1343; 0.37 C, 0.65 Mn, 1.0 Cr, bal Fe.
For gears, bolts, fasteners, oil hardened, tough.

BOCHUMER CBV/H.
M-1343; 0.36 C, 0.65 Mn, 1.55 Cr, bal Fe.
For gears, bolts, fasteners, oil hardened, tough.

BOCHUMER CBVO/D.
M-1343; 0.30 C, 0.55 Mn, 1.5 Cr, 0.18 Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CBVO/G.
M-1343; 0.40 C, Cr, Mn, Mo, V, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CBVO/H.
M-1343; 0.50 C, 0.65 Mn, 1.0 Cr, 0.2 Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CBVO/M.
M-1343; 0.25 C, 0.65 Mn, 1.0 Cr, 0.2 Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CBVO/MD.
M-1343; 0.21 C, 0.65 Mn, 0.85 Cr, 0.25 Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CBVO/TM.
M-1343; 0.24 C, 0.55 Mn, 1.15 Cr, 0.25 Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CBVO/V.
M-1343; 0.30 C, 0.55 Mn, 2.5 Cr, 0.2 Mo, 0.15 V, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CBVO/W.
M-1343; 0.16 C, 0.65 Mn, 1.05 Cr, 0.20 Mo, bal Fe.
For gears, cams, camshafts; case hardened.

BOCHUMER CBVO/Z.
M-1343; 0.42 C, 0.65 Mn, 1.05 Cr, 0.20 Mo, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, tough.

BOCHUMER CBV/V.
M-1343; 0.22 C, Cr, V, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CBVZ.
M-1343; 0.41 C, 1.0 Cr, 0.65 Mn, 0.25 Si, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CMBV/H
M-1343; 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe.
For gears, cams, camshafts, fasteners; case hardened, tough.

BOCHUMER CMBV/W.
M-1343; 0.16 C, 1.15 Mn, 0.95 Cr, bal Fe.
For gears, cams, camshafts, fasteners; case hardened, tough

BOCHUMER CNBV1W.
M-1343, 0.15 C, 1.55 Cr, 1.55 Ni, bal Fe.
For gears, bolts, machine tool parts; case hardened, tough.

BOCHUMER CNBV2W.
M-1343; 0.18 C, 2 Cr, 2 Ni, 0.5 Mn, bal Fe
For gears, bolts, machine tool parts, case hardened, tough.

BOCHUMER CNBVO/M.
M-1343; 0.25 C, 0.50 Mn, 1.0 Cr, 0.18 Mo, 1.5 Ni, bal Fe
For gears, bolts, fasteners; oil hardened, shock resistant.

BOCHUMER CRVO.
M-1343, 0.33 C, 0.65 Mn, 1.0 Cr, 0.2 Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

BOCHUMER CRW.
M-1343; 0.85 C, 1.75 Cr, 0.35 Mn, bal Fe.
For bearings, bushings, liners, sleeves; water or oil hardened, wear resistant.

BOCHUMER CV23.
M-1343; 0.22 C, 0.65 Mn, 1.1 Cr, 0.2 V, bal Fe.
For gears, pinions, bolts, shafts, oil hardened, tough.

BOCHUMER CV40/H.
M-1343; 0.42 C, Cr, V, bal Fe.
For gears, bolts, springs, crankshafts; oil hardened, tough.

BOCHUMER CV48.
M-1343, 0.50 C, 1.0 Cr, 0.09 V, bal Fe.
For gears, bolts, springs, studs; oil hardened, shock resistant.

BOCHUMER CV58.
M-1343; 0.50 C, 0.85 Mn, 1.0 Cr, 0.1 V, bal Fe.
For gears, bolts, springs, crankshafts; oil hardened, shock resistant.

BOCHUMER EMC.
M-1331; 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe
For camshafts, cams, gears; case hardened.

BOCHUMER ES5.
M-1343, 0.85 C, 0.25 Si, 0.25 Mn, bal Fe.
Heat treated. 188,000 TS; 143,000 YS; 12 El; 35 RA; 390 Brin.
For springs, drills, taps, reamers; Type W1; water hardened.

BOCHUMER ES6.
M-1343; 0.70 C, 0.25 Si, 0.25 Mn, bal Fe.
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin.
For springs, rails, punches, hammers; Type W1; water hardened

BOCHUMER EVL.
M-1343; C, Cr, Ni, bal Fe
For machine tool parts; oil hardened, shock resistant.

BOCHUMER FCK.
M-1343, C, Cr, bal Fe.
For machine tool parts, oil hardened.

BOCHUMER F EXTRA.
M-1343, C, alloy, bal Fe.
For machine tool parts, oil hardened.

BOCHUMER FRS
M-1343; 0.67 C, 1.3 Si, 0.5 Cr, 0.5 Mn, bal Fe
For punches, crimpers, upsetters; oil or water hardened.

BOCHUMER GKS
M-1343; 0.15 C, Si, 1.1 Mn, bal Fe.
For machine tool parts, case hardened.

BOCHUMER HMFB EXTRA.
M-1343; 0.55 C, Ni, Cr, Mo, V, bal Fe
For forging dies, punches, upsetters, shears; oil hardened, shock resistant

BOCHUMER HMFB SPEZIAL.
M-1343, 0.55 C, 0.70 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For forging and header dies, punches, oil hardened, shock resistant

BOCHUMER HMS 35.
M-1343; 0.10 C, 0.25 Si, 0.37 Mn, bal Fe
Annealed 64,000 TS; 48,000 YS, 28 El, 65 RA, 135 Brin.
For plastic mold dies, rivets, screws, fan blades; case hardened

BOCHUMER HMS 40
M-1343, 0.15 C, 0.25 Si, 0.37 Mn, bal Fe.
Annealed 70,000 TS; 55,000 YS, 25 El, 60 RA, 145 Brin.
For screws, bolts, fan blades, bushings, gears, case hardened.

BOCHUMER HMS 45.
M-1343, 0.22 C, 0.25 Si, 0.45 Mn, bal Fe
Annealed 73,000 TS, 61,000 YS, 22 El, 58 RA; 150 Brin.
For gears, bolts, fan blades, camshafts, water hardened

BOCHUMER HMS 55
M-1343; 0.35 C, 0.25 Si, 0.55 Mn, bal Fe
Hot rolled· 85,000 TS; 54,000 YS; 30 El; 53 RA; 185 Brin.
For gears, shafts, axles, bolts, screws; water hardened.

BOCHUMER HMS 65.
M-1343; 0.45 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled: 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin.
For axles, gears, bolts, tie rods, bushings; water hardened

BOCHUMER HMS 80.
M-1343; 0.60 C, 0.25 Si, 0.65 Mn, bal Fe.
Heat treated: 160,000-115,000 TS; 113,000-77,000 YS; 12-23 El, 40-54 RA; 321-229 Brin.
For wheels, die blocks, girders, shafts, water hardened

BOCHUMER HMS 85.
M-1343, 0.60 C, 0.25 Si, 0.65 Mn, bal Fe.
Heat treated: 115,000-160,000 TS; 77,000-113,000 YS, 23-12 El; 54-40 RA; 229-331 Brin.
For wheels, die blocks, rails, girders; water hardened.

BOCHUMER HSS.
M-1343, C, alloy, bal Fe.
For machine tool parts, gears, oil hardened, tough.

BOCHUMER HSS EXTRA.
M-1343, C, alloy, bal Fe.
For machine tool parts, gears; oil hardened, tough.

BOCHUMER HSS SPEZIAL
M-1343, C, alloy, bal Fe
For machine tool parts, gears, oil hardened, tough.

BOCHUMER KMC 17E
M-1343, 0.20 C, 1.15 Cr, 1.25 Mn, bal Fe
For camshafts, cams, gears, case hardened.

BOCHUMER KSS/CV
M-1343, C, Cr, V, bal Fe
For saws, saw blades, oil hardened

BOCHUMER LFS
M-1343, C, Mn, Si, bal Fe
For springs, oil hardened.

BOCHUMER LKI S
M-1343; C, Si, Mn, bal Fe.
For machine tool parts

BOCHUMER LKRS
M-1343, C, Cr, bal Fe
For machine tool parts

BOCHUMER M14
M-1343, 0.17 C, 0.30 Si, 1.05 Mn, bal Fe
For gears, cams, camshafts, case hardened

BOCHUMER M17
M-1343, 0.19 C, 0.50 Si, 1.15 Mn, bal Fe
For gears, cams, camshafts, case hardened.

BOCHUMER MBV
M-1343, 0.4 C, 0.37 Si, 0.95 Mn, bal Fe
Hot rolled 90,000 TS, 58,000 YS, 17 El, 50 RA; 200 Brin
For gears, shafts, machine tool parts; water hardened.

BOCHUMER MBV/M.
M-1343; 0.30 C, 0.25 Si, 1.35 Mn, bal Fe
For gears, machine tool parts, shafts, water hardened

BOCHUMER MCV 24
M-1343; 0.27 C, Mn, Cr, V, bal Fe.
For gears, bolts, machine tool parts, oil hardened, shock resistant

BOCHUMER MINIMUM R.
M-1343, C, alloy, bal Fe.
For machine tool parts; oil hardened.

BOCHUMER MNFS.
M-1343; 0.46 C, Mn, Si, bal Fe.
Hot rolled: 98,000 TS; 60,000 YS; 24 El; 45 RA; 215 Brin.
For gears, shafts, machine tool parts; water hardened.

BOCHUMER MS.
M-1343; 0.55 C, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For header dies, upsetters, dies, crimpers; oil hardened, tough.

BOCHUMER MSBV.
M-1343; 0.37 C, 1.25 Si, 1.25 Mn, bal Fe.
For gears, shafts, fasteners; oil or water hardened.

BOCHUMER MSS.
M-1343; C, alloy, bal Fe.
For machine tool parts; oil hardened.

BOCHUMER MSS/CV.
M-1343; C, Cr, V, bal Fe
For saws, oil hardened.

BOCHUMER MSS EXTRA
M-1343, C, 2 W, bal Fe.
For saws, oil hardened.

BOCHUMER MSS SPEZIAL.
M-1343; C, 1 W, bal Fe.
For saws, oil hardened.

BOCHUMER MV38
M-1343; 0.42 C, 0.25 Si, 1.75 Mn, 0.1 V, bal Fe.
For gears, bolts, crankshafts, dies; oil hardened, tough

BOCHUMER NFS
M-1343; C, alloy, bal Fe.
For files, oil hardened.

BOCHUMER NZF S/H.
M-1343, 0.65 C, 1.7 Si, 0.70 Mn, bal Fe
For springs, upsetters, punches, oil hardened, tough

BOCHUMER NZF S/M
M-1343, 0.51 C, 1.7 Si, 0.65 Mn, bal Fe
For springs, upsetters, punches, oil hardened, tough

BOCHUMER NZF S/O
M-1343, 0.55 C, 1.7 Si, 0.70 Mn, bal Fe
For springs, punches, upsetters; oil hardened, tough

BOCHUMER NZF S/W
M-1343, 0.46 C, 1.7 Si, 0.65 Mn, bal Fe.
For springs, punches, rivet sets, oil hardened, tough.

BOCHUMER P400
M-1343, C, alloy, bal Fe
For machine tool parts, oil hardened.

BOCHUMER P600
M-1343, C, alloy, bal Fe
For machine tool parts; oil hardened

BOCHUMER PFS.
M-1343; C, alloy, bal Fe
For machine tool parts, oil hardened

BOCHUMER PFS/1
M-1343; C, alloy, bal Fe.
For machine tool parts, oil hardened.

BOCHUMER PKL/V-KPV
M-1343, 1.0 C, 0.25 Mn, 0.10 V, bal Fe
For header dies, forming rolls, Type W2, water hardened

BOCHUMER PNC45
M-1343; 0.45 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, bolts, crankshafts, forging dies, oil hardened, shock resistant.

BOCHUMER RKS.
M-1343; C, alloy, bay Fe.
For machine tool parts; oil hardened, tough.

BOCHUMER RKS SPEZIAL.
M-1343; C, alloy, bal Fe.
For machine tool parts; oil hardened, tough.

BOCHUMER SAFS.
M-1343; 0.70 C, 1.7 Si, 0.70 Mn, bal Fe.
Heat treated: 340,000 TS; 280,000 YS; 5 El; 20 RA; 600 Brin.
For springs; oil hardened, shock resistant.

BOCHUMER SC 60.
M-1343; 0.67 C, 1.3 Si, 0.5 Cr, 0.5 Mn, bal Fe.
Heat treated: 320,000 TS, 250,000 YS; 8 El; 25 RA; 550 Brin.
For springs; oil hardened, shock resistant.

BOCHUMER SFS60.
M-1343; 0.6 C, bal Fe.
Heat treated 160,000 TS; 113,000 YS; 12 El; 40 RA; 320 Brin.
For wheels, die blocks, rails, springs; water hardened.

BOCHUMER SFS65
M-1343, 0.69 C, bal Fe.
Heat treated. 175,000 TS; 128,000 YS; 12 El; 37 RA; 350 Brin.
For springs, clutch discs, girders, rails; water hardened

BOCHUMER SFS70.
M-1343; 0.72, bal Fe.
Heat treated 175,000 TS; 128,000 YS; 12 El, 37 RA, 350 Brin.
For springs, clutch discs, girders, rails; Type W1; water hardened

BOCHUMER SMFS/O
M-1343; 0.60 C, Si, Mn, bal Fe.
Heat treated: 160,000 TS, 113,000 YS, 12 El; 40 RA, 320 Brin.
For wheels, die blocks, rails, springs; water hardened.

BOCHUMER SPEZIAL REZISTANCE STAHL.
M-1343, 0.30 C, 1.0 Si, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For extrusion rams, dies; hot work steel, oil hardened

BOCHUMER SPEZIAL W.
M-1343, 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe
For extrusion rams, dies, hot work steel, oil hardened.

BOCHUMER SSCV
M-1343, C, V, bal Fe
For machine tool parts, water hardened

BOCHUMER SSS.
M-1343, C, bal Fe
For machine tool parts, water hardened

BOCHUMER SSS1.
M-1343, 0.70 C, 1.7 Si, 0.70 Mn, bal Fe
For springs, punches, upsetters, chisels, oil hardened, shock resistant.

BOCHUMER SSS1 EXTRA
M-1343, C, W, V, bal Fe.
For heading dies, cutters, liners, oil or water hardened

BOCHUMER SSSK.
M-1343, 0.50 C, 1.0 Cr, 0.09 V, 0.85 Mn, bal Fe
For springs, gears, fasteners, crankshafts; oil hardened, shock resistant.

BOCHUMER TSE.
M-1343; C, Cr, Mn, bal Fe.
For machine tool parts; water hardened.

BOCHUMER TSV.
M-1343; C, bal Fe.
For machine tool parts; water hardened.

BOCHUMER UFS.
M-1343; C, bal Fe.
For machine tool parts; water hardened.

BOCHUMER UGS.
M-1343; C, bal Fe.
For machine tool parts; water hardened.

BOCHUMER UMS45.
M-1343; 0.22 C, 0.45 Mn, 0.25 Si, bal Fe.
Annealed: 73,000 TS; 41,000 YS; 22 El; 58 RA; 140 Brin.
For screws, bolts, gears, shafts, rivets; case hardened.

BOCHUMER WFS SPEZIAL.
M-1343; 0.50 C, Cr, Mo, V, bal Fe.
For header and forming dies, punches; oil hardened, tough.

BOCHUMER WFS SUPRA.
M-1343; 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For extrusion dies, rams, liners, punches; oil hardened, tough.

BOCHUMER WK45.
M-1343; 0.45 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Hot rolled: 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin.
For axles, gears, bolts, fasteners, crankshafts; water hardened.

BOCHUMER WK60.
M-1343; 0.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 320 Brin.
For wheels, die blocks, springs, girders, rails; water hardened.

BOCHUMER ZFS.
M-1343; 0.70 C, 1.7 Si, 0.70 Mn, bal Fe.
For springs, punches, upsetters; oil hardened, shock resistant.

BOCHUMER ZMCV.
M-1343; 1.4 C, 0.30 Mn, 0.30 Cr, 0.1 V, bal Fe.
For engravers tools, cutters, bearings; water hardened, wear resistant.

BOCHUM EU.
M-1331; 0.15 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin.
For machine tool parts, gears, fasteners, case hardened.

BOCHUM K55 SPEZIAL.
M-1331; 0.55 C, 0.1-0.4 Si, 0.5-0.7 Mn, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 15 El; 20 RA; 180 Brin.
For axles, gears, bolts, shafts; water hardened.

BOCHUM K65.
M-1331; 0.60 C, 0.10-0.40 Si, 0.50-0.70 Mn, bal Fe.
Heat treated: 160,000-115,000 TS; 113,000-77,000 YS; 12-23 El; 40-54; 320-230 Brin.
For wheels, die blocks, girders, clutch discs; water hardened.

BOCHUM KPN.
M-1331; 0.50 C, 1.05 Cr, 3.25 Ni, 0.5 Mn, bal Fe.
For gears, bolts, crankshafts, axles, oil hardened, shock resistant.

BOCHUM M80.
M-1331; 0.16 C, 0.95 Cr, 1.15 Mn, 0.25 Si, bal Fe.
For gears, bolts, camshafts, cams; case hardened, tough.

BOCHUM M90.
M-1331; 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe.
For gears, bolts, camshafts, cams; case hardened, tough.

BOCHUM M100.
M-1331; 0.22 C, 1.25 Cr, 1.30 Mn, bal Fe.
For gears, bolts, camshafts, cams; water or oil hardened.

BOCHUM MMB3.
M-1331; C, alloy, bal Fe.
For machine tool parts; oil hardened.

BOCHUM MN18G.
M-1331; 1.3 C, Mn, Cr, bal Fe.
For cutters, wear plates; oil or water hardened.

BOCHUM MNH(G).
M-1331, 1.2 C, 12.5 Mn, 0.4 Si, bal Fe.
For tracks, frogs, dipper teeth shovels; wear and abrasion resistant.

BOCHUM MNHW.
M-1331; 1.2 C, 0.4 Si, 12.5 Mn, bal Fe.
For wear plates, dipper teeth, shovels; wear and abrasion resistant.

BOCHUM PKS10H.
M-1307; 1 1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 200,000 TS, 130,000 YS; 8 El; 25 RA; 400 Brin.
For springs, taps, drills, reamers, cutters, hobs; Type W1, water hardened.

BOCHUM PKS EXTRA
M-1307; 1 0 C, 0.1 V, 0 25 Mn, bal Fe.
Heat treated: 200,000 TS; 130,000 YS; 8 El; 25 RA; 400 Brin.
For reamers, drills, drawing and stamping dies; oil or water hardened, wear resistant.

BOCHUM PKS EXTRA SPEZIAL.
M-1331; 1.0 C, Cr, V, bal Fe.
Heat treated: 200,000 TS, 130,000 YS; 8 El; 25 RA; 400 Brin.
For reamers, drills, drawing dies; oil or water hardened.

BOCHUM QKS10W.
M-1307, 1 0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 200,000 TS, 130,000 YS; 8 El, 25 RA; 400 Brin
For springs, taps, drills, reamers, cutters, hobs; Type W1; water hardened.

BOCHUM RR8.17.
M-1331, 0 08 C, 17 Cr, 0 4 Si, bal Fe.
Annealed 80,000 TS; 50,000 YS, 25 El; 50 RA, 150 Brin.
For oil refinery equipment, sinks, soot blowers; Type 430; stainless.

BOCHUM RR8 17E
M-1331; 0 1 max C, 17.5 Cr, Ti = 7 × C, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For welded oil refinery equipment; Type 430 Ti; stainless

BOCHUM RR10.13
M-1331; 0.12 max C, 0 4 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El, 70 RA; 155 Brin.
For turbine blades, cutlery, valves, surgical instruments; Type 410; stainless.

BOCHUM RR10.13Mo.
M-1331; 0 12 max C, 13 Cr, 0.2 Mo, bal Fe.
Annealed: 75,000 TS, 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, cutlery, valves, surgical instruments; Type 410; stainless.

BOCHUM RR10.13T.
M-1331; 0.12 max C, 13 Cr, 0.4 Si, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, cutlery, valves, knives; Type 410; stainless.

BOCHUM RR10.17MoS.
M-1331; 0.12 C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 20 El; 45 RA; 150 Brin.
For screw machine products; Type 430F; stainless, free-cutting.

BOCHUM RR10.17S.
M-1331, 0.10 C, 20 Ni, 25 Cr, Mo, Si, Cu, bal Fe.
For chemical plant equipment, tanks; stainless, austenitic.

BOCHUM RR15.13
M-1331; 0.15 max C, 0.4 Si, 13 Cr, bal Fe
Annealed: 75,000 TS, 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, cutlery, valves, surgical instruments; Type 410; stainless.

BOCHUM RR20.13.
M-1331; 0.20 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For turbine blades, cutlery, valves, Type 420; stainless.

BOCHUM RR20.13Mo.
M-1331; 0.20 C, 13 Cr, 1.15 Mo, bal Fe.
Annealed 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For turbine blades, valves, cutlery; Type 420 Mo; stainless.

BOCHUM RR20.13Ni.
M-1331; 0.20 C, 13 Cr, Ni, bal Fe.
For valves, cutlery, surgical and dental instruments; corrosion resistant.

BOCHUM RR22.17Ni.
M-1331, 0.22 C, 17 Cr, 1.5 Ni, 0.4 Si, bal Fe
Annealed 125,000 TS; 95,000 YS; 20 El, 55 RA, 260 Brin
For pumps, marine hardware, valves; Type 431, heat and corrosion resistant.

BOCHUM RR35.17Mo
M-1331; 0.35 C, 16.5 Cr, 1.15 Mo, bal Fe
For chemical plant equipment; corrosion resistant.

BOCHUM RR40.13.
M-1331, 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 100,000 TS, 55,000 YS; 20 El; 50 RA; 200 Brin.
For valves, cutlery, pump parts, Type 420; stainless.

BOCHUM RR45.13Mo.
M-1331; C, alloy, bal Fe.
For machine tool parts; oil hardened, tough.

BOCHUM RR90.17MoV.
M-1331; 0.90 C, 18 Cr, 1.15 Mo, 1.0 V, bal Fe.
For bearings, cutlery, valves; oil hardened, wear and corrosion resistant.

BOCHUM U35.
M-1331; 0.35 C, 0.40 Si, 0.60 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 53 RA; 185 Brin.
For gears, bolts, axles, shafts, fasteners; water hardened.

BOCHUM U45.
M-1331; 0.45 C, 0.40 Si, 0.60 Mn, bal Fe.
Hot rolled: 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin.
For axles, gears, bolts, crankshafts; water hardened.

BOCHUM U60.
M-1331; 0.60 C, 0.40 Si, 0.60 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 320 Brin.
For wheels, die blocks, girders, springs, rails; water hardened.

BOCHUM U75.
M-1331; 0.75 C, 0.40 Si, 0.60 Mn, bal Fe.
Heat treated: 180,000 TS; 135,000 YS, 12 El; 36 RA; 375 Brin.
For springs, tools, hammers, rails, girders; Type W1; water hardened.

BOCHUM U90.
M-1331; 0.90 C, 0.40 Si, 0.60 Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, taps, reamers, drills; Type W1; water hardened.

BOCHUM VK22.
M-1331; 0.22 C, 0.25 Si, 0.45 Mn, bal Fe.
Annealed: 78,000 TS; 40,000 YS; 22 El; 58 RA; 140 Brin.
For screws, bolts, gears; water hardened.

BOCHUM VK35.
M-1331; 0.35 C, 0.25 Si, 0.45 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS, 30 El; 53 RA; 185 Brin.
For gears, shafts, axles, bolts, water hardened.

BOCHUM VK45
M-1331; 0.45 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled: 98,000 TS; 58,000 YS; 24 El; 45 RA; 212 Brin
For gears, bolts, axles, shafts, crankpins, water hardened.

BOCHUM VK53.
M-1331, 0.53 C, 0.25 Si, 0.65 Mn, bal Fe.
Annealed: 96,000 TS; 52,000 YS; 16 El; 23 RA; 170 Brin.
For gears, axles, bolts, shafts; water hardened.

BOCHUM VK60.
M-1331, 0.61 C, 0.25 Si, 0.65 Mn, bal Fe.
Heat treated. 160,000 TS; 115,000 YS; 12 El; 40 RA; 325 Brin.
For wheels, die blocks, rails, girders; water hardened.

BOCHUM W3G.
M-1331, 0.90 C, Cr, bal Fe.
For bearings, liners, cutters; oil or water hardened, wear resistant.

BODVAR 1.
M-111; 1.0 C, 3.6 Cr, 0.5 W, 2 Co, bal Fe
For permanent magnets

BODVAR 2.
M-111; 0.95 C, 5.5 Cr, 0.5 W, 3.25 Co, bal Fe.
For permanent magnets

BODYRITE SOLDER.
M-815; Pb, bal Sn.
For solder; for auto bodies.

BOFORS 2R27.
M-1184; 0.10 max C, 13.5 Cr, 0.3 max Ni, bal Fe.
Annealed: 71,100 TS, 42,700 YS; 160 Brin.
For corrosion resistant parts; ferritic, corrosion resistant.

BOFORS 2R29.
M-1184, 0.09 C, 17 Cr, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 60 Brin.
For household articles, meat hooks, furnace grates, furnace parts.
Type 430 stainless, non-hardenable.

BOFORS 2R37.
M-1184; 0.3 C, 13 Cr, bal Fe.
Annealed: 75,000 TS; 48,000 YS; 26 El; 150 Brin.
Hardened: 250,000 TS; 215,000 YS; 8 El; C 52 Rock.
For chemical and oil refinery equipment, surgical instruments, marine hardware
Corrosion resistant steel, Type 420, stainless, hardenable.

BOFORS 2 R 47.
M-1184; 0.20 C, 13 Cr, 0.3 max Ni, bal Fe.
Hardened: 106,700 TS; 92,500 YS, 240 Brin.
For corrosion resistant parts; hardenable martensitic.

BOFORS 2R57.
M-1184; 0.30 C, 13 Cr, 0.4 Ni, bal Fe.
Annealed: 78,000 TS; 50,000 YS, 25 El; 155 Brin.
Hardened: 145,000 TS; 117,000 YS; 25 El; 280 Brin.
For chemical and oil refinery equipment, surgical instruments, gears, shafts.
Corrosion and heat resistant. Martensitic.

BOFORS 2R 77.
M-1184; 0.35 C, 13.5 Cr, 0.3 max Ni, bal Fe.
Hardened: 135,000 TS, 107,000 YS; 300 Brin.
For corrosion resistant parts; hardenable, martensitic.

BOFORS 2R107.
M-1184; 0.55 C, 14 Cr, bal Fe.
Annealed: 110,000 TS; 72,000 YS; 20 El; 240 Brin.
Hardened: 156,000 TS; 128,000 YS; 10 El; 325 Brin.
For edge tools, instruments, springs, intake valves, cutlery, surgical instruments.
AISI Type 420, hardenable, corrosion resistant.

BOFORS 2RA27.
M-1184; 0.06 C, 11.5-14.5 Cr, 0.1-0.3 Al, bal Fe.
Annealed: 70,000 TS; 35,000 YS; 30 El; 60 RA; 160 Brin.
Cold Drawn: 85,000 TS; 70,000 YS; 20 El; 60 RA; 185 Brin.
For heat treating equipment, oil refinery equipment.
Type 405 corrosion resistant steel.

BOFORS 2RL2.
M-1184; 0.10 C, 13 Cr, 0.2 S, bal Fe.
Annealed: 72,000 TS; 35,000 YS; 30 El; 155 Brin.
Hardened: 100,000 TS; 78,000 YS; 25 El, 210 Brin.
For screw, bolts, fasteners, shafts, screw machine products.
Type 416 stainless, free-cutting.

BOFORS 2RM2.
M-1184; 0.08 C, 13 Cr, 6 Ni, bal Fe
Heat Treated Casting: 106,000-142,000 TS; 74,000 min YS; 10 min El; 230-290 Brin.
For water turbine castings, turbine blades and wheels, ship propellers, feed screws for the cellulose industry. Hardenable, stainless cast alloy.

BOFORS 2RO26.
M-1184; 0.10 C, 12 Cr, 0.5 Ni, 0.5 Mo, bal Fe.
Annealed: 78,000 TS; 50,000 YS; 27 El; 165 Brin.
Hardened: 107,000 TS; 85,000 YS; 22 El; 220 Brin.
For tableware, knives, turbine parts, machinery components.
Resistant to stress corrosion cracking. Martensitic, hardenable.

BOFORS 2RO27.
M-1184; 0.10 C, 13.5 Cr, 1.2 Mo, bal Fe.
Annealed: 78,000 TS; 50,000 YS; 25 El; 155 Brin.
Hardened: 135,000 TS; 107,000 YS; 25 El; 280 Brin.
For chemical and oil refinery equipment.
Martensitic, corrosion and heat resistant.

BOFORS 2RO46.
M-1184; 0.20 C, 12 Cr, 1.2 Mo, bal Fe
Hardened: 142,000 TS; 121,000 YS; 17 El; 300 Brin.
For steam turbine blading, compressor parts, gas turbine components, propeller shafts.
Corrosion and creep resistant, hardenable.

BOFORS 2 RO-189.
M-1184; 0.85 C, 17 Cr, 0.3 max Ni, 0.6 Mo, bal Fe.
Hardened: 590 Brin.
For corrosion resistant edge tools; martensitic, corrosion resistant, hardenable.

BOFORS A286.
M-1184; 0.06 C, 15 Cr, 25 Ni, 1.3 Mo, 0.3 V, 2.0 Ti, bal Fe
Rolled: 150,000 TS; 105,000 YS; 22 El; 290 Brin.
For gas turbine components, jet engine parts, afterburners.
High heat and creep resistant, austenitic.

BOFORS ARO-75.
M-1184; 0.3 C, 1.0 Cr, 0.25 Mo, 1.1 Al, bal Fe.
Heat treated 121,000 TS; 99,200 YS, 245-290 Brin.
For fuel pump pistons, valve parts; nitriding steel.

BOFORS B4.
M-1184; 0.25 C, bal Fe.
For machine parts; construction steel.

BOFORS B4V.
M-1184; 0.15 C, 0.65 Mn, bal Fe
Heat treated: 71,000-142,000 TS, 36.000-42,000 YS; 150-300 Brin.
For gears, shafts, case hardening

BOFORS B7
M-1184; 0.35 C, bal Fe.
For machinery parts, construction steel

BOFORS B10.
M-1184, 0.45 C, bal Fe
For machine parts, gears, construction steel.

BOFORS B12.
M-1184, 0.6 C, bal Fe
For machinery parts, construction steel

BOFORS B14.
M-1184, 0.70 C, 0.2 Si, 0.6 Mn, bal Fe.
Stress Relieved: 107,000-121,000 TS; 57,000 YS; 13 El; 220-250 Brin.
Heat Treated 175,000 TS; 130,000 YS, 12 El; 350 Brin
For machinery components, gears, shafts, control rods, axes, hammers, springs.
AISI 1070 steel
Wear resistant, water hardening

BOFORS B15T.
M-1184; 0.75 C, 0.2 Si, 0.6 Mn, bal Fe
Stress Relieved: 110,000 TS, 60,000 YS, 12 El, 240 Brin.
Heat Treated. 180,000 TS, 135,000 YS; 10 El; 370 Brin
For rock drills, chisels, reamers, shafts, axes, hammers, springs, hand tools, pliers
Water hardening, AISI 1075 steel. Wear resistant.

BOFORS B15 V.
M-1184; 0.75 C, bal Fe.
For tools, fixtures; water hardening.

BOFORS B20V.
M-1184: 1.0 C, 0.20 Si, 0.30 Mn, bal Fe.
For tools, drills, reamers; water hardened; Type W1

BOFORS B24V.
M-1184; 1.2 C, 0.2 Si, 0.3 Mn, bal Fe,
For reamers, drills, taps, hobs, cutters; water hardened; Type W1.

BOFORS B28V.
M-1184; 1.4 C, bal Fe.
For knives, trimming tools; water hardening.

BOFORS CR83.
M-1184; 0.4 C, 0.8 Cr, 1.25 Ni, bal Fe.
114,500 TS; 85,100 YS; 240 Brin.
For machine parts, shafts, crankshafts; water or oil hardened.

BOFORS CRO861.
M-1184; 0.35 C, 0.7 Mn, 1.4 Cr, 1.4 Ni, 0.2 Mo, bal Fe.
Hardened: 156,000-178,000 TS; 128,000 YS; 12 El; 45 RA; 330-370 Brin.
For shafts, gears, connecting rods, bolts, crankshafts.
AISI 4337, oil hardening, tough, shock resistant.

BOFORS DR34.
M-1184; 0.15 C, 0.7 Mn, 0.8 Cr, 1.5 Ni, bal Fe.
Hardened: 100,000-206,000 TS; 57,000-100,000 YS; 10-14 El; 210-430 Brin.
For gears, bolts, camshafts, shafting worms, chains.
Case hardening, tough.

BOFORS DR44
M-1184; 0.20 C, 0.7 Mn, 0.8 Cr, 1.5 Ni, bal Fe.
Hardened: 114,000-228,000 TS; 71,000-114,000 YS; 10-12 El, 240-480 Brin.
For gears, bolts, camshafts, worms.
Case hardening, tough

BOFORS DRO-1133.
M-64; 0.55 C, 0.6 Cr, 1.6 Ni, 0.3 Mo, bal Fe.
For drop forging dies; oil hardened.

BOFORS DRS16
M-1184; 0.80 C, 21 Cr, 1.5 Ni, 2 Si, bal Fe.
Hardened: 137,000 TS; 111,000 YS, 15 El; 290 Brin.
For outlet valves for internal combustion engines
Martensitic, heat and corrosion resistant.
Resists leaded fuels.

BOFORS FR-86
M-1184, 0.35 C, 1.2 Cr, 2.6 Ni, bal Fe
Rolled 128,000 TS; 107,000 YS; 270-300 Brin.
For crankshafts, shafts, oil hardened.

BOFORS HR-19.
M 1184, 0.55 C, 1.5 Cr, 3 Ni, bal Fe
For cold and hot work dies, bakelite dies; oil hardening

BOFORS HR33.
M-1184; 0.15 C, 0.75 Cr, 3.0 Ni, bal Fe
Heat treated: 99,500-185,000 TS, 71,100-113,800 YS; 210-390 Brin.
For gears, shafts, case hardened

BOFORS HR44
M-1184, 0.20 C, 3.0 Ni, 0.7 Cr, bal Fe
Heat treated 142,200-213,000 TS; 92,500-142,200 YS, 300-430 Brin
For gears, cams, shafts, case hardened

BOFORS HRD-1243
M-1184, 0.55 C, 1 Cr, 3 Ni, 0.3 Mo, bal Fe.
For cold and hot work dies, forging dies; oil hardening

BOFORS HRP 1152
M-1184; 0.50 C, 0.85 Mn, 1.05 Cr, 0.15 V, bal Fe
Annealed: 105,000 TS; 75,000 YP, 27 El; C 16 Rock.
Hardened 300,000 TS, 263,000 YP, 4 El; 570 Brin
For gears, springs, shafts, machinery parts, axles, clutches, small tools.
Oil hardened, shock resistant.

BOFORS IR 34.
M-1184; 0.13 C, 0.4 Mn, 0.7 Cr, 3.5 Ni, bal Fe.
Hardened: 120,000-192,000 TS, 78,000-114,000 YS, 10-12 El; 250-400 Brin.
For gears, worms, camshafts, bolts, fasteners.
AISI 3310 steel, case hardening, tough and shock resistant

BOFORS IR74.
M-1184; 0.30 C, 0.60 Mn, 0.75 Cr, 3.5 Ni, bal Fe.
For gears, pinions, shafts; oil hardening, tough.

BOFORS KR35.
M-1184; 0.12 C, 1.25 Cr, 4.5 Ni, bal Fe.
For camshafts, crankshafts, gears; case hardening, tough.

BOFORS KR75.
M-1184; 0.3 C, 1.3 Cr, 4.3 Ni, bal Fe.
Heat treated: 156,500 TS; 128,000 YS; 330-370 Brin.
For shafts, gears, wear parts; air hardening.

BOFORS N82.
M-1184; 0.4 C, 1.25 Mn, bal Fe.
99,500 TS; 71,000 YS; 240 Brin.
For machinery parts; water or oil hardened.

BOFORS N 91.
M-1184; 0.45 C, 0.8 Mn, bal Fe.
Normalized: 85,000-107,000 TS; 46,000 YS; 18 El; 180-230 Brin.
For induction and flame hardened machinery components, gears, pinions, shafting.
AISI 1045 steel. Water hardening.

BOFORS NON-SHRINKING STEEL RT-1733.
M-267; 0.85-0.95 C, 1.0-1.25 Mn, 0.5-0.6 Cr, 0.5-0.6 W, bal Fe.
For blanking dies, broaches, cutters, tools, drills, plugs, gages; non-shrinking tool steel.

BOFORS P02
M-1184; 85 C, 4.3 Cr, 6.4 W, 5 Mo, 2 V, bal Fe.
For cutters, twist drills, high speed steel.

BOFORS P03.
M-1184, 0.85 C, 7 W, 4 Cr, 3-5 Mo, 2 V, bal Fe.
Heat treated. C 64-67 Rock.
For lathe and planer tools, milling cutters, drills, broaches, reamers
High speed steel High red hardness, wear and abrasion resistant.

BOFORS P10.
M-1184, 0.75 C, 4 Cr, 18 W, 1.2 V, bal Fe.
For dies, shears, cutters, high speed steel.

BOFORS P15
M-1184, 0.8 C, 18 W, 4 Cr, 1.5 V, 2 Co, 1 Mo, bal Fe.
For cutting tools, high speed steel.

BOFORS P 121.
M-1184; 0.60-1.05 C, 0.10 V, bal Fe.
Annealed: 120,000 TS, 70,000 YS; 15 El, 220 Brin.
Hardened: 185,000 TS, 135,000 YS; 13 El; 400 Brin
For axes, cutting tools, drills, springs, punches.
Water hardening, wear resistant. Type W2

BOFORS P171
M-1184, 0.8 C, 0.1 V, bal Fe.
For pneumatic tools; water hardened.

BOFORS P181.
M-1184, 0.9 C, 0.1 V, bal Fe.
For tools, dies, punches, water hardening.

BOFORS P211.
M 1184, 1 C, 0.1 V, bal Fe
For cold working dies, pneumatic pistons, water hardening.

BOFORS Q5.
M-1184; 0.8 C, 4 Cr, 18 W, 1.7 V, 5.5 Co, 1 Mo, bal Fe
For cutters, taps, hobs, reamers; high speed steel.

BOFORS Q10.
M-1184; 0.8 C, 4 Cr, 18 W, 1.7 V, 10.5 Co, 1 Mo, bal Fe.
For cutters, millers, tool bits, hobs, high speed steel

BOFORS QRO45.
M-1184; 0.30 C, 2.8 Cr, 2.8 Mo, 0.5 V, 2.8 Co, bal Fe.
Hardened: C 45-55 Rock.
For die casting and forging dies, extrusion dies, mandrels, punches.
Oil or air hardening.
Hot work steel. Develops high red hardness and toughness to 1300°F.

BOFORS QX2.
M-1184; 1.0 C, 7 W, 4 Cr, 3-5 Mo, 2 V, 9.5 Co, bal Fe.
Hardened: C 64-67 Rock.
For lathe and planer tools, milling cutters, drills, broaches, reamers, shears.
High speed steel. High red-hardness.
Wear and abrasion resistant.

BOFORS R10-214
M-1184; 0.10 max C, 27 Cr, 5 Ni, 1.5 Mo, bal Fe.
Rolled: 85,330 TS, 64,000 YS; 210 Brin.
For sulphite-cellulose industries; high corrosion resistant.

BOFORS R10214.
M-1184; 0.20 C, 23-28 Cr, 2.5-5.0 Ni, 1-2 Mo, bal Fe.
Normalized: 103,000 TS; 78,000 YS; 18 El; 45 RA; 235 Brin.
Annealed: 95,000 TS, 41,000 YS; 29 El, 60 RA; 225 Brin.
For valves, pumps, furnace parts; Type 327; heat resistant.

BOFORS R309.
M-1184; 1.5 C, 2 Cr, bal Fe.
For files, trimmer tools; oil hardened.

BOFORS RCK3.
M-1184; 0 15 C, 25 Cr, 13 Ni, 0.2 N, bal Fe.
Annealed: 94,000 TS; 50,000 YS; 54 El; 170 Brin
For feeding plates in clinker coolers in cement industry.
Austenitic, stainless, high oxidation resistance.
Type 309S.

BOFORS RCK4.
M-1184; 0.20 C, 21 Cr, 12 Ni, 0.2 N, bal Fe.
Annealed: 117,000 TS; 67,000 YS, 41 El, 240 Brin
For outlet valve heads in internal combustion engines.
Austenitic, corrosion resistant, oxidation resistant.

BOFORS RCT.
M-1114; 0.40 C, 12 Ni, 14.5 Cr, 2 3 Si, bal Fe.
Hardened: 106,700 TS, 64,000 YS; 240 Brin
For engine valves; heat resistant.

BOFORS RCT3.
M-1184; 0.20 C, 21 Cr, 13 Ni, 1.2 Si, 3.0 W, bal Fe.
Annealed: 104,000 TS; 47,000 YS; 27 El; 220 Brin.
For stator blades, turbolators, rings in jet engines, gas and steam turbines, diesel engine valves.
Austenitic, high heat resistant.

BOFORS RD-653.
M-1184; 0.25 C, 1.1 Cr, 0.2 Mo, bal Fe.
Rolled: 128,000 TS; 99,500 YS; 270-310 Brin.
For shafts, cams, gears; oil hardened.

BOFORS RE39.
M-1184; 0.20 C, 17.5 Cr, 2.1 Ni, bal Fe.
Heat treated: 121,000-135,000 TS; 92,500-112,000 YS; 20-15 El; 60-45 RA; 260-288 Brin.
For pumps, spindles, propeller shafts; Type 431; corrosion resistant.

BOFORS REB-210.
M-1184; 0.15 C, 22.5 Cr, 24 Ni, bal Fe.
71,000 TS; 28,500 YS; 180 Brin.
For heat resistant parts; resists S and SO_2.

BOFORS RES210.
M-1184; 0.2 C, 22-24 Cr, 12-15 Ni, 2 max Mn, 1 max Si, bal Fe
Annealed: 85,000-95,000 TS; 40,000-50,000 YS; 45-55 El; 150-185 Brin.
For heat treating boxes, furnace parts, chemical plant equipment; Type 309; austenitic, heat resistant.

BOFORS RIM21.
M-1184; 0.08 C, 18 Cr, 11 Ni, 1.5 Mo, bal Fe.
Annealed: 85,000 TS; 36,000 YS; 60 El; 160 Brin
For acid resisting shafts, bolts, chemical plant equipment.
Austenitic, stainless, non-hardening.

BOFORS RIM-29.
M-1184; 0.08 max C, 18 Cr, 18 Ni, bal Fe.
Annealed· 82,500 TS; 28,500 YS; 60 El; 70 RA; 165 Brin
Cold drawn. 125,000 TS; 95,000 YS, 25 El; 55 RA; 277 Brin
For chemical and oil refinery equipment, tanks, vessels. Type 302; stainless, austenitic.

BOFORS RIM-92.
M-1184; 0.08 max C, 18-20 Cr, 8-11 Ni, 2 max Mn, bal Fe
Annealed· 90,000 TS, 45,000 YS, 60 El, 135 Brin.
Cold drawn 180,000 TS, 150,000 YS, 10 El, 330 Brin.
For chemical plant equipment, welded structures; Type 304; stainless, austenitic

BOFORS RIM 200
M-1184, 0 04 C, 18 Cr, 9 Ni, bal Fe
Annealed 85,000 TS, 35,000 YS, 55 El, Rock B 80
For architectural trim, kitchen equipment, chemical and textile plant equipment.
Type 304 stainless, austenitic

BOFORS RIM-210
M-1184, 0 07 max C, 19 Cr, 10 Ni, 1 5 Mo, bal Fe.
Annealed. 78,400 TS, 28,500 YS, 165 Brin.
For sulfite, cellulose industries, high corrosion resistance

BOFORS RIM 213
M-1184, 0 07 C, 18 Cr, 11 Ni, 2.3 Mo, 0 4 Ti, bal Fe
Annealed 85,000 TS; 38,000 YS, 50 El; 165 Brin.
For chemical plant equipment and structural parts operating at 900-1150°F
Stabilized, austenitic, stainless, weldable grade.

BOFORS RIM-215
M-1184; 0 08 max C, 18 Cr, 11 Ni, 2.7 Mo, bal Fe.
Annealed· 82,500 TS; 165 Brin.
For chemical industries; corrosion resistant, austenitic.

BOFORS RIM 290.
M-1184, 0 03 max C, 18 Cr, 10 Ni, bal Fe.
Annealed· 76,000 TS; 32,000 YS, 60 El, 140 Brin
For welded structures, chemical and textile plant equipment, food and drug equipment.
Type 304L stainless, austenitic steel.

BOFORS RIM-291.
M-1184, 0.08 max C, 18-20 Cr, 8-11 Ni, 2 max Mn, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 60 El; 135 Brin.
Cold drawn: 180,000 TS, 150,000 YS; 10 El; 330 Brin.

For chemical plant equipment, welded structures; Type 304; stainless, austenitic.

BOFORS RIM-294.
M-1184; 0.08 max C, 18 Cr, 10 Ni, 0.8 Mn, 0.5 Ti, bal Fe.
Annealed: 82,500 TS; 28,500 YS; 165 Brin.
For chemical industries; heat and corrosion resistant.

BOFORS RIM295.
M-1184; 0.08 max C, 17-19 Cr, 9-12 Ni, Cb = 10 × C, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 55-50 El; 175 Brin.
For welded structures, chemical plant equipment; Type 347; corrosion and heat resistant

BOFORS RK 214.
M-1184; 0.10 max C, 28 Cr, 4.5 Ni, bal Fe
Annealed: 85,300 TS; 64,000 YS; 210 Brin.
For furnace parts, nitric acid parts; heat and corrosion resistant.

BOFORS RLH 2.
M-1184; 0 10 C, 18 Cr, 8 Ni, 0 25 S, bal Fe.
Annealed: 85,000 TS; 28,000 YS; 60 El, 160 Brin.
For screws, bolts, fasteners, shafts, screw machine products.
Type 303 stainless, free-cutting, austenitic, non-hardenable.

BOFORS RNK 29.
M 1184, 0 09 C, 18 Cr, 5 Ni, 8.5 Mn, 0 2 N, bal Fe.
Annealed 104,000 TS; 56,000 YS, 59 El; 200 Brin.
For shafts, valve parts, bolts, fittings, foodstuff and chemical equipment.
Type 202 stainless, austenitic.

BOFORS RO211.
M-1184, 0 12 C, 2.5 Cr, 1 1 Mo, bal Fe
Normalized· 88,000 TS, 70,000 YS, 26 El; 190 Brin.
For steam and gas turbine parts, operating up to 1100°F.
Martensitic, corrosion resistant.

BOFORS RO-346
M-1184; 0.15 C, 0.8 Cr, 0 6 Mo, bal Fe.
For camshafts, crankshafts, gears; case hardened, tough.

BOFORS RO-752
M-1184, 0.35 C, 1 05 Cr, 0.20 Mo, bal Fe.
For shafts, gears; tough.

BOFORS RO-952.
M-1184; 0.40 C, 1 10 Cr, 0 25 Mo, bal Fe
For shafts, gears; oil hardened, tough

BOFORS RO4154
M-1184; 0 25 C, 3 Cr, 0.5 Mo, bal Fe
Hardened· 124,000 TS; 102,000 YS; 20 El, 260 Brin.
For construction elements subjected to stresses at temperatures up to 1100°F.
Martensitic Good impact strength and resistance to temper brittleness.

BOFORS RO-7155.
M-1184; 0.30 C, 2.7 Cr, 0.5 Mo, bal Fe.
For shafts, gears; oil hardened.

BOFORS ROP10.
M-1184; 0.08 C, 3.0 Cr, 0.8 Mo, 0.2 V, bal Fe.
For hobbed molds for pressing and injection molding of plastics, hobbed dies for zinc die castings Case-hardening, shock resistant.

BOFORS ROP18.
M-1184; 0.2 C, 1.3 Cr, 0.5 Mo, 0.2 V, bal Fe.
For hobbed hot work dies, die casting and drop forging dies.
Hot work steel, oil or air hardening.

BOFORS ROP19.
M-1184; 0.40 C, 5.3 Cr, 1.4 Mo, 1.0 V, 1.0 Si, bal Fe.
Annealed: 98,000 TS; 74,000 YS; 28 El; 210 Brin.
Heat Treated: 290,000 TS; 228,000 YS; 3 El; C 55 Rock.
For die casting and hot pressing dies, extrusion dies, mandrels, punches.
Type H13 hot work steel Tough and red hard.

BOFORS ROP21
M-1184; 1 C, 5.3 Cr, 0.2 V, 1.1 Mo, bal Fe.
For cold work dies, shears, press tools; air hardened.

BOFORS ROP43.
M-1184; 0.23 C, 12 Cr, 1.2 Mo, 0.6 Ni, 0.3 V, bal Fe.
Annealed: 95,000 TS; 40,000 YS; 25 El; B 92 Rock.
Hardened: 240,000 TS; 205,000 YS; 9 El; C 48 Rock.
For cutlery, bearings, valves, surgical instruments, Corrosion resistant, hardenable.

BOFORS ROP46.
M-1184, 0 20 C, 12 Cr, 0.5 Mo, 0.35 V, bal Fe
Annealed· 90,000 TS, 38,000 YS, 26 El; B 90 Rock.
Hardened: 235,000 TS, 200,000 YS, 9 El, C 50 Rock.
For valves, cutlery, bearings, surgical instruments, valves; corrosion resistant, hardenable.

BOFORS ROP57.
M-1184, 1 5 C, 12 Cr, 0.2 V, 0.8 Mo, bal Fe.
For dies, stamping and shearing tools; oil or air hardened

BOFORS ROP-63
M-1184, 0 30 C, 0 3 Mn, 2.5 Cr, 0.2 V, 0.5 Ni, 0 3 Mo, bal Fe
Heat treated· 142,200 TS; 121,000 YS; 295-330 Brin.
For gears, shafts, nitrided parts; nitriding steel.

BOFORS ROP5462.
M-1184, 0 24 C, 1.3 Cr, 0.5 Mo, 0 2 V, bal Fe.
Hardened· 121,000 TS; 107,000 YS; 20 El, 260 Brin.
For steam turbine rings, bolts, screws, nuts at temperatures to 1025°F.
Martensitic, high temperature steel.

BOFORS ROP9653.
M-1184; 0 45 C, 1.5 Cr, 0 7 Mo, 0 3 V, bal Fe
For die casting and hot pressing dies, extrusion dies and mandrels, punches, forging dies
Hot work, oil hardening steel.

BOFORS ROPT.
M-1184; 0 20 C, 3.0 Cr, 0.6 Mo, 0 5 W 0.8 V, bal Fe
Hardened· 128,000 TS; 107,000 YS; 17 El; 275 Brin.
For turbine discs for jet engines, gas and steam turbines, shafts, rotors, bolts.
Martensitic, high creep resistance.

BOFORS RP1152 see BOFORS HRP 1152.

BOFORS RR27
M-1184, 0 08 max C, 11 5-13 Cr, 0 1-0.3 Al, bal Fe.
Annealed 71,000 TS; 42,600 YS, 22 El; 70 RA; 150 Brin
Heat treated· 175,000 TS; 145,000 YS; 21 El; 64 RA, 352 Brin.
For oil refinery and chemical plant equipment; Type 405; corrosion resistant.

BOFORS RR77.
M-1184; 0.15 min C, 12 14 Cr, bal Fe.
Annealed: 88,000 TS; 40,000 YS; 32 El; 68 RA; 170 Brin.
For cutlery, valve trim, turbine blades; Type 420; stainless, hardenable.

BOFORS RR212.
M-1184; 0.35 C, 23-27 Cr, bal Fe.
Annealed: 90,000 TS; 60,000 YS; 20 El; 45 RA; 180 Brin.
For furnace parts, heat treating boxes; Type 446; heat resistant.

BOFORS RR412.
M-1184; 0.35 C, 23-27 Cr, bal Fe.
Annealed: 90,000 TS; 60,000 YS; 20 El; 45 RA; 180 Brin.
For furnace parts, heat treating boxes; Type 446; heat resistant.

BOFORS RT27.
M-1184; 0.3 C, 1 Cr, 5.5 W, 3.5 Ni, bal Fe.
For extrusion dies, mandrels; oil hardened, hot work steel.

BOFORS RT45.
M-1184; 0.3 C, 3 Cr, 10 W, 2 Ni, 0.3 V, bal Fe.
For die casting dies, hot work dies; hot work steel, oil hardened.

BOFORS RT46.
M-1184; 0.30 C, 12 Cr, 12 W, 0.5 V, bal Fe.
For die casting and pressing dies, extrusion dies and mandrels, punches. Hot work steel Type H23. Develops red hardness and toughness up to 1300°F

BOFORS RT60.
M-1184; 2 C, 13 Cr, 1 W, bal Fe.
For stamping and shearing tools, dies; oil hardening.

BOFORS RT 225
M-1184; 1.3 C, 5 W, bal Fe
For impact extrusion dies, water hardened.

BOFORS RT-1733.
M-1184; 0.9 C, 0.6 Cr, 0.6 W, 1.2 Mn, bal Fe
For cutting, threading tools; oil hardening.

BOFORS RTO 712.
M-1184; 0.4 C, 1.2 Cr, 2.5 W, 0.3 Mo, 0.15 V, bal Fe.
For chisels, pneumatic tools; tough.

BOFORS RTO-912.
M-1184, 0.45 C, 1 Cr, 2.5 W, 0.25 Mo, 0.15 V, bal Fe.
For chisels, shear blades; hot work steel.

BOFORS S-145.
M-1184; 0.55 C, 1.75 Si, 0.75 Mn, bal Fe.
Hardened: 185,000 TS; 164,000 YS, 380-440 Brin
For springs; tough, oil hardened.

BOFORS SIR.
M-1184, 0.20 C, 25 Cr, bal Fe.
Annealed. 71,000 TS, 43,000 YS, 170 Brin.
For furnace parts, heat treating boxes, quenching baskets.
Corrosion and heat resistant to 2000°F

BOFORS SRO
M-1184, 0.45 C, 9 Cr, 0.3 Mo, 2.8 Si, bal Fe.
Hardened: 144,000 TS; 121,000 YS; 30 El; 320 Brin
For valves, oil refinery equipment.
Martensitic, heat and corrosion resistant.

BOFORS SRO2.
M-1184; 0.45 C. 13 Cr, 1.0 Ni, 2.8 Si, bal Fe.
Heat Treated 142,000 TS; 121,000 YS; 16 El; 300 Brin.
Uses: Intake valves, outlet valves.
Martensitic steel, corrosion and oxidation resistant.

BOHLER.
German; 0.015 C, 1 Mn, 1.2 Si, 17.5 Cr, 16 Ni, 1.75 Mo, 2 Cb, 0.12 V, bal Fe.
For gas engine parts; high heat resistance.

BOHLER 2M.
M-27; 0.5 C, 0.3 Si, 1.8 Mn, bal Fe.
Hardened: 170,000-200,000 TS; 150,000 YS; 9 El; 352-415 Brin.
For leaf springs; spring steel.

BOHLER 2NCMO.
M-27; 0.30 C, 0.7 Cr, 1.9 Ni, 0.25 Mo, bal Fe.
Heat treated: 121,000 TS; 92,500 YS.
For turbine and motor parts; oil hardened, shock resistant.

BOHLER NO. 2 Si.
M-27; 0.6 C, 2 Si, bal Fe.
Heat treated: 220,000 TS; 156,000 YS; 460 Brin.
For valves, springs; good resistance to scaling.

BOHLER 3NIMO.
M-27, 0.15 Cr, 3.5 Ni, 0.25 Mo, bal Fe.
For gears, cams, camshafts, case hardened.

BOHLER 3 NM.
M-27; 0.32 C, 3 Ni, bal Fe.
Hardened: 113,000 TS, 71,000 YS; 20 El; 50 RA; 240 Brin.
For bolts, shafts, gears, connecting rods; tough.

BOHLER NO 3 NW.
M-27, 0.14 C, 3.0 Ni, bal Fe.
Heat treated 100,000 TS; 64,000 YS; 22 El, 55 RA; 235 Brin
For gears, cams, camshafts, case hardening steel.

BOHLER 3WKZ.
M-27, C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe
For tools, dies, hot work dies, hot work steel.

BOHLER NO 4
M-27, 0.5 C, 2.25 W, 0.25 V, bal Fe
For hot work tools and dies, hot work steel

BOHLER NO 5 NM
M-27, 0.25 C, 5.0 Ni, bal Fe.
For auto parts, crankshafts.

BOHLER 5 NW
M-27, 0.12 C, 5 Ni, bal Fe.
Oil treated 105,000-143,000 TS, 75,000-118,000 YS, 20-18 El, 60-57 RA, 210-288 Brin.
For gears, shafts, turbine blades, carburizing steel.

BOHLER NO. 16
M-27, 0.9 C, 0.1-0.2 V, bal Fe
For tools, drills, chasers, water hardened.

BOHLER NO. 36 N
M-27, C, alloy, bal Fe
For component parts of barometers, optical instruments, low coefficient of expansion.

BOHLER NO 90.
M-27, 0.90 C, 0.20 max Si, 0.30 Mn, bal Fe.
For cold heading and forming dies for heavy duty; water hardening

BOHLER 701.
M-27; 0.45 C, 3 Si, 9 Cr, bal Fe.
Heat treated: 135,200 TS, 106,700 YS
For inlet and exhaust valves, corrosion and heat resistant

BOHLER NO. 711
M-27; 50 Fe, 50 other metals.
For hard facing work, well drill bits, cutting tools, does not require heat treatment for hardening.

BOHLER 751.
M-27, 0.70 C, bal Fe.
Annealed: 85,000-100,000 TS; 175-204 Brin.
Heat Treated: 174,000 TS; 128,000 YS; 12 El, 355 Brin.
For soft to hard rock drills, hammers, punches
Water hardening, wear resistant.

BOHLER 851.
M-27; 0.85 C, bal Fe.
Hardened: Rock C 65.
Annealed: 85,000-100,000 TS; 175-204 Brin.
For mines, quarries and road construction drills, hard rock drills, punches.
Water hardening, wear resistant.

BOHLER ACO.
M-27; 0.27 C, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment, fasteners; heat and creep resistant.

BOHLER AC1.
M-27; 0.34 C, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment, bolts; heat and creep resistant.

BOHLER AC3.
M-27; 0.30 C, Cr, V, bal Fe.
For gears, shafts, crankshafts, machine tool parts; oil or water hardened.

BOHLER ACE
M-27, 0.33 C, 1.1 Cr, 1.1 Al, 0.20 Mo, bal Fe.
Heat treated. 114,000 min TS; 85,400 YS.
For gears, shafts, construction parts; nitriding steel.

BOHLER ACN.
M-27, 0.35 C, 0.5 Mn, 1.8 Cr, 1 Ni, 1.1 Al, Mo, bal Fe
Hardened: 142,000-160,000 TS; 113,000 YS; 13 El, 40 RA, 293-340 Brin
For gears, shafts, pump parts, nitriding steel.

BOHLER ACV
M-27; 0.3 C, 0.6 Mn, 2.5 Cr, 0.2 Mo, 0.3 V, bal Fe
Hardened 145,000-150,000 TS, 128,000 YS, 13 El, 45 RA, 320-373 Brin
For gears, shafts, valves, cylinders; nitriding steel.

BOHLER AS 2.
M-27, 0.2 C, 18 Cr, 8 Ni, bal Fe
Annealed 85,000 TS; 35,000 YS, 60 El, 70 RA, 150 Brin
Rolled 125,000 TS, 95,000 YS, 25 El, 55 RA; 277 Brin.
For chemical plant equipment; Type 302, stainless, austenitic

BOHLER AS2G.
M-27, 0.15 C, 1.5 Si, 18 Cr, 8.5 Ni, bal Fe
Annealed: 80,000 TS, 35,000 YS; 55 El, 70 RA, 150 Brin
Cold drawn: 180,000 TS, 150,000 YS, 10 El, 250 Brin
For chemical plant equipment, tanks, filters, Type 302; stainless, austenitic

BOHLER AS-4.
M-27, 0.10 max C, 16-18 Cr, 10-14 Ni, 2 max Mo, Cb, bal Fe
Annealed. 85,000-95,000 TS, 35,000-45,000 YS; 60-50 El, 75-60 RA; 150-190 Brin.
For valve seats, cones and spindles, piston rods; Type 316 Cb; austenitic, stainless.

BOHLER AS-8
M-27; 0.10 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS, 60-50 El; 75-60 RA; 150-190 Brin.
For valve seats, kitchen utensils, chemical plant equipment; Type 316; stainless, austenitic.

BOHLER AUTO MS.
M-27; 0.5 C, Mn, Si, bal Fe.
For crankshafts, connecting rods, axles, cranks, levers; oil hardened.

BOHLER AUTO SPECIAL PA.
M-27; 0.35 C, 1.25 Cr, 4.45 Ni, bal Fe.
For crankshafts, gear shafts, axles, steering gear parts; oil hardened.

BOHLER AWP.
M-27, 0.45 C, 1.4 Si, 0.8 Mn, 13 Cr, 13 Ni, 1.3 W, 1.2 V, bal Fe.
For hot extrusion dies, die casting dies, hot working dies.
Hot work steel, tough.

BOHLER AZH
M-27; 0.85 C, 0.3 Mn, 0.25 Si, bal Fe.
For tools, drills, taps, water hardening.

BOHLER BATS.
M-27, C, bal Fe. For bats for threshing machines.

BOHLER B-ELITE.
M-27; 0.2 C, bal Fe For welding wire and electrodes, for electric arc welding

BOHLER B-ELITE 18
M-27; C, bal Fe For welding wire and electrodes; for electric arc welding.

BOHLER B-ELITE U
M-27, 0.1 C, bal Fe For welding wire and electrodes, electric arc welding.

BOHLER BH
M-27, C, bal Fe For welding wire and electrodes; for electric arc welding

BOHLER BHC
M-27, 0.7 C, 2 Mn, 1 Cr, 0.2 Ti, bal Fe.
Welded 220,000 TS
For hard facing rod; wear resistant

BOHLER BH-EXTRA
M-27, C, bal Fe
For welding wire and electrodes, for electric arc welding

BOHLER BHS
M-27, 0.22 C, 1.6 Mn, 0.3 Ti, bal Fe
Welded: 87,000 TS.
For welding wire; wear resistant.

BOHLER BHW
M-27, C, bal Fe
For welding wire and electrodes, for electric arc welding

BOHLER BLADE STEEL.
M-27, C, bal Fe
For blades

BOHLER BLITZ
M-27, 0.65 C, 0.65 Mn, bal Fe.
Heat treated: 99,600 TS, 64,000 YS
For rifle barrels; water hardened.

BOHLER BM.
M-27, C, bal Fe.
For welding wire and electrodes; for arc welding.

BOHLER BOREAS.
M-27, C, bal Fe.
For drawing plates of steel wire and hard bronze wire; for arc welding.

BOHLER BROWNIE.
M-27; C, bal Fe.
For mining drills; for work on medium hard rocks.

BOHLER BROWNIE EXTRA.
M-27; C, bal Fe.
For mining drills; for work on hardest rocks.

BOHLER BS2.
M-27; 0.55 C, 0.10-0.40 Si, 0.5-0.7 Mn, bal Fe.
Heat treated: 155,000 TS; 110,000 YS; 15 El; 45 RA; 320 Brin.
For gears, bolts, shafts, axes, fasteners; water hardened.

BOHLER B-SPECIAL.
M-27; C, bal Fe.
For welding wire; for gas welding.

BOHLER BTH.
M-27; 0.60 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
For rails, hammers, springs, bolts, gears, shafts; water hardened.

BOHLER BW.
M-27; C, bal Fe.
For welding electrodes; for electric arc welding.

BOHLER BW-VII.
M-27; C, bal Fe.
For welding wire; for gas welding.

BOHLER BW-IX.
M-27; C, bal Fe.
For welding wire; for gas welding.

BOHLER BW XII.
M-27; 0.1 C, 1 Mn, 0.5 Ni, bal Fe.
Welded: 67,000 TS; 22-26 El.
For welding wire, gas welding.

BOHLER C/2.
M-27; 0.85 C, 0.50 Cr, bal Fe.
For wood saws, band saws; water hardened.

BOHLER CC.
M-27; 0.8 C, 18 W, 1.6 V, 1 Mo, 4.2 Cr, 9 Co, bal Fe.
For super high speed cutters, reamers, taps; high speed steel.

BOHLER CC55N.
M-27; 1.35 C, 12.5 W, 4 Cr, 4 V, 5 Co, bal Fe.
For cutters, forming dies, tools; oil hardened, wear resistant.

BOHLER CC55 SPEZIAL.
M-27; 1.5 C, 12 W, 5 Cr, 5 V, 5 Co, bal Fe.
For high speed cutters, high speed steel.

BOHLER CC SPECIAL.
M-27; 0.65 C, 4.1 Cr, 18.5 W, 1.35 V, 18.5 Co, 0.8 Mo, bal Fe.
For super high speed cutters; high speed steel.

BOHLER CM EXTRA.
M-27; 0.58 C, 1.0 Cr, 0.95 Mn, 0.09 V, bal Fe.
For springs, gears, crankshafts, bolts; oil hardened, shock resistant.

BOHLER CMO.
M-27; 0.25 C, 1.1 Cr, Mo, bal Fe
Hardened: 128,000-150,000 TS; 100,000 YS; 16 El; 50 RA; 262-311 Brin.
For shafts, gears, bolts; water hardening.

BOHLER CNME.
M-27 0.56 C, Ni, Cr, Mo, V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

BOHLER CNW.
M-27; 0.45 C, 1.35 Cr, 1.65 Ni, bal Fe.
For tools, dies, gears, shafts; oil hardening.

BOHLER COH.
M-27; C, Co, bal Fe.
For magnets; magnetic steel.

BOHLER COK.
M-27; 0.95 C, 0.30 Mn, 8.5 Cr, 15.5 Co, 1.0 Mo, bal Fe.
For magnets, regulators for furnace installations; magnet steel.

BOHLER COM.
M-27; C, Co, bal Fe.
For half ring and horseshoe magnets; magnet steel.

BOHLER CRUCIBLE QUALITY.
M-27; 0.7-1.2 C, bal Fe.
For tools, dies; crucible quality steel.

BOHLER CRV.
M-27; 0.5 C, 1 Cr, V, bal Fe.
Hardened: 185,000-225,000 TS; 170,000 YS; 400-477 Brin.
For springs; oil hardening.

BOHLER CS.
M-27, 0.67 C, 1.3 Si, 0.5 Mn, 0.5 Cr, bal Fe.
For high temperature springs; heat resistant.

BOHLER CSF.
M-27; 0.6 C, 0.8 Cr, 1.7 Si, bal Fe.
Heat treated: 199,200 TS; 170,800 YS.
For springs, oil hardened, tough.

BOHLER CSI.
M-27; 0.7 C, 1.3 Si, 0.5 Cr, bal Fe.
For tools, dies, punches; shock resistant.

BOHLER CV.
M-27, 1.2 C, 0.8 Cr, 0.1 V, bal Fe.
For drills, taps; water or oil hardened.

BOHLER DC 7.
M-27, 0.2 C, 0.3 Si, 1 Mn, 0.5 Cr, bal Fe
Hardened 78,000-85,000 TS; 42,000 YS; 28 El; 142-176 Brin
For bolts, valves, fittings, case hardening.

BOHLER DCM 10.
M-27, 0.15 C, 0.3 Si, 0.7 Mn, 1.1 Cr, 0.2 Mo, bal Fe.
Hardened: 85,000-105,000 TS, 57,000 YS; 24 El; 60 RA; 176-223 Brin
For bolts for high temperature; case hardening

BOHLER DCM 12
M-27, 0.25 C, 0.6 Mn, 1.2 Cr, 0.2 Mo, bal Fe.
Hardened: 92,000-113,000 TS; 71 000 YS; 22 El; 60 RA, 192-235 Brin.
For high temperature bolting; good creep resistance

BOHLER DCM 15.
M-27; 0.25 C, 0.5 Mn, 1.3 Cr, 0.4 Mo, bal Fe
Hardened 106,000-120,000 TS; 85,000 YS; 22 El; 60 RA, 223 253 Brin.
For bolting for high temperature, good creep resistance

BOHLER DCM42
M-27; 0.25 C, 1.1 Cr, 0.2 Mo, bal Fe.
Heat treated: 92,500 TS, 71,200 YS.
For steam boiler equipment; heat and creep resistant.

BOHLER DCM54.
M-27; 0.25 C, 1.3 Cr, 0.45 Mo, bal Fe.
Heat treated: 113,800 TS; 85,400 YS.
For power engines; used up to 970°F.

BOHLER DCM195.
M-27, 0.1 C, 5.5 Cr, 0.5 Mo, bal Fe.
Heat treated: 85,400 TS; 56,900 YS.
For power engines; used up to 1120°F.

BOHLER DCM910.
M-27; 0.1 C, 2.3 Cr, 1 Mo, bal Fe.
Heat treated: 71,200 TS, 38,400 YS.
For steam boiler parts; used up to 1022°F.

BOHLER DCMV7.
M-27; 0.10 C, 1.8 Cr, 0.3 Mo, 1.1 Si, 0.3 V, bal Fe.
Heat treated: 71,200 TS; 42,700 YS.
For oil plant pipes and vessels; used up to 1022°F.

BOHLER DCMV 20.
M-27; 0.18 C, 1 Cr, 0.4 Si, 0.6 Mn, 0.45 Mo, 0.2 V, bal Fe.
Hardened: 106,000-120,000 TS; 85,000 YS; 21 El; 50 RA; 223-248 Brin.
For high temperature bolting; good creep resistance.

BOHLER DCMV 30.
M-27; 0.18 C, 1.2 Cr, 0.5 Mo, 0.3 V, bal Fe.
Hardened: 113,000-128,000 TS; 85,000 YS; 19 El; 50 RA; 235-262 Brin.
For high temperature bolting; good creep resistance.

BOHLER DCMV55.
M-27; 0.24 C, 1.24 Cr, 0.5 Mo, 0.2 V, bal Fe.
Heat treated: 114,000 TS; 84,500 YS.
For heat engines; used up to 970°F.

BOHLER DCMV511.
M-27; 0.20 C, 1.3 Cr, 1.1 Mo, V, bal Fe.
Heat treated: 99,600 TS; 78,300 YS.
For high temperature screws; used up to 986°F.

BOHLER DCMVW12.
M-27; 0.22 C, 3 Cr, 0.5 Mo, 0.8 V, W, bal Fe.
Heat treated: 114,000 TS; 78,300 YS
For engine parts, used up to 986°F.

BOHLER DMO3.
M-27, 0.15 C, 0.30 Mo, 0.70 Mn, bal Fe
Annealed: 64,000 TS, 38,400 YS.
For steam boiler fittings; used up to 986°F.

BOHLER DMO6
M-27; 0.15 C, 0.55 Mo, 0.45 Mn, bal Fe
Annealed 64,000 TS, 41,300 YS.
For steam boiler fittings; used up to 970°F.

BOHLER DMV83.
M-27, 0.14 C, 0.80 Mo, 0.30 V, bal Fe.
Heat treated 99,600 TS, 85,400 YS.
For heat resistant parts; used up to 986°F.

BOHLER D SPECIAL
M 27; 1.2-1.3 C, 0.6-0.8 Mn, 1.05-0.25 Si, 1.1-1.3 Cr, bal Fe
For tools, dies, oil hardening.

BOHLER E2
M-27, 0.15 C, 0.25 Si, 0.37 Mn, bal Fe
Annealed: 70,000 TS, 40,000 YS, 25 El, 60 RA; 145 Brin
For gears, bolts, machine tool parts, case hardened

BOHLER EB30.
M 27, 0.13 C, 4 Cr, bal Fe.
For oil refinery equipment, creep and heat resistant.

BOHLER EB60
M-27, 0.15 C, 0.65 Cr, 0.5 Mn, bal Fe.
Heat treated: 114,000 TS; 57,000 YS
For gears, bolts, machine tool parts; case hardened.

BOHLER EB80.
M-27, 0.16 C, 1.05 Mn, 0.95 Cr, bal Fe
Heat treated. 142,500 TS; 86,000 YS.
For gears, cams, camshafts; case hardened.

BOHLER EB95.
M-27; 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe
Heat treated: 171,000 TS; 100,000 YS.
For gears, cams, camshafts; case hardened.

BOHLER EB100.
M-27, 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe.
For gears, cams, camshafts; case hardened

BOHLER EBK.
M-27; 0.16 C, bal Fe.
For machine tool parts; case hardened.

BOHLER EBKW.
M-27; 0.10 C, bal Fe.
Heat treated: 85,400 TS.
For machine tool parts; case hardened.

BOHLER EBM.
M-27; 0.20 C, 1.15 Cr, 1.25 Mn, bal Fe.
Heat treated: 150,000 TS.
For gears, cams, camshafts; case hardened.

BOHLER ECL 80.
M-27; 0.15 C, 1 Mn, 1.0 Cr, 0.2 Mo, bal Fe.
Oil hardened: 128,000-156,000 TS; 100,000 YS; 14 El; 40 RA; 262-321 Brin.
For gears, shafts, pinions; high core strength, tough, case hardened.

BOHLER ECL 100.
M-27; 0.2 C, 1 Mn, 1.3 Cr, 0.25 Mo, bal Fe.
Oil hardened: 156,000-200,000 TS; 120,000 YS; 10 El; 30 RA; 335-410 Brin.
For gears, shafts, pinions; case hardening, tough core.

BOHLER ECN 100.
M-27; 0.15 C, 1 Cr, 0.8 Ni, bal Fe.
For gears, pinions, crankshafts; carburizing steel, tough.

BOHLER ECN150.
M-27; 0.15 C, 1.55 Cr, 1.55 Ni, 0.5 Mn, bal Fe
For gears, bolts, oil refinery equipment; case hardened, tough.

BOHLER ECN 200
M-27; 0.17 C, 2 Cr, 1.8 Ni, 0.1 Mo, bal Fe.
Heat treated 190,000 TS, 130,000 YS.
For gears, pinions, shafts; case-hardening, tough

BOHLER EL.
M-27, 0.05 C, 4 Cr, 0.5 Mo, bal Fe
Heat treated: 107,000 TS.
For plastic mold dies.

BOHLER EMC
M-27, 0.40 C, 1.0 Cr, bal Fe
Heat treated: 241,800 TS, 185,000 YS
For structural parts, gears, shafts, oil hardened.

BOHLER ENA.
M-27, 0.16 max C, 1.5 Ni, 0.2 Cr, bal Fe
For gears, cams, camshafts, case hardening, tough

BOHLER FPB EXTRA
M-27; 0.14 C, 1 Cr, 4.3 Ni, bal Fe
For plastic mold dies, case hardened.

BOHLER EPB EXTRA M.
M-27, 0.19 C, 4.00 Ni, 0.20 Mo, 1.25 Cr, bal Fe
Heat treated: 200,000 TS.
For gears, bolts, camshafts, cams; case hardened, shock resistant.

BOHLER EPB EXTRA W
M-27, 0.20 C, 1.2 Cr, 4.3 Ni, 0.35 W, bal Fe.
For tools, dies, case hardened

BOHLER EPB PRIMA.
M-27; 0.17 C, 1.5 Cr, 1.5 Ni, bal Fe.
For plastic mold dies; case hardened.

BOHLER FPB SPEZIAL.
M-27, 0.13 C, 0.80 Cr, 3.5 Ni, bal Fe
For plastic mold dies; case hardened

BOHLER ES.
M-27, 0.17 max C, Mn, Si, bal Fe
For gears, cams, camshafts; case hardening steel.

BOHLER ES 2.
M-27, 0.15 C, 0.25 Si, 0.37 Mn, bal Fe.
Annealed. 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin.
For gears, bolts, machine tool parts; case hardened

BOHLER ESC.
M-27; 0.15 max C, 0.75 Cr, bal Fe.
For gears, cams, camshafts; case hardening steel.

BOHLER ESK.
M-27; 0.15 C, 0.8 Cr, bal Fe.
For gears, shafts; case hardening.

BOHLER ES PRIMA.
M-27; 0.13 C, 2.5 Ni, 0.7 Cr, bal Fe.
For gears, bolts, camshafts, cams;
case hardened, shock resistant.

BOHLER ES SPECIAL.
M-27; 0.15 C, 0.8 Cr, 3.5 Ni, bal Fe.
Rolled: 100,000 TS; 78,000 YS; 22 El; 200 Brin.
Oil hardened: 200,000 TS; 175,000 YS; 14 El;
400 Brin.
For fasteners, gears, camshafts, splineshafts,
pawls, arbors.
Case hardening, tough, wear resistant.

BOHLER EWH.
M-27; 0.22 C, 0.25 Si, 0.45 Mn, bal Fe.
Cold Rolled: 78,000 TS; 66,000 YS, 20 El; 156 Brin.
Water Hardened: 104,000 TS; 80,000 YS;
6 El; 205 Brin.
For fasteners, gears, camshafts, cams, pawls.
Case-hardening, wear resistant.

BOHLER EXTRA FM.
M-27; 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe.
For bearings, bushings, cutters; water
or oil hardened, wear resistant

BOHLER EXTRA H.
M-27; 1.1 C, 0.1 V, bal Fe.
For nail machine dies and cutters, cutting dies,
coining dies; water hardening

BOHLER EXTRA HARD.
M-27; 1.4 C, 0.5 Cr, 1.1 V, bal Fe
For cutting tools, razors, surgical instruments,
chisels, drawing mandrels; oil hardening.

BOHLER EXTRA K.
M-27; 0.8 C, 2.0 Cr, bal Fe.
For cold rolls, press discs, rams, cams;
wear resisting.

BOHLER EXTRA K 5.
M-27; 1 C, 5 Cr, 1 Mo, V, bal Fe.
For forming and blanking tools; air hardened, tough.

BOHLER EXTRA MG.
M-27; 1.05 C, 1.0 Mn, 0.6 Cr, bal Fe.
Water Hardened: 220,000 TS; 155,000 YP;
11 El; 600 Brin.
Oil Hardened: 188,000 TS; 120,000 YP; 10 El;
400 Brin.
For taps, threading dies, chasers, reamers, broaches,
gauges, knives, bearings, plastic mold dies.
Tough, oil harden or water harden.

BOHLER EXTRA MITTEL-HART.
M-27; 1.25 C, bal Fe.
For milling cutters, file cutters, stone picks,
knives, cams; water hardening.

BOHLER EXTRA RAPID 300.
M-27; 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For forming and blanking dies, engravers' tools,
high speed steel.

BOHLER EXTRA S.
M-27, M-1618; 0.9 C, 0.1 V, bal Fe.
For cold header dies and punches; shock resistant.

BOHLER EXTRA SC.
M-27; 1.25 C. 1.15 Si, 1.2 Cr, 0.7 Mn, bal Fe.
For engravers' tools, bearings, bushings;
oil hardened, wear resistant.

BOHLER EXTRA SOFT.
M-27; 0.70 C, bal Fe.
For hammers, axes, tools, shafts, rails; Type W1;
water hardened.

BOHLER EXTRA TOUGH.
M-27; 1.12 C, 0.25 Si, 0.23 max Mn, bal Fe.
For taps, threading dies, reamers, mint dies;
water hardening. AISI W1.

BOHLER EXTRA WEICH.
M-27; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 174,000 TS; 128,000 YS; 12 El;
37 RA; 355 Brin.
For springs, rails, punches, hammers, axes;
water hardened; Type W1.

BOHLER EXTRA ZAH.
M-27; 0.85 C, 0.2 Mn, 0.25 Si, bal Fe.
For tools, drills, taps, punches;
Type W1; water hardened.

BOHLER EXTRA ZAHNHART.
M-27; 1.1 C, 0.2 Mn, 0.2 bal Fe.
For tools, drills, taps; water hardening.

BOHLER EXTRA ZH100.
M-27, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS, 53,000 YS; 21 El;
42 RA; 200 Brin.
For springs, tools, Type W1; water hardened

BOHLER F120.
M-27; 1.2 C, bal Fe
Hardened: Rock C 66
Annealed: 85,000-100,000 TS, 175-204 Brin.
For machinist files, drills, cutters, reamers
Water hardening, wear resistant.

BOHLER F130.
M-27; 1.3 C, bal Fe
Hardened: Rock C 66
Annealed: 85,000-100,000 TS, 175-204 Brin.
For hard files
Water hardening, wear resistant.

BOHLER F145.
M-27, 1.45 C, bal Fe
Hardened Rock C 66
Annealed: 85,000-100,000 TS, 175-204 Brin.
For precision and circular files, knurling
and rotary files.
Water hardening, wear resistant.

BOHLER FB8
M-27, 0.12 max C, 0.8 Si, 0.8 Al, 6.5 Cr, bal Fe.
For oil refinery equipment, creep and heat resistant.

BOHLER FB8G
M-27; 0.3 C, 2.2 Si, 6 Cr, bal Fe
For oil refinery equipment, creep and heat resistant

BOHLER FB10.
M-27; 0.12 max C, 1 Si, 1 Al, bal Fe.
For oil refinery equipment.

BOHLER FB30G.
M-27; 0.6 C, 1.5 Si, 29 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant

BOHLER FB30S.
M-27; 0.2 C, 1.2 Si, 25 Cr, 4 Ni, bal Fe.
Cast: 90,000 TS; 65,000 YS; 2 El; 212 Brin.
For cylinder liners, bushings, valve seats and bodies;
corrosion and heat resistant.

BOHLER FC.
M-27; 1.4 C, 0.7 Cr, bal Fe.
Hardened: Rock C 67.
Annealed: 85,000-100,000 TS; 175-204 Brin.
For precision files, needle files,
knurling and rotary files.
Water hardening, wear resistant.

BOHLER FF.
M-27; 0.15 C, 2 Si, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers; Type 302; stainless, austenitic.

BOHLER FF.
M-27; 0.2 max C. 22-24 Cr, 12-15 Ni, 2 max Mn, 3.5 max Si, bal Fe.
Annealed: 85,000-95,000 TS, 40,000-50,000 YS; 45-55 El; 150-185 Brin.
For heat treat boxes, furnace parts, refinery equipment; Type 309, austenitic, heat resistant.

BOHLER FFB.
M-27, 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe
Annealed: 95,000 TS; 45,000 YS, 50 El; 65 RA; 180 Brin.
At 1200°F 57,000 TS, 22,000 YS, 32 El; 45 RA
For valves, pumps, engine components, furnace parts, Type 310, austenitic, heat resistant

BOHLER FFBG
M-27, 0.4 C, 2 Si, 26 Cr, 14 Ni, bal Fe.
Annealed 90,000 TS; 45,000 YS; 45 El; 170 Brin.
For furnace parts, valves, pumps; Type HI; corrosion and heat resistant.

BOHLER FFG
M-27; 0.4 C, 2 Si, 22 Cr, 9.5 Ni, bal Fe.
Cast: 85,000 TS, 45,000 YS; 35 El; 165 Brin.
For furnace parts, heat treating boxes, conveyors; Type HF; corrosion and heat resistant.

BOHLER FIRST QUALITY
M-27, 0.7-1.3 C, bal Fe.
For general purpose tools and dies, water hardening

BOHLER FM.
M-27, 0.15 C, 0.2 Si, 1.5 Cr, 0.4 Mn, bal Fe
For staybolt taps, screw dies, gages, milling cutters, reamers, drills, rulers, case hardened

BOHLER FM EXTRA
M-27, 1.5 C, 1.4 Cr, 0.1 V, bal Fe.
For tools, dies, bearings, wear resistant.

BOHLER FOX A 7.
M-27, 0.12 C, 7 Mn, 19 Cr, 0.5 Ni, bal Fe
Welded: 95,000 TS, 48 El.
For stainless welding electrodes, austenitic, corrosion resistant

BOHLER FOX DCMS.
M-27, 0.15 C, 0.6 Mn, 0.8 Cr, 0.4 Mo, bal Fe
Welded. 86,000 TS, 27 El.
For welding electrodes; for high temperature service.

BOHLER FOX DMO.
M-27; 0.1 C, 0.6 Mn, 0.4 Mo, bal Fe.
Welded: 80,000 TS, 33 El.
For welding wire; Mo coated.

BOHLER FOX DUR 600.
M-27, 0.4 C, 3 Si, 10 Cr, bal Fe.
Welded: 30,000 TS.
For welding electrodes, hard facing, coated, abrasion resistant.

BOHLER FOX FB 30 S.
M-27; 0.1 C, 1 Mn, 25 Cr, 3 Ni, 0.25 N_2, bal Fe.
For welding electrodes; coated, heat resistant.

BOHLER FOX GFW.
M-27; Cu-Ni.
For welding electrodes; Monel metal.

BOHLER FOX MSU.
M-27; 0.1 C, 0.6 Mn, bal Fe.
Welded: 76,000 TS; 32 El.
For welding wire; coated.

BOHLER FOX SAS 4.
M-27; 0.08 C, 18 Cr, 10 Ni, 2.2 Mo, 0.8 Nb, bal Fe.
Welded.
For welding electrodes, coated, stainless.

BOHLER FOX SAS 8.
M-27; 0.08 C, 17 Cr, 15 Ni, 2 Mo, 2 Cu, 0.8 Nb, bal Fe.
Welded.
For welding electrodes; coated, stainless.

BOHLER-FOX SFW.
M-27; Ni-Cu.
For welding electrodes for cast iron; Monel metal, coated.

BOHLER FOX SPE.
M-27, 0.1 C, 0.6 Mn, bal Fe.
Welded 68,000 TS, 34 El.
For welding wire; coated.

BOHLER FOX UMZ.
M-27, 0.1 C, 0.6 Mn, bal Fe.
Welded. 68,000 TS; 34 El.
For welding wire, coated.

BOHLER FOX WKZ 50.
M-27, 0.3 C, 2.3 Cr, 4.5 W, 8.6 V, bal Fe.
Welded 210,000 TS.
For welding electrodes hard facing, coated.

BOHLER FSB
M-27; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed 95,000 TS, 45,000 YS, 50 El; 65 RA; 180 Brin
At 1200°F 57,000 TS, 22,000 YS, 32 El; 45 RA.
For valves, pumps, furnace parts and equipment, Type 310, austenitic, heat resistant.

BOHLER G55.
M-27; 0.63 C, 0.20 Cu, bal Fe.
Heat treated 121,000 TS; 78,300 YS.
For rifle barrels, water hardened.

BOHLER GA
M-27; C, bal Fe.
For welding wire or electrodes, for gas or electric welding.

BOHLER GCMO.
M-27, 0.55 C, 1.1 Cr, 0.4 Ni, 0.45 Mo, 0.1 V, bal Fe.
For drop forging dies, hot work steel, oil hardened.

BOHLER GCN4.
M-27, 0.35 C, 1.3 Cr, 4 Ni, 0.25 Mo, bal Fe.
For drop forging dies; hot work steel, oil hardened

BOHLER GEODURIT SH.
M-27, carbides
For hard facing with carbides, tubes filled with carbides.

BOHLER GMC.
M-27; 0.40 C, Cr, Mn, Mo, bal Fe.
For bolts, gears, machine tool parts; oil hardened, tough.

BOHLER GMCA.
M-27; 0.4 C, 1.35 Mn, 1.85 Cr, 0.2 Mo, bal Fe.
For tools, dies, punches; non-deforming.

BOHLER GMME.
M-27; 0.56 C, Ni, Cr, Mo, V, bal Fe.
For gears, bolts, crankshafts; oil hardened, tough.

BOHLER GMNE.
M-27; 0.55 C, 0.7 Cr, 0.5 Mo, 1.7 Ni, bal Fe.
For tools, dies, gears, shafts; shock resistant.

BOHLER GNM.
M-27; 0.5 C, 0.7 Cr, 0.5 Mo, 1.8 Ni, bal Fe.
For drop forging dies, swages; oil hardening.

BOHLER GNME.
M-27; 0.55 C, 0.6 Mn, 1 Cr, 2 Ni, 0.6 Mo, V, bal Fe.
For drop forging dies, hot work steel.

BOHLER GSF.
M-27; 0.67 C, 1.3 Si, 0.5 Mn, 0.5 Cr, bal Fe.
Heat Treated: 175,000 TS; 150,000 YS; 350 Brinell.
For springs, tools, punches.
Water hardening, shock resistant.

BOHLER GSI.
M-27; 0.5 C, 0.7 Cr, 0.9 Mn, bal Fe.
For drop forging dies for soft materials; water hardening.

BOHLER HARD.
M-27; 0.45 C, 0.25 Si, 0.56 Mn, bal Fe.
For gears, bolts, machine tool parts; water hardened.

BOHLER HARD CORE.
M-27, C, bal Fe.
For core insertions

BOHLER HART.
M-27; 1.4 C, 0.3 Mn, 0.25 Si, bal Fe.
For tools, cutters, hobs; keen cutting edge.

BOHLER HH.
M-27; 0.61 C, 0.25 Si, 0.65 Mn, bal Fe.
Heat treated: 160,000 TS, 113,000 YS, 12 El; 40 RA; 325 Brin.
For hammers, axes, punches; water hardened.

BOHLER HM.
M-27; 0.30 C, 0.25 Si, 1.35 Mn, bal Fe.
Heat treated: 113,800 TS; 64,000 YS
For gears, bolts, machine tool parts, water or oil hardened.

BOHLER HMA.
M-27; 0.40 C, 0.37 Si, 0.95 Mn, bal Fe.
For gears, bolts, machine tool parts, water hardened.

BOHLER HSB.
M-27; 0.80 C, 0.50 Cr, 0.40 Ni, bal Fe.
For saw blades; water or oil hardened.

BOHLER H VII/VI.
M-27; 0.22 C, 0.25 Si, 0.45 Mn, bal Fe.
Annealed. 73,000 TS, 41,000 YS, 22 El, 58 RA; 140 Brin.
For gears, bolts, machine tool parts; water hardened.

BOHLER IMP.
M-27; 0.65 C, 3.75 Cr, 0.85 Mo. 0.07 V, 8.5 W, bal Fe.
For lathe and planer tools, reamers, drills, hobs; high speed steel.

BOHLER IN 1 A.
M-27; 0.25 C, 0.3 Si, 0.7 Mn, 3 Cr, 0.3 Mo, bal Fe.
Hardened: 92,000-108,000 TS; 64,000 YS; 18 El; 192-226 Brin.
For chemical processing equipment; creep resistant.

BOHLER IN 5.
M-27; 0.1 C, 0.3 Si, 0.4 Mn, 3 Cr, 0.3 Mo, bal Fe.
Hardened: 71,000-85,000 TS; 40,000 YS; 25 El; 142-176 Brin.
For chemical processing equipment; creep resistant.

BOHLER IN5A.
M-27; 0.10 C, 2.7 Cr, 0.2 V, bal Fe.
For high pressure vessels.

BOHLER IN 8.
M-27; 0.17 C, 0.3 Si, 0.4 Mn, 2.5 Cr, 0.5 Mo, 0.5 W, 0.05 V, bal Fe.
Hardened: 92,000-117,000 TS; 64,000 YS; 22 El; 55 RA; 192-239 Brin.
For chemical processing equipment; creep resistant.

BOHLER IN8N.
M-27; 0.18 C, 2.7 Cr, 0.25 Mo, 0.15 V, bal Fe.
Heat treated: 99,600 TS; 64,000 YS.
For oil plant equipment; used up to 950°F.

BOHLER IN 9.
M-27; 0.22 C, 0.3 Si, 0.4 Mn, 3.0 Cr, 0.6 V, 0.5 Mo, bal Fe.
Hardened: 78,000 TS; 64,000 YS; 19 El; 160 Brin
For chemical processing equipment; creep resistant.

BOHLER IN 10.
M-27, 0.22 C, 0.3 Si, 0.4 Mn, 0.3 Cr, 0.4 Mo, 0.4 W, 0.8 V, bal Fe.
Hardened: 120,000-152,000 TS, 106,000 YS; 18 El, 55 RA; 253-300 Brin.
For chemical processing equipment; creep resistant.

BOHLER INC5
M-27, 0.10 C, 5.3 Cr, 0.55 Mo, bal Fe
Heat treated. 85,400 TS, 57,000 YS.
For pipes and tanks for corrosive oils; corrosion resistant.

BOHLER INOIL
M-27; 0.1 C, 5 Cr, 0.5 Mo, bal Fe.
Hardened 71,000-92,000 TS, 65,000 YS, 22 El, 50 RA, 145-192 Brin
For chemical processing equipment; creep resistant

BOHLER INVAR STEEL.
M-27; C, alloy, bal Fe
For component parts of barometers and optical instruments; low coefficient of expansion.

BOHLERIT
M-27; WC + Co, TiC + WC + Co.
For cutting tools, dies; sintered carbides

BOHLER JAR STEEL
M-27; C, bal Fe
For machinery parts, water hardening.

BOHLER K
M-27; 2.25 C, 13 Cr, bal Fe.
For tools, dies; non-deforming.

BOHLER K-3.
M-27, C, Cr, bal Fe
For magnets, magnet steel.

BOHLER K-3 S.
M-27, C, alloy, bal Fe.
For plug and ring gages, rolls for rubbers, oil hardening

BOHLER K-100.
M-27; 1.05 C, 0.4 Cr, 0.2 Si, 0.3 Mn, bal Fe.
For ball bearings, races; water hardened.

BOHLER K-100/1.
M 27; 1.2 C, 0.8 Cr, bal Fe
For mint and medal dies, press dies, rolls; water hardening.

BOHLER K-100 S.
M-27; 1.1 C, 1.2 Cr, bal Fe.
For gears, cams, rams, slides, spindles; water or oil hardening.

BOHLER K100 W/S.
M-27; 0.90 C, 0.25 Si, 0.30 Mn, 0.80 Cr, bal Fe.
For bearings, bushings, cutters; water hardened, wear resistant.

BOHLER K150.
M-27; 1.05 C, 1.5 Cr, bal Fe.
For bearings, bushings, cutters; water hardened, wear resistant.

BOHLER KHMU.
M-27; 0.10 C, 0.40 Cu, bal Fe.
For body structures, acid containers; rust resistant.

BOHLER KHS.
M-27; 0.60 C, 1.4 Si, 1.0 Mn, bal Fe.
Heat treated: 199,000 TS; 156,500 YS.
For springs; oil hardened, tough.

BOHLER KHSW.
M-27; M-164; 0.50 C, 1.7 Si, 0.7 Mn, bal Fe.
Heat treated: 199,000 TS; 156,500 YS.
For springs; oil hardened, tough. AISI S4.

BOHLER KK.
M-27; 1.0 C, 0.2 Si, 1.1 Cr, 0.7 Mn, bal Fe.
For ball bearings, races; water hardened.

BOHLER KL.
M-27; 0.52 C, 0.9 Si, 2.5 W, 1.7 Cr, bal Fe.
Oil Hardened: 337,000 TS; 255,000 YP; C 67 Rock.
For cold punches, wood working tools, chipper knives, milling cutters, chain saw teeth, shear blades, coining tools.
Shock resistant Type S1 tool steel.

BOHLER KMC.
M-27, 0.33 C, 1.0 Cr, 0.65 Mn, 0.25 Si, bal Fe.
For gears, bolts, machine tool parts; water hardened.

BOHLER KMCW.
M-27, 0.41 C, 1.0 Cr, 0.65 Mn, bal Fe.
For oil refinery equipment; creep and heat resistant

BOHLER KNIFE STEEL.
M-27; 0.7 C, bal Fe.
For knives, tools; water hardening.

BOHLER KP.
M 27, 1.3 C, 4.75 W, bal Fe.
For high duty cold drawing and pressing dies, bending punches, drawing mandrels; oil hardening.

BOHLER KPV.
M-27; 1.45 C, 1.2 V, 1 W, bal Fe.
For tools, dies, bearings; water hardening.

BOHLER KR SPECIAL.
M-27, M-1182; 2.1 C, 0.8 Mo, V, 12 Cr, bal Fe.
For tools, dies, plug gages, drawing dies; non-deforming.

BOHLER KW5.
M-27; 0.15 max C, 11.5-13 Cr, bal Fe.
Heat treated: 120,000-135,000 TS; 110,000-117,000 YS; 16-15 El, 63-58 RA; 220-240 Brin.
For steam turbine blades, valves, cutlery; Type 410; corrosion resistant.

BOHLER KW20.
M-27; 0.20 C, 0.40 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For cutlery, valves, turbine blades; Types 420; stainless.

BOHLER KW30.
M-27; 0.30 C, 13 Cr, 0.30 Mn, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 200 Brin.
For valves, cutlery, turbine blades; Type 420; stainless.

BOHLER KW40.
M-27; 0.40 C, 13 Cr, 0.30 Mn, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 22 El; 52 RA; 210 Brin.
For valves, cutlery, turbine blades; Type 420; stainless.

BOHLER KW-60.
M-27; 0.4 C, 13 Cr, bal Fe.
For knives, scissors, surgical instruments, gages, calipers, valve seats, piston rods; rust and abrasion resisting.

BOHLER KW60-1.
M-27; 0.15 min C, 12-14 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For cutlery, valves, turbine blades, gages, gears; Type 420; stainless, hardenable.

BOHLER KWA.
M-27, 0.12 max C, 14-18 Cr, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 30 El; 55 RA; 150 Brin.
Cold drawn: 130,000 TS; 120,000 YS; 2 El; 185 Brin.
For oil refinery equipment, bolts, kitchen sinks; Type 430; stainless, ferritic.

BOHLER LIGHTNING
M-27, 0.5 C, 1.6 Cr, Mo, V, bal Fe.
Heat treated. 156,000 TS; 142,000 YS; 350 Brin.
For rifle barrels; tough.

BOHLER M751
M-27; 0.75 C, bal Fe
Hardened: Rock C 64.
Annealed: 85,000-100,000 TS; 175-204 Brin.
For soft to hard rock drills, punches, cutters.
Water hardening, wear resistant.

BOHLER M851.
M-27, 0.85 C, bal Fe.
Hardened Rock C 65.
Annealed: 85,000-100,000 TS, 175-204 Brin.
For hard rock drills, cutters.
Water hardening, wear resistant

BOHLER MAGNET STEEL.
M-27; 6.3 W, 0.7 C, bal Fe.
For magnets, water hardening.

BOHLER MARTIN STEEL.
M-27; 0.05-1.1 C, bal Fe.
For general use, machinery parts; all grades of carbon steel.

BOHLER ME.
M-27, 0.70 C, 0.25 max Si, 0.34 Mn, 5.8 W, bal Fe.
For magnets; magnet steel.

BOHLER ME-6.
M-27, C, W, bal Fe.
For meter magnets; magnet steel.

BOHLER MIDDLE HARD 100.
M-27, 1.0 C, 1 W, bal Fe.
Annealed: 84,000 TS; 60,000 YS; 26 El; 185 Brin.
Heat Treated: 280,000 TS; 535 Brin.
For heading and flanging tools, bending and blanking dies, center bits, plugs, jaws, cold heading dies.
Water hardening cold work tool steel.

BOHLER MIDDLE HARD 115.
M-27; 1.2 C, 1 W, bal Fe.
Annealed: 84,000 TS; 60,000 YS, 26 El; 185 Brin.
Hardened: 210,000 TS; 185,000 RS; 2 El; 400 Brin.
For beading and flanging tools,
bending and blanking dies, center bits,
plugs, jaws, cold heading dies.
Water or oil hardening cold work steel.

BOHLER MITTEL-HART.
M-27; 1.15 C, 0.25 max Si, 0.23 Mn, bal Fe.
For turning tools, milling cutters, crown hammers,
knives, mint dies; water hardening.

BOHLER ML.
M-27; C, alloy, bal Fe.
For rifle barrels; oil hardening.

BOHLER MOLETTE.
M-27; C, bal Fe.
For female and embossed relief molettes,
case hardening steel.

BOHLER Mo RAPID EXTRA 3.
M-27; 0.95 C, W, Mo, bal Fe
For cutters, dies, gauges, punches; oil hardened

BOHLER MO RAPID EXTRA 9.
M-27; 0.8 C, 2 W, 9 Mo, 4 Cr, 1 V, bal Fe.
For lathe and planer tools, drills; high speed steel

BOHLER MO RAPID EXTRA 500.
M-27; 0.8 C, 6 W, 5 Mo, 4 Cr, 2 V, 5 Co, bal Fe.
For lathe and planer tools, reamers,
broaches, drills; high speed steel.

BOHLER MO RAPID EXTRA 800
M-27; 1.05 C, 1.5 W, 9.5 Mo, 1.2 V, 8 Co,
3.7 Cr, bal Fe
Hardened C 63-70 Rock; 15-34 Izod.
For cutters to machine hard and wear resistant
materials, twist drills, router bits, milling cutters.
High speed steel type M42, tough

BOHLER MO RAPID EXTRA 1200
M-27; 1.3 C, 9.5 W, 3.5 Mo, 4 Cr, 3.5 V,
10.5 Co, bal Fe.
For lathe and planer tools, form cutters, reamers,
high speed steel.

BOHLER MO RAPID EXTRA V30
M-27; 1.2 C, 6 W, 5 Mo, 4 Cr, 3.5 V, bal Fe.
For lathe and planer tools, engravers'
cutters, reamers; high speed steel.

BOHLER MPA
M-27; 0.25 C, 1 Cr, 4.2 Ni, Mo, bal Fe
Heat treated· 170,000 TS, 135,000 YS; 15 El, 50 RA;
360 Brin
For shafts, gears, bolts; tough.

BOHLER MPD.
M-27, 0.3 C, 1.9 Cr, 2.6 Ni, 0.9 W, 2.6 Mo,
Cb, bal Fe.
For die casting tools, spreaders, oil hardened

BOHLER MPD EXTRA.
M-27; 0.3 C, 1.8 Cr, 1.3 Ni, 0.9 W, 3.2 Mo, 3.2 Co,
bal Fe.
For die casting tools, spreaders; oil hardened.

BOHLER MS45.
M-27, 0.45 C, 0.3 Si, 0.6 Mn, bal Fe
Hot rolled: 98,000 TS, 59,000 YS; 24 El;
45 RA; 212 Brin.
For gears, bolts, shafts, machine tool parts;
water hardened.

BOHLER MS60.
M-27; 0.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Heat treated: 160,000 TS; 113,000 YS;
12 El; 40 RA; 325 Brin.
For hammers, axes, springs, punches;
water hardened.

BOHLER MS70.
M-27; 0.75 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 185,000 TS; 140,000 YS; 14 El;
38 RA; 375 Brin.
For springs, tools, punches, hammers, axes;
water hardened; Type W1.

BOHLER MS85.
M-27; 0.85 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El;
30 RA; 400 Brin.
For springs, tools, cutters, drills, taps;
Type W1; water hardened

BOHLER MS90.
M-27, 0.90 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated· 195,000 TS, 150,000 YS, 10 El;
30 RA; 420 Brin.
For springs, drills, reamers, broaches;
Type W1; water hardened.

BOHLER MSI.
M-27; 0.6 C, 0.95 Si, 0.95 Mn, bal Fe.
For tools, dies, punches, springs, oil hardening.

BOHLER MS STEEL
M-27; 0.45-0.85 C, bal Fe
For general purpose tools; water hardening

BOHLER MST
M-27; M-1618, 0.9 C, 2 Mn, 0.2 V, bal Fe
For stay bolt traps, broaches, reamers, gages,
cutting dies, non deforming AISI 02.

BOHLER MYA.
M-27, 0.4 C, 1.5 Si, 1.35 Cr, 0.1 V, 0.3 Mn, bal Fe.
For tools, dies, punches, shock resistant

BOHLER MYAH.
M-27; 1.20 C, 1.00 Si, 0.75 Mn, 0.10 V, bal Fe.
For chisels, die holders, punches,
water hardened, tough

BOHLER MYD
M-27, 0.35 C, 1.5 Si, 1.35 Cr, 0.1 V, bal Fe
For tools, dies, punches, oil hardening.

BOHLER MY EXTRA
M-27; 0.45 C, 2 W, 1 Cr, bal Fe.
For pneumatic chisels, hot work tools;
hot work steel, oil hardened.

BOHLER MY EXTRA W.
M 27, 0.35 C, 0.90 Si, 0.30 Mn, 1.05 Cr, 0.18 V,
1.85 W, bal Fe
For forging and header dies, punches,
oil hardened, tough.

BOHLER NAB
M-27, 0.75 C, 0.90 Mn, bal Fe
For dies and parts of textile machines;
water hardened

BOHLER NBS
M-27, 0.5 C, 1 Cr, 3.5 Ni, 0.2 Mo, bal Fe.
For table ware dies, hollow stamping dies, swaging
dies, air hardening

BOHLER NBSN.
M-27, 0.5 C, 0.7 Cr, 0.3 Mo, 1.7 Ni, bal Fe.
For table ware dies, hollow stamping dies,
swaging dies; oil hardening

BOHLER NEEDLE DIE STEEL.
M-27; C, alloy, bal Fe.
For dies.

BOHLER NH
M-27; 0.35 C, 0.25 Si, 0.55 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 52 RA;
185 Brin
For gears, bolts, shafts, machine tool parts;
water hardened.

BOHLER NI.
M-27; 0.25 C, 1.55 Ni, bal Fe.
For shafts, axles, connecting rods, cranks, levers; oil hardening.

BOHLER NIP29.
M-27; 29 Ni, bal Fe.
For head conductor; controlled expansion.

BOHLER NIP36.
M-27; 36 Ni, bal Fe.
For heat conductor; controlled expansion.

BOHLER NIP50.
M-27; 49 Ni, bal Fe.
For electrical motors, laminations; high permeability.

BOHLER NMH
M-27; 0.40 C, 0.8 Cr, 1.4 Ni, 0.4 Mo, bal Fe.
Heat treated: 135,200 TS; 106,700 YS.
For large forgings, gears, shafts; oil hardened

BOHLER NW
M-27, 0.4 C, 1.25 Cr, 4.4 Ni, bal Fe.
For drop forging dies, hot press swages, clipping tools, heavy anvil blocks; air hardening

BOHLER NWM.
M-27, 0.45 C, 4 Ni, 1.3 Cr, 0.3 Mo, bal Fe.
For forging and header dies, punches; oil hardened, tough

BOHLER OFH70
M-27; 0.56 C, 0.30 Si, 0.55 Mn, bal Fe.
Heat treated 160,000 TS, 112,000 YS; 12 El; 40 RA, 320 Brin
For wheels, die blocks, rails, girders, axles, water hardened

BOHLER PA2
M-27; 0.35 C, 1.3 Cr, 4.5 Ni, bal Fe.
For gears, bolts, forging and heading dies; oil hardened, shock resistant

BOHLER PANTHER
M-27, C, bal Fe.
For general use, water hardening.

BOHLER PAZ.
M-27, 0.35 C, 1.3 Cr, 4.5 Ni, bal Fe.
For gears, bolts, crankshafts, dies, tools, oil hardened, shock resistant

BOHLER PNA.
M-27, 0.08 C, 1-1.25 Mn, bal Fe
Welded 55,000 TS, 45,000 YS; 33-40 El, 60-80 RA
For welding rod.

BOHLER PPA
M-27, 0.16 C, 1.0 Cr, 4.45 Ni, bal Fe.
Heat treated: 170,000 TS; 142,000 YS; 12 El; 45 RA, 400 Brin.
For gears, chain wheels, cams, camshafts, bolts; case hardening steel.

BOHLER PRIMA H.
M-27, 1.3 C, 0.20 Si, 0.20 Mn, bal Fe
For engravers' tools, forming and blanking dies, Type W1, water hardened.

BOHLER PRIMA HART.
M-27; 1.3 C, bal Fe
For tools, cutters, dies, drills, water hardened.

BOHLER PRIMA MITTELHART 100.
M-27; 1.0 C, bal Fe.
Annealed. 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For tools, drills, cutters, taps; water hardened

BOHLER PRIMA MITTELHART 115.
M-27; 1.15 C, bal Fe.
Annealed: 110,000 TS, 56,000 YS; 19 El; 40 RA; 210 Brin.
For tools, cutters, drills, taps, reamers; water hardened.

BOHLER PRIMA WEICH.
M-27; 0.70 C, 0.20 Si, 0.20 Mn, bal Fe.
Heat treated. 174,000-122,000 TS; 128,000-82,000 YS; 12-22 El; 37-52 RA; 355-240 Brin.
For springs, clutch discs, rails, die blocks; Type W1; water hardened.

BOHLER PRIMA ZAH.
M-27, 0.85 C, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA, 400 Brin
For tools, drills, cutters, hammers; water hardened.

BOHLER PT 15.
M-27; 0.13 C, 0.2 Cr, 1.5 Ni, bal Fe.
For gears, bolts, camshafts, cams, fasteners; case hardened.

BOHLER PV35.
M-27; 1.5 C, Cr, Si, bal Fe.
For cutters, bearings, bushings; water or oil hardened.

BOHLER RAPID STEEL.
M-27, 14 W, 3.9 Cr, 0.7 C, bal Fe.
For cutters, tools, high speed steel.

BOHLER REMANENCELESS STEEL
M-27; C, bal Fe.
For electrical equipment, high permeability.

BOHLER SAS2
M-27, 0.08 max C, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe
Normalized: 93,000 TS; 36,000 YS, 45 El. 60 RA; 165 Brin
Annealed: 87,000 TS, 33,000 YS; 57 El; 73 RA; 155 Brin.
For muffles, cowls, welded structural parts, Type 321, stainless, austenitic.

BOHLER SAS4.
M-27, 0.10 max C, 16-18 Cr, 10-14 Ni, 2-2.7 Mo, Cb = 10 × C, bal Fe.
Annealed 85,000-95,000 TS, 35,000-45,000 YS, 60-50 El, 75-60 RA, 150-190 Brin.
For acid resistant chemical plant equipment, Type 316 Cb, stainless, austenitic

BOHLER SAS4MN
M-27, 0.07 C, 17.5 Cr, 11.5 Ni, 2.7 Mo, Cb, bal Fe.
Annealed: 85,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin.
For welded acid resistant chemical plant equipment, Type 318; stainless, austenitic.

BOHLER SAS8
M-27; 0.20 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe
Annealed 85,000-95,000 TS, 35,000-45,000 YS, 60-50 El, 75-60 RA, 150-190 Brin
For chemical plant equipment, mixers, agitators, Type 316, austenitic, stainless.

BOHLER SC EXTRA
M-27, 1.25 C, 1.15 Si, 1.2 Cr, bal Fe.
For tools, dies, oil hardening

BOHLER SCV.
M-27, 0.6 C, 1 Mn, 1.2 Cr, 0.1 V, bal Fe.
For tools, dies, springs; oil hardening.

BOHLER SHF
M-27, 1.1 C, 1.2 Cr, V, 0.4 N, bal Fe.
For cold work tools; water hardened

BOHLER SIC20.
M-27; 0.80 C, 20 Cr, 4 Ni, 2 Si, bal Fe.
Heat treated: 142,300 TS; 106,700 YS.
For exhaust valves; high heat resistance.

BOHLER SK3.
M-27; 1.05 C, 1.0 Cr, 0.30 Mn, bal Fe.
For bearings, cutters, liners, sleeves; water hardened, wear resistant.

BOHLER SKVL.
M-27; 0.08 C, 17.5 Cr, 1.2 Mo, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refinery equipment, chemical plant equipment; corrosion resistant.

BOHLER SMF.
M-27; 0.55 C, 1.7 Si, 0.8 Mn, bal Fe.
Appealed: 115,000 TS; 78,000 YS; 22 El; 223 Brin.
Oil Hardened: 295,000 TS; 275,000 YS; 2 El; 575 Brin.
For springs, lock washers, chisels, collets, hand tools.
Water hardening, tough, shock resistant.

BOHLER SPECIAL.
M-27; 2.4 C, 12 Cr, 4 V, Mo, bal Fe.
For blanking and shaping dies; high wear resistance, non-deforming.

BOHLER SPECIAL EXTRA MG.
M-27; 1.05 C, 1.0 Mn, 0.6 Cr, bal Fe.
Annealed: 100,000 TS; 54,000 YP; 20 El; 197 Brin.
Water Hardened: 200,000 TS; 140,000 YP; 11 El; 400 Brin.
For taps, threading dies, chasers, reamers, broaches, knives, beading and bending tools, gauges. Tough, oil hardening.

BOHLER SPECIAL K.
M-27; 2.0 C, 12 Cr, bal Fe.
Oil Hardened: C 62-66 Rock; 534,000 C.S.
For punching and piercing dies, holes, trimming dies, reamers, thread rolling dies, mandrels.
Type D3 air hardening tool steel, wear and abrasion resistance.

BOHLER SPECIAL K5.
M-27; 1.00 C, 5 Cr, 1 Mo, 0.15 V, bal Fe.
Air Hardened: 250,000 TS; 200,000 YS; 3 El; C 58 Rock.
Annealed: 103,000 TS; 50,000 YS; 26 El; C 18 Rock.
For blanking and punching tools. forming and embossing dies, thread rolling dies, shear blades, cutters.
Type A2 air hardening tool steel, deep hardening, wear resistant.

BOHLER SPECIAL K8.
M-27; 0.55 C, 8.5 Cr, 1.1 W, 1.2 Mo + V, bal Fe.
For high duty knives, shear blades, rotary cutters.
Hot work tool steel, oil or air harden.

BOHLER SPECIAL KMV.
M-27, M-1618; 1.5 C, 12 Cr, 0.4 V, 1 Mo, bal Fe.
Air Hardened: 287,000 TS; 214,000 YS; 1 El; C 56 Rock.
For blanking and drawing dies, punches, gages, broaches, hobs, shear blades.
Type D-2 tool steel, air harden.
Wear and abrasion resistant.

BOHLER SPECIAL KN.
M-27; 2 C, 12 Cr, bal Fe.
For cutting dies, cold shears, roll punches; anvil plates, beater rolls, pressure tools; cold and hot working steel; air hardening.

BOHLER SPECIAL KNL.
M-27; 1.7 C, 12 Cr, 0.6 Mo, 0.5 W + V, bal Fe.
Hardened: 288,000 TS; 214,000 YS; 1 El; C 58 Rock.
For shear blades, lamination dies, bending and rolling dies, cold punches.
Type D 2 air hardening tool steel, wear resistant and tough.

BOHLER SPECIAL KR.
M-27; 2.1 C, 12.5 Cr, 0.9 W + V, bal Fe.
Hardened: C 60-65 Rock.
For punching and piercing dies, hobs, trimming dies, reamers, thread rolling dies, mandrels.
Type D 6 air hardening, non-deforming tool steel.

BOHLER SPECIAL KRM.
M-27, M-1618; 2.1 C, 12 Cr, 0.8 Mo, 0.2 V, bal Fe.
Hardened: C 64-66 Rock.
For blanking and forming dies, crimpers.
Wear and abrasion resistant.
Oil hardening, non-deforming. Type D 4 tool steel.

BOHLER SPECIAL KV.
M-27; C, Cr, V, bal Fe.
For wire drawing plates; oil hardening.

BOHLER SPECIAL VERY HARD.
M-27; 1.45 C, 3.3 W, 0.25 V, bal Fe.
For turning, planing, slotting and molding cutters, boring tools, milling cutters, drills, engraving tools, reamers.
Cold work tool steel, water or oil harden. wear resistant.

BOHLER SPECIAL W-43.
M-27; C alloy, bal Fe.
For rifle barrels; oil hardening.

BOHLER SPEZIAL EXTRA HART.
M-27; 1.4 C, 0.30 Cr, 0.10 V, 0.30 Mn, bal Fe
For blanking and forming dies, engravers tools; oil or water hardened, wear resistant

BOHLER SPEZIAL KR
M 27; 2.1 C, 11.5 Cr, V, 0.90 W, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming.

BOHLER SPEZIAL ZAH.
M-27; 1.42 C, W, V, bal Fe.
For bearings, cutters, blanking dies; oil hardened, wear resistant.

BOHLER SPI.
M-27; 0.65 C, 1.7 Si, bal Fe.
For chisels, upsetters, punches; oil hardened, shock resistant.

BOHLER SPN.
M-27; 0.45 C, 1.8 Mn, bal Fe.
For chisels, upsetters, punches; oil hardened, tough.

BOHLER SPU.
M-27; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For springs, taps, reamers, drills; Type W1; water hardened.

BOHLER SPV.
M-27; 0.90 C, 0.10 V, 1.9 Mn, 0.25 Si, bal Fe.
For forming and blanking dies, punches; oil hardened, non-deforming.

BOHLER SSC.
M-27; 1.1 C, 0.7 Cr, 0.1 V, bal Fe.
For tools, dies, bearings; water hardening.

BOHLER SSW.
M-27; 1.2 C, 1 W, bal Fe.
For tools, dies; oil hardening.

BOHLER SSWV.
M-27; 1.2 C, 1 0 W, V, bal Fe
For twist drills, cutting tools; water hardened.

BOHLER SUPER RAPID.
M-27; 15 W, 3.7 Cr, 0.8 C, 0.2 V, 0.2 Mo, bal Fe.
For high speed cutters, tools; high speed steel.

BOHLER SUPER RAPID EXTRA.
M-27; 0.75 C, 18.5 W, 1 V, 4.3 Cr, bal Fe.
Annealed: 100,000 TS; 70,000 YS; 14 El; 255 Brin.
Hardened: C 63-65 Rock
For fine-edged cutting tools, taps, thread millers, twist drills, hobs, broaches.
AISI Type T1 tool steel, high speed steel.

BOHLER SUPER RAPID EXTRA 214
M-27, 0.75 C, 4.0 Cr, 18 W, 1 Mo, 1.55 V, 2.5 Co, bal Fe
For high speed cutters, taps, drills, reamers, high speed steel.

BOHLER SUPER RAPID EXTRA 500.
M-27; 0.80 C, 18 W, 1.0 Mo, 1.6 V, 5 Co, 4.3 Cr, bal Fe.
Oil Hardened: C 64-65 Rock.
Air Hardened: C 60-62 Rock
For cutters, drills, broaches, lathe and planer tools, hobs.
AISI Type T4 tool steel. High speed steel.

BOHLER SUPER RAPID EXTRA HV
M-27; 0.9 C, 14.5 W, 2 V, 1 Mo, 4.5 Co, bal Fe.
For milling cutters; abrasive resistant, high speed steel

BOHLER SUPER RAPID EXTRA MO.
M-27, 0.80 C, 6.5 W, 5.0 Mo, 2.0 V, 4.3 Cr, bal Fe
Oil Hardened: C 63-65 Rock
For lathe and planer tools, drills, hobs, broaches, cut off tools, thread rolling dies.
High speed steel Type M2, tough and wear resistant

BOHLER SVM.
M-27, M 1618, 0.6 C, 2.0 Si, 0.85 Mn, 0.25 Cr, 0.25 Mo, 0.2 V, bal Fe
Oil Hardened 340,000 TS; 283,000 YP, 5 El, 601 Brin
Annealed 107,000 TS, 64,000 YP, 27 El; 212 Brin.
For shear blades, pneumatic tools, punches, chisels.
Type S-5 tool steel. Shock resistant

BOHLER SW.
M-27; 1.0 C, 0.2 Si, 0.9 W, 0.3 Mn, bal Fe.
For tools, dies; oil or water hardening.

BOHLER THM
M-27; 0.8 C, 2.6 W, 0.5 Mo, V, bal Fe
For header dies, punches, upsetters, cold work steel

BOHLER TOUGH.
M-27; 0.85 C, 0.25 max Si, 0.30 Mn, bal Fe.
For cold chisels, hammers, shear blades, punches, press dies, knives; water hardening

BOHLER TW.
M-27; 1.15 C, 0.9 W, bal Fe.
For twist drills, taps, files, water hardening.

BOHLER TWR.
M-27; 1.5 C, 1.2 W, V, bal Fe.
For paper mill knives; water hardened, wear resistant.

BOHLER TWV.
M-27; 1.2 C, 1.2 W, 1.0 V, bal Fe.
For circular knives, drawing rings, cartridge shell dies, piercing punches; water hardening.

BOHLER TWVW.
M-27; 0.90 C, 1.1 W, V, bal Fe.
For industrial knives; water hardened.

BOHLER TWW.
M-27; 1.25 C, 0.85 Cr, 1.6 W, bal Fe.
For milling cutters, saw blades; oil hardening.

BOHLER UF100.
M-27, 1.0 C, 0.20 Si, 0.40 Mn, bal Fe.
Water hardened: 220,000 TS; 155,000 YP; 10 El; 600 Brin.
For springs, cutters, drills.
Water hardening, wear resistant.

BOHLER UM 1.
M-27; 0.33 C, 17.5 Mn, 3 Cr, bal Fe.
Water quenched: 135,000 TS; 60,000 YS; 46 El; 48 RA.
For nonmagnetic parts; nonmagnetic, austenitic.

BOHLER UM2.
M-27; 0.65 C, 9 Mn, 3 Cr, 7.3 Ni, bal Fe.
Water quenched: 126,000 TS; 80,000 YS; 54 El, 44 RA.
For non-magnetic structural parts; non-magnetic, austenitic.

BOHLER UM2M.
M-27; 0.20 C, 8 Mn, 8 Cr, 6 Ni, bal Fe.
Annealed. 85,400 TS; 34,200 YS
For electrical equipment, non-magnetic.

BOHLER UM8
M-27; 0.50 C, 18 Mn, 5 Cr, bal Fe.
Annealed: 116,700 TS, 71,200 YS
For electrical equipment; non-magnetic.

BOHLER UMB.
M-27; 0.20 C, 6 Mn, 11 Cr, 10 Ni, bal Fe
Cold drawn: 213,400 TS; 170,700 YS.
For electrical equipment; non-magnetic wires.

BOHLER US.
M-27; C, alloy, bal Fe.
For die casting dies, oil hardening.

BOHLER US 25.
M-27, 0.3 C, 2.35 Cr, 0.25 V, bal Fe
For tools, dies, mandrels, oil hardening.

BOHLER USK
M-27, 0.45 C, 1.6 Cr, 0.6 Mo, V, bal Fe.
For cold working and stamping dies, oil hardened.

BOHLER US SPECIAL.
M-27; 0.4 C, 1.55 Cr, 0.3 V, 0.6 Mo, bal Fe.
For tools, dies, containers for rod and tube extrusion, hot work steel

BOHLER US SPEZIAL.
M-27, 0.45 C, 1.6 Cr, Mo, V, bal Fe.
For extrusion press liners, rams and dies; oil hardened

BOHLER US ULTRA
M-27; 0.35 C, 1 Si, 5 Cr, 1.5 Mo, 0.4 V, bal Fe.
For permanent mold and die casting dies; hot work steel.

BOHLER US ULTRA 2.
M-27; 0.4 C, 1 Si, 5 Cr, 1.2 Mo, 1 V, bal Fe.
For extrusion press liners, rams and dies; oil hardened.

BOHLER US ULTRA 4
M-27, 0.36 C, 1 Si, 5 Cr, 1.3 W, 1.4 Mo, 0.4 V, bal Fe
For die casting dies, punches.
Hot work, oil hardening steel.

BOHLER V6 N.
M-27; 0.9 C, V, 0.7 Ni, bal Fe.
For cold heading, coining and embossing dies; water hardening.

BOHLER V444D.
M-27; 0.45 C, Ni, Cr, W, bal Fe.
For heading and forging dies; oil hardened, tough.

BOHLER VB 135.
M-27; 0.35 C, 1 Cr, 0.70 Mn, bal Fe.
Hardened: 106,000-128,000 TS; 85,000 YS; 18 El; 60 RA; 223-272 Brin.
For bolts, gears, shafts, connecting rods; oil hardening.

BOHLER VB150.
M-27; 0.50 C, 1.05 Cr, 0.1 V, 0.95 Mn, bal Fe.
For springs, gears, bolts, crankshafts; oil hardened, shock resistant.

BOHLER VB200.
M-27; 0.45 C, 1.7 Cr, V, bal Fe.
Heat treated: 170,700 TS; 135,000 YS.
For construction equipment; oil hardened.

BOHLER VBS 135.
M-27; 0.40 C, 1.2 Mn, 1.2 Si, bal Fe.
Hardened: 128,000-145,000 TS; 97,000 YS; 14 El; 45 RA; 270-295 Brin.
For bolts, gears, shafts, connecting rods; tough, wear resistant.

BOHLER VBV140.
M-27, 0.50 C, 1.75 Mn, 0.1 V, bal Fe.
Hot rolled. 97,000 TS; 59,000 YS; 40 El, 200 Brin
Heat treated: 142,300 TS; 106,700 YS.
For valve lifters, crankshafts; oil hardened, tough.

BOHLER VC2.
M-27; 0.85 C, 0.5 Cr, V, bal Fe.
For wood saw blades and bands; water or oil hardened.

BOHLER VCL125.
M-27; 0.25 C, 1.0 Cr, 0.2 Mo, 0.65 Mn, bal Fe.
For gears, bolts, crankshafts; oil hardened, tough

BOHLER VCL135.
M-27; 0.33 C, 1.0 Cr, 0.2 Mo, 0.65 Mn, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, tough.

BOHLER VCL 140.
M-27; 0.4 C, 1.1 Cr, Mo, bal Fe.
Hardened: 142,000-160,000 TS; 13 El; 40 RA; 293-340 Brin.
For bolts, gears, shafts; oil hardening.

BOHLER VCL150.
M-27; 0.50 C, 1.1 Cr, Mo, bal Fe.
For gears, bolts, crankshafts; oil hardened, tough.

BOHLER VCL230.
M-27; 0.30 C, 2.5 Cr, 0.2 Mo, 0.15 V, 0.55 Mn, bal Fe.
For die casting dies, crankshafts; oil hardened, tough.

BOHLER VCL240.
M-27; 0.50 C, 1.0 Cr, 0.2 Mo, 0.60 Mn, bal Fe.
For gears, bolts, crankshafts; oil hardened, tough.

BOHLER VCN 100.
M-27; 0.35 C, 1.1 Cr, 1.1 Ni, bal Fe.
Hardened: 135,000-156,000 TS; 113,000 YS; 16 El; 45 RA; 285-300 Brin.
For bolts, gears, shafts; tough.

BOHLER VCN150.
M-27; 0.34 C, 1.5 Ni, 1.5 Cr, 0.2 Mo, bal Fe.
For gears, bolts, crankshafts; oil hardened, tough.

BOHLER VCN 200.
M-27; 0.3 C, 2 Ni, Mo, 2 Cr, bal Fe.
Hardened: 156,000-184,000 TS; 135,000 YS; 14 El; 45 RA; 221-388 Brin.
For bolts, gears, connecting rods, shafts; tough, heavy forgings.

BOHLER VCN400W.
M-27; 0.25 C, 1 Cr, 4 Ni, Mo, bal Fe.
For crankshafts, gears; heavy forgings, oil hardened.

BOHLER VSI.
M-27; 0.60 C, 1.7 Si, bal Fe.
Heat treated: 113,800 TS; 85,400 YS.
For valves.

BOHLER VSK
M-27; 0.45 C, 1.5 Si, 15 Cr, 13 Ni, 3 W, bal Fe.
Annealed: 106,700 TS, 71,200 YS.
For exhaust valves; corrosion and heat resistant.

BOHLER VSW.
M-27; 0.45 C, 2.5 Si, 19 Cr, 10 Ni, 1.2 W, bal Fe.
Annealed: 114,000 TS; 71,200 YS.
For exhaust valves; austenitic.

BOHLER W50.
M-27, 1.05 C, 0.5 Cr, bal Fe
For balls, rollers, bearings, bearing steel.

BOHLER W100.
M-27, 1.0 C, 0.9 Cr, bal Fe
For balls, rollers, races, bearings, bearing steel.

BOHLER W 150
M-27, 1 C, 1.5 Cr, bal Fe.
For balls, races, rollers, bearings; water hardening bearing steel.

BOHLER WACE.
M-27, 0.33 C, 1.1 Cr, 1.1 Al, Mo, bal Fe
For gears, cams, camshafts, nitriding steel

BOHLER WACV.
M-27, 0.30 C, 2.5 Cr, 0.2 Mo, 0.15 V, 0.55 Mn, bal Fe
For die casting and plastic mold dies, oil hardened, tough.

BOHLER WB
M-27, 0.5 C, 0.9 Mn, bal Fe.
For drop forging dies; water hardening

BOHLER WD3
M-27, 0.45 C, 1 Si, 1 Mn, V, bal Fe
For piercing dies and tools; oil hardened, tough

BOHLER WD6.
M-27, 0.28 C, 0.70 Cr, 1.7 Ni, V, bal Fe
For piercing dies and tools, oil hardened, tough

BOHLER WD15
M-27, 0.3 C, 0.8 Cr, 4.0 Ni, 1.5 Mo, bal Fe
For mandrels, piercers; hot work steel

BOHLER WD17
M-27, 0.25 C, 0.8 Cr, 4.5 Ni, 4.5 W, 0.4 Mo, bal Fe
For mandrels, piercers, hot work steel

BOHLER WEICH.
M-27; 0.65 C, 0.3 Mn, 0.25 Si, bal Fe
For tools, punches, springs, water hardening.

BOHLER WFO
M-27; 0.6 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot Rolled: 115,000 TS, 70,000 YS, 16 El; 240 Brin.
Oil Hardened: 160,000 TS; 113,000 YS, 13 El, 320 Brin.
For springs, hand tools, hammers, wrenches.
Oil or water hardening.

BOHLER WH.
M-27; 0.22 C, 0.25 Si, 0.45 Mn, bal Fe.
Annealed: 73,000 TS; 41,000 YS; 22 El; 58 RA; 140 Brin.
For rivets, nails, gears, bolts, fasteners; case hardened, water hardened.

BOHLER WKD.
M-27; M-1618; 0.5 C, 4 Cr, 18 W, 1 V, bal Fe.
High speed steel, for piercing and punching tools; AISI H26.

BOHLER WKV.
M-27; 0.45 C, 1.6 Cr, 0.5 Mo, 0.5 W, 1 V, bal Fe.
For hot piercing and punching tools, gripper dies, upsetters.
Hot work steel, shock resistant.

BOHLER WKW2.
M-27; 0.2 C, 14 Cr, bal Fe.
For stainless parts, dies; corrosion resistant.

BOHLER WKW2M.
M-27; C, 13 Cr, 1.2 Mo, bal Fe.
For plastic mold dies; corrosion resistant.

BOHLER WKW4.
M-27; 0.40 C, 14 Cr, 0.30 Mn, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 23 El; 52 RA; 200 Brin.
For valves, cutlery, surgical and dental instruments; Type 420; stainless.

BOHLER WKW6.
M-27; 0.4 C, 13.5 Cr, bal Fe
For tools, dies, cutlery, tableware, hardenable corrosion resistant

BOHLER WKW8.
M-27; C, 16 Cr, 1 Mo, bal Fe.
For plastic mold dies; corrosion resistant.

BOHLER WKZ
M-27, M-1618, 0.3 C, 9 W, 0.4 V, 2.7 Cr, bal Fe.
For dies, ram heads, extrusion press tools, die casting dies, permanent molds.
Oil hardening, hot work steel.

BOHLER WKZ50.
M-27, 0.3 C, 4.35 W, 2.35 Cr, 0.65 V, bal Fe.
For hot shear blades, heading and riveting dies.
Hot work steel, shock resisting

BOHLER WKZ100.
M-27, 0.55 C, 4 Cr, 10 W, 1 V, 0.8 Mo, bal Fe
For hot working mandrels, punches, hot work tool steel.

BOHLER WKZ EXTRA
M 27, 0.35 C, 3.5 Cr, 11 W, 0.5 V, bal Fe
For hot forming dies, hot work tool steel

BOHLER WM
M-27, 0.3 C, 3.85 W, 1.05 Cr, 0.2 V, bal Fe.
For tools, dies, hot working mandrels, hot work steel

BOHLER WM2
M-27, 0.35 C, 0.9 Si, 1.85 W, 0.05 Cr, 0.2 V, bal Fe
For tools, dies, hot work tools, hot work steel

BOHLER WMD
M-27, 0.33 C, 2.8 Cr, 3 Mo, 0.5 V, bal Fe
For hot dies, heading dies, rams, upsetters
Hot work, oil hardening, shock resistant.

BOHLER WON
M-27, 0.8 C, 0.3 Mn, 0.3 V, bal Fe
For stamping tools, mint and medal dies, cold beater tools, special dies, water hardening.

BOHLER WPD
M-27, 0.25 C, 1.8 Cr, 0.9 W, 2.8 Mo, 2.5 Ni, bal Fe.
For hot press tools, press jaws, hot rolling mandrels, hollow punches, hot work steel

BOHLER WPN.
M-27; C, 2.3 Cr, 1.7 Ni, 10 W, V, bal Fe.
For hot work tools and dies; oil hardened, hot work steel

BOHLER WPZ.
M-27; 0.3 C, 2.25 Cr, 9 W, 0.3 V, 2.2 Co, bal Fe.
For injection and compression molding and extrusion dies, spline bushings; hot work steel.

BOHLER WV.
M-27; 1.2 C, 0.2 Cr, 1 W, 0.1 V, bal Fe.
For drills, taps; water or oil hardened.

BOHLER Z-II.
M-27; C, bal Fe.
For wire drawing cast steel plates.

BOHLER ZCS.
M-27; 0.5 C, 0.9 Si, 1.15 Cr, bal Fe.
For crankshafts, gears, connecting rods; oil hardening.

BOHLER ZE.
M-27, C, bal Fe.
For wire drawing cast steel plates.

BOHLER ZK.
M-27, 1.4-1.5 C, 0.25-1.15 Si, 1.3-1.5 Cr, 0.08-0.15 V, bal Fe.
For tools, dies, pneumatic chisels, rivet sets; tough, shock resistant.

BOHLER ZM.
M-27; C, Mn, bal Fe.
For leaf springs.

BOHLER ZNM
M-27, 0.5 C, 0.7 Cr, 1.7 Ni, Mo, bal Fe.
Heat treated. 243,000 TS; 213,000 YS.
For gears, air or oil hardening.

BOHLER ZNM4
M-27, 0.4 C, 1.3 Cr, 4 Ni, Mo, bal Fe
Heat treated: 228,000 TS, 213,000 YS.
For gears, bolts, crankshafts; oil hardened, shock resistant.

BOHLER ZRH.
M-27, 0.53 C, 1.6 Si, bal Fe
Heat treated· 113,800 TS, 78,300 YS.
For gears, bolts, shafts; oil hardened, tough.

BOHLER ZRW.
M-27, 0.5 C, 1.6 Si, bal Fe
Heat treated 106,700 TS; 71,200 YS.
For gears, bolts, crankshafts, oil hardened, shock resistant.

BOHLER ZSV.
M-27, 0.42 C, 1.2 Si, 1 Mn, 1.2 Cr, V, bal Fe.
For adjustable spanners, oil hardened, tough

BOHNALITE 62S.
M-138, 0.8-1.2 Mg, 0.4-0.8 Si, 0.15-0.40 Cu, 0.15 max Ti, bal Al.
Annealed 17,500 TS, 6500 YS, 30 El, 28 Brin.
T4-temper 35,000 TS, 21,000 YS, 25 El, 65 Brin.
T6-temper: 45,000 TS, 40,000 YS, 17 El, 95 Brin
For doors, window frames, trim, age hardenable.

BOHNALITE A.
M-138, 5-7 Sn, 0.75-1.25 Cu, 1.5-2.2 Si, 0.75-1.25 Ni, bal Al.
Cast
For bearings, similar to Alcoa X750

BOHNALITE B.
M-138, 4.5 Cu, 1.2 max Si, 1.0 max Fe, 0.03 max Mg, bal Al
Heat treated 28,000-45,000 TS, 14,000-27,000 YS, 10-1 El; 55-115 Brin.
For airplane parts, windshield frames, engine crankcases; S.A.E. No 38.

BOHNALITE C.
M-138; 4-5 Cu, 2.0-3.0 Si, 1.2 max Fe, bal Al.
Mold cast· 40,000-55,000 TS, 20,000-45,000 YS; 11-1 El, 70-120 Brin.
For permanent mold castings; good ductility.

BOHNALITE F.
M-138; 6-8 Cu, 4.0 max Si, 1.5 max Fe, 2.5 Zn, bal Al.
19,000-24,000 TS; 12,000 YS; 2-1 El; 50-70 Brin.
For crankcases, oil pans, transmission cases; permanent mold.

BOHNALITE J.
M-138; 9.2-10.0 Cu, 1.5 max Fe, 0.15-0.35 Mg, bal Al.
Heat treated: 26,000-40,000 TS; 18,000-28,000 YS; 1.0 El; 80-115 Brin.
For pistons, camshaft bearings, valve tappet guides; permanent mold.

BOHNALITE K.
M-138; 6-8 Cu, 5-6 Si, 0.20-0.60 Mg, bal Al.
Aged: 27,000 TS; 19,000 YS; 90 El.
For automotive pistons; permanent mold.

BOHNALITE L.
M-138; 0.5-1.5 Cu, 11-13 Si, 1.3 Fe, 0.7-1.5 Mg, 2.0-3.0 Ni, bal Al.
Mold Cast: 28,000-40,000 TS; 22,000-33,000 YS; 1-0 El; 90-120 Brin.
For pistons; permanent mold.

BOHNALITE L-2.
M-138; 9-12 Si, 1-3 Cu, 0.5-2.5 Ni, 0.5-1.5 Mg, 0.2 max Ti, bal Al.
T551-temper: 31,000 min TS; 90-120 Brin.
For pistons; age hardenable.

BOHNALITE L-3.
M-138; 8-10 Si, 3.0-4.5 Cu, 0.2 max Ti, 1.0 max Fe, 0.8 max Mn, bal Al.
F-temper: 34,000 TS; 19,000 YS; 90 Brin.
T5-temper. 34,000 TS; 25,000 YS, 100 Brin.
T6-temper: 42,000 TS; 30,000 YS; 105 Brin.
For hydraulic pistons, covers; age hardenable.

BOHNALITE L-4.
M-138, 8.5-10.5 Si, 2-4 Cu, 0.5-1.5 Mg, 0.5-1.5 Ni, bal Al
Aged 31,000 TS, 85 Brin.
For automotive pistons; permanent mold.

BOHNALITE L-6.
M-138; 11-13 Si, 0.5-2.75 Cu, 0.7-1.3 Mg, 1.3 max Fe, 0.15 max Ti, bal Al.
Cast: 31,000 min TS; 90-120 Brin
For pistons, age hardenable

BOHNALITE M-4.
M-138, 3.25-4.50 Mg, bal Al.
Cast: 22,000 TS, 12,000 YS, 6 El, 46 Brin.
For dairy equipment, cooking utensils; corrosion resistant.

BOHNALITE M-10.
M-138; 9.5-10.6 Mg, bal Al.
Solution treated: 42,000 TS; 20,000 YS, 12 El; 50 Brin.
For castings; best corrosion resistance.

BOHNALITE W.
M-138; 0.1 max Cu, 4.5-6.0 Si, 0.8 max Fe, 0.3 max Zn, bal Al.
17,000-22,000 TS, 7000 YS, 6-3 El, 35-65 Brin.
For automobile body parts, architectural castings; permanent mold.

BOHNALITE W-3.
M-138; 1.0-1.5 Cu, 4.5-5.5 Si, 0.8 max Fe, 0.4-0.6 Mg, bal Al.
Heat Treated: 27,000-40,000 TS; 20,000-27,000 YS, 5-1 El; 60-100 Brin.
For crankcases; pressure tight.

BOHNALITE W-4.
M-138; 0.2 max Cu, 6.5-7.5 Si, 0.6 max Fe, 0.3 Mg, bal Al.
Heat treated: 26,000-40,000 TS; 14,000-20,000 YS; 5-3 El; 50-70 Brin.
For marine parts; corrosion resistant.

BOHNALITE W-5.
M-138; 4-5 Cu, 5-6 Si, 0.1 max Mg, 1.0 max Zn, bal Al.
Cast: 22,000 TS; 1 El; 60 Brin.
For pressure tight castings; sand casting.

BOHNALITE W-6.
M-138; 2.5-4.5 Cu, 5-8 Si, 1.2 Fe, 1.2 Mg, bal Al.
Cast: 22,000 TS; 1 El; 65 Brin.
Aged: 24,000 TS; 1 El; 65 Brin.
T6-temper: 32,000 TS; 1 El; 85 Brin.
For sand castings; heat treatable.

BOHNALITE X-10.
M-138; 9-11 Al, 0.1 Mn, bal Mg.
Cast: 22,000 TS; 12,000 YS; 1-3 El; 53 Brin.
Heat treated: 36,000 TS, 17,000 YS; 1-4 El; 65 Brin.
For castings; permanent mold, sand or die cast.

BOHNALITE Y.
M-138; 3.5-4.5 Cu, 0.6 max Si, 0.8 max Fe, 1.2-1.8 Mg, 1.7-2.3 Ni, bal Al.
Heat treated: 35,000-40,000 TS; 24,000 YS, 1.0-0.5 El; 85-115 Brin.
For pistons, cylinder heads of aircraft engines; good high temperature properties.

BOHN ALLOY NO. 9.
M-138, 10 Sb, 6 Sn, 0.25 As, 0.5 Cu, 0.005 Zn, bal Pb
For bearings, bushings; lead Babbitt.

BOHN ALLOY 70.
M-138; 0.75-1.75 Sn, 2.0-3.5 Pb, 70-73 Cu, bal Zn.
Cast: 35,000 TS, 12,000 YS, 25 El, 45 Brin
For marine hardware; leaded yellow brass.

BOHN ALLOY 80.
M-138; 78-82 Cu, 9.25-10.75 Sn, 8.5-10.7 Pb, 0.7 max Ni, 0.7 max Zn
Cast 25,000 TS, 16,000 YS, 8 El, 60 Brin
For bearings, high leaded bronze, SAE 64.

BOHN ALLOY 88C
M-138; 85-89 Cu, 7.7-9.0 Sn, 0.4-0.9 Pb, 3-5 Zn, 0.75 max Ni.
Cast: 36,000 TS; 18,000 YS, 70 Brin
For bearings, leaded tin bronze; SAE 621.

BOHN ALLOY PMB20.
M-138; 79 Cu, 9.5 Pb, 10 Sn
For bearings, piston pin bushings, axle bearings; leaded bronze

BOHN ALLOY XXA
M-138; 60-68 Cu, 3-7 Al, 2-5 Mn, 2-4 Fe, 1.5 max Sn, 0.2 max Pb, bal Zn.
Cast: 95,000 TS, 45,000 YS; 20 El, 148 Brin.
For ship propellers, marine hardware, manganese bronze, corrosion resistant.

BOHN ALLOY XXX
M-138, M-645, 63-67 Cu, 13 hardener, bal Zn.
Cast: 110,000 TS; 75,000 YS, 12 El, 20 Brin.
For ingots, Mn bronze.

BOHNOLLOY NO. 3
M-138; 2.25-3.75 Cu, 7.0-8.5 Sb, bal Sn.
14,900 TS, 6100 YS, 25-30 El; 24.5 Brin
For bearings, bushings; anti-friction; S.A.E. No. 12.

BOHNOLLOY-12
M-138; 87.0-91.5 Cu, 3.5-4.5 Sn, 3.5-4.5 Pb, 1.5-4.0 Zn, 0.10 max Fe.
For general purpose bearings, transmission bushings, thrust washers, piston pin bushings.
Moderate to high loads, bearing bronze.

BOHNOLLOY 15.
M-138; 0.6 As, 0.5 Cu, 15 Sb, 10 Sn, 0.005 Zn, bal Pb.
For main and rod bearings and bushings; SAE 14, Babbitt, moderate loads.

BOHNOLLOY NO. 18.
M-138; 0.9-1.2 Sn, 14.5-15.5 Sb, 0.6 max Cu, 0.8-1.1 As, bal Pb.
For bearings, bushings; Babbitt; SAE 15.
Used with lead-tin overlay on hard or soft shafts for moderate loads.

BOHNOLLOY NO. 45.
M-138; 52-57 Cu, 38-42 Pb, 4.5-5.5 Ag.
For bearings; heavy duty.

BOHNOLLOY 58.
M-138; 45-47 Cu, 9-11 Ni, bal Zn.
Soft: 65,000 TS; 40,000 YS; 5 El; 95 Rock B.
For hardware; wrought alloy, white brass; architectural applications; weldable.

BOHNOLLOY NO. 70 A.
M-138; 67-74 Cu, 26-31 Pb, 0.75-1.50 Ag.
For bearings; heavy duty.

BOHNOLLOY NO. 70 C.
M-138; 67-74 Cu, 1 max Ag, bal Pb.
For bearings; heavy duty.

BOHNOLLOY MB7.
M-138; 1 Cu, 7 Sn, 1.6 Ni, 0.5 Si, 1 Mg, bal Al.
For bearings, bushings; SAE 770, heat treated, used on hard shafts.

BOHNOLLOY MB8.
M-138, 1 Cu, 6.25 Sn, 0.5 Ni, 0.1 Fe, 1.5 Si, bal Al.
For heavy duty rod and main bearings; SAE 770, used with soft shafts.

BOHNOLLOY PMB20.
M-138, 79 Cu, 0.5 max Sb, 9.5 Pb, 10 Sn, 0.05 max P
For piston pin bushings; SAE 797, mating with hard shaft.

BOHNOLLOY PMB20A.
M-138, 79 Cu, 0.5 max Sb, 10.0 Sn, 9.5 Pb, 0.75 max Zn.
For piston pin bushings, SAE 797, mating with hard shaft.

BOHNOLLOY PMB21.
M-138, 73.5 Cu, 23 Pb, 3.5 Sn, 0.5 max Zn.
For rocker arm and transmission bushings, SAE 794 or 799, intermediate loads.

BOHNOLLOY PMB22.
M-138; 83 min Cu, 8 Pb, 4 Sn, 0.5 max Zn.
For transmission and chassis bushings; SAE 798; medium to high loads.

BOHNOLLOY P.M.B. 24.
M-138, 75-77 Cu, 1 max Sn, 0.25 max Fe, 23 min Pb.
For bearings on steel backing, heavy duty SAE 49.

BOHNOLLOY P.M.B. 30.
M-138; 68-70 Cu, 0.5 max Sn, 0.25 max Fe, 30 min Pb.
For bearings on steel backing; heavy duty; SAE 48.
May be used on soft shaft without an overplate.

BOHNOLLOY PMB42.
M-138; 56 Cu, 42 Pb, 2.5 Sn, 0.1 max Mg, 0.1 max Ni.
For bearings; intermediate, used on soft shaft.

BOHNOLLOY R-54A.
M-138; 57-60 Cu, 0.5-1.5 Sn, 0.8-2.0 Fe, 0.2-0.5 Mn, 0.1-0.25 Al, 0.2 max Pb, bal Zn.
Hard: 78,000 TS; 55,000 YS; 15 El; 80 Rock B.
Soft: 68,000 TS; 35,000 YS; 25 El; 65 Rock B.
For extruded shapes, hardware, pump rods, clutch discs, valve stems; corrosion resistant, high strength.

BOHNOLLOY R54B.
M-138; 57-60 Cu, 0.5-0.7 Pb, 1 Sn, 1 Fe, 0.35 Mn, bal Zn.
½ H-temper: 78,000 TS; 55,000 YS; 15 El; 150 Brin.
Soft: 68,000 TS; 35,000 YS; 25 El; 116 Brin.
For pump rods, valve stems and bodies, shafts; manganese bronze.

BOHNOLLOY R54C.
M-138; 57-60 Cu, 1.0-1.2 Pb, 1 Sn, 1 Fe, 0.35 Mn, bal Zn.
½ H-temper: 78,000 TS; 55,000 YS; 15 El; 150 Brin.
Soft: 68,000 TS; 35,000 YS; 25 El; 116 Brin.
For pump rods, valve stems and bodies, shafts; manganese bronze, free-cutting.

BOHNOLLOY R-55.
M-138; 56-58 Cu, 2-3 Pb, bal Zn.
Soft: 60,000 TS; 20,000 YS; 30 El; 90 Brin.
For wrought architectural parts, casements, lock bodies, extrusions.

BOHNOLLOY R-56.
M-138; 56-59 Cu, 0.7-1.2 Al, 0.8-1.3 Fe, bal Zn.
Hard: 80,000 TS; 50,000 YS; 12 El; 85 Rock B.
Soft: 70,000 TS; 25,000 YS; 20 El; 70 Rock B.
For wrought architectural shapes, marine hardware; wrought alloy Mn bronze.

BOHNOLLOY R-56C.
M-138; 56.5-58.5 Cu, 0.1-0.25 Mn, 0.2 Al, 0.2 Fe, bal Zn.
Wrought: 60,000-65,000 TS; 20,000-25,000 YS; 30-40 El; 70-80 Brin.
For architectural shapes, door frames; wrought alloy, architectural bronze.

BOHNOLLOY R-57.
M-138; 56-59 Cu, 2.4 Al, 1.0-2.5 Fe, 2.5-4.0 Mn, bal Zn.
Wrought: 95,000-110,000 TS; 40,000-45,000 YS; 15-20 El; 150-180 Brin.
For propellers, gears, shafts; wrought alloy, Mn bronze.

BOHNOLLOY R-58E.
M-138; 58.5-62.0 Cu, 1.5-2.5 Pb, bal Zn.
Forged: 58,000 TS; 23,000 YS; 40 El; 75 Brin.
For forgings; forging brass.

BOHNOLLOY R-59.
M-138, 53-55 Cu, 2.0-2.75 Pb, bal Zn.
Forged: 55,000 TS, 20,000 YS; 25 El.
For brass forgings, screws, studs; used for color matching.

BOHNOLLOY R-60.
M-138; 59-60 Cu, 0.30 max Pb, bal Zn.
Wrought: 75,000 TS; 55,000 YS; 20 El.
Extruded: 50,000 TS; 20,000 YS; 35 El.
For condenser tubes; Muntz metal.

BOHNOLLOY R-60L.
M-138; 59-62 Cu, 0.5-1.0 Sn, 0.4-1.0 Pb, bal Zn.
½ H-temper: 58,000 TS, 25,000 YS; 25 El; 90 Brin.
Hard: 65,000 TS; 40,000 YS; 16 El; 100 Brin.
For hardware, screw machine products, fasteners; leaded naval brass.

BOHNOLLOY R60M.
M-138; 60 Cu, 2 Pb, 0.75 Sn, bal Zn.
½H-temper: 65,000 TS; 48,000 YS; 15 El; 150 Brin.
Soft: 54,000 TS; 24,000 YS; 30 El; 83 Brin.
For bearings, hardware; light loads, free-cutting.

BOHNOLLOY R-60N.
M-138; 60 Cu, 0.75 Sn, 0.2 max Pb, bal Zn.
Wrought: 60,000 TS; 27,000 YS; 30 El; 120 Brin.
Extruded: 60,000 TS; 25,000 YS; 30 El; 98 Brin.
For forgings and tubing, water pump parts; shafts; naval brass.

BOHNOLLOY R-61.
M-138; 60-63 Cu, 2.5-3.7 Pb, bal Zn.
Hard: 60,000 TS; 48,000 YS; 18 El; 75 Rock B.
Soft: 45,000 TS; 18,000 YS; 45 El; 70 Rock B.
For rods, pins, nuts, plugs, screws, valve caps and discs; free cutting, automatic screw machine parts.

BOHNOLLOY R62.
M-138; 61 Cu, 2.85 Pb, bal Zn.
Soft: 52,000 TS; 25,000 YS; 25 El; 100 Brin.
For moderate thread rolling; slight cold working.

BOHNOLLOY R 63.
M-138; 61 Cu, 1-4-1.8 Pb, bal Zn.
Extruded: 55,000 TS; 40,000 YS; 30 El; 90 Brin.
For cold headed parts, hardware, thread rolling; free-cutting.

BOHNOLLOY R-64.
M-138; 63-64.5 Cu, 0.75 Pb, bal Zn.
Extruded: 55,000 TS; 40,000 YS; 30 El; 90 Brin.
For cold headed parts, roll threading, free cutting.

BOHNOLLOY R64R.
M-138, 63 Cu, 1.75 Pb, bal Zn.
For swaged, riveted and rolled parts; free-cutting

BOHNOLLOY R65.
M-138, 62.5 Cu, 1.25 Pb, bal Zn
For spun and swaged parts; free-cutting and good workability.

BOHNOLLOY R66.
M-138; 61 Cu, 3.5 Pb, bal Zn
For screw machine products, fasteners; free-cutting

BOHNOLLOY R67
M-138; 60 Cu, 0.75 Pb, 0.8 Si, 2.5 Mn, bal Zn.
½ H-temper: 78,000 TS; 40,000 YS; 10 El; 150 Brin.
For bearings, bushings, free-cutting.

BOHNOLLOY R68
M-138; 60 Cu, 0.75 Pb, 0.80 Si, 2.5 Mn, bal Zn
½ H-temper: 74,000 TS, 40,000 YS, 12 El, 150 Brin.
For bearings, bushings; free-cutting.

BOHNOLLOY R69.
M-138; 60 Cu, 0.8 Si, 2.5 Mn, bal Zn.
Hard: 78,000 TS; 60,000 YS; 9 El, 165 Brin
Soft: 60,000 TS; 30,000 YS, 30 El, 80 Brin.
For bearings, bushings; good ductility.

BOHNOLLOY R-71
M-138, 58-61 Cu, 2-4 Mn, 1-2 Al, 0.6-1.0 Si, bal Zn.
½ hard: 78,000 TS; 67,000 YS, 15 El, 80 Rock B.
Soft. 40,000 TS; 34,000 YS; 20 El; 65 Rock B.
For synchromesh rings, gears, bearings, bushings, forgeable bearing alloy.

BOHNOLLOY R93.
M-138; 91 Cu, 12 Si, 7 Al.
Soft: 85,000 TS, 35,000 YS; 25 El; 160 Brin.
For pole line hardware, nuts, bolts, corrosion resistant.

BOKEBIT.
M-345; 0.80 C, 4.24 Cr, 18.8 W, 8 Mo, 2 V, 9 Co, bal Fe.
For tools, cutters; high speed steel.

BOKER POWER CHISEL.
M-345; 0.53 C, 2 W, 1.3 Cr, 0.25 V, 0.3 Mn, bal Fe.
For tools, chisels, crimpers, upsetters; oil hardened, shock resistant.

BOKER SPECIAL NO. 847.
M-345; 0.8 C, 4 Cr, 8.5 Mo, 1.5 W, 1.1 V, bal Fe.
For cutters, reamers, hobs, taps, drills, broaches; Type M1; high speed steel.

BOKER SUPER COBALT.
M-345; 0.8 C, 4.2 Cr, 19 W, 0.8 Mo, 2 V, 12 Co, bal Fe.
For tools, cutters; high speed steel.

BOLONEY.
M-714; Sn, Pb, bal Cu.
For bearings; heavy duty.

BOLSTER SILVER.
Eng.; 65.5 Cu, 16 Zn, 18 Ni, 0.5 P.
For ornaments, hardware, spun and drawn.

BOLTON 1% TIN BRONZE.
M-575; 1 Sn, P, bal Cu.
For telephone and telegraph wire; high electrical conductivity.

BOLTON 1.5% TIN PHOSPHOR BRONZE.
M-575; 1.5 Sn, 0.15 P, bal Cu
Annealed. 39,200 TS; 11,000 YS, 62 El; 70 Brin.
Hard: 61,500 TS, 53,500 YS; 22 El, 140 Brin
For flexible tubing; corrosion resistant.

BOLTON 2.5% TIN PHOSPHOR BRONZE.
M-575; 2.5 Sn, 0.035 P, bal Cu.
Annealed: 44,000 TS; 13,500 YS; 57 El, 80 Brin.
Hard: 68,000 TS; 59,600 YS, 21 El; 157 Brin.
For rotor bars for motors, high electrical conductivity.

BOLTON NO. 10 PHOSPHOR BRONZE
M-575; 5 Sn, 0.15 P, bal Cu
Annealed: 49,500 TS, 20,200 YS, 64 El, 85 Brin.
Hard: 88,000 TS, 69,500 YS, 20 El; 210 Brin
For spring contacts, worm gears, bolts, fuse clips, corrosion resistant, high strength

BOLTON NO 11 PHOSPHOR BRONZE
M-575, 6 Sn, 0.15 P, bal Cu
Annealed. 52,000 TS, 17,500 YS, 68 El, 82 Brin
Hard. 117,000 TS, 102,000 YS, 3.5 El, 241 Brin
For springs, electrical contacts, strong and corrosion resistant

BOLTON NO. 12 PHOSPHOR BRONZE.
M-575, 3.5 Sn, 0.06 P, bal Cu.
Annealed: 44,500 TS, 14,500 YS, 62 El, 79 Brin
Hard: 79,500 TS, 69,500 YS, 18 El, 180 Brin
For rotor bars for motors, corrosion resistant

BOLTON NO 14 PHOSPHOR BRONZE
M-575; 10 Sn, 0.035 P, bal Cu
Annealed. 62,500 TS, 25,000 YS, 67 El, 105 Brin
Hard 106,300 TS, 78,000 YS, 21 El; 235 Brin.
For springs, bellows; wear and corrosion resistant

BOLTON NO 15 PHOSPHOR BRONZE
M-575, 8 Sn, 0.15 P, bal Cu
Annealed: 54,300 TS, 22,000 YS, 77 El; 93 Brin
Hard 97,500 TS, 76,000 YS, 20 El, 232 Brin.
For diaphragms, bellows, high strength, corrosion resistant.

BOLTON NO 16 PHOSPHOR BRONZE.
M-575; 7 Sn, 0.25 P, bal Cu
Wire: 123,000 TS
For wire cloth for paper making equipment, corrosion resistant, high strength.

BOLTONS "SPECIAL" BEARING METAL.
M 575.
For bearings, bushing.

BONDED CARBIDE JR.
M-140; 0.77 C, 0.2 Mn, 4.25 Cr, 1.9 V, 18.5 W, 0.75 Mo, 7.8 Co, bal Fe.
For tools, dies, lathe and planer tools; high speed steel.

BONDED CARBIDE SR.
M-140; 0.7 C, 0.2 Mn, 4.5 Cr, 1.5 V, 18 W, 0.7 Mo, 10 Co, bal Fe.
For tools, dies, cutters, drills, taps, reamers; high speed steel.

BONDUR.
M-116; 3.5-5.5 Cu, 0.3-0.5 Si, 0.25-1.0 Mn, 0.2-0.7 Mg, bal Al.
Annealed: 31,000 TS; 15 El.
Heat treated: 65,000 TS; 43,000 YS; 16 El; 125 Brin.
For light alloy parts, aircraft parts; age-hardening, Duralumin type alloy.

BONDUR.
M-1548; 3.5-5.5 Cu, 0.4 Si, 0.3-1.0 Mn, 0.2-0.7 Mg, bal Al.
Heat Treated: 74,000-80,000 TS, 57,000-63,000 YS; 8-12 El; 130-150 Brin.
For structural components, transportation equipment, fittings, fasteners Age hardenable, high strength.

BONDURPLATE
M-116; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al, clad with 0-1.5 Mn, 0-1.0 Mg, 0-1.2 Si, bal Al.
Aged: 55,000-60,000 TS; 35,000-45,000 YS; 20-15 El.
For aircraft construction, wings, fuselage; age-hardenable clad alloy.

BONDWICH.
M-926; shim material with silver brazing alloy clad on both sides.
For sandwich brazing of carbide tipped cutting tools, shim absorbs stresses during brazing and cutting

BONNEY-FLOYD 4-6 Cr-Mo
M-139, 0.21-0.35 C, 4-6 Cr, Mo, Cu, bal Fe.
For heat and corrosion resistant parts, heat and corrosion resistant

BONNEY-FLOYD NIRRESIST.
M-139, 1.1 min C, 16-23 Ni, 5-7 Cu, Cr, bal Fe
For heat and corrosion resistant parts, heat and corrosion resistant

BOOTH 20S
M-338, 56-62 Cu, 0.75 Fe, 1.25 Mn, 0.5 Pb, 0.5 Sn, bal Zn.
70,000 TS, 30,000 YS, 28 El, 120 Brin.
For extrusions, corrosion resistant.

BOOTH 20SA
M-338; 57-58 Cu, 0.75 Fe, 1.0-1.2 Mn, bal Zn.
70,000 TS, 30,000 YS, 25 El, 120 Brin
For extrusions, corrosion resistant

BOOTH 76A
M-338, 1.8-2.5 Al, 76-78 Cu, bal Zn
60,000 TS, 20,000 YS, 30 El, 70 Brin
For condenser tubes, corrosion resistant.

BOOTH A1
M-338, 55-60 Cu, 2.0-3.5 Pb, bal Zn.
Annealed: 60,000 TS, 30,000 YS, 30 El; 100 Brin.
Cold drawn: 75,000 TS, 60,000 YS; 20 El; 170 Brin
For screws, nuts, bolts; free cutting

BOOTH AD.
M-338; 70-72 Cu, 1.0 Sn, bal Zn.
54,000 TS; 18,000 YS; 45 El; 65 Brin.
For tubes; corrosion resistant.

BOOTH ADA.
M-338; 70-72 Cu, 0.01-0.05 As, 1.0 Sn, bal Zn.
56,000 TS, 18,000 YS; 40 El; 75 Brin.
For condenser tubes; embrittlement free.

BOOTH ALM.
M-338; 1.2 Mn, bal Al.
Rolled: 25,800 TS; 3 El.
For cooking utensils; good corrosion resistance.

BOOTH B1.
M-338; 56.5-60.0 Cu, 1.0-2.5 Pb, bal Zn.
Annealed: 60,000 TS; 25,000 YS; 40 El; 35 RA; 100 Brin.
Cold drawn: 70,000 TS; 50,000 YS; 25 El; 170 Brin.
For screws, bolts, nuts; free cutting.

BOOTH B2C.
M-338; 58-61 Cu, 0.75 Pb, bal Zn.
60,000 TS; 24,000 YS; 35 El; 100 Brin.
For extrusions; free-cutting.

BOOTH B76
M-338, 61-63 Cu, 1.5-2.0 Pb, bal Zn.
Annealed: 55,000 TS, 20,000 YS, 40 El; 80 Brin.
Cold drawn: 66,000 TS, 35,000 YS; 25 El; 150 Brin.
For hardware, free cutting.

BOOTH CAP COPPER.
M-338, 96.0-97.5 Cu, bal Zn.
Soft: 35,000 TS, 50 El, 35 Brin
Hard: 50,000 TS; 10 El, 80 Brin.
For small pressings, red brass

BOOTH J5K.
M-338; 56-62 Cu, 0.75 Fe, 0.75 Mn, 0.5 Pb, 1.2-2.0 Sn, bal Zn
75,000 TS, 30,000 YS, 25 El, 120 Brin.
For extrusions; free-cutting.

BOOTH MG1
M-338, 1.0 Mg, 0.2 Mn, bal Al
Rolled: 31,400 TS, 3 El
For light alloy parts, good forming and corrosion resistance.

BOOTH MG2
M-338, 0.15 Mn, 2.5 Mg, 0.5 max Fe, 0.4 max Si, bal Al
Soft 26,000 TS 15,000 YS, 18 El.
Hard 36,000 TS, 26,000 YS, 8 El.
For welded vessels, architectural trim, weldable, corrosion resistant

BOOTH M G. 3.
M-338, 0.15 Cu, 3-4 Mg, 0.6 Si, 0.7 Fe, 1 Mn, 0.5 Cr, 0.2 Ti, bal Al
O-temper: 31,400 TS, 13,500 YS, 18 El
¼ H-temper: 38,100 TS, 26,500 YS, 8 El.
For structural members, corrosion resistant.

BOOTH MG5
M-338, 0.6 max Fe, 4.5-5.5 Mg, 0.15 Mn, bal Al.
Annealed: 38,000 TS, 18,000 YS, 18 El, 40 RA.
¼ H-temper: 43,000 TS, 30,000 YS, 8 El; 60 RA.
For rivets, marine parts, not hardenable, corrosion resistant

BOOTH MG7
M-338, 7 Mg, 0.6 Fe, 0.15 Cu, 0.6 Si, 0.2 Ti, bal Al.
Annealed: 50,000 TS, 24,000 YS, 26 El, 70 RA.
Hard: 70,000 TS, 62,000 YS, 4 El; 115 RA.
For rivets, light alloy parts; weldable and ductile.

BOOTH MV3
M-338, 59-61 Cu, 2-3 Pb, bal Zn.
Annealed: 60,000 TS; 20,000 YS, 30 El; 100 Brin.
Cold drawn 70,000 TS; 50,000 YS; 2 El, 160 Brin.
For screws, bolts, nuts; free cutting.

BOOTH T2.
M-338; 2-3 Al, 54-56 Cu, 0.5 Fe, 1.0 Mn, 1.5-2.0 Pb, bal Zn.
80,000 TS; 40,000 YS; 15 El; 150 Brin.
For extrusions; corrosion resistant.

BOOTH YDA.
M-338; 57-59 Cu, 0.5 Fe, 1.0-1.5 Mn, 0.5 Ni, 1.0 Sn, bal Zn.
70,000 TS; 30,000 YS; 25 El; 120 Brin.
For extrusions; corrosion resistant.

BOOTH YDB.
M-338; 50-61 Cu, 0.75-1.00 Pb, bal Zn.
Annealed: 55,000 TS; 20,000 YS; 40 El; 80 Brin.
Cold drawn: 70,000 TS; 40,000 YS; 25 El; 150 Brin.
For hardware; free cutting.

BORA.
M-459; 2 C, 12 Cr, 0.7 W, bal Fe.
For high duty blanking and forming dies; oil hardened, non-deforming.

BORA 5.
M-459; M-1496; 1.0 C, 5.0 Cr, 1.0 Mo, 0.4 Mn, 0.4 V, bal Fe.
Annealed: 103,000 TS; 51,000 YS; 26 El; 18 Rock C.
Hardened: 178,000-255,000 TS; 145,000-200,000 YS; 3-12 El; 7-32 RA; 41-53 Rock C.
For blanking and trimming dies, shear blades, broaches, rolling dies, gauges.
Type A2 air hardening, nondeforming cold work tool steel, tough.

BORA 12.
M-459; 2.0 C, 12 Cr, bal Fe.
For shear blades, blanking and forming dies; oil hardened, nondeforming.

BORA 318.
M-459; 2.1 C, 13 Cr, 0.4 Mo, 0.7 W, 1 Co, bal Fe.
For cutting tools, blanking and forming dies; oil hardened, nondeforming.

BORA SPECIAL M.
M-459; 1.6 C, 12 Cr, 0.7 Mo, 0.4 V, 0.5 W, bal Fe.
Hardened: 62-66 Rock C.
For punches, blanking and forming dies, cold forming and thread rolling dies.
Air hardening, non-deforming.

BORAL.
M-44, M-1395; B,C, Al.
For aircraft engine shielding, neutron curtains; absorbs thermal neutrons.

BORA SPECIAL.
M-459; 1.6 C, 0.4 Mn, 12 Cr, 0.2 V, bal Fe.
For blanking dies; nondeforming.

BORCHER ALLOY.
Eng.; 24 Ni, 32.5 Cr, 0.5 Ag, 1.8 Mo, bal Fe.
For chemical apparatus, crucibles, pyrometer tubes; heat and corrosion resistant.

BORCHER ALLOY 1.
U.S.; 30 Cr, 35 Co, 35 Ni.
For chemical apparatus; heat and corrosion resistant.

BORCHER ALLOY 2.
U.S.; 36 Cr, 60 Fe, 4 Mo.
For heat treating and annealing pots; heat and corrosion resistant.

BORCHER ALLOY 3.
U.S.; 65 Cr, 35 Fe.
For pyrometer tubes, crucibles; heat and corrosion resistant.

BORCHER ALLOY 4.
U.S.: 34 Co, 34 Ni, 30 Cr, 2 Ag.
For chemical apparatus; heat and corrosion resistant.

BORCHER ALLOY 5.
U.S.; 35 Co, 35 Ni, 30 Cr, 0.5-5.0 Mo.
For heat resisting parts, annealing pots; heat and corrosion resistant.

BORCHER'S "A."
65-68 Ni, 30 Cr, 0.5-5.0 Au, 0.25-1.5 Ag.
For resistances, heat and corrosion resistant parts; heat and corrosion resistant.

BORCHER'S "B."
52-68 Ni, 30 Cr, 0.15-1.5 Ag, bal Au.
For heat and corrosion resistant parts; heat and corrosion resistant.

BORCOLOY GR. 5.
M-1004; B, 12 Co, bal Fe.
For tools, cutters, discontinued.

BORCOLOY GR. 7.
M-1004; B, Co, bal Fe.
For tools, cutters; discontinued.

BORE 2.
M-111; 1.1 C, 0.3 Cr, 1 W, 0.1 V, bal Fe.
For twist drills, finishing cutters; water hardened.

BORE 2 LEDLOY.
M-111; 1 1 C, 0.3 Cr, 1 W, 0.1 V, 0.2 Pb, bal Fe.
For twist drills, punches; water hardened.

BORITE.
M-333; 1-1.2 C, bal Fe.
For tools, drills; water hardening.

BORITE HOLLOW
M-333; 0 70 C, 0 20 Si, 0.20 Mn, bal Fe.
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 360 Brin.
For drills, tools, springs, hammers; Type W1, water hardened.

BORITE SOLID DRILL.
M-333; 0.75 C, 0.20 Si, 0.20 Mn, bal Fe.
For moil points; blacksmith tools; shock resistant

BORIUM.
M-202; WC+ W_2C.
For welding rod for hard facing, hard inserts; hard and abrasion resisting.

BOROBEST 2D.
M-1343; 0.20 C, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El, 55 RA; 195 Brin. For cutlery, turbine blades, surgical instruments, Type 420; stainless, hardenable.

BOROBEST 4K.
M-1343, 0.40 C, 13 Cr, bal Fe
Annealed: 95,000 TS; 50,000 YS, 20 El; 50 RA; 200 Brin.
For cutlery, valves, surgical instruments; Type 420; stainless, hardenable.

BOROD.
M-202; 62 WC+ 38 steel.
For welding rod for hard facing, hard and abrasion resisting.

BOROLITE.
M-1284; Boron carbide.
For cutting tools; sintered carbide.

BORON DEOXIDIZED COPPER 109.
M-8; 0.01 B, bal Cu.
Hard. 48,000 TS; 40,000 YS; 6 El; B 50 Rock.
Soft: 33,000 TS; 10,000 YS; 45 El; F 45 Rock.
For electrical and electronic parts, magnetrons, synchrotons, vacuum switchgear.
Resists oxide penetration and thermal stress cracking. Resists grain growth.

BORON DEOXIDIZED COPPER 1170.
M-8; 0.01 B, bal Cu.
Hard: 48,000 TS; 40,000 YS; 6 El; B 50 Rock.
Soft: 33,000 TS; 10,000 YS; 45 El; F 45 Rock.
For electrical and electronic parts, magnetrons, synchrotons, vacuum switchgear.
Resists oxide penetration and thermal stress cracking. Resists grain growth.

BORON STAINLESS STEEL.
M-901; 0.08 max C, 17-19 Cr, 8-12 Ni, 1.2 B, bal Fe.
Annealed: 90,000 TS; 50,000 YS; 10-25 El; 185 Brin.
For thermal neutron shields and control rods; austenitic, stainless, absorbs thermal neutrons.

BORON STEEL.
U S.; 0.06-0 4 B, 0.45-0.16 C, Al, Si, Mn, bal Fe.
For structural and machine parts; water hardening.

BORON-T.
M-50, M-1414; 0.40 C, 1.6 Mn, 0 8 max Ni + Cr + Mo, 0.003 B, bal Fe.
Oil harden: 116,000-160,000 TS; 95,000-152,000 YS; 18-27 El, 48-57 RA; 24-70 Iz.
For fasteners, crankshafts, axles, shafts, gears, pinions
Oil hardening, impact resistant

BOROSIL.
M-398; 3-4 B, 38-42 Si, bal Fe.
For boron additions to steel.

BOROTAL Z7.
German; 3-4 Cu, 2 max Fe, 3 max Pb, 3 max Zn, 0.1 graphite, bal Al
For bearings.

BOROTEC 10009.
M-717;
Nickel base alloy powder for overlays on steel, stainless and nickel base alloys.

BOROTO B K.
Germany, graphitic white metal.
31 Brin.
For bearings; for high stresses.

BOROTO B L
Germany; graphitic white metal.
35 Brin.
For bearings; high friction and heavy torque.

BOROTO B N.
Germany; graphitic white metal
18 Brin
For bearings; for high speeds.

BOROTO B R.
Germany, graphitic white metal.
27 Brin.
For bearings, high friction and speed.

BOSCH Al 1
M-304; 2 5-5.0 Cu, 0 2-1.8 Mg, 0 3-1.5 Mn, bal Al.
For aircraft structures, age hardenable

BOSCH (Al-5).
M-304; 6 Cu, 3 Si, bal Al
Sand cast: 21,200 TS; 1-2 El.
Chill cast: 24,400 TS, 1-2 El, 80 Brin.
Die cast 28,000 TS, 1-2 El.
For Al castings, very good machinability

BOSCH (Al-7).
M-304; 89 Al, bal Zn + modifying agent
Annealed: 36,000 TS; 20 El.
Soft drawn 42,500 TS, 12 El, 30 RA; 85 Brin.
For parts for machinery and apparatus, pressed, forged and drawn parts; ages at room temperature.

BOSCH (Al-9)
M-304; 4 Cu, 2 Si, 1.5 Ni, bal Al
Die cast: 28,000 TS; 2 El; 80 Brin.
For ordinary die cast parts, good fluidity.

BOSCH Al 12.
M-304; 99.5 Al.
Annealed: 13,000 TS; 5000 YS; 45 El; 23 Brin.
Hard: 24,000 TS; 22,000 YS; 15 El; 44 Brin.
For structures, machine tool parts; corrosion resistant.

BOSCH (Al-20).
M-304; 88 El, 11 Zn, 0.5 Mg.
Annealed: 46,000 TS; 36,000 YS; 18 El; 25 RA.
Pressed: 50,000 TS; 18 El; 20 RA; 100 Brin.
For high quality parts for fine mechanism; good hot working properties.

BOSCH Al 24.
M-304; 0.6-1.4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, 0.3 max Cr, bal Al.
Annealed: 21,000 TS; 8000 YS; 24 El; 36 Brin.
Hard: 32,000 TS; 29,000 YS, 6 El.
For structural members.

BOSCH Al 25.
M-304; 4.0-5 5 Mg, 0.8 max Mn, 0 3 max Cr, bal Al.
Annealed: 42,000 TS; 22,000 YS; 35 El; 65 Brin.
For light alloy parts, marine structures; resists gasoline corrosion.

BOSCH Al 27.
M-304; 2.5-5.0 Cu, 0 2-1.8 Mg, 0.3-1.5 Mn, Pb, Sn, Cd, Bi, bal Al.
For screw machine products; free-cutting.

BOSCH Al 29.
M-304; 6-10 Mg, 0.2-0.7 Mn, 1.5 max Fe, bal Al.
For gasoline meters, aircraft parts; corrosion resistant

BOSCH (Al-34).
M-304; 89 Al, 11 Cu.
Chill cast 21,000 TS; 1-2 El; 80 Brin.
Sand cast: 20,000 TS; 1-2 El; 75 Brin.
For automobile pistons, sand and permanent mold parts; good machinability.

BOSCH (Al-36).
M-304; 89 Al, 6 5 Cu, 3.5 Ni.
Annealed: 19,000 TS, 1-2 El.
Die cast: 27,000 TS, 2 El; 80 Brin.
For die castings, good fluidity and machinability.

BOSCH Al 39
M-304, 1.0-1 5 Mn, 0.3 max Cr, bal Al
Annealed: 16,000 TS; 6000 YS; 40 El; 28 Brin.
Hard 29,000 TS, 27,000 YS, 10 El; 55 Brin.
For light alloy tanks, formed parts; good formability and corrosion resistance.

BOSCH Al 42
M-304; 5.0 6 5 Si, 2-3 Cu, 0.2-0.6 Mn, 1.5 max Fe. bal Al.
For light alloy parts, high corrosion resistance.

BOSCH AM-14.
M-304; 90 Cu, 10 Al.
Pressed. 85,000 TS; 25 El; 150 Brin
For parts exposed to H_2SO_4 and HNO_3; acid resistant.

BOSCH AM-158.
M-304; 1.5 Mn, bal Al.
Pressed: 17,800 TS, 20 El, 50 RA; 35 Brin.
Drawn 21,300 TS, 6 El; 30 RA; 50 Brin.
For rods, tubes, pressings; corrosion resistant.

BOSCH (An-4).
M-304; 4 Zn, 3 Cu, balance Al plus modifying agent.
Die cast 50,100 TS; 2 El; 110 Brin.
For die castings; high tensile and bending strength.

BOSCH (Br-6).
M-304; 66 Cu, 6 Sn, bal Zn.
Pressed: 50,000 TS; 0 5 El, 140 Brin.
For bearings subject to heavy loads and wear; hard, dense bronze

BOSCH (Br-14).
M-304; 86 Cu, 10 Sn, 2 Zn, 2 Pb.
Sand cast. 36,000 TS; 6 El; 80 Brin.
For bearings, phosphor bronze castings; corrosion and high wear resistant, tough, hard.

BOSCH (Br-32).
M-304; 76 Cu, Al, Ni, Fe, Mn.
Pressed: 120,000 TS; 72,000 YS; 0.5 El; 20 RA; 250 Brin. For gears, forged parts; special bronze; wear resistant.

BOSCH (Cu-28).
M-304; 99.9 Cu.
Annealed: 40,300 TS; 40 El.
Pressed: 33,000 TS; 40 El; 60 RA; 50 Brin.
For bars, shapes, tubes, pressed parts; electrolytic copper; corrosion resistant.

BOSCH (Me-1).
M-304; 58 Cu, 1.8 Pb, bal Zn.
Annealed: 67,000 TS; 27 El; 30 RA; 115 Brin.
Pressed: 62,500 TS; 18 El; 20 RA; 105 Brin.
For hot pressed parts for machines, apparatus and equipment; easily workable.

BOSCH (Me-2).
M-304; 58 Cu, 2.2 Pb, bal Zn.
Annealed: 67,000 TS; 30 El; 35 RA; 110 Brin.
Soft drawn: 72,000 TS; 20 El; 40 RA; 130 Brin.
For automatic parts, spring boxes, ornamental and hot pressed parts; easily workable.

BOSCH (Me-3).
M-304; 59 Cu, 2.5 Pb, bal Zn.
Pressed: 65,000 TS; 30 El; 38 RA.
Soft drawn: 72,000 TS; 20 El; 25 RA; 120 Brin.
For screws and turned parts for fine work, clock manufacture; somewhat cold workable.

BOSCH (Me-4).
M-304; 59 Cu, 1 Pb, bal Zn.
Pressed: 65,000 TS; 30 El; 45 RA.
Soft drawn: 72,000 TS; 20 El; 25 RA; 100 Brin.
For wire, hot pressed and forged parts; can be cold drawn.

BOSCH (Me-5) RIVET BRASS.
M-304; 62 Cu, 0.5 Pb, bal Zn.
Pressed: 58,000 TS, 40 El; 60 RA.
Soft drawn: 65,000 TS; 30 El.
For clock manufacture and fine mechanical work, rivets, tubes; cold workable.

BOSCH (Me-6) (BOSCH SPECIAL)
M-304, 57 Cu, some Ni and Mn, bal Zn.
Pressed: 72,000 TS; 30 El; 40 RA
Soft drawn: 78,500 TS; 20 El.
For piston rods, screws, valve spindles, condenser shells; corrosion resistant to sea water.

BOSCH ME-15.
M-304; 78 Cu, 4 Pb, 3 Sn, bal Zn
Sand cast: 32,000 TS; 15 El; 70 Brin.
For housings, fittings; free cutting.

BOSCH (Me-16).
M-304; 61.5 Cu, 2 Pb, bal Zn.
Pressed: 50,000 TS; 35 El; 40 RA; 80 Brin.
Soft drawn: 58,000 TS; 30 El; 40 RA; 90 Brin
For rods, bars, and shapes handled by automatic machinery; cold workable.

BOSCH (Me-17).
M-304; 63 Cu, bal Zn.
Pressed: 46,000 TS, >40 El; 55 RA; 75 Brin.
Soft drawn: 55,000 TS; >35 El; 50 RA; 85 Brin.
For cold formed rods and shapes, rivets; excellent cold forming.

BOSCH (Me-25) (BOSCH METAL).
M-304; 57 Cu, Mn, Al, Ni, bal Zn.
Pressed: 86,000 TS; 15 El; 20 RA; 135 Brin.
Soft drawn: 94,000 TS; 12 El; 15 RA; 155 Brin.
For bushings, bars, shapes; resists sea water corrosion and wear.

BOSCH NS-1.
M-304; Cu, Ni, Fe, Mn.
Pressed: 85,000 TS; 30 El; 30 RA; 150 Brin.
Hard: 100,000 TS; 15 El; 20 RA; 180 Brin.
For plates of nickel color; corrosion resistant.

BOSCH Pb-7.
M-304; 74 Pb, 10 Sn, 15 Sb, 1 Cu.
Cast: 8000 TS; 30 Brin.
For bearing shells; anti-friction

BO-STAN.
M-1469; 98.7 Type 304 stainless, 1.2 B, bal Fe.
Annealed: 104,500 TS; 7.5 El; 5.5 RA; 220 Brin.
Cold worked: 420 Brin.
For pressurized water reactors and controls; sintered, corrosion and heat resistant.

BOUND BROOK
M-632; Sn, P, graphite, bal Cu.
For bearings, bushings; sintered

BOURBOUNFS
Eng., 51 Sn, 49 Al, 0.3 Fe, 0.3 Cu

BOW AND ARROW.
M-233; 0.9 C, bal Fe.
For tools, dies, water hardened.

BOWCO.
M-336, C, W, Mn, Cr, V, Mo, Co, bal Fe.
For reamers, punches, dies, stamping and cutting tools, high speed steel

BOWCO 7720.
M-336, C, Cr, Mn, Mo, bal Fe.
For blanking dies, oil hardening

BOWCO COBALT
M-336, C, W, Co, Mn, Cr, V, Mo, bal Fe.
For tools for trimming and heavy cutting on hard and abrasive material, high speed steel

BOWCO FAST FINISHING
M-336, 1.3 C, 1.8 Cr, 4 W, 0.2 V, bal Fe.
For dies, cutting tools, oil hardening

BOWCO NON-SHRINK
M-336, 0.9 C, 1.2 Mn, 0.5 Cr, 0.5 W, 0.35 Si, bal Fe
For tools, dies, oil hardening, non-deforming

BOWCO OIL HARDENING
M-336, 0.9 C, 1.3 Mn, 0.5 Cr, 0.5 W, 0.1 V, bal Fe.
For thread gages, taps, dies, non-shrinking

BOWCO ONE STAR
M-336; 0.7 C, 14 W, 4 Cr, 2 V, bal Fe
For tools, cutters for intermittent cutting, high speed steel

BOWCO WATER HARDENING TUBING
M-336, 1.0-1.1 C, bal Fe
For forming and blanking dies, water-hardened.

BOWER 315
M-709, M-97, 0.10-0.15 C, 0.5 Mn, 0.3 Si, 2.8 Ni, 1.5 Cr, 5.0 Mo, bal Fe
For bearings for service up to 600°F, case hardened.

BOWSTEEL FC.
M-1434; 1.0 C, 0.25 V, bal Fe
For tools, cutters, taps, reamers, Type W2; water hardened.

BOWSTEEL FCCR.
M-1434, 1.5 C, 12 Cr, 1 Mo, 3 Co, bal Fe.
For blanking and forming tools and dies, Type D5, air hardened, non-deforming

BOWSTEEL FND.
M-1434, 0.90 C, 1 Mn, 0.5 Cr, 0.5 W, bal Fe.
For dies, punches, broaches, taps, hobs; Type O1; oil hardened, non-deforming.

BOW WIRE.
Eng.; 93 Cu, 2 Zn, 5 Sn.
For corrosion resistant wire, corrosion resistant.

BOYD.
M-1705; 0.75 C, 0.75 Mn, 0.9 Cr, 1.75 Ni, 0.35 Mo, bal Fe.
Tool steel, miscellaneous applications as dies, wood working tools, shears. AISI L6.

BOYD-WAGNER NO. 4 SWEDISH.
M-336; 1.05 C, 0.5 Cr, 0.1 V, bal Fe.
For wood and machine screw cold header dies, water hardening.

BOYD-WAGNER NO 9 SWEDISH.
M-336, 0.9 C, 0.5 Cr, bal Fe.
For large cold header dies, water hardening.

BOYD-WAGNER NO 41 SWEDISH
M-336; 0.7 C, 0.6 Mn, bal Fe.
For chipping chisels; water hardening.

BOYD-WAGNER B-W POINT 5.
M-336, 0.02 C, 0.18 Mn, trace Si, 0.012 S, 0.004 P, bal Fe.
For plastic molds, white metal, die casting dies; water hardening.

BOYD-WAGNER CHROME MAGNET.
M-336, C, Cr, bal Fe.
For magnets, magnet steel.

BOYD-WAGNER EZ9W.
M 336, 0.35 C, 5 W, bal Fe
For punches, shear tools, gripper dies, hot work steel, oil hardened

BOYD WAGNER TUNGSTEN MAGNET.
M-336, C, W, bal Fe
For magnets, magnet steel.

B QUALITY
M-618, high C, W, Cr, bal Fe.
For die blank, cold drawing, dies, oil hardening.

BR 2 FM DIL STEEL
M-73, 2.5 C, 0.3 Si, 0.75 Mn, 5.25 Cr, 1.1 Mo, 4.5 V, bal Fe
Hardened C 55-66 Rock.
For dies, brick and tile mold liners and sleeves requiring extreme abrasion resistance, air hardenable, good temperature resistance.
BR-3 see Latrobe BR3
BR-4 FM see Latrobe BR-4FM.

BRAEBURN A T 2
M-140, 2.2 C, 12 Cr, 0.25 V, 0.9 Mo, bal Fe
Hardened: C 63-65 Rock
For blanking and forming dies, gauges, trimmer and drawing dies, lathe centers, brick mold liners.
Cold work Type D4, oil or air hardening.
High abrasion resistance.

BRAEBURN-BDM.
M-140, 0.30-0.35 C, 0.8 Mn, 0.5 Si, 1.7 Cr, 0.4 Mo, bal Fe
Hardened: C 36-42 Rock.
For extrusion and die casting dies, machined plastic molds, holder blocks, compression molding dies.
Oil hardening, tough.

BRAEBURN COBALT.
M-140; 0.65-0.73 C, 3.75-4.25 Cr, 0.85-1.0 V, 17.5-18.5 W, 4-4.5 Co, 0.75-1.0 Mo, bal Fe.
For tools and cutters for lathe and planer work; high speed steel.

BRAEBURN EXTRA.
M-140; 0.7-1.0 C, 0.25 Si, 0.25 Mn, bal Fe.
For drills, reamers, cutters; water hardened.
Type W1.

BRAEBURN H.C.A.
M-140; 0.30 C, 12 Cr, 1.2 W, 0.9 V, bal Fe.
For master hobs, brass extrusion dies, die casting dies; hot work steel, oil hardened.

BRAEBURN M-7.
M-140, 1.0 C, 3.75 Cr, 2.05 V, 1.75 W, 8.75 Mo, bal Fe.
For broaches, reamers, end mills, counterbores; high speed steel.

BRAEBURN M-10.
M-140; 0.88 C, 4 Cr, 8 Mo, 2 V, bal Fe.
For milling cutters, end mills, form tools, taps, high speed steel

BRAEBURN S.O.D.
M-140; 0.95 C, 1.65 Mn, 0.15 V, bal Fe.
For dies, tools, punches, non-deforming.

BRAEBURN SPECIAL
M-140, 0.7-1.4 C, 0.25 Mn, 0.25 Si, bal Fe.
For shears, reamers, drills, punches, hobs, broaches, water hardened; Type W1.

BRAEBURN STANDARD.
M-140, 0.60-1.4 C, 0.25 Si, 0.30 Mn, bal Fe.
For drills, taps, shear knives, reamers, broaches, Type W1; water hardened.

BRAEBURN T-15.
M-140; 1.5 C, 13 W, 4.5 Cr, 4.75 V, 5.0 Co, bal Fe.
Hardened C 65-67 Rock.
For lathe tools, form cutters, drills, broaches, boring tools, punches, milling cutters.
Type T-15 high-speed steel High red-hardness.
Abrasion resistant.

BRAECUT
M-140, 1.15 C, 4.25 Cr, 2.25 V, 5.25 W, 12 Co, 6.25 Mo, bal Fe.
For cutting tools for high temperature alloys, high speed steel

BRAEFOUR
M-140, 1.25 C, 4.5 Cr, 4 V, 5.5 W, 4.5 Mo, bal Fe.
Hardened: C 64-66 Rock.
For cutting, finishing and form tools, broaches, end mills, hobs, gauges, lathe and planer tools, reamers.
Type M-4 high speed steel, excellent abrasion resistance and high red-hardness

BRAEMAX
M-140, 1.1 C, 1.5 W, 9.5 Mo, 3.75 Cr, 1.15 V, 8 Co, bal Fe.
Hardened: C 66-70 Rock.
For broaches, form cutters, hobs, end mills, milling cutters, gear shaper cutters, taps.
High-speed steel. High red-hardness and abrasion resistance.

BRAEMOW M-2.
M-140; 0.8 C, 0.2 Mn, 4.2 Cr, 2 V, 6.5 W, 5.0 Mo, bal Fe.
For tools, cutters; high speed steel.

BRAEMOW SPECIAL.
M-140, 0.65 C, 5 Mo, 6.5 W, 4.2 Cr, 1.9 V, bal Fe.
Heat treated. 550-640 Brin
For planing and shaping tools, high speed steel.

BRAETUF.
M-140; 1.15 C, 4.0 Cr, 2.0 V, 5.0 W, 6.75 Mo, 7.25 Co, bal Fe.
Hardened: C 69 Rock.
For cutting tools for machining tough superalloys, cold extrusion punches, broaches, reamers, milling cutters, drills.
Modified Type M44; high-speed steel.

BRAEVAC 718.
M-140; 0.06 C, 0.05 Mn, 18-19 Cr, 53 Ni, 3 Mo, 5.2 Cb + Ta, 1.0 Ti, 0.5 Al, 0.004 B, bal Fe.
Ht. Tr.: 200,000 TS; 177,000 YS; 22 El.
At 1200°F: 167,000 TS; 148,000 YS; 20 El.
For aircraft and aerospace structures, high temperature fasteners.
High strength at elevated temperatures, precipitation hardening.

BRAEVAN.
M-140; 1.02 C, 5.7 Mo, 6.25 W, 4 Cr, 2.5 V, bal Fe.
Heat treated: 630-660 Brin.
For broaches, reamers, form tools, drills, high speed steel.

BRAEVAN 2.
M-140; 1.15 C, 5.5 Mo, 5.6 W, 4 Cr, 3.3 V, bal Fe
For broaches, reamers, end mills, form tools; high speed steel

BRAEVAN-M-3
M-334; 1 C, 6.2 W, 5.6 Mo, 2.5 V, 4.0 Cr, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

BRAGE 1.
M-111; 1.05 C, 0.5 Cr, 0.1 V, bal Fe
For threading tools, water hardening

BRAGE 2
M-111; 1.1 C, 0.25 Cr, 1 W, 0.1 V, bal Fe.
For threading tools, twist drills; water hardening

BRAND 110.
M-1409, 0.55-0.65 C, bal Fe
For drop forging die blocks, water hardened.

BRAND 113
M-1409, 0.5 C, 1 Ni, bal Fe.
For drop forging die blocks, water hardened

BRAND 123.
M-1409, C, Ni, Cr, bal Fe
For cold chisels and sates; oil hardened, shock resistant.

BRAND 124
M-1409, 0.5 C, 3 Ni, 0.75 Cr, bal Fe.
For drop forging dies, oil hardened, shock resistant.

BRAND 125.
M-1409; 0.5 C, 1.5 Ni, 1 Cr, 0.25 Mo, bal Fe.
For drop forging dies, oil hardened, shock resistant

BRAND 131.
M-1409, C, Ni, Cr, bal Fe.
For cold chisels and sates; oil hardened, shock resistant.

BRAND 133
M-1409, 0.15 C, bal Fe.
Annealed: 70,000 TS, 40,000 YS; 25 El; 60 RA, 143 Brin.
For gears, pinions, shafts, case hardened.

BRAND 134.
M-1409; 0.15 C, 3 Ni, bal Fe.
For gears, pinions, camshafts, cams; case hardened, tough.

BRAND 135.
M-1409; 0.15 C, 2 Ni, Mo, bal Fe.
For gears, pinions, camshafts, cams, shafts; case hardened, tough.

BRAND 138.
M-1409; 0.15 C, 5 Ni, bal Fe.
For gears, pinions, camshafts, cams; case hardened, tough.

BRAND 140.
M-1409; 0.15 C, Ni, Cr, bal Fe.
For gears, pinions, camshafts, fasteners; case hardened, tough.

BRAND F.T.20-30.
M-1409, 0.12 C, 25 Cr, 20 Ni, bal Fe.
For furnace parts, glass molds; heat and scale resistant to 1250°F.

BRAND F.T.1000
M-1409, 0.2-0.3 C, 18-20 Cr, 0.4 Ni, 1.2 Mo, bal Fe.
For furnace parts, glass molds; heat and scale resistant to 1150°C

BRASS, DRAWING.
M-8; 67-70 Cu, 30-33 Zn
Sand cast: 40,000 TS, 23,000 YS; 35 El; 35 RA; 45 Brin
Hard rolled: 67,200 TS, 67,000 YS; 15 El, 50 RA, 145 Brin.
For seamless tubes, deep drawing

BRASS E-133
M-1191, 58.5-60.5 Cu, 1.5-2.0 Pb, bal Zn.
Forged: 55,000-60,000 TS; 20,000-25,000 YS; 40-30 El, 80-100 Brin.
For hardware, machinery parts, leaded brass, free-cutting

BRASS, ESCUTCHEON
U.S., 64.5 Cu, 35.07 Zn, 0.43 Pb
For escutcheon pins, yellow brass

BRASS, HIGH
M-8, 65 Cu, 35 Zn
Cold rolled: 47,000-75,000 TS, 20,000-60,000 YS, 5-60 El, 5-75 RA, 45-180 Brin
Used for drawing, forming and spinning parts, high strength

BRASS, KRUPP NICKEL
M-72, 48.5 Cu, 24.3 Zn, 24.3 Ni, 2.9 Fe
For ornamental and corrosion resistant parts, corrosion resistant

BRASS, LANCASHIRE
Eng., 73 Cu, 25 Zn, 2 Pb
For parts to be brazed or soldered, free-cutting

BRASS, LEADED HIGH
M-8, 65 Cu, 0.5-1.5 Pb, bal Zn
For cupped, formed or drawn parts, does not foul cutting tools

BRASS, LEADED LOW
U.S., 78 Cu, 20 Zn, 1.7 Pb, traces Fe
Hard: 80,000 TS, 5 El
Soft: 40,000 TS; 35 El
For rivets, pins, wire, free-cutting

BRASS, LEADED SCREEN WIRE
U.S., 69 Cu, 30 Zn, 1.0 Pb, traces Fe
For screens, hardware; high ductility.

BRASS LK80-3L
Russian, 79.28 Cu, 0.28 Pb, 17.35 Zn, 0.24 Fe, 2.8 Si
Cast: 63,000 TS, 24,000 YS, 36 El, 44 RA.
For hardware, plumbing, red brass

BRASS LMTS58-2
Russian; 57.2 Cu, 40.15 Zn, 0.08 Fe, 1.54 Mn, 0.01 P.
Rolled: 72,000 TS, 48,000 YS, 26 El; 60 RA.
For marine parts, strong and corrosion resistant.

BRASS LS59-1.
Russian, 55.32 Cu, 1.42 Pb, 40.25 Zn
Rolled: 75,000 TS, 55,000 YS, 18 El; 31 RA

BRASS, MANGANESE
U.S.; 85-54 Cu, 2-40 Zn, 1-25 Mn, 0-2.4 Fe, 0-2.5 Ni, Al, Pb.
For propellers, marine parts, bolts, fittings; corrosion resistant.

BRASS, MANGANESE NICKEL
U.S., 66-53 Cu, 5-40 Zn, 2-18 Ni, 1.5-20 Mn, Al, Fe, Sn, Pb.

For condenser tubes, pump parts, corrosion resisting fittings; corrosion resistant.

BRASSOID.
M-538; brass coated Zn.
For fabricated parts, easily formed, stamped, drawn.

BRASS, PIN WIRE.
U.S.; 61 Cu, 39 Zn.
Wire: 51,000 TS; 20 El.
For brass pins, condenser tubes, water pipes; corrosion resistant.

BRASS STEEL.
M-538; brass coated steel.
For fabricated parts; easily formed, stamped, drawn.

BRASS TIN.
M-538; brass coated tin.
For fabricated parts; easily formed, stamped, drawn.

BRAZE 051.
M-63; 5 Ag, 58 Cu, 37 Zn.
Melting range 1545-1615°F.
For brazing Nichrome resistance elements, and for steels.

BRAZE 056.
M-63; 5 Ag, 78.4 Cd, 16.6 Zn.
For solder, M.P. 480-600°F.

BRAZE 071.
M-63; 7 Ag, 85 Cu, 8 Sn.
For brazing alloy; M P. 1225-1805°F.

BRAZE 090 (TL)
M-63, 9 Ag, 53 Cu, 38 Zn.
Melt point 1410°F; Flow point 1565°F.
For brazing copper base alloys such as band instruments.

BRAZE 200.
M-63; 20 Ag, 45 Cu, 30 Zn, 5 Cd.
Melt point 1140°F, Flow point 1500°F.
For brazing ferrous and non-ferrous alloys, good color match for yellow brass.

BRAZE 202
M-63, 20 Ag, 45 Cu, 35 Zn.
For brazing steel; M.P. 1315-1500°F.

BRAZE 250 (NE).
M-63, 25 Ag, 52.5 Cu, 22.5 Zn.
Melt point 1250°F; Flow point 1575°F.
For brazing ferrous and non-ferrous metals that are not damaged by 1600°F temperature.

BRAZE 251.
M-63, 25 Ag, 57.5 Cu, 17.5 Zn.
For brazing alloy; M.P. 1255-1625°F

BRAZE 400 (DT).
M-63; 40 Ag, 36 Cu, 24 Zn.
M.P. 1235°F; Flow P. 1415°F.
For brazing copper base alloys, morel, mild steel; can braze wide joints.

BRAZE 403 (SS)
40 Ag, 30 Cu, 28 Zn, 2 Ni.
Melt Point 1220°F; Flow Point 1435°F.
For brazing tungsten carbide tool tips, and for stainless food handling equipment.
AWS BAg-4.

BRAZE 404 (SS-5)
M-63; 40 Ag, 30 Cu, 25 Zn, 5 Ni.
Melt Point 1220°F; Flow Point 1580°F.
For brazing tungsten carbide tips, and for stainless steel.

BRAZE 450 (DE).
M-63; 45 Ag, 30 Cu, 25 Zn.
Melt Point 1225°F; Flow Point 1370°F.
For brazing ships piping, band instruments, aircraft engine oil coolers, brass lamps. AWS BAg-5.

BRAZE 501 (ETX).
M-63; 50 Ag, 34 Cu, 16 Zn.
Melt Point 1250°F; Flow Point 1425°F.
For brazing steam turbine blading and heavily galvanized or tinned steel.
AWS BAg-6.

BRAZE 505.
M-63; 50 Ag, 20 Cu, 28 Zn, 2 Ni.
Melting range: 1220-1305°F.
For brazing 300 series stainless food handling equipment.

BRAZE 541.
M-63; 54 Ag, 40 Cu, 5 Zn, 1 Ni.
Melt Point 1340°F; Flow Point 1575°F.
For atmosphere furnace brazing steel and stainless; for applications up to 700°F.
AMS 4772 B; AWS BAg-13.

BRAZE 559.
M-63; 56 Ag, 42 Cu, 2 Ni.
Melting range: 1420-1640°F.
For furnace brazing of steels and high temp. alloys where zinc fumes are undesirable.
AMS-4765; AWS BAg-13a.

BRAZE 560.
M-63, 56 Ag, 22 Cu, 17 Zn, 5 Sn.
Melt Point 1145°F; Flow Point 1205°F.
For brazing food handling equipment requiring a low melting cadmium free alloy.
AWS BAg-7.

BRAZE 580.
M-63; 57.5 Ag, 32.5 Cu, 3 Mn, 7 Sn.
For brazing alloy; M.P. 1120-1345°F.

BRAZE 600 (RT).
M-63; 60 Ag, 25 Cu, 15 Zn.
Melt Point 1245°F, Flow Point 1325°F.
For brazing Monel and other nickel base alloys and for silverware.

BRAZE 603.
M-63; 60 Ag, 30 Cu, 10 Sn.
Melt Point 1115°F; Flow T. 1325°F.
For brazing marine heat exchangers, ferrous and non-ferrous alloys, vacuum tube seals.
AMS 4773A; AWS BAg-18.

BRAZE 630.
M-63; 63 Ag, 28.5 Cu, 6 Sn, 2.5 Ni.
Melt Point 1275; Flow Point 1475.
For brazing 400 series stainless, alloy steels, food handling equipment. Good for combined furnace brazing and hardening for low alloy steels.
AMS 4774A.

BRAZE 650 (Easy).
M-63; 65 Ag, 20 Cu, 15 Zn.
Melt Point 1240°F; Flow Point 1325°F.
For brazing silverware, iron and nickel alloys.
ASME BAg-9.

BRAZE 655.
M-63; 65 Ag, 28 Cu, 5 Mn, 2 Ni.
For jet engine components, brazing alloy; M.P. 1385-1560°F.

BRAZE 700 (Medium).
M-63; 70 Ag, 20 Cu, 10 Zn.
Melt Point 1275°F; Flow Point 1360°F.
For brazing silverware when subsequent joints are made with Braze 650.
ASME BAg-10.

BRAZE 720 (BT).
M-63; 72 Ag, 28 Cu.
Melt Point and Flow Point 1435°F. (Eutectic alloy)
For brazing electric components requiring highest electrical and thermal conductivity; low volatile materials and impurities; for furnace brazing.
AWS BAg-8.

BRAZE 750 (Hard).
M-63; 75 Ag, 22 Cu, 3 Zn.
Melt Point 1365°F; Flow Point 1450°F.
For brazing silverware, for step brazing or subsequent enameling; iron and nickel base alloys.
ASME BAg-11

BRAZE 752.
M-63; 75 Ag, 25 Zn.
For brazing alloy; M.P. 1300-1330°F.

BRAZE 800 (IT).
M-63; 80 Ag, 16 Cu, 4 Zn.
Melt Point 1340°F; Flow Point 1490°F.
For brazing silver, iron and nickel base alloys

BRAZE 852.
M-63; 85 Ag, 15 mn
Melt Point 1760°F; Flow Point 1780°F.
For brazing stainless steels, Stellite and Inconel.

BRAZINAL.
M-1231; Si, bal Al.
Cast: 45,000 TS, 80 Brin
For brazing alloy for Al.

BRAZING BRASS
M-8; 80-75 Cu, 20-25 Zn.
For brazing

BRAZING BRASS 282.
M-279, 59 Cu, 38.8 Zn, 0.2 P
Brazing sheets, annealed.
Low melting temperature

BRAZING METAL
M-8, 84-86 Cu, 14-16 Zn
Cast. 95,000-50,000 TS, 7 El, 180 Brin
For brazed joints on steel parts, tough and ductile

BRAZING METAL "F."
Eng.; 85 Cu, 15 Zn.
For brazing metal, water pipe, architectural purposes, low m p.

BREARLEY B.
M-472; 0.15 max C, 14-16 Cr, bal Fe.
Heat treated 68,000-80,000 TS; 20 El; 130-153 Brin
For pressings, cooking utensils, Type 430; corrosion resistant.

BREARLEY B B.H.
M-472; 0.35-0.40 C, 11.0-12.5 Cr, bal Fe
Heat treated: 212,000-280,000 TS, 450-580 Brin
For ball bearings and engine valves; Type 420, stainless steels.

BREARLEY C.
M-472; 0.15 max C, 16-18 Cr, bal Fe.
Annealed: 60,000-80,000 TS, 50,000 YS; 30 El; 50 RA; 130-155 Brin.
For boiler and furnace fittings, kitchen sinks; Type 430; corrosion resistant.

BREARLEY SI.
M-472; 0.12 max C, 12-15 Cr, bal Fe.
For heat and corrosion resistant parts; stainless, heat and corrosion resistant.

BREARLY.
U.S; 12-14 Cr, 0.5 max Si, 0.3 C, bal Fe.
For cutlery, surgical instruments; stainless and corrosion resisting.

BREARLY A.
M-472; 0.12 max C, 12-14 Cr, bal Fe
Heat treated: 80,000-100,000 TS; 25 El, 152-207 Brin.
For turbine blades and shrouds, tanks, cooking utensils, Type 405; corrosion resistant.

BREARLY "K."
M-472, 0.25 C, 16-18 Cr, bal Fe.
67,000-90,000 TS
For chemical plant, particularly for HNO_3, corrosi
resistant

BREARLY PATENT.
U.S, 9-16 Cr, 0.7 max C, bal Fe.
For cutlery, surgical instruments; stainless and corrosion resisting

BREDA CM10.
M-1449, 0.09-0.12 C, 13 Cr, 0.5 max Si, bal Fe.
Annealed: 75,000 TS, 40,000 YS, 35 El; 70 RA; 155 Brin
For valves, cutlery, surgical and dental instrument
Type 403, corrosion resistant

BREDA CM13
M-1449, 0.26-0.37 C, 13 Cr, bal Fe
Annealed 95,000 TS; 50,000 YS, 25 El, 55 RA; 195 Brin
For valves, cutlery, surgical and dental instrument
Type 420, corrosion resistant

BREDA CMC
M-1449, 0.38-0.45 C, 13 Cr, bal Fe
Annealed 100,000 TS; 55,000 YS, 23 El, 52 RA; 210 Brin.
For valves, cutlery, surgical and dental instrument
Type 420, corrosion resistant.

BREDA LYS
M-1449, 0.07-0.12 C, 17 Cr, bal Fe
Annealed 80,000 TS; 50,000 YS, 25 El; 50 RA, 150 Brin.
For oil refining equipment, oil burners and heaters
Type 430, corrosion resistant.

BREDA NK1
M-1449, 0.25 max C, 17 Cr, 2 Ni, bal Fe
Annealed 125,000 TS, 95,000 YS; 20 El, 55 RA,
260 Brin
For pumps, marine hardware, valves; Type 431; corrosion and heat resistant.

BREDA-NK2
M-1449, 0.20 max C, 24 Cr, 12 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS, 50 El; 65 RA; 170 Brin.
For furnace parts, pumps, oil burners, heat treat boxes, Type 309; stainless, austenitic.

BREDA-NK3.
M-1449, 0.25 max C, 25 Cr, 20 Ni, 1.5 max Si, bal Fe.
Annealed: 100,000 TS, 45,000 YS, 50 El; 65 RA; 185 Brin.
For furnace parts, pumps, valves, turbine and jet parts; Type 310, stainless, austenitic.

BREDA RAS.
M-1449, 0.40 C, 10 Cr, 1 Mo, 2.5 Si, bal Fe.
For oil refinery equipment; heat resistant.

BREDA RF302.
M-1449; 0.35 C, 25 Cr, bal Fe.
Annealed: 85,000 TS; 50,000 YS; 30 El; 55 RA; 180 Brin.
For furnace parts and equipment; Type 446; heat resistant.

BRESCIANA AK.
M-1451, 0.09-0.12 C, 13 Cr, 0.5 max Si, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, valves, cutlery, knives; Type 403 and 410; corrosion resistant.

BRESCIANA ATK.
M-1451; 0.07-0.12 C, 17 Cr, bal Fe
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refinery equipment, oil burners and heaters; Type 430; corrosion resistant.

BRESCIANA AU.
M-1451; 0.17-0.25 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA, 150 Brin.
For chemical plant equipment, tanks, mixers; Type 302; stainless, austenitic.

BRESCIANA AUS.
M-1451, 0.11-0.16 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS, 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers; Type 301 and 302, stainless, austenitic.

BRESCIANA AUT.
M-1451, 0.09-0.15 C. 18 Cr, 9 Ni, Ti, bal Fe.
Annealed: 85,000 TS, 35,000 YS, 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, tanks; Type 321, stainless, austenitic

BRESCIANA CNV.
M-1451; 0.20 max C, 24 Cr, 12 Ni, bal Fe.
Annealed: 90,000 TS, 40,000 YS, 50 El, 65 RA; 170 Brin
For furnace parts, heat treating boxes, pumps, oil burners, Type 309, corrosion and heat resistant.

BRESCIANA INC.
M-1451; 0.26-0.37 C, 13 Cr, bal Fe.
Annealed: 100,000 TS; 55,000 YS, 22 El, 52 RA; 200 Brin.
For valves, cutlery, surgical instruments, Type 420; corrosion resistant.

BRESCIANA KK.
M-1451, 0.35 max C, 25 Cr, bal Fe
Annealed. 85,000 TS, 50,000 YS; 30 El, 55 RA; 180 Brin
For furnace parts and equipment, Type 446, heat resistant.

BRESCIANA MIC.
M-1451; 0.38-0.45 C, 13 Cr, bal Fe.
Annealed: 110,000 TS; 60,000 YS; 20 El; 50 RA; 220 Brin.
For valves, cutlery, surgical instruments; Type 420; corrosion resistant.

BRESCIANA VV.
M-1451; 0.25 max C, 25 Cr, 20 Ni, 1.5 max Si, bal Fe.
Annealed. 100,000 TS; 45,000 YS; 50 El; 65 RA; 185 Brin.
For furnace parts, valves, pumps, turbine components; Type 310; corrosion and heat resistant.

BRICROME.
M-715; 1.75 T.C., 1.5 Si, 0.8 Mn, 30 Cr, bal Fe.
Cast: 72,000 TS; 310 Brin.
For piston rings, cylinder liners; wear resistant.

BRIDGE BRONZE A.
English; 80 Cu, 20 Sn, 0.1 P.
3 El; 1.8 RA; 80 Brin.
For tubes; P-Bronze.

BRIDGE BRONZE B.
English; 85 Cu, 15 Sn, 0.1 P.
50 Brin.
For springs, electrical parts, P-Bronze.

BRIDGE BRONZE C.
English; 80 Cu, 10 Sn, 0.7-1.0 P, 10 Pb.
15 El; 74 Brin.
For bearings; heavy duty P-Bronze.

BRIDGE BRONZE D.
English; 88 Cu, 10 Sn, 0.3 P, 2 Zn.
For bearings, gears, worm wheels; P-Bronze.

BRIDGEPORT NO. 1.
M-141, 66 Cu, 34 Zn.
Hard: 74,000 TS; 60,000 YS; 8 El.
Soft: 47,000 TS; 15,000 YS; 62 El.
For hardware, general drawing and forming; yellow brass.

BRIDGEPORT 2.
M-141; 1.8 Pb, 63.25 Cu, bal Zn.
Hard. 55,000 TS; 42,000 YS; 30 El; B 75 Rock.
Soft: 45,000 TS; 15,000 YS; 55 El, F 65 Rock.
For screw machine parts requiring some cold working such as roll threading, knurling, etc., binding posts, toggle switch parts.
High leaded brass, free-cutting.

BRIDGEPORT NO. 3.
M-141; 65.5 Cu, 33.9 Zn, 0.60 Pb.
Hard: 74,000 TS; 60,000 YS; 8 El.
Soft: 49,000 TS; 17,000 YS; 57 El.
For hardware, bolts, studs, low leaded brass.

BRIDGEPORT NO 5.
M-141; 80 Cu, 20 Zn.
Hard: 74,000 TS; 59,000 YS; 7 El.
Soft. 44,000 TS, 14,000 YS, 50 El.
For tubing, hardware, diaphragms, low brass.

BRIDGEPORT NO 6
M-141; 35.35 Zn, 3.4 Pb, bal Cu.
Hard: 58,000 TS; 45,000 YS; 25 El; 144 Brin.
Soft 49,000 TS; 20,000 YS, 40 El; 61 Brin.
For screw machine products; free-cutting brass.

BRIDGEPORT 14
M-141, 40.25 Zn, bal Cu
Hard: 72,000 TS; 50,000 YS, 25 El; B 78 Rock.
Soft 54,000 TS; 21,000 YS, 50 El, F 80 Rock.
For architectural trim, fasteners, condenser plates, heat exchangers.
Good hot working qualities, high corrosion resistance.

BRIDGEPORT NO. 16.
M-141, 65 Cu, bal Zn.
For wood and machine screws; yellow brass.

BRIDGEPORT NO. 18
M-141, 67 Cu, 0.5 Pb, bal Zn.
Hard: 75,000 TS, 60,000 YS; 7 El.
For garden sprayers, free-cutting.

BRIDGEPORT NO. 19.
M-141, 0.3 Mn, 0.7 Sn, 1 Fe, 58.5 Cu, bal Zn.
Hard: 83,000 TS, 55,000 YS, 25 El; 165 Brin.
Soft. 72,000 TS; 30,000 YS; 45 El; 100 Brin.
For bolts, valve parts, tie rods; manganese bronze.

BRIDGEPORT NO. 24.
M-141; 60 Cu, 0.12 Pb, 0.65 Sn, bal Zn.
Hard: 75,000 TS; 53,000 YS; 20 El; 156 Brin.
Soft: 57,000 TS; 25,000 YS; 47 El; 100 Brin.
For nuts, bolts, marine hardware; Naval Brass.

BRIDGEPORT NO. 25.
M-141; 90 Cu, 10 Zn.
Soft: 38,000 TS; 12,000 YS; 45 El.
For threaded fasteners; resists season cracking.

BRIDGEPORT NO. 26.
M-141; 95 Cu, 5 Zn.
Hard: 56,000 TS; 50,000 YS; 5 El; 114 Brin.
Soft: 35,000 TS; 11,000 YS; 45 El; 50 Brin.
For jewelry; gilding metal.

BRIDGEPORT NO. 28.
M-141; 60 Cu, 0.6 Pb, 0.65 Sn, bal Zn.
Hard: 75,000 TS; 53,000 YS; 20 El; 156 Brin.
Soft: 57,000 TS; 25,000 YS; 47 El; 100 Brin.
For marine hardware; Leaded Naval Brass.

BRIDGEPORT NO. 29.
M-141; 60 Cu, 0.65 Sn, 1.75 Pb, bal Zn.
Hard: 75,000 TS; 53,000 YS; 15 El; 162 Brin.
For hardware; Leaded Naval Brass.

BRIDGEPORT NO. 30.
M-141; 71 Cu, 0.03 As, 1.05 Sn, bal Zn.
Soft: 53,000 TS; 22,000 YS; 65 El; 68 Brin.
For condenser tubes; Arsenical Admiralty Metal.

BRIDGEPORT NO. 32.
M-141; 98.53 Cu, 0.07 P, 1.4 Sn.
Hard; 65,000 TS; 50,000 YS; 8 El; 137 Brin.
Soft: 40,000 TS; 14,000 YS; 48 El; 56 Brin.
For flexible hose; P-bronze, corrosion resistant.

BRIDGEPORT NO. 34.
M-141; 89.85 Cu, 0.15 P, 10.0 Sn.
For springs; P-bronze, corrosion resistant.

BRIDGEPORT 35.
M-141; 8 Sn, 0.1 P, bal Cu.
Hard: 93,000 TS; 72,000 YS; 10 El; B 93 Rock.
Soft: 60,000 TS; 24,000 YS; 63 El; F 82 Rock.
For springs, fuse clips, contacts, meterparts, diaphragms, bellows, snap switches, cutter pins, terminals.
Phosphor bronze—13% elect. cond.

BRIDGEPORT 36.
M-141; 5.5 Sn, 0.15 P, bal Cu.
Annealed: 47,000 TS; 19,000 YS; 64 El; B 26 Rock.
Hard: 81,000 TS; 75,000 YS; 10 El; B 87 Rock.
Spring: 100,000 TS; 80,000 YS; 4 El; B 95 Rock.
For springs, fuse clips, contacts, relay parts, snap switches, terminals, diaphragms, bellows, cotter pins.
Phosphor bronze—18% elect. cond

BRIDGEPORT NO. 37.
M-141; 69.5 Cu, 30.5 Zn.
Hard: 76,000 TS; 63,000 YS; 8 El.
Soft: 47,000 TS; 15,000 YS, 62 El.
For cartridge cases, deep drawn parts; cartridge brass.

BRIDGEPORT 41.
M-141, 0.75 Pb, 60 Cu, bal Zn.
Annealed: 54,000 TS; 21,000 YS; 50 El; F 80 Rock.
¼ Hard: 72,000 TS; 50,000 YS; 25 El; B 78 Rock.
For screw machine products, bolts, fasteners, hardware, valve stems.
Low leaded brass, free cutting, corrosion resistant.

BRIDGEPORT 42.
M-141; 38.65 Zn, 1.10 Pb, bal Cu.
Hard: 80,000 TS; 60,000 YS; 6 El; B 85 Rock.
Soft: 54,000 TS; 20,000 YS; 40 El; F 80 Rock.
For screw machine products, bolts, fasteners, hardware. Corrosion resistant.
Free-cutting Muntz Metal.

BRIDGEPORT 45.
M-141; 61.0 Cu, 38.35 Zn, 0.65 Sn.
Hard: 75,000 TS; 50,000 YS; 20 El; B 80 Rock.
Soft: 54,000 TS; 25,000 YS; 50 El; B 55 Rock.
For bolts, fasteners, propellers, valve stems, rivets, marine hardware.
Good resistance to salt water corrosion.
Cold heading Naval Brass. Corrosion resistant.

BRIDGEPORT NO. 53.
M-141; 5 Al, 0.25 As, bal Cu.
Soft: 60,000 TS; 22,000 YS; 60 El.
For propellers, hardware; aluminum bronze.

BRIDGEPORT NO. 54.
M-141; 20.87 Zn, 2.1 Al, 0.03 As, bal Cu.
Soft: 60,000 TS; 27,000 YS; 55 El.
For hardware; corrosion resistant; Al-Bronze.

BRIDGEPORT NO. 62.
M-141; 62.25 Cu, 35.75 Zn, 2 Pb.
Hard: 74,000 TS, 60,000 YS; 7 El; 150 Brin.
Soft: 49,000 TS, 17,000 YS; 52 El.
For hardware, bolts, nuts; free-cutting.

BRIDGEPORT NO 63.
M-141; 65.5 Cu, 33.4 Zn, 1.1 Pb.
Hard: 74,000 TS; 60,000 YS; 7 El.
Soft· 49,000 TS; 17,000 YS, 54 El.
For hardware, bolts, nuts; free-cutting.

BRIDGEPORT NO. 64.
M-141; 67 Cu, 31.25 Zn, 1.75 Pb.
Hard: 75,000 TS, 60,000 YS, 7 El; 150 Brin.
Soft: 52,000 TS; 20,000 YS; 50 El, 70 Brin.
For screw machine products; leaded brass.

BRIDGEPORT NO. 69.
M-141, 70 Cu, 30 Zn.
Hard· 65,000 TS, 25 El.
Soft. 50,000 TS; 60 El.
For hollow rivets, fasteners, good formability, ductile.

BRIDGEPORT 77
M-141; 30 Zn, 0.05 Hg, bal Cu
Hard 78,000 TS; 64,000 YS; 8 El; 110 Brin.
Soft: 47,000 TS; 15,000 YS, 65 El; 58 Brin
For heat exchangers, condensers; resists bio-fouling and dezincification.

BRIDGEPORT NO 85
M-141; 85 Cu, 15 Zn
Hard: 70,000 TS; 57,000 YS, 5 El.
Soft 40,000 TS; 12,000 YS; 47 El.
For flexible hose, deep drawn parts; red brass.

BRIDGEPORT NO 87
M-141, 88 Cu, 12 Zn
For costume jewelry, resembles 14K gold.

BRIDGEPORT NO. 89
M-141; 89 Cu, 2 Pb, 8.5 Zn
Hard: 52,000 TS, 45,000 YS; 18 El; B 58 Brin.
Soft 37,000 TS, 12,000 YS, 45 El; F 55 Brin.
For hardware; free-cutting

BRIDGEPORT 90.
M-141; 88.5 Cu, 2 Pb, 1 Ni, 0.07 P, bal Zn.
Hard· 70,000 TS, 60,000 YS; 12 El; 144 Brin.
For screw machine products, hardware; free-cutting, corrosion resistant.

BRIDGEPORT 92.
M-141; 89.0 Cu, 9.1 Zn, 1.9 Sn
Hard: 90,000 TS; 72,000 YS; 3 El; B 90 Rock.
For springs, spring contacts, slide contacts.
Substitute for phosphor bronze. Corrosion resistant.

BRIDGEPORT 100.
M-141; Ag, bal Cu (20 oz. Troy/ton Avoir.)
Soft: 32,000 TS; 10,000 YS; 45 El; F 40 Rock.
For radio, television, radar and computer parts, bus conductors.
Silver bearing copper.

BRIDGEPORT 101.
M-141; Ag, bal Cu (10 oz. Troy/ton Avoir.)
Soft: 32,000 TS; 10,000 YS; 45 El; F 40 Rock.
For radio, television, radar and computer parts, wave guides, bus conductors.
Does not soften as readily as pure copper during soldering. Silver bearing copper.

BRIDGEPORT NO. 102.
M-141; 99.90 min Cu.
Hard: 50,000 TS; 45,000 YS; 4 El; 100 Brin.
Soft· 34,000 TS; 11,000 YS; 45 El; 45 Brin.
For electrical uses and hollowware; tough pitch copper.

BRIDGEPORT 103.
M-141, 99 92 min Cu.
Hard· 53,000 TS; 51,000 YS; 3 El; B 56 Rock.
Soft. 32,000 TS, 8000 YS; 43 El, F 33 Rock.
For electronic and radar parts, bus conductors, wave guides, transistor and rectifier bases, heat sinks
OFHC copper—102% elect cond

BRIDGEPORT NO. 104
M-141. Cu
For electronic parts, vacuum tube parts; oxygen free copper

BRIDGEPORT NO. 105.
M-141; 99 9 min Cu 0 02 P.
Hard 55,000 TS, 50,000 YS; 8 El, 107 Brin.
Soft 32,000 TS; 10,000 YS; 45 El, 40 Brin
For deep drawing and water tubes, deoxidized copper.

BRIDGEPORT 106.
M-141, 99.98 min Cu
Hard 55 000 TS, 50,000 YS, 8 El, B 60 Rock
Soft 32,000 TS, 10,000 YS, 45 El, F 40 Rock.
For tubular bus bars
Deoxidized copper

BRIDGEPORT 108
M-141, 0 02 P, 0 3 As, 99 4 + min Cu
Hard 40,000 TS, 32,000 YS; 25 El, F 77 Rock.
For condensers, heat exchangers
Inhibited.
Arsenical deoxidized copper

BRIDGEPORT 110
M-141; 0 02 P, 99 91 + Cu
Hard 50,000 TS, 45,000 YS, 14 El; B 40 Rock
Soft 32,000 TS, 10,000 YS, 45 El; F 40 Rock.
For heat sinks.
85% elect cond, corrosion resistant.

BRIDGEPORT 112
M-141, 99 50 Cu, 0 50 Te.
½ H-temper: 44,000 TS; 42,000 YS, 20 El, 78 Brin.
For screw machine products; high conductivity, free-cutting

BRIDGEPORT 120
M-141, 99 7 Cu, 0.3 S
½ H-temper· 44,000 TS; 42,000 YS, 20 El; 78 Brin.
For screw machine products, fasteners; high conductivity, free-cutting

BRIDGEPORT NO. 133.
M-141; 59 Cu, 1.75 Pb, bal Zn.
Hard: 72,000 TS; 50,000 YS; 15 El; 144 Brin.
Soft: 52,000 TS; 20,000 YS, 45 El; 72 Brin.
For hardware, machine tool parts; BPT forging rod.

BRIDGEPORT 134.
M-141; 2.25 Pb, 38 Zn, bal Cu.
Rolled: 75,000 TS; 52,000 YS; 22 El; B 80 Rock.
For hot forged and machined parts, hardware, fasteners, bolts.
27% elect. cond. Forging brass.
Corrosion resistant, free-cutting.

BRIDGEPORT 141.
M-141; 62.25 Cu, 37.75 Zn.
Annealed: 54,000 TS; 21,000 YS; 45 El; F 80 Rock.
Half Hard: 70,000 TS; 50,000 YS; 10 El; B 75 Rock.
For architectural trim, fasteners, hardware, heat exchangers, brazing rod, condenser tubes.
Muntz Metal. Good corrosion resistance.

BRIDGEPORT 142.
M-141; 62 0 Cu, 37.9 Zn, 0.1 As.
Hard· 56,000 TS; 23,000 YS; 50 El; F 82 Rock.
For condensers, heat exchangers.
Free from dezincification.
Arsenical Muntz Metal Inhibited.

BRIDGEPORT NO. 192.
M-141; 58 Cu, 0.9 Sn, 0.6 Fe, bal Zn.
For welding rod, brazing; non-fuming.

BRIDGEPORT 285.
M-141, 81 Cu, 4 25 Si, 0.15 Pb, bal Zn.
Annealed: 95,000 TS, 50,000 YS; 30 El; 185 Brin.
For valve stems, pump parts, corrosion and wear resistant.

BRIDGEPORT NO 511
M-141; 88.85 Cu, 10 Ni, 1.15 Fe
Hard: 50,000 TS; 45,000 YS, 18 El
Soft 45,000 TS, 15,000 YS, 40 El
For condensers and heat exchangers; cupro-nickel, corrosion resistant

BRIDGEPORT NO 520
M-141, 78 85 Cu, 20 Ni, 0 4 Fe, 0 75 Mn.
Soft 49,000 TS, 14,000 YS; 40 El
For condensers and heat exchangers, cupro-nickel, corrosion resistant.

BRIDGEPORT 521.
M-141; 20 Ni, bal Cu
Hard: 103,000 TS, 101,000 YS; 2 El.
Spring 85,000 TS, 81,300 YS, 2 5 El.
For wave guides, radar equipment, relay springs.
Resists stress corrosion cracking

BRIDGEPORT NO. 531
M-141; 67 75 Cu, 31 Ni, 0.5 Fe, 0.75 Mn.
Soft· 60,000 TS, 25,000 YS; 45 El, 75 Brin
For condensers and heat exchangers; cupro-nickel, corrosion resistant

BRIDGEPORT NO 548
M-141, 48 Cu, 9 5 Ni, bal Zn
For nickel silver welding rod, corrosion resistant.

BRIDGEPORT NO 555.
M-141, 55 Cu, 18 Ni, bal Zn.
Drawn. 100,000 TS; 3 El.
Spring: 115,000 TS; 90,000 YS; 2 5 El, B99 Brin.
For telephone switch parts, springs; corrosion resistant.

BRIDGEPORT 558
M-141; 12 Ni, 56.5 Cu, bal Zn
Annealed: 55,000 TS; 22,000 YS, 50 El; B 40 Rock.
Hard. 100,000 TS; 90,000 YS; 5 El, B 93 Rock.
For spring parts and contacts for telephone boards, radios, controls, springs, resistance wire, diaphragms Good workability and weldability.
Corrosion resistant nickel silver.

BRIDGEPORT NO. 565
M-141; 65 Cu, 18 Ni, bal Zn.
Hard: 85,000 TS; 75,000 YS; 3 El; 172 Brin.
Soft: 60,000 TS, 30,000 YS; 35 El; 64 Brin.
For hollowware, zippers, tableware, optical goods; nickel silver, corrosion resistant.

BRIDGEPORT NO. 566.
M-141; 65 Cu, 12 Ni, 0.15 Mn, bal Zn.
For jewelry, hardware; nickel silver, corrosion resistant.

BRIDGEPORT NO. 567.
M-141; 65.25 Cu, 9.75 Ni, 0.15 Mn, bal Zn.
Hard: 86,000 TS; 75,000 YS; 4 El, 180 Brin.
Soft: 60,000 TS; 28,000 YS; 36 El; 100 Brin.
For hardware, hollowware, jewelry, nickel silver, corrosion resistant.

BRIDGEPORT NO. 606.
M-141; 96.05 Cu, 3 Si, 0.95 Mn
Hard: 94,000 TS; 58,000 YS; 8 El
Soft: 60,000 TS, 25,000 YS; 60 El.
For pole line hardware, stampings; silicon bronze, corrosion resistant.

BRIDGEPORT NO. 609
M-141; 98 Cu, 2 Si.
Annealed: 45,000 TS; 15,000 YS; 50 El.
Drawn: 80,000 TS, 50,000 YS; 12 El.
For transmission lines, marine hardware, bolts, welding rod; corrosion resistance.

BRIDGEPORT 632.
M-141; 0.10 Fe, 2.95 Si, bal Cu.
Hard: 94,000 TS; 58,000 YS; 8 El, B 93 Rock.
Soft: 60,000 TS; 25,000 YS, 60 El; F 85 Rock.
For bolts, fasteners, springs, marine fittings, hardware. High fatigue strength.
High silicon bronze, corrosion resistant.

BRIDGEPORT 635.
M-141, 97.5 Cu, 1.9 Ni, 0.6 Si.
Annealed: 40,000 TS, 12,000 YS; 50 El; 56 Brin
Aged: 103,000 TS, 97,000 YS; 17 El; 216 Brin.
For cold headed bolts, fasteners, switch gear, springs, contacts; age-hardenable, corrosion resistant

BRIDGEPORT 707.
M-141; 7 Al, 2.0 Si, bal Cu.
Soft: 90,000 TS, 50,000 YS; 30 El; B 85 Rock.
For pump rods, gears, valve stems, pole-line hardware, oil burner nozzles.
High strength and corrosion resistance.
Duronze III.

BRIDGEPORT 708.
M-141, 91.5 Cu, 1.75 Si, 6.75 Al.
Annealed: 85,000 TS; 40,000 YS; 30 El; 165 Brin.
For valve stems, bolts, fasteners, corrosion and wear resistant, hot forgeable.

BRIDGEPORT NO. 715.
M-141; 96.75 Cu, 2.9 Al, 0.35 Si.
Hard: 75,000 TS, 15 El
Soft: 40,000 TS; 55 El.
For bolts, nuts, screws; Al-bronze.

BRIDGEPORT NO. 820.
M-141; 95.35 Cu, 0.15 P, 4.5 Sn.
Hard: 81,000 TS; 75,000 YS; 10 El; 172 Brin.
Soft: 50,000 TS; 21,000 YS; 52 El; 71 Brin
For springs, clutch discs, diaphragms; P-bronze.

BRIDGEPORT 828.
M-141; 92 Cu, 1.9 Sn, 6.1 Zn.
Hard: 72,000 TS; 8 El.
½ H-temper: 58,000 TS; 20 El.
Spring: 90,000 TS; 2 El; 172 Brin.
For electrical switches, springs, contacts; substitute for P-bronze, 37% electrical conductivity.

BRIDGEPORT NO. 835.
M-141; 98.85 Cu, 0.75 Sn, 0.25 Si, 0.15 Mn.
For copper welding rods.

BRIDGEPORT NO. 840.
M-141; 98.6 Cu, 1.4 Sn.
Hard: 65,000 TS; 10 El.
Soft: 40,000 TS, 40 El.
For pole line hardware, marine parts; corrosion resistant.

BRIDGEPORT NO. 980
M-141; 99 Cu, 1 Cd.
Hard: 55,000 TS, 45,000 YS; 6 El; B65 Brin.
Soft: 35,000 TS, 15,000 YS, 60 El, F35 Brin.
For electrical applications; high electrical conductivity

BRIDGEPORT NO. 985
M-141; 99.1 Cu, 0.9 Cd.
Hard: 55,000 TS, 48,000 YS; 6 El; 116 Brin.
Soft: 37,000 TS, 12,000 YS; 50 El; 45 Brin.
For trolley wire, marine hardware; cadmium copper.

BRIDGEPORT 992.
M-141, 0.13 Zr, bal Cu
Annealed: 30,000 TS, 10,000 YS; 45 El; 40 Brin.
Aged: 60,000 TS, 55,000 YS; 15 El; 116 Brin.
For resistance welding electrodes, grid wires; heat treatable, high conductivity

BRIDGEPORT NO 1232
M-141; 3 Si, bal Cu
Welded: 55,000 TS, 55 El.
For welding rod, bronze

BRIDGEPORT NO 1426
M-141, 95.5 Cu, 3.5 Al, 1.0 Si.
For tubing, corrosion resistant

BRIDGEPORT 1552
M-141; 1.9 Sn, 6.1 Zn, bal Cu
For fuse clips, springs, diaphragms, good electrical conductivity

BRIDGEPORT BRONZE
M-141, 60 Cu, 0.75 Sn, bal Zn.
Drawn: 75,000 TS, 15 El
For condenser tubes, water pipes, nuts, bolts, corrosion resistant.

BRIDGEPORT F-37
M-141, 30 Zn, bal Cu
For bearing retainer cages, cartridge brass.

BRIDGEPORT F-3034
M-141, 0.10 S, 0.25 P, bal Cu
For hardware, P-bronze, corrosion resistant

BRIDGEPORT FORGING ROD
M-141, 59.5 Cu, 1.75 Pb, 0.2 Sn, bal Zn
Annealed: 52,000 TS, 20,000 YS, 45 El
For forgings, hardware, free cutting

BRIDGEPORT JEWELRY BRONZE NO 92.
M-141, 89 Cu, 1.9 Sn, bal Zn
Hard: 90,000 TS, 72,000 YS, 3 El; B90 Rockwell.
For costume jewelry, electrical contacts; resembles red gold.

BRIDGEPORT MANGANESE BRONZE 19.
M-141; 58.5 Cu, 1.0 Fe, 0.75 Sn, 0.3 Mn, bal Zn
Annealed: 60,000 TS, 15 El.
Drawn: 85,000 TS, 35 El
For welding rod, forgings, brazing; corrosion resistant.

BRIDGEPORT PHOSPHOR 36 BRONZE GRADE A.
M-141; 5.0 Sn, 0.15 P, bal Cu.
Annealed: 50,000 TS; 52 El.
Drawn: 81,000 TS; 10 El.
For springs, diaphragms, clutch discs; corrosion and fatigue resistant.

BRIDGEPORT PHOSPHOR BRONZE GRADE C.
M-141; 8 Sn, 0.10 P, bal Cu.
Annealed: 60,000 TS; 65 El.
Drawn: 112,000 TS; 3 El.
For springs, diaphragms; corrosion and fatigue resistant.

BRIDGEPORT PLUMRITE.
M-141; 61 Cu, 38.6 Zn, 0.4 Pb.
For brass pipe for fresh water service and chemical plants; high strength.

BRIDGEPORT SULPH-COPPER.
M-141; 0.3 S, 99.7 Cu.
½ H temper: 42,000 TS; 39,000 YS; 20-35 El; 77 Brin.
H-temper: 48,000 TS; 46,000 YS; 18-20 El; 81 Brin.
For nozzles, welding tips, motor parts; free-cutting, high electrical and thermal conductivity.

BRIGHT ALLOY.
M-580.
For anodes; electroplating.

BRIGHT CAP GILDING.
Eng, 90 Cu, 9 9 Zn, 0.4-0.1 Pb.
For gilding, jewelry; corrosion resistant.

BRIGHT EXTRUDED BRONZE
M 33; 58.5 Cu, 38 7 Zn, 2 5 Pb.
As extruded: 56,000 TS, 20,000 YS; 28 El, 33,000 shear; 56 Rock B.
For architectural, ornamental hardware, hinges.

BRIGHTRAY A.
M-121, 80 Ni, 20 Cr.
118,000 TS
For electrical resistances; can be used up to 1150°C.

BRIGHTRAY-C.
M-121, 80 Ni, 19 Cr, 0 5 max Fe, 1 5 Si.
Cold Drawn 106,000 TS, 47 El, 63 RA; 196 Brin.
For electrical resistances, heating elements.
Heat resistant to 1150°C.

BRIGHTRAY-F
M-121, 37 Ni, 18 Cr, 2 Si, bal Fe
For electrical resistances, heating elements, electric furnace elements
Heat resistant to 1000°C

BRIGHTRAY H.
M 121, 19 Cr, 3 8 max Al, 0 5 max Fe, bal Ni
Annealed. 95,000 TS, 30 El; 55 RA; 185 Brin.
Cold Drawn: 165,000 TS, 1 El, 1 RA, 260 Brin.
For electrical resistors, heating elements.
Heat resistant to 1250°F.

BRIGHTRAY S
M 121, 80 Ni, 20 Cr.
Annealed 107,000 TS, 50,000 YS, 47 El, 63 RA, 187 Brin.
For heavy industrial electrical and resistance heating elements; rod and strip.

BRIGHTWAY B
M-121; 15-17 Cr, 58-60 Ni, 20 Fe.
Annealed: 99,000 TS, 41,000 YS; 44 El; 66 RA, 190 Brin.
For heating elements, electrical resistances; heat resistant to 950°C

BRIGHTWAY H.
M-121, 80 Ni, 20 Cr.
Annealed: 95,000 TS; 30 El, 55 RA, 185 Brin.
For electrical resistances, heating elements, operating range 1100-1250°C.

BRILLALUMAG 3.
M-770; 3 Mg, bal Al.
Annealed: 39,000 TS; 14,000 YS; 30 El; 35 Brin.
Hardened: 53,000 TS; 50,000 YS; 4 El; 65 Brin.
For decorative, light alloy parts; takes high polish.

BRILLALUMAG 5.
M-770; 5 Mg, bal Al.
Annealed: 47,000 TS; 31,000 YS; 28 El; 48 Brin.
Hardened: 69,000 TS; 50,000 YS; 3 El; 90 Brin.
For decorative, light alloy parts; takes high polish.

BRILLIANT.
M-333; 0.70 C, 4 Cr, 1 V, 18 W, bal Fe.
For twist drills, reamers, taps, milling cutters; high speed steel.

BRILLIANT AXL.
M-52; 0.7 C, 4.5 Cr, 18.5 W, 0.6 max Co, 1 2 V, bal Fe.
For twist drills, lathe and planer tools, cutters; high speed steel.

BRILLIANT MM.
M-333; 0.7 C, 5 Mo, 6 W, 4 Cr, 4 V, bal Fe.
For cutters, dies; Type M4; high speed steel.

BRILLIANT WKE.
M-52; 0.8 C, 4.5 Cr, 1.2 Mo, 18.5 W, 5.5 Co, 1 6 V, bal Fe.
For milling cutters, hobs, drills, taps; high speed steel.

BRILLIANT WKE EXTRA.
M-52, 0 8 C, 4 5 Cr, 1 Mo, 18 5 W, 10 Co, 1.6 V, bal Fe.
For milling cutters, planer and shaper tools; high speed steel

BRILLIANT WW
M-333, 0 7 C, 18 W, 4 Cr, 1 V, bal Fe.
For drills, taps, cutters, reamers; Type T1, high speed steel.

BRILLUM.
M-469, 1.5 Cu, 2 Ni, bal Al.
For pistons, light alloy

BRILYBDENUM
M-715, 3 2 C, 2 Si, 0 4 Ni. 0.2 Cr, bal Fe
For piston rings, heat resistant.

BRIMCO.
M-509; 87-88 Cu, 2.36-3 25 Sn, 0 016-0.06 P, 0.21-0.23 Mn, bal Zn
For contacts, corrosion resistant.

BRIMCO BRONZE.
M-1579, 2 5 Sn, 10 Zn, bal Cu
Hard 77,000 TS; 70,000 YS; 8 El; Rock B 83.
Spring. 94,000 TS, 81,000 YS, 4 El; Rock B 90.
For fuse clips, fasteners, lock washers, springs, electrical components
Good formability and strength.

BRIMCOLLOY-100.
M-1579; 86 Cu, 0 5 Sn, 13 5 Zn
½ Hard: 54,000 TS; 48,500 YS; 18 El; B 70 Rock.
Hard: 67,500 TS; 63,000 YS; 5 El, B 78 Rock.
Spring 80,500 TS; 76,000, 3 El, B 87 Rock.
For electrical contacts, jewelry chain relay components
Corrosion resistant. Readily fabricated.

BRIMCOLLOY-200.
M-1579, 86.0 Cu, 1.0 Sn, 13.0 Zn.
Hard: 77,500 TS, 65,200 YS; 5 El; B 82 Rock.
Spring: 84,000 TS; 76,000 YS; 2 El; B 88 Rock.
For electrical contacts, springs, fuse clips, heat exchangers, condensers.
Corrosion resistant, readily fabricated.

BRIMCOLLOY-300.
M-1579; 86.0 Cu, 2.0 Sn, 12.0 Zn.
Hard: 75,000 TS; 67,000 YS; 8 El; B 82 Rock.
Spring: 88,000 TS; 75,000 YS; 3 El; B 89 Rock.
For electrical contacts, springs, fuse clips, retention devices, heat exchangers.
Corrosion resistant, readily fabricated.

BRIMCOLLOY-400.
M-1579; 87 Cu, 2 Sn, 2 Pb, bal Zn.
Half Hard: 58,000 TS; 49,000 YS; 14 El; B 70 Rock.
Hard: 76,000 TS; 70,000 YS; 10 El; B 80 Rock.
For meter and gauge components, bearings, thrust washers, valve parts.
Corrosion resistant, self-lubricating, free-cutting

BRIMOL.
M-715; 2.8 C, 2 Si, 14 Ni, 3 Cr, 7 Cu, bal Fe.
For cylinder liners, rings; austenitic.

BRINALLOY.
M-264; 70 Ni, 16 Cr, 10 Si.
Cast: 120,000 TS; 600 Brin.
For valve seats and discs; resists wear, galling and corrosion.

BRISTAHL.
M-716; 0.2 C, 18 Cr, 8 Ni, bal Fe
For stainless steel parts, stainless.

BRISTOL.
Eng.; 60.8-75.7 Cu, 24.3-39.2 Zn.
For hardware, clocks.

BRISTOL.
European; 0.30 C, 0.90 Cr, 0.65 Ni, 1.0 Mo, 0.6 Al, bal Fe.
Heat treated: 150,000-200,000 TS; 135,000-175,000 YS, 18-16 El; 55-50 RA; 300-400 Brin.
For nitrided parts, gears, cams; nitriding steel.

BRISTOL ALLOY BUTTONS.
Eng; 57-61 Cu, 36-37 Zn, 2.7-5.3 Sn.
For buttons, fixtures; corrosion resistant.

BRISTOL BRASS.
Eng.; 76-61 Cu, 24-39 Zn.
For condenser tubes, pipes, ornamental purposes, same as "Princes Metal."

BRITEST.
M-715, 3.1 T.C., 2.0 Si, 0.8 Mn, 1 Cr, bal Fe
Cast: 58,000 TS, 280 Brin.
For piston rings, cylinder liners, wear resistant

BRITISH ALUMINUM PISTON ALLOY.
M-968; 88 Al, 12 Cu.
For pistons, castings, non-hardenable.

BRITISH ALUMINUM PISTON ALLOY.
M-968, 85 Al, 14 Cu, 1 Mn.
For pistons, castings; non-hardenable

BRITISH ALUMINUM PISTON ALLOY.
M-968; 94.5 Al, 5.5 Ni.
For pistons, castings, non-hardenable.

BRITISH I Steel
0.45 C, 0.62 Mn, 2.8 Cr, 0.43 Ni, 0.9 Mo, 0.20 V, bal Fe.
At 70°F: 167,000 TS, 3.7 El; 7.0 RA.
At 1000°F: 88,000 TS; 9.2 El; 17.5 RA.
At 1200°F: 48,000 TS, 25 El, 55.4 RA.
For ordnance mortar tubes.
Good fatigue resistance.

BRITISH NAVY ANTIFRICTION METAL.
M-561; 5 Cu, 85 Sn, 10 Sb.
For admiralty lining, plastic bearings; Babbitt.

BRITOR.
W, C
For welding; welding to steel.

BRITTANIA, ENGLISH.
Eng.; 90-85 Sn, 0-3 Zn, 1.3 Cu, 5-10 Sb.
For bearings, table ware; corrosion resistant.

BRITTANIA, GERMAN.
Germ.; 70-94 Sn, 0-5 Zn, 1.8-5 Cu, 3.7-5 Sb, 0-9 Pb.
For bearings; Babbitt.

BRITTANIA METAL-1.
M-332; 94-80 Sn, 1.5-5 Zn, 0.9 Cu, 4-16.2 Sb, 1-8.5 Pb, 2-8 Bi.
10,000 TS; 19-11 El; 25-10 RA.
For bearings, table ware; heavy duty.

BRITTANIA METAL-2.
M-332; 91 Sn, 1.5 Cu, 7-5 Sb.
80,000 TS; 50 El; 8 Brin.
For bearings, pewter, table ware; corrosion resistant.

BRITTANIA METAL-3.
M-332; 91-85 Sn, 0-3 Zn, 0.2-1 Cu, 9-11 Sb.
For bearings, table ware.

BRIX.
Eng; 75-60 Ni, 15-20 Cr, 5 Cu, 4 Si, 3 Ti, 2 Al, 1-4 W, 1 B.
For heating elements, heat and corrosion resisting parts; heat and corrosion resistant.

BRM.
M-289; 0.75-0.85 C, 4.2 Cr, 2.1 V, 19 W, 0.6 Mo, bal Fe.
For tools and cutters; oil hardening, high speed steel

BRM
M-783, 0.8 C, 4.15 Cr, 2.1 V, 19 W, 0.6 V, bal Fe
For cutting tools; oil hardening

BROACHING.
M-24, 0.80 C, 0.40 Mn, 0.30 Si, bal Fe
For cutting hard stone, granite, quartz
AISI Type W1 water hardening tool steel.

BROCKHOUSE
M-961; 0.2 C, 18 Cr, 8 Ni, bal Fe.
For case hardening boxes, steam boiler parts; heat resisting

BROLUNICK
Eng, 82 Cu, 7 Al, 5.5 Ni, 4 Fe, 2 Mn.
For corrosion resisting parts, Al-Bronze, tough

BROLUNICK BRONZE.
French, 7 Al, 5.5 Ni, 4 Fe, 2 Mn, bal Cu
For gears, housings, propellers, marine hardware; tough, corrosion resistant

BROMET.
Australia; WC.
For dies, sintered

BRONCO
M-926, copper clad with P-bronze.
For springs, high current carrying capacity.

BRONWITE.
M-815; 20 Mn, 20 Zn, 1 Al, bal Cu.
Die Cast 75,000 TS; 40,000 YS, 20 El.
Sand Cast 60,000-70,000 TS; 30,000-35,000 YS; 25-40 El.
For general die castings, hardware, fixtures.
For die casting copper alloys
Die castable bronze, corrosion resistant

BRONZALUN.
M-250, a bronze with abrasive grains cast in the metal 85 Cu, 15 alumina or carborundum.
For floor plates, stair treads, car steps and door saddles; wear resistant and "anti-slip."

BRONZARK.
M-118; Sn, bal Cu.
For welding electrodes; for cast iron or copper.

BRONZE AU-CADMIUM.
M-897; 1 Cd, bal Cu.
For heating elements; useful operating temperature to 350°C.

BRONZE DEVIL.
M-712; 8.5 Sn, 0.25 P, bal Cu.
For P-bronze welding rods; arc welding.

BRONZE OTSSN3-7-5-1.
Russian; 85.08 Cu, 3.58 Pb, 7.35 Zn, 0.01 P, 3.4 Sn, 0.3 Ni.
Cast: 27,000 TS; 13,000 YS; 17 El; 26 RA.
For hardware, plumbing; free-cutting.

BRONZE, PHOSPHOR GRADE "A."
M-8; 96 Cu, 3.75 Sn, 0.25 P.
Cold rolled: 90,000 TS; 45,000 YS; 10 El.
Wire: 150,000 TS; 0.5 El.
For springs, electrical switches, diaphragms; high strength.

BRONZE, PHOSPHOR GRADE "C."
M-8; 92 Cu, 8 Sn.
Plates: 50,000 TS, 20,000 YS; 73 El; 60 Brin.
Wire: 150,000 TS.
For springs, switches, fittings; tough.

BRONZE, PHOSPHOR GRADE "D."
M-8, 89.5 Cu, 10.5 Sn.
Cold rolled: 92,000 TS; 83,000 YS; 29 El; 218 Brin.
For worm wheels, pumps; tough.

BRONZE, STEAM FITTING.
U.S.; 88 Cu, 8 Sn, 2 Zn, 2 Pb.
For steam fittings, pressure tight.

BRONZE, STEAM VALVE.
U.S., 88 Cu, 10 Sn, 2 Zn.
For steam valves.

BRONZE, STEEL (STAHL).
U.S.; 52-59 Cu, 36-43 Zn, 1 Fe, 2.5-3.0 Mn, 1 Al.
For propellers, marine parts, hardware; same as "Uchatius Bronze."

BRONZE WABBLER.
M-136, Sn, bal Cu.
For rolls; tough and hard.

BRONZE, WEATHERSTRIP.
U.S., 89 Cu, 9.5 Zn, 1.5 Sn.
For weather strips.

BRONZE, WHITE.
U.S., 54 Cu, 42 Zn, 4 Ni, 0.3 Fe + Al.
For ornamental and architectural parts; corrosion resistant.

BRONZE, WIRE.
U.S.; 98.75 Cu, 1.2 Sn, 0.05 Pb.
For electrical purposes, roofing, gutters.

BRONZOCHROM NO. 185.
M-717; Zn, Ni, bal Cu.
180-235 Brin.
For superfacing on steel and cast iron; M.P. 1000-1200°F.

BRONZOCHROM NO. 186.
M-717; Zn, bal Cu
240-290 Brin.
For brazing rod on iron and copper; M.P. 1000-1200°F.

BRONZOCHROM NO. 187.
M-717; Zn, bal Cu.
300 Brin.
For brazing rod on copper; M.P. 1000-1200°F.

BRONZOCHROM 10185.
M-717; Nickel-base alloy powder for overlays on ferrous and nickel base alloys.

BRONZOTEC 10146.
M-717; Copper-base alloy powder for braze welding.

BRONZ-ROD NO. 61.
M-1096; 97 Cu, 2.85 Si, 0.15 Fe.
Welded: 55,000 TS; 22,000 YS; 8 El; Rockwell F85.
For brazing rod for steels and cast iron; high tensile brazing.

BRONZSTOX.
M-214; Sn, Pb, bal Cu.
For bearings, bushings; heavy loads.

BROTERNAL.
M-282, 92 Cu, 1 Mn, 7 Al.
Drawn: 112,000 TS; 85,000 YS; 6 El; 200 Brin.
For periscope tubes, paper mill and dye works equipment; Al bronze, corrosion resistant.

BROWN BAILEY BB4K-TI.
M-472; 0.10 max C, 16-18 Cr, 10-14 Ni, 1.7-2.7 Mo, Cb = 10 × C, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 60-50 El; 75-60 RA; 150-190 Brin.
For acid resistant chemical plant equipment; Type 316 Cb; stainless, austenitic.

BROWN BAILEYS QS.
M-472; 0.4 C, 6-8 Cr, 1 Si.
For valves for internal combustion engines; heat and corrosion resistant.

BROWN BAILEYS QSS.
M-472; 0.4 C, 6-8 Cr, 3 Si, bal Fe.
For valves for internal combustion engines; heat and corrosion resistant.

BROWN BAYLEY BBH.
M-472; 0.15 min C, 12-14 Cr, bal Fe.
Annealed: 88,000 TS; 40,000 YS; 32 El; 68 RA; 170 Brin.
Heat treated: 256,000 TS; 190,000 YS; 6 El; 10 RA; 540 Brin.
For cutlery, valve trim, springs, turbine blades; Type 420, stainless, hardenable.

BROWN-BAYLEYS BB 2 K.
M-472; 0.2 C, 18-22 Cr, 7-12 Ni, other alloys, bal Fe.
89,600 TS.
For chemical plant equipment resisting sulfurous, acetic and sulfuric acids; resists severe chemical corrosion.

BROWNIE EXTRA.
M-1182; 0.80 C, bal Fe.
For drills, taps, reamers, cutters; Type W1; water hardened.

BROWN LABEL.
M-341; 0.5 C, 0.2 Mn, 1.15 Cr, 2.5 W, 0.2 V, 0.75 Si, bal Fe.
For coining and swaging dies, chisels; oil hardening, tough; AISI S1 shock resistant tool steel.

BROWN LABEL.
M-343; 0.85-1.0 C, 3-4 Cr, bal Fe.
For tools, hot work tools and dies, hot shear blades, bull dies; "Hellers Hot Die Steel."

BROWN & SHARPE WATER HARDENING.
M-1172; 1.08-1.18 C, 0.2-0.3 Mn, 0.4-0.5 Cr, bal Fe.
Annealed: 97,000 TS; 56,000 YS; 27 El; 45 RA; 170-200 Brin.
For tools, dies, fixtures, gages, templates; ground flat stock.

BROWN & SHARPE OIL HARDENING.

M-1172; 1.08-1.18 C, 0.7-0.9 Mn, 1.1-1.3 Cr, 0.20-0.35 Mo, bal Fe.

Annealed: 99,000 TS; 58,000 YS; 24 El; 40 RA; 170-200 Brin.

For tools, dies, fixtures, gages, templates; ground flat stock.

BRUSH-10.

M-1037; 0.40-0.70 Be, 2.35-2.70 Co, bal Cu.

Cast: 45,000-50,000 TS; 5000-10,000 PL; 20-30 El; 72-81 Brin.

Cast and Aged: 100,000 TS; 50,000 PL; 3-15 El; 191-241 Brin.

Wrought and Aged: 110,000-125,000 TS; 100,000-120,000 YS; 70,000-95,000 PL; 5-8 El; 79-82 Rock 30 T.

For springs, switches, instrument parts, clutch rings, resistance welding electrodes.

Tough, strong, corrosion resistant, heat treatable. (CA 175).

BRUSH 10-C.

M-1252, M-1037; 0.45-0.65 Be, 2.4-2.6 Co, bal Cu.

Heat treated. 90,000-120,000 TS. 70,000-90,000 YS; 5-12 El; 5-18 RA; 195-262 Brin

For slip rings, contact arms, switch parts, age-hardenable, good conductivity

BRUSH-10X.

M-1037; 0.4-0.7 Be, 2.35-2.7 Co, bal Cu.

Ht-Temper: 110,000-130,000 TS; 100,000-120,000 YS; 8-20 El; B 95-102 Rock.

For wind tunnel components, springs, switch gears, resistance welding electrodes.

High strength up to 800°F. Corrosion resistant. Heat treatable (CA 175).

BRUSH 17.

M-1037; 31 Ni, 0.70 Fe, 1.0 max Mn, 0.3-0.7 Be, 0.15 max Si, bal Cu.

Cast· 76,000 TS; 45,000 YS, 14 El; B 82 Rock.

Age Hardened· 120,000 TS, 85,000 YS; 14 El, C 20 Rock.

For marine hardware, sonar cases, heat exchangers, desalinization equipment.

Corrosion resistant Age-hardenable.

BRUSH 18.

M-1037, 30 Ni, 0.62 Fe, 1.5 max Mn, 0.4-0.6 Be, 0.7-0.9 Si, bal Cu.

Cast· 100,000 TS; 70,000 YS; 12 El, B 94 Rock.

Age Hardened: 120,000 TS; 80,000 YS; 13 El; C 30 Rock.

For marine hardware, desalinization equipment, heat exchangers, valve bodies, sonar cases

Corrosion resistant. Age-hardenable.

BRUSH 20-C

M-1252, M-1037, 1.90-2.15 Be, 0.35-0.65 Co, bal Cu.

Heat treated. 150,000-175,000 TS; 125,000-160,000 YS; 1-4 El; 1-5 RA, 352-426 Brin.

For bearings, gears, valve and pump parts; age-hardenable, wear and corrosion resistant.

BRUSH 25.

M-1037; 1.8-2.0 Be, 0.2-0.3 Co, bal Cu.

For corrosion and wear resistant parts; corrosion and wear resistant.

BRUSH 35-C.

M-1252, M-1037; 0.25-0.50 Be, 1.4-1.6 Ni, bal Cu.

Heat treated: 70,000-90,000 TS; 50,000-70,000 YS; 5-17 El, 5-25 RA; 180-210 Brin.

For resistance welding dies and jaws; age-hardenable, high conductivity.

BRUSH 50.

M-1037; 0.25-0.50 Be, 1.4-1.7 Co, 0.9-1.1 Ag, bal Cu.

Annealed: 35,000-55,000 TS; 25,000 YS; 20-35 El; B 35 Rock.

HT-Temper: 120,000 TS; 110,000 YS; 8-20 El; B 95-102 Rock.

For resistance welding applications, electrodes.

Heat treatable, corrosion resistant.

BRUSH 50 C.

M-1037; 0.40-0.65 Be, 1.4-1.7 Co, 1.0-1.15 Ag, bal Cu.

Cast: 45,000-60,000 TS; 15,000-35,000 YS; B 50-65 Rock.

Heat Treated 100,000 TS, 75,000 YS; 3-15 El; B 92-100 Rock.

For resistance welding electrodes; dies and holders.

RWMA Class III, heat treatable, corrosion resistant.

BRUSH 55 C.

M-1037; 0.45-0.65 Be, 2.4-2.6 Co, bal Cu.

Cast· 90,000-120,000 TS, 70,000-90,000 YS; 5-12 El; 5-18 RA; B 90-103 Rock.

For resistance welding electrodes, circuit breaker and switch parts, slip rings, contact arms, welder bearings

Good conductivity. Resists elevated temperatures to 700°F. RWMA Class 3.

BRUSH 125

M-1037; 1.8-2.00 Be, 0.12-0.18 Co + Ni, bal Cu.

Magnetic mass susceptibility $-0.5\text{x}10^{-1}$.

Magnetic permeability 0.999997.

Heat Treated. 200,000 TS; 175,000 YS, 2-5 El; C 42 Rock

For strain members in nonmagnetic cables, wire forms, springs

High strength, nonmagnetic, heat treatable, corrosion resistant.

BRUSH 165

M-1037, 1.6-1.8 Be, 0.2-0.3 Co, bal Cu

For corrosion and wear resistant parts; corrosion and wear resistant

BRUSH 165 C.

M-1037, 1.6-1.85 Be, 0.2-0.65 Co, bal Cu

Cast, 73,000 TS, 38,000 YS; 23 El; B 78 Rock.

Heat Treated 150,000 TS, 140,000 YS, 2-4 El, C 37 Rock

For plastic tooling and pressure containers

RWMA Class IV, corrosion resistant, heat treatable, tough

BRUSH 190

M-1037, 1.80-2.05 Be, 0.2-0.3 Co, 0.20 min Co + Ni, bal Cu

Condition AM 105,000 TS, 95,000 YS, 20 El, Rock 40 (30N).

Condition XHMS 190,000 TS; 180,000 YS; 3 El; Rock 61 (30N)

For springs, shafts, fasteners

(CA 172) Corrosion resistant, heat treatable.

BRUSH 200 C.

M-1037 2 Be, 4 max additives, bal Ni.

Annealed 130,000 TS, 57,000 YS; 30 El, B 97 Rock.

Aged· 240,000 TS; 190,000 YS, 5 El; C 54 Rock.

For safety tools, plastic molds and cores, fuel pump impellers, mechanical seals.

Good structural stability at elevated temperatures.

BRUSH 220-C.

M-1037; 2.0-2.3 Be, 0.4 max C, bal Ni.

For corrosion and wear resistant parts; corrosion and wear resistant.

BRUSH 220-CC.

M-1037; 2.0-2.3 Be, 0.8 max Cr, 0.4 max C, bal Ni.

For corrosion and wear resistant parts; corrosion and wear resistant.

BRUSH 221-C.
M-1037; 2.0-2.3 Be, 0.5-1.0 C, bal Ni.
For corrosion and wear resistant parts; corrosion and wear resistant.

BRUSH 221-CC.
M-1037; 2.0-2.3 Be, 0.8 max Cr, 0.5-1.0 C, bal Ni.
For corrosion and wear resistant parts; corrosion and wear resistant.

BRUSH 245 C.
M-1037; 2.3-2.55 Be, 0.35-0.65 Co, bal Cu.
Cast: 83,000 TS; 45,000 YS; 23 El; B 84 Rock.
Heat Treated: 175,000 TS; 165,000 YS; 1-2 El; C 40-45 Rock.
For plastic tooling, pressure containers.
Heat treatable, corrosion resistant, impact resistant.

BRUSH 250 C.
M-1037; 2.50-2.75 Be, 0.35-0.65 Co, bal Cu.
Cast: 140,000-165,000 TS; 110,000-130,000 YS; 0-2 El; 0-2 RA; C 42-48 Rock.
For plastic molds, deep drawing dies, zinc die casting dies.
High wear resistance.

BRUSH 260-C.
M-1252, M-1037; 2.55-2.80 Be, 0.4 max C, bal Ni.
Cast: 115,000-125,000 TS; 60,000-70,000 YS; 7-12 El; 5-10 RA; 250-283 Brin.
Heat treated 200,000-220,000 TS; 190,000-210,000 YS; 0-2 El; 0-1 RA; 500-560 Brin.
For aircraft parts, molds for plastics, age-hardenable, heat resistant to 800°F

BRUSH 260-CC.
M 1037; 2.55-2.8 Be, 0.8 max Cr, 0.4 max C, bal Ni.
For springs, bellows; age hardenable

BRUSH 261-C
M-1252, M-1037; 2.55-2.80 Be, 0.5-1.0 C, bal Ni.
For aircraft parts, molds for plastics; age hardenable, heat resistant to 800°F.

BRUSH 261-CC.
M-1037, 2.55-2.8 Be, 0.8 max Cr, 0.5-1.0 C, bal Ni.
For springs, bellows; age hardenable.

BRUSH 275-C
M-1252, M-1037, 2.50-2.75 Be, 0.35-0.65 Co, bal Cu.
Heat treated. 140,000-165,000 TS; 110,000-130,000 YS, 0-2 El; 0-2 RA, 393-460 Brin.
For plastic molds, deep drawing dies, age--hardenable, wear resistant

BRUSH BERYLLIUM NO 6
M-1037, 2.4-2.6 Be, 1.2-1.3 Ni, bal Cu.
Heat treated· 76,000-193,000 TS, 68,000-85,000 YS; 34-0 El; 33-2 RA; 135-387 Brin.
For springs, diaphragms, instrument parts; age-hardenable; now Brush 240-C.

BRUSH-M25.
M-1037; 1.8-2.05 Be, 0.20-0.30 Co, 0.2 Pb, bal Cu.
HT Temper: 175,000-215,000 TS; 150,000-200,000 YS; 2-5 El; C 39-45 Rock
Annealed· 65,000-85,000 TS; 25,000 YS; 50 El; B 65 Rock.
For gears, shafts, screw machine products, fasteners.
Free-cutting (CA 172), heat treatable, corrosion resistant.

BRUSH M220C.
M-1037; 2.0-2.3 Be, 0.5-0.75 C, bal Ni.
Heat Treated: 170,000-190,000 TS; 160,000-180,000 YS; 1-2 El; C 48-52 Rock.
For molds, plungers, forming tools and plungers in the glass industry.
Age-hardenable. High strength, corrosion and oxidation resistant.

BRUSH M260C.
M-1037; 2.55-2.80 Be, 0.4 max C, bal Ni.
Cast: 115,000-125,000 TS; 60,000-70,000 YS; 7-12 El; 5-10 RA; C 24-30 Rock.
Aged: 210,000-230,000 TS; 200,000-210,000 YS; 1-2 El; 0-1 RA; C 50-54 Rock.
For turbine wheels, glass molds, valve bodies, fuel injection tips.
Age-hardenable, corrosion resistant.
High temperature resistant.

BRUSH QMV.
M-1037; Be, bal Cu.
For corrosion and wear resistant parts; age-hardenable.

BRUSH WIRE.
U.S.; 64.25 Cu, 35 Zn, 0.75 Sn.
For wire.

BRUSH ZrII-5% Be.
M-1037; 5 Be, bal Zr.
For brazing Zircalloy alloys.
High temperature brazing alloy.

BRYAN.
M-1705; 1.10 C, 0.30 Mn, 0.50 Si, 0.25 Cr, bal Fe.
Water hardening carbon tool steel, good hardness and wear, AISI W4.

BRYIRON.
M-718; 2.96 T.C., 0.73 Mn, 1.2 Si, 1.5 Ni, bal Fe.
51,000 TS; 221 Brin.
For liners, pistons; Tr. S. 4160; Def. 0.207".

BRYMILL BRM-1.
M-478, 0.10-0.18 C, 0.5-1.1 Mn, bal Fe.
Annealed 60,000 TS; 36,000 YS; 38 El; B 70 Rock.
For gears, fasteners, bolts, machine tool parts.
Case hardening

BRYMILL BRM-5.
M-478, 0.25-0.35 C, bal Fe.
Drawn: 89,600 TS, 15 El, 40 RA.
For bolts, studs, jack spindles, water hardened.

BRYMILL BRM-6.
M-478; 0.35-0.45 C, bal Fe.
Drawn 103,000 TS, 10 El; 35 RA.
For axles, shafts, racks, clutch plates, chain links; water hardened.

BRYMILL CH-2
M-478; 0.12-0.18 C, 0.90-1.5 Mn, 0.08-0.15 S, bal Fe.
Heat treated. 98,500 TS; 20 El; 50 RA.
For screw machine products, gears, bolts, fasteners; case hardened, free-cutting.

BRYMILL CH-8.
M-478, 0.08-0.55 C, 2.75-3.5 Ni, bal Fe.
Heat treated. 107,500 TS; 30 El; 50 RA.
For gears, bolts, crankshafts, camshafts; case hardened or thru hardened, tough.

BRYMILL DH-11
M-478, 0.4 C, 1 Ni, bal Fe
For shafts, axles, gears, machinery parts; case hardening.

BRYMILL DH12.
M-478; 0.30-0.40 C, 1.3-1.7 Mn, bal Fe.
For gears, bolts, machine tool parts; oil hardened.

BRYMILL DH13
M-478; 0.25-0.35 C, 0.35-0.75 Mn, 2.75-3.5 Ni, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

BS 1.
M-459; C, bal Fe.
For rock drills; water hardening.

BS 4.
M-459; C, bal Fe.
For rock drills; water hardening.

B.S.C. 3 NS.
M-1724; 0.25-0.37 C, 2.75-3.75 Ni, 0.30 Cr, bal Fe.
Normalized: 76,000-112,000 TS; 44,800 YS; 24 El; 45 RA; 152-229 Brin.
Oil treated: 100,800-132,200 TS; 71,000 YS; 22 El; 50 RA; 201-277 Brin.
For crankshafts, axles, connecting rods, forgings; Iz-35.

B.S.C. 3 1/2 NS.
M-1724; 0.35-0.45 C, 3.25-3.75 Ni, 0.30 Cr, bal Fe.
Oil treated: 123,000-145,600 TS; 18 El; 50 RA; 241-293 Brin.
For crankshafts, axles, connecting rods, forgings; Iz-35.

B.S.C. 5 CC.
M-1724; 1.0 C, 5.0 Cr, 0.45 V, 1.1 Mo, 0.6 Mn, bal Fe.
For brick mold liners, thread rolling dies, cold work steel, air hardenable.

B.S.C. "A."
M-1724; 0.45-0.50 C, 0.50 max Ni, 0.7-0.9 Mn, bal Fe.
Normalized: 89,600-112,000 TS; 44,800 YS; 20 El; 35 RA; 163-212 Brin.
Oil treated: 100,800-134,000 TS; 62,700 YS; 18 El; 40 RA; 197-285 Brin.
For gun and other mechanism parts, keys, shafts, gears, cylinders; suitable for surface hardening.

B.S.C. "A-31."
M-1724: 0.50-0.60 C, 0.60-0.80 Mn, bal Fe.
Normalized: 100,800 TS; 18 El; 40 RA; 197-241 Brin.
Oil treated: 123,200 TS; 65,000-85,000 YS; 15 El; 35 RA; 235-285 Brin.
For cylinders, gears, cams, mechanism parts; suitable for surface hardening, oil hardening, shock resistant.

B.S.C. A.W.
M-1724; 0.7 C, 3.75 Cr, 14 W, 0.65 V, bal Fe.
For drills, cutters, reamers, blanking and piercing dies; high speed steel.

B.S.C. "B.C.T.B."
M-1724; 0.55-0.65 C, 0.5-0.8 Cr, 0.5-0.8 Mn, bal Fe.
Normalized: 144,000 TS; 67,200 YS, 15 El; 277 Brin.
Oil treated: 126,000-160,000 TS; 90,000-112,000 YS, 18-23 El; 341 Brin.
For mandrels, gear wheels, dies; axles, pinions, cylinder liners.

B.S.C. C 12.
M-1724; 1.8 C, 12 Cr, 0.5 V, 1 Mo, bal Fe.
For dies, wortle plates, drawing dies; non-deforming.

B.S.C. C.D.
M-1724; 2 C, 12 Cr, bal Fe.
For dies, cold press cutting dies; non-deforming.

B.S.C. "C.H.-2N."
M-1724; 0.10-0.15 C, 2.0-2.5 Ni, bal Fe.
Normalized: 56,000 TS; 30,200 YS; 30 El; 55 RA; 103 Brin.
For general case-hardened objects; Iz-50.

B.S.C. "C.H.-3N."
M-1724; 0.10-0.15 C, 2.75-3.50 Ni, 0.30 max Cr, bal Fe.
Normalized: 67,200 TS; 36,000 YS; 28 El; 55 RA; 137 Brin.
Hardened: 104,400 TS; 67,200 YS; 18 El; 45 RA.
For general case-hardened objects; gears, cams, cam shafts, fasteners; Iz-40.

B.S.C. "C.H.-5 N."
M-1724; 0.09-0.16 C, 4.6-5.50 Ni, 0.20 max Cr, bal Fe.
Normalized: 71,700 TS; 50,000 YS; 28 El; 55 RA.
Hardened: 190,000 TS; 112,000 YS; 13 El; 40 RA.
For gear wheels; tough core.

B.S.C. CVM2.
M-1724; 0.36 C, 1.4 W, 5.0 Cr, 0.3 V, 1.35 Mo, 0.9 Si, bal Fe.
For blanking and forging dies, punches, shears; hot work steel; air or oil hardened.

B.S.C. CVM3.
M-1724; 0.4 C, 5.0 Cr, 1.1 V, 1.35 Mo, 0.9 Si, bal Fe.
For blanking and forging dies, punches, shears, hot work steel, oil hardened.

B.S.C. "C.H.M.S."
M-1724, 0.10-0.18 C, 0.6-0.9 Mn, bal Fe.
Normalized: 58,300 TS; 36,500 YS; 28 El; 50 RA; 111 Brin.
Hardened: 69,400 TS; 50,000 YS; 20 El; 50 RA.
For wheels, cam shafts, pins, levers, spindles; Iz-50.

B.S.C. "C.H.N.C."
M-1724, 0.09-0.16 C, 3.0-3.75 Ni, 0.8-1.1 Cr, bal Fe.
Hardened: 100,800-207,000 TS; 78,500-123,200 YS; 20-12 El; 55-35 RA; 192-277 Brin
For heavily loaded gears, shafts; Iz-18-45.

B.S.C. "C.H.N.M."
M-1724; 0.15-0.20 C, 1.75-2.1 Ni, 0.20-0.35 Mo, bal Fe.
Normalized: 74,000-85,200 TS; 52,000 YS; 25 El; 50 RA; 143-166 Brin.
Hardened: 112,000-123,200 TS; 89,600 YS; 17 El; 40 RA; 228-255 Brin.
For ball and roller races; Iz-50.

B.S.C. "C.O.M.O."
M-1724; 0.07-0.15 C, 0.20-0.35 Cu, 0.20 Mo, bal Fe.
Normalized. 58,000-78,400 TS; 33,000 YS; 25 El; 50 RA; 111-152 Brin.
For boiler and superheater tubes, boiler drums; high creep limit.

B.S.C. C.V.M.
M-1724, 0.35 C, 5 Cr, 0.3 V, 1.25 Mo, 0.9 Si, bal Fe.
For hot forging and die casting dies, oil hardening.

B.S.C. H.S.M.
M-1724; 0.3 C, 3 Cr, 10 W, 0.3 V, bal Fe.
For hot forging dies, hot work steel.

B.S.C. "H.T.C."
M-1724, 0.37-0.43 C, 0.6-0.9 Mn, 0.5 max Ni, bal Fe.
Normalized: 78,400-100,800 TS; 40,200 YS; 23 El, 40 RA, 140-197 Brin.
Oil treated: 89,600-112,000 TS; 53,000 YS, 22 El; 45 RA; 170-241 Brin.
For crankshafts, shafts, spindles, aero engine cylinders, axles, connecting rods; suitable for surface hardening.

B.S.C. "H.T.C.N."
M-1724; 0.35-0.45 C, 0.6-1.2 Mn, 0.5-1.0 Ni, bal Fe.
Oil treated: 94,000-112,000 TS; 22 El; 45 RA; 174-223 Brin.
For crankshafts, spindles, aero engine cylinders, connecting rods; Iz-35.

B.S.C. MED. "C."
M-1724; 0.25-0.35 C, 0.40-0.80 Mn, 0.5 max Ni, bal Fe.
Normalized: 58,200-78,400 TS; 36,000 YS; 25 El; 50 RA; 109-163 Brin.

Oil treated: 78,400 TS; 47,000 YS; 24 El; 48 RA; 152 Brin.

For locomotive and automobile axles, armature shafts, lathe and other spindles, marine shafting, water hardening.

B.S.C. M.I.C.

M-1724; 0.9 C, 1.6 Mn, 0.35 Cr, bal Fe.

For tools, dies, taps, gauges; non-deforming.

B.S.C. M.I.C.4.

M-1724; 0.95 C, 0.5 W, 0.5 Cr, 0.2 V, 1.25 Mn, bal Fe.

For paper and metal slitters, wood knives, shears, cold work steel, oil hardened.

B.S.C. M.I.C.8.

M-1724; 1.4 C, 0.25 Mo, 1.0 Si, 0.3-1.0 Mn, bal Fe.

For gages, jigs, drawing and forming dies; graphitic steel, oil hardened.

B.S.C "N.C."

M-1724, 0.18-0.25 C, 3.0-3.75 Ni, 0.4-0.8 Cr, bal Fe

Oil treated: 112,000-134,000 TS, 89,600 YS; 19 El; 55 RA, 217-285 Brin.

For bolts, studs, shafts, axles, crankshafts, for highly stressed parts; Iz-40

B.S.C. "NILEX"

M-1724, C, 36 Ni, bal Fe.

Rolled: 89,00-112,000 TS; 40 El, 55 RA.

For use where minimum coefficient of expansion is required.

B.S.C "S.H.N.C."

M-1724, 0.25-0.32 C, 3.75-4.5 Ni, 1.0-1.5 Cr, bal Fe.

Air hardened 224,000-280,000 TS, 168,000 YS; 12 El; 25 RA, 444-555 Brin.

Hardened and tempered. 134,400-156,800 TS, 98,500 YS; 18 El, 50 RA, 240-311 Brin

For highly stressed shafts, gears, tubes, turnbuckles; air hardening steel; Iz 15-35.

B.S.C "Si-Cr"

M-1724; 0.4-0.5 C, 3.5-4.25 Si, 0.4-0.6 Mn, 7.5-8.5 Cr, bal Fe

Oil treated 123,200-156,800 TS, 100,800 YS, 18 El; 45 RA, 255-320 Brin.

For exhaust valves for high duty, non-scaling steel, notch-brittle when cold

B.S.C. "Si-Mn"

M-1724, 0.50-0.60 C, 1.5-2.0 Si, 0.6-1.0 Mn, bal Fe.

179,000-224,000 TS; 145,600 YS, 7 El, 364-460 Brin.

For spring plates, laminated automobile springs, oil hardening.

B.S.C SUPER C 12.

M-1724, 1.6 C, 12 Cr, 0.5 V, bal Fe.

For dies, press dies, non-deforming

B.S.C. SUPER "C.H.N.C"

M-1724, 0.14-0.18 C, 4-4.5 Ni, 1-1.3 Cr, 0.30 max Mo, bal Fe.

Hardened: 190,000 TS, 145,600 YS, 12 El; 35 RA

For exceedingly high strength core; Iz-25.

B.S.C. SUPER "S.H.N.C."

M-1724; 0.25-0.32 C, 3.75-4.5 Ni, 1.0-1.5 Cr, 0.15-0.25 Mo, bal Fe

Air hardened. 224,000-280,000 TS; 179,000 YS; 12 El; 25 RA; 450-555 Brin

Hardened and tempered: 134,400-168,000 TS, 100,800 YS; 18 El, 50 RA, 250-311 Brin.

For forgings, tubes, shafts; air hardening steel; Iz-15-35.

B.S.C. SUPERTOUGH "A."

M-1724; 0.10-0.15 C, 1.4-1.8 Mn, bal Fe.

Normalized: 76,000-98,600 TS; 50,000 YS; 25 El; 55 RA; 143-207 Brin.

Oil hardened: 76,000-98,600 TS; 56,000 YS; 30 El; 60 RA; 174-217 Brin.

Case hardened: 89,600-100,800 TS; 44,800 YS; 28 El; 50 RA; 143-174 Brin.

For gear wheels, cam shafts, pins, levers, spindles, railway work; tough core; Iz-50-80.

B.S.C. SUPERTOUGH "B."

M-1724; 0.25-0.30 C, 1.4-1.8 Mn, bal Fe.

Oil hardened: 98,500-123,200 TS; 71,700 YS; 20 El; 50 RA; 196-255 Brin.

For crankshafts, connecting rods, railway axles, armature spindles, tough core; Iz-50.

B.S.C SUPERTOUGH "C."

M-1724; 0.25-0.30 C, 1.4-1.8 Mn, 0.20-0.30 Mo, bal Fe.

Oil hardened: 112,000-134,000 TS; 89,600 YS; 20 El; 50 RA; 223-286 Brin.

For crankshafts, connecting rods, railway axles, armature spindles; Iz-50; tough.

B.S.C. SUPERTOUGH "C-20."

M-1724; 0.15-0.20 C, 1.5-1.8 Mn, 0.5-0.7 Ni, 0.25-0.30 Mo, bal Fe.

Oil hardened. 89,600-112,000 TS; 67,200 YS; 20 El; 50 RA; 183-235 Brin.

For general use, axles, railway parts; Iz-70; good workability.

B.S.C. SUPER "V.N.C.A."

M-1724; 0.25-0.35 C, 3.0-3.75 Ni, 0.5-0.8 Cr, 0.15-0.25 Mo, bal Fe.

Oil treated. 132,000-156,000 TS, 112,000 YS, 18 El; 45 RA, 269-341 Brin.

For aero and automotive engine crankshafts, propellers, shafts, gear shafts, pressure vessels; great toughness, Iz-40.

B.S.C. "V.A. 65."

M-1724; 0.22-0.28 C, 2.75-3.50 Ni, 1.0-1.4 Cr, 0.15-0.25 Mo, bal Fe.

Oil treated: 145,600-157,000 TS, 125,400 YS; 17 El; 40 RA, 293-321 Brin

For highly stressed aero engine connecting rods; also known as "Non-Brit;" Iz-35.

B.S.C. V.A.P.

M-1724; 0.78 C, 4 Cr, 18 W, 1.3 V, bal Fe.

For twist drills, broaches, cutters; high speed steel

B.S.C. "V.C.M."

M-1724, 0.30-0.35 C, 0.5-0.7 Ni, 0.7-1.5 Cr, 1.0-1.5 Mo, bal Fe.

Oil treated: 123,000-145,600 TS; 112,000 YS; 18 El; 50 RA; 248-293 Brin

For studs, bolts, used in high temperature and high pressure steam generating plants, high creep limit, Iz-40

B.S.C. "V.H.R.D."

M-1724; 0.7-1.0 C, 0.15-0.20 Si, 0.3-0.5 Mn, bal Fe.

For mandrels, drills, dies, wear resisting parts; suitable for surface hardening

B.S.C "V.N.C.A."

M-1724, 0.25-0.35 C, 3.0-3.75 Ni, 0.5-0.8 Cr, bal Fe.

Oil treated. 123,000-145-600 TS, 100,800 YS; 18 El; 50 RA, 240-341 Brin.

For aero and automotive engine crankshafts, propellers, shafts, gear shafts, pressure vessels; great toughness; Iz-40.

B.S.C. "V.N.C.G."

M-1724, 0.28-0.32 C, 3.0-3.75 Ni, 0.55-0.70 Cr, bal Fe.

Oil treated: 224,000-280,000 TS, 179,200 YS; 10 El; 25 RA; 429-555 Brin.

For shock resisting gears; Iz-10.

BSEM 558.

M-106; same as RR.250.

BS 4.
M-459; C, bal Fe.
For rock drills; water hardening.

B.S.C. 3 NS.
M-1724; 0.25-0.37 C, 2.75-3.75 Ni, 0.30 Cr, bal Fe.
Normalized: 76,000-112,000 TS; 44,800 YS; 24 El; 45 RA; 152-229 Brin.
Oil treated: 100,800-132,200 TS; 71,000 YS; 22 El; 50 RA; 201-277 Brin.
For crankshafts, axles, connecting rods, forgings; Iz-35.

B.S.C. 3 1/2 NS.
M-1724; 0.35-0.45 C, 3.25-3.75 Ni, 0.30 Cr, bal Fe.
Oil treated: 123,000-145,600 TS; 18 El; 50 RA; 241-293 Brin.
For crankshafts, axles, connecting rods, forgings; Iz-35.

B.S.C. 5 CC.
M-1724; 1.0 C, 5.0 Cr, 0.45 V, 1.1 Mo, 0.6 Mn, bal Fe.
For brick mold liners, thread rolling dies, cold work steel, air hardenable.

B.S.C. "A."
M-1724; 0.45-0.50 C, 0.50 max Ni, 0.7-0.9 Mn, bal Fe.
Normalized: 89,600-112,000 TS; 44,800 YS, 20 El; 35 RA; 163-212 Brin.
Oil treated: 100,800-134,000 TS; 62,700 YS; 18 El; 40 RA; 197-285 Brin.
For gun and other mechanism parts, keys, shafts, gears, cylinders; suitable for surface hardening.

B.S.C. "A-31."
M-1724: 0.50-0.60 C, 0.60-0.80 Mn, bal Fe.
Normalized: 100,800 TS; 18 El; 40 RA; 197-241 Brin.
Oil treated: 123,200 TS; 65,000-85,000 YS; 15 El; 35 RA; 235-285 Brin.
For cylinders, gears, cams, mechanism parts; suitable for surface hardening, oil hardening, shock resistant.

B.S.C. A.W.
M-1724; 0 7 C, 3.75 Cr, 14 W, 0.65 V, bal Fe.
For drills, cutters, reamers, blanking and piercing dies; high speed steel.

B.S.C. "B.C.T.B."
M-1724; 0.55-0.65 C, 0.5-0.8 Cr, 0.5-0.8 Mn, bal Fe.
Normalized: 144,000 TS; 67,200 YS; 15 El, 277 Brin.
Oil treated: 126,000-160,000 TS; 90,000-112,000 YS; 18-23 El; 341 Brin.
For mandrels, gear wheels, dies; axles, pinions, cylinder liners.

B.S.C. C 12.
M-1724; 1.8 C, 12 Cr, 0.5 V, 1 Mo, bal Fe.
For dies, wortle plates, drawing dies; non-deforming.

B.S.C. C.D.
M-1724; 2 C, 12 Cr, bal Fe.
For dies, cold press cutting dies; non-deforming.

B.S.C. "C.H.-2N."
M-1724; 0.10-0.15 C, 2.0-2.5 Ni, bal Fe.
Normalized: 56,000 TS; 30,200 YS; 30 El; 55 RA; 103 Brin.
For general case-hardened objects; Iz-50.

B.S.C. "C.H.-3N."
M-1724; 0.10-0.15 C, 2.75-3.50 Ni, 0.30 max Cr, bal Fe.
Normalized: 67,200 TS; 36,000 YS; 28 El; 55 RA; 137 Brin.
Hardened: 104,400 TS; 67,200 YS; 18 El; 45 RA.
For general case-hardened objects; gears, cams, cam shafts, fasteners; Iz-40.

B.S.C. "C.H.-5 N."
M-1724; 0.09-0.16 C, 4.6-5.50 Ni, 0.20 max Cr, bal Fe.
Normalized: 71,700 TS; 50,000 YS; 28 El; 55 RA.
Hardened: 190,000 TS; 112,000 YS; 13 El; 40 RA.
For gear wheels; tough core.

B.S.C. CVM2.
M-1724; 0.36 C, 1.4 W, 5.0 Cr, 0.3 V, 1.35 Mo, 0 9 Si, bal Fe.
For blanking and forging dies, punches, shears; hot work steel; air or oil hardened.

B.S.C. CVM3.
M-1724, 0.4 C, 5.0 Cr, 1.1 V, 1.35 Mo, 0.9 Si, bal Fe.
For blanking and forging dies, punches, shears, hot work steel, oil hardened.

B.S.C. "C.H.M.S."
M-1724; 0.10-0.18 C, 0.6-0.9 Mn, bal Fe.
Normalized: 58,300 TS, 36,500 YS; 28 El; 50 RA; 111 Brin.
Hardened: 69,400 TS; 50,000 YS; 20 El; 50 RA.
For wheels, cam shafts, pins, levers, spindles; Iz-50.

B.S C. "C.H.N.C."
M-1724; 0.09-0.16 C, 3.0-3.75 Ni, 0 8-1.1 Cr, bal Fe.
Hardened: 100,800-207,000 TS; 78,500-123,200 YS; 20-12 El; 55-35 RA, 192-277 Brin
For heavily loaded gears, shafts; Iz-18-45

B S C. "C.H.N.M."
M-1724; 0.15-0.20 C, 1.75-2 1 Ni, 0.20-0 35 Mo, bal Fe.
Normalized: 74,000-85,200 TS, 52,000 YS; 25 El; 50 RA; 143-166 Brin.
Hardened: 112,000-123,200 TS; 89,600 YS, 17 El; 40 RA; 228-255 Brin.
For ball and roller races; Iz-50.

B S.C. "C.O.M.O."
M-1724; 0.07-0.15 C, 0 20-0.35 Cu, 0 20 Mo, bal Fe.
Normalized: 58,000-78,400 TS, 33,000 YS; 25 El; 50 RA, 111-152 Brin.
For boiler and superheater tubes, boiler drums; high creep limit.

B.S.C. C.V.M.
M-1724, 0.35 C, 5 Cr, 0 3 V, 1.25 Mo, 0 9 Si, bal Fe.
For hot forging and die casting dies, oil hardening.

B.S C. H.S M.
M-1724; 0.3 C, 3 Cr, 10 W, 0 3 V, bal Fe.
For hot forging dies, hot work steel.

B S.C. "H T.C."
M-1724, 0.37-0.43 C, 0 6-0 9 Mn, 0.5 max Ni, bal Fe.
Normalized: 78,400-100,800 TS; 40,200 YS, 23 El; 40 RA, 140-197 Brin.
Oil treated· 89,600-112,000 TS; 53,000 YS; 22 El; 45 RA; 170-241 Brin.
For crankshafts, shafts, spindles, aero engine cylinders, axles, connecting rods; suitable for surface hardening.

B.S.C. "H.T.C.N."
M-1724; 0.35-0.45 C, 0.6-1.2 Mn, 0.5-1.0 Ni, bal Fe.
Oil treated: 94,000-112,000 TS; 22 El; 45 RA; 174-223 Brin.
For crankshafts, spindles, aero engine cylinders, connecting rods; Iz-35.

B.S.C. MED. "C."
M-1724; 0.25-0.35 C, 0.40-0.80 Mn, 0.5 max Ni, bal Fe.
Normalized: 58,200-78,400 TS; 36,000 YS; 25 El; 50 RA; 109-163 Brin.

Oil treated: 78,400 TS; 47,000 YS; 24 El; 48 RA; 152 Brin.
For locomotive and automobile axles, armature shafts, lathe and other spindles, marine shafting, water hardening.

B.S.C. M.I.C.
M-1724; 0.9 C, 1.6 Mn, 0.35 Cr, bal Fe.
For tools, dies, taps, gauges; non-deforming.

B.S.C. M.I.C.4.
M-1724; 0.95 C, 0.5 W, 0.5 Cr, 0.2 V, 1.25 Mn, bal Fe.
For paper and metal slitters, wood knives, shears, cold work steel, oil hardened.

B.S.C. M.I.C.8.
M-1724, 1.4 C, 0.25 Mo, 1.0 Si, 0.3-1.0 Mn, bal Fe.
For gages, jigs, drawing and forming dies; graphitic steel, oil hardened.

B.S.C. "N.C."
M-1724, 0.18-0.25 C, 3.0-3.75 Ni, 0.4-0.8 Cr, bal Fe.
Oil treated: 112,000-134,000 TS; 89,600 YS; 19 El; 55 RA; 217-285 Brin.
For bolts, studs, shafts, axles, crankshafts; for highly stressed parts; Iz-40.

B.S.C. "NILEX"
M-1724, C, 36 Ni, bal Fe.
Rolled: 89,00-112,000 TS; 40 El, 55 RA
For use where minimum coefficient of expansion is required.

B.S.C. "S.H.N.C."
M-1724, 0.25-0.32 C, 3.75-4.5 Ni, 1.0-1.5 Cr, bal Fe.
Air hardened: 224,000-280,000 TS, 168,000 YS, 12 El, 25 RA; 444-555 Brin.
Hardened and tempered: 134,400-156,800 TS; 98,500 YS, 18 El, 50 RA, 240-311 Brin
For highly stressed shafts, gears, tubes, turnbuckles, air hardening steel; Iz-15-35

B.S.C. "Si Cr."
M-1724, 0.4-0.5 C, 3.5-4.25 Si, 0.4-0.6 Mn, 7.5-8.5 Cr, bal Fe
Oil treated. 123,200-156,800 TS, 100,800 YS; 18 El; 45 RA; 255-320 Brin
For exhaust valves for high duty, non scaling steel, notch-brittle when cold.

B.S.C. "Si-Mn"
M-1724, 0.50-0.60 C, 1.5-2.0 Si, 0.6-1.0 Mn, bal Fe.
179,000-224,000 TS, 145,600 YS; 7 El; 364-460 Brin.
For spring plates, laminated automobile springs, oil hardening

B.S.C. SUPER C 12
M-1724; 1.6 C, 12 Cr, 0.5 V, bal Fe.
For dies, press dies, non-deforming.

B.S.C. SUPER "C.H.N.C."
M-1724, 0.14-0.18 C, 4-4.5 Ni, 1-1.3 Cr, 0.30 max Mo, bal Fe.
Hardened: 190,000 TS, 145,600 YS, 12 El; 35 RA.
For exceedingly high strength core, Iz-25.

B.S.C. SUPER "S.H.N.C."
M-1724; 0.25-0.32 C, 3.75-4.5 Ni, 1.0-1.5 Cr, 0.15-0.25 Mo, bal Fe.
Air hardened: 224,000-280,000 TS; 179,000 YS; 12 El; 25 RA; 450-555 Brin.
Hardened and tempered: 134,400-168,000 TS, 100,800 YS, 18 El, 50 RA; 250-311 Brin.
For forgings, tubes, shafts; air hardening steel; Iz-15-35.

B.S.C. SUPERTOUGH "A."
M-1724; 0.10-0.15 C, 1.4-1.8 Mn, bal Fe.
Normalized: 76,000-98,600 TS; 50,000 YS; 25 El; 55 RA; 143-207 Brin.
Oil hardened: 76,000-98,600 TS; 56,000 YS; 30 El; 60 RA; 174-217 Brin.
Case hardened: 89,600-100,800 TS; 44,800 YS; 28 El; 50 RA; 143-174 Brin.
For gear wheels, cam shafts, pins, levers, spindles, railway work; tough core; Iz-50-80.

B.S.C. SUPERTOUGH "B."
M-1724; 0.25-0.30 C, 1.4-1.8 Mn, bal Fe.
Oil hardened: 98,500-123,200 TS; 71,700 YS; 20 El; 50 RA; 196-255 Brin.
For crankshafts, connecting rods, railway axles, armature spindles, tough core; Iz-50.

B.S.C. SUPERTOUGH "C."
M-1724; 0.25-0.30 C, 1.4-1.8 Mn, 0.20-0.30 Mo, bal Fe.
Oil hardened: 112,000-134,000 TS; 89,600 YS; 20 El; 50 RA; 223-286 Brin.
For crankshafts, connecting rods, railway axles, armature spindles; Iz-50; tough.

B.S.C. SUPERTOUGH "C-20"
M-1724; 0.15-0.20 C, 1.5-1.8 Mn, 0.5-0.7 Ni, 0.25-0.30 Mo, bal Fe
Oil hardened: 89,600-112,000 TS; 67,200 YS; 20 El; 50 RA; 183-235 Brin.
For general use, axles, railway parts; Iz-70; good workability.

B.S.C. SUPER "V.N.C.A."
M-1724; 0.25-0.35 C, 3.0-3.75 Ni, 0.5-0.8 Cr, 0.15-0.25 Mo, bal Fe.
Oil treated: 132,000-156,000 TS, 112,000 YS; 18 El; 45 RA; 269-341 Brin.
For aero and automotive engine crankshafts, propellers, shafts, gear shafts, pressure vessels; great toughness, Iz-40.

B.S.C. "V.A. 65"
M-1724; 0.22-0.28 C, 2.75-3.50 Ni, 1.0-1.4 Cr, 0.15-0.25 Mo, bal Fe.
Oil treated: 145,600-157,000 TS, 125,400 YS; 17 El; 40 RA, 293-321 Brin.
For highly stressed aero engine connecting rods; also known as "Non-Brit," Iz-35

B.S.C. V.A.P.
M-1724, 0.78 C, 4 Cr, 18 W, 1.3 V, bal Fe.
For twist drills, broaches, cutters; high speed steel.

B.S.C. "V.C.M."
M-1724; 0.30-0.35 C, 0.5-0.7 Ni, 0.7-1.5 Cr, 1.0-1.5 Mo, bal Fe.
Oil treated. 123,000-145,600 TS, 112,000 YS, 18 El; 50 RA, 248-293 Brin.
For studs, bolts, used in high temperature and high pressure steam generating plants, high creep limit; Iz-40

B.S.C. "V.H.R.D."
M-1724, 0.7-1.0 C, 0.15-0.20 Si, 0.3-0.5 Mn, bal Fe.
For mandrels, drills, dies, wear resisting parts; suitable for surface hardening

B.S.C. "V.N.C.A."
M-1724, 0.25-0.35 C, 3.0-3.75 Ni, 0.5-0.8 Cr, bal Fe.
Oil treated: 123,000-145-600 TS, 100,800 YS; 18 El; 50 RA, 240-341 Brin
For aero and automotive engine crankshafts, propellers, shafts, gear shafts, pressure vessels; great toughness; Iz-40.

B.S.C. "V.N.C.G."
M-1724; 0.28-0.32 C, 3.0-3.75 Ni, 0.55-0.70 Cr, bal Fe.
Oil treated: 224,000-280,000 TS, 179,200 YS; 10 El; 25 RA; 429-555 Brin.
For shock resisting gears; Iz-10.

BSEM 558.
M-106; same as RR.250.

BSEM 558.
M-106; same as RR.350.

BSF.
M-459; 0.33 C, 1.0 Cr, 0.2 Mo, bal Fe.
For gears, bolts, machine tool parts; water hardened, tough.

BSF; DMOC.
M-459; C, Cr, Mo, bal Fe.
18-15 El.
For machinery parts; oil hardened.

B.S.I. (B.S.S.)
M-504; all specifications.
British Standards Specifications.

BSI 30 VMS.
M-1290; 0.30 C, 1.25 Mn, bal Fe.
Heat treated: 85,000-128,000 TS; 57,000-71,000 YS, 16-12 El.
Low alloy steel casting.
Werkstoff Nr. 1.5066.

BSI AM 12.
M-1290; 1.2 C, 13 0 Mn, bal Fe.
Sol. ann. & age 85,000 min TS; 42,500 min YS; 25 min El.
Non-magnetic steel casting.
Werkstoff Nr. 1.3802; DIN G-X120 Mn 12.

BSI AM 16.13 S.
M-1290; 0 05 C, 16.5 Cr, 12.5 Ni, bal Fe.
Sol ann & age: 64,000 min TS, 28,000 min YS; 20 min El.
Non-magnetic steel casting.
DIN G-X5CrNi1613.

BSI AM 16.13 SS.
M-1290; 0.07 C, 16.5 Cr, 12.5 Ni, Nb, bal Fe.
Sol ann. & age: 64,000 min TS; 28,000 min YS, 20 min El.
Non-magnetic steel casting.
DIN G-X10CrNiNb1613; Werkstoff Nr. 1 3959

BSI AM 16 16 ES.
M-1290, 0.05 C, 16 5 Cr, 16 0 Ni, 2.25 Mo, bal Fe.
Sol ann & age: 64,000 min TS; 28,000 min YS, 20 min El.
Non-magnetic steel casting.
DIN G-X5CrNiMo1616

BSI AM 16 16 ESS.
M-1290, 0 07, 16.5 Cr, 16.0 Ni, 2 25 Mo, Nb, bal Fe.
Sol. ann & age: 64,000 min TS; 28,000 min YS; 20 min El
Non-magnetic steel casting.
DIN G-X7CrNiMoNb1616

BSI AM 18.10.
M-1290, 0.12 C, 17 5 Cr, 10.5 Ni, bal Fe
Sol. ann & age· 64,000 min TS, 28,000 min YS, 20 min El.
Non-magnetic steel casting.
DIN G-X12CrNi1811; Werkstoff Nr. 1 3955.

BSI AM 858
M-1290, 0 27 C, 8 5 Mn, 7 5 Cr, 5.5 Ni, bal Fe.
Sol. ann & age· 71,000 min TS, 31,000 min YS; 30 min El.
Non-magnetic steel casting.
DIN G-X25 MnCrNi886; Werkstoff Nr. 1 3966.

BSI AM G 10.
M-1290; 3.1 C, 10.5 Ni, 5.75 Mn, 2 0 Si, bal Fe.
Non-magnetic stainless steel casting.
DIN G-X300 NiMnSi106.

BSI C 18.8 S.
M-1290; 0 07 C, 18 Cr, 9 Ni, bal Fe.
Sol. Annealed: 64,000-85,000 TS; 28,000 min YS; 25 min El.
Stainless cast steel; good low temperature properties to −196°C.
DIN G-X6CrNi189; ASTM A296 Gr CF8.

BSI CM 1.
M-1290; 0.25 C, 1.0 Cr, 0.25 Mo, bal Fe.
Heat treated; 85,000-170,000 TS; 64,000-120,000 YS; 16-5 El
Low alloy steel casting Also useful to −100°C.
Werkstoff Nr. 1.7218.

BSI CM 1B.
M-1290, 0.35 C, 1.3 Cr, 0 45 Mo, bal Fe.
Heat treated: 78,000-150,000 TS; 42,500-100,000 YS; 20-9 El.
Low alloy steel casting.

BSI CM 1 H
M-1290, 0 42 C, 1.0 Cr, 0.20 Mo, bal Fe.
Heat treated: 106,000-184,000 TS; 78,000-142,000 YS; 12-4 El.
Low alloy steel casting
Werkstoff Nr. 1 7225.

BSI CM 1 K.
M-1290; 0 34 C, 1.0 Cr, 0.25 Mo, bal Fe.
Heat treated 78,000-150,000 TS, 42,500-106,000 YS; 20-9 El.
Low alloy steel casting
Werkstoff Nr 1 7220

BSI GS-C 25
M-1290, 0 22 C, bal Fe
Annealed: 64,000 TS, 35,000 min YS, 22 min El
Carbon steel casting, useful to −40°C
Werkstoff Nr 1 0416

BSI GS-38
M-1290, 0 15 C, bal Fe
Annealed· 54,000 min TS, 28,000 min YS, 25 min El.
Low carbon, unalloyed steel casting
Werkstoff Nr 1 0416.

BSI GS 38D
M-1290, 0 15 C, bal Fe
Annealed 54,000 min TS; 28,000 min YS, 25 min El
Carbon dynamo steel casting

BSI GS 45
M-1290; 0 22 C, bal Fe
Annealed 64,000 min TS, 35,000 min YS, 22 min El
Low carbon steel casting
Werkstoff Nr 1 0443

BSI GS-45D
M-1290, 0.20 C, bal Fe
Annealed 64,000 min TS, 35,000 min YS; 22 min El
Carbon dynamo steel casting

BSI GS-52
M 1290, 0 30, bal Fe.
Annealed· 74,000 min TS, 40,000 min YS; 18 min El
Carbon steel casting
Werkstoff Nr. 1 0551

BSI GS-60
M-1290; 0.37 C, bal Fe.
Annealed. 75,000 min TS, 42,000 min YS, 15 min El.
Carbon steel casting

BSI GS-70.
M-1290, 0 45 C, bal Fe.
Annealed· 88,000 min TS; 50,000 min YS, 12 min El
Carbon steel casting.
Werkstoff Nr. 1 0553.

BSI Ni 2.
M-1290; 0.10 C, 1.55 Ni, bal Fe.
Heat treated· 64,000-85,000 TS; 38,000 min YS; 20 min El.
Low alloy steel casting, useful to −50°C.
Werkstoff Nr. 1.5621.

BSI Ni 3.
M-1290; 0.10 C, 3.55 Ni, bal Fe.
Heat treated. 71,000-92,000 TS; 51,000 min YS; 20 min El.
Low alloy steel casting, good low temperature properties to −100°C.
Werkstoff Nr. 1.5638; ASTM A352 Gr.LC3.

BSI SHF.
M-1290; 0.38 C, 2.1 Ni, 1.1 Cr, 0.45 Mo, bal Fe.
Heat treated: 255,000 min TS; 212,000 min YS; 5 min El
Low alloy steel casting.

BSI V1.
M-1290, 0.29 C, 1.35 Cr, 0.4 Mo, 0.1 V, bal Fe.
Heat treated. 128,000 min TS, 100,000 min YS; 10 min El.
Low alloy steel casting (formerly PZA)
Werkstoff Nr 1.7725

BSI V2
M-1290, 0.35 C, 2.45 Cr, 0.4 Mo, 0.1 V, bal Fe
Heat treated· 100,000-120,000 TS, 78,000-92,000 YS, 12-11 El
Low alloy steel casting (formerly PZB)
Werkstoff Nr. 1.7755.

BSO SPEZIAL
M-459, 0.41 C, 1.0 Cr, 0.65 Mn, 0.25 Si, bal Fe.
For gears, bolts, machine tool parts, water hardened.

B.S. SEEWASSER.
M-116, 5-10 Mg, bal Al.
Soft 47,000 TS, 22,000 YS, 25 El
Hard 78,000 TS, 65,000 YS, 3 El
For light alloy parts, ship and seaplane parts, corrosion resistant to sea water

B.S. SEEWASSER
M-196, 7.5 Mg, 0.3 Mn, bal Al
Heat treated 30,000 TS, 20,600 YS, 4 El; 10 RA; 80 Brin
Rolled 64,000 TS; 45,000 YS, 8 El, 50 RA; 120 Brin
For furniture, interior light fixtures, wire, castings; resists sea water corrosion.

BS-SEEWASSER 05
M-116, 4.0-5.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al.
Soft 42,000 TS, 22,000 YS, 35 El; 65 Brin.
Hard· 60,000 TS, 50,000 YS; 10 El; 105 Brin.
For aircraft and marine parts, good corrosion resistance

BS-SEEWASSER 07
M-116; 5.5-7.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al.
For aircraft and marine parts, good corrosion resistance.

BS-SEEWASSER 63/03.
M-116; 2-4 Mg, 0.4 max Mn, bal Al.
Soft. 28,000 TS, 13,000 YS, 30 El; 47 Brin.
Hard 40,000 TS, 35,000 YS; 10 El, 73 Brin.
For aircraft tanks, and fittings, fuel lines, marine parts, resists sea water corrosion.

BSW.
M-459; 0.25 C, 1.0 Cr, 0.2 Mo, bal Fe.
For gears, bolts, fasteners, shafts; oil hardened, tough.

BSW, DMOCN.
M-459; C, Cr, Mo, bal Fe.
23-18 El.
For machinery parts.

BTF ALLOY.
M-1429; 0.55 C, 1 Mn, 0.35 Mo, 0.30 Cr, 2 Si, bal Fe.
For punches, rivet sets, pneumatic tools; oil hardened, shock resistant.

BTG.
M-104; 60 Ni, 12 Cr, 2 W, bal Fe.
For ammonia synthesis tubes; heat and NH$_3$ resistant.

B.T.G. STEEL.
Eng; 60 Ni, 25 Fe, 12 Cr, 2 Mn, 0.5 C, 3 W.
Sand cast· 50,000-70,000 TS; 40,000-70,000 YS; 2-10 El, 130-180 Brin.
Rolled· 90,000-109,000 TS; 50,000-70,000 YS; 25-45 El; 50-70 RA; 180-200 Brin.
For heating elements; heat and corrosion resistant.

BTH ALLOY NO. 12.
M-306, Ni-Cr-Fe
For seals to lead glass; metal to glass seal

BTR see BETHLEHEM BTR.

BUCKEYE BRONZE.
U.S., 41.6 Sn, 0.6 Cu, 15.6 Pb, 37.8 Zn, 4.3 Al.
For bearings, Babbitt

BUCKEYE M1
M-1705, 0.78 C, 3.9 Cr, 1.05 V, 1.6 W, 8.5 Mo, bal Fe
High speed tool steel, molybdenum type.
AISI M1.

BUCKEYE M2
M-1705, 0.80 C, 4.0 Cr, 1.75 V, 6.0 W, 5.0 Mo, bal Fe
High speed tool steel, Mo-W type.
AISI M2

BUCKEYE M3 CLASS 1.
M-1705, 1.0 C, 4.0 Cr, 2.5 V, 6.25 W, 6.25 Mo, bal Fe
High speed tool steel, Mo-W type.
AISI M3 (Class 1)

BUCKEYE M3 CLASS 2
M-1705, 1.15 C, 4.0 Cr, 3.0 V, 6.0 W, 5.5 Mo, bal Fe.
High speed tool steel, Mo-W type
AISI M3 (Class 2)

BUCKEYE M4.
M-1705; 1.3 C, 4.0 Cr, 4.0 V, 5.5 W, 4.5 Mo, bal Fe.
High speed steel for cutting tools, high hardness and good wear; AISI M4.

BUCKEYE M7
M-1705, 1.0 C, 3.75 Cr, 2.0 V, 1.75 W, 8.75 Mo, bal Fe
High speed tool steel, molybdenum type
AISI M7

BUCKEYE M10
M-1705; 0.86 C, 4.0 Cr, 2.0 V, 8.5 Mo, bal Fe.
High speed tool steel, molybdenum type.
AISI M10.

BUCKEYE M42.
M-1705, 1.10 C, 3.75 Cr, 1.15 V, 1.70 W, 9.5 Mo, 8.0 Co, bal Fe.
High speed tool steel, Mo-Co type.
AISI M42

BUCKEYE M43.
M-1705; 1.2 C, 3.75 Cr, 1.6 V, 2.7 W, 8.0 Mo, 8.0 Co, bal Fe.
High speed tool steel, Mo-Co type.
AISI M43.

BUCKEYE T1.
M-1705; 0.75 C, 4.0 Cr, 1 V, 18.0 W, bal Fe.
High speed tool steel, tungsten type.
AISI T1.

BUCKEYE T2.
M-1705; 0.83 C, 4.25 Cr, 2.1 V, 18.5 W, 0.85 Mo, bal Fe.
High speed tool steel, tungsten type.
AISI T2.

BUCKEYE T4.
M-1705; 0.75 C, 4.5 Cr, 1.0 V, 19.0 W, 5.0 Co, bal Fe.
High speed tool steel, tungsten-cobalt type.
AISI T4.

BUCKEYE T5.
M-1705; 0.80 C, 4.0 Cr, 2.0 V, 18.0 W, 8.0 Co, bal Fe.
High speed tool steel, tungsten-cobalt type.
AISI T5

BUCKEYE T15.
M-1705; 1.5 C, 4.75 Cr, 5.0 V, 12.5 W, 5.0 Co, bal Fe
High speed tool steel W-Co-V type.
AISI T15.

BUCKLE BRASS-1.
Eng; 90 Cu, 9 Zn, 1 Pb.
For bullets, shells, tubes, cartridges; free-cutting.

BUCKLE BRASS-2.
Eng.; 65 Cu, 34 Zn, 1 Pb.
For bullets; free-cutting.

BUDERUS RCC.
M-501; 2.25 C, 13 Cr, bal Fe.
For tools, dies; non-deforming.

BUDERUS RCW2.
M-501; 0.28 C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe.
For hot dies, hot work steel.

BUDERUS RSZ.
M-501; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe
For tools, dies, cutters, high speed steel.

BUDERUS RSZ ESPECIAL
M-501; C, 19 W, 4 Cr, 2.2 V, bal Fe.
For tools, dies, cutters; high speed steel

BUDERUS RT6.
M-501; 0.7-0.8 C, bal Fe
For tools, punches, springs; water hardened.

BUDERUS RT9.
M-501; 0.9-1.0 C, bal Fe
For tools, drills, springs; water hardened.

BUDERUS RT11.
M-501; 1.05-1.15 C, bal Fe.
For tools, taps, drills, water hardened.

BUDERUS RT12.
M-501; 0.8 C, bal Fe.
For tools, punches; water hardened.

BUDERUS RTC20.
M-501; 0.6 C, 1.0 Cr, 0.2 V, 0.5 Mn, bal Fe.
For tools, crimpers, pliers; oil hardened.

BUDERUS RVS.
M-501; 0.95 C, 1.2 Mn, 0.5 W, 0.5 Cr, bal Fe.
For tools, dies; non-deforming.

BUDERUS T76.
M-501; 1.3 C, 4.5 W, bal Fe.
For tools, dies, cutters; fast finishing steel.

BUDERUS TRW2.
M-501; 0.5 C, 2.25 W, 1.5 Cr, 0.25 V, bal Fe.
For tools, dies, hot work dies; hot work steel.

BUFF-ALOY.
M-962; high C, bal Fe.
For wire cloth; abrasion resisting.

BUFLOKAST.
M-143; 3.2 C, 2.4 Si, 0.7 Mn, bal Fe.
For drums, dryers, kettles, chemical engineering equipment; cast iron for chromium plating.

BUILDTEC 10225.
M-717; Nickel base alloy powder for spraying on cast iron.

BUILDTEC 10681.
M-717; Nickel base alloy powder for spraying on steel, stainless, nickel alloys.

BULL ALLOY.
Eng; 18.3 Sb, 0.6 Fe, 80.9 Pb.
For bearings; antifriction

BULLDOG
M-1433; 0.50 C, 1.2 Cr, 0.25 V, 2.5 W, bal Fe
For chisels, upsetters, crimpers, punches; Type S1; shock resistant.

BULLET BRASS.
U.S.; 90 Cu, 9-10 Zn, 0-1 Pb
For bullets, shells, cartridges.

BULL'S METAL
M-719; 0.5-1.5 Al, 0.5-1.0 Mn, 0.5-1.0 Sn, 0.8-1.2 Fe, 57-60 Cu, bal Zn
Cast: 65,000 TS; 30,000 YS, 25 El, 30 RA; 420 Brin
For marine hardware, propellers; corrosion resistant.

BULL'S WHITE METAL B
M-719, 80 Sn, 10 Sb, 6 Pb, 4 Cu
For bearings, linings for marine, white metal, wear resistant.

BUNDYWELD STEEL TUBING
M-401, 0.2 C, bal Fe.
For tubing, gasoline and oil lines, refrigerator coils, hydrogen welded, copper coated, rolled steel tubing.

BU-NITE
Eng, Ni-Al, bal Cu
For pistons; retain strength up to 370°C.

BUNTING NO 27
M-720, 78.5-81.5 Cu, 9-11 Sn, 9-11 Pb
Cast. 35,000 TS; 17,000 YS, 20 El, 60 Brin.
For bearings for machinery and automobiles; C.S. 21,000

BUNTING NO 72
M-720, 83 Cu, 7 Sn, 7 Pb, 3 Zn, 0.07 P, 0.2 Fe, 0.2 Sb
Cast. 34,000 TS, 16,000 YS; 20 El; 58 Brin.
For bearings, C.S. 20,000

BUNTING NO. 78.
M-720; 66-70 Cu, 3.5-4.5 Sn, 26-30 Pb.
Cast: 18,000 TS, 8000 YS, 5 El; 36 Brin.
For bearings; plastic.

BUNTING NO 96
M-720, 10 Sn, 2.5 Pb, 1 Zn, 0.1 P, 0.2 Fe, 0.2 Sb, bal Cu.
Cast: 40,000 TS; 18,000 YS; 20 El; 65 Brin.
For bearings; C.S. 22,000.

BUNTING NO. 98.
M-720, 88 Cu, 10 Sn, 2 Zn, 0.06 Fe, 0.20 Sb, 0.1 P.
Cast: 40,000 TS; 18,000 YS; 20 El; 67 Brin.
For bearings for aircraft; C.S. 23,000.

BUNTING 100.
M-720; 87.5-90.5 Cu, 1.0 max Fe, 1.75 max C, 9.5-10.5 Sn.
Sintered: density 5.8-6.2.

For bearings.
SAE 840; ASTM B438 Gr.1 Type I.

BUNTING 101.
M-720; 87.5-90.5 Cu, 1.0 max Fe, 1.75 max C, 9.5-10.5 Sn.
Sintered: density 6.4-6.8.
For bearings.
SAE 841; ASTM B 438 Gr.1 Type II.

BUNTING 102.
M-720; 87.5-90.5 Cu, 1.0 max Fe, 1.75 max C, 9.5-10.5 Sn.
Sintered: density 6.4-6.8.
13,500-16,000 TS; 11,000-15,000 YS (Comp).
For mechanical components.
SAE 841; ASTM B255 Type 1.

BUNTING 104.
M-720; 82.6-88.5 Cu, 1.0 max Fe, 2.0-4.0 Pb, 1.75 max C, 9.5-10.5 Sn.
Sintered: density 6.5-6.9.
For bearings.
SAE 843; ASTM B438 Gr2 Type I.

BUNTING 105.
M-720; 87.5-90.5 Cu, 1.0 max Fe. 1.75 max C, 9.5-10.5 Sn.
Sintered: density 6.81-7.2.
16,000-20,000 TS; 15,000-20,000 YS (comp).
For mechanical components
SAE 842; ASTM B255 Type II.

BUNTING NO. 124.
M-720; 85 Cu, 5 Sn, 9 Pb, 1 Zn, 0.2 Fe, 0.2 Sb, 0.1 P.
Cast: 28,000 TS, 14,000 YS; 15 El; 50 Brin.
For bearings; C S 17,000; low friction.

BUNTING NO 125.
M-720; 4 5 Sn, 20 5 Pb, 1 Zn, 0.2 Fe, 0.2 Sb, 0.05 P, bal Cu
Cast 22,000 TS, 11,000 YS; 12 El; 40 Brin.
For bearings for electric motors; C S. 14,000.

BUNTING NO 135.
M-720; 8 Sn, 15 Pb, 1 Zn, 0 2 Fe, 0.2 Sb, 0.05 P, bal Cu.
Cast 30,000 TS; 14,000 YS, 15 El; 52 Brin.
For bearings, C.S 18,000

BUNTING NO 143.
M-720; 85 Cu, 14 Sn, 1 Pb, 0.25 Zn, 0.20 Fe, 0.20 Sb, 0.1 P
Cast: 40,000 TS, 15,000 YS; 10 El; 85 Brin.
For bearings, C S. 24,000.

BUNTING NO. 147.
M-720, 88 Cu, 8 Sn, 1 Pb, 3 Zn, 0.2 Fe, 0.2 Sb, 0.1 P.
Cast. 35,000 TS, 17,000 YS; 15 El; 65 Brin.
For bearings C.S 17,000

BUNTING NO. 156.
M-720; 89 Cu, 11 Sn, 0.2 P.
Cast: 40,000 TS; 18,000 YS; 20 El; 67 Brin.
For gears; C S. 23,000.

BUNTING NO. 158
M-720, 70 Cu, 5 Sn, 25 Pb, 0.2 Fe, 0.2 Sb, 0.25 Ni, 0 03 P.
Cast: 20,000 TS; 10,000 YS; 8 El; 38 Brin.
For bearings; C.S. 13,000.

BUNTING NO. 162.
M-720; 70 Cu, 9 Sn, 21 Pb, 0.2 Fe, 0.2 Sb, 0.25 Ni, 0.03 P.
Cast: 30,000 TS; 15,000 YS; 15 El; 55 Brin.
For bearings; C.S. 20,000.

BUNTING NO. 164.
M-720; 86.5 Cu, 11 Sn, 1.2 Pb, 0.3 Fe, 0.2 Sb, 1.0 Ni, 0.25 P.
Cast: 40,000 TS; 18,000 YS; 12 El; 75 Brin.
For bearings; C.S. 23,000.

BUNTING NO. 170.
M-720; 0.25 Cu, 10 Sn, 0.08 Fe, 15 Sb, 0.20 Ni, 0.08 P, bal Pb.
Cast.
For bearings; Babbitt.

BUNTING NO. 183.
M-720; 63-67 Cu, 3.5-4.5 Sn, 3-5 Pb, 19-21 Ni, bal Zn.
Cast: 30,000 TS; 17,000 YS; 8 El; 95 Brin.
For bearings to resist food acids; corrosion resistant.

BUNTING NO. 188.
M-720; 8-10 Sn, 1.0-1.5 Pb, 0.1 P, 5 Ni, bal Cu.
For high strength castings; age hardenable.

BUNTING 200.
M-720; 95.9 min Fe, 0.25-0.60 C, 3.0 max other.
Sintered: density 5.7-6.1; porosity 18.
For bearings.
SAE 851; ASTM B439 Gr2.

BUNTING 201.
M-720; 96.25 min Fe, 0.25 max C, 3.0 max other.
Sintered: density 5.7-6 1; porosity 18.
For bearings.
SAE 850; ASTM B439 Gr.1.

BUNTING 202
M-720; 7 0-11.0 Cu, 86.5 min Fe, 0.3 max C.
Sintered: density 5.8-6.2.
29,500-34,000 TS; 28,500-30,000 YS (comp).
For mechanical components.
SAE 862 is similar.

BUNTING 203.
M-720; 18.0-22 0 Cu, bal Fe.
Sintered: 5.8-6.2 density.
For bearings
SAE 863; ASTM B439 Gr.4.

BUNTING 204
M-720; 7.0-11.0 Cu, bal Fe.
Sintered: 5.8-6.2 density; porosity 18.
For bearings.
SAE 862; ASTM B439 Grade 3.

BUNTING 205
M-720; 97.75 min Fe, 0.025 max C.
Sintered: density 5.7-6.1.
16,000 TS; 12,000 YS (Comp).
For bearings and for mechanical components.
SAE 850, ASTM B310 Type I C1.A.

BUNTING 206.
M-720; 15.0-25 0 Cu, 69.75-85.0 Fe, 0.025 max C.
Sintered: density 7.1 min.
65,000 TS; 70,000 YS (Comp).
For mechanical components.
SAE 870; ASTM B303 C1.A.

BUNTING 207.
M-720; 97.0 min Fe, 0.61-1.0 C.
Sintered: density 6 11-6 5.
34,000 TS; 26,000 YS (Comp).
For mechanical components.
SAE 855; ASTM B310 Type II C1.C.

BUNTING 208
M-720, 15.0-25.0 Cu, 69-84 Fe, 0.61-1.0 C.
Sintered: density: 7.1 min.
85,000 TS, 120,000 YS (Comp).
For mechanical components
SAE 872, ASTM B303 Class C.

BURDEN BEST.
M-721; 0.05 C, 0 1 Si, 2.5 SiO_2.
For plates, pipe; wrought iron.

BURDEN WROT.
M-721; 0.06 C, 1.1 Si, 2.5 SiO_2.
For plates, pipe; wrought iron.

BURDOX 9.
M-1467; 56-60 Cu, 1 max Sn, 0.25-1.0 Mn, bal Zn.
For welding rod; M.P. 1400-1600°F.

BURDOX 91.
M-1467; 57-61 Cu, 0.25-1.0 Sn, 0.05 max Pb, 0.01 max Al, bal Zn.
For welding rod, M.P. 1630-1650°F.

BURDOX 92.
M-1467; 58-60 Cu, 0.6-0.9 Sn, 0.35-0.50 Fe, 0.15-0.30 Mn, 0.25-0.40 Ni, bal Zn.
For welding rod.

BURGESS ALUMINUM SOLDER.
Eng.; 76 Sn, 21 Zn, 3 Al.
For aluminum solder.

BURGESS-PARR NO 85 ALLOY.
M-29; Ni, Cr, Co, Mo.
For chemical apparatus; acid resistant.

BURLOY A.
M-570; 0.12 max C, 16-23 Cr, 7-11 Ni, bal Fe.
For stainless and corrosion resistant parts; stainless, heat and corrosion resistant.

BURLOY B
M-570; 0.21-0.35 C, 12-15 Cr, bal Fe
For corrosion resistant parts; corrosion resistant.

BURLOY C.
M-570; 0.12 max C, 24-30 Cr, 12-15 Ni, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

BURLOY C-1.
M-570; 0.36-0.50 C, Si, 16-23 Cr, 7-11 Ni, bal Fe
For heat and corrosion resistant parts; heat and corrosion resistant

BURNDY NO. 101.
M-722; Cu.
Cast: 20,000 TS, 9,000 YS, 50 El, 35 Brin.
For castings

BURNDY NO 111
M-722; 37 Zn, 1.5 Fe, 1.5 Al, 0.25 Mn, bal Cu
Cast: 70,000-80,000 TS, 30,000-34,000 YS, 25-40 El, 100-150 Brin.
For castings; high strength

BURNDY NO. 113
M-722; 92.9 Cu, 1.7 Sn, 2.2 Pb, 3.2 Zn.
Cast: 22,600 TS; 9,200 YS, 18 El.
For castings, free-cutting.

BURNDY NO 113LM
M-722; 1 Li, bal Cu
For electrical convectors, high conductivity.

BURNDY NO. 202.
M-722, 85 Cu, 5 Sn, 5 Pb, 5 Zn
Cast: 26,000-37,000 TS, 8,000-13,000 YS; 15-20 El, 45-59 Brin.
For castings, bearings, pressure tight.

BURNDY NO. 206.
M-722, 80 Cu, 10 Sn, 10 Pb, trace P
Cast. 22,000-23,000 TS; 9,000-12,700 YS; 6-9 El; 46-65 Brin.
For castings, bearings; pressure tight.

BURNDY NO. 302.
M-722, 89 Cu, 1 Fe, 10 Al.
Cast: 60,000-80,000 TS, 9,000-13,000 YS; 15-27 El; 93-100 Brin.
For castings; Al bronze.

BURNDY NO. 308.
M-722; 88 Cu, 10 Sn, 2 Zn.
Cast: 30,000-45,000 TS; 10,000-16,000 YS; 15-30 El; 57-74 Brin.
For castings; Gum Metal.

BURNDY NO. 309
M-722; 86 Cu, 9.5 Sn, 2.5 Pb, 2 Zn.
Cast: 30,000-40,000 TS; 17,000-19,000 YS; 15-25 El; 52-72 Brin.
For castings; modified Gun Metal.

BURNDY NO. 314.
M-722; 96 Cu, 1 Mn, 3 Si.
Cast: 50,000 TS; 30,000 YS; 24 El; 103 Brin.
For castings; "Everdur."

BURNDY NO. 316.
M-722; 88 Cu, 4 Fe, 8 Al.
Cast: 75,000 TS; 15-20 El, 100 Brin
For castings; Al bronze.

BURNDY NO. 329.
M-722, 91 Cu, 7 Al, 2 Si
Cast 70,000 TS; 25 El.
For castings, Duronze III.

BURR-A.
Eng.; 62 Cu, 38 Zn
For pipes, tubes, hardware

BURR-B.
Eng; 90 Cu, 10 Zn.
For window screen wire, radiators

BURYS C 16.B
M-1415; 0.5 C, 1 Si, 1.5 Cr, 2 W, 0.2 V, bal Fe.
For pneumatic tool pistons, chisels, riveters; tough and impact resistant

BURYS H 18 S.
M-1415; 1.0 C, 1.5 Cr, bal Fe
For ball and roller bearings, forming rolls; oil or water hardened

BUSH BRAND BEARING METAL
M-575; P, alloy, bal Cu
For bearings, fatigue and wear resistant.

BUSHINGS
Eng; 85-86.2 Cu, 10.2-11.0 Sn, 3.6-4.0 Zn.
For bushings, bearings; high strength

BUSTER.
M-35, 0.50-0.58 C, 2.2 W, 1.25 Cr, 0.25 Mn, 1 Si, 0.25 V, bal Fe
Ht Tr: 283,000 TS, 246,000 YS, 10 El, C 53 Rock
Annealed 190 Brin
For dies, chisels, shear blades, punches, forging dies
Type S1 hot work tool steel, shock resistant

BUSTER ALLOY 50.
M-35, 0.50 C, 1.5 Cr, 2.5 W, bal Fe.
For cold work tools and dies; oil hardened, tough

BUSTER 60
M-35, 0.55 C, 1.25 Cr, 2.75 W, 0.2 V bal Fe.
Heat Treated 231,000-315,000 TS; 209,000-275,000 YS; 9-11 El; 27-42 RA; C 48-56 Rock.
For header and swaging dies, chipping chisels, rivet busters, track tools
Type S1 shock resisting tool steel, good fatigue resistance.

BUSTER BRAND.
M-35; C, Cr, W, bal Fe.
For tools, chisels, shear blades; shock resisting

BUTTON.
U.S.; 80 Zn, 20 Cu
For die castings, ornaments; red brass.

BUTTON ALLOY-1.
Eng.; 60-50 Cu, 30-45 Zn, 0-10 Sn.
For buttons, ornaments; corrosion resistant.

BUTTON ALLOY-2.
Eng.; 43 Cu, 57 Zn.
For buttons, ornaments; low strength.

BUTTON BRASS.
Eng.; 90 Cu, 10 Zn, 0.5 Sn.
For buttons, ornaments.

BVT 90.
German; 0.3 C, 13 Cr, 2 Mo, 1 V, bal Fe.
For turbine rotors; high heat resistant.

BVT-130.
M-1343; 0.20 C, 12 Cr, 1.2 Mo, bal Fe.
Annealed: 82,000 TS; 38,000 YS; B 82 Rock.
For chemical plant and oil refinery equipment, gears, shafts, marine hardware.
Corrosion resistant, hardenable.

B. & W. 2.
M-17; 0.15 max C, 0.3-0.6 Mn, 1.75-2.25 Cr, 0.4-0.6 Mo, 0.5 max Si, bal Fe.
Annealed: 68,000 TS; 40,000 YS; 35 El; 140 Brin.
For oil refinery tubes; resists S-atm.

B. & W. 5.
M-17, 0.15 max C, 0.5 max Mn, 0.5 max Si, 4-6 Cr, 0.45-0.60 Mo, bal Fe.
Annealed: 70,000 TS; 30,000 YS; 35 El; 150 Brin.
For oil refining tubes, steam superheater; resists S-atm.

B & W 9 (CROLOY 9).
M-17; 0.15 max C, 0.5 max Mn, 0.5 max Si, 8-10 Cr, 1.25-1.75 Mo, bal Fe.
Annealed: 78,000 TS; 40,000 YS, 30 El; 165 Brin.
For oil refining still and exchanger tubes; for service up to 1250°F.

B & W 12-14 Cr.
M-447, 0.12 max C, 12-14 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

B & W 16-3-3.
M-17; 0.15 max C, 15.5-17 Cr, 12.5-14.5 Ni, 2-3.25 Mo, bal Fe.
Water quenched: 95,000 TS; 38,000 YS; 55 El; 160 Brin.
For acetic acid, sulfite liquor corrosion resistant parts; corrosion resistant.

B & W. 18
M-17; 0.10 max C, 0.5 max Mn, 0.5 max Si, 15-18 Cr, bal Fe.
Annealed: 75,000 TS; 48,000 YS; 28 El; 170 Brin.
For corrosion resistant parts to HNO_3 and mixed acids; acid and corrosion resistant.

B. & W. 18-8.
M-17; 0.07 max C, 0.6 max Mn, 0.75 max Si, 16.5-20 Cr, 7-10.5 Ni, bal Fe.
Water quenched. 90,000 TS; 30,000 YS; 65 El; 140 Brin.
For corrosion resisting parts; corrosion resistant.

B. & W 25-20.
M-17; 0.15 max C, 1.0 max Mn, 0.75 max Si, 24-26 Cr, 19-21 Ni, bal Fe.
Air cooled. 95,000 TS, 38,000 YS; 50 El; 150 Brin.
For heat resistant parts; resists oxidation to 2100°F.

B. & W. 27.
M-17; 0.25 max C, 0.75 max Mn, 0.50 max Si, 25-30 Cr, bal Fe
Water quenched: 85,000 TS; 50,000 YS; 22 El; 180 Brin.
For heat resistant parts; resists oxidation to 2100° and sulfur atmospheres.

B & W NO. 400.
M-447; 0.15 C, 4-6 Cr, bal Fe.
100,000 TS; 15-20 El.
For oil refinery equipment; corrosion resistant.

B & W NO. 401.
M-447; 0.25 C, 4-6 Cr, bal Fe.
100,000 TS; 15-20 El.
For oil refinery equipment; corrosion resistant.

B & W NO. 402.
M-447; 0.10 C, 4-6 Cr, bal Fe.
100,000 TS; 15-20 El.
For oil refinery equipment; corrosion resistant.

B & W NO. 420.
M-17, M-447; 0.25 C, 4-6 Cr, 0.75-1.25 W, bal Fe.
100,000 TS; 15-20 El.
For oil refinery equipment; corrosion resistant.

B & W. 441.
M-447, M-17; 0.3 C, 4-6 Cr, 0.60 Mo, bal Fe.
Annealed: 100,000 TS; 50,000 YS; 25 El; 50 RA; 200 Brin.
For oil still headers, castings, pumps, pipe; moderate corrosion resistance.

B & W NO. 445.
M-447; 0.30 C, 8-10 Cr, 1.5 Mo, bal Fe.
Cast: 90,000 TS; 180 Brin
For oil refinery and boiler parts; heat and corrosion resistant.

B & W NO 450.
M-17, M-447; 0.12 C, 0.25 Ni, 12-14 Cr, bal Fe.
Cast: 90,000-70,000 TS; 15-20 El, 180-150 Brin.
For oil refinery equipment, boilers; heat and corrosion resistant.

B & W NO 600.
M-17, M-447, 0.16 C, 18-21 Cr, 9-12 Ni, bal Fe.
Cast. 70,000-85,000 TS, 60-40 El, 130-160 Brin.
For corrosion resisting parts, chemical industries; austenitic alloy, high corrosion resistance

B & W NO 603
M-447, M-17, 0.07 max C, 16-23 Cr, 7-11 Ni, Ti, bal Fe.
Cast: 70,000-85,000 TS, 130-160 Brin.
For stainless parts; stainless.

B & W NO 604.
M-447; 0.08 C, 18 Cr, 8 Ni, bal Fe.
Cast 70,000-85,000 TS; 130-160 Brin.
For stainless parts; stainless, austenitic.

B & W NO 610.
M-17, M-447; 0.16 C, 17-19 Cr, 7.5-10.5 Ni, 2-3 Si, bal Fe
80,000-100,000 TS; 60-40 El.
For corrosion resisting parts, austenitic, high corrosion resistance.

B & W NO 640
M-447, 0.16 C, 17-19 Cr, 7.5-10.5 Ni, 2.5-3.5 Mo, bal Fe
80,000-100,000 TS, 60-40 El.
For corrosion resisting parts, resists mineral acids; austenitic; corrosion resistant.

B & W NO. 640S.
M-447; 0.08 C, 19 Cr, 9 Ni, 3 Mo, bal Fe.
Cast: 88,000 TS; 170 Brin.
For paper mill sulfite units, corrosion resistant.

B & W NO. 642
M-447; 0.12 C, 17-19 Cr, 7.5-10.5 Ni, 2.5-3.5 Mo, bal Fe.
Cast: 75,000-85,000 TS; 60-40 El; 140-165 Brin.
For corrosion resisting parts; paper mill sulfite; resists mineral acids; austenitic; corrosion resistant.

B & W NO. 650.
M-17, M-447; 0.16 C, 22-25 Cr, 10-13 Ni, bal Fe.
80,000-100,000 TS; 60-40 El.
For sulfite paper industry apparatus; heat and corrosion resistant.

B & W NO. 661.
M-17, M-447; 0.35 C, 22-25 Cr, 10-13 Ni, 2.0-2.5 Si, bal Fe.
Cast: 70,000 TS; 190 Brin.
For oil still tube supports, furnace parts; heat and corrosion resistant to 1800°F.

B & W NO. 690.
M-447; 0.16 max C, 24-30 Cr, 7-11 Ni, Mo, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

B & W NO. 692.
M-447; 0.10 max C, 24-30 Cr, 7-11 Ni, Mo, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

B & W NO. 700.
M-17, M-447; 0.4-0.6 C, 16-20 Cr, 62-68 Ni, bal Fe.
Cast: 60,000 TS; 180 Brin.
For heat resisting parts, oil burners; heat resistant.

B & W NO. 701.
M-17, M-447; 1.0-1.25 C, 16-20 Cr, 60-65 Ni, bal Fe.
For heat resisting parts; heat resistant.

B & W NO. 800.
M-17, M-447; 1.0-1.5 C, 24-26 Cr, 10-12 Ni, bal Fe.
Cast: 450 Brin.
For heat resisting parts, wire guides; heat resistant.

B & W NO. 850.
M-447; 1.6 C, 18 Cr, 6 Ni, bal Fe.
Cast: 380-420 Brin.
For rolling mill plugs, wire guides; wear and heat resistant.

B. & W. 900.
M-447, M-17; 0.25 C, 17-19 Cr, bal Fe.
Cast: 95,000 TS; 45,000 YS; 10 El; 15 RA; 200 Brin.
For castings and pump parts, flanges, nozzles; corrosion resistant; nitric acid, sea water and mine water resistant.

B & W NO 902.
M-17, M-447; 0.10 C, 17-19 Cr, bal Fe.
85,000 TS; 45,000 YS; 15 El; 20 RA; 150 Brin.
For corrosion and HNO_3 resisting parts; corrosion resistant.

B & W NO. 910.
M-17, M-447; 0.25 C, 17-19 Cr, 1 Si, bal Fe.
Cast: 80,000 TS; 180 Brin.
For corrosion and HNO_3 resisting parts; corrosion resistant.

B & W NO. 912.
M-17, M-447; 0.10 C, 17-19 Cr, bal Fe.
For corrosion and HNO_3 resisting parts; corrosion resistant.

B & W NO. 950.
M-17, M-447; 0.25 C, 26-30 Cr, bal Fe.
Cast: 60,000 TS; 190 Brin.
For corrosion and HNO_3 resisting parts, hot S gases; corrosion resistant.

B & W NO. 951.
M-447; 1.5 C, 29 Cr, 2 Ni, bal Fe.
Cast: 90,000 TS.
For heat and wear resistant parts; heat and wear resistant.

B. & W. ALLOY NO. 1000.
M-17, M-447; 2.35 Cu, 1.50 Mn, 2 Si, 18 Cr, 9 W, bal Fe.
Cast and treated: 600-680 Brin.
For abrasion resisting parts, ceramic and cold drawn dies; not shock resisting.

B. & W. ALLOY NO. 1100.
M-17, M-447; 0.25 C, 0.50 Mn, 1.85 Si, 25 Cr, 20 Ni, bal Fe.
Cast: 70,000-85,000 TS; 40,000 YS; 75-10 El; 160-180 Brin.
For furnace rolls, grates, retorts, skid rails, chains; Rockwell "B"—83-89.

B & W NO. 1101.
M-17, M-447; 0.3 C, 24-26 Cr, 19-23 Ni, bal Fe.
Cast: 70,500 TS; 160 Brin.
For heat resisting castings, furnace parts; heat resistant to 2000°F.

B & W NO. 1102.
M-17, M-447; 0.15 max C, 24-26 Cr, 19-23 Ni, bal Fe.
At 1500°F: 24,500 TS; 27 El; 36.4 RA.
At 2000°F: 8700 TS; 28.5 El; 45.8 RA.
For heat resisting castings; heat resistant to 2000°F.

B & W NO. 1200.
M-17, M-447, 0.4 C, 7-9 Cr, 18-21 Ni, bal Fe.
Cast: 60,000 TS; 150 Brin.
For corrosion resisting parts, furnace castings; stainless.

B & W NO. 1300.
M-17, M-447; 0.45 C, 14-16 Cr, 33-36 Ni, bal Fe.
Cast: 70,000 TS; 180 Brin
For heat and corrosion resisting parts; furnace parts; heat and corrosion resistant.

B & W NO. 1400.
M-17, M-447; 0.35-0.50 C, 1.25-1.75 Cr, 14-16 W, bal Fe.
For high speed tools and cutters; high speed steel.

B & W NO 1440
M-447; 0.5 C, 1.5 Cr, 7 Mo, bal Fe.
Cast
For tube mill piercer points; wear resistant.

B & W NO. 1500
M-17, M-447; 0.25 C, 25-30 Cr, 8-11 Ni, bal Fe.
Cast: 75,000 TS.
For furnace parts, heat and corrosion resisting parts; heat and corrosion resisting.

B & W NO. 1501.
M-447; 0.6 C, 25-20 Cr, 8-11 Ni, bal Fe
Cast: 75,000 TS.
For oil burner parts; heat and corrosion resistant.

B. & W. 5150.
M-447; 1.0 C, 0.4 Mn, 1.4 Cr, bal Fe
Cast: 11,500 TS; 350-500 Brin.
For grinding units, wear plates; abrasion resistant.

B & W NO. 5202.
M-447; 1C, 2 Mn, 1.5 Cr, 0.5 Mo, 0.8 Si, bal Fe.
Cast: 150,000 TS; 500-650 Brin.
For grinding and pulverizing equipment; wear resistant.

B & W IRON.
M-17; 0.05 max C, 0.25-0.40 Mn, 0.025 max S, 0.10 max Cu, bal Fe.
Hot finished: 45,000-50,000 TS; 30,000-41,000 YS; 49-70 El; Rock B 53-57.
Cold drawn: 68,000-86,000 TS; 60,000-80,000 YS; 25-42 El; Rock B 76-88.
For electric motor and generator housings.
Good magnetic characteristics.

B. & W. NIROSTA KA-2.
M-447; 0.13-0.16 C, 16-20 Cr, 7-11 Ni, bal Fe.
Hot finished: 85,000 TS; 28,000 YS; 50 El; 45 RA; 160 Brin.
Cold drawn: 75,000 TS; 25,000 YS; 55 El; 120 Brin.
For heat and corrosion resistant parts, tubes; stainless, heat and corrosion resistant.

B. & W. NIROSTA KA-2S.
M-447; 0.7 max C, 16-20 Cr, 7-11 Ni, bal Fe.
Hot finished: 85,000 TS; 28,000 YS; 50 El; 45 RA; 125 Brin.
Cold drawn: 75,000 TS; 25,000 YS; 55 El; 120 Brin.
For heat and corrosion resistant parts, tubes; stainless, heat and corrosion resistant.

"B-W" STANDARDIZED.
M-213; 0.15-0.25 C, 0.30-0.60 Mn, bal Fe.
Rolled: 55,000-65,000 TS, 35,000-40,000 YS; 30 El; 55 RA.
Heat treated: 65,000-75,000 TS; 40,000-45,000 YS; 20 El; 60 RA; 158 Brin.
For general use, boiler plates.

BW XII.
M-459; 0.10 C, 1.3 Mn, 0.10 Si, 0.4 Ni, bal Fe
For welding electrode; general purpose, gas.

BX-3 (see Jessop BX-3).

B-XX
M-424; 0.3-0.4 C, bal Fe
For gears, shafts, water hardening.

BYLOY GR W2.
M-292; 0.30 max C, 1.1-1.6 Mn, 0.10 min Mo, 0.10 min Cu, 0.0005 min B, bal Fe
Rolled. 105,000 TS; 80,000 TS; 21 El; 48 RA; 210 Brin
Heat treated 145,000 TS, 135,000 YS, 15 El, 55 RA, 340 Brin.
For shovels, ore chutes, dippers, graders, drag buckets; abrasion and wear resistant.

BYRWILL "B"
M-723; 91-93 Zn, 2-3 Pb, 6-7 Cu
28,000 TS; 67 Brin
For bearings; antifriction.

C-4 HOT DIE STEEL
M-432, 0.95 C, 4 Cr, bal Fe.
For hot work dies, gripper dies, bolt and rivet header dies; hot work steel.

C 40
Germany; 60 Al_2O_3, 40 mixed carbides.
For hard cutters to machine steel and cast iron.
Sintered Alloy.

C 46
Italian; 10 Cu, 1 Si, 0.25 Mg, 0.15 Ti, 1.5 Ni, bal Al.
For castings; heat resistant

"C63" QUALITY.
M-179; Cu, 10 Ni, bal Zn.
Rolled: 80,000 TS; 44,000 YS; 22 El; 12 RA; 145 Brin
Drawn: 90,000 TS; 48,000 YS; 20 El; 10 RA, 150 Brin.
For hot stampings, hardware, architectural trim; silver bronze.

C-74 ARMOR.
M-1222 and M-112; 0.25-0.30 C, 1.0-1.6 Mn, 0.3-0.4 Si, 0.5-1.0 Cr, 0.75-1.45 Ni, 0.4-0.6 Mo, bal Fe.
Cast· 120,000 TS, 95,000 YP; 18 El; 40 RA; 225-270 Brin.
For gears countershafts, axles, crankshafts.
Oil hardening, tough, shock resistant.

"C90" QUALITY.
M-179; 55-60 Cu, 0.2 max Pb, 2-3 Mn, bal Zn.
Extruded: 70,000 TS; 32,000 YS; 30 El; 30 RA; 120 Brin.
Drawn. 76,000 TS; 38,000 YS; 20 El; 25 RA; 130 Brin.
For high pressure air service tubes; Parson's manganese bronze.

"C92" QUALITY.
M-179; 55-60 Cu, 0.2 max Pb, 2-3 Mn, bal Zn.
Rolled: 76,000 TS; 38,000 YS; 25 El; 30 RA; 135 Brin.
For disc and slotted valves; Parson's manganese bronze.

C-207.
M-31; 7.5 W, 0.8 Zr, 0.2 Ti, 0.1 C, bal Cr.
For gas turbine engines.
High stress-rupture strength above 1800°F.
High resistance to thermal shock and fatigue, excellent oxidation resistance.

C-242.
M-239, 0.3 C, 10 Co, 20 Cr, 10 Mo, 1 max Fe, bal Ni.
For high temperature applications, jet engine and gas turbine components.
Heat and oxidation resistant.

C-501.
M-724, 2.1 Mg, 1.5 Mn, bal Al
For light alloy parts, similar to "Pearlman"

C-502
M-724; 11-14 Si, bal Al.
For light alloy parts; similar to "Silumin."

C-503
M-724, 4 Cu, 0.4 Ti, bal Al.
Heat treated 40,000-43,000 TS, 26,000-27,000 YS; 4-5 El; 80-90 Brin.
For light alloy parts; age-hardenable

C 908
M-4, 3004 aluminum bonded to 300 stainless steel
For cooking utensils. 0.010-in, layer of 300 stainless steel bonded to 3004 aluminum of H 111 temper.

CADMET.
M-1091, WC + Co.
For cutting tool, sintered carbides

CADMIUM AMALGAM.
Eng., Cd, bal Hg.
For modeling purposes, fusible plugs, softens when moderately heated, soft as wax.

CADMIUM COPPER
M-33; 99 Cu, 1 Cd.
Cold drawn 80,000 TS; 4 El.
For trolley wire, electrical conductors; high conductivity.

CADMIUM COPPER 985.
M-141, 99.1 Cu, 0.9 Cd.
Hard: 55,000 TS; 48,000 YS; 6 El; 116 Brin.
Soft: 37,000 TS; 12,000 YS; 50 El; 45 Brin.
For trolley wire, marine hardware; corrosion resistant.

CADMIUM SILVER.
Eng., Cd, bal Ag
For corrosion resistant parts.

CA DOUBLE DIAMOND.
M-38; 1.0 C, 1.5 Cr, 0.35 Mo, bal Fe.
For rock drills; hollow drill steel.

CALIDO (Elalco).
M-44; 60 Ni, 16 Cr, 24 Fe.
100,000 TS; 56,000 YS; 28 El; 59 RA.
For dipping baskets, electrical resistance materials; resists oxidation up to 1000°C.

CALIDO (Elalco).
M-47; 64 Ni, 8 Cr, 25 Fe, 3 Mn.
For electrical resistances; heat resistant.

CALITE 25-10
M-30; 0.25-0.45 C, 23-28 Cr, 10-14 Ni, 0.25-1.00 Si, 0.25-1.00 Mn, bal Fe.
Cast: 81,000 TS; 45,000 YS; 16 El; 180 Brin.
Annealed: 87,000 TS; 51,000 YS; 5 El; 180 Brin.
For furnace parts, beams, tube supports; heat resistant to 1950°F.

CALITE A.
M-30, 0.4 C, 15-18 Cr, 35-37 Ni, 1-1.7 Si, 1.5 Mn, bal Fe.
At 1600°F: 18,000 TS; 26 El.
Cast: 68,000 TS; 36,200 YS; 8 El; 7 RA; 156 Brin
For carburizing boxes, hearth plates, retorts; corrosion and heat resisting to 2000°F.

CALITE A-15
M-30; 0.15 max C, 15-18 Cr, 35-37 Ni, 1.00-1.75 Si, 1.00-1.75 Mn, bal Fe.
Cast: 71,000 TS, 34,000 YS; 19 El; 112 Brin
Annealed: 90,650 TS; 44,200 YS; 13 El.
For retorts, fan blades; heat resistant to 2000°F.

CALITE B-18.
M-30; 0.29-0.36 C, 18-20 Cr, 8-10 Ni, 1 Mo, bal Fe.
Cast: 80,000 TS; 35,000 YS, 9 El; 3 RA; 170 Brin.
Annealed: 105,000 TS, 48,100 YS; 17 El
For beams supporting loads at elevated temperatures, oil still tube supports; heat resisting up to 1650°F; resists sulfur; formerly Calite B.

CALITE B-18 L.C
M-30; 0.08 max C, 18-20 Cr, 8-10 Ni, 0 75-1 75 Si, 1.00-1 75 Mn, 0 9-1.1 Mo, 0.1 N_2, bal Fe.
Cast· 156 Brin.
For welded stainless equipment; heat resistant to 1650°F.

CALITE B-18 Mo.
M-30; 0.08 max C, 18-20 Cr, 12 5-14 00 Ni, 2.9-3.1 Mo, bal Fe.
Cast: 78,600 TS; 34,100 YS; 44 El; 143 Brin
Annealed: 77,200 TS, 33,300 YS; 37 El; 149 Brin.
For paper and pulp equipment; corrosion resistant.

CALITE "B-28"
M-30; 0 35 C, 25-28 Cr, 10-12 Ni, 1 Mo, 0.1 N.
Cast. 85,000 TS; 57,000 YS, 24 El; 10 RA; 187 Brin.
For furnace parts, beams, tube supports; to sustain loads at high temperatures

CALITE B-28 N.
M-30, 0 30-0 35 C, 24-26 Cr, 10-12 Ni, 0 75-1.75 Si, 0.75-1.75 Mn, 0.16 N_2, bal Fe.
Cast: 84,100 TS; 47,400 YS; 10 El; 217 Brin.
Annealed: 86,000 TS; 46,500 YS; 7 El.
For furnace parts, hangers, supports; heat resistant.

CALITE B-29.
M-30, 0.29-0.34 C, 28-30 Cr, 15-17 Ni, 1.00-1.75 Si, 0.7-1.7 Mn, 0.9-1.10 Mo, 0.1 N_2, bal Fe.
Cast: 64,600 TS; 45,000 YS; 8 El.
Annealed: [illegible],500 TS; 50,650 YS; 6 El.
For furnace parts; heat resistant to 2100°F.

CALITE "E."
M-30; 7.8 Ni, 17.28 Cr, 73.62 Fe, 0.45 Mn, 0.14 C, 0.18 Al, 0.14 Cu.
Rolled, annealed: 85,000 TS; 50 El; 60 RA; 165 Brin.
For stainless parts, bolts, nuts, forged and rolled parts; resists oxidation up to 1800°F.

CALITE "E-28."
M-30; 0.2 max C, 22-26 Cr, 12-14 Ni, bal Fe.
Rolled: 95,000 TS; 40 El; 50 RA; 156 Brin.
For malleable bolts, nuts, rivets, welding wire, furnace parts; heat resistant to 1950°F.

CALITE "N."
M-30; 0.55 C, 17-20 Cr, 65-68 Ni, 1-1.7 Si, 1-1.7 Mn, bal Fe.
At 100°F: 50,000 TS, 2 El; 1 RA; 190 Brin.
At 2100°F: 8,000 TS, 12 El; 13 RA.
For furnace parts, heat treatment equipment, carburizing boxes; resists heat up to 2100°F; poor S resistance.

CALLOY CADMIUM-BARIUM.
M-511, Cd, Ba
For alloys for bearings

CALLOY CADMIUM-CALCIUM.
M-511; Cd, Ca.
For alloys for bearings.

CALLOY CADMIUM-STRONTIUM.
M-511, Cd, Sr.
For alloys for bearings

CALLOY.
(CALAL).
M-511; 8-26 Ca, bal Al
For the deoxidation of steel

CALLOY LEAD-BARIUM.
M-511; Ba, bal Pb.
For alloys for bearings

CALLOY LEAD-CALCIUM.
M-511; Ca, bal Pb
For alloys for bearings.

CALLOY LEAD-STRONTIUM
M-511, Sr, bal Pb
For alloys for bearings

CALLOY STRONTIUM ALUMINUM.
M-511, up to 50 Sr, bal Al.
For getters in electrical discharge devices and vacuum tubes, good stability in air.

CALMALLOY see CALMALLOY NO. 1.

CALMALLOY NO 1.
M-31; 30 Cu, 68 Ni, 2 Fe
For electrical equipment
Magnetically soft, high permeability.

CALMALLOY NO. 2.
M-31; 88 Ni, 10 Cu, 2 Fe.
For electrical and magnetic equipment.
Magnetically soft alloy
High magnetic permeability

CALMAR 18-8 Cb.
M-277, 17-20 Cr, 7-10 Ni, 0.9-1.25 Cb, C, bal Fe.
Annealed· 80,000-85,000 TS, 40,000-45,00 YS; 40-45 El.
For castings; abrasion and corrosion resistant.

CALMAR 19-9.
M-277; 0.15 max C, 18-21 Cr, 8-10 Ni, bal Fe.
Heat treated: 85,000 TS; 40,000 YS; 64 El.
For stainless castings, stainless.

CALMAR 19-9M.
M-277, 0.15 max C, 18-21 Cr, 8-10 Ni, bal Fe.
Heat treated: 90,000 TS; 45,000 YS; 50 El.
For stainless castings; stainless.

CALMAR 19-9S.
M-277; 0.07 max C, 18-21 Cr, 8-10 Ni, bal Fe.
Heat treated: 75,000 TS; 37,000 YS; 55 El.
For stainless castings; stainless.

CALMAX.
M-111; 0.28 C, 12 Cr, 7 W, 9 Co, 0.4 V, bal Fe.
Hardened: C 54-55 Rock.
For cores in die casting dies, extrusion dies, forging dies, mandrels.
Hot work tool steel, high hot hardness, air or oil hardening.

CALMET.
M-726; Ni-Cr.
For thermocouples, resistance wire; heat resistant to 1920°F.

CALO FERRO (30).
M-275; 0.3 C, 9 W, 3.5 Cr, 0.2 V, bal Fe.
For tools, dies, hot piercing punches; hot working dies, mild high speed steel.

CALO-FERRO (45).
M-275; 0.45 C, 13 W, 3 Cr, 0.25 V, bal Fe.
For tool, dies, hot piercing punches; hot work tool steel.

CALO FERRO 50
M-275; 0.50 C, 3 Cr, 0.5 V, 15 W, bal Fe.
For hot extrusion dies and mandrels, upsetters; Type H24; oil hardened.

CALOMIC.
M-108; 65 Ni, 15 Cr, 20 Fe.
115,000 TS
For electrical resistance; formerly "Pyromic No. 3"

CALOR 5
M-1318; 0.30 C, W, Cr, V, bal Fe.
For upsetters, riveters, punches, hot work steel, oil hardened.

CALOR 10.
M-1318; 0.30 C, 2.6 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion rams and liners, punches, dies; hot work steel, oil hardened.

CALOR 10 Co.
M-1318; 0.30 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe.
For extrusion rams and liners, dies, punches; hot work steel, oil hardened.

CALOR 304
M-1318, 0.45 C, 1.4 Cr, 0.7 Mo, 0.3 V, bal Fe.
For gears, punches, crimpers, crankshafts; oil hardened, tough.

CALORIZED 4-6 Cr-Mo
M-30, 0.15 C, 0.5 Mo, 4-6 Cr, bal Fe.
For parts to resist erosion and hydrogen sulfide; 35% Al-1/32" case.

CALOR LR.
M-1318; 0.30 C, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For cold water tools, upsetters, punches; oil hardened, tough.

CALOXO 25-12.
M-277; 24-27 Cr, 11-14 Ni, 0.25 max C, bal Fe.
Annealed: 75,000-85,000 TS; 40,000-45,000 YS; 30-35 El.
For stainless castings; stainless.

CALOXO 26.
M-277; 25-30 Cr, 0.25 min C, bal Fe.
For corrosion resisting parts; corrosion resistant.

CALOXO 26-4.
M-277; 25-30 Cr, 2.5-4.0 Ni, 0.25 min C, bal Fe.
For heat and corrosion resisting parts; corrosion and heat resistant.

CALOXO 28.
M-277; 0.25 max C, 26-30 Cr, bal Fe.
For corrosion and heat resisting castings; corrosion and heat resistant.

CALOXO 28-10.
M-277; 27-30 Cr, 8-12 Ni, 0.25 max C, bal Fe.
For heat and corrosion resisting parts; heat and corrosion resistant.

CALOXO 28-10 M.
M-277; 27-30 Cr, 8-12 Ni, 3-4.5 Mo, 0.25 min C, bal Fe.
For heat and corrosion resisting parts; heat and corrosion resistant.

CALOXO 35-15.
M-277; 0.35 max C, 15-18 Cr, 35-38 Ni, bal Fe.
For heat and corrosion resisting castings; heat and corrosion resistant.

CALSUN BRONZE 951.
M-8; 95.5 Cu, 2 Sn, 2.5 Al.
Soft: 52,000 TS; 40 RA.
Hard: 135,000 TS; 1 RA.
For electrical conductors; corrosion resistant

CALUMET.
M-38; 0.30 C, bal Fe.
Rolled: 65,000-75,000 TS; 40,000-50,000 YS.
For machine tool parts, gears, shafts; easy to machine, water hardened.

CALUMET.
M-1431; 1.0 C, 2 Mn, 0.9 Cr, 0.9 Mo, bal Fe.
For punches, blanking and forming dies; air hardened.

CALUMETAL B
M-1166, 0.26-0.33 C, 1.2 Mn, 0.25 Mo, bal Fe.
Heat treated: 130,000 TS; 93,000 YS, 16 El; 16 RA; 260 Brin.
Cast: 83,000 TS, 59,000 YS; 23 El; 37 RA, 194 Brin.
For guides for rolling mills, wear resistant, tough.

CALUMETAL C-5.
M-1166, 0.20 max C, 4.0-6.5 Cr, 0.45-0.65 Mo, bal Fe.
Annealed: 90,000 TS, 60,000 YS, 18 El; 35 RA; 230 Brin.
For castings for high temperature service to 1400°F, corrosion and heat resistant.

CALUMETAL L
M-1166; 0.38-0.43 C, 0.7 Mn, 0.4 Si, 1.5-2.0 Ni, 0.7 Cr, 0.3 Mo, bal Fe.
Normalized: 100,000-130,000 TS; 70,000-95,000 YS; 10-20 El, 25-40 RA; 210-250 Brin.
Heat treated: 120,000-250,000 TS; 100,000-225,000 YS, 3-18 El; 7-40 RA; 250-500 Brin.
For machine tool parts, gears, shafts, castings; shock resistant, oil hardened.

CALUMETAL MC.
M-1166; 0.20 max C, 0.7 Mn, 0.4 Si, 0.8-1.1 Cr, 0.15-0.25 Mo, bal Fe.
Heat treated: 100,000-200,000 TS, 90,000-180,000 YS; 6-18 El; 35-60 RA; 200-390 Brin.
For gears, pinions, shafts, castings; tough, carburizing steel.

CALUMETAL NE.
M-1166; 0.28-0.33 C, 0.7 Mn, 0.4 Si, 0.45-0.80 Ni, 0.4-0.7 Cr, 0.2-0.3 Mo, bal Fe.
Normalized: 90,000-115,000 TS; 65,000-90,000 YS; 22-28 El; 40-55 RA; 190-230 Brin.
Heat treated: 110,000-215,000 TS; 90,000-170,000 YS; 8-25 El; 30-55 RA; 200-450 Brin.
For gears, pinions, shafts, machinery parts, castings; tough, water hardened.

CALUMETAL WC1.
M-1166; 0.25 max C, 0.7 Mn, 0.6 max Si, 0.45-0.65 Mo, bal Fe.
Annealed: 65,000 TS; 35,000 YS; 24 El; 35 RA; 200 Brin.
For castings, gears, bolts, housings; for high temperature service.

CALUMETAL WC6.
M-1166; 0.20 max C, 0.7 Mn, 0.4 Si, 1.0-1.5 Cr, 0.4-0.6 Mo, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 20 El; 35 RA; 200 Brin. For pressure tight castings for high temperature uses; tough, oil hardened.

CALUMETAL WC9.
M-1166; 0.18 max C, 0.6 Mn, 0.4 Si, 2.0-2.75 Cr, 0.9-1.1 Mo, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 20 El; 35 RA; 200 Brin. For pressure tight castings; to operate up to 1000°F.

CALUMETAL X-1.
M-1166; 0.08 max C, 1.5 max Mn, 1.5 max Si, 8-11 Ni, 18-21 Cr, bal Fe
Annealed: 85,000 TS, 35,000 YS; 55 El, 60 RA; 120 Brin.
For food and chemical plant equipment, castings, stainless, austenitic.

CALUMETAL X-2.
M-1166; 0.08 max C, 1.5 max Mn, 1.5 max Si, 8-11 Ni, 18-21 Cr, 0.07-0.10 S, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 40 El; 50 RA; 120 Brin.
For screw machine products; stainless, austenitic, free-cutting.

CALUMETAL X4
M-1166, 0.08 max C, 8-11 Ni, 18-21 Cr, 2-3 Mo, bal Fe.
Annealed 85,000 TS, 40,000 YS; 50 El; 55 RA; 160 Brin
For castings to handle hot chlorides and acids, austenitic, stainless, Type 316.

CALUMETAL X-5.
M-1166; 0.30 max C, 1.5 max Mn, 11-13 Cr, 23-27 Ni, bal Fe.
Cast: 90,000 TS, 40,000 YS; 20 El; 30 RA; 170 Brin.
For furnace parts, heat treating boxes, austenitic, stainless.

CALUMETAL X-8.
M-1166, 0.15 max C, 11.5-13.5 Cr, bal Fe.
Heat treated· 97,000-150,000 TS; 70,000-100,000 YS; 10-20 El; 40-55 RA; 190-350 Brin.
For chemical plant equipment, stainless castings, corrosion resistant; ACI-CK20

CALUMETAL X-15.
M-1166; 0.35 max C, 33-37 Ni, 14-17 Cr, bal Fe.
Cast: 65,000 TS; 40,000 YS; 6 El; 10 RA; 170 Brin.
At 1600°F. 18,500 TS; 14,000 YS; 22 El; 53 RA; 55 Brin.
For conveyors, furnace parts, heat treating boxes; resists oxidation and carburization.

CALUMET BOX AND PIN.
M-38; C, alloy, bal Fe.
For mining boxes and pins; water hardening.

CALUMET BR.
M-1166; 0.3-0.4 C, 0.9-1.1 Mn, 0.25-0.45 Si, 0.2-0.3 Mo, bal Fe.
Normalized: 95,000-115,000 TS; 60,000-95,000 YS; 30-18 El; 50-30 RA; 150-200 Brin.
For tool bit bodies, plows, bucket teeth sprockets; castings.

CALUMET E.
M-1166; 0.36-0.43 C, 1.2 Mn, 0.25 Mo, bal Fe.
Cast: 83,000 TS; 59,000 YS; 23 El; 37 RA; 194 Brin.
Heat treated: 125,000 TS; 114,000 YS; 17 El; 40 RA; 286 Brin.
For guides for rolling mills, wear resistant, tough.

CALUMET G.
M-1166, 0.32-0.39 C, 0.7-1.3 Ni, 0.6 Mo, bal Fe.
Cast: 100,000 TS; 65,000 YS, 20 El, 35 RA; 200 Brin.
Heat treated: 200,000 TS; 173,000 YS; 6 El; 10 RA; 600 Brin.
For gears, connecting rods, cams, dies; tough, wear resistant.

CALUMET GH.
M-1166, 0.4-0.5 C, 0.5-0.8 Mn, 0.45-0.75 Cr, 1.0-1.5 Ni, bal Fe.
Heat treated 110,000-180,000 TS; 80,000-120,000 YS, 20-10 El; 35-20 RA, 200-350 Brin.
For gears, cams, rollers, structures, castings.

CALUMET GR
M-1166; 0.3-0.4 C, 0.5-0.8 Mn, 0.45-0.75 Cr, 1.0-1.5 Ni, bal Fe.
Heat treated· 80,000-110,000 TS; 50,000-90,000 YS; 30-20 El; 50-38 RA; 160-230 Brin.
For crankshafts, axles, cams, links; castings, abrasion resistant.

CALUMET H
M-1166, 0.25-0.35 C, 1.6 Mn, 0.45 Si, bal Fe.
Cast· 77,000 TS, 48,000 YS, 30 El; 56 RA; 168 Brin.
Heat treated 127,000 TS, 115,000 YS, 17 El; 47 RA; 286 Brin
For sprockets, gears, housings, abrasion resistant.

CALUMET M.
M-1166, 0.32-0.39 C, 0.7 Mn, 1 Cr, 0.2 Mo, bal Fe
Cast: 96,000 TS, 63,000 YS, 22 El, 42 RA, 178 Brin
Heat treated: 126,000 TS; 106,000 YS, 12 El; 29 RA; 330 Brin
For gears, shafts, sprockets, housings; abrasion resistant.

CAMBRILOY 1
M-727; 0.11 C, 1.3 Cr, 0.8 Si, 0.55 Mo, bal Fe.
For woven wire conveyor belts, wire cloth and slings.

CAMBRILOY 3.
M-727; 0.15 max C, 3.0 Cr, 1.2 Si, 0.55 Mo, bal Fe.
For woven wire conveyor belts, wire cloth and slings.

CAMBRILOY 5
M-727; 0.10 max C, 5.0 Cr, 1.0 max Si, bal Fe.
For woven wire conveyor belts, wire cloth and slings.

CAMBRILOY 35-19.
M-727; 0.15 max C, 20 Cr, 35 Ni, 2 Si, bal Fe.
For woven wire conveyor belts, wire cloth and slings.

CAMBRILOY 35-19 Cb.
M-727; 0.15 max C, 20 Cr, 35 Ni, 2 Si, 1.2 Cb, bal Fe.
For woven wire conveyor belts, wire cloth and slings; high temperature operation.

CAMBRILOY 80-20.
M-727; 0.15 max C, 1.2 Si, 1.0 Fe, 20 Cr, bal Ni.
For woven wire conveyor belts, wire cloth and slings; high temperature operation.

CAMBRILOY 80-20 Cb.
M-727; 0.15 max C, 1.2 Si, 1.2 Cb, 20 Cr, bal Ni.
For woven wire conveyor belts, wire cloth and slings.

CAMBRILOY A.
M-727; 80 Cr, 20 Ni.
For furnace parts, conveyor belts; heat resistant to 2050°F in S-free atmosphere.

CAMBRILOY AL.
M-727; Aluminum coated carbon steel for woven wire conveyor belts, wire cloth and slings.

CAMELIA METAL.
Eng.; 70 Cu, 15 Pb, 10 Zn, 4.2 Sn, 0.5 Fe.
For hardware; free-cutting.

CAMITE.
M-149; C, W, bal Fe.
For cutting tool tips; similar to "Carboloy."

CAMLOY.
M-490; 25-35 Ni, 10-20 Cr, bal Fe
90,000-112,000 TS; 40-35 El.
For marine parts, valves and tubing for superheated steam, turbine blading, fittings, tanks; stainless and heat resisting.

"CA" NICKEL.
M-121, 4 Co, bal Ni.
For magnetostrictive transducers; high electro-mechanical coupling coefficient.

CAN METALS.
Ger.; 95 Pb, 1.75 Ca, 1.35 Cu, 1 Sr, 1 Ba.
For bearings.

CANNON.
M-40; 0.70 C, 16 W, 3.5 Cr, 1.0 V, bal Fe.
For high speed tools, planing and lathe tools, twist drills, punches; high speed steel.

CANNONITE.
M-347; 2.7 C, 1.5 Si, bal Fe
50,000 TS; 0 El; 250 Brin
For diesel engine and refrigeration parts, crankshafts, pistons, cylinders, brake drums; high test cast iron; Tr. S. 8300.

CANNON-MUSKEGON NO. 6.
M-1491; 28 Cr, 4 W, 1 C, bal Co.
For hard facing bushings, pressure valves, tong bits, hot trimming dies.
Heat and abrasion resistant.

CANNON-MUSKEGON NO. 12.
M-1491; 29 Cr, 8 W, 1.5 C, 1.0 Si, 3 max Fe, bal Co.
For hardfacing bushings, saw teeth, pressure bars, entry guides.
Wear and abrasion resistant.

CANNON-MUSKEGON NO. 40.
M-1491; 15 Cr, 4.5 Fe, 3.25 B, 4.25 Si, 0.75 C, bal Ni.
For hardfacing gear teeth, plump plungers, valve plugs.
Wear, oxidation and abrasion resistant.

CANNON-MUSKEGON NO. 41.
M-1491; 13 Cr, 4 Fe, 3 B, 4 Si, 0.6 C, bal Ni.
For hardfacing and welding, oil expeller screws, scraper blades.
Heat and wear resistant.

CANNON SPECIAL.
M-40; 0.70-0.75 C, 4 Cr, 18-20 W, 0.50 Mo, 2.0-2.25 V, bal Fe.
For tools, cutters.

CANNON VANADIUM.
M-40; 1.0 C, 4 Cr, 18-20 W, 0.5-0.8 Mo, 3.5 V, bal Fe.
For tools, cutters; high speed steel.

CANON.
M-1043; C, alloy, bal Fe.
For machine tool parts; oil hardened.

CANON SUPERIOR.
M-1043; C, alloy, bal Fe.
For machine tool parts; oil hardened.

CANZLER.
German; 1 Ag, 0.05 P, bal Cu.
For welding rod; for mounting carbide tips, stainless and nickel alloys.

CANZLER BRASS.
M-728; 30 Zn, bal Cu.
For welding wire; brass.

CANZLER NO. 1.
M-728; 10 Sn, bal Cu.
For welding wire; bronze.

CANZLER NO. 4.
M-728; Cu.
For welding wire; copper.

CAP GILDING.
U.S.; 90 Cu, 10 Zn.
For ornamental window screens; commercial bronze.

CAPITAL-562.
M-1112; 0.80 C, 4.2 Cr, 6 W, 2 V, 5 Mo, bal Fe.
For lathe and planer tools, milling cutters; high speed steel.

CAPITO-VK5M.
M-1654; 0.20 C, 13 Cr, 1.2 Mo, bal Fe.
Annealed: 95,000 TS; 40,000 YS; 25 El; 55 RA; B 92 Rock.
Heat treated: 240,000 TS; 200,000 YS; 8 El; 25 RA; C 50 Rock
For gears, shafts, surgical instruments, knives, scissors, cutlery
Corrosion resistant, hardenable.

CAPSULE METAL.
U.S.; 92 Pb, 8 Sn.
For bearing.

CARAS.
M-1405; C, alloy, bal Fe.
For molds; case hardened, oil hardened.

CARBIDE G1.
Germany; 94 WC, 6 Co.
For cutting tools; sintered carbide.

CARBIDE H1.
Germany; 94 WC, 6 Co.
For cutting tools; sintered carbide.

CARBIDE H2.
Germany; 91.5 WC, 1.5 TiC, 7 Co.
For cutting tools; sintered carbide.

CARBIDE L2.
Germany; 77-78 WC, 14-15 TiC, 8 Co.
For cutting tools; sintered carbide.

CARBIDE LO.
Germany; 88 WC, 5 TiC, 7 Co.
For cutting tools; sintered carbide.

CARBIDE T5K10.
Russia; 85 WC, 6 TiC, 9 Co.
For cutting tools; sintered carbide.

CARBIDE T15K6.
Russia; 79 WC, 15 TiC, 6 Co.
For cutting tools; sintered carbide.

CARBIDE WK3.
Russia; 97 WC, 3 Co.
For cutting tools; sintered carbide.

CARBIDE WK6
Russia; 94 WC, 6 Co.
For cutting tools, sintered carbide.

CARBIDE WK8.
Russia; 92 WC, 8 Co.
For cutting tools; sintered carbide.

CARBIDIE CD-18.
M-1695; Sintered carbide.
Special wear resistant die grade for extra abrasive stamping applications; gall resistant. Stamping and lamination tooling, drawing and forming; can tooling.

CARBIDIE CD-20.
M-1695; Sintered carbide.
Extreme wear applications where no shock is involved; highest compression strength Glass and plastic cut-off tooling; gages.

CARBIDIE CD-24X.
M-1695; Sintered carbide.
Wear applications in no-shock or light shock tooling, such as ceramic compacting;
will hold a highly polished, wear resistant finish.
Valve balls and seats, bearings and seals;
corrosion resistant uses,
pyrochemical liners and plungers, gages.

CARBIDIE CD-30.
M-1695, Sintered carbide.
Wear and die applications Light shock metal powder tooling, drawing, blanking, boring bars and tooling.

CARBIDIE CD-35
M-1695; Sintered carbide.
Dies and wear applications. Metal powder tooling wear resistance is important; blanking, wire, bar and tube drawing

CARBIDIE CD-35F.
M-1695, Sintered carbide.
Wear and gall resistant; will hold high polish.
Aluminum, stainless and brass draw applications, wire straightening, bearings and seals,
valve ball and seats.

CARBIDIE CD-36¼.
M-1695; Sintered carbide
Wear and die grade; moderate shock resistance.
Normal metal powder tooling; blanking and drawing; slitter knives

CARBIDIE CD-38¾.
M-1695, Sintered carbide.
Forming and blanking grade; wear resistant;
will resist light shock. Structural parts, wire bar and tube drawing.

CARBIDIE CD-40.
M-1695; Sintered carbide.
Die and blanking grade, non-ferrous material.
Wear resistant blanking, forming, drawing;
general purpose metal powder tooling;
slitter knives for paper and steel.

CARBIDIE CD-45.
M-1695; Sintered carbide.
Wear resistant ferrous blanking grade. Very light impact applications, forming dies, drawing, general can tooling.

CARBIDIE CD-50.
M-1695; Sintered carbide.
General all purpose die, stamping, drawing.
Will take moderate shock with good die resistance.

CARBIDIE CD-53.
M-1695; Sintered carbide.
Shock resistant, medium impact-shock applications, spring tooling.

CARBIDIE CD-60.
M-1695; Sintered carbide.
Moderate shock, cold heading grade.
Nail grippers, and tooling, spring tooling.

CARBIDIE CD-70.
M-1695; Sintered carbide.
Severe shock, cold heading grade Heavy bolt making and sizing Nail tooling.

CARBIDIE CD-337.
M-1695, Sintered carbide
High strength, wear resistance For cold forming, structural wear-impact applications, swaging hammers, mandrels, rotary
percussion applications.

CARBIDIE CD-355
M-1695, Sintered carbide.
Shock and wear resistant Rod mill rolls, guide inserts

CARBIDIE CD-650.
M-1695, Sintered carbide
Sub-micron material for use in the most abrasive and severe stamping and wear applications
Extreme strength, hardness, and shock resistance

CARBIUM
M-729, 4-5 Cu, bal Al.
For light alloy parts, heat treatable

CARBO
English, WC, Co.
For cutting tools; cemented.

CARBOBRONZE.
Eng; 92 Cu, 8 Sn, 0.3 P
For tubing, resists acid and alkalis

CARBOLOY O-30
M-31, Sintered cemented oxide
90,000 TrS, A 94.0 Rock
For high speed machining of cast iron and steel; high heat and wear resistance.

CARBOLOY 44A.
M-31, Sintered cemented carbide; 94 WC, 6 Co
320,000 TrS; A 91.0 Rock
For semi-roughing of cast iron, non-ferrous and non-metallics; medium high shock resistance.

CARBOLOY 55A.
M-31; Sintered cemented carbide; 87 WC, 13 Co.
390,000 TrS; A 88.2 Rock.
For heavy duty roughing of cast iron, non-ferrous and non-metallics; variety of die applications; high shock resistance

CARBOLOY 55B.
M-31; Sintered cemented carbide; 84 WC, 16 Co.
420,000 TrS; A 86.8 Rock.
For medium and large dies; cold work, piercing, blanking and drawing; extremely high shock resistance.

CARBOLOY 77B.
M-31; Sintered cemented carbide; 57 WC, 27 TaC, 16 Co.
390,000 TrS; A 85.0 Rock.
For cutting hot flash, extrusion of aluminum wire bar and tube.

CARBOLOY 78.
M-31; Sintered cemented carbide; 76 WC, 4 TaC, 12 TiC, 8 Co.
250,000 TrS; A 92.0 Rock.
For light-roughing and finishing of steels; high abrasion resistance.

CARBOLOY 78B.
M-31; Sintered cemented carbide; 79 WC, 4 TaC, 8 TiC, 9 Co.
260,000 TrS; A 91.2 Rock.
For medium roughing of steel; die applications.

CARBOLOY 90.
M-31; Sintered cemented carbide; 90 WC, 10 Co.
350,000 TrS; A 89.0 Rock.
For rock drilling; excellent wear resistance.

CARBOLOY 115.
M-31; Sintered cemented carbide; 88.5 WC, 11.5 Co
400,000 TrS; A 88.5 Rock
For percussive mining bits and large size impact punches: good shock and wear resistance.

CARBOLOY 120.
M-31, Sintered cemented carbide; 88 WC, 12 Co.
410,000 TrS, A 86.5 Rock
For rotary and percussive mining tools and small impact extrusion punches, impact and wear resistant

CARBOLOY 190
M-31; Sintered cemented carbide; 75 WC, 25 Co.
400,000 TrS; A 84.0 Rock.
For heavy impact die and punch applications; high toughness.

CARBOLOY 210.
M-31, Sintered cemented carbide; 28 WC, 2 TaC, 64 TiC, 2 Cr_3C_2, 4 Co.
100,000 TrS; A 94.5 Rock.
For finish machining of steel and cast iron; high wear resistance at elevated temperatures.

CARBOLOY 231.
M-31, Sintered cemented carbide, 90 WC, 10 Co
400,000 TrS, A 87.8 Rock.
For mining applications, shock resistant.

CARBOLOY 241
M-31, Sintered cemented carbide; 90 WC, 10 Co.
400,000 TrS, A 88.4 Rock
For mining applications; shock and wear resistant

CARBOLOY 248.
M-31, Sintered cemented carbide; 89 WC, 11 Co.
450,000 TrS; A 89.5 Rock.
For rock drilling and interrupted metal cutting; excellent wear resistance relative to shock resistance.

CARBOLOY 258.
M-31; Sintered cemented carbide; 87 WC, 13 Co
470,000 TrS; A 88.5 Rock.
For mining and for cold extrusion; shock resistant.

CARBOLOY 268.
M-31; Sintered cemented carbide; 84 WC, 16 Co.
490,000 TrS; A 87.0 Rock.
For mining and for impact extrusion; high shock resistance.

CARBOLOY 320.
M-31; Sintered cemented carbide; 64 WC, 4.5 TaC, 25.5 TiC, 6 Co.
200,000 TrS; A 93.0 Rock.
For high speed finishing of steel and high tensile cast irons; excellent wear resistance.

CARBOLOY 350.
M-31; Sintered cemented carbide, 71 WC, 12 TaC, 12.5 TiC, 4.5 Co.
200,000 TrS; A 92.4 Rock.
For light-roughing and semi-finishing of steel, ferrous castings, stainless steel and some high temperature alloys; excellent wear resistance and toughness.

CARBOLOY 370
M-31; Sintered cemented carbide; 72 WC, 11.5 TaC, 8 TiC, 8.5 Co.
250,000 TrS; A 91.2 Rock.
For heavy duty roughing of steels, ferrous castings, stainless steel and some high temperature alloys; excellent shock and wear resistance.

CARBOLOY 514.
M-31; Sintered TiC coated cemented carbide.
For finishing and precision finishing of steel and cast iron.

CARBOLOY 516.
M-31, Sintered TiC coated cemented carbide.
For finishing and precision finishing of steel and cast iron.

CARBOLOY 523.
M-31; Sintered TiC coated cemented carbide
For general purpose and finish machining of cast iron and non-ferrous materials.

CARBOLOY 608.
M-31; Sintered cemented carbide; 83 Cr_3C_2, 15 Ni, 2 W
100,000 TrS, A 89.5 Rock
For component applications that require high resistance to oxidation and corrosion.

CARBOLOY 779
M-31, Sintered cemented carbide; 91 WC, 9 Co.
340,000 TrS; A 89.5 Rock
For medium-size wire drawing dies, bar and tube dies, shape dies, cupping and compression dies; some mining tool and rock-drilling applications.

CARBOLOY 860.
M-31, Sintered cemented carbide; 91 WC, 4 TaC, 5 Co
270,000 TrS, A 92.0 Rock.
For machining high tensile cast iron, good wear resistance.

CARBOLOY 883.
M-31; Sintered cemented carbide, 94 WC, 6 Co.
290,000 TrS, A 92.0 Rock.
For general purpose machining of non-steel work materials, also used for small compacting dies, burnishing rings and nozzles; high wear resistance.

CARBOLOY 895.
M-31; Sintered cemented carbide; 94 WC, 6 Co.
250,000 TrS, A 92.9 Rock.
For light machining of cast iron and non-ferrous materials.

CARBOLOY 905.
M-31; Sintered cemented carbide; 92 WC, 4 TaC, 4 Co.
240,000 TrS; A 92.2 Rock.
For light finishing of cast iron, non-ferrous and non-metallic materials.

CARBOLOY 907.
M-31; Sintered cemented carbide; 74 WC, 20 TaC, 6 Co.
270,000 TrS; A 91.3 Rock.
For finish machining of fine-grained cast iron, malleable iron, aluminum and magnesium alloys; crater and abrasive resistant.

CARBOLOY 999.
M-31; Sintered cemented carbide; 97 WC, 3 Co.
230,000 TrS; A 92.9 Rock.
For machining cast iron, non-ferrous metals, and non-metallics; also for fine wire dies and small nozzles; excellent abrasion resistance.

CARBOLOY HM-1 HEVIMET.
M-31; 90 W, 7.5 Ni, 2.5 Cu.
Sintered alloy.
300,000 TrS; C 25 Rock.
For weights, counter balances, radiation shielding, vibration damping; high density tungsten alloy.

CARBOLOY HM-3 HEVIMET.
M-31; 90 W, 7.5 Ni, 2.5 Cu.
Sintered alloy.
For governor counter weights, radiation shielding, vibration damping; high density tungsten alloy.

CARBOMANG.
M-157; 0.9-1.0 C, 1.0-1.25 Mn, 0.45-0.60 Cr, 0.4-0.6 W, bal Fe.
For tools and dies, machine parts; castings; *oil hardenable; cast to shape.*

CARBON.
M-44; C, Ni.
For radio tubes; heat resistant.

CARBON.
M-90; 0.10-0.20 C, 0.3-0.6 Mn, 0.45-0.65 Mo, 0.10-0.20 Si, bal Fe.
Hot rolled: 60,000 TS; 35,000 YS; 40 El; 150 Brin.
For oil cracking still tubes, hot oil piping, high temperature steam piping; superior creep strength to plain C-steel.

CARBON ½ Mo.
M-90; 0.2-0.3 C, 0.75 max Mn, 0.3 max Si, 0.45-0.65 Mo, bal Fe.
Normalized and drawn: 70,000 TS; 50,000 YS; 30 El; 170 Brin.
For high temperature high pressure steam piping; high tensile and creep strength.

CARBON BRONZE.
England; 15 Pb, 10 Sn, bal Cu.
Cast: 28,000 TS; 6 El.
For bearings; plastic bronze.

CARBON COLD HEADER.
M-73; 0.9 C, bal Fe.
For cold heading dies; water hardening.

CARBON COLD HEADER NO. V.
M-73; 0.93 C, 0.25 Mn, 0.10 Cr, bal Fe.
For cold forming dies; water hardening.

CARBON COLD HEADER WITH Mo.
M-73; 0.9 C, 0.25 Mn, 0.3 Mo, 1 max Cr, bal Fe.
For large cold header dies; water hardening.

CARBON COLD HEADER WITH V.
M-73; 0.9 C, 0.25 Mn, 0.2 V, 0.1 max Cr, bal Fe.
For cold header dies and hammers; water hardening.

CARBONDALE SILVER.
U.S.; 66 Cu, 18 Ni, 16 Zn.
Hard: 96,000 TS; 2 El; 158 Brin.
Soft: 58,000 TS; 33 El; 77 Brin.
For spinning and drawing, flatware, spoons, forks, knives, etc., to be plated; German silver.

CARBON DRILL ROD.
M-114; 1.2 C, bal Fe.
For tools; water hardened.

CARBON-MOLYBDENUM STEEL.
M-176; 0.18-0.28 C, 0.4-0.6 Mo, 0.5-0.9 Mn, bal Fe.
65,000-87,000 TS; 145 Brin.

CARBON MOLY STEEL.
M-139; 0.25-0.45 C, 0.8-1.1 Cr, 0.15-0.25 Mo, bal Fe.
Heat treated: 197-401 Brin.
For castings, gears, shafts; abrasion and wear resisting, heat treated.

CARBON SHOE DIE.
M-38; 0.75 C, bal Fe.
For shoe dies; water hardening.

CARBON STEEL.
M-373; 0.7-1.4 C, bal Fe.
For tools, drills, taps; water hardened.

CARBON VANADIUM.
M-604; 0.45-0.55 C, 0.65-0.95 Mn, 0.15 Min V, bal Fe.
Normalized: 90,000 TS; 60,000 YS; 20 El; 40 RA.
For locomotive forgings, connecting rods, piston rods, axles; high strength and shock resistant.

CARBON-VANADIUM DRILL ROD.
M-342, M-115; 1.0 C, 0.2 V, bal Fe.
For drill rod, punches; water hardening.

CARBON VANADIUM STEEL.
M-1409; 0.8-1.3 C, V, bal Fe.
For shear blades, punches, chisels, heading and swaging dies; water hardened; Type W2.

CARBORTAM.
M-109; 16-17 Ti, 2.5-3.0 Si, 6.5-7.5 C, 1.25-1.0 B, bal Fe.
For steel making conditions, adds deep hardening properties.

CARBO TOOL.
M-334; 1.0 C, bal Fe.
For tools, dies, drills, taps; water hardening.

CARBURITE.
U.S.; 47-48 C, 28 Fe, 0.3 S, 0.2 P.
For recarburizer in steel; for steel making.

CARB-X.
U.S.; C, bal Fe.
Used in manufacturing cast iron molds; ferro-alloy, exothermic.

CARDINAL RAPID.
M-459; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed cutters; high speed steel.

CARECO.
U.S.; Pb-Sn-Sb.
For bearings; white bearing alloy.

CARILLOY CARBON-MANGANESE.
M-604; C, 1.5-2.0 Mn, 0.15-0.30 Si, bal Fe.
Quenched and tempered: 100,000-120,000 TS; 75,000 Elastic Limit; 20 El; 50 RA.
For forgings; Class L over 2" to 7" A.S.T.M., A-18.

CARILLOY CARBON-MANGANESE.
M-604; C, 1.5-2.0 Mn, 0.15-0.30 Si, bal Fe.
Quenched and tempered: 100,000-120,000 TS; 75,000 Elastic Limit; 18 El; 45 RA.
For forgings; Class L over 7" to 10" A.S.T.M. A-18.

CARILLOY CARBON-MANGANESE.
M-604; 0.55 max C, 1.1-1.5 Mn, 0.05 max P, 0.05 max S, bal Fe.
Quenched and tempered: 105,000 TS; 70,000 YS; 22 El; 40 RA.
For forgings; water hardened.

CARILLOY CARBON-MANGANESE.
M-604; C, 1.4 min Mn, 0.04 max P, 0.05 max S, bal Fe.
85,000 TS; 48,000 YS; 16 El.
For chain links.

CARILLOY CARBON-MANGANESE.
M-604; C, 1.4 min Mn, 0.04 max P, 0.05 max S, bal Fe.
Quenched and tempered· 105,000 TS; 60,000 YS; 16 El.
For chain links.

CARILLOY CARBON-MANGANESE.
M-604; 0.35-0.50 C, 1.5-2.0 Mn, 0.05 max P, 0.055 max S, 0.15-0.30 Si, bal Fe.
100,000-125,000 TS; 200-250 Brin.
For abrasion resisting parts; add 0.2 min Cu for corrosion resisting properties.

CARILLOY CARBON-MANGANESE.
M-604; 0 35-0.50 C, 1.5-2.0 Mn, 0.05 max P, 0.055 max S, 0.15-0.30 Si, bal Fe.
Quenched and tempered: 150,000 TS; 321 Brin.
For abrasion resisting parts; add 0.2 min Cu for corrosion resisting properties.

CARILLOY CARBON-MANGANESE-COPPER
M-604; 0.20-0.35 C, 1.0-1.3 Mn, 0.4-0.5 Cu, bal Fe.
For still tubes; corrosion resisting properties.

CARILLOY CARBON-MOLYBENUM.
M-604; 0.25 max C, 0.04 max P, 0.04 max S, 0.5-0.6 Mo, bal Fe
Annealed: 60,000 TS; 30,000 YS; 20 El; 40 RA.
For gears, shafts, axles; tough.

CARILLOY CARBON-MOLYBDENUM.
M-604; 0 15-0 25 C, 0.30-0.60 Mn, 0.15-0.30 Si, 0.90-1.10 Mo, 0 05 max P, 0.05 max S, bal Fe
For turbine diaphragms; carburizing grade.

CARILLOY CARBON-MOLYBDENUM.
M-604, 0 20-0.25 C, 0 65-0.95 Mn, 0.04 max P, 0.04 max S, 0.20-0 35 Si, 0 2-0.3 Mo, bal Fe
78,950 TS, 53,340 YS, 21 El; 59 1 RA; 156 Brin.
For auto forgings; test on 1³⁄₁₆" rounds.

CARILLOY CARBON-MOLYBDENUM
M-604, 0 38-0 45 C, 0 65-0 95 Mn, 0.04 max P, 0 04 max S, 0 20-0 35 Si, 0 2-0.3 Mo, bal Fe.
110,050 TS; 77,430 YS; 13.2 El, 48 1 RA.
For auto forgings, test on ½" rounds.

CARILLOY CARBON-MOLYBDENUM
M-604; 0 5-0.6 C, 0 65-0.95 Mn, 0.04 max P, 0.04 max S, 0.20-0.35 Si, 0 02-0 3 Mo, bal Fe
For auto forgings; water hardened.

CARILLOY CARBON-MOLYBDENUM.
M-604; 0.6-0 7 C, 0.65-0 95 Mn, 0.04 max P, 0.04 max S, 0 20-0.35 Si, 0.15-0.30 Mo, bal Fe.
143,700 TS; 100,100 YS; 8.5 El, 33.3 RA.
For springs; test on 1¾ × #7.

CARILLOY CARBON-VANADIUM.
M-604, 0.40-0.55 C, 0 65-0 95 Mn, 0 15 Min Si, 0.25 max Ni, 0.15 max Cr, 0 15 min V, bal Fe.
Normalized and tempered· 90,000 TS; 60,000 YS; 24 El; 48 RA.
For gears, shafts, axles; Class B under 5" diameter AAR-M-104-34.

CARILLOY CARBON-VANADIUM.
M-604; 0.40-0.55 C, 0.65-0.95 Mn, 0.15 min Si, 0.25 max Ni, 0.15 max Cr, 0.15 min V, bal Fe.
Normalized and tempered: 90,000 TS; 60,000 YS; 22 El; 44 RA.
For gears, shafts, axles; Class B 5" to 9" diameter ABR-M-104-34.

CARILLOY CARBON-VANADIUM.
M-604; 0.40-0.55 C, 0.65-0.95 Mn, 0.15 min Si, 0.25 max Ni, 0.15 max Cr, 0 15 min V, bal Fe.
Normalized and tempered: 90,000 TS, 58,000 YS; 21 El; 42 RA.
For gears, shafts, axles; Class B 9" to 13" diameter AAR-M-104-34.

CARILLOY CARBON-VANADIUM.
M-604; 0.45-0.55 C, 0.4-0.6 Mn, 0.18 min V, bal Fe.
For gears, shafts; water hardened.

CARILLOY CARBON-VANADIUM.
M-604; 0.10-0 15 C, 0.30-0.60 Mn, 0.04 max P, 0.04 max S, 0.10 max Si, 0.15-0.25 V, bal Fe.
For carburized parts; cold rolling.

CARILLOY CARBON-VANADIUM.
M-604, 0.35-0.45 C, Mn, Si, 0.15 min V, bal Fe.
For forgings, gears, shafts; water hardened.

CARILLOY CARBON-VANADIUM.
M-604; 0.60-0.75 C, 0.4-0.7 Mn, 0 04 max P, 0.05 max S, 0.10 min Si, 0 02 min V, bal Fe.
For tools, punches; water hardened.

CARILLOY CHROMIUM-MANGANESE-SILICON.
M-604; 0.17 max C, 1.05-1.40 Mn, 0.035 max P, 0 04 max S, 0 6-0 9 Si, 0.3-0.6 Cr, bal Fe.
75,000-90,000 TS; 45,000-54,000 YS.
For boiler plate; firebox quality, A S M.E., S-28, Grade A.

CARILLOY CHROMIUM-MANGANESE-SILICON
M-604, 0.25 max C, 1.05-1.40 Mn, 0.035 max P, 0.04 max S, 0 6-0.9 Si, 0.3-0.6 Cr, bal Fe
85,000-100,000 TS; 46,750-55,000 YS.
For boiler plate; firebox quality; A S M E , S-28, Grade B.

CARILLOY CHROMIUM-MOLYBDENUM
M-604, 0 7-0.8 C, 0 5-0 8 Mn, 0.15-0 25 Si, 1.0-1 3 Cr, 0.4-0 6 Mo, bal Fe.
For forgings, springs, mandrels, tools; oil hardened.

CARILLOY CHROMIUM-VANADIUM
M-604, 0 68-0.80 C, 0 25-0 40 Mn, 0.15 min Si, 0 4-0.6 Cr, 0.15-0 20 V, bal Fe.
For springs; strip.

CARILLOY HIGH-CARBON LOW-CHROMIUM.
M-604; 1 0-1.15 C, 0.25-0 40 Mn, 0.025 max P, 0.025 max S, 0.15-0.30 Si, 0.10-0 20 Cr, bal Fe
For flat wire, cold rolled heat treated.

CARILLOY HIGH-CARBON LOW-CHROMIUM.
M-604; 1.2-1.4 C, 0 40 max Mn, 0.04 max P, 0 05 max S, 0.18-0 30 Si, 0 2-0 4 Cr, bal Fe.
For razor blades; cold rolled heat treated.

CARILLOY HIGH-CHROMIUM-MOLYBDENUM.
M-604; 0.15 max C, 0.5 max Mn, 0.03 max P, 0 03 max S, 0.50 max Si, 4-6 Cr, 0.45-0.65 Mo, 0 05 max Al, bal Fe.
Drawn· 167,410 TS; 107,770 YS; 11.5 El; 27.2 RA.
For still tubes, high temperature work.

CARILLOY HIGH CHROMIUM NICKEL.
M-604; 0.6-0.8 C, 0.2-0.4 Mn, 0.04 max P, 0.04 max S, 0.1-0.2 Si, 2.25-2.75 Ni, 4.0-4.75 Cr, bal Fe.
Annealed.
For shear blades; tough.

CARILLOY HIGH NICKEL.
M-604; C, 0.4-0.8 Mn, 0.04 max P, 0.05 max S, 3.0 min Ni, bal Fe.
Annealed (minimum): 80,000 TS; 50,000 YS; 22 El; 40 RA.
For forgings; Class H under 12" diameter A.S.T.M., A-18.

CARILLOY HIGH NICKEL.
M-604; C, 0.4-0.8 Mn, 0.04 max P, 0.05 max S, 3.0 min Ni, bal Fe.
Annealed (minimum): 80,000 TS; 50,000 YS; 21 El; 38 RA.
For forgings; A-18, Class H over 12" to 20" diameter A.S.T.M.

CARILLOY HIGH NICKEL.
M-604; C, 0.4-0.8 Mn, 0.04 max P, 0.05 max S, 3.0 min Ni, bal Fe.
Quenched and tempered: 100,000 TS; 70,000 YS; 20 El; 41 RA.
For forgings; Class I up to 4" diameter A.S.T.M., A-18.

CARILLOY HIGH NICKEL.
M-604; C, 0.4-0.8 Mn, 0.04 max P, 0.05 max S, 3.0 min Ni, bal Fe.
Quenched and tempered: 100,000 TS; 65,000 YS; 20 El, 41 RA.
For forgings; Class I over 4" to 7" diameter A.S.T.M., A-18.

CARILLOY HIGH NICKEL.
M-604; C, 0.4-0.8 Mn, 0.04 max P, 0.05 max S, 3.0 min Ni, bal Fe.
Quenched and tempered: 90,000 TS; 60,000 YS; 20 El; 41 RA.
For forgings; Class I over 7" to 10" diameter A.S.T.M., A-18.

CARILLOY HIGH NICKEL.
M-604; C, 0.4-0.8 Mn, 0.04 max P, 0.05 max S, 3.0 min Ni, bal Fe.
Quenched and tempered: 85,000 TS; 55,000 YS; 20 El; 41 RA.
For forgings; Class I not over 20" diameter A.S.T.M., A-18

CARILLOY LOW NICKEL CHROMIUM
M-604; C, Mn, 0.04 max P, 0.05 max S, 0.15-0.30 Si, 1.0-1.5 Ni, 0.45-0.75 Cr, bal Fe.
Quenched and tempered. 100,000-120,000 TS; 75,000 YS; 20 El, 50 RA.
For forgings; Class L over 2" to 7" diameter A.S.T.M., A-18.

CARILLOY LOW NICKEL CHROMIUM
M-604; C, Mn, 0.04 max P, 0.05 max S, 0.15-0.30 Si, 1.0-1.5 Ni, 0.45-0.75 Cr, bal Fe
Quenched and tempered: 100,000-120,000 TS; 75,000 YS; 18 El; 45 RA.
For forgings; Class L over 7" to 10" diameter A.S.T.M., A-18.

CARILLOY LOW NICKEL CHROMIUM.
M-604; 0.35-0.45 C, 0.5-0.8 Mn, 0.04 max P, 0.045 max S, 1.0-1.5 Ni, 0.45-0.75 Cr, bal Fe.
Normalized, quenched and tempered: 105,000 TS; 70,000 YS, 20 El; 50 RA.
For motor shafts; Grade A 2" and under in diameter, G.E. Co. B5-C9S1.

CARILLOY LOW NICKEL CHROMIUM.
M-604; 0.35-0.45 C, 0.5-0.8 Mn, 0.04 max P, 0.045 max S, 1.0-1.5 Ni, 0.45-0.75 Cr, bal Fe.
Normalized, quenched and tempered: 100,000 TS; 65,000 YS; 20 El; 50 RA.
For motor shafts; Grade A over 2" to 4" diameter, G.E. Co. B5C9S1.

CARILLOY LOW NICKEL CHROMIUM.
M-604; 0.35-0.45 C, 0.5-0.8 Mn, 0.04 max P, 0.045 max S, 1.0-1.5 Ni, 0.45-0.75 Cr, bal Fe.
Normalized, quenched and tempered: 95,000 TS; 60,000 YS; 20 El; 50 RA.
For motor shafts; Grade A over 4" to 7" diameter, G.E. Co. B5C9S1.

CARILLOY MANGANESE-MOLYBDENUM.
M-604; 0.40-0.48 C, 1.3-1.6 Mn, 0.04 max P, 0.05 max S, 0.25 max Si, 0.15 min Mo, bal Fe.
For seamless drill pipe; tough

CARILLOY MANGANESE-MOLYBDENUM.
M-604; 0.10-0.20 C, 0.90-1.20 Mn, 0.04 max P, 0.05 max S, 0.15-0.30 Si, 0.35-0.50 Mo, bal Fe.
77,300 TS; 55,820 YS; 21.7 El; 58.7 RA.
For structural parts; test on ¾" plate.

CARILLOY MANGANESE-MOLYBDENUM.
M-604; 0.10-0.20 C, 1.3-1.6 Mn, 0.04 max P, 0.05 max S, 0.30-0.50 Si, 0.35-0.50 Mo, bal Fe.
97,750 TS; 64,200 YS; 21.5 El; 38.6 RA.
For structural parts; test on ½" plate

CARILLOY MANGANESE-MOLYBDENUM.
M-604; 0.20-0.30 C, 0.8-1.1 Mn, 0.04 max P, 0.05 max S, 0.10-0.20 Si, 0.20-0.30 Mo, bal Fe.
84,840 TS, 49,550 YS, 21.5 El; 41.2 RA
For structural parts, test on 6 × 6 × 15/16" angle.

CARILLOY MANGANESE-MOLYBDENUM.
M-604; 0.23-0.30 C, 0.90-1.20 Mn, 0.04 max P, 0.04 max S, 0.15-0.30 Si, 0.45-0.75 Mo, bal Fe.
For seamless tube, good weldability.

CARILLOY MEDIUM NICKEL
M-504, 0.2-0.3 C, 0.65-0.95 Mn, 0.045 max P, 0.05 max S, 0.15-0.35 Si, 2.5-3.0 Ni, 0.15 max Cr, bal Fe
Normalized and tempered: 80,000 TS; 55,000 YS; 28 El, 60 RA.
For forgings; Class C under 8" diameter AAR-M-104-34

CARILLOY MEDIUM NICKEL.
M-604; 0.2-0.3 C, 0.65-0.95 Mn, 0.045 max P, 0.05 max S, 0.15-0.35 Si, 2.5-3.0 Ni, 0.15 max Cr, bal Fe
Normalized and tempered 80,000 TS, 55,000 YS; 28 El, 55 RA
For forgings; Class C 8" and over in diameter AAR-M-104-34.

CARILLOY NICKEL-CHROMIUM-MOLYBDENUM.
M-604, 0.35-0.45 C, 0.5-0.8 Mn, 0.35 max Si, 1.5-2.0 Ni, 0.5-0.8 Cr, 0.05 max V, 0.3-0.4 Mo, bal Fe
For forgings, gears, shafts; Modified Spec., G.E. Co. B5A14S3

CARILLOY NICKEL-CHROMIUM-MOLYBDENUM
M-604, 0.5-0.6 C, 0.5-0.8 Mn, 0.2-0.3 Si, 1.0-1.5 Ni, 0.5-0.8 Cr, 0.20 min Mo, bal Fe.
For shear blades, tough, oil hardened

CARILLOY NICKEL-CHROMIUM-MOLYBDENUM
M-604; 0.55-0.65 C, 0.6-0.8 Mn, 0.2-0.3 Si, 1.5-2.0 Ni, 0.8-1.1 Cr, 0.3-0.4 Mo, bal Fe.
Annealed: 202 241 Brin
For gears, axles, crankshafts; tough, oil hardened

CARILLOY NICKEL CHROMIUM-MOLYBDENUM-VANADIUM.
M-604; 0.40 max C, 0.75 max Mn, 0.30 max Si, 3.25 max Ni, 1.25 max Cr, 0.25 max V, 0.3-0.5 Mo, bal Fe.
Normalized and annealed: 90,000 TS; 15 El; 24 RA.

For turbine rotor; radial body tests; G.E. Co. B31A1S1.

CARILLOY NICKEL STEEL
M-604; 0.08-0.18 C, 0.3-0.6 Mn, 0.4 max P, 0.045 max S, 0.05 max Si, 0.2-0.5 Ni, bal Fe.
For seamless tubes; good weldability.

CARILLOY NICKEL-VANADIUM-MOLYBDENUM.
M-604; 0.3-0.4 C, 0.5-0.8 Mn, 0.3 max Si, 2.5-3.25 Ni, 0.15 min V, 0.3-0.5 Mo, bal Fe.
Normalized and annealed: 90,000 TS; 15 El; 24 RA.
For gears, shafts, axles, crankshafts; shock resistant.

CARILLOY STRUCTURAL MANGANESE.
M-604; 0.40 max C, 1.8 max Mn, 0.10-0.30 Si, bal Fe.
Rolled. 90,000 TS; 55,000 YS; 30 El.
For structural purposes.

CARILLOY STRUCTURAL MANGANESE.
M-604; 0.35 max C, 1.8 max Mn, 0.10-0.30 Si, bal Fe
Rolled: 82,000-100,000 TS; 47,000 YS, 30 El.
For rivets.

CARILLOY STRUCTURAL NICKEL.
M-604; 0.45 max C, 0.70 max Mn, 0.04 max P, 0.05 max S, 3.25 min Ni, bal Fe
85,000-100,000 TS; 50,000 YS; 25 RA.
For structural parts, add 0.2 min Cu for corrosion resisting properties.

CARILLOY STRUCTURAL NICKEL.
M-604; 0.45 max C, 0.70 max Mn, 0.04 max P, 0.05 max S, 3.25 min Ni, bal Fe.
Annealed: 90,000-105,000 TS; 52,000 YS, 20 El, 35 RA
For bridge pins; A.S.T.M., A-8.

CARILLOY STRUCTURAL NICKEL.
M-604; 0.30 max C, 0.60 max Mn, 0.03 max P, 0.045 max S, 3.25 min Ni, bal Fe.
70,000-80,000 TS, 45,000 YS; 40 El.
For rivets; A.S.T.M., A-8.

CARILLOY STRUCTURAL NICKEL.
M-604, 0.45 max C, 0.70 max Mn, 0.04 max P, 0.05 max S, 3.25 min Ni, bal Fe.
95,000-110,000 TS; 55,000 YS; 25 El
For eye bars, A.S.T.M., A-8.

CARILLOY STRUCTURAL STEEL.
M-604; 0.45 max C, 0.70 max Mn, 0.40 max P, 0.05 max S, 3.25 min Ni, bal Fe.
95,000-110,000 TS, 55,000 YS; 16 El; 25 RA.
For bridge rollers; A.S.T.M., A-8.

CARILLOY STRUCTURAL STEEL
M-604; 0.45 max C, 0.70 max Mn, 0.04 max P, 0.05 max S, 3.25 max Ni, bal Fe.
90,000-105,000 TS; 52,000 YS; 20 El; 35 RA.
For eye bars; A.S.T.M., A-8.

CARIRON.
M-718; 2.96 T.C., 0.75 Mn, 1.2 Si, 1.55 Ni, bal Fe.
50,600 TS; 221 Brin.
For liners, pistons; Tr.S 4160; Def. 0.207.

CARLOY.
M-1146; C, Mo, bal Fe.
For tools; water hardened.

CARLTON.
M-1705; 0.95 C, 2.0 Mn, 2.2 Cr, 1.1 Mo, bal Fe. (contains lead).
Free machining grade of air hardening tool steel. AISI A4.

CARMELIA BRONZE.
Pb, Zn, bal Cu.
For machinery bearings; heavy duty.

CARMET.
M-1; WC.
For tools; cemented carbides.

CARMET CA-1.
M-1; WC + Co.
For tipped tools; for steel.

CARMET CA-2.
M-1; WC + Co.
For tipped tools; for finishing cuts

CARMET CA-3.
M-1, WC + Co.
For tipped tools; for roughing cuts.

CARMET CA-3.
M-1696; Sintered carbide.
For rough cutting operations on cast iron, non-ferrous metals and non-metallics. For gages.

CARMET CA-4.
M-1; WC + Co.
For tipped tools, for soft metals.

CARMET CA-4.
M-1696; Sintered carbide.
Cutting tools for finish cutting cast iron, non-ferrous metals and non-metallics. Also for gages.

CARMET CA-5
M-1, WC + Co.
For cutting tool bits for slow speeds and heavy cuts on steel, sintered; TrS. 200,000

CARMET CA-6
M-1; WC + Co.
For cutting tool bits, steel precision boring; sintered, for light precision cuts, Tr.S. 150,000.

CARMET CA-7.
M-1; WC, Co
For cutting tool bits for hard cast iron; sintered, wear resistant, Tr.S 190,000.

CARMET CA-7.
M-1696. Sintered carbide
Cutting tools for finish cutting of non-ferrous metals and non-metallics

CARMET CA-8.
M-1; WC, Co.
For cutting tool bits for light precision cuts on cast iron; sintered, high resistance to wear, Tr.S. 190,000.

CARMET CA-8
M-1696, Sintered carbide
Cutting tools for finish cutting of non-ferrous metals and non-metallics.

CARMET CA-9.
M-1, WC, Co
For cutting tool bits for soft plastics, gauge blanks, sintered, Tr.S. 220,000.

CARMET CA-10.
M-1; WC, Co
For cutting tool bits, dies, sintered, for heavy cuts; Tr.S. 320,000

CARMET CA-10.
M-1696; Sintered carbide.
Cold work dies for blanking dies.

CARMET CA-11.
M-1, WC.
86 Ra.
For colder header dies; sintered, Tr.S. 350,000.

CARMET CA-11.
M-1696; Sintered carbide.
Cold header dies, cold work dies for blanking.

CARMET CA-12.
M-1; WC.
89 Ra.
For cold forming dies; sintered; Tr.S. 300,000.

CARMET CA-12.
M-1696; Sintered carbide.
For cold forming dies; rough machining non-ferrous metals.

CARMET CA-20.
M-1; WC.
84 Ra.
For cold header dies; sintered; Tr.S. 375,000.

CARMET CA-21.
M-1; WC.
86 Ra
For blanking and cold work dies; sintered, Tr.S 275,000.

CARMET C.A. 51.
M-1; WC.
90 Ra
For high speed planer tools, heavy cuts on steel; sintered; Tr.S. 225,000.

CARMET CA-51.
M-1696, Sintered carbide.
For cutting tools, heavy roughing cuts on cast iron and on steel.

CARMET CA-225.
M-1696, Sintered carbide.
For cold header dies.

CARMET CA-604
M-1; WC, TaC, TiC.
For cutting tools for high speed machines, sintered carbides.

CARMET CA-606.
M-1, WC.
For cutting tools, dies; sintered carbides.

CARMET CA-606.
M-1696; Sintered carbide.
For cutting tools for finish cutting of steel.

CARMET CA-608.
M-1; TiC.
For cutting tools, sintered carbides

CARMET CA-609.
M-1, WC.
For cutting tools, dies; sintered carbides.

CARMET CA-610
M-1; TiC.
For cutting tools; sintered carbides.

CARMET CA-610.
M-1696; Sintered carbide.
For cutting tools, for roughing and general purpose cutting of steel.

CARMET CA-704.
M-1696; Sintered carbide.
For cutting tools, precision finishing and boring on steel.

CARMET CA-711.
M-1696; Sintered carbide
For cutting tools, finish cutting of steel.

CARMET CA-720.
M-1696; Sintered carbide.
For cutting tools, for roughing and general purpose cutting of steel.

CARMET CA-740.
M-1696, Sintered carbide.
For cutting tools heavy roughing interrupted cuts.

CARMET CA-815.
M-1; WC.
For hot extrusion dies, precision gauges; sintered carbides.

CARMET CA-815.
M-1696; Sintered chromium carbide.
Used for gages.

CARNOLIA.
M-405; Pb-Sn-Sb.
For antifriction alloy for bearings; Babbitt.

CARO.
91.6 Cu, 8.5 Sn, 0.19 P.
For tubes; corrosion resistant.

CAROBRONZE
M-251, 91.2 Cu, 8.5 Sn, 0.3 P.
60,000-95,000 TS; 50-20 El; 90-190 Brin.
For solid cold drawn tubes, bushes for highly stressed bearings; resists corrosion.

CARO BRONZE
M-730; 91.2 Cu, 8.5 Sn, 0.3 P
Annealed: 63,000 TS; 60 El.
Hard 99,000 TS; 12 El.
For bearings and wearing parts; wrought

CAROGA
M-1; 0.50 C, 1.0 Cr, 0.70 Mn, 0.15 V, bal Fe.
Oil hardened
For tools, gears, springs, oil hardened.

CARPALOY NO. 2.
M-32; 0.30 C, 13 Cr, bal Fe.
Hardened 260,000 TS, 11 El; 32 RA, 512 Brin.
For tools, cutlery, scissors, check valves, surgical instruments; superseded by "Carpenter Stainless Steel No. 2."

CARPALOY NO 3
M-32, 0.19 C, 20.94 Cr, 0.17 Ni, 0.92 Cu, bal Fe.
87,000 TS, 40,000 YS; 23 El; 52 RA.
For heat and corrosion resisting parts; superseded by "Carpenter Stainless Steel No. 3."

CARPENTER NO. 1-JR
M-32; 0.15 max C, 12-14 Cr, 3.25-4.5 Al, bal Fe.
At 70°F: 86,000 TS; 25 El, 57 RA.
At 1400°F 13,500 TS, 77 El, 93 RA
For magnetic cores, resistors; corrosion and oxidation resistant.

CARPENTER NO. 5-317.
M-32, 0.50 C, 1.0 Cr, 1.75 Ni, bal Fe.
Annealed: 91,000 TS, 65,000 YS; 27 El; 64 RA; 187 Brin
Heat treated. 305,000-125,000 TS, 266,000-100,000 YS; 5.2-22 El, 16-60 RA; 495-240 Brin.
For gears, clutches, shafts, crankshafts, propellers; shock resisting.

CARPENTER NO. 11 SPECIAL.
M-32; 1.05 C, 0.20 Mn, 0.20 Si, bal Fe.
Water hardening tool steel for drills, taps, reamers, punches, blanking dies, bushings.
AISI W1.

CARPENTER 19-9DL.
M-32; 0.28-0.35 C, 18-21 Cr, 9-11 Ni, 1.5 Mo, 1.5 W, 0.5 Cb, 0.3 Ti, bal Fe.
Annealed: 102,000 TS; 42,000 YS; 53 El; 58 RA; 188 Brin.
Hot rolled. 114,000 TS; 68,000 YS; 35 El; 50 RA; 241 Brin.
For turbine blades, supercharger wheels, blades; austenitic, stainless.

CARPENTER 19-9DX.
M-32; 0.28-0.35 C, 18-21 Cr, 8-11 Ni, 1.7 Mo, 1.5 W, 0.5 Ti, bal Fe.
Annealed: 102,000 TS; 42,000 YS; 53 El; 188 Brin.
Hot rolled: 114,000 TS; 68,000 YS; 35 El; 241 Brin.
For turbine wheels, buckets, blades.
Austenitic, stainless, non-hardenable.

CARPENTER 21-12 VALVE STEEL.
M-32; 0.2 C, 1.25 Mn, 20.5 Cr, 11.5 Ni, 0.8 Si, bal Fe.
At 500°F: 80,000 TS; 45 El.
At 1500°F: 45,000 TS; 20 El.
For exhaust valves; austenitic, resists corrosion and oxidation.

CARPENTER 21-12N VALVE.
M-32; 0.2 C, 1.25 Mn, 21.0 Cr, 11.5 Ni, 0.8 Si, 0.15-0.25 N, bal Fe.
At R.T.: 123,500 TS; 75,000 YS; 42 El; 241 Brin.
At 1200°F. 73,000 TS; 34,000 YS; 32 El; 130 Brin.
For exhaust valves.
Austenitic, corrosion and heat resistant.

CARPENTER 21-55N.
M-32; 0.20 C, 5.0 Mn, 0.5 Si, 21.0 Cr, 4.5 Ni, 0.30 N, bal Fe.
Annealed: 127,000 TS; 69,000 YS; 41 El; 47 RA; 255 Brin.
At 1200°F: 70,000 TS; 38,000 YS; 36 El; 48 RA; 144 Brin.
For internal combustion valves.
Good high temperature strength
Austenitic, corrosion resistant.

CARPENTER 22-3.
M-32; 0.10 C, 0.50 Mn, 0.25 Si, 3.1 Cr, 22.0 Ni, bal Fe
Annealed: 70,000 TS; 40,000 YS; 35 El; B 74 Rock.
For applications requiring high thermal expansion, bimetals.
High thermal expansion, austenitic, non-magnetic.

CARPENTER NO. 37-7FM.
M-32; 37 Ni, bal Fe.
For instruments; low coefficient of expansion.

CARPENTER 80-20.
M-32; 0 15-0 30 C, 0.6-1 0 Mn, 1.0 max Fe, 0.3 Si, 19-21 Cr, bal Ni.
Annealed: 121,000 TS; 60,000 YS; 35 El; 50 RA; 205 Brin.
For aircraft valves, aircraft engine exhaust systems.
Resists corrosion of leaded gasoline exhausts.

CARPENTER NO. 158.
M-32; 0.10 C, 1.5 Cr, 3.7 Ni, bal Fe.
For high duty clash gears, shafts, clutch parts; case-hardening steel.

CARPENTER NO. 158 PLASTIC MOLD STEEL.
M-32; 0.10 C, 0.5 Mn, 0.3 Si, 1.5 Cr, 3.5 Ni, bal Fe.
Oil hardenable case hardening steel;
designed for molds and cavities requiring high case hardness and good care strength.
Also used for case hardened gears.
AISI P6; SAE 3312.

CARPENTER NO. 345 HOT WORK DIE STEEL.
M-32; 0.35 C, 0.30 Mn, 1.0 Si, 5.0 Cr, 1.25 W, 1.5 Mo, bal Fe.
Hot work tool steel; for aluminum extrusion dies, dummy blocks, forging dies, die casting dies.
AISI H12.

CARPENTER NO. 404.
M-32; 0.05 max C, 11-12 Cr, 1.25-2.00 Ni, 0.03 max N, 1.0 max Mn, 0.5 max Si, bal Fe.
Heat treated: 108,000-163,000 TS; 95,000-125,000 YS; 23-10 El; 70-40 RA; 180-350 Brin.
For steam turbine buckets, blades and bucket covers; for highly stressed parts at temperatures up to 1050°F.

CARPENTER NO. 408 PUNCH STEEL.
M-32; 0.50 C, 0.50 Mn, 0.25 Si, 0.75 Cr, 3.0 Ni, bal Fe.
Heat treated: 275,000 TS; 250,000 YS; 8 El; C 56 Rock.
For punches, clutch parts, vise jaws, chuck jaws, feeder rolls.
Tough, wear resistant.

CARPENTER 430F SOLENOID QUALITY.
M-32; 0.06 C, 0.50 Mn, 0.03 P, 0.30 S, 0.50 Si, 17.5 Cr, 0.30 Mo, bal Fe.
Corrosion resistant soft magnetic steel for solenoids.
Properties vary with annealing treatment.

CARPENTER NO. 481.
M-32; 0.55 C, 0.8 Mn, 1.9 Si, 0.25 C, 0.4 Mo, bal Fe.
Oil hardening shock resistant steel.
For pneumatic tools, chipping chisels, rivet sets, shear blades, collets.

CARPENTER NO. 484-FM.
M-32; 1.0 C, 0.8 Mn, 0.3 Si, 5.25 Cr, 1.1 Mo, 0.2 V, plus alloy sulfides, bal Fe.
Free machining air hardening tool steel;
for large blanking dies, thread roller dies, coining dies, gages. AISI A2.

CARPENTER NO. 610-FM.
M-32; 1.50 C, 0.5 Mn, 0.3 Si, 12.0 Cr, 0.8 Mo, 0.9 V, plus alloy sulphides, bal Fe.
Air hardening, high carbon, high chromium tool steel, free-machining grade;
for blanking and forming dies, drawing dies, edging rolls, extrusion dies. AISI D2.

CARPENTER 636 ALLOY (TYPE 422).
M-32; 0.20-0.25 C, 1.0 max Mn, 1.0 max Si, 12.0-14.0 Cr, 0.50-1.0 Ni, 0.75-1.25 Mo, 0 75-1.25 W, 0.2-0.5 V, bal Fe.
Air or oil hardenable corrosion resistant steel.
Hardened, tempered 1200°F, tested at:
Room temp. 149,000 TS; 125,000 YS.
1100°F: 76,000 TS; 72,000 YS.
For buckets and blades in steam turbines, high temperature bolting, compressor parts.
AISI 422.

CARPENTER 709 TYPE 2.
M-32; 0.45 C, 0.55 Mn, 0.25 Si, 1.0 Cr, 0.5 Mo, 0.3 V, bal Fe.
Heat treated: 142,000-260,000 TS, 130,000-230,000 YS; 20-10 El; 60-41 RA; 340-510 Brin.
For steam turbine valves, pressure vessels; operating temperature to 1200°F.

CARPENTER NO. 822.
M-32; 0.40 C, 0.35 Mn, 1.0 Si, 5.0 Cr, 0.4 V, 1.5 Mo, bal Fe.
Hot work tool steel; for forging dies, die casting dies, hot heading dies, aluminum extrusion dies.
AISI H 11.

CARPENTER NO. 883.
M-32; 0.37 C, 0.35 Mn, 1.0 Si, 5.25 Cr, 1.0 V, 1.3 Mo, bal Fe.
Chrome hot work tool steel, air or oil hardenable; for forging dies, die casting dies, extrusion dies.
AISI H 13.

CARPENTER 901.
M-32; 0.10 max C, 1.0 max Mn, 11-14 Cr, 40-45 Ni, 5-7 Mo, 2.35-3.10 Ti, 0.5 max Cu, 0.35 max Al, 0.010-0.020 B, bal Fe.
At 70°F: 175,000 TS; 125,000 YS; 15 El; 19 RA.
At 1000°F: 156,000 TS; 113,000 YS; 17 El; 29 RA.
At 1500°F: 81,000 TS; 79,000 YS; 13 El; 20 RA.
For aircraft, gas turbines, rotors, compressor discs, hubs, shafts; precipitation hardened, heat and corrosion resistant to 1400°F.

CARPENTER A-286.
M-32; 0.08 C, 13.5-16.0 Cr, 24-47 Ni, 1.5 Mo, 2 Ti, 0.3 V, 0.35 max Al, bal Fe.
At 800°F: 138,000 TS; 93,000 YS; 18 El; 35 RA.
At 1200°F: 103,500 TS; 88,000 YS; 13 El; 14 RA.
At 1500°F: 36,500 TS; 65 El; 37 RA
For turbine blades, jet engine components; age-hardened, for service to 1300°F.

CARPENTER AMS 5700
M-32; 0.45 C, 14 Cr, 14 Ni, 2.5 W, 0.50 max Mo, bal Fe.
Annealed: 110,000 TS; 48,000 YS, 40 El; 45 RA; 216 Brin.
At 1500°F. 37,000 TS; 25,000 YS; 55 El, 58 RA; 93 Brin.
For aircraft valves, valve seat inserts, steam turbine bolts; austenitic, high heat resistance,

CARPENTER BARTO.
M-32, 0.50 C, 0.5 Mn, 0.25 Si, 1.0 Cr, 1.75 Ni, bal Fe.
Oil hardenable alloy steel, for expander punches, feeder rolls, clutch parts, vise jaws and chuck jaws.

CARPENTER CHROME-NICKEL STAINLESS WITH BORON
M-32; 0.08 C, 2.0 Mn, 1.0 Si, 18.0-0-20.0 Cr, 12.0-15.0 Ni, 2.0 max B (3 ranges), bal Fe
Modified 304 stainless,—three boron ranges for thermal neutron absorption

CARPENTER CONSUMET M-50 BEARING STEEL
See CARPENTER CONSUMET M-50 HIGH SPEED STEEL

CARPENTER CONSUMET M-50 HIGH SPEED STEEL.
M-32, 0.80 C, 0.25 Mn, 0.25 Si, 4.0 Cr, 0.10 Ni, 1.0 V, 4.5 Mo, bal Fe.
High speed steel; used largely for bearings in aircraft and gas turbine engines operating at temperatures up to 800°F
AISI M-50.

CARPENTER CORE IRON
M-32, 0.06 max C, 0.20 max Mn, 0.25 max Si, 0.1 max V, bal Fe.
For solenoid switches, armatures, high magnetic permeability

CARPENTER CUSTOM 450
M-32; 0.05 max C, 0.5 max Mn, 0.5 max Si, 14.5-16.5 Cr, 5.5-7.0 Ni, 0.5-1.0 Mo, 1.25-1.75 Cu, Cb = 8 × C min, bal Fe.
Martensitic age hardenable stainless steel
Annealed: 144,000 TS; 117,000 YS; 14 El.
Hardened: 196,000 TS, 184,000 YS; 14 El.

CARPENTER CUSTOM 455.
M-32, 0.03 C, 0.25 Mn, 0.25 Si, 11.75 Cr, 8.5 Ni, 1.2 Ti, 0.3 Cb, 2.25 Cu, bal Fe.
Martensitic, age hardenable, stainless steel.
Annealed: 140,000 TS; 115,000 YS, 12 El.
Hardened: 190,000-300,000 TS, 175,000-235,000 YS, 3-15 El; 40-50 Rock C
Properties vary depending on treatment
Good properties up to 800°F; for bolts, fasteners, valves

CARPENTER CUSTOM 630 (17 Cr-4 Ni).
M-32; 0.07 C, 15.5-17.5 Cr, 3.0-5.0 Ni, 3.0-5.0 Cu, 0.15-0.45 Cb + Ta, 1.0 max Mn, 1.0 max Si, bal Fe.
Martensitic, precipitation/age hardening stainless steel.
Aged: 125,000-200,000 TS, 85,000-185,000 YS; (depending on aging treatment).
For oil field valve parts, aircraft fittings, paper mill equipment, jet engine parts. AISI 630.

CARPENTER C-XB VALVE STEEL.
M-32; 0.80 C, 0.4 Mn, 2.25 Si, 20.0 Cr, 1.5 Ni, bal Fe.
Hardenable silicon-chrome alloy
At 1200°F: 39,500 TS; 29,500 YS; 33.5 El.
For exhaust valves, valve seat inserts, intake valves in internal combustion engines.

COLUMBIA EXTRA.
M-35; 0.7-1.2 C, 0.25 Si, 0.25 Mn, bal Fe.
For cold chisels, shear blades, punches, drills; Type W1, water hardened.

CARPENTER FOUR STAR.
M-32, 1.30 C, 0.3 Mn, 0.3 Si, 4.5 Cr, 4.5 Mo, 5.5 W, 4.0 V, bal Fe.
High carbon, high speed steel for extra wear resistance. for reamers, drills, lathe tools, thread chasers, broaches. AISI M4.

CARPENTER FREE CUT INVAR 36
M-32; 0.12 max C, 0.35 Mn, 36 Ni + Co, 0.20 Se, bal Fe
For low expansion alloy; free-cutting.

CARPENTER GLASS SEALING "27"
M-32, 0.15 max C, 28 Cr, bal Fe
Annealed 85,000 TS, 55,000 YS, 25 El, 185 Brin
For glass sealing, metal to glass

CARPENTER GLASS SEALING 42
M-32, 0.10 max C, 0.50 Mn, 0.25 Si, 41.5 Ni, bal Fe
Cold drawn: 120,000 TS, 3 El; 240 Brin.
Annealed: 82,000 TS, 30 El, 140 Brin
For glass to metal seals, for hard and soft glass.

CARPENTER GLASS SEALING "42-6."
M-32; 0.10 max C, 0.50 Mn, 0.25 Si, 42.5 Ni, 5.75 Cr, bal Fe
Strip and wire with thermal expansion matching characteristics of 0120 glass, for sealing into glass.

CARPENTER GLASS SEALING "45-6"
M-32, 0.10 max C, 0.3 Mn, 0.3 Si, 45 Ni, 6 Cr, bal Fe
Annealed 80,000 TS, 40,000 YS, 30 El, B 80 Rock.
For metal to glass sealing (0120 and 9010 glass).
Controlled coef expansion.
Vacuum melted, low gas content

CARPENTER GLASS SEALING 46.
M-32; 46 Ni, bal Fe
For metal to glass seals; controlled expansion.

CARPENTER GLASS SEALING 52.
M-32, 0.10 max C, 0.50 Mn, 0.25 Si, 51 Ni, bal Fe.
Annealed: 80,000 TS, 40,000 YS; 35 El; Rockwell B 83
For glass to metal seals; for soft glass and ceramics.

CARPENTER GLASS SEALING "52" PHOTO-ETCH QUALITY.
M-32; 0.10 max C, 0.50 Mn, 0.25 Si, 50.50 Ni, bal Fe.
Strip designed to produce sharp, square edges in photo-etching and to match expansion of soft glasses and some ceramics.

CARPENTER H-9 DOUBLE HEADER DIE STEEL.
M-32; 0.90 C, 0.4 Mn, 0.4 Si, bal Fe.
Water hardening tool steel; for solid and gripper cold heading dies, inserts, coining dies, knurls.
AISI W1.

CARPENTER H-46.
M-32; 0.15-0.20 C, 10-14 Cr, 0.3-0.6 Ni, 0.5-0.8 Mo, 0.2-0.4 V, 0.2-0.6 Cb, 0.06-0.10 N, bal Fe.
At 70°F: 151,000 TS; 124,000 YS; 20 El; 56 RA; 302 Brin.
At 1200°F: 60,500 TS; 56,200 YS; 30 El; 76 RA.
For jet aircraft engine compressor blades and rotor discs; good strength and ductility to 1200°F.

CARPENTER HIGH PERMEABILITY "49"
M-32, 0.05 C, 0.05 Mn, 0.35 Si, 48.0 Ni, bal Fe.
Annealed: 70,000 TS; 22,000 YS, 45 El
Flux density· 15,000 gausses; low hysteresis loss.
Available in 3 grades; for magnet cores, solenoids, laminations, transformers.

CARPENTER HY MU "80."
M-32; 0.03 C, 0.50 Mn, 0.35 Si, 80.0 Ni, 4.0 Mo, bal Fe.
Unoriented alloy with high initial permeability and maximum permeability with minimum hysteresis loss
For transformer cores, tape wound toroids, and laminations.

CARPENTER HY MU "800" PHOTO CHEM QUALITY.
M-32, 0.01 C, 0.50 Mn, 0.15 Si, 80.0 Ni, 5.0 Mo, bal Fe
Vacuum melted soft magnetic sheet for use with photochemical techniques for lamination or toroids.
Minimum permeability of 60,000 at 40 gauss

CARPENTER HY-RA80
M-32, 0.05 C, 0.5 Mn, 0.15 Si, 79 Ni, 4 Mo, bal Fe
For electrical equipment, electronic devices; square hysteresis loop properties, high permeability

CARPENTER HY-SAT 48 FM
M-32, 0.04 C, 0.80 Mn, 0.40 Si, 49.0 Co, 1.9 V, 0.20 Se, bal Fe
Ann. Bm· 22,000 gausses.
Br· 15,000 gausses.
Hc. 5.00 Oersteds
μ max· 1700.
For sonar applications, ultrasonic transducers

CARPENTER INVAR 36
M-32, 0.12 max C, 0.35 Mn, 36 Ni + Co, bal Fe.
Rolled. 90,000 TS, 70,000 YS; 20 El; 60 RA, B 90 Brin.
For precision instruments, radio parts, bi-metal; low coefficient of expansion.

CARPENTER INVAROD
M-32; 0.10 max C, 2.50 Mn, 0.20 max Si, 36.0 Ni, 0.75 Ti, bal Fe
Welding alloy for joining Invar "36" to itself or other metals without preheating or postheating

CARPENTER KW.
M-32; 1.3 C, 3.5 W, 0.3 Si, 0.3 Mn, bal Fe
For draw dies, punches, mandrels, gauges; water hardened.

CARPENTER LAPELLOY.
M-32; 0.25-0.35 C, 0.95-1.25 Mn, 0.50 max Si, 11.0-12.0 Cr, 0.50 max Ni, 2.5-3.0 Mo, 0.2-0.3 V, bal Fe.
Air or oil hardenable corrosion resistant steel.
Hardened; tested 1200°F: 60,000 TS; 50,000 YS.
For steam turbine buckets and blades, compressor blades, valve stems.

CARPENTER LAPELLOY "C."
M-32; 0.20-0.25 C, 0.65-1.00 Mn, 11-12 Cr, 0.50 max Ni, 2.50-3.00 Mo, 1.75-2.25 Cu, 0.06-0.10 N, bal Fe.
Heat treated: 135,000-203,000 TS; 105,000-170,000 YS; 17-18 El; 47-55 RA.
For compressor wheels, turbine shafts, compressor buckets, blades, bolts; for high stressed parts operating to 1200°F.

CARPENTER LOW EXPANSION 39.
M-32, 39 Ni, bal Fe.
For instruments; low expansion alloy.

CARPENTER LOW EXPANSION 42.
M-32, 42 Ni, bal Fe.
Annealed. 82,000 TS, 30 El; 140 Brin.
Cold drawn. 120,000 TS, 3 El; 240 Brin.
For low expansion and high temperature applications; coefficient of expansion 3×10^{-6}/°F at 70-650°F.

CARPENTER LOW EXPANSION 42Cb.
M-32, 42 Ni, Cb, bal Fe.
For instruments, low expansion alloy.

CARPENTER M-252
M-32, 0.10-0.20 C, 18-20 Cr, 9-10.5 Mo, 9-11 Co, 0.75-1.25 Al, 2.25-2.75 Ti, 0.02-0.15 Zr, 0.001-0.01 B, 5 max Fe, bal Ni
Heat treated· 175,000 TS, 110,000 YS, 25 El.
At 1500°F 91,000 TS, 84,000 YS; 24 El.
For jet engine and gas turbine buckets
Resists heat to 1600°F Precipitation hardening

CARPENTER MANIFLEX
M-32, 0.20 C, 1.25 Mn, 0.80 Si, 0.20 S, 21.0 Cr, 11.5 Ni, bal Fe
Free machining austenitic stainless for corrosion resistance and high temperature operation.
For shafts, bushings in manifold exhaust heat control valves in automotive engines

CARPENTER MEL-TROL AMS 5616
M-32; 0.15-0.20 C, 0.50 Mn, 0.50 Si, 12.0-14.0 Cr, 1.8-2.2 Ni, 0.50 max Mo, 2.5-3.5 W, bal Fe.
Air or oil hardenable corrosion resistant steel
Max heat treated strength· about 217,000 TS
Tested 1100°F· 135,000 TS, 120,000 YS, 18 El.
For steam turbine buckets and blades, gas turbine parts, high temperature bolts
AMS 5616, Greek Ascoloy

CARPENTER MEL-TROL HAMPDEN
M-32, 2.1 C, 0.35 Mn, 0.3 Si, 12.0 Cr, 0.5 Ni, bal Fe
Oil hardening high carbon, high chromium die steel with extra wear resistance; for slitting cutters, lamination dies, cold rolls, blanking and forming dies.
AISI D3

CARPENTER MEL-TROL HI SHOCK 60
M-32, 0.68 C, 0.5 Mn, 0.3 Si, 1.0 Cr, 0.5 Ni, 1.0 Mo, 2.5 Cu, 0.15 V, bal Fe.
Air or oil hardening tool steel, for large blanking and forming dies, trimming dies, shear blades, mandrels, forming tools.

CARPENTER MEL-TROL K-W.
M-32; 1.3 C, 0.3 Mn, 0.3 Si, 3.5 W, bal Fe.
Water hardening tool steel with extra wear and abrasion resistance; for burnishing tools, tube drawing dies, wire drawing dies, reamers.
AISI F2.

CARPENTER MEL-TROL MIRROMOLD.
M-32; 0.10 C, 0.20 Mn, 0.10 V, bal Fe.
Low carbon steel for easy cold hubbing and subsequent case hardening for plastic molds.
AISI P1.

CARPENTER MEL-TROL O-1.
M-32; 0.90 C, 1.2 Mn, 0.5 Cr, 0.5 W, 0.2 V, bal Fe.
Oil hardening tool steel; for blanking and forming dies, broaches, collets, thread gages, spindles.
AISI O1.

CARPENTER MEL-TROL SPEED STAR.
M-32; 0.82 C, 0.3 Mn, 0.25 Si, 4.25 Cr, 5.0 Mo, 6.25 W, 1.8 V, bal Fe.
High speed steel; for roughing tools as lathe tools, milling cutters, end mills, form tools, drills and reamers. AISI M2.

CARPENTER MEL-TROL STAR-ZENITH.
M-32; 0.72 C, 0.25 Mn, 0.20 Si, 4.0 Cr, 18.25 W, 1.15 V, bal Fe.
Tungsten high speed steel; for lathe and planer tools, form cutters, milling cutters, broaches, thread chasers, taps. AISI T1.

CARPENTER MEL-TROL SUPER SAMSON.
M-32; 0.10 C, 0.3 Mn, 0.2 Si, 5.0 Cr, 0.9 Mo, 0.25 V, bal Fe.
Low carbon, chromium air hardening steel to be case hardened for plastic molds or for die casting dies. AISI P4.

CARPENTER MEL-TROL TGS.
M-32; 0 20 C, 1.30 Mn, 0.20 Si, bal Fe.
Oil hardening carburizing grade steel.
For case hardened gears, guides, cams.

CARPENTER MEL-TROL VEGA MOLD STEEL.
M-32; 0.7 C, 0.3 Si, 2 0 Mn, 1.0 Cr, 1.35 Mo, bal Fe.
Air hardening die steel; for plastic molds that are molding clear plastics, tiles, etc. also for knife edges and load cells. AISI A6.

CARPENTER MOLY ASCOLOY
M-32; 0.08-0.15 C, 0 50-0.90 Mn, 0.35 max Si, 11.0-12.5 Cr, 2.0-3.0 Ni, 1.5-2.0 Mo, 0.25-0.40 V, bal Fe.
Martensitic, air or oil hardenable, corrosion resistant steel; hardenable to 44-48 Rock C.
Hardened; tested at 1200°F. 146,000 TS; 97,000 YS, 18 El.
For high temperature bolts, compressor parts in gas turbines, steam turbine buckets and blades

CARPENTER N-155
M-32, 0.08-0 16 C, 1.0-2.0 Mn, 1 0 max Si, 20.0-22.5 Cr, 19 0-21 0 Ni, 18.5-21.0 Co, 2.5-3 5 Mo, 2 0-3 0 W, 0.75-1 25 Cb + Ta, 0.50 max Cu, 0 10-0.20 N, bal Fe
Hardened. Room T : 118,000 TS; 59,000 YS; 40 El
1800°F: 19,000 TS.
For aircraft tail cones and tail pipes, exhaust manifolds, combustion chambers, afterburners

CARPENTER NIMARK I.
M-32; 0.03 max C, 18 0-19.0 Ni, 7.0-8.0 Co, 4.7-5.0 Mo, 0 3-0.5 Ti, 0.05-0 15 Al, 0 03 max Zr, 0 003 max B, 0.05 max Ca, bal Fe.
Maraging type alloy; as hardened: 255,000 TS; 250,000 YS; 12 El; 49 Rock C.
Weldable; for high strength parts and assemblies.

CARPENTER NIMARK II.
M-32; 0.03 max C, 19.5-20.5 Ni, 1.2-1.6 Ti, 0.15-0.35 Al, 0.4-0 6 Cb, 0.05 max Zr, 0.003 max B, 0.05 max Ca, bal Fe.
Maraging type alloy; as hardened: 265,000 TS; 255,000 YS; 12 El; 51 Rock C.
Weldable; for high strength parts and assemblies.

CARPENTER NIMARK 300.
M-32; 0.03 max C, 18.0-19.0 Ni, 4.7-5.1 Mo, 8.0-9.5 Co, 0.50-0.80 Ti, 0.05-0.15 Al, 0.03 max Zr, 0.005 max B, 0.05 max Ca, bal Fe.
Maraging type alloy; as hardened: 294,000 TS; 290,000 YS; 11 El; 52 Rock C.
Weldable; for high strength parts and assemblies.

CARPENTER PYROMET 80A.
M-32; 0.06 C, 20 Cr, 0 007 S, 2.35 Ti, 1.25 Al, 0.05 Cu, 1 0 Co, bal Ni.
Age Hardened: 145,000 TS; 90,000 YS; 39 El.
At 1200°F: 115,000 TS; 80,000 YS; 21 El.
For high temperature applications.
Heat treatable. High creep and fatigue resistance.
Oxidation and corrosion resistance.

CARPENTER PYROMET 88.
M-32; 0 03 C, 2.2 Mn, 16 4 Cr, 6.7 Fe, 3.05 Ti, bal Ni.
High strength, high temperature nickel base alloy, age hardenable; useful to 1500°F; good corrosion resistance.

CARPENTER PYROMET 90.
M-32; 0.07 C, 19.5 Cr, 18 0 Co, 2.4 Ti, 1.4 Al, bal Ni.
Age hardenable nickel base alloy.
Room Temp 179,000 TS; 117,000 YS; 33 El.
1600°F: 48,000 TS, 38,000 YS.
For high temperature applications; good resistance to scaling and corrosion

CARPENTER PYROMET 102
M-32, 0 10 max C, 14 0-16 0 Cr, 2.75-3 75 Nb, 2.75-3 75 Mo, 2.75-3 75 W, 5.0-9 0 Fe, 0 30-0 70 Al, 0 40-0 70 Ti, 0.003-0 008 B, bal Ni.
Non-magnetic, Ni-Cr base alloy; corrosion resistant and high temperature strength
80°F: 137,000-149,000 TS; 72,000-85,000 YS; 41-47 El
1500°F. 48,000-52,000 TS; 45,000-51,000 YS, 88-112 El.
For heat shields, piping for steam and gas turbine and rocket engines, furnace hardware.

CARPENTER PYROMET 355
M-32; 0.10-0 15 C, 0.50-1.25 Mn, 0.5 max Si, 15 0-16 0 Cr, 4.0-5.0 Ni, 2 5-3.25 Mo, 0 07-0.13 N, bal Fe
Precipitation hardenable stainless steel; wide range of mechanical properties after various heat treatments;—to 235,000 TS max; weldable, machinable in solution treated condition.
AISI 634.

CARPENTER PYROMET 538
M-32; 0 03 C, 8.0-10 0 Mn, 1.0 max Si, 18.0-21 5 Cr, 5.5-7 5 Ni, 0.15-0 40 N, bal Fe.
Strengthened austenitic stainless.
Room T 112,000 TS, 65,000 YS; 42 El.
1000°F. 71,000 TS, 29,000 YS; 35 El.
For steam and autoclave parts, airframe and aircraft engine, chemical processing equipment.

CARPENTER PYROMET 600.
M-32; 0.10 max C, 1 0 max Mn, 0.50 max Si, 14 0-17.0 Cr, 72 0 Ni, 0.50 max Cu, 6 0-10.0 Fe.
Non-magnetic nickel base alloy, corrosion resistant and temperature resistant.
1000°F: 84,000 TS; 28,500 YS; 47 El.
1600°F: 15,000 TS; 9,000 YS, 80 El.
AMS 5665, 5540, 5580.

CARPENTER PYROMET 625.
M-32; 0.10 max C, 20.0-23.0 Cr, 8.0-10 0 Mo, 5.0 max Fe, 0.40 max Ti, 1.0 max Co, 3.15-4.15 Cb + Ta, 0.40 max Al, bal Ni.

Non-magnetic, corrosion resistant and
high temperature alloy.
400°F: 116,000 TS; 43,000 YS; 57 El.
1800°F: 18,000 TS; 16,000 YS; 120 El.
For heat shields, furnace hardware, gas turbine
engine ducting, chemical plant hardware.
AMS 5666; 5599.

CARPENTER PYROMET 680.
M-32, 0.05-0.15 C, 20.5-23.0 Cr, 0.5-2.5 Co,
8.0-10.0 Mo, 0.2-1.0 W, 17.0-20.0 Fe, bal Ni.
Non-magnetic heat and corrosion resistant nickel
base alloy.
Room T.: 104,000 TS; 49,000 YS; 40 El.
1000°F: 94,000 TS; 41,500 YS, 45 El
1800°F: 21,000 TS; 17,000 YS; 43 El.
For gas turbine rotors, afterburner parts, hardware
for furnaces and chemical.
AMS 5536 etc (Reference Hastelloy X).

CARPENTER PYROMET 718.
M-32; 0.10 max C, 17.0-21.0 Cr, 50.0-55.0 Ni + Co,
1.0 max Co, 2.8-3.3 Mo, 4.75-5.50 Cb + Ta,
0.65-1.15 Ti, 0.35-0.85 Al, 0.001-0.006 B,
0.15 max Cu, bal Fe.
Precipitation hardenable nickel base alloy
Hardened, Room T. 210,000 TS; 175,000 YS; 22 El.
1400°F 110,000 TS, 110,000 YS, 27 El.
For jet engine parts as buckets, spacers, wheels,
high temperature fasteners.

CARPENTER PYROMET 800 PIPE & TUBING.
M-32; 0.10 C, 1.5 Mn, 1.0 Si, 19.0-23.0 Cr,
30.0-35.0 Ni, 0.15-0.60 Al, 0.15-0.60 Ti,
0.75 max Cu, bal Fe.
Non-magnetic Ni-Cr-Fe Alloy.
At 1000°F 72,000 TS, 31,700 YS; 38.5 El
At 1500°F 24,800 TS, 14,200 YS; 91 El.
Weldable, corrosion resistant, for
high temperature piping

CARPENTER PYROMET 860
M-32, 0.10 max C, 1.0 max Mn, 1.0 max Si,
12.0-16.0 Cr, 40.0-45.0 Ni, 5.0-7.0 Mo, 3.5-4.5 Co,
2.75-3.75 Ti, 0.75-1.50 Al, 0.008-0.012 B, bal Fe.
Austenitic Fe-Ni base precipitation hardening alloy.
Hardened Room T. 180,000 TS; 115,000 YS,
21 El.
1200°F: 159,000 TS, 125,000 YS; 19 El
1500°F: 106,000 TS; 103,000 YS, 16 El
For corrosion and scale resisting parts at high
temperatures; turbine engine parts, steam
turbine bolting.

CARPENTER PYROMET 882
M-32, 0.40 C, 1.0 Si, 5.0 Cr, 1.5 Mo, 0.40 V, bal Fe
Air hardened, tempered 1000°F (double).
At 500°F: 260,000 TS, 220,000 YS.
At 1000°F 215,000 TS, 182,000 YS
For forging dies, aluminum extrusion dies,
hot piercing and forming punches.
AISI 610, (Similar to AISI H 11)

CARPENTER PYROMET X-15.
M-32; 0.03 max C, 15.0 Cr, 20.0 Co, 2.9 Mo,
0.20 max Ni, bal Fe
Precipitation hardenable martensitic alloy.
Hardened: Room T.: 235,000 TS; 215,000 YS;
17 El.
1000°F: 190,000 TS, 170,000 YS, 18 El.
For highly stressed parts operating at temperatures
up to 1050°F.

CARPENTER PYROMET X-750
M-32; 0.08 max C, 14.0-17.0 Cr, 70.0 min Ni + Co,
1.0 max Co, 2.25-2.70 Ti, 0.4-1.0 Al,
0.70-1.20 Cb + Ta, 0.5 max Cu, 5.0-9.0 Fe.
Precipitation hardenable nickel base alloy.
Room T.: 161,000 TS; 92,000 YS; 22 El.
1400°F: 80,000 TS; 68,000 YS; 10 El.
For high temperature springs, parts for gas turbine,
jet engines, extrusion dies.
AISI 688; AMS 5667, 5668; (Reference:
Inconel X).

CARPENTER PYROMET X-751.
M-32, 0.04 C, 15.0 Cr, 1.0 Cb, 6.75 Fe, 2.5 Ti,
1.2 Al, 0.05 Cu, bal Ni
Age hardenable, high strength, high
temperature alloy
Hardened: 175,000 TS; 110,000 YS; 20 El.
For high temperature applications; good resistance to
corrosion and to scaling.

CARPENTER PYROTOOL 7.
M-32; 0.05 C, 19.0 Cr, 52.5 Ni + Co, 3.0 Mo,
5.25 Cb + Ta, 1.0 Ti, 0.6 Al, bal Fe.
Austenitic precipitation hardenable nickel base alloy
for high strength up to 1300°F.
Hardened, at 1300°F: 120,000 TS; 115,000 YS
For high temperature tooling, extrusion dies,
forging dies, rams, liners.

CARPENTER PYROTOOL 15
M-32; 0.03 C, 15.0 Cr, 20.0 Co, 2.9 Mo, 0.20 Ni,
bal Fe.
Low carbon martensitic alloy having good strength
up to 1050°F. Solution treatable.
Hardened; at 1100°F 145,000 TS; 125,000 YS
For arbors, cams, collets, dies, fixtures.

CARPENTER PYROTOOL A.
M-32; 0.04 C, 1.2 Mn, 0.5 Si, 14.5 Cr, 25.0 Ni,
1.5 Mo, 2.2 Ti, bal Fe.
Austenitic precipitation hardening iron base alloy.
Hardened: Room T 155,000 TS, 100,000 YS
At 1500°F 36,000 TS; 33,000 YS.
For extrusion dies, liners, forging dies

CARPENTER PYROTOOL EX.
M-32; 0.05 C, 0.2 Mn, 0.2 Si, 14.0 Cr, 42.5 Ni,
6.0 Mo, 4.0 Co, 3.0 Ti, 1.2 Al, bal Fe.
Austenitic precipitation hardenable nickel base alloy
for high strength in 1000-1500°F range.
Hardened at 1500°F 106,000 TS, 103,000 YS.
For high temperature tooling, extrusion dies,
forging dies, rams, liners

CARPENTER PYROTOOL M
M-32; 0.12 C, 0.2 Mn, 0.2 Si, 19.0 Cr, 10.0 Mo,
10.0 Co, 1.0 Al, 2.5 Ti, 2.0 Fe, bal Ni.
Austenitic precipitation hardenable nickel base alloy
for operation up to 1500°F
Hardened; at 1500; 91,000 TS, 84,000 YS.
For high temperature tooling, extrusion dies,
forging dies, mandrels, dummy blocks.

CARPENTER PYROTOOL V
M-32, 0.04 C, 0.25 Mn, 0.25 Si, 14.5 Cr, 27.0 Ni,
1.25 Mo, 3.0 Ti, 0.2 V, bal Fe
Austenitic precipitation hardenable iron base alloy
Hardened; at 1500°F. 60,000 TS; 49,000 YS.
For high temperature tooling, liners, extrusion
dies, forging dies, dummy blocks.

CARPENTER PYROTOOL W.
M-32, 0.05 C, 0.2 Mn, 0.2 Si, 19.5 Cr, 4.25 Mo,
13.0 Co, 3.10 Ti, 1.20 Al, 1.0 Fe, bal Ni.
Austenitic hardenable nickel base alloy, high strength
and hardness up to 1500°F
Hardened; at 1600°F. 76,000 TS, 75,000 YS
For high temperature tooling, extrusion
dies, forging dies.

CARPENTER R.D.S.
M-32; 0.70 C, 0.35 Mn, 0.25 Si, 1.0 Cr, 1.75 Ni,
bal Fe.
Oil hardening tool steel with extra toughness;
for collets, thread rolling dies, punches,
knuckle pins, slitting shears. AISI L 6.

CARPENTER SAMSON EXTRA PLASTIC MOLD STEEL.
M-32; 0.08 C, 0.40 Mn, 0.30 Si, 2.3 Cr, bal Fe.
Low carbon steel for easy cold hubbing and subsequent case hardening for plastic molds. AISI P5.

CARPENTER SEAT RING DIE STEEL.
M-32; 0.65 C, 3.0 Cr, 3.0 Mo, 1.0 V, 3.5 W, bal Fe.
Oil or air hardenable modified high speed tool steel; designed for hot forming of automotive valves; good wear resistance at elevated temperatures.

CARPENTER SIL. NO. 1.
M-32; 0.45 C, 0.50 Mn, 3.25 Si, 8.5 Cr, bal Fe.
At 77°F: 133,000 TS; 82,500 YS; 22.5 El; 49.0 RA; 269 Brin.
At 1000°F: 67,500 TS; 53,000 YS; 40.5 El; 71.0 RA; 125 Brin.
For intake valves, exhaust valve stems; hardenable, heat resistant.

CARPENTER SILICON CORE IRON A.
M-32; 0.05 C, 0.15 Mn, 1.0 Si, bal Fe.
Saturation B.) 21,000; Res. Ind. (Br) 6500; Hc 0.90; Max permeability 4500.
For motor armatures, pole pieces, solenoid switches, relays.

CARPENTER SILICON CORE IRON "A-FM."
M-32; 0.05 max C, 0.15 max Mn, 1.0 max Si, 0.18 P, bal Fe
Free machining silicon core iron.
DC U max 4500 at H = 1.36 Oersted.
Hc from 10,000 gausses 0.70/0.80 Oersted.
Br from 10,000 gausses 6000 gausses.
Saturation at H = 200 21,000 gausses.
For machined magnet cores.

CARPENTER SILICON CORE IRON "B."
M-32, 0.05 C, 0.15 Mn, 2.50 Si, bal Fe
Saturation (Bs)-Gausses 20,600.
Residual Induction (Br) from 10,000 Gausses: 6,000
Coercive Force (Hc) from 10,000 Gausses: 0.70
Max Permeability: 7000.
For solenoid switches, armatures, pole pieces

CARPENTER SILICON CORE IRON "B-FM"
M-32; 0.05 C, 0.40 Mn, 2.50 Si, 0.12 P, bal Fe
Free machining grade of Carpenter Silicon Core Iron "B". Properties and uses similar

CARPENTER SILICON CORE IRON C.
M-32; 0.05 C, 0.15 Mn, 4.0 Si, bal Fe.
Saturation (B.) 20,000; Res. Ind. (Br) 4000; Hc 0.60; Max permeability 4000.
For motor armatures, pole piece , solenoid switches, relays.

CARPENTER SOLAR.
M-32; 0.50 C, 0.40 Mn, 1.0 Si, 0.50 Mo, bal Fe
Water hardening tool steel with more than normal toughness; for chisels, pneumatic tools, rivet busters, screw drivers. AISI S2.

CARPENTER STAINLESS NO. 2 MOLD STEEL.
M-32; 0.35 C, 0.5 Mn, 0.5 Si, 13.0 Cr, bal Fe
Air or oil hardenable corrosion resistant steel; hardenable to 48-54 Rock C max; for plastic molds. AISI 420.

CARPENTER STAINLESS NO. 5 (TYPE 416).
M-32; 0.15 max C, 1.25 max Mn, 0.15 min S, 1.0 max Si, 12.0-14.0 Cr, bal Fe.
Free machining, air or oil hardenable corrosion resistant steel.
As hardened: 160,000-195,000 TS.
For machined parts as studs, bolts, shafts, lead screws, axles for resistance to rust.
AISI 416.

CARPENTER STAINLESS NO. 5-F.
M-32; 0.10 max C, 1.0 max Mn, 0.30 min S, 1.0 max Si, 13.0-14.5 Cr, 0.5 max Ni, 0.4-0.6 Mo, bal Fe.
Corrosion resistant steel, very free machining, not designed for heat treating.
As rolled: 90,000 TS, 75,000 YS; 15 El.
For valve trim, fuel nozzles, carburetor needles, studs, bolts, nuts, magnet cores.

CARPENTER STAINLESS NO. 7 (TYPE 329).
M-32, 0.15 max C, 25.0-30.0 Cr, 3.5-6.0 Ni, 1.0-2.0 Mo, bal Fe.
Precipitation hardenable, chromium stainless.
Annealed: 105,000 TS; 80,000 YS; 230 Brin.
Hardened: 32-50 Rock C
For valves, valve fittings, pump parts.

CARPENTER STAINLESS NO. 7-Mo (Type 329).
M-32, 0.20 max C, 23-28 Cr, 2.5-5.0 Ni, 1.0-2.0 Mo, bal Fe.
Welded stainless steel tubing, ferrite matrix with some austenite.
Annealed 105,600 TS, 80,000 YS, 25 El
For heat exchangers, paper & pulp, chemical industries Good corrosion resistance.

CARPENTER STAINLESS NO 10
M-32, 0.08 max C, 15-17 Cr, 17-19 Ni, bal Fe.
Annealed. 75,000 TS, 35,000 YS, 55 El, 72 RA; 145 Brin
For bolts, fasteners, cold headed and upset parts; austenitic, stainless, low work hardening.

CARPENTER STAINLESS NO. 20 Cb-3.
M-32, 0.06 max C, 2.0 max Mn, 1.0 max Si, 19.0-21.0 Cr, 32.5-35.0 Ni, 2.0-3.0 Mo, 3.0-4.0 Cu, Cb + Ta = 8 × C min/1.0 max, bal Fe
Austenitic stainless steel with superior resistance to 10-40% sulphuric acid and other chemicals
Weldable, for mixing tanks, heat exchangers, process piping, pump shafts and rods

CARPENTER STAINLESS NO. N-1 (TYPE 414).
M-32, 0.15 max C, 1.0 max Mn, 1.0 max Si, 11.5-13.5 Cr, 1.25-2.50 Ni, bal Fe.
Air or oil hardening, corrosion resistant steel
As quenched 210,000 TS, 155,000 YS, 15 El.
For high strength bolts, nuts, studs and other hardware operating up to about 900°F.
AISI 414

CARPENTER STAINLESS TYPE 302
M-32, 0.15 max C, 2.0 max Mn, 1.0 Si, 17.0-19.0 Cr, 8.0-10.0 Ni, bal Fe.
Austenitic 18-8 stainless steel
Annealed 85,000 TS; 35,000 YS; 60 El.
For salt water fishing tackle, dairy equipment, ice cream molds, camera parts. AISI 302.

CARPENTER STAINLESS CUSTOM FLO 302 HQ
M-32; 0.08 C, 2.0 max Mn, 1.0 max Si, 17.0-19.0 Cr, 8.0-10.0 Ni, 3.0-4.0 Cu, bal Fe
Austenitic stainless steel with low work-hardening teendencies.
Annealed: 73,000 TS; 27,000 YS; 65 El.
For upset head bolts, nuts, screws and other cold formed parts.

CARPENTER STAINLESS TYPE 303.
M-32; 0.12 max C, 2.0 max Mn, 0.04 max P, 0.18-0.35 S, 1.0 max Si, 17.0-19.0 Cr, 8.0-10.0 Ni, bal F.
Free machining austenitic stainless steel.

Annealed: 90,000 TS; 35,000 YS; 50 El; 160 Brin.
For machined parts as shafts, valves, valve bodies, studs, fittings; not hardenable by heat treating
AISI 303.

CARPENTER STAINLESS TYPE 303 Se.
M-32; Same as Carpenter Stainless Type 303 except 0.15-0.35 Se replaces the sulphur as free-machining agent

CARPENTER STAINLESS TYPE 304.
M-32; 0.08 max C, 2.0 max Mn, 1.0 max Si, 18.0-20.0 Cr, 8.0-12.0 Ni, bal Fe.
Austenitic 18-8 stainless steel.
Annealed: 85,000 TS; 35,000 YS; 60 El
For parts in food, dairy and beverage industries.
AISI 304.

CARPENTER STAINLESS 304 + B.
M-32, 0.08 max C, 18-20 Cr, 11-14 Ni, 2 min B, 2 max Mn, bal Fe.
Annealed: 100,000 TS; 50,000 YS; 10 El; 10 RA, 210-240 Brin.
For control rods and shielding for nuclear reactors, corrosion resistant.

CARPENTER STAINLESS TYPE 304L
M-32; 0.03 max C, 2.0 max Mn, 1.0 max Si, 18.0-20.0 Cr, 8.0-12.0 Ni, bal Fe.
Low carbon, austenitic, 18-8 stainless steel, for welding without subsequent heat treat.
Annealed: 75,000 TS, 28,000 YS, 60 El, 150 Brin
For welded assemblies in laundry, dairy, food and beverage industries AISI 304 L

CARPENTER STAINLESS TYPE 305
M-32, 0.12 max C, 2.0 max Mn, 1.0 max Si, 17.0-19.0 Cr, 10.5-13.0 Ni, bal Fe.
Austenitic stainless steel, work-hardens less than 18-8 type
Annealed 80,000 TS; 36,000 YS, 56 El, 156 Brin
Used for severe deep drawing and spinning operations, also cold headed bolts and screws.

CARPENTER STAINLESS NO 309
M-32, 0.20 max C, 2 max Mn, 22-24 Cr, 12-15 Ni, bal Fe
At 70°F, 80,000 TS, 58,000 YS, 52 El; 71 RA.
At 1200°F 52,000 TS, 31,000 YS, 36 El; 44 RA
For furnace parts, fire box sheets, high temperature containers, weld wire
Heat, oxidation and corrosion resistance

CARPENTER STAINLESS NO. 309 S
M-32, 0.08 max C, 2 max Mn, 22-24 Cr, 12-15 Ni, bal Fe
Annealed: 95,000 TS, 40,000 YS, 45 El; 65 RA; 160 Brin
For furnace parts, fire box sheets, high temperature containers, weld wire
Heat, oxidation and corrosion resistance.

CARPENTER STAINLESS NO 310
M-32, 0.20 max C, 2 max Mn, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed 95,000 TS, 45,000 YS; 50 El; 65 RA, 185 Brin
At 1200°F 58,000 TS; 22,000 YS, 32 El; 45 RA.
For furnace parts, heat treating boxes.
High oxidation and heat resistance for service up to 2100°F.

CARPENTER STAINLESS NO 310 S
M-32; 0.08 max C, 2 max Mn, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El, 65 RA; 185 Brin.
At 1200°F: 58,000 TS, 22,000 YS; 32 El; 45 RA.
For furnace parts, heat treating boxes
High oxidation and heat resistance for service up to 2100°F.

CARPENTER STAINLESS STEEL NO. 316.
M-32; 0.1 max C, 18 Cr, 11 Ni, 2.5 Mo, bal Fe
Annealed: 80,000 TS; 30,000 YS; 60 El; 70 RA; 150 Brin.
For chemical equipment; corrosion resistant, austenitic.

CARPENTER STAINLESS TYPE 316 L.
M-32; 0.03 max C, 2.0 max Mn, 1.0 max Si, 16.0-18.0 Cr, 10.0-14.0 Ni, 2.0-3.0 Mo, bal Fe.
Austenitic stainless steel, low carbon for improved weldability, extra corrosion resistance.
Useful to 1600°F.
For pulp handling equipment, photographic chemicals, inks, rayon, rubber, welded assemblies. AISI 316 L.

CARPENTER STAINLESS NO. 317.
M-32; 0.10 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, bal Fe.
Annealed: 85,000 TS, 150 Brin.
For chemical plant equipment; stainless, austenitic.

CARPENTER STAINLESS TYPE 321.
M-32, 0.08 max C, 2.0 max Mn, 1.0 max Si, 17.0-19.0 Cr, 9.0-12.0 Ni, Ti = 5 × C min, bal Fe.
Austenitic, 18-8 type stainless steel, weldable and elevated temperature grade.
At 1400°F 30,000 TS, 21,000 YS, 33 El
For aircraft collector rings, exhaust manifolds, expansion joints, hot chemical process equipment.
AISI 321.

CARPENTER STAINLESS NO 347 (TYPE 347).
M-32, 0.08 max C, 2.0 max Mn, 1.0 max Si, 17.0-10.0 Cr, 9.0-13.0 Ni, Cb + Ta = 10 × C min, bal Fe
Austenitic, 18-8 stainless steel, weldable and elevated temperature grade
At 1500°F 25,000 TS, 17,000 YS, 40 El
For welded assemblies in food, dairy, beverage, textile and chemical industries, and in elevated temperature operations, weld rods AISI 347

CARPENTER STAINLESS NO 348 (TYPE 348)
M-32, 0.08 max C, 2.0 max Mn, 1.0 max Si, 17.0-19.0 Cr, 9.0-13.0 Ni, Cb + Ta = 10 × C min, 0.10 max Ta, 0.20 max Co, bal Fe
Stabilized austenitic 18-8 type stainless steel, mainly for nuclear applications AISI 348

CARPENTER STAINLESS NO 404
M-32; 0.05 max C, 1.0 max Mn, 0.5 Si, 11.0-12.5 Cr, 1.25-2.0 Ni, 0.03 N, bal Fe.
Hardenable to 163,000 TS, weldable, tough, corrosion resistant, for stressed parts to 1050°F.

CARPENTER STAINLESS TYPE 405
M-32; 0.08 max C, 1.0 max Mn, 1.0 max Si, 11.5-14.5 Cr, 0.10-0.30 Al, bal Fe
Non-hardenable chromium corrosion resistant steel; weldable without hard weld metal;
for steam nozzles, partitions, fabricated and welded assemblies for mining equipment and chemical plants.
AISI 405.

CARPENTER STAINLESS TYPE 410.
M-32, 0.15 max C, 1.0 max Mn, 0.5 max Si, 11.5-13.0 Cr, bal Fe.
Air or oil hardenable corrosion resistant steel; as quenched hardness 35-44 Rock C.
For steam turbine buckets, gas turbine compressor blades, nuclear reactor rod mechanisms; weldable.
AISI 410, AMS 5613, 5504.

CARPENTER STAINLESS TYPE 416.
M-32; 0.15 max C, 1.25 max Mn, 1.0 max Si, 0.15-0.35 S, 12.0-13.5 Cr, bal Fe.
Free machining, air or oil hardenable corrosion resistant steel.
As hardened: 160,000-190,000 TS.
For machined hardware as studs, bolts, gears to resist rust and scaling up to about 800°F.
AISI 416; AMS 5610.

CARPENTER STAINLESS TYPE 420.
M-32; 0.15 min C, 1.0 max Mn, 1.0 max Si, 12.0-14.0 Cr, bal Fe.
Air or oil hardenable corrosion resistant steel.
As hardened: 190,000-260,000 TS; 140,000-185,000 YS.
At 1200°F: 48,000 TS; 42,000 YS.
For springs, valve parts, valves, gears, cams, pivots, bearings, plastic molds, magnets. AISI 420.

CARPENTER STAINLESS TYPE 420 F.
M-32; 0.15 min C, 12.0-14.0 Cr, 0.60 max Mo, 0.07 min S or Se, bal Fe.
Free machining, air or oil hardenable, corrosion resistant steel.
Properties similar to Carpenter Stainless Type 420 except not recommended for vessels containing gases or liquids under pressure, nor for welded assemblies. Good machinability.
AISI 420 F.

CARPENTER STAINLESS TYPE 430.
M-32; 0.12 max C, 1.0 max Mn, 1.0 max Si, 16.0-18.0 Cr, bal Fe.
Non-hardenable chromium corrosion resistant steel; for hub caps, body molding, radiator grills, gas tank caps, hardware. AISI 430.

CARPENTER STAINLESS TYPE 430 F.
M-32, 0.12 max C, 1.25 max Mn, 0.06 max P, 0.15 min S or Se, 1.0 max Si, 14.0-18.0 Cr, 0.60 max Mo, bal Fe.
Free machining, non-hardenable corrosion resistant steel
Cold drawn: 90,000 TS, 65,000 YS; 15 El.
For screw machined parts as studs, cap screws, shafts, that are non-rusting. AISI 430 F.

CARPENTER STAINLESS NO. 431.
M-32; 0.12-0.17 C, 1.0 max Mn, 1.0 max Si, 1.5-2.5 Ni, 15.5-17.0 Cr, bal Fe.
Air or oil hardenable, corrosion resistant steel.
As hardened: Room Temp.: 200,000 TS; 165,000 YS.
As hardened: At 1000°F: 105,000 TS; 20 El.
Designed for highly stressed and elevated temperature bolts, bomb rack fasteners, pump shafts, valve stems.
AISI 431.

CARPENTER STAINLESS TYPE 440A.
M-32, 0.60-0.75 C, 1.0 max Mn, 1.0 max Si, 16.0-18.0 Cr, 0.75 max Mo, bal Fe
Air or oil hardenable corrosion resistant steel.
Hardenable to 52-56 Rock C; 220,000 min TS.
For pivot pins, dental and surgical instruments, cutlery, valve parts, permanent magnets; resists scaling and softening to about 900°F.
AISI 440A.

CARPENTER STAINLESS NO. 440-B (TYPE 440-B).
M-32; 0.75-0.95 C, 1.0 max Mn, 1.0 max Si, 16.0-18.0 Cr, 0.75 max Mo, bal Fe.
Air or oil hardenable corrosion resistant steel.
Hardenable to 53-58 Rock C; 280,000 TS approx.
For cutlery, ball bearings, scissors.
AISI 440 B.

CARPENTER STAINLESS NO. 440 C.
M-32, 0.95-1.20 C, 1.0 max Mn, 1.0 max Si, 16.0-18.0 Cr, 0.75 max Mo, bal Fe.
Air or oil hardenable corrosion resistant steel.
Hardenable to 55-61 Rock C; 285,000 TS approx.
For bushings, cutlery, needle valves, ball and roller bearings and races, ball chuck valves.
Resists softening and scaling to about 900°F.
AISI 440 C.

CARPENTER STAINLESS TYPE 440 F.
M-32; 0.95-1.20 C, 16.0-18.0 Cr, 0.75 max Mo, 0.07 S or Se, bal Fe.
Free machining grade of Carpenter Stainless No. 440 C, properties and uses similar.
AISI 440 F.

CARPENTER STAINLESS TYPE 443.
M-32; 0.20 max C, 18.0-23.0 C, 0.90-1.25 Cu, bal Fe.
Heat resisting, non-hardenable, corrosion resisting steel.
Annealed: 90,000 TS; 50,000 YS; 22 El.
At 1300°F: 26,000 TS; 11,000 YS, 41 El
For furnace parts, miscellaneous hardware, magnetic cores

CARPENTER STAINLESS TYPE 446.
M-32; 0.15 max C, 24.0-30.0 Cr, 0.50 max Ni, bal Fe
Chromium corrosion resistant steel.

CARPENTER STENTOR
M-32; 0.90 C, 1.60 Mn, 0.25 Si, bal Fe.
General purpose oil hardening tool steel, for blanking and forming dies, broaches, collets, spindles, thread gages. AISI 02.

CARPENTER TEMPERATURE CAMPENSATOR "30" (TYPES 2, 3, 4 and 5).
M-32; Four types of 30% nickel-iron alloys whose magnetic permeabilities decrease at controlled rates with increase in temperature To compensate for temperature variation by using as shunts in watt-hour meters, speedometer, tachometers, voltage regulators.

CARPENTER TEMPERATURE COMPENSATOR "32" (TYPE 1).
M-32, 32% nickel-iron alloy whose magnetic permeability decreases at a controlled rate with increase in temperature,—to compensate for variations in ambient temperature.

CARPENTER TITANIUM 6-4.
M-32, 6.0 Al, 4.0 V, bal Ti.
Heat treatable, weldable, strong titanium alloy.
Annealed. 130,000 TS, 120,000 YS, 10 El.
Heat Tr.. 160,000 TS, 150,000 YS; 8 El.
Widely used titanium alloy for good strength to weight applications; corrosion resistant
AMS 4967, 4928

CARPENTER TITANIUM 6-6-2.
M-32; 5.5 Al, 5.5 V, 2.0 Sn, 0.5 Fe, 0.5 Cu, bal Ti.
Corrosion resistant high strength alloy.
Room Temp.; 180,000 TS; 170,000 YS; 6 El.
600°F: 150,000 TS, 132,000 YS; 15 El.
AMS 4971

CARPENTER T-K.
M-32, 0.35 C, 0.3 Mn, 0.3 Si, 3.5 Cr, 9.0 W, 0.4 V, bal Fe.
Air or oil hardenable hot work tool steel, for hot shear blades, hot gripper dies, die casting dies, hot punches, hot extrusion dies.
AISI H21.

CARPENTER U.D.R.
M-32; 1.0 C, 0.35 Mn, 0.25 Si, 0.50 Cr, bal Fe.
Heat treated: 320,000 TS; 300,000 YS, 1 El; C 60 Rock.

For bearings, wear plates, lathe centers, cams, swaging dies, rocker dies. Oil or water hardening.

CARPENTER V-57.
M-32; 0.05 C, 14 Cr, 26.5 Ni, 1.5 Mo, 3 Ti, 0.25 Al, 0.007 B, bal Fe.
Rolled: 175,000 TS; 125,000 YS; 21 El; 35 RA; 331 Brin.
For jet engine blades and buckets, turbine wheels, torque rings; vacuum melted superalloy, high heat resistance up to 1300°F.

CARPENTER VACUMELTROL 41.
M-32; 0.60-0.12 C, 18-20 Cr, 9-10.5 Mo, 10-12 Co, 3.0-3.3 Ti, 1.4-1.6 Al, 0.003-0.010 B, 5.0 max Fe, bal Ni.
Aged: 206,000 TS; 154,000 YS; 14 El
For jet engine and aircraft components, high temperature bolts; age-hardenable, useful to 1800°F.

CARPENTER VACUMET HYMU "800."
M-32; 0.01 C, 0.50 Mn, 0.15 Si, 80.0 Ni, 5.0 Mo, bal Fe.
Soft magnetic material with minimum permeability of 60,000 at 40 gauss.
For laminations or toroids

CARPENTER VACUMET NICOSEAL.
M-32; 0.02 max C, 0.30 Mn, 0.20 Si, 29.0 Ni, 17.0 Co, bal Fe
Vacuum melted low-expansion alloy for making hermetic seals with the harder Pyrex glasses and ceramic materials.
70-392°F: 2.89 in/in/°F × 10^{-6}

CARPENTER VACUMET NICOSEAL PHOTO-ETCH QUALITY.
M-32, 0.02 max C, 0.30 Mn, 0.20 Si, 29.00 Ni, 17.0 Co, bal Fe
Photo-etching quality strip grade of Carpenter Vacumet Nicoseal

CARPENTER VEGA-FM.
M-32, 0.70 C, 2.25 Mn, 0.3 Si, 1.0 Cr, 1.35 Mo, plus alloy sulfides, bal Fe
Air hardening, non deforming die steel, free-machining grade, for blanking, forming and trimming dies mandrels, punches, precision tools AISI A 6

CARPENTER V S M
M-32, 0.70 C, 1.1 Si, 3 Cr, 5.25 Mo, 0.5 Mn, bal Fe
Heat treated: 550-640 Brin
For valve seat inserts and stems, guides, spindles; resists heat checking and wear

CARPENTER WASPALLOY
M-32; 0.03-0.10 C, 18-21 Cr, 3.5-5.0 Mo, 12-15 Co, 2.6-3.25 Ti, 1.0-1.5 Al, 0.02-0.12 Zr, 0.003-0.008 B, 2.0 max Fe, bal Ni
At 70°F: 190,000 TS; 130,000 YS, 22 El, 25 RA.
At 1600°F 74,000 TS, 73,000 YS, 40 El; 55 RA
For gas turbine parts, jet engine components; age-hardenable, heat resistant.

CARRIAGE WHEEL BEARING.
Eng., 84 Cu, 16 Sn
For bearings; corrosion resistant.

CARTER WHITE GOLD.
Eng.; 83.3 Au, 16.7 Ni
For jewelry, ornaments, corrosion resistant.

CARTOS.
M-64; 0.93 C, 0.4 Mn, 0.6 Si, 0.09 V, bal Fe.
Annealed: 250 Brin.
Ht. Tr.: 620 Brin.
For shear knives, trimmers
Oil hardening, wear resistant.

CARTOS 2V72.
M-64; 0.8 C, 0.4 Mn, 0.6 Si, 0.1 V, bal Fe.
Water hardening tool steel; AISI W 2.

CARTOS 2V90.
M-64; 0.9 C, 0.4 Mn, 0.6 Si, 0.1 V, bal Fe.
Water hardening tool steel; AISI W 2.

CARTRIDGE BRASS.
M-33; 70 Cu, 30 Zn.
Annealed: 47,000 TS; 15,000 YS; 62 El.
Rolled: 76,000 TS; 64,000 YS; 8 El.
For cartridge cases, primer cups, springs; deep drawing.

CARTRIDGE BRASS-42.
M-8; 70 Cu, 30 Zn
¼ H-temper: 54,000 TS, 40,000 YS, 43 El; 63 Brin.
½ H-temper: 62,000 TS; 52,000 YS; 23 El; 120 Brin.
H-temper: 76,000 TS, 63,000 YS; 8 El; 156 Brin.
For cartridges, primers, shot shells, tanks, fasteners, deep drawing, high ductility.

CARTRIDGE BRASS 260.
M-279, M-8, 70 Cu, 30 Zn
Ann: 45,000-65,000 TS, 10,000-34,000 YS; 35-67 El
All purpose deep drawing brass. For all deep drawn brass parts
Cold rolled. 49,000-110,000 TS; 20,000-100,000 YS; 1-56 El
For less drastic forming, spring clips

CARTRIDGE GILDING
U S; 93 Cu, 7 Zn
For cartridge shells, ornaments, base for fire enameling, gilding metal.

CARTUN.
M-432, 1.35 C, 2.75 W, bal Fe.
For fast finishing tools, cutters; water or oil hardened

CAR-VAN
M-750, 0.75-1.1 C, 0.2 V, bal Fe.
For tools, dies, shear blades, punches; water hardening

CAR-VAN SPECIAL.
M-750, 0.80-1.35 C, 0.2 V, bal Fe
For tools, dies, drills, cutters, water hardening.

CASALLOY.
M-1569, M-1724, 0.10 C, 0.05 Si, 0.45 Mn, 1.0 Ni, bal Fe
Low alloy case hardening tool steel; for cams, collets, drill bushings, lathe centers, arbors.

CASAR.
M-1312; 1.3 C, 0.85 Mo, 3.8 V, 12 W, 4.3 Cr, bal Fe
For lathe and planer tools, reamers, broaches, taps, high speed steel.

CASAR C
M-1312, 1.35 C, 4.2 Cr, Mo, W, V, bal Fe.
For blanking and forming dies, engravers' tools; high speed steel

CASCADE.
M-73, 0.13 C, 0.12 Cr, 4 Ni, 0.5 V, bal Fe.
207-350 Brin.
For plastic mold die zinc die casting dies; can be nitrided.

CASINO.
M-1141; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For shapers, cutters; high speed steel.

CASONA.
M-1411; 0.10 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 64,000 TS; 40,000 YS; 28 El; 65 RA; 132 Brin.
For deep hobbing dies; case hardened.

CASTALOY.
M-157; 1.5-1.6 C, 12-14 Cr, 0.7-0.8 Mo, 0.45-0.55 Mn, bal Fe.
For dies; easily machined Rockwell "C"-26-30.

CASTALOY.
M-378; 4.1 Al, 0.04 Mg, bal Zn.
Die cast: 40,300 TS, 5 El, 74 Brin.
For chemical apparatus, clamps, holders; SAE903.

CAST COMPOSITE.
M-210; C, bal Fe.
For tools, blanking dies; water hardening.

CAST COMPOSITE.
M-365, 1.0-1.05 C, bal Fe.
For tools, drills, taps; water hardening

CASTDIE.
M-35; 0.35 C, 5.25 Cr, 1.35 Mo, 0.5 V, 0.95 Si, bal Fe.
For die casting dies; oil hardened.

CASTEEL 15
M-1166; 0.13-0.18 C, 0.6 Mn, 0.4 Si, bal Fe.
Normalized: 57,000-65,000 TS; 32,000-37,000 YS; 30-35 El, 50-55 RA; 110-125 Brin
For gears, pinions, shafts, case hardening.

CASTEEL 22.
M-1166; 0.18-0.25 C, 0.6 Mn, 0.4 Si, bal Fe
Normalized: 65,000-75,000 TS; 38,000-45,000 YS; 25-30 El, 45-50 RA, 130-145 Brin
For gears, pinions, housings, castings, case hardening.

CASTEEL 28
M-1166; 0.26-0.32 C, 0.7 Mn, 0.4 Si, bal Fe.
Normalized: 75,000-85,000 TS, 45,000-55,000 YS, 20-25 El; 36-45 RA, 140-160 Brin.
For structural and machinery parts, castings; water hardened

CASTEEL 40.
M-1166, 0.37-0.43 C, 0.7 Mn, 0.4 Si, bal Fe.
Normalized: 85,000-95,000 TS, 55,000-65,000 YS; 15-20 El, 25-35 RA; 165-180 Brin.
Heat treated: 90,000-110,000 TS; 62,000-70,000 YS; 18-23 El, 40-50 RA; 180-220 Brin.
For gears, pinions, shafts, housings, castings, water hardened

CASTINGWELD
M-118; C, bal Fe.
For welding electrodes, non-machinable, welds on cast iron.

CAST-I-NICKEL.
M-712; Ni.
For cast iron welding rod; flux coated, machinable.

CAST-I-STEEL.
M-712, 0.10-0.14 C, 0.4-0.6 Mn, 0.02 max Si, bal Fe.
For nonmachinable welds on cast iron; coated arc electrode.

CASTOR 3.
M-111; 0.72 C, 4.5 Cr, 18 W, 1.2 V, bal Fe.
For tools, cutters; high speed steel.

CASTOR 7.
M-111; 0.8 C, 4.5 Cr, 1.25 Mo, 18.5 W, 2.5 Co, 1.6 V, bal Fe.
For tools, cutters; high speed steel.

CASTOR 8.
M-111; 0.8 C, 4.5 Cr, 1.25 Mo, 18.5 W, 5.5 Co, 1.6 V, bal Fe.
For tools, cutters; high speed steel.

CASTOR 9.
M-111; 0.8 C, 4.5 Cr, 1 Mo, 18.5 W, 10.5 Co, 1.6 V, bal Fe.
For tools, cutters; high speed steel.

CASTOR 1939.
M-111, 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel

CAT. 497 STARRETT PRECISION GROUND DIE STOCK (see Starrett No. 497)

CATALOY
M-481, Pb-Cu-Sn.
For catalyst; for non-ferrous metals.

CATALOY NO 1
M-481; 20 Pb, 72 Cu, 4 Sn, 4 other elements
26,750 TS; 18 El; 25 RA, 50 Brin.
For bearings; heavy duty.

CATALOY NO 2.
M-481, 25 Pb, 68 Cu, 3 Sn, 4 others.
21,350 TS, 13 El, 25 RA, 50 Brin
For bearings; heavy duty

CATALOY NO 3
M-481, 30 Pb, 63 Cu, 3 Sn, 4 others.
Cast. 19,550 TS, 11.7 El; 19.5 RA, 39 Brin.
For bearings; heavy duty

CATALOY NO 4
M-481, 25 Pb, 70 Cu, 1 Sn, 4 others
Cast 13,700 TS, 10 El; 9.7 RA, 34 Brin
For bearings, heavy duty

CATALOY NO. 5
M-481; 40 Pb, 52 Cu, 8 others
Cast: 9,910 TS, 5.5 El, 9.8 RA; 27 Brin
For bearings, heavy duty.

CATALOY NO 6.
M-481; 40 Pb, 51 Cu, 1 Sn, 8 others.
Cast 10,500 TS; 5.5 El, 19.5 RA; 30 Brin.
For bearings; heavy duty.

CATALOY NO 7.
M-481; 50 Pb, 42 Cu, 8 others.
Cast 6,400 TS, 10 El, 8.6 RA, 13 Brin
For bearings, heavy duty

CATALOY NO 8S
M-481, 13 Pb, 80 Cu, 5 Sn, 2 others
Cast 30,700 TS, 18.8 El, 24.9 RA, 50 Brin
For bearings; heavy duty.

CATALOY NO 9N
M-481; 11 Pb, 80 Cu, 5 Sn, 4 others.
Cast: 31,000 TS, 14.1 El; 8.2 RA, 53 Brin.
For bearings; heavy duty

CATARACT METAL.
M-92; 19-21 Ni, 16-20 Zn, 2.5 max Fe, 2.5 max Pb, bal Cu.
Bar: 45,000-55,000 TS, 24,000 YP; 22 El; 28 RA.
For machinery parts, chemical apparatus, valves on superheated steam lines. Corrosion resistant.

CAT BRAND 14% W.
M-1409; 0.65 C, 14.5 W, 3.75 Cr, 0.5 V, bal Fe.
For drills, punches, taps, piercing and blanking dies; high speed steel.

CAT BRAND S.H.X.
M-1409, 0.65 C, 15.5 W, 3.9 Cr, 0.5 V, bal Fe.
For slitting saws; high speed steel.

CATHALOY-1.
M-945; 0.1 Al, bal Ni.
For television cathode tubes; high emission.

CATHALOY-2.
M-945; 4 W, bal Ni.
For television cathode tubes; high emission.

CATHALOY A-30.
M-945; 0 03-0.10 C, 0.05 max Cu, 0.10 max Fe, 0.03-0 08 Al, 0.01-0.06 Mg, bal Ni.
Tempered: 75,000-120,000 TS; 15,000-110,000 YS; 50-4 El, 125-260 Brin.
For electronic valves; cathode nickel.

CATHALOY A-31
M-945; 3 7-4 2 W, 0 10 max Cu, 0.01-0.06 Mg, 0 02-0 06 Si, bal Ni
Tempered. 85,000-140,000 TS; 15,000-125,000 YS; 50-4 El; 150-350 Brin.
For electronic valves; cathode nickel.

CATHALOY A32
M-945, 2 0-2 5 W, 0 05 Al, 0.02 Cu, 0.03-0.10 C, 0 01-0 06 Mg, bal Ni
85,000-140,000 TS, 15,000-125,000 YS, 50-4 El, 150-350 Brin
For cathodes in electron tubes; high emission and shock resistant

CATHALOY P-50
M-945, 0 04 max Cu, 0 05 max Fe, 0.05 max C, 0 01 max Ti, bal Ni
Tempered 75,000-120,000 TS, 15,000-110,000 YS; 50-4 El, 125-250 Brin.
For cathodes in electron tubes; ASTM Alloy 22

CATHALOY P-51
M-945, 3 75-4 25 W, 0 04 max Cu, 0 05 max Fe, bal Ni
Tempered 85,000-140,000 TS; 65,000 125,000 YS, 50 4 El, 150 350 Brin
For electronic tubes, cathodes, passive cathode material

CATHODE NICKEL
M-61, 96 99 Ni, selected additives
Annealed 60,000 TS
For cathodes in electron tubes, several types.

CAUSAL METAL
M-264, 3 C, 1-3 Cr, 5-7 Cu, 15 Ni, 1-2 Si, bal Fe
Cast. 20,000-35,000 TS, 125-200 Brin.
For valve bodies, paper mill and resisting parts, alloy cast iron, austenitic, corrosion resistant

CAV1.
M-495, 0 6 C, 0 9 Si, 0 9 Mn, 1 35 Cr, 0 15 V, bal Fe.
For tools, dies, shock resistant

CAV2.
M-459; 0 5 C, 1.5 Si, 0 75 Mn, 1 2 Cr, 0 15 V, bal Fe
For tools, dies, shock resistant

CAV3
M-459, 0.35 C, 1.5 Si, 0 7 Mn, 1 1 Cr, 0 15 V, 1 5-7 W, bal Fe.
For tools, dies; shock resistant.

CAZIN
Eng, 82.6 Cd, 17.4 Zn.
For solder for steel, M P. 263°C

Cb-10Hf-1Ti-0.5 Zr
M-1596, M-1537; 9-11 Hf, 0 7-1 3 Ti, 0.7 max Zr, bal Cb.
Cold Rolled· 105,000 TS, 96,500 YS, 5 El
Recrystallized. 59,000 TS; 45,400 YS, 26 El.
For high temperature applications, space vehicles.
Good TIG weldability.

Cb-10W-5Zr.
M-167; 10 W, 5 Zr, bal Cb.
Rolled: 130,000 TS; 128,000 YS; 2 El.
At 2400°F: 89,000 TS; 74,000 YS; 28 El.
Space vehicles, missiles, nuclear reactors.
High temperature alloy. Combines high strength with excellent ductility at high temp.

Cb-74.
M-48, 5 Zr, 10 W, bal Cb.
At 70°F· 88,000 TS; 70,000 YS, 26% El.
At 2200°F: 39,000 TS; 33,000 YS, 25% El.
(Recrystallized 1 hr. at 2700°F).
For space vehicles, nuclear reactors Good combination of density, strength and oxidation resistance at high temperatures.

Cb-752.
M-167; 10 W, 5 Zr, bal Cb.
Rolled: 130,000 TS, 128,000 YS, 2 El.
At 2400°F 89,000 TS; 74,000 YS, 28 El.
For space vehicles, nuclear reactors
High temperature alloy, combines high strength with excellent ductility at high temperature.

Cb-753
M-167, 5 V, 1.25 Zr, bal Cb
At 75°F. 85,000 TS.
At 2400°F 18,000 min TS.
For nuclear industry, aerospace equipment.
Low nuclear cross-section.
Good fracture ductility.

C B F CHROMIUM BRONZE
M-452, 1 5-3 5 Sn, 0 5-2.0 Cr, 0 5-3 Fe, 0 5 max Mn, bal Cu
47,000 TS, 21,000 YS; 30-40 El, 90-130 Brin
For engine valve guides, gears, rock drill twist nuts, heavy duty

C C A
M-38, 1 5 C, 12 Cr, 0 8 Mo, 0 25 V, bal Fe
For blanking dies, punches, plug gauges, wire drawing dies, non-deforming

C C CHISEL
M-260, M-38, 0 47 C, 0 7 Cr, 1 1 W, bal Fe
For punches, pneumatic chisels; shock and fatigue resistant.

C.C M (See Simonds CCM)

CCR
M-772, 2 25 C, 13 Cr, bal Fe
For tools, dies, non-deforming

C.C S DIE CASTING
M-362; 0.35 C, 1.15 Si, 5 25 Cr, 0 40 Co, 4 25 W, bal Fe
For Al or brass die casting dies, oil or air hardened

CD-18 See CARBIDIE CD-18.

CDC ALLOY 50
M-1187, 5 Al, 50 Mn, 45 Fe
For electrical resistors, low expansion.

C.D C. NO 595.
M-1187; 5 Cu, 95 Sn.
Wire, for electronic uses.

C.D.C. NO 720
M-1187, 60 Cu, 20 Ni, 20 Mn
Hardenable by cold work and/or heat treatment.
Ann: 98,000 TS, 80,000 YS; 30 El; 140 VHN.
Cold red. 80%: 150,000 TS; 130,000 YS; 280 VHN.
Hardened: 200,000-220,000 TS; 475-515 VHN.
For springs, diaphragms.

C.D.C. NO. 772.
M-1187; 72 Mn, 18 Cu, 10 Ni.
Wrought: 115,000 TS; 95,000 YS; 6.5 El; 220 VHN.
Elec. res.: 1050 ohms per cir. mil. ft.
Low temp. coefficient of resistance.
For low temp. resistance application, rheotats, circuit breaker parts, misc. elec. appliance controls.

CDC MANGANESE NO. 715.
M-1187; Mn, Ni, bal Cu.
For springs; corrosion resistant.

CDC MANGANESE ALLOY NO. 730.
M-1187; 40 Cu, 30 Ni, 30 Mn.
Soft: 85,000 TS; 30 El; 130 Brin.
Rolled: 145,000 TS; 2 El; 280 Brin.
Hard. 270,000 TS; 580 Brin.
For watch and clock parts; age hardenable, corrosion resistant.

C.D.C. MANGANESE ALLOY NO. 762.
M-1187; 62-65 Mn, bal Cu.
Quenched and aged: 78,000 TS; 38,000 YS, 35 El; 70-75 Rock B.
Damping capacity at torsile stress of 4000 psi-30.
High electrical resistivity and damping capacity.

C D.C. MANGANESE ALLOY NO. 780.
M-1187; 80 Mn, 20 Cu.
Quenched: 68,000 TS; 24,000 YS, 35 El.
Cold rolled: 130,000 TS, 115,000 YS; 9 El.
High electrical resistivity and high damping properties.

CDC VAN-AD
M-1187; 75 V, bal Ti.
For addition agent to titanium alloys; for alloying.

CEC IMPACT.
M-35; 0.55 C, 0.8 Mn, 2 Si, 0.4 Mo, bal Fe.
For punches, riveters, upsetters, dies, chisels; oil hardened, shock resistant.

CECO.
Eng.; 62.5 Cu, 32 Pb, 4.6 Sn, 0.9 Ni.
18,000 TS; 3 El; 0.35 RA; 52 Brin.
For bearings, bushings, heavy duty.

CECOLLOY.
M-474; 3.0 C, 0.90 Mn, 1.3 Si, 0.6 Ni, 0.5 Mo, bal Fe.
56,000 TS; 255 Brin.
For steam cylinder lines, valves; cast iron.

CECOLLOY A.
M-474; 3.0 T.C., 0 5 Mo, 0.60 Ni, bal Fe.
40,000-60,000 TS.
For anvils, frames for forges, forming dies, steam cylinder liners, large valves, series of synthetic alloys; made in air furnaces.

CECOLLOY B.
M-474; 2.8 T.C., 0.5 Mo, 0.35 Cr, bal Fe.
For liners, frames, castings, valves; shock resistant.

CECOLLOY C.
M-474; 3.0 T.C., 0.5 Mo, 1.5 Ni, bal Fe.
For liners, frames, castings, valves; shock resistant.

C.E.C. SMOOTH CUT.
M-35; 0.60 C, 0.85 Mn, 2.0 Si, 0.25 Cr, 0.25 Mo, 0.2 V, bal Fe.
Annealed: 107,000 TS; 64,000 YS; 27 El; 212 Brin.
Oil Hardened: 145,000-340,000 TS; 127,000-283,000 YP; 5-24 El; 20-44 RA; 293-611 Brin.
For shear blades, pneumatic tools, punches, chisels, caulking tools, rivet sets.
Type S5 shock resisting tool steel. Water or oil hardening.

CEKAS.
U.S.; 11.2 Cr, 59.7 Ni, 2 Mn, bal Fe.
For heat and corrosion resisting parts; stainless and corrosion resistant.

CEKAS.
M-1327; 0 16 C, 1.05 Cr, 0.25 Mo, 0.65 Mn, bal Fe.
For gears, bolts, machine tool parts; case hardened, tough.

CEKAS M151.
M-1327; 0.15 C, 13 Cr, 1 Mo, bal Fe.
Annealed. 75,000 TS; 40,000 YS; 30 El; B 82 Rock.
Ht. Tr.: 135,000 TS; 105,000 YS; 10 El; C 30 Rock.
For flat springs, hardware, fittings, tableware, chemical plant and oil refining equipment.
Corrosion resistant. Hardenable.

CEKAS M152.
M-1327; 0.20 C, 13 Cr, 1 Mo, bal Fe
Annealed: 95,000 TS; 50,000 YS; 25 El; B 92 Rock.
Oil Hardened: 250,000 TS; 215,000 YS; 8 El; C 50 Rock.
For surgical instruments, cutlery, pivots, ball bearings, gears
Corrosion resistant, hardenable.

CELEBRATED 101.
M-1409; 0 75 C, 18 W, 4.2 Cr, 1.5 V, bal Fe.
For swaging dies, hobs, lathe and planer tools; high speed steel.

CELERO
M-357; 1 35 C, 0.25 Cr, 2 75 W, bal Fe
For finishing tools, plug gages; oil hardening

CELFOR
M-618, 0.2 C, bal Fe.
For gears, pinions, shafts, case hardening steel.

CELLO-VANADIUM.
M-81; 0.9 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe
For dies, taps, reamers, hobs, milling cutters, master tools, broaches, forming dies, oil hardening, non-shrinking.

CELSIT.
Eng.; 25 Cr, 65 Co, 10 Mo
For tools, similar to "Stellite"; heat and corrosion resistant.

CELSIT.
M-27; C, Co, W, Cr, bal Fe.
For cutting tools; does not require heat treatment for hardening.

CELSIT K.
M-27; 2 C, 34 Cr, 16 W, 44 Co.
Annealed. 80,000 TS; 50,000 YS; 25 El; 45 RA; 187 Brin
For cutting tools; heat, wear and corrosion resistant.

CELSIT N
M-27; 2.4 C, 31 Cr, 18 W, 45 Co, bal Fe.
Welded: Rockwell C 68.
For hard facing electrodes; heat and abrasion resistant.

CELSIT P.
M-27; 2 C, 32 Cr, 14 W, 50 Co.
For corrosion resistant castings; heat, wear and corrosion resistant.

CELSIT SEO.
M-27; 3.5 C, 1.2 Mn, 31 Cr, bal Fe
Welded.
For hard facing electrodes; wear resistant.

CELSIT V.
M-27; 1.2 C, 25 Cr, 4 W, 65 Co, bal Fe.
Welded: Rockwell C 43.
For hard facing electrodes; for exhaust valves and dies.

CELSIT V-300.
M-459; 1.7 C, 28 Cr, 6 W, 33 Co, bal Fe.
For hard facing electrode; wear resistant.

CELSIT V-400.
M-459; 1.6 C, 26 Cr, 4.5 W, 4.5 Mo, 20 Co, bal Fe.
For hard facing electrode; wear resistant.

CELSIT VEO
M-459; 1.9 C, 30 Cr, bal Fe.
For hard facing electrode; wear resistant.

CELTO.
M-731; 0.2 C, bal Fe.
For welding electrodes; shielded arc.

CEMENTED TUNGSTEN CARBIDE.
M-57; 5.5 C, 86.5 W, 8 Co.
For hard cutting tools, tool tips; WC + Co; M H. 98

CENTANIN.
M-789, 67 Cu, 5 Ni, 27 Mn.
Annealed: 72,000-78,000 TS.
Temp. coef. resistance per °C ± 0.00002.
For electrical equipment and instruments
Resistance alloy. Max working temperature 300°C.

CENTAUR
M-261, C, bal Fe.
For tools, drills, taps; water hardened

CENTRAL A.
M-732, 12 Si, 2.5 Cu, 1.25 Mg, 1.25 Mn, 2.5 Ni, 0.25 Ti, bal Al
Cast 24,000 TS; 1 El; 110 Brin
Heat treated 33,000 TS; 1 El; 140 Brin.
For light alloy parts, heat treatable

CENTRALLOY
M-649, 0.15 C, 0.8 Ni, 0.2 Cr, bal Fe.
For bus and railway bodies, high strength.

CENTRAL V.
M-732, 12 Si, 1.25 Mg, 2.5 Mn, 0.25 Ti, bal Al.
Cast. 23,000 TS, 1 El, 100 Brin.
Heat treated 31,000 TS, 1 El, 130 Brin.
For light alloy parts, heat treatable.

CENTRARD
M-494; 2.7 C, 1.5-1.75 Cr, 1.5-1.75 Al, bal Fe.
Annealed: 45,000-56,000 TS, 250 Brin
For cylinder liners, general parts to resist severe abrasion, nitrogen hardened alloy cast iron

CENTRA STEEL.
M-690; 1.7 C, 2.25 Si, 0.40 Mg, 0.10 S, 0.05 P, 0.01 B, bal Fe.
For crankshafts, gears, agricultural equipment, castings, good wear resistance

CENTREX HT.
M-1422, C, alloy, bal Fe.
Pre-heat-treated to 150,000 TS, 115,000 YS; 24 El; 302 Brin
For gears, bolts, shafts, abrasion resistant.

CENTREX P & G.
M-1422; C, alloy, bal Fe.
Pre-heat-treated to 155,000 TS; 135,000 YS; 24 El; 302 Brin.
For gears, bolts, shafts; shock and fatigue resistant.

CENTREX-PBD.
M-1422; C, alloy, bal Fe.
Heat Treated: 248-293 Brinell.
For brake dies.
Resists severe wear and high impact forces.

CENTREX PRESS BRAKE SEE CENTREX-PBD.

CENTREX RHINO-CHEK.
M-1422; C, alloy, bal Fe.
Heat Treated: 370 Brinell; 175,000 TS, 150,000 YP.
For fan blades, lining chutes.
Wear and corrosion resistant.

CENTREX RHINO-TUF
M-1422; C, alloy, bal Fe.
Heat Treated: 175,000 TS; 150,000 YP; 360-400 Brin; (can be furnished harder).
For anchors, coal chutes, conveyers, furnace liners, grader blades, mixers.
Special heat treated wear and corrosion resistant plate

CENTRICAST MARK 2.
M-494, 3.3 C, 2.5 Si, 0.6 P, 0.3 Cr, bal Fe.
Cast: 36,000 TS; 241-302 Brin
For cylinder liners, general castings; cast iron.

CENTRICAST MARK 3
M-494; 3.2 C, 1.9 Si, 0.2 P, 1.4 Ni, 0.4 Cr, bal Fe.
Cast. 40,000 TS, 217-285 Brin
For gears, cylinder liners; heat treated castings.

CENTRICAST MARK 4.
M-494; 3.2 C, 2.1 Si, 0.8 Mn, 0.2 P, 2 Ni, bal Fe
Cast: 38,000 TS; 195-255 Brin
For gears, cylinder liners; alloy cast iron.

CENTRICAST MARK 5.
M-494; 3.3 C, 1.8 Si, 0.2 P, bal Fe.
Cast: 36,000 TS, 179-241 Brin.
For piston rings, liners, cast iron.

CENTRICAST MARK 9.
M-494, 3.1 C, 2 Si, 0.4 P, 0.7 Cr, bal Fe.
Cast 58,000 TS, 269-302 Brin.
For piston rings, automobile castings; cast iron

CENTRICAST MARK 10-HI-TEN
M-494, 3.3 C, 2.1 Si, 0.1 P, 1.6 Ni, 0.75 Al, bal Fe.
Cast: 63,000-90,000 TS; 10-3 El.
For rollers, shafts; nitriding cast iron.

CENTRICAST MARK 11.
M-494, 3.2 C, 2.3 Si, 0.7 Mn, 0.1 P, 0.2 Cr, 0.6 Ni, 0.15 Mo, bal Fe
Cast 52,000 TS, 207-255 Brin
For cylinder liners, cast iron, wear resistant

CENTRICAST MARK 12-4K6.
M-494, 3.4 C, 2.3 Si, 0.6 P, 0.3 Cr, bal Fe
Cast: 36,000 TS, 229-293 Brin
For automobile piston rings; cast iron, wear resistant

CENTRICAST MARK 14
M-494, 3.2 C, 2.4 Si, 0.6 P, 0.4 Cr, 0.6 Mo, bal Fe.
Cast: 45,000 TS, 255-293 Brin
For aircraft piston rings, cast iron, wear resistant.

CENTRICAST MARK 15
M-494, 2.9 C, 2.4 Si, 0.4 P, 0.9 Cr, 0.9 Mo, bal Fe.
Cast 58,000 TS, 269-302 Brin
For aircraft compression and piston rings, cast iron, wear resistant

CENTRICAST MARK 16.
M-494; 1.9 C, 1.9 Si, 0.06 P, 16 Cr, bal Fe.
Cast 78,000 TS, 269-321 Brin.
For piston rings, cylinder liners; heat and abrasion resistant.

CENTRICAST MARK 17.
M-494, 1.2 C, 2 Si, 33 Cr, bal Fe.
Cast: 78,000 TS; 285-341 Brin.
For liners and pump cylinders; heat and abrasion resistant.

CENTRICAST MARK 18.
M-494; 2.7 C, 2 Si, 14 Ni, 1.75 Cr, 7 Cu, bal Fe.
Cast: 31,500 TS; 175-235 Brin.
For cylinder liners; austenitic, cast iron, corrosion resistant.

CENTRICAST MARK 20.
M-494; 3.0 C, 2.5 Si, 0.1 P, 1.3 Cr, bal Fe.
Cast: 58,000 TS; 269-311 Brin.
For valve seats; heat resistant, cast iron.

CENTRICAST MARK 21.
M-494; 2.8 C, 2.7 Si, 0.2 P, 1.5 Cr, 1.0 Al, bal Fe.
Cast: 54,000 TS; 269-311 Brin.
For cylinder liners; nitriding cast iron.

CENTRICAST MARK 23.
M-494; 3.3 T.C., 2.1 Si, 0.3 Mn, 0.1 P, 1.6 Ni, bal Fe.
Normalized: 90,000 TS; 260 Brin.
Annealed: 60,000 TS; 223 Brin.
For rollers, cylinder liners; spheroidal cast iron

CENTURY-1141.
M-97; 0.37-0.45 C, 1.35-1.65 Mn, 0.08-0.13 S, 0.045 max P, bal Fe.
Hot Rolled: 98,000 TS; 60,000 YS; 25 El; 52 RA; 200 Brin.
Hardened: 185,000 TS; 168,000 YS, 12 El, 40 RA; 365 Brin.
For axles, shafts, screws, bolts, arbors, bushings, gears, lead screws.
Free-machining. Water hardenable.

CENTURY-1144.
M-97, 0.40-0.48 C, 1.35-1.65 Mn, 0.24-0.33 S, 0.045 max P, bal Fe.
Annealed: 94,000 TS; 54,000 YS, 24 El; 183 Brin.
Water Hardened: 175,000-295,000 TS; 155,000-188,000 YS; 4-11 El, 11-38 RA; 363-555 Brin.
For axles, shafts, tie-rods, arbors, ball joints, gears, pinions, clutches.
Free machining, water or oil hardening.

CERALLOY 75.
M-1497, 25 Fe, bal Misch Metal.
For additives for ductile cast iron; desulphurizer and graphite nodularizer.

CERALLOY 75M2.
M-1497; 23 Fe, 2 Mg, bal Misch Metal.
For additives for ductile cast iron; desulphurizer and graphite nodularizer.

CERALLOY 80A.
M-1497, 20 Al, bal Misch Metal.
For steel deoxidizer and desulphurizer, scavenger.

CERALLOY 90M.
M-1497; 10 Mg, bal Misch Metal.
For additives for ductile cast iron; desulphurizer and graphite nodularizer.

CERALLOY 400.
M-1497; 80 Th. bal Ce + Al.
For vacuum tube getter, continuous getter.

CERALLOY 420.
M-1497; 20 Fe, 2 Mg, bal Misch Metal.
For vacuum tube getter, anode in voltage regular gas tubes; flash getter.

CERALLOY MISCHMETAL 95 M.
M-1497; 5 Mg, bal mixed rare earth metals.
Ignition alloy.

CERALLOY MISCHMETAL 100X.
M-1497; 99.9 rare earth metals, typically 50 Ce + 27 La + 16 Nd + 5 Pr, bal other rare earth metals.
Additive for non-ferrous alloys.

CERALLOY MISCHMETAL FG.
M-1497; 4% Fe, bal mixed rare earth metals.
Additive for iron and steel; desulfurizer and graphite nodularizer.

CERALLOY MISCHMETAL M.
M-1497; 2.5% Mg, bal mixed rare earth metals.
Additive for magnesium alloys.

CERALUMIN-21.
M-452, 3.5-4.5 Cu, 0.5-1.0 Co, 1.2-2.5 Mg, bal Al
Cast. 54,000-58,000 TS; 20-22 El.
For sand and die castings for elevated temperature service.
High strength and hardness at elevated temperatures.

CERALUMIN 22.
M-452; Si, Cu, Ce, bal Al
For light alloy parts; forgings

CERALUMIN A.
M-452; 1.25 Si, 2.5 Cu, 0.8 Mg, 1.2 Fe, 1.5 Ni, 0.15 Ce, bal Al.
Heat treated: 51,000-60,000 TS; 45,000-54,000 YS; 1 El; 130-140 Brin.
For light alloy parts; heat treatable.

CERALUMIN "ASM."
M-452, 1-2 Cu, 0.25-1 Ni, 0.5 max Fe, 0.7-1.3 Si, 0.4-0.8 Mg, 0.03-0.3 Cb, bal Al
Sand cast: 38,000 TS, 4-7 El; 95 Brin.
Chill cast 47,000 TS, 14-21 El, 95 Brin
For castings. good corrosion resistance.

CERALUMIN B
M-452; 1.5 Cu, 1.5 Ni, 0.2 Mg 0.7 Fe, 1.5 Si, 0.05-0.3 Ce, bal Al
Sand cast: 26,000 TS; 20,000 YS; 2-3 El; 80 Brin
Permanent mold 31,000 TS, 20,000 YS, 4-9 El; 82 Brin
For pistons, cylinder heads, gear boxes, impellers, good castability

CERALUMIN C
M-452 2-3 Cu, 1-2 Ni, 1-1.5 Fe, 1-1.4 Si, 0.05-0.20 Ce, 0.5-1.0 Mg, 0.05-0.3 Cb, bal Al
Aged 63,000 TS, 55,000 YS, 9 El; 145 Brin
Permanent mold: 59,000 TS; 49,000 YS, 1-4 El, 135 Brin
For castings for high temperature use, age-hardenable

CERALUMIN D
M-452, 2-3 Cu, 1-2 Ni, 0.5-1.0 Mg, 1.2 Si, 1.2 Fe, 0.05-0.20 Ce, bal Al
Heat treated 28,000-40,000 TS; 25,000 YS, 5-1 El, 90-100 Brin
For cylinder heads, general castings, age-hardenable.

CERALUMIN F.
M-452, 1.3-3.0 Cu, 1.5-2.0 Ni, 0.05-0.3 Ce, 0.5-1.25 Mg, 0.03-0.3 Cr, 1.0 Fe, 0.9 Si, bal Al.
For light alloy castings, heat treatable.

CERAMISEAL.
M-61, 48 Fe, 27 Ni, bal Co.
For ceramic-to-metal seals; high temperature applications; M.P. 2590°F.

CERAMVAR.
M-61; 48 Fe, 27 Ni, 25 Co.
For ceramic-to-metal seals.
Expansion characteristics match aluminum.

CERROBASE.
M-216; 55.5 Bi, 44.5 Pb.
Cast: 6200 TS; 4000 YS; 64 El; 10 Brin.
For molds, tube filler, proof casting forging dies; M.P. 123.5°C; formerly "Basaloy."

CERROBEND.
M-216; 50 Bi, 26.7 Pb, 13.3 Sn, 10 Cd.
Cast: 5990 TS; 200 El; 9.2 Brin.
For filler for bending tube, low melting solder, sealing glass to metal; formerly called Bendalloy, M.P. 158°F.

CERROCAST.
M-216; 40 Bi, 60 Sn.
Cast: 8000 TS, 200 El, 22 Brin.
For wax pattern molds; M.P. 281-338°F

CERRODENT.
M-216, 38.1 Bi, 26.4 Pb, 31.7 Sn, 2.65 Cd, 0.06 Cu
15 Brin.
For dental models, M.P 75-118°C

CERROLOW 105
M-216, 7.97 Sn, 42.91 Bi, 21.7 Pb, 5.09 Cd, 18-33 In, 4 Hg.
For fusible alloy, M.P. 100-110°F

CERROLOW 117
M-216; 44.7 Bi, 22.6 Pb, 8.3 Sn, 5.3 Cd, 19.1 In
Cast: 5400 TS, 1.5 El; 9-12 Brin
For low melting alloys, solders, fuses, eutectic alloy, M.P 117°F.

CERROLOW 117 B
M-216; 11.3 Sn, 44.7 Bi, 22.6 Pb, 5.3 Cd, 16.1 In.
For fusible alloy; M.P 117-126°F

CERROLOW 136
M-216, 49 Bi, 18 Pb, 12 Sn, 21 In.
Cast: 6300 TS, 50 El, 14 Brin.
For low melting alloys, solder, fuses, M.P 136°F, eutectic alloy

CERROLOW 136 B
M-216, 15 Sn, 49 Bi, 18 Pb, 18 In
For fusible alloy, M.P 136-156°F

CERROLOW 140
M-216, 12.6 Sn, 47.5 Bi, 25.4 Pb, 9.5 Cd, 5 In
For fusible alloy, M.P 134-149°F

CERROLOW 147
M-216, 12.77 Sn, 48 Bi, 25.63 Pb, 9.6 Cd, 4 In
Cast: 4950 TS, 13.5 El, 11 Brin
For thermal safety controls, M.P 142-149°F

CERROLOW 174.
M-216, 57 Bi, 17 Sn, 26 In
For safety devices, fusible elements, solder, M.P 174°F

CERROMATRIX
M-216, 48 Bi, 14.5 Sn, 28.5 Pb, 9 Sb
Cast. 13,000 TS, 1 El, 19 Brin
For dental alloys, fusible alloy for die amounting, expands on cooling; M.P 218-4407

CERROSAFE
M-216, 42.5 Bi, 37.7 Pb, 11.3 Sn, 8.5 Cd.
Cast: 5400 TS, 200 El; 9 Brin
For toy casting sets, formerly "Saffalloy", M.P 158-194°F

CERROSEAL 25
M-216; 50 In, 50 Cd.
In glass to glass or glass to metal seals, M.P. 227-462°F

CERROSEAL 35.
M-216; 50 Sn, 50 In.
For soldering glass to metal; M.P 250-260°F; useful in vacuum and low vapor pressure.

CERROTRU.
M-216; 58 Bi, 42 Sn.
Cast: 8000 TS; 200 El; 22 Brin.
For castings, molds, patterns; zero volume change from molten to solid state, M.P. 280°F.

CERTANIUM 250.
M-1600; Composite of an austenitic matrix plus TiC and CrC and Silicides.
For hard surfacing.
Resists high stress abrasion. Hard and tough electrode for AC and DC welding.

CESCO DIAMOND
M-356; 0.5 C, 0.85-1.0 Mn, 2.2 Si, 0.5 Mo, 0.25-0.35 V, bal Fe.
Heat treated: 320,500-231,600 TS; 259,400-185,700 YS, 2.5 El; 5-27 RA, 659 Brin.
For hollow and solid drills, concrete busters, hammer pistons, springs, shock resistant.

CESCO DIAMOND SPECIAL.
M-356, 0.50-0.65 C, 2.0 Si, 1.0 Mn, 0.6-0.7 Mo, 0.34-0.36 V, bal Fe.
Heat treated: 350,000 TS, 290,000 YS; 6 El, 11 RA, 615 Brin
For chisels, concrete busters, drills, caulking and beading tools, shock and abrasion resistant.

CESCO SPECIAL
M-356; 0.55 C, 1.0 Mn, 0.4 Mo, 0.35 V, 2.0 Si, bal Fe.
For tools; shock resistant

C.E.S NO 2.
M-440, 0.36-0.50 C, 16-23 Ni, 7-11 Cr, bal Fe
For heat and corrosion resistant parts, heat and corrosion resistant

CETAL
M-299; 6.5 Si, 3 Cu, 10 Zn, bal Al
Cast: 26,000-31,000 TS, 0.5-3.0 El, 65-90 Brin
For light alloy parts, non-hardenable

CETO
M-1549, 80 Th, 15 Al, 5 Mischmetal
For getters.
Absorbs gases

C.F.S
M-73, 0.9-1.3 C, 0.5 Cr, bal Fe
For dies, draw dies; water hardened.

CHACE NO 772
M-582, 18 Cu, 10 Ni, bal Mn
Treatment: 50% Red
105,000 TS, 90,000 YS, 8.5 El, 220 Brin.
Uses: high expansion, high resistivity, Max temp 600°F

CHACE NO 1050
M-582, 36 Ni, bal Fe/100 Cu/22 Ni, 3 Cr, bal Fe.
Thermostatic bimetal; Low electrical resistivity

CHACE NO 2400.
M-582, 36 Ni, bal Fe/22 Ni, 3 Cr, bal Fe.
Thermostatic bimetal, range 0-300°F

CHACE NO. 2500
M-582, 50 Ni, bal Fe/25 Ni, 3 Cr, bal Fe
Thermostatic bimetal, max temp 1000°F.

CHACE NO 3700.
M-582, 40 Ni, bal Fe/22 Ni, 3 Cr, bal Fe
For thermostatic bimetal; range 100-550°F

CHACE NO 4700
M-582; 38 Ni, 7 Cr, bal Fe/19 Ni, 7 Cr, bal Fe.
For thermostatic bimetal, corrosion resistant.

CHACE NO 6125
M-582, 36 Ni, bal Fe/100 Ni/22 Ni, 3 Cr, bal Fe.
For thermostatic bimetal; range 0-300°F

CHACE NO. 6150.
M-582, 36 Ni, bal Fe/100 Ni/22 Ni, 3 Cr, bal Fe.
Thermostatic bimetal, range 0-300°F.

CHACE NO. 6650.
M-582; 36 Ni, bal Fe/18 Cu, 10 Ni, bal Mn.
For thermostatic bimetal; high deflection.

CHACE NO. 6850.
M-582; 36 Ni, bal Fe/18 Cu, 10 Ni, bal Mn.
For thermostatic bimetal; high electrical resistivity.

CHAIN BRONZE.
U.S.; 4.9 Sn, 0.1 P, bal Cu.
Rolled 28,000-69,000 TS; 15,000-40,000 YS; 30-6 El.
For chains, springs, diaphragms; high strength, corrosion resistant.

CHAIN IRON.
Eng.; 0.10 max Mn, Si, bal Fe.
For chains for cranes, slings, hoists, steam shovels, marine uses, wrought iron.

CHAMAX 00 STEEL.
M-1116; 0.95, 4.5 Cr, 18 W, 0.7 Mo, 1.75 V, 5 Co, bal Fe.
Air or oil harden to 62-67.5 Rc.
For lathe tools, milling cutters, gear cutters.
AFNOR: Z 95 WK 18.05.

CHAMAX 11 STEEL.
M-1116; 0.82 C, 4.5 Cr, 18 W, 0.8 Mo, 1.75 V, 11 Co, bal Fe.
Air or oil harden to 63-67 Rc.
For lathe tools and drills for special jobs—higher speeds, higher temp, special alloys.
AFNOR: Z 85 WK 18.10.
US-AISI T5 or T6.
Germany: S 18 1 2.10 (E 18 Co 10); W. Nr 1.3265

CHAMAX CV STEEL.
M-1116; 1.55 C, 4.3 Cr, 12.5 W, 0.8 Mo, 5 V, 5 Co, bal Fe.
Air or oil harden to 62-68 Rc.
For tools for machining stainless steels, for punches for silicon sheets.
AFNOR: Z 150 WKV 12.05 05.
US-AISI T15.
Germany: S 12.1 4.5 (EV 4 Co); W. Nr. 1.3202.

CHAMAX CV. 11 STEEL.
M-1116; 1.65 C, 4.4 Cr, 12 W, 0.8 Mo, 5 V, 10 Co, bal Fe.
Air or oil harden to 62-69 Rc.
For lathe tools for finish cuts at high speeds; also for machining special materials.
AFNOR: Z 160 WKV 12.10 05.

CHAMAX STEEL.
M-1116; 0.82 C, 4.5 Cr, 18 W, 0.8 Mo, 1.75 V, 5 Co, bal Fe
Air or oil harden to 63-66 Rc.
For lathe tools, form tools, gear cutters, counter bores, planing tools.
AFNOR: Z 85 WK 18 05.
US-AISI T4.
Germany: S 18 1.2.5 (E 18 Co 5); W. Nr 1.3255

CHAMET BRONZE, TYPE A.
M-33; 60 Cu, 39.25 Zn, 0.75 Sn.
Annealed: 63,000 TS; 30,000 YS, 40 El.
Hard: 75,000 TS; 53,000 YS, 20 El
For welding rod, bolts, screws; resists sea water.

CHAMET BRONZE B
M-33; 62.25 Cu, 37.1 Zn, 0.65 Sn.
Drawn: 62,000 TS; 35,000 YS; 35 El
For rivets, screws, bolts; corrosion resisting.

CHAMET LEADED BRONZE.
U.S.; 38.5 Zn, 0.75 Pb, 0.75 Sn, bal Cu.
For fittings, pipes, hardware; free-cutting, high strength.

CHAMFERTRODE.
M-717.
For chamfering and grooving electrodes, (AC-DC) on ferrous or non-ferrous.

CHAMPAGNOLE B.S.2.
M-1116; 0.57 C, 0.3 Cr, 0.85 Mn, 1.9 Si, 0.2 V, 0.3 Mo, bal Fe.
Oil or water hardening tool steel; for stamps, cold working dies, pneumatic tools, cold cutting tools for thick metal, shock resisting tools.
AFNOR: 60 SMD 08.03; AISI S5.

CHAMPAGNOLE C7.
M-1116; 0.75 C, bal Fe.
For tools, springs, punches; water hardened.

CHAMPAGNOLE C.8.
M-1116; 0.75 C, 0.5 Cr, 0.25 Mn, 0.25 Si, bal Fe.
Water hardening tool steel, for hand or pneumatic engraving tools, riveting hammers, masonry tools.
AFNOR: XC 80; AISI W5

CHAMPAGNOLE C 8 V M
M-1116, 0.80 C, 0.5 Cr, 0.4 Mn, 0.4 Si, 0.25 V, 0.25 Mo, bal Fe
Water hardening tool steel; for engraving tools, stamps, anvils, shock resisting hand and pneumatic tools
AFNOR: 80 CDV 02, AISI W 2.

CHAMPAGNOLE C9
M-1116; 0.95 C, bal Fe
For tools, springs, cutters, drills; water hardened.

CHAMPAGNOLE C10
M-1116; 1.1 C, bal Fe.
For tools, taps, water hardened

CHAMPAGNOLE C 12
M-1116, 1.2 C, 0.5 Cr, 0.25 Mn, 0.25 Si, bal Fe
Water or oil hardening tool steel, for files, rasps, threading tools, cutters for wood and paper, fine cutlery
AFNOR. XC 120, AISI W5

CHAMPAGNOLE Cr 3
M-1116; 1.35 C, 4.0 Cr, 0.5 Mn, 0.25 Si, 0.4 Mo, bal Fe
Oil hardening tool steel, for files, shears, plane blades, lock laminations
AFNOR: 130 C 16.

CHAMPAGNOLE Cr 5
M-1116; 1.0 C, 5.0 Cr, 0.5 V, 1.1 Mo, 0.6 Mn, 0.3 Si, bal Fe
Air or oil hardening tool steel; for stamping and drawing dies, shears, cold forming tube dies.
AFNOR: Z 100 CDV 05; AISI A2.

CHAMPAGNOLE Cr 5 T M
M-1116, 0.35 C, 5.0 Cr, 1.4 W, 0.4 V, 1.4 Mo, 0.25 Mn, 1.0 Si, bal Fe
Air or oil hardening tool and die steel, for hot work forming and forging
AFNOR: Z 35 CDWVS 05, AISI H12.

CHAMPAGNOLE Cr 5 T M S.
M-1116, 0.50 C, 4.7 Cr, 1.1 W, 0.35 V, 1.2 Mo, 0.3 Mn, 0.8 Si, bal Fe.
Air or oil hardening tool steel, for hot and cold working shear blades, dies, ejectors, bending tools, forming tools.
AFNOR: Z 50 CDWVS 05.

CHAMPAGNOLE Cr.5.V.4.
M-1116; 1.15 C, 5.0 Cr, 3.9 V, 1.1 Mo, 0.4 Mn, 1.0 Si, bal Fe
Air or oil hardening tool steel; for stamping and drawing dies requiring good abrasive wear, for crushers and grinders in stone and gravel work.
AFNOR: Z 110 CVDS 05.04.

CHAMPAGNOLE Cr.5.V.6.
M-1116; 1.42 C, 6.25 Cr, 5.9 V, 1.0 Mo, 0.3 Mn, 1.0 Si, bal Fe.
Air or oil hardening tool and die steel; for stamping silicon laminations, and abrasive materials.
AFNOR: Z 135 CVDS 06.06.

CHAMPAGNOLE Cr.5.V.M.
M-1116; 0.35, 5.5 Cr, 1.0 V, 1.1 Mo, 0.3 Mn, 1.0 Si, bal Fe.
Air or oil hardening tool and die steel; for hot work stamping copper and copper alloys; molds for plastics.
AFNOR: Z 35 CDVS 05; AISI H13.

CHAMPAGNOLE Cr.8 V 3.
M-1116; 0.83 C, 8.0 Cr, 2.5 V, 1.5 Mo, 0.3 Mn, 1.0 Si, bal Fe.
Air hardening tool and die steel; for cutting and shaping tools, shears.
AFNOR: Z 85 CVDS 08.03.

CHAMPAGNOLE Cr.12.
M-1116; 1.15 C, 1.3 Cr, 0.5 Mn, 0.25 Si, bal Fe.
Oil or water hardening tool steel; for drills threading and tapping tools, hand reamers.
AFNOR: 110 C5; AISI L3.

CHAMPAGNOLE Cr.E
M-1116; 2.0 C, 12.5 Cr, 1.0 W, 0.3 V, 0.3 Mo, 0.5 Mn, 0.4 Si, bal Fe.
Air or oil hardening tool steel; for Zendzimir rolls, wood working tools, brick making tools
AFNOR: Z 200 CW 13; AISI D3.

CHAMPAGNOLE Cr.E.4 V
M-1116, 2.30 C, 12.5 Cr, 4.1 V, 1.1 Mo, 0.7 Mn, 0.4 Si, bal Fe.
Oil or air hardening tool and die steel, for punches, shears, cutting tools for abrasive materials; work in sand and gravel
AFNOR. Z 230 CVD 13.04; AISI D7.

CHAMPAGNOLE Cr.E 15
M-1116; 1.55 C, 12.0 Cr, 0.8 V, 0.8 Mo, 0.25 Mn, 0.3 Si, 0.8 Co, bal Fe.
Air or oil hardening tool and die steel; for stamping dies for silicon laminations, swaging dies, gages
AFNOR. Z 155 CDVK 12; AISI D2.

CHAMPAGNOLE CRED.
M-1116; 2.25 C, 13 Cr, bal Fe
For tools, dies, punches; non-deforming.

CHAMPAGNOLE Cr.N.O
M-1116; 0.38 C, 1.6 Cr, 3.7 Ni, 0.3 Mo, 0.4 Mn, 0.3 Si, bal Fe.
Deep hardening alloy steel, air or oil hardening. For cold forming tools, cold-heading and rivet sets.
AFNOR: 35 NCD 15.

CHAMPAGNOLE Cr. T.
M-1116; 0.50 C, 0.7 Cr, 2.0 W, 0.15 V, 0.35 Mo, 0.35 Mn, 0.5 Si, bal Fe.
Oil or water hardening tool steel; for pneumatic tools, riveting hammers, chisels.
AFNOR: 50 WCS 20.03; AISI S1.

CHAMPAGNOLE C.W.3.
M-1116; 1.25 C, 3.0 W, 0.4 max Mn, 0.3 Si, bal Fe.
Water hardening tool steel; for dies for cartridge cases, threading brass and stamping light alloys and thin steel sheet.
AFNOR: 125 W30; AISI F2.

CHAMPAGNOLE D.C.33.
M-1116; 0.32 C, 3.0 Cr, 0.5 V, 2.6 Mo, 0.3 Mn, 0.3 Si, bal Fe.
Air or oil hardening tool and die steel; for hot work forging dies, shears and saws.
AFNOR: 32 CDV.12.30; AISI H10.

CHAMPAGNOLE T1.
M-1116; 0.5 C, 1.5 Cr, 2.2 W, 0.25 V, bal Fe.
For hot work tools and dies; hot work steel.

CHAMPAGNOLE T.2.
M-1116; 0.35 C, 2.3 Cr, 3.0 W, 0.2 V, 0.3 Mo, 0.3 Mn, 0.3 Si, bal Fe,
Oil hardening tool and die steel; for press and forging dies, shears, rivet hammers.
AFNOR: 35 WCD 30.10.

CHAMPAGNOLE T3.
M-1116; 1.3 C, 4.5 Cr, bal Fe.
For tools, dies; air or oil hardened.

CHAMPAGNOLE T5.
M-1116, 1.3 C, 4.5 Cr, bal Fe.
For tools, dies; air or oil hardened.

CHAMPAGNOLE T.6.
M-1116; 0.33 C, 3.0 Cr, 10.5 W, 0.4 V, 0.4 Mo, 0.3 Mn, 0.3 Si, bal Fe.
Air or oil hardening tool and die steel; for hot forging, thread rolling dies, extrusion dies for brass and bronze.
AFNOR: Z 30 WC 10.03; AISI H21/22.

CHAMPAGNOLE T.35.
M-1116, 1.03 C, 0.7 Cr, 3.7 W, 0.3 V, 0.4 Mo, 0.55 Mn, 0.3 Si, bal Fe.
Oil hardening tool steels; for drills, boring tools, taps, threading tools.
AFNOR: 100 WC 35.03; AISI F2.

CHAMPAGNOLE T C 12.
M-1116, 0.33 C, 12 Cr, 12 W, 1.0 V, 0.3 Mn, 0.5 Si, bal Fe.
Air or oil hardening tool and die steel; for extrusion dies, hot forging and threading dies; molds for brass and bronze castings.
AFNOR: Z 35 WCV 12.12; AISI H23.

CHAMPAGNOLE T C K.610.
M-1116; 0.20 C, 10.0 Cr, 6.5 W, 2.0 Mo, 0.3 Mn, 0.4 Si, 10.0 Co, bal Fe.
Air or oil hardening tool and die steel; for hot extrusion dies; withstands hot contact for longer time
AFNOR: Z 20 CKWD 10.10 07.02.

CHAMPAGNOLE T.E D.C. STEEL
M-1116; 0.80 C, 4.2 Cr, 12.5 W, 1.8 Mo, 1.8 V, 1.2 Co, bal Fe
Air or oil harden to 63-66 Rc
For twist drills, reamers, taps, cutters
AFNOR: Z 80 WDVK 12.02.02.

CHAMPAGNOLE T.E.D. CV STEEL.
M-1116; 1.3 C, 4.3 Cr, 12 W, 0.9 Mo, 4 V, bal Fe.
Air or oil harden to 63-66 Rc.
For slotting tools, gear cutters, form cutters, punches.
AFNOR: Z 130 WVD 12 04 01
Germany: S 12.1.4 (EV 4) W.Nr. 1.3302.

CHAMPAGNOLE T.E.M. 00 STEEL.
M-1116; 1.0 C, 4.2 Cr, 6.5 W, 5 Mo, 1.9 V, bal Fe.
Air or oil harden to 63-66 Rc.
For twist drills, reamers, lathe cutters, broaches.
AFNOR: Z 100 WDV 06.05.02.
US-AISI M2 (high carbon) high speed steel.

CHAMPAGNOLE T.E.M.02.C. STEEL.
M-1116; 1.0 C, 4.2 Cr, 6.5 W, 5 Mo, 1.9 V, 2 Co, bal Fe.
Air or oil harden to 63-67 RC.
For drills, reamers, lathe cutting tools, taps, gear cutters.
AFNOR: Z 100 WDVK 06.05. 02.02.

CHAMPAGNOLE T.E.M.02.V. STEEL.
M-1116; 1.08 C, 4.2 Cr, 6.3 W, 5.3 Mo, 2.4 V, bal Fe.
Air or oil harden to 62-67 Rc.
For drills, taps, threading form tools, lathe tools, hobs, broaches.
AFNOR: Z 110 WDV 06.05.02
US-AISI M3(1).

CHAMPAGNOLE T.E.M 03.V. STEEL.
M-1116; 1.2 C, 4.0 Cr, 6.3 W, 5 Mo, 3 V, bal Fe.
Air or oil harden to 62-66.5 Rc.
For drills, reamers, gear cutters, broaches, lathe tools, thread chasers
AFNOR· Z 120 WDV 06.05.03.
US-AISI M 3(2).
Germany: S 6 5.3(EMo5V3); W.nr 1.3344.

CHAMPAGNOLE T.E.M.05.C STEEL.
M-1116; 1.0 C, 4.3 Cr, 7.7 W, 5 Mo, 2.3 V, 5 Co, bal Fe.
Air or oil harden to 63-67 Rc.
For drills, taps, reamers, turning tools for machining hard metals.
AFNOR: Z 100 WDKV 07.05.05.02.
US-AISI M41.

CHAMPAGNOLE T.E.M.08.C. STEEL.
M-1116; 1.1 C, 4 Cr, 5 W, 6.7 Mo, 2 V, 8 Co, bal Fe.
Air or oil harden to 63-69 Rc.
For drills and lathe tools machining abrasive materials; for finish cuts.
AFNOR: Z 110 KDWV 08 07.05.02.

CHAMPAGNOLE T.E.M 60
M-1116; 0.60 C, 4.0 Cr, 6.5 W, 5.0 Mo, 1 9 V, 0.3 Mn, 0.3 Si, bal Fe.
Air or oil hardening tool and die steel;
for cold extrusion dies; for hot forming dies.
AFNOR: Z 60 WDCV 06.05.04.02; AISI H42.

CHAMPAGNOLE T.E.M C. STEEL.
M-1116; 0 85 C, 4.3 Cr, 6.5 W, 5 Mo, 1.9 V, 5 Co, bal Fe.
Air or oil harden to 62-67 Rc.
For drills and lathe tools for special work, high temperature, high speeds, special alloys.
AFNOR: Z 85 WDKV 06 05 05.02.
US-AISI M 35
Germany: S 6 5.2.5(EMo 5 Co 5), W.nr 1.3243.

CHAMPAGNOLE T.E M.CV. STEEL.
M-1116; 1.57 C, 4.3 Cr, 6.7 W, 5 Mo, 4.8 V, 5 Co, bal Fe.
Air or oil harden to 62-68 Rc.
For high speed finish cutting, particularly on hard and tough materials as stainless steels
AFNOR: Z 150 WDKV 06.05.05.05.
US-AISI-M15.

CHAMPAGNOLE T.E.M CV.11 STEEL
M-1116; 1.65 C, 4.3 Cr, 6.8 W. 5.3 Mo, 4.8 V, 11 Co, bal Fe.
Air or oil harden to 62-69 Rc.
For tool bits for finishing and high speed machining of stainless steels, and non-metallics.
AFNOR: Z 160 KWDV 10.06.05.05.

CHAMPAGNOLE T.E.M.V. STEEL.
M-1116; 1.28 C, 4.3 Cr, 5.6 W, 4.6 Mo, 4 V, bal Fe.
Air or oil harden to 63-66.5 Rc.
For drills, reamers, finish cutting lathe tools, by special temper for punches, files, chisels.
AFNOR: Z 130 WDV 06.05.04.
US-AISI M4.

CHAMPAGNOLE T.E M.V. 11 STEEL.
M-1116; 1.25 C, 4.3 Cr, 7.5 W, 6.3 Mo, 3 V, 11 Co, bal Fe.
Air or oil harden to 62-69 Rc.
For form tools, lathe tools, climb milling cutters for machining hard and tough steels.
AFNOR: Z 125 KWDV 11.08 06.03.
Germany: S 10.4.3.10(EW9Co10); W.nr 1.3207.

CHAMPAGNOLE T.S.R.
M-1116; 1.05 C, 0.85 Cr, 0 9 W, 0.15 V, 0.15 Mo, 0 95 Mn, 0.25 Si, bal Fe
Oil (or salt bath) hardening tool steel; for drills, cutting tools, forming tools, gages.
AFNOR: 100 MCW 04; AISI 01.

CHAMPAGNOLE T V.K 45.
M-1116; 0.40 C, 4.5 Cr, 4.5 W, 2 2 V, 0.4 Mo, 0.3 Mn, 0 3 Si, 4 5 Co, bal Fe
Air or oil hardening tool and die steel; for hot forging and thread rolling copper, brass and steel; hot punches, molds for brass.
AFNOR· Z 35 WKCV 05 05.04 02, AISI H 19.

CHAMPALOY
M-38, 0 75 C, 1.5 Ni, 0 75 Cr, 0 3 Mo, bal Fe.
Heat treated 208,000 TS, 180,000 YS; 450 Brin.
For tools, collets, jigs, shear blades, rolls; oil hardening.

CHAMPION 2.
M-712, 0 10 max C, 2 Cr, 0 5 Mo, bal Fe.
Welded: 70,000-75,000 TS, 35-30 El.
For welding rods for low alloy steels, subject to air hardening

CHAMPION 9.
M-712; 0 1 max C, 9 Cr, 0 5 Mo, bal Fe.
Welded 90,000-95,000.
For welding rods for low Cr alloys, high creep resistance

CHAMPION C-30.
M-712, 0.22-0.26 C, 0 45 Mn, 0 4-0 6 Mo, 0.10-0.15 V, bal Fe
Welded 215 Brin
For welding electrodes, for worn surfaces, wear resistant

CHAMPION NO 59
M-712; 3 C, 4 Cr, 4 Mo, bal Fe
550 Brin
For hard surfacing electrodes; for high carbon and manganese steel, abrasion resistant

CHAMPION 255
M-1683; 0 6 C, 0 8 Mn, 2.0 Si, 0.2 Cr, 0.2 Mo, 0 2 V, bal Fe.
Annealed· 107,000 TS; 64,000 YP; 27 El; 212 Brin.
Oil hardened. 145,000-340,000 TS; 127,000-283,000 YP, 5-24 El, 20-44 RA, 293-611 Brin.
For shear blades, pneumatic tools, punches, caulking tools.
Type S5 shock resisting tool steel. Oil or water hardening.

CHAMPION 308.
M-712; 0.07 max C, 18.5-20.0 Cr, 10.5-11.25 Ni, bal Fe.
Welded: 85,000-95,000 TS; 50-40 El.
For welding rods for stainless steel; stainless, austenitic; Type 308.

CHAMPION 309.
M-712; 0.10 max C, 22.5-24.0 Cr, 13-14 Ni, bal Fe.
Welded: 85,000-95,000 TS; 45-35 El.
For welding rods for stainless steel; resists oxidation to 2000°F; Type 309.

CHAMPION 309 CB.
M-712; 0.10 max C, 22.5-24.0 Cr, 13-14 Ni, 0.8-1.0 Cb, bal Fe.
Welded: 85,000-95,000 TS; 40-30 El.
For welding rods for stainless steel; prevents carbide ppt., austenitic.

CHAMPION 310.
M-712; 0.09-0.17 C, 25.0-26.5 Cr, 20-21 Ni, bal Fe.
Welded: 85,000-95,000 TS; 45-35 El.
For welding rods for 5% Cr steel, will not air harden, austenitic.

CHAMPION 310 CB.
M-712; 0.10 max C, 25.0-26.5 Cr, 20-21 Ni, 0.8-1.0 Cb, bal Fe.
Welded: 85,000-95,000 TS; 40-30 El.
For welding rods for stainless steel; resists carbide ppt., stabilized.

CHAMPION 310 Mo.
M-712; 0.10 max C, 25.0-26.5 Cr, 20-21 Ni, 2.0-2.5 Mo, bal Fe.
Welded: 85,000-95,000 TS; 45-35 El.
For welding rods for stainless steel; acid resistant, stainless, austenitic.

CHAMPION 316.
M-712, 0.07 max C, 17.5-19.0 Cr, 12.5-13.5 Ni, 2.0-2.5 Mo, bal Fe.
Welded: 85,000-95,000 TS; 50-40 El.
For welding rods for stainless steel, acid resistant, austenitic.

CHAMPION 316 CB
M-712, 0.07 max C, 17.5-19.0 Cr, 12.5-13.5 Ni, 2.0-2.5 Mo, 0.5-0.75 Cb, bal Fe.
Welded: 85,000-95,000 TS; 45-35 El.
For welding rods for stainless steel, stabilized, stainless.

CHAMPION 317.
M-712; 0.07 max C, 17.5-19.0 Cr, 12.5-13.5 Ni, 3.5-4.0 Mo, bal Fe
Welded: 85,000-95,000 TS, 50-40 El
For welding rods for stainless steel, stainless, austenitic.

CHAMPION 330.
M-712, 0.15 max C, 14.5-16.0 Cr, 34-35 Ni, bal Fe
Welded 65,000-70,000 TS; 30-25 El.
For welding rods for furnace construction; heat resistant.

CHAMPION 347.
M-712, 0.07 max C, 18.5-20.0 Cr, 10.5-11.25 Ni, 0.75-1.00 Cb, bal Fe.
Welded: 85,000-95,000 TS; 45-35 El.
For welding rods for stainless steel, stabilized, stainless; Type 347.

CHAMPION 410.
M-712; 0.10 max C, 12.0-13.5 Cr, 0.40-0.65 Mo, bal Fe.
Welded: 85,000-95,000 TS, 35-30 El.
For welding rods for oil refinery vessels; corrosion and heat resistant.

CHAMPION 430.
M-712; 0.10 max C, 15.25-16.75 Cr, bal Fe.
Welded: 75,000-80,000 TS, 35-30 El.
For welding rods to resist HNO_3; corrosion resistant.

CHAMPION 442.
M-712; 0.10 max C, 17.5-19 Cr, bal Fe.
For welding rods for high temperature applications; corrosion and heat resistant.

CHAMPION 446.
M-712; 0.13 max C, 27-28.5 Cr, bal Fe.
For welding rods for high temperature applications; resists oxidation at high temperature.

CHAMPION 502.
M-712; 0.10 max C, 4.5-6 Cr, 0.4-0.65 Mo, bal Fe.
For welding rods for oil refinery equipment; corrosion resistant.

CHAMPION DOUBLE SPECIAL.
U.S.; 1.22 C, 0.25 Mn, 7.53 W, bal Fe.
For tools, dies; oil hardening.

CHAMPION EXTRA.
M-38; 1.2 C, 1.25 W, 0.3 Cr, bal Fe.
For cutters, broaches, drills; oil hardening

CHAMPION GRAY DEVIL NO. 2.
M-712; 0.09 C, 0.35 Mn, bal Fe.
Welded: 78,000 TS; 67,000 YS; 24 El; 45 RA.
For welding rod; flux coated, E 6012.

CHAMPION HW1.
M-1683; 0.35 C, 5.0 Cr, 0.4 V, 1.5 W, 1.5 Mo, bal Fe.
Hot work tool steel, air or oil hardening, for forging and hot forming dies; AISI H12.

CHAMPION HW3.
M-1683; 0.35 C, 1 Si, 5 Cr, 1 V, 1.5 Mo, bal Fe.
Annealed. 98,000 TS, 74,000 YS; 28 El; 210 Brin.
Hardened: 135,000-290,000 TS; 100,000-228,000 YS; 3-16 El; 7-48 RA; C 27-55 Rock.
For forging and heading dies, compression tools, die casting dies, piercing and forming punches, bolt and swaging dies
Type H13 hot work steel, red-tough, shock and impact resistant.

CHAMPION HW21.
M-1683, 0.35 C, 3.5 Cr, 9.0 W, bal Fe.
Hot work tool steel, air or oil hardening, tungsten type; for hot forming operations. AISI H21.

CHAMPION S1.
M-1683; 0.50 C, 1.5 Cr, 2.5 W, bal Fe.
Oil hardening tool steel, shock resisting type.
AISI Type S1 shock resisting tool steel.

CHAMPION TOOL
U.S.; 0.77 C, 0.18 Mn, bal Fe
For tools, punches, water hardening.

CHAMPLAIN.
M-207, 0.90 C, 0.50 W, 0.50 Cr, 1.2 Mn, 0.2 V, bal Fe
Heat treated 170,000-280,000 TS; 155,000-272,000 YS; 2-4 El, 2-18 RA; 335-535 Brin.
For dies, knives, guides, shear blades, vise jaws, forming rolls
Oil hardening, non-deforming, tough

CHANNELER.
M-377; 1.0 C, 0.5 Mn, bal Fe
For stone cutting tools, augers, paving drills; water hardening.

CHANNELLER.
M-24; 0.80 C, 0.40 Mn, 0.30 Si, bal Fe.
For cutting soft stone, marble, limestone.
Type W1 water hardening too steel.

CHARDON-S.
M-1546; 0.60-1.10 C, bal Fe.
Annealed 100,000 TS, 52,000 YS; 20 El, 200 Brin.
Water hardened: 185,000-220,000 TS; 125,000-155,000 YS; 32-37 RA; 11-13 El; 330-600 Brin.
Uses: Tools, cutters, hammers, chisels, punches.
Water hardening, Type W1 tool steel.

CHARLES LEONARD.
M-261; 0.7-1.0 C, 0.3 Mn, 0.3 Si, bal Fe.
For tools, cutters, drills; water hardened; Type W1.

CHAR-PAC.
M-604; 0.17 C, 1.25 Mn, 0.35 Si, 0.25 Cu, 0.15 Ni, 0.12 Cr, 0.04 Mo, bal Fe.
Heat treated: 60,000 min YS; 80,000-100,000 TS; 15 min Charpy.
Normalized: 70,000-95,000 TS; 50,000 min YS.
For storage tanks, penstocks, bridges and buildings, pressure vessels.
Heat treated carbon steel plates.

CHARPY ALLOY.
Eng.; 5.6 Cu, 83.3 Sn, 11.1 Sb.
For bearings; Babbitt.

CHARPY PHOSPHOR BRONZE.
U.S.; 12.2-13.4 Sn, 0.4 P, bal Cu.
For bearings, gears, bushings; heavy duty.

CHASE ALLOY NO. 58.
M-33; 96.68 Cu, 1.1 Ni, 0.22 P.
Rolled: 88,000-110,000 TS; 80,000-100,000 YS.
For springs, electric conductors; now Phosnic Bronze.

CHASE 50 Re-50 Mo.
M-33; 47.5-48.5 Re, 51.5-52.5 Mo
Recrystallized: 150,000 TS; 123,000 YS; 16-20 El; 350 VHN.
Wrought: 240,000 TS; 210,000 YS, 600 VHN.
For electron tube components, high temperature furnace parts, nuclear and space propulsion and power generation systems, crucibles, thermocouple protection tubes. High strength and ductility to 4200°F.

CHASE 75W-25 Re.
M-33; 24.5-25.5 Re, 74.5-75.5 W.
Recrystallized: 190,000 TS.
Wrought: 310,000 TS.
For electron tube components, thermocouples, cathodes, resistance heating elements, nuclear reactor parts, high temperature furnaces
High strength and ductility to 3600°F.

CHASE "444" BRONZE.
M-33; 88 Cu, 4 Pb, 4 Sn, 4 Zn.
Rolled: 50,000-90,000 TS; 25,000-60,000 YS; 35-7 El.
For bearings, condenser tubes; corrosion resistant to brine, alkalis.

CHASE ADMIRALTY BRASS
M-33; 71 Cu, 1.0 Sn, 28 Zn.
Annealed: 60,000 TS; 47 El.
For condenser tubing and pipe; corrosion resistant

CHASE ARCHITECTURAL BRONZE.
M-33; 58 Cu, 3 Pb, 39 Zn.
Extruded: 60,000 TS; 22,000 YS, 25 El.
For extruded architectural shapes, hot workable.

CHASE BRIGHT EXTRUDED BRONZE.
M-33; 58.5 Cu, 38.7 Zn, 2.5 Pb, 0.3 Al.
Extruded: 62,000 TS; 24,000 YS, 20 El.
For architectural sections; free-cutting.

CHASE CUPRO-NICKEL, 30%.
M-33; 68.8 Cu, 30 Ni, 0.75 Mn, 1.45 Fe.
Annealed: 54,000 TS; 18,000 YS; 55 El.
For condenser tubes, heat exchange tubes; corrosion resistant to alkalis, sea water.

CHASE FORGING BRASS.
M-33; 59.75 Cu, 2 Pb, bal Zn.
Forged: 50,000-60,000 TS; 20,000-35,000 YS; 40-20 El.
For central forgings; hot workable.

CHASE FREE CUTTING BRASS.
M-33; 62 Cu, 3.25 Pb, bal Zn.
Annealed: 49,000 TS; 18,000 YS; 53 El.
Hard-20%: 63,000 TS; 48,000 YS; 20 El.
For screw machine work; free cutting.

CHASE HIGH LEADED BRASS.
M-33; 64 Cu, 2 Pb, 34 Zn.
Hard rolled: 75,000 TS; 60,000 YS; 7 El.
For stampings, meter and clock parts; free milling.

CHASE HIGH STRENGTH TANK BRASS.
M-33; 30 Zn, bal Cu.
Rolled: 53,000 TS; 20,500 YS; 52 El; 68 Brin.
For tanks, radiators; high yield strength, good drawability.

CHASE MANGANESE BRONZE
M-33; 58.0 Cu, 1.0 Sn, 38.9 Zn, 1.0 Fe, 0.1 Mn.
Annealed: 65,000 TS, 30,000 YS; 33 El.
Hard-15%: 82,000 TS; 60,000 YS; 25 El.
For high strength bolts; tough.

CHASE NICKEL SILVER (12%).
M-33; 64 Cu, 12 Ni, 24 Zn.
Annealed: 58,000 TS; 40 El
Hard drawn: 105,000 TS; 7 El.
For extruded shapes for architectural purposes; corrosion resistant.

CHASE TELNIC BRONZE.
M-33, 98.3 Cu, 1.1 Ni, 0.22 P, 0.5 Te, bal Zn.
Drawn hard 72,000 TS, 62,000 YS, 27 El; 50 RA.
Heat treated: 58,000 TS; 38,000 YS.
For forgings and screw machine parts; heat treatable.

CHATEAUGAY LOW PHOSPHORUS PIG IRON
M-257, 4.0 C, 0.75-4.05 Si, 0.1-2.0 Mn, 0.035 max. S and P, bal Fe
For casting rolls, gears, cylinders, steel and iron; produced from New York State ores

CHATILLON 709.
M-1486, 0.21 max C, 0.85-1.2 Cr, 0.9-1.1 Mo, 0.15-0.30 V, bal Fe
Heat treated 105,000-178,000 TS, 92,400-106,000 YS, 17-8 El
For steam turbine rotors and stators, high temperature bolts; creep resistant, structural steel

CHATILLON 3100
M-1117, 0.12 max C, 14-18 Cr, Mo, bal Fe
Annealed: 65,000-90,000 TS, 40,000-55,000 YS; 20-35 El; 40-60 RA; 130-160 Brin.
For hardware, fittings, oil burners, fasteners, storage tanks
Type 430 Mo stainless steel.

CHATILLON 3308.
M-1117, 0.08 max C, 17-19 Cr, 9-12 Ni, Ti, bal Fe.
Annealed. 85,000 TS, 35,000 YS; 55 El; B 80 Rock
Cold drawn. 95,000 TS; 60,000 YS; 40 El, B 90 Rock.
For exhaust stystems, oil refinery equipment, welded structures, superheaters
Type 321 stainless steel, stabilized, welding quality.

CHATILLON 3333.
M-1117; 0.15 max C, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed· 90,000 TS; 40,000 YS, 50 El; B 85 Rock.
Cold rolled: 150,000 TS; 110,000 YS, 30 El, B 100 Rock.
For chemical and pharmaceutical plant equipment, valve trim, food handling equipment.
Type 302 stainless steel, austenitic.

CHATILLON 3400.
M-1117; 0.08 max C, 16-18 Cr, 10-14 Ni, 2-4 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; B 80 Rock.
Cold rolled: 150,000 TS; 135,000 YS; 6 El; C 30 Rock.
For chemical plant equipment, agitators, digesters, valve trim, evaporators.
Type 18-8 Mo stainless steel, austenitic, acid resistant

CHATILLON 3408.
M-1117; 0.08 C, 17 Cr, 12 Ni, Mo, Ti, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; B 82 Rock.
Cold rolled: 130,000 TS; 90,000 YS; 30 El; B 100 Rock.
For chemical plant equipment, agitators, welded structures.
Type 18-8 Mo Ti stainless steel, austenitic, welding grade

CHATILLON 5250.
M-1117; 0.95 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, dies, cutters; non-deforming.

CHATILLON 5650.
M-1117; C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe.
For hot work tools and dies, hot work steel

CHATILLON 5654.
M-1117; C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe.
For hot work tools and dies, hot work steel.

CHATILLON 5655.
M-1117; C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe.
For hot work tools and dies, hot work steel

CHATILLON 5755
M-1117, C, 19 W, 4 Cr, 2.2 V, bal Fe
For tools, dies, cutters, high speed steel.

CHATILLON 5815
M-1117, C, 18 W, 5 Co, 4 Cr, 1.3 V, bal Fe.
For tools, dies, cutters; high speed steel

CHATILLON 5820
M-1117, C, 18 W, 9 Co, 4 Cr, 2 V, bal Fe
For tools, dies, cutters, high speed steel

CHATILLON 5830
M-1117, 0.5 C, 1.5 Cr, 2.2 W, 0.2 V, bal Fe.
For tools, dies, hot work steel.

CHATILLON MF NO 1
M-1117; 2.25 C, 13 Cr, bal Fe
For tools, dies; non-deforming

CHATILLON MN Si
M-1117; 0.5 C, 0.7 Mn, 1.8-2.0 Si, bal Fe.
For tools, dies, punches; tough.

CHATILLON TSM NO. 2.
M-1117; 1.3 C, 4.5 Cr, bal Fe.
For tools, dies, air hardened.

CHATILLON W 18.
M-1117, C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, dies, cutters, high speed steel.

CHECK BRASS.
U.S.; 62 Cu, 38 Zn.
For fixtures, name plates; yellow brass.

CHECKNO.
M-334; 0.4 C, 3.5 Cr, 1 V, 8 W, bal Fe
For tools, hot working dies, punches; hot work steel.

CHECKNO NO. 1.
M-334; 0.45 C, 13.25 W, 3.5 Cr, bal Fe.
For extrusion dies and liners; oil hardened, hot work steel.

CHECKNO NO. 2.
M-334; 0.35 C, 3.5 Cr, 11 W, 0.45 V, bal Fe.
For extrusion dies and liners, punches; oil hardened, hot work steel.

CHECKNO NO. 3.
M-334; 0.28 C, 3.25 Cr, 8.5 W, 0.3 V, bal Fe.
For extrusion dies and liners, punches; oil hardened, hot work steel.

CHECKWATE 8.
M-1; 0.10 C, 1.0-2.0 Mn, 0.04 max P, 0.03 max S, 1.0 max Si, 18.5-21.5 Cr, 23.0-26.0 Ni, 1.75-2.75 Mo, bal Fe.
For balance weights Vacuum consumable electrode melted. Stainless, austenitic, non-magnetic.

CHECO.
U.S.; 89 Ag, 10 Sn, 1 Pt.
For dentures.

CHEMALLOY.
M-76; Cu, Mg, bal Zn.
For bearings, die castings; corrosion resistant.

CHEMALLOY A28.
M-47; C, 18-20 Cr, 8-10 Ni, bal Fe.
Cast: 75,000 TS; 35,000 YS; 50 El; 60 RA; 150 Brin.
For valves, pumps, condensers, anchors, conveyors; corrosion resistant.

CHEMALLOY A28C.
M-47, C, 18-20 Cr, 8-10 Ni, Cb, bal Fe
Cast: 80,000 TS; 35,000 YS; 45 El, 55 RA; 160 Brin.
For valve parts, pumps, anchors, condensers; for welded sections, corrosion resistant.

CHEMALLOY A28M.
M-47; C, 18-20 Cr, 8-10 Ni, 2-3 Mo, bal Fe.
Cast: 75,000 TS; 30,000 YS; 45 El; 60 RA, 170 Brin.
For valves, pumps, piping, retorts, condensers; resists acid pitting, corrosion resistant.

CHEMALLOY F6.
M-47, C, 4.5-6 Cr, 0.5 Mo, bal Fe.
Cast: 110,000 TS, 75,000 YS, 20 El; 40 RA; 230 Brin.
For dies, molds, valve trim, steam turbines, heat resistant to 1250°F.

CHEMALLOY F12.
M-47; C, 11-14 Cr, bal Fe
Cast: 95,000 TS, 75,000 YS; 25 El, 45 RA; 225 Brin.
For valve parts, gears, pumps, impellers, dies; heat resistant.

CHEMALLOY H2
M-47; 29 Mo, 6 Fe, bal Ni
Cast: 80,000 TS; 55,000 YS; 8 El; 210 Brin.
For pumps, valves, condensers, fittings, resists boiling HCl and H_3PO_4

CHEMALLOY H3.
M-47; 14 Cr, 16 Mo, 4 W, 6 Fe, bal Ni
Cast: 75,000 TS; 45,000 YS; 12 El; 195 Brin.
For valves, pumps, condensers, fittings, cylinder liners; resists free Cl_2 hypochlorites, sulphurous acid.

CHEMALLOY N1.
M-47; 15 Ni, 6 Cr, 2 Cu, bal Fe.
Cast: 30,000 TS; 12,000 YS, 150 Brin.
For pumps, valves, chains, filters, fittings, pump seals; corrosion resistant to alkalis; Ni-Resist Type 1

CHEMALLOY N4
M-47; 30 Ni, 5 Cr, 5 Si, bal Fe.
Cast: 30,000 TS; 15,000 YS; 165 Brin.
For valves, pumps, fittings, filters, rolls; stain resistant.

CHEMBRITE A608.
M-663; 0.10 C, 1.9 Mn, 0.68 Si, 0.06 Ni, 0.5 Mo, bal Fe.
Low alloy bare wire for machine welding to give welds of about 100,000 psi TS.
AWS E 70 S-1B.

CHEMBRITE A675.
M-663; 0.12 C, 1.19 Mn, 0.59 Si, bal Fe.
Bare mild steel welding wire for CO$_2$ and inert gas shielded arc welding.
AWS E 70 S-3.

CHEMBRITE A681.
M-663; 0.11 C, 1.64 Mn, 0.86 Si, bal Fe.
Mild steel bare wire for CO$_2$ and inert gas welding of steel.
AWS E 70 S-6.

CHEMICAL LEAD.
M-88; 99.93 Pb, 0.07 Cu, 0.005 Ag
Cast: 1,750 TS; 1,000 YS; 40 El; 90 RA; 5.5 Brin.
Rolled: 2,000 TS; 1,000 YS; 54 El; 5.5 Brin.
For tank linings, valves, pipes, fuses; M.E. 2,000,000.

CHENITE
English; Ti, V, Cr, Hf.
For cutting tools, dies; air hardening.

CHEVIS.
M-1405; C, alloy, bal Fe.
For punches, dies for sheet metal blanking and forming; water hardened.

CHEVRE NO. 2½.
M-1117; 1.1 C, bal Fe.
For tools, taps, drills; water hardened.

CHEVRE NO. 3.
M-1117; 0.95 C, bal Fe.
For tools, dies, springs; water hardened.

CHINA BRASS.
China; 56.6 Cu, 27-37 Zn, 0.2-1.0 Sn, 0-0.8 Pb.
For sheet, hardware, fittings; good workability

CHINESE BRONZE
China; 10-20 Pb, 1-14 Zn, 1-13 Sn, bal Cu.
For bearings, heavy duty.

CHINESE GERMAN SILVER.
China; 40.4-41 Cu, 25.4-26.5 Zn, 30.8-31.6 Ni, 2.6-2.7 Fe.
For electrical resistances, ornaments; corrosion resistant.

CHINESE SILVER.
China; 58 Cu, 17.5 Zn, 11.5 Ni, 2 Ag.
For ornaments, electrical parts; nickel silver.

CHINESE SPECULUM-1.
Eng.; 81 Cu, 11 Sn, 8.5 Sb.
For mirrors, optical grading.

CHINESE SPECULUM-2.
Eng; 81 Cu, 9 Pb, 8 Sb, 2 Sn.
For mirrors; (Elsner's).

CHIPPAWAY.
M-69; 0.6-1.4 C, bal Fe.
For pneumatic hammers, chisels, vise jaws, rock drills, punches; water hardening.

CHIPPER KNIFE.
M-357; 0.7 C, 1.15 Cr, 0.25 V, 0.7 Mo, bal Fe.
For shears, dies, chipper knives; oil hardening.

CHIPPEWA.
M-435; 0.45 C, 0.6 Mn, 0.25 Si, 0.4 V, 3 Cr, 0.25 Mo, bal Fe.
For mining bit shanks; hollow shank steel.

CHISEL 3581.
M-40; 0.55 C, 0.7 Mn, 0.2 V, 0.35 Mo, 1.6 Si, bal Fe.
For pneumatic tools, chisels; oil hardened, shock resistant.

CHITONAL.
M-624; 1.5 Si, 5 Cu, bal Al.
For light alloy parts, ship parts; bi-metal, coated "Avional."

CHITONAL-14.
M-624, M-541, 3.9-5.0 Cu, 0.5-1.2 Si, 0.2-0.8 Mg, 0.4-1.2 Mn, bal Al.
Annealed: 27,000-30,000 TS; 11,400-14,200 YS; 16-20 El.
TA-Temper: 66,800-75,400 TS; 58,300-66,800 YS; 6-12 El.
For general engineering components. Age hardenable, high strength

CHITONAL-24.
M-624, M-541, 3.8-4.9 Cu, 1.2-1.8 Mg, 0.3-0.9 Mn, bal Al.
Annealed 27,000 TS, 14,000 YS; 14-22 El;
TH06N-Temper: 74,000 TS; 62,000 YS; 10 El.
For aircraft structures, general engineering components
Age hardenable, high strength.

CHIZ-ALAIR
M-335, 0.50 C, 0.7 Mn, 0.25 Si, 3.25 Cr, 1.4 Mo, bal Fe.
Air hardening; for tools, dies
AISI S7 shock resisting tool steel.

CHIZ-ALLOY.
M-335; 0.5 C, 1.15 Cr, 2.5 W, 0.2 V, 0.75 Si, bal Fe
For hand and pneumatic chisels and punches, shock resistant, oil hardening, octagons and hexagons, AISI S1 tool steel

CHLORIMET NO. 2
M-46, 63 Ni, 32 Mo, 3 Fe, 0.10 C, 1 Si, 1 Mn
Heat treated: 80,000 TS, 55,000 YS, 5 El, 6 RA, 250 Brin
For chemical equipment, vats, vessels, castings; corrosion resistant to HCl, H$_2$SO$_4$, H$_3$PO$_4$ and brine

CHLORIMET NO 3
M-46, 60 Ni, 18 Mo, 18 Cr, 3 Fe, 0.07 C, 1 Si, 1 Mn.
Heat treated 75,000 TS, 50,000 YS; 10 El, 12 RA; 225 Brin.
For chemical equipment, vats, vessels, castings; corrosion resistant to hot H$_2$SO$_4$ and chlorides.

CHOYCE-77.
M-1683, 0.90 C, 1.2 Mn, 0.2 V, 0.5 W, 0.5 Cr, bal Fe.
Annealed. 84,000 TS, 60,000 YS; 26 El; 185 Brin
Heat treated: 145,000-280,000 TS; 125,000-272,000 YS; 2-8 El; 2-31 RA; 290-535 Brin
For blanking and bending dies, master tools, knurling tools, punches, cutters, master dies, gauges.
Type 01, oil hardening, cold work steel, shock resisting.

C.H.Q. DIE STEEL.
M-57; C, alloy, bal Fe.
For cold header dies; cold work steel.

CHRISTOFLE METAL.
Eng.; silver plated German Silver (2.0 Ag).
For cutlery, hardware; corrosion resistant

CHROGO "U-42."
40 Au, 45 Cu, 14 Ni, 1 Cr, traces Pt.
For dental alloy; corrosion resistant.

CHROMADOR STEEL.
M-470; 0.30 max C, 0.7-1.0 Mn, 0.7-1.0 Cr, 0.25-0.50 Cu, bal Fe.
Rolled: 83,000-98,500 TS; 52,000 YS; 17 El; 40 RA; 160-200 Brin.
For structural work, tanks, rivets; high tensile steel; resists corrosion.

CHROMAL.
Swedish; 2-4 Cr, Ni, Mn, bal Al.
Rolled: 55,000-60,000 TS.
For airplane parts, propellers, cooking utensils, milk and oil separators; non-hardenable.

CROMAL
M-342, 2-4 Cr, Ni, Mn, bal Al.
65,000-75,000 TS; 50,000-65,000 YS.
For airplane parts, milk and oil separators, pistons, propellers; corrosion resisting.

CHROMALLOY.
M-114, M-31, 0.20 C, 1.0 Cr, 1.0 Mo, 0.1 V, 0.75 Si, 0.5 Mn, bal Fe.
Heat treated: 138,000 TS; 117,000 YS; 7 El; 45 RA
For high temperature welded structures; good strength and weldability

CHROMALOID.
M-538; Cr, coated zinc
For plumbing fixtures; hardware; bonded Zn base.

CHROMALOY-V
M-408, 80 Ni, 20 Cr
Annealed 95,000 TS, 25-35 El; 185 Brin.
For heating and resistance elements, heat resistant to 1150°F

CHROMAL STEEL
Eng., 0.8 Cr, 0.8 Mn, 0.8 Mo, 0.3 C, bal Fe.
For gears, pinions, shafts, water hardening

CHROMAN ALLOY.
M-296, Ni, Cr, Mn, bal Fe
For heating elements, acid resisting

CHROMAN "Ao"
M 296, 88 Ni, 11 Cr, 1 Mn
For heating elements, acid resisting

CHROMAN "B"
M-296, 20 Fe, 64 Ni, 15 Cr, 1 Mn
At 20°C 87,000 TS, 48 El
At 500°C 73,000 TS; 46 El
For heating elements; acid and heat resistant.

CHROMAN B2 Mo
M-296, 61.4 Ni, 18.5 Cr, 14.5 Fe, 3 Mn, 2 Mo, 0.6 Si
For jet engine parts, heat and oxidation resistant.

CHROMAN "Bo"
M 296, 84 Ni, 15 Cr, 1 Mn
For heating elements, acid resisting

CHROMAN "C"
M-296, 10 Fe, 69 Ni, 20 Cr, 1 Mn.
For heating elements, acid resisting

CHROMAN "Co"
M-296; 79 Ni, 20 Cr, 1 Mn
For heating elements; acid resisting

CHROMAN "D"
M-296, 9 Fe, 65 Ni, 25 Cr, 1 Mn
For heating elements, acid resisting.

CHROMAN "E."
M-296, 16 Fe, 50 Ni, 33 Cr, 1 Mn
For heating elements; acid resisting

CHROMAX BRONZE.
U.S., 67 Cu, 15 Ni, 12 Zn, 3 Cr, 3 Al.
Cast: 70,000 TS.
For bearings.

CHROMAX (CAST).
M-44; 35 Ni, 15 Cr, 50 Fe.
Cast: 60,000 TS; 3.5 El; 2 RA; 168 Brin.
For furnace parts, carburizing boxes, enameling fixtures; resists abrasion, impact, strain, heat and corrosion.

CHROMAX (MALLEABLE).
M-44; 34-36 Ni, 19-20 Cr, bal Fe.
Annealed: 150,000 TS; 35 El.
For rheostats, electrical appliances; heat resist.

CHROMCARB N-6006.
M-717.
Electrode for hard but tough overlays on steel; AC-DC, for crusher jaws, clam shell bucket lips, dipper teeth Hardness C 57-60 Rock.

CHROMDIE.
M-627; 1.5 C, 12 Cr, 0.4 V, 1.0 Mo, bal Fe.
Hardened: 278,000 TS; 214,000 YS; 1 El; 567 Brin.
For blanking and drawing dies, wire drawing and stamping dies, broaches, hobs, punches, gauges, thread rolling dies
Type D2 air hardening, nondeforming tool steel, tough.

CHROME.
M-1405; 1.4 C, 0.35 Mn, 0.6 Cr, 0.2 Si, bal Fe
For reamer blades, impact extrusion dies; water hardened, wear resistant

CHROME 3½%.
M-1076, 3.5 Cr, 1.0 C, bal Fe.
For permanent magnets; Br-9500, Hc-60.

CHROME 6%.
M-1076; 6.0 Cr, 1.0 C, bal Fe
For permanent magnets, Br-8500, Hc-65.

CHROME ALLOY PRODUCTS KA-2
M-143, M-436; 0.13 C, 18.5 Cr, 9 Ni, bal Fe.
For stainless parts; corrosion and heat resistant.

CHROME ALLOY PRODUCTS KA-2 MO.
M-146, M-436, 0.14 C, 20 Cr, 9 Ni, 3 Mo, bal Fe.
For stainless parts, corrosion and heat resistant.

CHROME ALLOY PRODUCTS KA-2S.
M-146, M-436; 0.06 C, 20 Cr, 9 Ni, bal Fe.
For stainless parts; corrosion and heat resistant.

CHROME ALLOY PRODUCTS KNC-3
M-146, M-436, 0.17 C, 25 Cr, 19 Ni, 1.75 Si, bal Fe.
For furnace parts, corrosion and heat resistant.

CHROME ALLOY PRODUCTS STAINLESS NO 7
M-146, M-436, 0.25 C, 20.5 Cr, 1 Cu, bal Fe
For stainless parts; stainless

CHROME B.
M-344, C, Cr, bal Fe.
For cutting dies, non-deforming

CHROME "B-15"
M-344, C, 15 Cr, bal Fe.
For tools, cold and threading dies, punch stamps; non-deforming

CHROME BALL STEEL.
M-260, 1.0 C, 1.2 Cr, bal Fe.
Hardened: 650 Brin.
For balls, ball bearings; water hardening.

CHROME BEARING STEEL.
M-260; 1.0 C, 1.2 Cr, bal Fe.
Hardened: 650 Brin.
For ball bearing races; water hardening.

CHROME BRASS.
M-538; Cr coated brass.
For fabricated parts; easily formed, stamped, drawn.

CHROME CAST.
M-569; 1.1 min C, 16-23 Cr, bal Fe.
For heat, wear and corrosion resistant parts; heat, wear and corrosion resistant.

CHROME-COPPER.
M-538; Cr coated copper.
For stampings, display cases, refrigerators, kitchen equipment; pure Cu base bonded with Ni then Cr on surface.

CHROME-COPPER-NICKEL STEEL.
M-176; 0.65-0.85 Cr, 0.75 Ni, 0.12 C, 0.45-0.65 Cu, bal Fe.
Rolled: 65,000 TS; 35,000 YS; 30 El; 50 RA; 135 Brin.
For machinery parts; low temperature resistance.

CHROME DIE.
M-253, M-1; 0.5 C, 5 Cr, bal Fe.
For hot dies, punches, shears; hot work steel.

CHROME DRILL ROD.
M-38; 1.1 C, 1.1 Cr, bal Fe.
For drills, taps; water or oil hardening.

CHROME FIRMINY NO. 0.
M-1043; 1.15 C, 3.25 Cr, bal Fe.
For blanking, drawing and forming dies; oil hardened, wear resistant.

CHROME HOT DIE.
M-373; 0.8-1.0 C, 3-4 Cr, bal Fe.
For bolt and rivet dies, forging mandrels, piercing dies; hot work steel, air hardening.

CHROME HOT WORK.
M-365; 0.9 C, 3.75 Cr, bal Fe.
For tools, dies, mandrels; hot work steel.

CHROME IRON.
Eng; 13-14 Si, Cr, bal Fe.
For pumps, valves, corrosion resisting vessels; similar to "Duriron."

CHROMEL A.
M-65; 20.0 Cr, 0.5 Fe, 1.0 Si, bal Ni.
21 gauge wire: 120,000 TS.
Elec resistance: 650 ohms/circular mil ft.
For restance wire for heating elements up to 2150°F; corrosion and heat resistant.
Toasters, electric furnaces, electric ranges.

CHROMEL AA.
M-65; 20.0 Cr, 8.3 Fe, 2.0 Si, bal Ni.
21 gauge wire: 130,000 TS.
Elec. resistance: 700 ohms/circular mil ft.
Resistance wire for furnaces operating in controlled atmosphere to 2250°F, more resistant to reducing atmospheres.

CHROMEL C.
M-65; 16.0 Cr, 25.5 Fe, 1.3 Si, bal Ni.
21 gauge wire: 110,000 TS.
Elec. resistance: 675 ohms/circular mil ft
Resistance wire for heating elements up to 1850°F; corrosion and heat resistant. Flat irons, dryers, waffle and sandwich grills.

CHROMEL D.
M-65; 18.5 Cr, 44.0 Fe, 1.5 Si, bal Ni.
21 gauge wire: 105,000 TS.
Elec. resistance: 600 ohms/circular mil ft.
Resistance wire for heating elements to 1800°F.
Industrial furnaces operating to 1800°F.
Good hot strength.

CHROMEL P.
M-65; 90 Ni, 10 Cr (plus 9 minor constituents).
Ann: 95,000 TS.
EMF: positive.
Thermocouple wire—matched with Alumel for temperature measurement to 2400°F; corrosion and heat resistant.

CHROMEL R.
M-65; 80 Ni, 20 Cr.
Wire: 95,000-175,000 TS; 50,000 YS; 35 El.
Annealed: 95,000 TS; 25-35 El; 55 RA; B 85-90 Rock.
For precision wound resistors, potentiometers, heating elements.
High heat and oxidation resistant.

CHROME MAGNET.
M-115, M-1; 0.90-1.0 C, 0.15-0.25 Si, 3.5-4.0 Cr, bal Fe.
For permanent magnet; magnet steel

CHROME MAGNET M-31.
M-260, 0.85 C, 2.7 Cr, bal Fe.
For permanent magnets; oil hardening.

CHROME MAGNET NO. 154.
M-260, M-38; 0.9 C, 3.6 Cr, bal Fe.
For permanent magnets for speakers, meters, etc; high magnetic values.

CHROME MANGANESE STEEL.
M-176; 0.4 C, 0.5 Cr, 0.9 Mn, bal Fe.
Rolled: 100,000 TS; 55,000 YS; 25 El, 200 Brin
For machinery parts; water hardening.

CHROME-MOLY.
M-157, 2.75-3.0 C, 2-2.6 Si, 0.8-1.0 Mn, 0.4 Cr, 0.4-0.6 Mo, bal Fe
Cast: 35,000-45,000 TS, 230-270 Brin
For heavy dies; tough, close grained.

CHROMENAR 308 etc
M-677, one of 36 bare stainless steel wires to 24 AISI standard stainless steel grades plus 12 modified grades. For welding or build-up on stainless steels.

CHROMEND 1 MA
M-677, 0.5 C, 0.75 Mn, 0.6 Si, 0.8-1.1 Cr, 0.45-0.65 Mo, bal Fe.
Welded: 85,000-100,000 TS, 68,000-88,000 YS; 23-20 El, 65-50 RA.
For welding rod; repairing 1% Cr steel castings and pipe

CHROMEND 2M
M-677, 0.10 C, 2 Cr, 0.9 Mo, bal Fe
Welded: 150,000 TS; 120,000 YS, 4 El, 10 RA, 325 Brin
For welding rod, for low Cr steels

CHROMEND 2MA
M-677, 0.03 C, 0.7 Mn, 0.6 Si, 2.0-2.5 Cr, 0.9-1.2 Mo, bal Fe
Welded: 113,000 TS, 99,000 YS, 18 El, 48 RA,
Stress relieved (1350°F): 92,000 TS, 85,000 YS; 25 El; 72 RA.
For welding rod, type E9018-B3L, welding 2¼ Cr, 1 Mo steel.

CHROMEND 5M.
M-677; 0.10 C, 4-6 Cr, 0.5 Mo, bal Fe.
For welding rod

CHROMEND 14/75.
M-677, 75 Ni, 14 Cr, bal Fe.
For welding electrodes; "Inconel"; heat and corrosion resistant.

CHROMEND 16-8-2.
M-677, 0.05 C, 2.2 Mn, 0.3 Si, 16.0 Cr, 8.5 Ni, 1.5 Mo, bal Fe.
For welding electrodes; stainless steel for high temperature service free from sigma-phase embrittlement.

CHROMEND 307.
M-677; 0.07-0.17 C, 3.3-4.75 Mn, 0.25 max Mo, 18-20.5 Cr, 9-10.5 Ni, bal Fe.
Welded: 84,000-96,000 TS; 56,000-62,000 YS; 46-37 El; 49-35 RA.
For welding electrodes; for armor, coated.

CHROMEND 308.
M-677; 0.07 C, 19 Cr, 9 Ni, bal Fe.
For welding rod; stainless.

CHROMEND 308HC.
M-677, 0.14 C, 1.7 Mn, 0.4 Si, 20.0 Cr, 9.7 Ni, bal Fe.
For welding electrodes; specially coated for welding austenitic Cr-Ni stainless steel.

CHROMEND 308L.
M-677; 0.035 C, 1.8 Mn, 0 4 Si, 20.0 Cr, 9.8 Ni, bal Fe
For welding electrodes; stainless steel type 308L.

CHROMEND 309.
M-677; 0 10 C, 25 Cr, 12 Ni, bal Fe
For weld metal; stainless.

CHROMEND 309 Cb.
M-677; 0.10 C, 25 Cr, 12 Ni, 0 90-1.1 Cb, bal Fe.
For welding rod, corrosion and heat resistant.

CHROMEND 309Mo
M-677; 0.07 C, 1.8 Mn, 0 4 Si, 23.0 Cr, 12.8 Ni, 2 5 Mo, bal Fe
For welding electrodes, Mo-bearing stainless steel for root pass welding of 316, 316L, 319 Clad steel

CHROMEND 310
M-677, 0 10 C, 25 Cr, 20 Ni, bal Fe.
For welding rod, heat and corrosion resistant.

CHROMEND 310 Cb
M-677, C, 25 Cr, 20 Ni, Cb, bal Fe
For welding electrodes, stainless, austenitic

CHROMEND 310HC
M-677; 0 22 C (also 0 30 C, also 0 40 C), 1 8 Mn, 0 4 Si, 26 5 Cr, 21 0 Ni, bal Fe
For welding electrodes, welding ACI types CK-20, HK, HL, HN castings, supplied in three carbon ranges

CHROMEND 310 Mo
M-677, C, 25 Cr, 20 Ni, Mo, bal Fe
For welding electrodes, stainless, austenitic

CHROMEND 312.
M-677; C, 29 Cr, 9 Ni, bal Fe.
For welding rod; heat resistant.

CHROMEND 316
M-677, 0 08 C, 2 Mo, 18 Cr, 13 Ni, bal Fe.
For welding electrodes, stainless.

CHROMEND 316L
M-677; 0.035 C, 1.8 Mn, 0 4 Si, 19 5 Cr, 12.5 Ni, 2.2 Mo, bal Fe
For welding electrodes; stainless steel type 316L.

CHROMEND 317.
M-677; 0 07 C, 18 Cr, 12 Ni, 3 Mo, bal Fe.
For welding rod, corrosion resistant.

CHROMEND 318.
M-677; C, 18 Cr, 12 Ni, Mo, Cb, bal Fe.
For welding electrodes; stainless, austenitic.

CHROMEND 320.
M-677; 0.05 C, 1.1 Mn, 0 4 Si, 20.0 Cr, 34.0 Ni, 2 5 Mo, 0.6 Cb, 3 4 Cu, bal Fe.
For welding electrodes, Carpenter 20 Cb-3.

CHROMEND 330
M-677; C, 15 Cr, 35 Ni, bal Fe.
For welding rod; heat resistant.

CHROMEND 330HC.
M-677; 0.30 C (also 0.40 C), 1.6 Mn, 0.6 Si, 16.0 Cr, 34.0 Ni, bal Fe.
For welding electrodes; welding ACI types HT and HU castings; supplied in two carbon ranges.

CHROMEND 347.
M-677; 0.07 C, 19 Cr, 9 Ni, 0.8-1.0 Cb, bal Fe.
For welding rod; corrosion resistant.

CHROMEND 349.
M-677; C, 19 Cr, 9 Ni, W, Mo, bal Fe.
For welding electrodes; stainless, austenitic.

CHROMEND 410.
M-677; 0.10 C, 12 Cr, bal Fe
For welding rod; corrosion resistant.

CHROMEND 410Ni.
M-677, 0.04 C, 0 6 Mn, 0 4 Si, 12 Cr, 4 Ni, 0.8 Mo, bal Fe.
For welding electrodes, welding CA6NM castings.

CHROMEND 430.
M-677, 0 10 C, 16 Cr, bal Fe.
For welding rod; corrosion resistant.

CHROMEND 442
M-677, 0.10 C, 18 Cr, bal Fe.
For welding rod; corrosion resistant

CHROMEND 446
M-677, C, 28 Cr, bal Fe.
For welding rod; heat resistant.

CHROMEND 505
M-677, 0 2 C, 8-10 Cr, 1.5 Mo, bal Fe.
For welding electrodes, for high temperatures, corrosion resistant.

CHROMEND CMV.
M-677, Timken 17/22A(S) steel, 0 3 C, 1.25 Cr, 0 5 Mo, 0.25 V, bal Fe
Heat treated: 140,000-240,000 psi.
For welding electrodes

CHROME NICKEL.
M-297, 20 Cr, 77 Ni, 2 Mn.
Annealed 121,000 TS, 23 El.
Hard 195,000 TS, 1 El
For heat resistances, electrical heating elements, rheostats, max operating temperature 1150°C.

CHROME NICKEL IRON.
M-297; 20 Cr, 70 Ni, 8 Fe, 2 Mn.
Annealed 114,000 TS; 24 El
Hard drawn 182,000 TS, 1 El.
For electrical heating elements, rheostats, electrical measuring instruments, max operating temperature 1150°C

CHROME NICKEL SILVER.
M-538, Ni, Zn, bal Cu.
For automatic fabrication, sheets and strips; nickel silver sheet bonded with chromium, rust proof.

CHROME NICKEL SKATE BLADE.
M-38, 0 75 C, 1 25 Ni, 0 6 Cr, bal Fe.
For ice skate blades, oil hardening.

CHROME-NICKEL STEEL ARMOR PLATE.
Eng; 4 Ni, 2 Cr, 0 33 C, 0.32 Mn, 0.06 Si, 0.03 S, 0 14 P, bal Fe.
For armor plate, oil hardening.

CHROME ROLL.
M-85, 0.9 C, 1 Cr, bal Fe.
For tools, cutters, dies; water hardening.

CHROMESCO 1.
M-1490; 0.10-0.18 C, 0.40-0.65 Cr, 0.45-0.65 Mo, bal Fe.
Annealed: 65,000 TS; 40,000 YS; 18 El.
For oil refinery tubes and equipment.

CHROMESCO 3.
M-1495; 0.15 max C, 1.9-2.6 Cr, 0.80-1.2 Mo, bal Fe.
Annealed: 60,000 TS; 30,000 YS; 30 El; 163 Brin.
For oil refinery tubes and equipment; ASTM-A-200.

CHROME SILICON SPRING.
M-12; 0.5-0.6 C, 0.5-0.8 Mn, 1.2-1.6 Si, 0.5-0.8 Cr, bal Fe.
For springs; for moderate high temperature use.

CHROME STEEL.
M-538; Cr bonded to steel.
For floor plates, reflectors, trim and moulding, toasters; resists heat to 1050°F; Cr bonded to steel.

CHROMET.
German; 10 Si, bal Al.
For bearings.

CHROME TIN.
M-538; Cr coated Sn.
For fabricated parts; easily formed, stamped, drawn.

CHROMETOUGH.
M-1724; 0.55 C, 0.55 Mn, 0.50 Cr, 0.20 V, bal Fe.
Oil hardening general purpose tool steel; for boring bars, chisels, rivet snaps.

CHROME WEAR.
M-115; 2.3 C, 0.7 Mn, 0.4 Si, 5.25 Cr, 4.75 V, 1.1 W, 1.1 Mo, bal Fe.
Heat treatable to high hardness and wear resistance; for tube manufacturing rolls, brick mold liners.
Type A7 air hardening tool steel.

CHROMEX 2.
Russia; 1.2-1.7 C, 32-35 Cr, 1.2-2.0 Si, bal Fe.
For furnace equipment; heat resistant, cast iron.

CHROMEX 3.
Russia; 1.8-2.8 C, 32-36 Cr, 1.5-2.5 Si, bal Fe.
For furnace equipment; heat resistant, cast iron.

CHROMIC-A
M-98; 20 Cr, 80 Ni.
Annealed: 100,000 TS; 40,000 YS, 35 El.
For resistors, heating elements; high electrical resistance, for service to 2150°F.

CHROMIC-C.
M-98; 18 Cr, 60 Ni, bal Fe.
Annealed: 95,000 TS; 35,000 YS; 35 El.
For resistors, heating elements; high electrical resistance, for service up to 1750°F.

CHROMIDIUM-1.
M-185; 3.2 T.C., 0.7 C.C., 2.2 Si, 0.25-0.45 Cr, 0.8 Mn, bal Fe.
Cast: 35,000-45,000 TS; 35,000-45,000 YS; 0 El; 0 RA; 200-250 Brin.
For auto engine blocks, cylinders, brake drums; wear resistant, cast iron.

CHROMIDIUM 2.
M-185; 3.1-3.5 C, 2.0-2.4 Si, 0.75-1.0 Mn, 0.2-0.4 Cr, bal Fe.
Cast: 37,000 TS; 200-240 Brin.
For brake drums, brake discs; Tr.S. 72,000; cast iron.

CHROMIN.
Germany.
For anodes for Cr-plating.

CHROMIUM BORIDE B401.
U.S.; CrB.
Sintered.
For high heat applications; operating temperature range above 2000°F.

CHROMIUM COPPER-182.
M-8; 99.14 Cu, 0.85 Cr, 0.01 Si.
Hard Rod: 70,000 TS; 60,000 YS; 20 El; B 82 Rock.
Soft Rod: 35,000 TS; 15,000 YS; 40 El.
For cable connectors, electronic devices, resistance welding electrode tips, grid supports, circuit breakers Age hardenable. Corrosion resistant.
Hardened elect. cond. 80%.

CHROMIUM-COPPER 999.
M-8; 99.05 Cu, 0.85 Cr, 0.10 Si
Soft: 35,000 TS; 15,000 YS; 40 El; 877 Brin.
Hard: 72,000 TS; 61,000 YS; 20 El.
For electrical apparatus; high conductivity.

CHROMNICKEL.
M-297; 20 Cr, 77 Ni, 2 Mn.
For heating resistances up to 1100°C.

CHROMNICKEL I.
M-297; 78 Ni, 20 Cr, 2 Mn
For furnace parts, electric heating elements; heat and corrosion resistant.

CHROMNICKEL II.
M-297, 70 Ni, 20 Cr, 2 Mn, 8 Fe
For electrical heating elements; heat and acid resistant

CHROMODUR-22.
M-72; 0.20 C, 12 Cr, 1 Mo, 0.4 Ni, 0.3 V, bal Fe
Annealed 90,000 TS, 40,000 YS, 22 El; B 95 Rock.
Heat treated: 240,000 TS, 200,000 YS; 8 El; 24 RA; C 50 Rock.
For gears, knives, shafts, hardware, surgical instruments.
Corrosion resistant, hardenable

CHROMODUR-33
M-72; 0.20 C, 12 Cr, 1 Mo, 0.4 Ni, 0.3 V, 0.5 W, bal Fe
Annealed: 95,000 TS; 40,000 YS; 25 El; B 92 Rock
Heat treated. 240,000 TS, 205,000 YS; 10 El; C 48 Rock.
For cutlery, hardware, knives, oil refinery and chemical plant equipment.
Corrosion resistant, hardenable.

CHROMOLD-CVM.
M-115; 0.06-0.12 C, 0.15-0.25 Si, 0.10-0.40 Mn, 0.010 max S, 0.010 max P, 2.15-2.45 Cr, bal Fe.
Heat treated: 110,000-120,000 TS; 70,000-90,000 YS; C 20-25 Rock in core and C 64 in case.
Plastic molds cavities.
Vacuum melted Case hardening steel. Easy hubbing for mold cavities.

CHROMO-LOY.
M-507; 3.0 C, 2.0 Si, 0.43 Mn, 21.6 Cr, 4.2 Mo, 3.4 Ni, bal Fe.
Coated, hardfacing electrode.
As arc welded: 70,000 psi, approx.; 56 Rc.
For overlay or buildup on roll crushers, shovel teeth, bucket lips and oil field tool joints; tough and wear resistant.

CHROMO-N.
M-24; 0.23 C, 1.25 Si, 0.75 Ni, 10 Cr, 1.2 Mo, 1.0 V, bal Fe.
For extrusion mandrels, hot work tools and dies; hot work steel.

CHRO-MOW.
M-38; 0.35 C, 1.05 Si, 5.0 Cr, 1.25 W, 0.35 V, 1.35 Mo, bal Fe.
Air harden to 51-53 Rc.
For hot work punches, shell piercing tools, mandrels for Al & Mg extrusion.
Type H12 Hot work tool steel.

CHROMSOL.
M-48; 62 Cr, 5 Mn, 1.5 Si, 5.25 C, bal Fe.
For chromium additions to steel melts.
Steel alloying agent.

CHROM SPECIAL
M-1114; 1.5 C, 11.5 Cr, 0.75 Mo, bal Fe.
For tools, dies, non-deforming.

CHROM SPECIAL EXTRA.
M-1114; 2.25 C, 13 Cr, bal Fe.
For tools, dies, non-deforming.

CHROM SPECIAL SUPRA.
M-1114; C, alloy, bal Fe.
For tools, cutters.

CHROM-SUPER SERVICE.
M-736; Cr, Sb, Pb, bal Sn
Cast
For Babbitt; antifriction

CHROMTEC 10680.
M-717
Nickel base alloy powder for steel, stainless, nickel alloys.

CHROM-X.
M-1059, ferrochrome, C, Si.
For chromium addition to steel, for alloy steels

CHRONIFER F 14
M-1730, 0.8-0.12 C, 1.0 Si, 1.0 Mn, 13 Cr, bal Fe
Hardenable chromium stainless steel.
Werkstoff Nr 1.4006, AISI-SAE 410.

CHRONIFER F 17
M-1730, 0.10 max C, 1.0 Si, 1.0 Mn, 16.5 Cr, bal Fe
Non-hardenable chromium stainless steel.
Werkstoff Nr 1.4016, AISI-SAE 430.

CHRONIFER SPEZIAL.
M-1730, 0.12 max C, 1.0 Si, 2.0 Mn, 18 Cr, 9 Ni, bal Fe.
Non-hardenable, austenitic stainless steel.
Werkstoff Nr. 1.4300; AISI-SAE 302.

CHRONIFER SPEZIAL 4 SUPRA
M 1730; 0.07 max C, 1.0 max Si, 2.0 max Mn, 17.5 Cr, 11.5 Ni, 2.25 Mo, bal Fe
Austenitic stainless steel.
Werkstoff Nr. 1.4401; AISI-SAE 316.

CHRONIFER SPEZIAL D.
M-1730; 0.15 max C, 1.0 Si, 2.0 Mn, 0.15 S, 19.0 Cr, 9.0 Ni, bal Fe.
Free machining austenitic stainless.
Werkstoff Nr. 1.4305, AISI-SAE 303

CHRONIFER SPEZIAL EXTRA.
M-1730; 0.10 max C, 1.0 max Si, 2.0 max Mn, 18.0 Cr, 10.0 Ni, Ti = 5 × C min, bal Fe.
Stabilized austenitic stainless steel.
Werkstoff Nr. 1.4541; AISI-SAE 321.

CHRONIFER SPEZIAL SUPRA.
M-1730; 0.07 max C, 1.0 max Si, 2.0 max Mn, 18.0 Cr, 10.0 Ni, bal Fe.
Austenitic stainless steel
Werkstoff Nr. 1.4301; AISI-SAE 304.

CHRONIFER V-13.
M-1730; 0.17-0.22 C, 1.0 max Si, 1.0 max Mn, 13.0 Cr, bal Fe.
Hardenable chromium stainless steel.
Werkstoff Nr. 1.4021; (AISI 420).

CHRONIKA 1565.
M-1292; 0.2 C, 57 Ni, 15 Cr, bal Fe.
For high temperature applications; X15NiCr5715; heat resistant.

CHRONIKA 2035.
M-1292; 0.15 C, 30 Ni, 21 Cr, bal Fe.
For high temperature applications; X15NiCr3021; heat resistant.

CHRONIKA 2080.
M-1292; 0.15 C, 77 Ni, 18 Cr, bal Fe.
For high temperature applications; X15NiCr7718; heat resistant.

CHRONIKA 2520.
M-1292, 0.15 C, 2 Si, 24 Cr, 19 Ni, bal Fe.
For furnace parts, heat treat boxes; X15CrNiSi2419, corrosion and heat resistant.

CHRONIN
Eng; 83.7 Ni, 14.7 Cr.
For resistance alloy.

CHRONIN "85"
M-303; 13 Cr, 85 Ni, bal Cu, Fe, Mn, Al impurities.
Annealed: 100,800 TS; 30 El
For electric resistances, resistors, thermocouple element against Ni; heat resistant to 1200°C.

CHRONIN "100"
M-303, 18 Cr, 80 Ni, bal Cu, Fe. Mn, Al.
Annealed 117,000 TS, 30 El
For electric resistances, resistors, thermocouple element; heat resistant to 1200°C.

CHRONIN 110
M-303; 20 Cr, 80 Ni
For electrical equipment, heating elements, resistors, heat and electrical resistance.

CHRONIT 14
M-1309, 0.20 C, 13.0 Cr, bal Fe.
Annealed. 95,000 TS, 50,000 YS, 25 El, B 92 Rock
Hardened. 250,000 TS, 215,000 YS; 8 El, C 52 Rock
For cutlery, surgical instruments, rules, gears, valves springs, pivots.
Corrosion resistant. Hardenable

CHRONIT 14 M
M-1309, 0.18 C, 13.0 Cr, 0.6 Mo, 0.7 Ni, bal Fe.
Annealed: 100,000 TS, 55,000 YS, 20 El, B 95 Rock
Hardened. 240,000 TS; 210,000 YS; 8 El; C 50 Rock
For cutlery, surgical instruments, gears, springs, valve parts
Corrosion resistant. Hardenable

CHRONIT 14 MS.
M-1309; 0.18 C, 13.0 Cr, 0.6 Mo, 0.7 Ni, others bal Fe
Annealed 100,000 TS; 55,000 YS, 20 El; B 95 Rock
Hardened: 240,000 TS; 210,000 YS, 8 El, C 50 Rock.
For cutlery, surgical instruments, gears, springs, valve parts.
Corrosion resistant. Hardenable.

CHRONIT 14 N.
M-1309, 0.17 C, 13 Cr, 1.1 Ni, bal Fe.
Annealed: 95,000 TS; 52,000 YS, 22 El; B 92 Rock
Hardened: 220,000 TS; 180,000 YS; 12 El; B 48 Rock.
For cutlery, surgical instruments, gears, springs, valve trim.
Corrosion resistant. Hardenable.

CHRONIT 14 P.
M-1309; 0.10 C, 12.3 Cr, 0.6 Mo, 0.5 Ni, bal Fe.
Annealed: 85,000 TS; 45,000 YS; 30 El; B 85 Rock.
For chemical and oil refinery equipment, valve trim.
Corrosion resistant.

CHRONIT 18 M.
M-1309; 0.20 C, 16.5 Cr, 1.2 Mo, 1.2 Ni, bal Fe.
Annealed: 80,000 TS; 45,000 YS; 26 El; 140 Brin.
For hardware, burner parts, oil refinery equipment, fasteners, furnace parts, storage tanks.
Corrosion resistant.

CHRONIT 18 N.
M-1309; 0.20 C, 16.5 Cr, 1.2 Ni, bal Fe.
Annealed: 82,000 TS; 43,000 YS; 28 El; 140 Brin.
For hardware, burner parts, oil refinery equipment, furnace parts.
Corrosion resistant.

CHRONIT 30.
M-1309; 1.0 C, 28.0 Cr, bal Fe.
Cast, ann: 260-330 Brin.
Ferrite-carbide structure; stainless and acid resistant cast steel.
DIN G-X120 Cr 29.

CHRONIT 30 C.
M-1309; 1.50 C, 28.0 Cr, bal Fe.
Cast, ann: 260-330 Brin.
Ferrite-carbide structure; stainless and acid resistant cast steel.

CHRONIT 30 M.
M-1309; 1.0 C, 28.0 Cr, 2.25 Mo, 1.25 Cu, bal Fe.
Cast, ann: 260-330 Brin.
Ferrite-carbide structure: stainless and acid resistant cast steel.
DIN G-X 120 Cr Mo 292

CHRONIT 30 MW.
M-1309; 0.70 C, 28.0 Cr, 2.25 Mo, bal Fe.
Cast, ann: 219-280 Brin.
Ferrite-carbide structure; stainless and acid resistant cast steel.
DIN G-X CrMo292.

CHRONIT 30 W.
M-1309; 0.70 C, 28.0 Cr, bal Fe.
Cast, ann: 210-280 Brin.
Ferrite-carbide structure; stainless and acid resistant cast steel.
DIN G-X 70 Cr29.

CHRONIT 165 M.
M-1309; 0.07 C, 16.0 Cr, 2.0 Mo, 6.0 Ni, others, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; B 80 Rock.
Precipitation hardenable to about 400 Brin
For chemical and pharmaceutical plant equipment digesters, valve trim, acid containers, tanks.
Corrosion resistant.

CHRONIT 216 U.
M-1309; 0.05 C, 15.5 Cr, 10.0 Ni, 0.5 Cb, 2.20 Cu, bal Fe.
Annealed: 75,000 TS; 30,000 YS; B 80 Rock.
For chemical plant equipment, welded structures.
Welding grade, stabilized. Stainless, non-magnetic, austenitic.

CHRONIT 218.
M-1309; 0.15 C, 18.0 Cr, 9.0 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 50 El; B 85 Rock.
Cold rolled: 150,000 TS; 100,000 YS; 25 El; B 100 Rock.
For chemical and pharmaceutical equipment, valve trim, fasteners, molding, acid tanks, digesters.
Stainless, austenitic, non-magnetic.

CHRONIT 218 E.
M-1309; 0.10 C, 18.5 Cr, 10.0 Ni, Cb = 8 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; B 82 Rock.
Cold rolled: 130,000 TS; 90,000 YS; 30 El; B 100 Rock.
For welded structures, chemical plant equipment, vessels, agitators. Austenitic, stabilized.
Welding grade, stainless, non-magnetic.

CHRONIT 218 S.
M-1309, 0.07 C, 18.5 Cr, 10.0 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; B 82 Rock.
Cold rolled: 130,000 TS; 90,000 YS; 30 El; B 100 Rock.
For chemical plant equipment, tanks, evaporators, agitators, kettles.
Stainless, austenitic, non-magnetic.

CHRONIT 274 R.
M-1309; 0.40 C, 27.0 Cr, 4.0 Ni, bal Fe.
Cast, ann 95,000-120,000 TS; 4 El; 210-260 Brin.
Ferrite-austenite-carbide structure.
Stainless and acid resistant cast steel.
DIN G-X CrNi274

CHRONIT 274 RM.
M-1309, 0.40 C, 27.0 Cr, 2.25 Mo, 4.0 Ni, bal Fe.
Cast, quenched: 210-260 Brin; 95,000-120,000 TS, 4 El.
Ferrite-austenite-carbide, stainless and acid resistant cast steel.

CHRONITE 275 RM.
M-1309, 0.10 C, 27.0 Cr, 1.5 Mo, 5.0 Ni, bal Fe.
Cast, quenched. 85,000-110,000 TS, 50,000 YS; 8 El, approx. 240 Brin
Ferrite-austenite structure; stainless and acid resistant cast steel.
DIN G-X10 CrNiMo 275

CHRONIT 418
M-1309, 0.15 C, 18.0 Cr, 2.25 Mo, 10.0 Ni, bal Fe
Annealed 90,000 TS; 40,000 YS; 40 El; B 85 Rock
Cold rolled 150,000 TS; 135,000 YS, 6 El, C 30 Rock
For chemical plant and oil refinery equipment digesters, valve trim, evaporators
Stainless, austenitic, non-magnetic

CHRONIT 418 E.
M-1309, 0.10 C, 17.5 Cr, 2.25 Mo, 11.5 Ni, Cb = 9 × C, bal Fe.
Annealed: 90,000 TS, 40,000 YS, 40 El; B 85 Rock.
Cold rolled. 140,000 TS, 130,000 YS, 9 El, C 26 Rock
For welded structures tanks, vessels, chemical plant and oil refinery equipment austenitic.
Welding grade, stainless, non-magnetic.

CHRONIT 418 ES
M-1309, 0.10 C, 17.5 Cr, 2.25 Mo, 11.5 Ni, Cb = 9 × C, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 50 El; B 82 Rock.
Cold rolled: 130,000 TS; 98,000 YS; 22 El; C 28 Rock.
For acid tanks, evaporators, kettles, chemical plant equipment. Austenitic, stabilized.
Welding grade, stainless, non-magnetic.

CHRONIT 418 S.
M-1309; 0.07 C, 18.0 Cr, 2.25 Mo, 11.0 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; B 82 Rock.
Cold drawn: 125,000 TS; 95,000 YS; 20 El; C 26 Rock.
For chemical plant equipment, kettles, agitators, evaporators.
Stainless, austenitic, non-magnetic.

CHRONIT 1417.
M-1309; 0.07 C, 17.0 Cr, 4.5 Mo, 13.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 35 El; 160 Brin.
For chemical and oil refinery equipment, digesters, acid tanks, agitators.
Austenitic, non-hardenable.
Welding grade, stainless, non-magnetic.

CHRONIT 1613.
M-1309; 0.12 C, 16.5 Cr, 13.0 Ni, 0.5 Cb, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 35 El; B 90 Rock.
For chemical and oil refinery equipment; welded structures, tanks, agitators, vessels.
Austenitic, welding grade. Stainless, non-magnetic.

CHRONIT 1618
M-1309; 0.08 max C, 17.5 Cr, 2.25 Mo, 20.0 Ni, 2.0 Cu, Nb = 8 × C, bal Fe.
Cast, quenched; 65,000-92,000 TS; 25,000 YS, 15 El, 130-180 Brin.
Acid resistant chrome-nickel austenitic cast steel.
DIN G-X8CrNiMoCu1818.

CHRONIT 1810 MN.
M-1309; 0.10 C, 17.5 Cr, 10 Ni, 10 Mn, bal Fe.
Annealed: 100,000 TS; 50,000 YS, 60 El; B 90 Rock.
For cooking utensils, dairy and chemical equipment, springs, sinks
Stainless, non-magnetic, austenitic.

CHRONIT 1811 N.
M-1309; 0.05 C, 17.0 Cr, 10.5 Ni, bal Fe.
Annealed: 80,000 TS, 30,000 YS, 50 El; B 80 Rock
Cold Drawn: 125,000 TS; 85,000 YS, 20 El; B 98 Rock.
For chemical plant equipment, agitators, evaporators, digesters, kettles Stainless, non-magnetic, austenitic.

CHRONIT 2025
M-1309, 0.08 C, 20.0 Cr, 2.75 Mo, 25.0 Ni, 2.0 Cu, Cb = 8 × C, bal Fe
Annealed 95,000 TS, 45,000 YS, 45 El, B 90 Rock.
For furnace parts, heat treating boxes, carburizing boxes, valves, pumps, jet engine parts Non-hardenable Welding grade, heat resistant, austenitic.

CHRONIT CNM100.
M-27; 0.7 C, 1.3 Mn, 1 Si, 1 Cr, 1 Ni, bal Fe.
Heat treated: 227,600 TS; 350 Brin
For machine tool parts, oil hardened.

CHRONIT CR150H.
M-27; 1.0 C, 1.4 Cr, bal Fe
Heat treated: 213,400 TS, 400 Brin
For machine tool parts; oil hardened, wear resistant.

CHRONIT CR150W.
M-27, 0.55 C, 1.6 Cr, bal Fe.
Heat treated: 199,200 TS; 380 Brin.
For wear resistant machine tool parts; oil hardened, wear resistant.

CHRONIT CSFG.
M-27, 0.60 C, 0.6 Mn, 1.7 Si, 0.8 Cr, bal Fe.
Heat treated: 184,900 TS; 380 Brin.
For wear resistant machine tool parts; oil hardened, wear resistant.

CHRONIT SPEZIAL KG.
M-27; 2.0 C, 12 Cr, bal Fe.
For blanking and forming dies; oil hardened, non-deforming.

CHRONIT VHS.
M-27; 0.6 C, 1.4 Si, 1.1 Mn, bal Fe.
Heat treated: 171,000 TS; 350 Brin.
For wear resistant parts, beaters; oil hardened, tough.

CHRONIT VM.
M-27; 0.45 C, 1.8 Mn, bal Fe.
Heat treated: 199,200 TS; 400 Brin.
For grinding plates, chain links; wear resistant.

CHRONIT VMG.
M-27; 1.3 C, 25 Cr, 4 W, 67 Co, 2 max Fe.
Cast: Rock C 42-45.
For hardfacing. Wear and corrosion resistant.

CHRONIT VMH.
M-27; 0.9 C, 1.8 Mn, bal Fe.
Heat treated: 171,000 TS; 350 Brin.
For wear resistant parts, punches; oil hardened.

CHRONIT ZII.
M-27; 2 C, 2 Cr, bal Fe.
Heat treated: 185,000 TS; 370 Brin
For wear resistant parts; oil hardened.

CHRONITHERM 20.
M-1309; 0.10 C, 2.0 Si, 0.5 Mn, 24.0 Cr, 19.0 Ni, bal Fe
Annealed: 95,000 TS; 43,000 YS, 48 El; B 90 Rock.
For heating elements.
Heat and oxidation resistant, austenitic.

CHRONITHERM 20/Spez
M-1309; 0.10 C, 2.6 Si, 0.5 Mn, 24.0 Cr, 19.0 Ni, bal Fe
Annealed: 95,000 TS; 43,000 YS; 46 El; B 90 Rock
For heating elements
Heat and oxidation resistant, austenitic

CHRONITHERM 30
M-1309, 0.07 C, 2.3 Si, 1.0 Mn, 19.5 Cr, 33.0 Ni, bal Fe.
For heating elements.
Heat and oxidation resistant

CHRONITHERM 30/Spez.
M-1309, 0.07 C, 2.3 Si, 1.0 Mn, 19.5 Cr, 33 Ni, bal Fe.
For heating elements.
Heat and oxidation resistant

CHRONITHERM 60.
M-1309, 0.10 C, 0.8 Si, 1.0 Mn, 17.5 Cr, 62.0 Ni, bal Fe
For heating elements.
Heat and oxidation resistant.

CHRONITHERM 60/Spez
M-1309, 0.10 C, 0.8 Si, 1.0 Mn, 17.5 Cr, 62.0 Ni, bal Fe
For heating elements
Heat and oxidation resistant.

CHRONITHERM 80
M-1309, 0.06 C, 1.6 Si, 0.2 Mn, 19.0 Cr, 77.0 Ni, bal Fe.
For heating elements.
Heat and oxidation resistant.

CHRONITHERM 80/Spez
M-1309; 0.06 C, 1.6 Si, 0.2 Mn, 19.0 Cr, 77.0 Ni, bal Fe
For heating elements
Heat and oxidation resistant.

CHRONOS.
M-27; 1.2 C, 12.5 Mn, bal Fe.
Heat treated. 142,000 TS; 44 El.
For rails, crusher mantles, cams, tappets, guide rails, gravel mills; abrasion resistant, austenitic.

CHRYSIODE.
92 Ag, 8 Al.

CHRYSITE.
Eng.; 63 Cu, 37 Zn, 0.24 Pb.
For dental alloy.

CHRYSOKALK-1.
Eng.; 95 Cu, 4.5 Zn, 0.5 Pb.
For cheap jewelry; tarnishes easily.

CHRYSOKALK-2.
Eng.; 59 Cu, 40 Zn, 1 Pb.
For tubes.

CHRYSOKALK-3.
Eng.; 91 Cu, 7.9 Zn, 1-6 Pb.
For cheap jewelry.

CHRYSORIN.
Eng.; 72-63 Cu, 28-37 Zn.
40,000-56,000 TS; 20,000-35,000 YS; 78-35 El; 78-63 RA.
For tubes, pipes, plumbing; high strength.

CHUGAL.
Russia; 2.5-3.2 C, 1.6-2.3 Si, 5.5-20.0 Al, bal Fe.
For furnace equipment; cast iron.

C.H.W.
M-73; 0.5 C, 2.75 Cr, 0.5 V, 15.0 W, bal Fe.
For dies, punches, shear blades, trimmers, hot work steel.

C.I.G. NO. 400.
M-734; 10 Sn, bal Cu.
For bronze welding rod; fluxed.

C.I.G. NO. 401.
M-734; Mn, Sn, bal Cu.
For bronze welding rod; fluxed.

CIMET, CAST.
M-44; 27-29 Cr, 11-13 Ni, bal Fe
For pumps, screens, valves, furnace parts, mining machinery; corrosion resistant to acid mine waters and many chemicals.

CINDAL.
M-737; 0.8 Zn, 0.3 Mg, 0.3 Cr, bal Al.
27,000-58,000 TS; 5-20 El.
For light alloy parts; heat treatable.

CINDAL ALLOY "J-551."
M-298; 5 Si, bal Al
22,000-26,000 TS; 11,000-15,000 YS; 17 15 El.
Used to resist acetic acid, edible oils, acids, beer, cider, fruit juices; stainless and non-corrosive in sea water.

CINDALL "50 A."
M-298; Al alloy.
36,000 TS; 22,500 YS; 1-1.5 El; 140 Brin.
Domestic castings, light gear wheels, light pulleys, bearings and bushings; to replace cast iron where lightness and corrosion resistance are required.

CINDALL "E-11 A."
M-298; Al alloy.
31,500 TS; 14,000 YS; 5-8 El; 66 Brin.
For water pipes, carburetor parts; sand or chill castings subjected to atmospheric, sea water, or other corrosive influences; boron modified.

CINDALL "E-11 B."
M-298; Al alloy.
36,000 TS; 18,500 YS; 4-6 El; 72 Brin.
For propellers, water cooled cylinders, cylinder heads, pump impellers, stern tubes, water pump bodies; sand castings, boron modified.

CINDALL "J-12."
M-298; Al alloy.
15,500-21,200 TS; 11,000-13,000 YS; 11-9 El.
For resistance to industrial waters and alkaline solutions, radiators, water meters; non-hardenable.

CINDALL ALLOY "J-51."
M-298; Al alloy.
20,000-24,000 TS; 9,000-11,000 YS; 28-24 El.
For parts to resist sea water, fruit acids, beer and cider vats; non-corrosive to sea water.

CINDALL "L-316."
M-298, Al alloy.
29,000 TS; 16,000 YS, 2-4 El, 68 Brin.
For exhaust manifolds, automobile parts; sand and die castings.

CINIDUR.
England; 0.25 C, 19 Cr, 24 Ni, 2 Mo, 1 W, 2.25 Ti 1.0 Al, bal Fe.
For high temperature applications, heat and corrosion resistant.

CINIDUR
U.S.; 0.25 C, 19 Cr, 24 Ni, 2 Mo, 1 W, 2.25 Ti, 1 Al, bal Fe
For oil refinery equipment, furnace parts, heat resistant

CINSEAL
M-269; 29 Ni, 53 Fe, 17.5 Co, 0.5 Mn.
For telecommunications, hermetic seals, metal-to-glass seal

CIRCLE "C"
M-115, 0.77 C, 9 Co, 18.5 W, 4.5 Cr, 2 V, 1.0 Mo, bal Fe
For tools, cutters, drills, tools for milling, slotting, forming, super high speed steel; tough heavy duty

CIRCLE M.
M-57; 0.85 C, 6 W, 5 Mo, 4 Cr, 2 V, 8 Co, bal Fe.
For drills, hobs, reamers, taps, broaches, cutters, high speed steel, Type T5

CIRCULAR SAW BIT
M 38, 0.75 C, 0.3 Mo, bal Fe
For saw teeth, water hardening

CIRCULAR SAW PLATE 55.
M 38, 0.67 C, 0.75 Ni, 0.6 Cr, 0.2 Mo, bal Fe
For saws, oil hardening

CITROEN
English, 12 Cu, 0.1 Mg, 0.5 Mn, 0.5 Fe, 0.5 Si, bal Al
For pistons, cast

CK 15
M-459, 0.15 C, 0.25 Si, 0.37 Mn, bal Fe
Annealed 70,000 TS, 40,000 YS, 25 El, 60 RA, 145 Brin.
For gears, shafts, machine tool parts, case hardened.

CK 22
M-459, 0.22 C, 0.25 Si, 0.45 Mn, bal Fe.
Annealed. 73,000 TS, 41,000 YS, 22 El; 58 RA; 140 Brin
For fan blades, bushings, gears, camshafts, water hardened, case hardened.

CK 35
M-459, 0.35 C, 0.25 Si, 0.55 Mn, bal Fe
Hot rolled: 85,000 TS; 54,000 YS; 30 El, 53 RA; 185 Brin.
For gears, shafts, axles, bolts; water hardened.

CK 45.
M-459; 0.45 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled. 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin.
For gears, bolts, axles, shafts, machine tool parts; water hardened.

CK 60.
M-459, 0.61 C, 0.25 Si, 0.65 Mn, bal Fe.
Heat treated: 160,000 TS, 113,000 YS; 12 El; 40 RA; 320 Brin.
For wheels, die blocks, springs, rails, girders; water hardened.

CLAMERS ALLOY.
25-5 Ni, 5-25 Co, bal Fe.
For electrical machinery; heat and corrosion resistant.

CLARITE.
M-35; 0.7 C, 18 W, 4 Cr, 1.1 V, 0.25 Mn, 0.6 Mo, bal Fe.
Ht. Tr. C 64 Rock; 400,000 bend strength, 300,000 torsion strength.
For lathe and planer tools, drills, punches, dies, cutters, springs
Type T 1 high-speed steel, high red-hardness.

CLARITE HW.
M-35; 0.55 C, 18 W, bal Fe.
For hot punches, chisels, upsetters; hot work steel, oil hardened.

CLARITE HW26.
M-35; 0.53 C, 18.0 W, 4.0 Cr, 1.0 V, bal Fe.
For punches, piercing tools, shear blades, forming rolls.
AISI Type H 26 hot work tool steel.

CLARITE HW50.
M-35; 0.53 C, 18 W, 4 Cr, 1 V, bal Fe.
For piercing punches, hot shell punches, hot blanking dies.
Hot work steel Type H 26

CLARITE-L
M-35, 0.60 C, 18 W, 1 V, 4 Cr, bal Fe.
For hot work tools and dies, punches, hot work steel

CLARITE M
M-35, 0.8 C, 18 W, 1 V, bal Fe
For hot work tools and dies; hot work steel

CLARK'S ALLOY
Eng, 75 Cu, 7.2 Zn, 14 Ni, 1.9 Co.
For chemical equipment, corrosion resistant

CLARK'S PATENT.
Eng, 75 Cu, 14 Ni, 7.2 Zn, 1.9 Sn, 1.9 Co.
For corrosion resisting parts; corrosion resistant.

CLARUS METAL
M-407, 1.5 Cu, 4 Si, bal Al.
For light alloy parts; will not oxidize, 60% stronger than Al.

CLASS "P."
M-210; 0.7-0.9 C, bal Fe.
For tools, punches, dies, engraved dies, trimming dies; water hardening.

CLAY-LOY
M-1529, 0.22 C, 1.25 Mn, 0.35 Si, 0.50 Cu, 0.20 V, bal Fe.
Rolled 70,000 TS, 50,000 YS.
For railroad and bus bodies; high strength, low alloy construction steel.

CLEBRIUM-1.
Eng.; 2 Ni, 13.1 Cr, 0.75 Mn, 3.6 Mo, 1.5 Si, 2.6 C, bal Fe.
For heat and corrosion resisting cast iron castings; high heat resistant.

CLEBRIUM-2.
Eng., 4.6 Ni, 18.3 Cr, 2.8 Mn, 2.0 C, 2 Cu, bal Fe.
For heat and corrosion resisting cast iron castings; heat and corrosion resistant.

CLEREMONT DRILL ROD.
M-38; 1.05 C, bal Fe.
For tools, pivots; drill rod.

CLEVITE NO. 8.
M-739; 7-9 Pb, 3.5-4.5 Sn, 4 Zn, bal Cu.
For wrist pin and transmission bearings; with steel backing.

CLEVITE NO. 10.
M-739; 9-11 Pb, 9-11 Sn, 0.5 max Zn, bal Cu.
For wrist pin and transmission bearings; with steel backing.

CLEVITE NO. 25.
M-739; 21.0-25 Pb, 3-4 Sn, 3 Zn, bal Cu.
For steering knuckle bushings; steel backing.

CLEVITE 77.
M-739; 22-26 Pb, 0.15-0.50 Sn, bal Cu, overlay 8-12 Sn, 2-3 Cu, bal Pb.
For bearings; with steel backing.

CLEVITE 100.
M-739; 9-11 Pb, 9-11 Sn, bal Cu.
For transmission bushings and washers; sintered on steel back.

CLEVITE 112.
M-739; 21-27 Pb, 1.75-2.75 Sn, bal Cu, overlay, 8-12 Sn, 2-3 Cu, bal Pb for bearings, with steel backing.

CLEVITE 153.
M-739; 3.5-4.5 Sn, 0.75-1.4 Cd, bal Al, overlay 8-12 Sn, 2-3 Cu, bal Pb.
For bearings, aluminum clad to steel.

CLEVITE 250.
M-739; 21-25 Pb, 3-4.0 Sn, bal Cu.
For transmission bushing and washers, sintered on steel back.

CLEVITE 500.
M-739; 44-58 Pb, 0.5-1.5 Sn, bal Cu, sintercast with steel backing.
For bearings.

CLICHIER METAL.
Eng ; 5 Pb, 80 Sn, 15 Bi.
For bearings, fuses; antifriction.

CLICHIER METAL.
Eng.; 33 Pb, 48 Sn, 9 Bi, 11 Sb.
For bearings, fuses; antifriction.

CLICHIER METAL.
Eng.; 50 Pb, 36 Sn, 14 Cd.
For bearings, fuses; antifriction.

CLICKER DIE.
M-357; 0.75 C, 0.25 Mo, bal Fe
For tools, knives; water hardening.

CLICKING DIE.
M-357; 0.4 C, 0.7 Cr, bal Fe.
For clicking dies; water hardening.

CLICKING DIE.
M-357; 0.55 C, 0.2 Mo, bal Fe.
For dies; water hardening.

CLIMAX 6-1.
M-151; 1.2-1.35 C, 5.5-6.75 Mn, 0.40-0.70 Si, 0.90-1.10 Mo, 0.05 max P, 0.50 max Cr, bal Fe.
Austenitic in water quenched condition.
Good abrasion resistance casting but less tough than Hatfield type manganese steel.
For ball-mill liners, ball mill discharge grates, grizzly screens, drag chain and crusher liners, scoop lips.

CLIMAX 6-2-1.
M-151; 1.05-1.20 C, 5.25-6.50 Mn, 0.30-0.70 Si, 1.5-2.0 Cr, 0.90-1.10 Mo, 0.05 max P, bal Fe.
Lean alloy casting, austenitic after quench.
Good abrasion resistance,-work hardenable.
For ball-mill liners and discharge grates, scoop lips, drag chain and crusher liners subject to rapid wear and moderate impact.

CLIMAX 12.
M-151; 3.0-3.5 C, 0.5-0.8 Mn, 0.5-0.8 Si, 11.0-14.0 Cr, 0.5-1.0 Mo, 1.0 max Cu, bal Fe.
Hardened: C 60-67 Rock.
For grinding balls, classifier wear shoes, shot blast wheel blades.
Martensitic casting.

CLIMAX 12-2 HCS.
M-151; 1.30-1.45 C, 12.0-14.0 Mn, 0.30-0.75 Si, 1.8-2.1 Mo, 0.05 max P, 0.50 max Cr, bal Fe.
Alloy casting, austenitic as quenched, work hardenable, high abrasion resistance and good toughness.
For crusher liners, scraper blades, heavy-duty grizzly screens.

CLIMAX 12-2 LCS
M-151, 1.15-1.30 C, 12.0-14.0 Mn, 0.30-0.75 Si, 1.8-2.1 Mo, 0.05 max P, 0.50 max Cr, bal Fe.
Alloy casting, austenitic as quenched, work hardenable, high abrasion resistance and good toughness
For crusher liners, scraper blades, heavy-duty grizzly screens

CLIMAX 15-2-1.
M-151, 2.8-3.5 C, 0.6-0.9 Mn, 0.4-0.8 Si, 14.0-16.0 Cr, 1.9-2.2 Mo, 0.8-1.2 Cu, bal Fe.
Casting, hardened: C 60-67 Rock
For rod and ball mill liners, tires and grinding rings for roller mill pulverizers

CLIMAX 15-3 HC.
M-151, 3.2-3.6 C, 0.70-1.0 Mn, 0.30-0.80 Si, 14.0-16.0 Cr, 2.5-3.0 Mo, bal Fe
High carbon grade martensitic white cast iron, hard and abrasion resistant
For shot blast impeller blades and liners, and sand pump impellers, jaw plates in small jaw crushers, garbage disposal wearing parts.

CLIMAX 15-3 LC
M-151, 2.4-2.8 C, 0.5-0.8 Mn, 0.30-0.80 Si, 14.0-16.0 Cr, 2.4-2.8 Mo, bal Fe.
Lower carbon grade martensitic white iron, hard and abrasion resistant
For heavier section castings for rod and ball mill liners, tires for roller mill pulverizers and heavy pulverized hammers.

CLIMAX 15-3 MC.
M-151; 2.8-3.2 C, 0.6-0.9 Mn, 0.30-0.80 Si, 14.0-16.0 Cr, 2.5-3.0 Mo, bal Fe.
Medium carbon grade martensitic white cast iron; hard and abrasion resistant
For die bushings in clay product molds, impact pulverizer blow bars, chute liners

CLIMAX 15-3 XHC.
M-151, 3.60-4.30 C, 0.70-1.0 Mn, 0.30-0.80 Si, 14.0-16.0 Cr, 2.5-3.0 Mo, bal Fe
Extra high carbon grade martensitic white cast iron; hard, brittle, abrasion resistant.
For unstressed liners and parts handling abrasive slurries without impact, and fluidized solids up to about 1200°F

CLIMAX 20-2-1.
M-151; 2.6-2.9 C, 0.6-0.9 Mn, 0.4-0.9 Si, 18.0-21.0 Cr, 1.4-2.0 Mo, 0.8-1.2 Cu, bal Fe.
Ann: C 38-43 Rock.
Hardened: C 60-67 Rock.
Alloy steel casting, martensitic as quenched.
For rod and ball mill liners, sand and dredge-pump parts, clay working machine parts, pulverizer impactor and blow bars.

CLIMAX ALLOY 42 replaced by CLIMAX 15-3.

CLIMAX 321.
M-151; 3.3-3.6 C, 1.75-2.25 Cr, 0.70-1.1 Mo, 2.75-3.25 Ni, bal Fe.
For ball mill parts, grinding balls, pug mill knives; martensitic, cast iron, abrasion resistant.

CLIMAX Cr13Mo.
M-151; 0.25-0.40 C, 0.4-0.6 Mn, 0.4-0.8 Si, 13-14 Cr, 0.6-0.75 Mo, bal Fe.
Annealed: 180-220 Brin.
Hardened: 500-550 Brin.
For grinding mill liners, sand and dredge pump castings.
Abrasion and corrosion resistant

CLIMAX FERROMOLYBDENUM.
M-151; 58-64 Mo, 1.0 max Si, 0.10 max C, bal Fe.
For metallurgical applications in steel and cast iron; Mo-additions.

CLIMAX MACHINERY.
M-38; 0.35 C, Mn, bal Fe
For shafts, gears, pinions.

CLIMAX POWDER METALLURGY MOLYBDENUM.
M-151; made from powder 99.95 min Mo.
Sintered parts and wrought products from sintered parts.
For glass melting electrodes, glass furnace hardware, electrical and electronic parts, furnace heat shields, heating elements and supports.

CLIMELT LOW-CARBON MOLYBDENUM.
M-151, 99.97 min Mo, 0.005 max C
Vacuum arc melted
For space power generator parts, grinding quills, chemical handling equipment, machined components

CLIMELT Mo-30W.
M-151, 30 W, bal Mo.
At 72° F 121,500 TS, 106,900 YS; 26 El; 40 RA; 198 Brin
At 1800° F. 65,700 TS; 25 El; 77 RA; 80 Brin.
For high temperature applications; high heat resistance, has excellent resistance to attack by molten zinc and certain other liquid metals

CLIMELT MOLYBDENUM
M-151; 99.94 min Mo, 0.03 max C.
Vacuum arc melted.
For rocket nozzle parts, electrical and electronic parts, spot welding tips, brazing contacts, boring bars, furnace heating elements and supports

CLIMELT TZM.
M-151, 0.01-0.04 C, 0.40-0.55 Ti, 0.06-0.09 Zr, bal Mo
At 72° F· 144,000 TS; 129,000 YS, 21 El; 46 RA; 172 Brin.
At 1600° F. 88,000 TS, 48,000 YS; 21 El, 76 RA; 82 Brin.
For high temperature applications, heat engines, heat exchangers; heat and corrosion resistant, high strength and hardness at elevated temperatures.

CLINCHING SCREW WIRE.
Eng.; 69 Cu, 29.5 Zn, 1.5 Pb.
For brass screws.

CLIPPER.
M-335; 0.73 C, 18.0 W, 4.0 Cr, 1.1 V, bal Fe.
For cutting tools.
AISI T1. High speed steel

CLOCK BRASS-243.
M-8; 37 Zn, 2 Pb, 62 Cu.
Hard: 75,000 TS, 60,000 YS, 10 El.
Soft: 45,000 TS; 17,000 YS; 50 El.
For clock gears and frame, meter parts; free milling.

CLOMO.
M-111; 0.97 C, 1.15 Cr, 0.32 Mo, bal Fe.
For hollow mine drills; oil hardening.

CLOVERLEAF.
M-741; Sn, Pb, bal Cu.
For bearings, bushings.

CLUNISE.
Eng.; 40 Cu, 32 Ni, 25 Zn, 2.6 Fe.
For decorative parts.

C.L.W.
M-73; 0.30 C, 3.5 Cr, 0.5 V, 9 W, bal Fe.
For extrusion and trimming dies, punches, shears; hot work steel.

CLYDALL 5 SPECIAL.
M-1569; 0.78 C, 4 Cr, 5.5 Co, 1.35 V, 18.5 W, bal Fe.
Annealed: 240 Brin.
For broaches, drills, lathe and planer tools; high speed steel.

CLYDALL 12 SPECIAL.
M-1569; 0.78 C, 4 Cr, 12 Co, 1.35 V, 22 W, bal Fe.
Annealed: 240 Brin.
For roll turning tools, tool bits, cutters; high speed steel.

CLYDE ALLOY.
M-742; 0.3-0.6 C, bal Fe.
For machinery parts; water hardening.

CLY-DIE.
M-233; 0.10-0.30 C, 13 Cr, bal Fe
Annealed: 95,000 TS, 50,000 YS, 25 El; 55 RA; 195 Brin
For plastic mold dies; corrosion resistant.

CLYDMO.
M-1569, 0.83 C, 4 Cr, 5 Mo, 1.8 V, 6.25 W, bal Fe.
Annealed 240 Brin
For lathe and planer tools, reamers, hobs, drills; high speed steel

CM.
M-365; 0.38 C, 1.0 Si, 5.0 Cr, 0.45 V, 1.25 Mo, bal Fe.
Air or oil hardening hot work tool steel for forging dies, and hot forming tools. AISI H11.

CM25.
Germ.; 0.3-0.4 C, Cr, 0.2 V, bal Fe.
For turbine blades for jet engines, water hardening.

CM 469.
M-1491, M 73; 0.03 C, 60 Cr, 25 Mo, 14 Fe.
For jet engine parts
High heat and oxidation resistant

CM 718.
M-1491; 0.08 C, 20 Cr, 52 Ni, 0.4 Co, 5.25 Cb, 3 Mo, 0.83 Ti, 0.55 Al, 0.004 B, 0.02 Cu, bal Fe.
Annealed: 120,200 TS, 53,400 YS, 0.45 El.
Aged: 191,000 TS; 172,000 YS, 22 El; C 45 Rock.
For aircraft structural parts operating at 800-1400° F
High oxidation and corrosion resistance.

C.M.A.1
M-452; 10-15 Mn, 7-8 Al, 2.5-3.5 Fe, bal Cu.
Cast: 94,000-105,000 TS; 40,000-49,000 YS; 20-35 El; 165-200 Brin.
For propellers, marine hardware.
Aluminum bronze.

C.M.A. BEARING METAL.
Eng.; Pb, alkali earth metals.
For bearings.

CMC.
M-459; 0.45 C, 1.4 Cr, 0.7 Mo, 0.3 V, bal Fe.
For gears, bolts, crankshafts, upsetters; oil hardened, tough.

CM L-605.
M-1491; 0.12 C, 1.65 Mn, 19.8 Cr, 9.9 Ni, 15.2 W, 1.6 Fe, bal Co.
At R.T.: 144,300 TS; 65,400 YS; 55 El.
At 1400° F: 73,000 TS; 49,000 YS; 20 El; C 25 Rock.
For jet engine afterburners, exhaust cone assemblies, nozzle diaphragm valves, high temperature springs, turbine buckets. Good oxidation and corrosion resistance.

CM N-155.
M-1491; 0.10 C, 1.5 Mn, 20.75 Cr, 19.85 Ni, 19.5 Co, 2.95 Mo, 2.35 W, 1.15 Cb, 0.2 Cu, bal Fe.
At R.T.: 112,000 TS; 57,000 YS; 41 El; B 77 Rock.
At 1500° F: 39,000 TS; 25,000 YS; 35 El.
For turbine rotors and blading, afterburner rings, rocket chambers. High oxidation and corrosion resistance.

C.M.P.
M-740; 0.2 C, 0.7 Ni, bal Fe.
For machinery parts; precision cold rolled strip steel.

CMP (3).
M-533; 0.95 C, 1.25 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, cutters; oil hardened, non-deforming.

CM-R41.
M-1491; 0.09 C, 19 Cr, 11 Co, 10 Mo, 3 Ti, 1.5 Al, bal Ni.
At 70° F: 206,000 TS; 154,000 YS, 14 El.
At 1500° F: 126,000 TS; 118,000 YS, 14 El.
For jet engine components and high speed airframes. Afterburners, turbine casings, combustion liners, fasteners.
Precipitation hardening. High temperature alloy. Vacuum melted

CMS.
M-459; 0.45 C, 1.3 Mn, 2.0 Cr, 0.3 Mo, bal Fe.
For upsetting tools, liners and containers in extrusion presses, forging die blocks; shock resistant.

C.M.S.
M-743; 0.10-0.20 C, 1.2-1.5 Mn, 0.075-0.15 S, bal Fe.
Rolled: 80,000 TS; 75,000 YS; 22 El, 49 RA; 192 Brin.
For machinery parts; free machining.

CMSZ.
M-48; 40-56 Cr, 4-6 Mn, 13-21 Si, 1.25-1.75 Zr, 3-5 C, bal Fe.
For ladle additions of Cr to cast iron; for harder and stronger iron.

CMSZ-4 MIXTURE.
M-48; 45-49 Cr, 4-6 Mn, 18-21 Si, 1.25-1.75 Zr, 3-4.5 C, bal Fe.
For ladle additions of Cr to cast iron; no increase in chill.

CMSZ-5 MIXTURE.
M-48; 50-56 Cr, 4-6 Mn, 13.5-16 Si, 0.75-1.25 Zr, bal Fe.
For ladle additions of Cr to cast iron; no increase in chill.

CMW.
M-365; 0.35 C, 5 Cr, 1.3 W, 1.7 Mo, 1 Si, bal Fe.
For hot work tools, die casting dies; hot work steel.

CM-WASPALLOY.
M-1491; 0.06 C, 0.08 Mn, 0.01 S, 0.004 P, 0.1 Si, 20.5 Cr, 14.2 Co, 4.2 Mo, 3.0 Ti, 1.5 Al, 0.03 Zr, 0.003 B, 0.05 Fe, 0.05 Cu, bal Ni.
Annealed: 121,400 TS; 69,700 YS; 54 El; B 90 Rock.
Aged: 186,000 TS; 138,000 YS; 26 El; C 39 Rock.
For jet engine turbine buckets and discs, high temperature bolts, missile systems
Precipitation hardened. High temperture strength.

CNK2.
M-459; 0.3 C, 18 Cr, 8 Ni, 1.5 W, bal Fe.
For cutlery, plastic mold dies, valves; stainless, austenitic.

C N M.
M-200; C, Cr, Ni, bal Fe.
For alloy steel castings; wear resistant.

C.N.S.
M-69; 1.5 C, 11-12 Cr, 0.8 Mo, 0.20 V, bal Fe.
For blanking, forming, drawing dies, punches, shear blades, cold work dies; air-hardening, nonshrinkable

C.N.S.-1 see JESSOP CNS-1.

C.N.S.-2.
M-69, 2.15 C, 12 Cr, 0.25 Co, 0.18 V, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming.

CNS2H.
M-459, C, Cr, Ni, W, bal Fe.
For mandrels, stamps, bakelite dies; oil hardened.

CNS-TH.
M-459; 0.25-0.3 C, 1-1.3 Cr, 4.5 W, 0.3-0.5 Mo, bal Fe.
For drop forging dies, oil or water hardening.

COANAILIUM
M-218; Al alloy
For marine parts, corrosion resistant.

COAST NO 1.
M-1060, 4.0 C, 16 Cr, 6 Ni, bal Fe.
Cast. 420-550 Brin
For hard facing welding rod; austenitic, wear and heat resistant

COAST NO 4.
M-1060, 4.0 C, 16 Cr, 6 Ni, 5 Si, bal Fe.
Cast. 600-630 Brin.
For hard facing welding rod, austenitic, wear and heat resistant.

COAST NO. 7.
M-1060; 3.0 C, 25 Cr, 12 Ni, 8 Mo, bal Fe.
Cast. 300-450 Brin.
For hard facing welding rod, heat and abrasion resistant.

COAST NO. 8.
M-1060, 3.0 C, 16 Cr, 6 Ni, 20 Co, bal Fe.
Cast· 400-530 Brin.
For hard facing welding rod, heat and abrasion resistant.

COAST NO. 9.
M-1060; 1.0 C, 29 Cr, bal Fe.
Cast: 450-550 Brin.
For hard facing welding rod; heat resistant; discontinued.

COAST NO. 10.
M-1060; 4 C, 16 Cr, 2 Ni, 8 Mo, bal Fe.
Cast: 480-600 Brin.
For hard facing welding rod; non-magnetic, hot abrasion resistant.

COAST NO. 11.
M-1060; C, Cr, Ni, bal Fe.
Cast: 450-560 Brin.
For hard facing electrode; corrosion resistant; discontinued.

COAST NO. 15.
M-1060; 4 C, 16 Cr, 4 Ni, 6.5 Mo, 20 Co, bal Fe.
Welded: 530-560 Brin.
For hard facing rod for acetylene welding; corrosion and wear resistant, tough, hard.

COAST NO. 17.
M-1060; 3 C, 40 Cr, 8 Mo, 30 Co, 1 Si, bal Fe.
Welded: 530-600 Brin.
For acetylene welding rod for chemical equipment; corrosion and abrasion resistant.

COAST NO. 18.
M-1060; 3.0 C, 25 Cr, 15 Ni, 8 Mo, 30 Co, 1 Si, bal Fe.
Cast: 400-470 Brin.
For hard-facing electrode; heat and abrasion resistant.

COAST NO. 19.
M-1060; 1 C, 35 Cr, 2 Cu, bal Fe.
Welded: 300-400 Brin.
For acetylene welding rod for rolling mills; heat and abrasion resistant.

COAST NO. 40
M-1060; 3 C, 30 Cr, 40 Ni, 14 W, bal Fe.
Welded: 380-420 Brin
For acetylene welding rod for valves; corrosion, heat and wear resistant.

COAST NO 50
M-1060, 93.25 Ni, 3.5 Si, 2.25 B, 1 others
Cast: 390-440 Brin
High temperature nickel brazing alloy, M.P. 1825°F
For thin walled joints, wide or close tolerance joints, oxidation resistant.

COAST NO. 50B.
M-1060; 2.5 Si, 1.5 B, bal Ni.
Metal powder for repair brazing of castings; overlays on dies and molds; machinable

COAST NO 50C.
M-1060; 3.0 Si, 1.8 B, bal Ni
Brazing alloy for casting repairs, overlays on dies and molds; machinable Metal powders.

COAST NO 52.
M-1060; 91.25 Ni, 4.5 Si, 4.5 B, 1 others.
Cast: 570-620 Brin.
For brazing alloy; M.P 1825°F; oxidation resistant High strength joints.

COAST NO. 52 SPECIAL.
M-1060; 4.5 Si, 0.15 C, 20.0 Co, 2.9 B, bal Ni.
For brazing high temperature alloys.
Brazing temperature 2150 2175°F.

COAST NO. 53.
M-1060; 82.1 Ni, 4.5 Si, 2.9 B, 7 Cr, 3 Fe, 0.5 others.
Cast: 570-620 Brin.
For brazing alloy, M.P. 1825°F, oxidation resistant.

COAST NO. 54.
M-1060; 0.35 C, 9.0 Cr, 2.5 Si, 2.1 Fe, 1.66 B, bal Ni.
Metal powder for repair or build-up on valves, valve seats; average hardness 38 Rock C; machinable.

COAST NO. 55.
M-1060; 0.35 C, 10.0 Cr, 4.35 Si, 4.0 Fe, 2.1 B, bal Ni.
Metal powder for build-up or repair on pump sleeves, wear rings; average hardness 45 Rock C.

COAST NO. 56.
M-1060; 72.5 Ni, 4 Si, 3.75 B, 16 Cr, 4 Fe, 1 others.
Cast: 570-620 Brin.
For brazing alloy; M.P. 1880°F; oxidation resistant.

COAST NO. 60.
M-1060; Ni-Cr-Si.
Alloy powder for nuclear brazing.

COAST NO. 62.
M-1060; Mn-Ni-Co.
Alloy powder for brazing wide gaps and for high temperature strengths with good corrosion resistance, on such alloys as Rene 41, 15-7 Mo, A-286, tungsten. AMS 4780

COAST NO. 80A
M-1060, Mo, Cr, W, bal Ni
For hard facing electrode; corrosion and abrasion resistant.

COAST NO 81.
M-1060; 30.0 Mo, 5.0 Fe, 2.0 B, bal Ni
Metal powder for repair or build-up of chemical and petro-chemical plant equipment, excellent corrosion resistance

COAST NO 90
M-1060, 3 C, 5 Cr, 3 Ni, bal Fe
For hard surfacing electrode; resists abrasion and impact, acetylene welded.

COAST NO 91A
M-1060; C, Cr, bal Fe
For hard facing electrode; abrasion and impact resistant.

COAST NO 92A
M-1060, C, Cr, Si, Mn, bal Fe.
For hard facing electrode, impact and abrasion resistant

COAST NO 96A
M-1060, C, Cr, Mn, Si, bal Fe
For hard facing electrode; work hardens, wear resistant

COAST NO 98A.
M-1060, Cr, Mn, Si, bal Fe
For hard facing electrode, corrosion and impact resistant

COAST NO 100X.
M-1060; 1 C, 3 Cr, 3 Ni, 7 Mo, bal Fe.
For hard facing electrodes, arc welding, can be forged.

COAST NO. 100X
M-1060; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
Cast: 450-530 Brin
For hard facing welding rod, high speed steel.

COAST NO. 101.
M-1060, 4.0 C, 16 Cr, 6 Ni, bal Fe.
Cast 420-550 Brin
For hard facing welding rod, austenitic, wear and heat resistant.

COAST NO. 104
M-1060; 4.0 C, 16 Cr, 6 Ni, 5 Si, bal Fe.
Cast: 530-600 Brin
For hard facing welding rod; austenitic, wear and heat resistant.

COAST NO. 107.
M-1060; 3.0 C, 25 Cr, 12 Ni, 8 Mo, bal Fe.
Cast. 300-430 Brin.
For hard facing welding rod; heat and abrasion resistant.

COAST NO. 108.
M-1060; 3.0 C, 16 Cr, 6 Ni, 20 Co, bal Fe.
Cast: 400-530 Brin.
For hard facing welding rod; heat and abrasion resistant.

COAST NO. 110.
M-1060; 4 C, 16 Cr, 2 Ni, 8 Mo, bal Fe.
Cast: 480-600 Brin.
For hard facing welding rod; non-magnetic, hot abrasion resistant.

COAST NO. 111.
M-1060; C, Cr, Ni, bal Fe.
Cast: 450-560 Brin.
For hard facing electrode; corrosion resistant; discontinued.

COAST NO. 112.
M-1060; 4.0 C, 16 Cr, 6 Ni, 8 Mg, bal Fe.
Cast: 520-590 Brin.
For hard facing electrode; resists heat and dry abrasion.

COAST NO. 115.
M-1060; 4 C, 16 Cr, 4 Ni, 6.5 Mo, 20 Co, bal Fe.
For hard facing rod for arc welding; corrosion and wear resistant.

COAST NO. 117.
M-1060; 3 C, 40 Cr, 8 Mo, 30 Co, 1 Si, bal Fe.
Welded: 530-600 Brin.
For arc welding rod for chemical equipment, corrosion and abrasion resistant.

COAST NO. 118.
M-1060; 3.0 C, 25 Cr, 15 Ni, 8 Mo, 30 Co, 1 Si, bal Fe.
Cast: 400-470 Brin.
For hard facing welding rod; heat and abrasion resistant.

COAST NO 119.
M-1060; 1 C, 35 Cr, 2 Cu, bal Fe.
Welded: 300-400 Brin.
For arc welding rod for rolling mills; heat and abrasion resistant.

COAST NO. 140.
M-1060; 3 C, 30 Cr, 40 Ni, 14 W, bal Fe.
For arc welding rod for valves, corrosion, heat and wear resistant.

COAST NO. 190.
M-1060; 3 C, 5 Cr, 3 Ni, bal Fe.
For hard surfacing electrodes; resists abrasion and impact, arc welded.

COAST NO. 1600-N.
M-1060; Mn-Cu-Ni.
Wire, powder or foil for brazing and welding 300 and 400 stainless steels, AM 350, H 11, and SAE 4130 steels.

COAST CM-119.
M-1060.
For hard facing, hot friction guides; resists molten Cu.

COAST METAL.
M-1060; Fe, Cr, Ni, Mo, C.
For hard facing rod; discontinued; wear and corrosion resistant.

COAST METALS NP.
M-1060; 50 Ni, 30 Fe, 12 Si, 4 P, 4 Mo.
For brazing stainless steel atomic fuel elements for service in 565°F. pressurized water.
Corrosion resistant.

COAST NO. X.
M-1060; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
Cast: 450-530 Brin.
For hard facing welding rod; high speed steel.

COAST NO. X.
M-1060; 1 C, 3 Cr, 3 Ni, 7 Mo, bal Fe.
For acetylene welding rod for hot shears; forgeable, tough.

COATING METAL 560.
M-88; 95 Pb, 2.5 Sn, 2.5 Zn.
For coated iron for roofing, pipes.

COBAFLUX "B."
M-24; 0.90 C, 4.5 Cr, 9 W, 19 Co., bal Fe.
For cutting tools.

COBAL 1.
M-111; 1 C, 6.5 Cr, 1 Mo, 7.5 Co, bal Fe.
For permanent magnets.

COBAL 3.
M-111; 0.95 C, 0.7 Mn, 5.7 Cr, 4.5 W, 15.5 Co, bal Fe.
For permanent magnets.

COBAL 4.
M-111; 0.85 C, 0.7 Mn, 5.5 Cr, 4.5 W, 35 Co, bal Fe.
For permanent magnets.

COBALT.
M-140; 0.74 C, 18 W, 4 Cr, 1 V, 5 Co, 0.8 Mo, bal Fe.
For lathe and planer tools, reamers, hobs, broaches, drills; high speed steel, oil hardened.

COBALT.
M-344; 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe.
For tools, cutters; high speed steel

COBALT I
M-459, 0.7 C, 18 W, 4 Cr, 1.6 V, 0.6 Mo, 9.5 Co, bal Fe.
For lathe and planer tools, hobs, drills, broaches; high speed steel, oil hardened.

COBALT 1
M-677; 2-3 C, 0.4-2.0 Si, 26-35 Cr, 11-14 W, 3 max Ni, 1 max Mo, bal Co.
For bare (1B) and coated (1C) hard-facing electrodes; grades R Co Cr-C and F Co Cr-C.

COBALT II.
M-459, 0.8 C, 4.2 Cr, 0.65 Mo, 1.6 V, 18.5 W, 5 Co, bal Fe
For lathe and planer tools, reamers, broaches, taps; high speed steel, oil hardened

COBALT 2.
M-677, 2-3 C, 1 max Si, 29-35 Cr, 16-19 W, 2.5 max Ni, bal Co
For bare hard-facing electrodes, abrasion resistant at high temperatures.

COBALT III
M-459; 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe.
For lathe and planer tools, drills, hobs, reamers; high speed steel, oil hardened.

COBALT III.
M-459; 0.8 C, 4.25 Cr, 0.6 Mo, 2.25 V, 12.5 W, 2.75 Co. bal Fe.
For tools, dies, cutters; high speed steel.

COBALT III, NX.
M-459; 0.8 C, 4.25 Cr, 0.6 Mo, 2 V, 10 W, 2.5 Co, bal Fe.
For tools, dies, cutters; high speed steel.

COBALT 6.
M-677; 0.9-1.4 C, 0.4-2.0 Si, 26-32 Cr, 3-6 W, 3 max Ni, 1 max Mo, bal Co.
For bare (6B) and coated (6C) hard-facing electrodes, grades RCoCr-A and ECoCr-A.

COBALT 7.
M-677; 0.2-0.4 C, 25-29 Cr, 2-4 Ni, 5-6 Mo, bal Co.
For bare (7B) and coated (7C) hard-facing electrodes; impact resistant, crack resistant.

COBALT 12.
M-677; 1-2-1.7 C, 26-32 Cr, 7-9.5 W, 3 max Ni, 1 max Mo, bal Co.
For bare (12B) and coated (12C) hardfacing electrades; grades RCoCr-B and ECoCr-B.

COBALT 17%
M-1076; 0.75 C, 6 W, 17 Co, bal Fe.
For permanent magnets; Br 9500 Hc 150.

COBALT 36%.
M-1076; 4 Cr, 5 W, 0.85 C, 36 Co, bal Fe.
For permanent magnets; Br. 8500, Hc 240.

COBALT 125
M-459; 1 C, 1.1 Mn, 8.5 Cr, 1.25 Mo, 6.25 Co, bal Fe.
For permanent magnets.

COBALT 160.
M-459, 1 C, 8.5 Cr, 1.5 Mo, 10.5 Co, bal Fe.
For permanent magnets.

COBALT 200.
M-459, 1 C, 8.5 Cr, 1.5 Mo, 15.5 Co, bal Fe.
For permanent magnets.

COBALT 300.
M-459. 0.9 C, 4.5 Cr, 0.3 Mo, 30 Co, 4.5 W, bal Fe.
For permanent magnets

COBALT ALUMINUM BRONZE
M-1228, 10.50 Al, 3.50 Fe, 2.50 Co, bal Cu
Cast 90,000 TS; 45,000 YS, 15 El, 20 RA, 180 Brin
Forged: 120,000 TS 80,000 YS, 10 El, 12 RA; 241 Brin
For pump bodies, shafting, heavy loaded bearings, impellers, steel mill slippers and screwdown nuts
Wear and corrosion resistant.

COBALT CHROME-FM.
M-73, 1.35 C, 12.5 Cr, 0.3 Ni, 3 Co, 8 Mo, 0.15 S, bal Fe
Hardened C 64-66 Rock
For burnishing tools, valves, punches, broaches.
High abrasion and corrosion resistance.
Non-deforming, air hardening.

COBALTCROM.
M-40, C, 3.7 Co, 13.6 Cr, bal Fe
For dies, broaches, cutters, valves; nonscaling.

COBALT CHROME.
M-73, 1.35 C, 12.5 Cr, 0.3 Ni, 3.0 Co, 0.8 Mo, bal Fe.
For broaches, burnishing tools, valves, punches, high abrasion resistance, non-deforming.

COBALTCROM KXK STAINLESS.
M-40; 1.0 C, 18 Cr, 1.1 Co, 0.2 V, 1.1 Mo, bal Fe.
For dies, press tools, pump valves; corrosion and abrasion resistant.

COBALTCROM PRK-HT
M-40, C, Co, Cr, bal Fe.
For welding rod; coated

COBALTCROM STAINLESS.
M-40, 3.3 Co, 18 Cr, 0.75 Mo, 1.10 C, 0.25 V, 0.30 Mn, bal Fe.
For special cutlery and corrosion resisting parts; air hardening steel; non-deforming.

COBALT HIGH SPEED.
M-81 0.7 C, 4 Cr, 18 W, 5 Co, bal Fe.
For high speed cutting tools, dies; high speed steel.

COBATLOY.
M-950; 1.5 C, 0.9 Mo, 12 Cr, 0.5 V, 3.25 Co, bal Fe.
For hot forming dies; abrasion resistant.

COBALT MAGNET.
M-373; C, alloy, bal Fe
For magnet.

COBALT MAGNET 37%.
M-73, 0.90 C, 2.5 W, 4 Cr, 37 Co, bal Fe.
For electrical equipment, permanent magnets; magnet steel.

COBALT MAGNET STEEL (17%).
M-260, M-38, C, Cr, W, Co, bal Fe.
For permanent magnets.

COBALT MAGNET STEEL (35%).
M-260, M-38; C ,Cr, W, Co, bal Fe
For permanent magnets.

COBALT SPECIAL
M-459; 0.7 C, 18 W, 1 Mo, 4 Cr, 2 V, 15 Co, bal Fe.
For planer and shaper tools, hobs, taps, drills; reamers; high speed steel, oil hardened.

COBANIC.
M-61, 55 Ni, 45 Co, 0.1 C, bal Fe
Annealed. 65,000-80,000 TS 38 El
For vacuum tube filament wire, heat and corrosion resistant

COBANIC
M 897, 54.5 Ni, 44.5 Co, 1 Fe.
Annealed 80,000 TS; 60,000 YS, 25 El.
For cathodes and filaments in electronic tubes, heat resistant

COBEND 1
M-677, 2.0-3.0 C, 26-33 Cr, 11-14 W, 3 Max Ni, 1 max Mo, bal Co.
Welded: 45-48 Rc
For hardfacing electrodes; Grade ECoCr-C, resists metal to metal wear

COBEND 6.
M-677; 0.9-1.4 C, 26-32 Cr, 3-6 W, 3 max Ni, 1 max Mo, bal Co
Welded: 37-40 Rc, work hardened: 47-51 Rc.
For hardfacing electrodes, grade ECoCr-A, resists abrasion, corrosion, galling, oxidation, erosion in 1200-1800°F range

COBEND 7
M-677 0.2-0.4 C, 25-29 Cr, 2-4 Ni, 5-6 Mo, bal Co.
Welded 34-37 Rc, work hardened 47-40 Rc.
For hardfacing electrodes, resistant to cracking, erosion, hot abrasion

COBEND 7W.
M-677, 0.25-0.45 C, 24-26 Cr, 4.5-6 W, 2-4 Ni, 4.5-6 Mo, bal Co
Welded: 35-37 Rc
For hardfacing electrodes; for cutting edge of hot forming tools.

COBEND 12.
M-677, 1.2-1.7 C, 26-32 Cr, 7-9.5 W, 3 max Ni, 1 max Mo, bal Co.
Welded 35-39 Rc.
For hardfacing electrodes; grade ECoCr-B.

COBENIUM
M-61, 40 Co, 20 Cr, 15 Ni, 7 Mo, 2 Mn, 0.04 Be, 0.15 C, bal Fe.
Cold worked: 250,000-300,000 TS; 240,000-290,000 YS; 1 El; 60 RA; 372 Brin.
For springs, high temperature applications; heat treatable, corrosion and heat resistant.

COBITE.
M-35 0.7 C, 18 W, 4 Cr, 0.65 Mo, 8 Co, 2 V, bal Fe.
For reamers, broaches, milling cutters, shaper and lathe tools; high speed steel; AISI Type T5.

COBRA.
M-1422; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
Hardened: C 64-66 Rock.
For cutters, lathe and planer tools, reamers, hobs, form cutters.
High-speed steel, Type T1, high red hardness.

COCHROME.
English; 60 Co, 24 Fe, 12 Cr, 2 Mn.
For heating elements, filaments; high heat resistance.

COCHROME.
M-503; 0.3 C, 1.2 Cr, 0.3 Mo, bal Fe.
For valve and valve fittings, castings for 250 lb steam pressure; high strength.

COCK BRONZE.
England; 8-10 Sn, 2-6 Zn, bal Cu.
For cocks, fittings, hardware; corrosion resistant.

CODE-ROD NO 120.
M-1096; 0.08-0.13 C, 0.45-0.65 Mn, 0.15-0.25 Si, 0.03 S, 0.03 P, bal Fe.
Welded: 70,000-75,000 TS; 60,000-65,000 YS; 22-27 El 50-55 RA.
For all-purpose welding rod; AWS-E6012.

COE BRONZE
M-8, 89.5 Cu, 10.5 Sn.
Hard sheet: 115,000 TS; 95,000 YS, 5 El; 190 Brin.
Soft Sheet: 60,000 TS; 40,000 YS; 65 El, 74 Brin.
For gears; tough.

Co-ELINVAR
U.S.; 57-60 Co, 25-35 Fe, 8-15 Cr
For instruments; constant modulus

Co-ELINVAR.
M-104, M-373; 36 Ni, 12 Cr, Co, bal Fe
For chronometers, hair springs controlled expansion.

COFLEX.
M-237; bimetal.
For thermostatic bimetal; corrosion resistant

COG BRONZE.
England, 11 Sn, 4 Zn, bal Cu
For cogs, worms, tough, corrosion resistant.

COGNE CX.
M-1450, 0.38-0.45 C, 13 Cr, bal Fe.
Annealed: 100,000 TS, 55,000 YS; 20 El; 50 RA; 210 Brin.
For bearings, valves, cutlery, surgical instruments; Type 420; corrosion resistant

COGNE FEOX.
M-1450; 0.07-0.12 C, 17 Cr, bal Fe.
Annealed. 80,000 TS 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refinery equipment, oil burners and heaters, dairy and food equipment; Type 430; corrosion resistant

COGNE FNOX.
M-1450; 0.25 max C, 17 Cr, 2 Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS, 20 El; 55 RA; 260 Brin.
For pumps, marine hardware, valves; Type 431; corrosion and heat resistant.

COGNE IOX1.
M-1450; 0.13-0.18 C, 13 Cr, bal Fe.
Annealed: 85,000 TS; 45,000 YS; 25 El 55 RA; 200 Brin.
For valves, cutlery, surgical instruments, turbine blades; Type 410 and 420; corrosion resistant.

COGNE IOX3.
M-1450; 0.26-0.37 C, 13 Cr, bal Fe.
Annealed: 85,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For valves, cutlery, turbine blades, surgical instruments, Type 420; corrosion resistant.

COGNE IOXA.
M-1450; 0.06 C, 13 Cr, 0.2 Al, bal Fe.
Annealed: 70,000 TS 42,000 YS, 25 El; 160 Brin.
Cold Drawn. 85,000 TS, 70,000 YS; 20 El; 185 Brin.
For annealing boxes, quenching racks, oil refinery equipment; not hardenable.
Type 405 stainless steel, magnetic.

COGNE-IOXKM
M-1450, 0.11 C, 12.75 Cr, 0.5 Mo, bal Fe.
Annealed 75,000 TS; 35,000 YS; 30 El, B 92 Rock
For springs, table flatware, oil refinery equipment.
Corrosion resistant, hardenable

COGNE IOXO.
M-1450, 0.09-0.12 C, 13 Cr, 0.5 max C, bal Fe.
Annealed. 75,000 TS, 40,000 YS, 35 El, 70 RA 155 Brin
For turbine blades, valves, cutlery, surgical instruments, Type 403, corrosion resistant

COGNE IOXOO
M-1450; 0.08 max C, 13 Cr, bal Fe.
Annealed 75,000 TS, 40,000 YS, 35 El, 70 RA, 155 Brin.
For turbine blades, valves, cutlery, surgical instruments; Type 403 and 410; corrosion resistant

COGNE KXO2
M-1450, 0.15 max C, 13 Cr, 2 Ni, bal Fe
Annealed 80,000 TS, 40,000 YS, 32 El, 68 RA, 160 Brin
For oil refinery equipment, Type 414, corrosion resistant

COGNE LIOX
M-1450, 0.08-0.16 C, 12 Cr, 12 Ni, bal Fe
For valves, pump parts, corrosion resistant

COGNE NIOX
M-1450, 0.10 C, 18 Cr, 8 Ni, bal Fe.
Annealed 80,000 TS, 35,000 YS; 55 El, 75 RA; 155 Brin
For chemical plant equipment, mixers, tanks, filters; Type 301 and 302, austenitic, stainless

COGNE NIOX-C.
M-1450, 0.06 C, 18 Cr, 12 Ni, 0.5 Cb, bal Fe
Annealed 90,000 TS, 40,000 YS, 55 El, B 82 Rock
Cold Drawn: 100,000 TS, 65,000 YS, 40 El, B 95 Rock
For exhaust manifolds, steam pipes, radiant superheaters, welded structures
Type 347 stainless steel, stabilized, austenitic.

COGNE NIOX-D
M-1450; 0.11-0.16 C, 18 Cr, 8 Ni, bal Fe.
Annealed 80,000 TS, 35,000 YS, 55 El, 75 RA, 155 Brin
For chemical plant equipment, tanks, mixers, filters; Type 302, austenitic, stainless

COGNE NIOX-L.
M-1450; 0.03 max C, 18-20 Cr, 8-12 Ni, bal Fe.
Annealed: 77,000 TS; 30,000 YS, 60 El; 110 Brin.
Cold Drawn: 100,000-180,000 TS; 50,000-125,000 YS, 10-50 El; 180-330 Brin
For kitchen utensils, architectural trim, welded components, chemical and textile plant equipment.
Type 304L stainless steel.

COGNE NIOX-M.
M-1450; 0.10 max C, 19 Cr, 12 Ni, 3.5 Mo, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 48 El; 62 RA; 170 Brin.
For acid resistant chemical plant equipment; Type 317; stainless, austenitic.

COGNE NIOX-MT .
M-1450; 0.12 max C, 18 Cr, 8 Ni, 2.5 Mo, Ti, bal Fe
Annealed. 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For welded acid resistant chemical plant equipment, Type 316 Ti; stainless, austenitic.

COGNE NIOX-S
M-1450, 0.08 max C, 18-20 Cr, 8-12 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 150 Brin.
Cold Drawn: 100,000-180,000 TS; 50,000-125,000 YS; 10-50 El, 180-330 Brin
For kitchen equipment, architectural trim, welded components, chemical and textile plant equipment Type 304 stainless steel.

COGNE NIOX-T.
M-1450, 0.08 max C, 18 Cr, 8 Ni, Ti, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 55 El, 65 RA, 150 Brin.
For welded chemical plant equipment, tanks, mixers; Type 321, stainless, austenitic

COGNE RIOX
M-1450, 0.25 max C, 25 Cr, 20 Ni, 1.5 max Si, bal Fe
Annealed 100,000 TS, 45,000 YS, 50 El, 65 RA; 185 Brin
For furnace parts, valves, pumps, turbine and jet parts, Type 310 and 314, stainless, austenitic

COGNE SIOX
M-1450, 0.40 C, 10 Cr, 1 Mo, 2.5 Si, bal Fe
For oil refinery equipment, creep and heat resistant.

COGNE VIOX
M-1450, 0.20 max C, 24 Cr, 12 Ni, bal Fe
Annealed 90,000 TS, 40,000 YS, 50 El, 65 RA; 170 Brin
For furnace parts, heat treat boxes, pumps, oil burners, Type 309, corrosion and heat resistant

COINAGE BRONZE
U.S., 3-4 Sn, 1-2 Zn, bal Cu
For coins, corrosion resistant

COLALLOY
M-744; 2 Mg, 1 Mn, 1 Si, bal Al
Heat treated 12,000-61,000 TS, 20-110 Brin
For chemical and food handling equipment, corrosion resistant

COLD HEADER NO 4
M-336, 1.0 C, 0.3 Mn, 0.2 Si, bal Fe.
For cold heading dies; water hardened

COLD HEADER VANADIUM.
M-69; 1.0 C, 0.25 Mn, 0.2 Si, 0.20 V, bal Fe.
Water hardenable to 60 Rock C.
Can be tempered to desired hardness from 200°F to 800°F
For taps, dies, punches and pneumatic tools
AISI Type W 2 water hardening tool steel .

COLD HEADING #4
M-122, 63.5 Cu, 36.5 Zn.
60,000 TS; 35,000 YS, 42 El; 75 RA; 112 Brin.
For cold upsetting work, rivets, thread rolled products; for cold deformation.

COLD HOT (see Finkl Cold Hot).

COLD HUBBING DIE.
M-38; 0.7 C, bal Fe.
100 Brin.
For cold hubbing dies; carburizing steel.

COLDIE.
M-140; 0.90 C, 0.20 V, 0.25 Si, 0.25 Mn, bal Fe.
For blanking and forming dies, rivet sets; water hardened; Type W 2

COLD STRIKING DIE.
M-38, 0.9 C, bal Fe.
For dies for flatware; medium deep hardening

COLD TRIMMER DIE.
M-38; 0.95 C, 0.65 Cr, bal Fe.
For trimmer dies; oil or water hardening.

COLESCO.
77 Pb, 8 Sn, 14 Sb, 1 Cu.
For bearings

COLFORM "e.t.d." 1527.
M-669, 0.22-0.29 C, 1.20-1.50 Mn, 0.15-0.30 Si, bal Fe.
Cold finished: 120,000 min TS; 92,000 min YS; 14 El; 25-34 min Rc.
For cold forming or cold heading without subsequent heat treatment for strong parts.

COLFORM "e.t.d." 1541 A.
M-669, 0.40-0.45 C, 1.30-1.65 Mn, 0.15-0.30 Si, bal Fe
Cold finished: 150,000 min TS, 130,000 min YS; 120,000 min proof strength; 32 min Rc
For cold forming or cold heading without subsequent heat treatment for strong parts.

COLFORM "e.t.d." 1541 B.
M-669, 0.36-0.44 C, 1.35-1.65 Mn, 0.15-0.30 Si, bal Fe.
Cold finished: 140,000 min TS, 125,000 min YS; 10 El, 28 min Rc.
For cold forming or cold heading without subsequent heat treatment for strong parts

COL-GRAPH
M-35; 1.45 C, 0.8 Mn, 1.2 Si, 0.2 Cr, 0.25 Mo, bal Fe
For blanking dies, gages, machine parts, taps, wear plates
AISI Type 06 oil hardening tool steel.

COLLET BRASS
U.S., 61 Cu, 37 Zn, 2.5 Pb.
For hot forged parts, collets; free-cutting.

COLLEX.
M-501, M-912, 0.40 C, 0.40 Si, 0.30 Mn, 13 Cr, bal Fe
Annealed: 95,000 TS; 50,000 YS, 25 El; 55 RA; 200 Brin
For cutlery, valves, surgical instruments, Type 420, corrosion resistant

COLMO 1100
M-530, 0.10-0.15 C, 0.3 Si, 0.6 Mn, 0.6 Mo, 0.3 V, 0.3 Ti, bal Fe
For high temperature applications, high creep strength

COLMONOY NO. 1.
M-963; 0.9 C, 11 Cr, 2.5 B, 1.75 Si, 0.4 Mn, bal Fe.
Cast: 58-63 Rock C
For hard facing alloy, abrasion resistant.

COLMONOY NO. 2
M-963, 3.0 C, 8.25 Cr, 1.5 Ti, 1.25 Mn, 0.75 Si, bal Fe.
Weld: C 50 Rock (approx), M.P. 2150°F (approx).
Coated electrode for hard facing bucket lips, muller tires, grader blades; good abrasion resistance.

COLMONOY NO. 4.
M-963; 0.45 C, 10 Cr, 2 B, 2.25 Si, 2.5 Fe, bal Ni.
Cast: 35-40 Rock C.
For hard facing alloy; corrosion and heat resistant.

COLMONOY NO. 5.
M-963; 0.65 C, 11.5 Cr, 2.5 B, 3.75 Si, 4.25 Fe, bal Ni.
Cast: 45-50 Rock C.
For hard facing alloy; corrosion and heat resistant.

COLMONOY NO. 6.
M-963; 0.75 C, 13.5 Cr, 3 B, 4.25 Si, 4.75 Fe, bal Ni.
Cast: 56-61 Rock C.
For hard facing alloy; corrosion and heat resistant.

COLMONOY NO. 8.
M-963; 0.95 C, 26.0 Cr, 3.3 B, 4.0 Si, 1.0 Fe, bal Ni.
Weld: C 53-58 Rock.
For hard facing by spray welder.
Resists oxidation and corrosion.
High abrasion resistance.

COLMONOY No 15.
M-963; 93.0 Cu, 7.0 P.
Hardness: B 78-82 Rock; M P. 1460°F (approx.)
Powder for buildup or braze welding of copper and copper alloys.

COLMONOY NO. 20.
M-963; 0.25 C, 5 Cr, 1 B, 3 Si, 3.5 Fe, bal Ni.
Cast: 15-20 Rock C.
For glass mold repairs; corrosion and heat resistant

COLMONOY NO. 21.
M-963; 0 25 C, 5.0 Cr, 3.25 Si, 1 25 B, 1.0 Fe, bal Ni.
As cast: C 26-31 Rock; M.P. 2050°F (approx).
For medium hard facing for glass container molds; heat, impact and corrosion resistant.

COLMONOY NO. 22
M-963; 0 1 C, 3 15 Si, 0.75 Fe, 1.25 B, bal Ni
Cast: C 28-33 Rock: M P. 1925°F (approx).
Atomized powder for machinable buildup on shafts and worn or undersize parts; good impact resistance.

COLMONOY NO. 23A.
M-963; 0 1 C, 1.0 Fe, 2.3 Si, 1.25 B, bal Ni.
Cast: C 17-22 Rock; M.P. 1950°F (approx)
Atomized powder for machinable buildup on shafts and worn or undersize parts; good impact resistance

COLMONOY NO. 24.
M-963; 0.1 C, 2 3 Si, 1 0 Fe, 1.25 B, bal Ni.
Cast: C 17-22 Rock; M.P. 1950° (approx).
Atomized powder for machinable buildup on shafts and worn or undersize parts; good impact resistance.

COLMONOY NO. 43.
M-963; 0.45 C, 10.0 Cr, 2.75 Fe, 2.75 Si, 2 0 B, bal Ni.
Cast: C 35-40 Rock, M.P. 2025°F (approx).
For building up and surface finishing shafts and wear surfaces; machinable with carbide tools; impact resistance better than Colmonoy No. 53.

COLMONOY NO. 53.
M-963; 0.65 [illegible], 11 5 Cr, 4.25 Fe, 3.75 Si, 2.5 B, bal Ni.
Cast: C 45-50 Rock; M.P. 1950°F (approx).
For hard facing shafts, wear surfaces; good red hardness, corrosion resistance, and improved shock resistance.

COLMONOY NO. 56.
M-963; 0.7 C, 12.5 Cr, 2.75 B, 4 Si, 4.5 Fe, bal Ni.
Cast: 50-55 Rock C.
For hard facing alloy; abrasion, galling and corrosion resistant.

COLMONOY NO. 62.
M-963; 0.75 C, 14.5 Cr, 4.5 Si, 4.5 Fe, 3 5 B, bal Ni.
Cast· C 58-63 Rock; M.P. 1875°F (approx).
For hard surfacing shafts, sleeves, valve trim; good resistance to abrasion, corrosion and galling.

COLMONOY NO. 63.
M-963; 0.75 C, 14 5 Cr, 4.5 Fe, 4.5 Si, 3.5 B, bal Ni.
Cast: C 58-63 Rock; M P 1875°F (approx).
For hard surfacing by Fusewelder Torch, on shafts, sleeves, valve trim; good resistance to abrasion, corrosion and galling.

COLMONOY NO. 69.
M-963; 0.06 C, 15.0 Cr, 4 0 Si, 3 35 B, 2 75 Cu, 2.75 Mo, 2 5 Fe, bal Ni.
Cast· C 58-63 Rock; M.P. 1900°F (approx).
For hard surfacing, usually by Spraywelder, for shafts, sleeves, valve trim; good resistance to heat, abrasion, corrosion and galling

COLMONOY NO 70.
M 963; 0 4-0 7 C, 10-13 Cr, 1 7 3 2 B, 15-17 W, 2.5-4.0 Si, 2 5-4.0 Fe, bal Ni
As cast· 50-55 Rock C
For hard facing; wear, heat and corrosion resistant

COLMONOY NO 72.
M-963; 0 75 C, 13 0 Cr, 12 0 W, 3 6 Si, 3.5 Fe, 2 7 B, bal Ni
Cast C 58-63 Rock; M.P. 2050°F (approx)
For hard surfacing; excellent resistance to fretting corrosion and abrasion

COLMONOY NO 75.
M-963, 0 70 C, 13.5 Cr, 3 B, 4.2 Si, 4 75 Fe, WC, bal Ni
Rockwell C 54-59
For hard facing; resists galling and abrasion.

COLMONOY NO 221
M-963; 2 75 C, 16 Cr, 1 Si, 1 Mo, 1 5 Mn, bal Fe.
Weld metal· 43-48 Rock C
Electrode wire for hard facing; wear and abrasion resistant

COLMONOY NO HC240.
M 963, 4 3 C, 24 0 Cr, 3.0 Si, 2 9 Mn, bal Fe.
Cast C 60 Rock (approx)
Wire for semi-automatic welder for buildup of hard, abrasion resistant surfaces having good red hardness.

COLMONOY NO C-290
M-963, 0 45 C, 2 5 Si, 37 0 Ni, 1.5 B, 13.25 Cr, bal Fe
For hard facing by Spraywelder, building up shaft bearing surfaces

COLMONOY NO. 705.
M-963; Colmonox No. 63 with tungsten carbide particles added.
Cast· C 58-63 Rock; M.P 1900°F (approx).
For hard facing surfaces requiring extreme abrasion resistance as buffing fixtures.

COLMONOY SWEAT ON PASTE.
82 Cr, 18 B.
Rockwell C 70.
For welding hard facing alloy paste, wear and abrasion resisting.

COLONIAL NO. 6.

M-34, M-115; 0.95 C, 1.3 Mn, 0.5 Cr, 0.15 V, 0.5 W, bal Fe.

Hardened: 140,000 TS; 120,000 YS; 8 El; 30 RA; 302 Brin.

For blanking dies, chasers, gages, hobs, master tools; non-shrinking, oil hardening.

COLONIAL NO. 7.

M-115; 0.6-1.4 C, 0.18 V, bal Fe.

For tools, chisels, pneumatic riveters, cutting tools, thread cutting dies, tough, shock and vibration resistant.

COLONIAL NO. 14.

M-115; 0.6-1.2 C, bal Fe.

For tools; water hardening.

COLONIAL NO. 100.

M-1393, 4.5-5.7 Sn, 2.75-4.0 Pb, 1.0-9.5 Zn, bal Cu.

For bearings, pump impellers; free-cutting.

COLONIAL NO. 101.

M-1393; 4.5-5.75 Sn, 2-3 Pb, 9.5-16 Zn, bal Cu.

For bushings, bearings, pump impellers, free-cutting

COLONIAL NO 110.

M-1393, 4.5-5.5 Sn, 4.25-7.0 Pb, 2.0-7.0 Zn, bal Cu.

For pump impellers, bushings, bearings; free-cutting, red brass.

COLONIAL NO. 115.

M-1393, 4.0-5.5 Sn, 4.25-7.0 Pb, 4.0-10.0 Zn, bal Cu.

Cast: 33,000-46,000 TS. 17,000-24,000 YS; 15-35 El; 12-32 RA; 55-65 Brin.

For hardware, plumbing, red brass, free-cutting.

COLONIAL NO 120.

M-1393, 3.0-4.5 Sn, 6-10 Pb, 5-10 Zn, bal Cu

Cast 30,000-38,000 TS, 12,000-17,000 YS; 15-27 El; 12-25 RA, 50-60 Brin.

For hardware, plumbing; red brass, free-cutting

COLONIAL NO 123

M-1393, 2-4 Sn, 5-8 Pb, 6-18 Zn, bal Cu

Cast 29,000-39,000 TS; 13,000-17,000 YS; 18-30 El; 15-27 RA, 50-60 Brin

For hardware, plumbing, plumbers brass, free-cutting

COLONIAL NO. 125.

M-1393; 2-4 Sn, 5-8 Pb, 6-18 Zn, bal Cu.

Cast 30,000-40,000 TS, 12,000-16,000 YS, 20-35 El; 15-30 RA, 50-60 Brin.

For hardware, plumbing, plumbers brass, free-cutting.

COLONIAL NO 130.

M 1393, 1-3 Sn, 4-10 Pb, 8-20 Zn, bal Cu.

For hardware, plumbing; free-cutting

COLONIAL NO. 131

M-1393; 1-2 Sn, 1-2 Pb, 2-8 Zn, bal Cu.

For hardware, plumbing; free-cutting.

COLONIAL NO. 132.

M-1393; 1-3 Sn, 1-3 Pb, 86-88 Cu, bal Zn.

For hardware, plumbing; free-cutting.

COLONIAL NO 193.

M-1393; 21-23 Sn, 0.50 max others, bal Cu.

For bearings.

COLONIAL NO. 194.

M-1393; 18-20 Sn, bal Cu.

For bearings.

COLONIAL NO. 195.

M-1393; 16-18 Sn, bal Cu

For bearings.

COLONIAL NO. 196.

M-1393; 14-16 Sn, bal Cu.

For bearings.

COLONIAL NO. 197.

M-1393; 13-15 Sn, 1.5 max Zn, 0.2 Pb, bal Cu.

For bearings.

COLONIAL NO. 198.

M-1393; 12.5-14.5 Sn, 2.5-4.5 Zn, 1 max Pb, bal Cu.

For bearings.

COLONIAL NO. 199.

M-1393; 12-14 Sn, bal Cu.

For bearings.

COLONIAL NO. 200.

M-1393; 10.75-12.25 Sn, 0.75-1.25 Pb, 0.1 max Zn, bal Cu.

For bearings; free-cutting

COLONIAL NO. 201.

M-1393; 10.75-12.0 Sn, 0.8-1.2 Pb, 1-4 Zn, bal Cu.

For bearings.

COLONIAL NO. 205.

M-1393; 9.75-12.0 Sn, bal Cu.

For bearings.

COLONIAL NO. 206.

M-1393, 9-11 Sn, 1.0-2.5 Pb, bal Cu.

For bearings.

COLONIAL NO. 210.

M-1393, 9.0-10.7 Sn, 1-7 Zn, 0.2 max Pb, bal Cu.

For bearings.

COLONIAL NO. 215.

M-1393; 9.0-10.7 Sn, 1-7 Zn, 0.8-1.2 Pb, bal Cu.

For bearings.

COLONIAL NO. 220

M-1393; 9.0-10.7 Sn, 1.2-2.7 Pb, 1-5 Zn, bal Cu.

For bearings

COLONIAL NO. 221.

M-1393; 9.0-10.7 Sn, 2.7-4.2 Pb, 1-5 Zn, bal Cu.

For bearings.

COLONIAL NO 225.

M-1393, 7.5-9.7 Sn, 1-7 Zn, 0.2-0.4 Pb, bal Cu.

For bearings

COLONIAL NO. 230.

M-1393; 7.5-9.0 Sn, 0.80-1.2 Pb, 1-7 Zn, bal Cu.

Cast: 33,000-43,000 TS; 16,000-24,000 YS; 18-30 El; 15-30 RA; 60-75 Brin.

For bearings; Gun Metal.

COLONIAL NO. 235

M-1393, 7.5-9.0 Sn, 1.2-2.7 Pb, 1-6 Zn, bal Cu.

For bearings.

COLONIAL NO. 240.

M-1393; 7.5-9.0 Sn, 2.7-4.2 Pb, 1-6 Zn, bal Cu

For bearings.

COLONIAL NO. 241.

M-1393, 7.5-9.0 Sn, 4.2-6.2 Pb, 1-6 Zn, bal Cu.

For bearings.

COLONIAL NO. 242.

M-1393; 6-8 Sn, 0.5 max Zn, bal Cu.

For bearings.

COLONIAL NO. 245.

M-1393; 5.7-7.5 Sn, 1-2 Pb, 1-7 Zn, bal Cu.

Cast: 34,000-42,000 TS; 16,000-21,000 YS; 20-35 El; 16-30 RA; 60-70 Brin.

For valves, pump parts, free-cutting.

COLONIAL NO. 250.

M-1393; 5.7-7.5 Sn, 2.0-3.2 Pb, 2-6 Zn, bal Cu.

For bearings.

COLONIAL NO. 251.

M-1393; 5.7-7.5 Sn, 3.2-5.2 Pb, 1-6 Zn, bal Cu.

For bearings.

COLONIAL NO. 253.
M-1393; 4.5-5.7 Sn, 1-2 Pb, 1-9 Zn, bal Cu.
For bearings.

COLONIAL NO. 255.
M-1393; 4.0-5.7 Sn, 2.0-2.7 Pb, 1-4 Zn, bal Cu.
For bearings.

COLONIAL NO. 256.
M-1393; 3.0-4.5 Sn, 1.7-3.0 Pb, 1-9 Zn, bal Cu.
For bearings.

COLONIAL NO. 257.
M-1393; 3-4 Sn, 0.5-1.0 Pb, 85-90 Cu, bal Zn.
For bearings.

COLONIAL NO. 295.
M-1393; 15-17 Sn, 4-6 Pb, 0.25-1.0 Zn, bal Cu.
For bearings.

COLONIAL NO. 296.
M-1393; 12-14 Sn, 14-16 Pb, 0.5 max Zn, 0.5-1.0 Ni, bal Cu.
For bearings.

COLONIAL NO. 296.5.
M-1393; 10.5-12.5 Sn, 7-10 Pb, bal Cu.
For bearings.

COLONIAL NO 297.
M-1393; 9.5-11.5 Sn, 4.2-6.0 Pb, 0.75-1.5 others, bal Cu.
For bearings.

COLONIAL NO 298
M-1393; 9-11 Sn, 4.2-6.2 Pb, 1-5 Zn, bal Cu.
For bearings.

COLONIAL NO. 299.
M-1393; 9-11 Sn, 9-11 Pb, 0.15-0.75 Zn, bal Cu.
For bearings.

COLONIAL NO. 300.
M-1393; 9.0-10.7 Sn, 8.5-11.7 Pb, 0.25 max Sb, bal Cu.
For bearings

COLONIAL NO 301.
M-744; 0.1 C, 18 Cr, 8 Ni, bal Fe
Annealed. 72,000 TS; 57,000 YS; 32 El; 50 RA; 110 Brin
For chemical plant equipment, Type 301; stainless, austenitic

COLONIAL NO. 305.
M-1393; 9.0-10.7 Sn, 8.5-21.7 Pb, 0.75-1.5 others, bal Cu.
Cast: 27,000-37,000 TS, 15,000-22,000 YS; 6-12 El; 5-11 RA, 55-70 Brin
For bearings; bearing bronze

COLONIAL NO 310
M-1393; 7.5-9.0 Sn, 7.2-8.7 Pb, 0.75-1.5 others, bal Cu
For bearings.

COLONIAL NO. 311.
M-1393; 7.5-9.0 Sn, 7.2-8.7 Pb, bal Cu.
For bearings.

COLONIAL NO. 312
M-1393; 7.5-9.0 Sn, 8.7-11.0 Pb, 0.75-1.5 others, 3.0 max Zn, bal Cu.
For bearings.

COLONIAL NO. 313
M-1393; 7.5-9.0 Sn, 12-16 Pb, 0.25-0.50 Ni, bal Cu.
For bearings.

COLONIAL NO. 314.
M-1393; 7.5-9.0 Sn, 12-16 Pb, 0.25-0.75 others, bal Cu.
For bearings.

COLONIAL NO. 315.
M-1393; 5.5-7.5 Sn, 6.0-10.5 Pb, 4 max Zn, 0.75-1.5 others, bal Cu.
Cast: 30,000-38,000 TS; 17,000-21,000 YS; 12-20 El; 10-22 RA; 55-65 Brin.
For bearings, bushings; bearing bronze.

COLONIAL NO. 319.
M-1393; 5.7-7.5 Sn, 12-16 Pb, 0.75-2.0 others, bal Cu.
Cast: 25,000-30,000 TS; 14,000-20,000 YS; 10-18 El, 8-15 RA; 50-60 Brin.
For bearings, bushings; bearing bronze.

COLONIAL NO. 320.
M-1393; 5.7-7.5 Sn, 16.7-29.7 Pb, 3.0 max Zn, bal Cu.
For bearings

COLONIAL NO 321.
M-1393; 5.7-7.5 Sn, 16-29 Pb, 0.75-1.5 others, bal Cu
For bearings.

COLONIAL NO. 322.
M-1393, 4.0-5.7 Sn, 21-26 Pb, 1.5 max others, bal Cu
Cast: 23,000-30,000 TS, 11,000-15,000 YS; 7-16 El; 5-12 RA, 42-55 Brin.
For bearings, bushings, bearing bronze.

COLONIAL NO. 323.
M-1393; 4-6 Sn, 21.7-26.0 Pb, 0.5 max Zn, bal Cu.
For bearings.

COLONIAL NO 324
M-1393; 4.0-5.7 Sn, 26-32 Pb, 0.75-1.5 impurities, bal Cu
For bearings

COLONIAL NO 325.
M-1393, 4.5-5.7 Sn, 11.7-21.7 Pb, 3 max Zn, bal Cu.
For bearings

COLONIAL NO 326.
M-1393, 3.5-5.0 Sn, 8-10 Pb, 4 max Zn, bal Cu
For bearings.

COLONIAL NO 400
M-1393, 0.5-1.7 Sn, 2-4 Pb, 70-74 Cu, bal Zn
Cast: 35,000-40,000 TS, 12,000-14,000 YS, 25-40 El. 20-40 RA; 50-55 Brin
For plumbing, hardware; leaded yellow brass, free-cutting

COLONIAL NO 403
M-1393; 66-70 Cu, 0.5-1.7 Sn, 2-4 Pb, bal Zn.
Cast 30,000-38,000 TS, 11,000-15,000 YS, 20-35 El, 15-30 RA; 40-60 Brin
For plumbing, hardware, yellow brass, free-cutting

COLONIAL NO 405
M-1393, 66 max Cu, 0.5-1.7 Sn, 2-4 Pb, bal Zn.
For hardware, screw machine products, free-cutting, yellow brass

COLONIAL NO 405.1.
M-1393; 65 max Cu, 0.5-1.5 Sn, 0.5 max Pb, bal Zn
For hardware, screw machine products; yellow brass.

COLONIAL NO. 405.2.
M-1393, 65 max Cu, 0.5-1.5 Sn, 0.5-1.0 Pb, bal Zn.
For hardware, screw machine products; free-cutting, yellow brass.

COLONIAL NO 406
M-1393; 66 max Cu, 0.5-1.0 Sn, 1.0-1.5 Pb, bal Zn.
For hardware, screw machine products; free-cutting, yellow brass.

COLONIAL NO. 407.
M-1393; 66-72 Cu, 0.5 max Sn, 0.5 max Pb, bal Zn.
For hardware, screw machine products; yellow brass.

COLONIAL NO. 407.5.
M-1393; 90-95 Cu, 0.20 max Sn, 0.50 max Pb, bal Zn.
For clips, fasteners, springs; good corrosion resistance.

COLONIAL NO. 408.
M-1393; 83-86 Cu, 0.20 max Sn, 0.50 max Pb, bal Zn.
For clips, fuse parts, hardware; good corrosion resistance.

COLONIAL NO. 409.
M-1393; 61 max Cu, 1.5-2.0 Pb, bal Zn.
For screw machine products, hardware; free-cutting, yellow brass.

COLONIAL NO. 410.
M-1393; 5 max Sn, 10 max Pb, 9-14 Ni, bal Cu + Zn
Cast: 30,000-40,000 TS; 15,000-20,000 YS; 10-25 El, 7-20 RA; 50-60 Brin.
Nickel silver, leaded.

COLONIAL NO 411.
M-1393; 5 max Sn, 10 max Pb, 14-18 Ni, bal Cu + Zn
Cast: 35,000 45,000 TS; 17,000-24,000 YS; 15-30 El; 15-30 RA, 65-80 Brin
For bearings; nickel silver, leaded.

COLONIAL NO. 412
M-1393; 5 max Sn, 10 max Pb, 18-22 Ni, bal Cu + Zn
Cast. 40,000 60,000 TS; 17,000-30,000 YS; 15-25 El; 11-22 RA; 76-120 Brin
For bearings, nickel silver, leaded.

COLONIAL NO 413
M-1393, 5 max Sn, 10 max Pb, 22-27 Ni, bal Cu + Zn
For bearings, nickel silver, leaded

COLONIAL NO 414
M-1393; 5 max Sn, 10 max Pb, 27-33 Ni, bal Cu + Zn
For bearings, nickel silver, leaded

COLONIAL NO 415
M-1393; 1 max Sn, 0.1 max Pb, 8-13 Al, Cu + Zn
Cast. 70,000-87,000 TS; 25,000-30,000 YS; 22-38 El; 20-36 RA, 110-140 Brin
For hardware, propellers, gears, Al Bronze.

COLONIAL NO. 420.
M-1393, Zn, Mn, bal Cu.
Cast: 60,000-65,000 TS.
For hardware, propellers, gears, Mn Bronze.

COLONIAL NO. 421.
M-1393; 56-69 Cu, 0.75-2.0 Fe, 0.3 max Pb, 0.5 max Ni, bal Zn
Cast: 65,000-68,000 TS; 28,000-40,000 YS; 20-35 El; 20-40 RA; 115-150 Brin.
For propellers, gears, hardware; Bronze.

COLONIAL NO. 422.
M-1393; Zn, Mn, bal Cu.
Cast: 80,000-90,000 TS.
For hardware, gears, propellers; Mn Bronze.

COLONIAL NO. 423.
M-1393; Zn, Mn, bal Cu.
Cast: 90,000-100,000 TS.
For hardware, gears, propellers; Mn Bronze.

COLONIAL NO. 424.
M-1393; 60-68 Cu, 2-4 Fe, 1 max Ni, 0.1 max Pb, bal Zn.
Cast: 100,000-120,000 TS; 65,000-90,000 YS; 12-18 El; 5-18 RA; 190-235 Brin.
For hardware, gears, propellers; Mn Bronze.

COLONIAL NO. 500
M-1393; 90 min Cu, 2 max Sn, 2.0-5.5 Si, 2.5 max Fe, 1.5 max Mn.
For bolts, gears, fasteners; Si Bronze.

COLONIAL HIGH SERVICE.
Eng.; 0.90 Cu, 0.20 Mn, 0.14 V, bal Fe.
For tools, drills, taps; water hardening.

COLONIAL HIGH SPEED
M-34; 0.52 C, 0.28 Mn, 3.8 Cr, 18.25 W, 0.24 V, bal Fe.
For high speed cutting tools; high speed steel.

COLORADO METAL.
U.S; 57 Cu, 25 Ni, 18 Zn.
For electrical resistances, corrosion resisting parts; corrosion resistant.

COLORADO WATER HARDENING.
M-618, 0.9-1.0 C, bal Fe.
For tools, drills, taps; water hardened.

COLOSSO.
M-344; 0.3 C, 0.3 Cr, 0.5 Ni, 0.3 W, 0.1 V, 0.6 Mo, bal Fe
For tools, flogging and pneumatic tools, rivet sets; no drawing of temper.

COLTUF 28.
M-530, 0.16 max C, 1.2 Mn, 1.25 max Si, bal Fe.
Rolled; 63,000-72,000 TS, 38,000 YS; 25 El
For ship construction; high ductility, no noted embrittlement

COLUMAX
M-1010, 7.8 Al, 13.5 Ni, 25 Co, 3 Cu, 0.8 Cb, bal Fe
13,600 Br; 750 Hc, 7.5 × 10^6 BH max
Heat treatable, for permanent magnets.

COLUMAX-5
M-1192; 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe.
Peak energy product 7,500,000.
Residual induction 13,500, Hc 750, 5000 TS; 8000 Tr.M R, C 50 Rock
For permanent magnets in electrical and magnetic equipment and instruments.
Similar to Alnico V-7, cast magnet, hardenable. Hard and brittle

COLUMBIA A 8
M-35, 0.56 C, 5.0 Cr, 1.25 W, 1.25 Mo, bal Fe.
For shear blades, forming rolls, heavy blanking dies, punches
Type A 8 air hardening tool steel

COLUMBIA CCB
M-35, 0.41 C, 0.80 Mo, 1.50 Cr, 4.25 Ni, bal Fe.
For forging dies, dummy blocks, backer blocks, hot shear blades.
Hot work tool steel

COLUMBIA DOUBLE SPECIAL.
M-35; 1.3 C, 3.2 W, 0.55 Cr, 0.4 Si, 0.25 Mn, bal Fe.
Annealed 200 Brin.
For machining chilled rolls, drawing and master dies; fast finishing.

COLUMBIA ELECTREX.
M-35; 1.0 C, 0.25 Si, 0.35 Mn, bal Fe
For drills, taps, punches, hobs, reamers; Type W 1; water hardened.

COLUMBIA EXTRA HEADERDIE.
M-35; 0.8-1.2 C, 0.25 Si, 0.25 Mn, bal Fe.
Water Hardened: 166,000-216,000 TS; 110,000-150,000 YS; 11-15 El; 32-37 RA; 330-600 Brin.
For taps, drills, reamers, punches, stamps, knurls, mandrels.
Type W 1 water hardening.

COLUMBIA EXTRA VANADIUM.
M-35; 1.0 C, 0.2 V, bal Fe.
For tools, cutters, dies; tough.

COLUMBIA SPECIAL.
M-35; 0.6-1.15 C, 0.25 Mn, 0.15 Cr, 0.02 V, 0.25 Si, bal Fe.
Annealed: 170 Brin.
For dies, punches, taps, reamers, knives, cutting and forming dies; water hardening carbon tool steel; AISI W 1.

COLUMBIA SPECIAL WIRE DRAWING.
M-35; 2.3 C, 10.5 W, 1.85 Cr, bal Fe.
For wire drawing ties; used unhardened.

COLUMBIA SPRING.
M-35; 0.95 C, 0.35 Mn, 0.25 Si, bal Fe.
For springs, clips, tools; water hardened.

COLUMBIA STANDARD.
M-35; 0.6-1.15 C, 0.25 Si, 0.3 Mn, bal Fe.
Annealed: 163 Brin.
For mandrels, forming rolls, machine parts, hammers; carbon tool steel. AISI W 2.

COLUMBIA STANDARD DIE BLOCK.
M-35; 0.8 C, 0.3 Si, 0.3 Mn, bal Fe.
For die blocks, general tools, Type W 1; water hardened.

COLUMBIA VANADIUM STANDARD.
M-35; 0.95 C, 0.2 V, 0.3 Mn, 0.25 Si, bal Fe.
For drills, hobs, reamers, cutters, broaches; Type W 2; water hardened.

COLUMBIUM 10W-2.5 Zr.
M-1537; 9-11 W 2-3 Zr, bal Cb.
Bar: 85,000-89,000 TS; 66,000-71,000 YS, 26-33 El; 64-70 Brin.
Sheet at 2000°F: 28,000 TS; 22,000 YS; 25 min El.
Bar at 2000°F: 36,500 TS; 27,500 YS; 32 El.
For space vehicles and nuclear reactors.
High strength at elevated temperatures.
Insensitive to notch stress concentration.

COLUMBIUM 10W-5 Zr.
M-1537; 10 W, 5 Zr, bal Cb.
Annealed: 102,000 TS; 85,000 YS; 12 El, 9 RA.
For space vehicles and nuclear reactors.
High strength at elevated temperatures.
Insensitive to notch stress concentration.

COLUMBIUM-10W-10 Hf.
M-1537; 9-11 W, 9-11 Hf, bal Cb.
Cold rolled: 130,800 TS; 122,200 YS; 4 El
Stress-relieved: 112,300 TS; 100,500 YS; 16 El.
Recrystallized: 88,500 TS; 71,500 YS; 26 El.
For space vehicles, missiles, high temperature components.
Good oxidation resistance and high temperature properties.

COLUMBIUM-15W-5 Mo-1 Zr.
M-53, M-31, M-1537; 15 W, 5 Mo, 1 Zr, bal Cb.
Annealed: 115,000 TS; 95,000 YS; 5 El; 8 RA.
At 2200°F: 43,500 TS; 39,000 YS; 22 El; 40 RA.
For missile and space vehicle components, high temperature fasteners.
High heat, oxidation and corrosion resistant.

COLUMBIUM C-103.
M-1596; 9.0-11.0 Hf, 0.7-1.3 Ti, 0.7 max Zr, bal Cb.
Cold rolled: 105,000 TS; 96,600 YS; 4.5 El.
Recrystallized: 58,800 TS; 45,400 YS; 26 El.
For high temperature applications, space vehicles.
Good TIG weldability.

COLUMBIUM C-129.
M-1596, M-1537; 10 W, 10 Hf, bal Cb.
Rolled: 131,000 TS; 123,000 YS; 5 El.
Stress relieved: 112,000 TS; 100,000 YS; 16 El.
Recrystallized: 85,000 TS; 71,000 YS; 30 El.
For high temperature service, space vehicles, reactors, missiles.
Recrystallized at 1900-2200°F. Heat resistant.

COLUMBIUM C-129-Y.
M-1596, M-1537; 9-11 W, 9-11 Hf, 0.05-0.3 Y, bal Cb.
Recrystallized: 89,800 TS; 75,700 YS; 25 El.
At 2000°F: 39,600 TS, 29,500 YS; 44 El.
At 3000°F: 11,000 TS; 9900 YS; 75 El.
For high temperature applications, space vehicles, missiles.
Good elevated temperature properties, combined with heat and oxidation resistance

COLUMBIUM Cb 132 M
M-114, M-1537, M-1596; 0.001 C, 1.5 Zr, 15 W, 5 Mo, 20 Ta, 58.5 Cb.
Extruded: 131,800 TS, 122,100 YS; 4 El.
At 2400°F: 56,700 TS, 49,200 YS, 37 El (extruded)
Heat treated 89,200 TS; 0.5 El.
At 2400°F: 58,300 TS; 49,900 YS; 20 El; (heat treated)
For jet engine and gas turbine blades.
High strength, high temperature alloy.

COLUMBIUM Cb-752
M-48, M-1537, 9-11 W, 2-3 Zr, bal Cb
Annealed sheet 78,000 TS, 58,000 YS; 20 min El.
At 2200°F: 28,000 TS; 22,000 YS; 25 min El.
For high temperature applications.
High heat and corrosion resistance.

COLUMBIUM D-10
M-1563; 0.0175 O_2, 0.0020 H_2, 0.01 N_2, 0.01 C, bal Cb
Recrystallized sheet: 30,000 min TS, 15,000 min YS, 15 min El.
Recrystallized bar: 25,000 min TS; 12,000 min YS; 25 min El.
For high temperature applications. High heat resistance.

COLUMBIUM D-11.
M-1563; 0.75-1.25 Zr, bal Cb.
Bar (Recryst.) 30,000 min TS, 16,000 min YS; 25 min El
Extruded: 40,000 TS; 20,000 YS; 25 El.
At 1800°F: 27,000 TS, 16,000 YS; 23 El.
Sheet (Recryst.): 35,000 min TS, 20,000 min YS; 12 min El.
For space vehicles and nuclear reactors.
High heat resistant.

COLUMBIUM D-14.
M-1563; 4.4-5.6 Zr, bal Cb.
At 78°F: 68,000 TS, 56,000 YS; 15 El.
At 2000°F: 32,000 TS; 22,000 YS; 40 El.
Stress relieved sheet. 55,000 min TS, 45,000 min YS; 12 min El.
For hot surfaces on space re-entry vehicles.
Moderate strength alloy for elevated temperature service.

COLUMBIUM D-36.
M-1563; 9.0-11.0 Ti, 4.0-6.0 Zr, bal Cb.
Sheet recrystallized: 80,000 TS; 71,000 YS; 20 El.

At 800°F: 65,000 TS; 45,000 YS; 18 El.
At 2000°F: 22,000 TS; 20,000 YS; 50 El.
Bar Recryst: 65,000 min TS; 58,000 min YS; 20 min El.
For space re-entry vehicles.
High heat resistance.

COLUMBIUM D-40.
M-1563; 15 W, Mo, 1 Zr, 0.06 C, bal Cb.
Cold rolled: 125,000 TS; 85,000 YS, 25 El.
At 2200°F: 50,000 TS; 30,000 YS; 22 El.
For space missiles and rocket components.
Heat resistant. Retains usable strength to 2500°F.

COLUMBIUM D-41.
M-1563; 19.0-21.0 W, 9.0-11.0 Ti, 5.5-6.5 Mo, bal Cb.
Extruded: 130,000 TS; 127,000 YS; 5.3 El.
At 2000°F: 56,000 TS; 53,000 YS; 26 El.
At 2400°F: 34,000 TS; 29,000 YS, 33 El.
For space vehicles and nuclear reactors. High heat resistant.

COLUMBIUM D-43.
M-1563; 10 W, 1 Zr, 0.1 C, bal Cb
Sheet: 92,000 TS, 78,000 YS, 22 El.
At 2000°F 50,000 TS; 45,000 YS; 15 El
For missiles and space craft.
High creep and rupture strength

COLUMBIUM SU-16.
M-1528, 11 W, 3 Mo, 2 Hf, 0.08 C, bal Cb.
At 2000°F, stress relieved bars have a stress rupture life of 1000 hrs. with a 28,000 stress.
At 2200°F the 1000 hr. rupture stress is 14,800. For applications requiring high strength at 2000-2500°F, aircraft gas turbine blades, space vehicles, military equipment
High temperature strength and excellent room temperature ductility

COLUMBIUM SU-31.
M-1528, 17 W, 3.5 Hf, 0.12 C, bal Cb
For gas turbine blades
High heat resistance and creep strength.

COLUMBIUM XB-88
M-118, 28 W, 2 Hf, 0.067 C, bal Cb
For gas turbine buckets.
Heat resistant. High rupture strength.

COLUMBUS K 03
M-1305; 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2 V, 12 W, bal Fe.
For lathe and planer tools, hobs, taps, reamers, drills; high speed steel, oil hardened

COLUMBUS K 011
M-1305; 0.76 C, 10 C, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, milling cutters, drills, high speed steel, oil hardened.

COLUMBUS K 055.
M-1305, 0.79 C, 4.75 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe
For lathe and planer tools, drills, taps, hobs; high speed steel, oil hardened

COLUMBUS K 0109.
M-1305; 0.8 C, 4.7 Co, 4.3 Cr, 0.7 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, taps, hobs, drills; high speed steel, oil hardened.

COLUMBUS MO.
M-1305; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel, oil hardened.

COLUMBUS SS10.
M-1306; 0.82 C, 4 Cr, 0.8 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, drills, reamers, hobs; high speed steel, oil hardened.

COLUMBUS SS11.
M-1305; 0.86 C, 4 Cr, 0.8 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches, hobs; high speed steel, oil hardened.

COLUMBUS SS13.
M-1305, 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For special milling cutters, high speed steel, oil hardened

COLUMBUS SS19.
M-1305; 0.74 C, 4.1 Cr, 1 V, 18.5 W, bal Fe.
For lathe and planer tools, drills, reamers, taps; high speed steel, oil hardened.

COLVILLE STAINLESS IRON.
M-530; 16-17 Cr, 0.4 Mn, 0.1 C, bal Fe.
For heat and corrosion resisting parts, stainless and corrosion resistant.

COMALLOY.
M-England: 17 Mo, 12 Co, bal Fe
For permanent magnets, electrical and magnetic equipment.
Precipitation hardened, high permeability

COMANCHE.
M-1432, 0.9 C, 1.2 Mn, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
Oil hardening tool steel; AISI 01.

COMBARLOY
M-575, Ag, bal Cu
For commutator bars; high conductivity

COMET
M-32, 1.05 C, 0.25 Mn, bal Fe
For taps, reamers, dies for blanking, trimming and forming, water hardening; "Carpenter No 11."

COMET.
M-44, 65 Fe, 5 Cr, 30 Ni
85,000 TS; 47,000 YS, 37 El; 69 RA.
For dipping baskets, electric resistance wire, rheostats, max operating temperature 700°C; heat resisting

COMINCO NO. 2570.
M-1679; Zn alloy.
Forged: 60,000-72,000 TS, 45,000-60,000 YS; 14 El; 120 Brin
For industrial applications, hardware, fire fighting equipment, automotive parts, plumbing fixtures, solenoid valves

COMINCO NO 2573
M-1679; Zn alloy
Forged: 62,000-75,000 TS, 45,000-60,000 YS, 13 El, 125 Brin
For industrial applications, hardware, fire fighting equipment, automotive parts, plumbing fixtures, solenoid valves

COMINCO NO 3130.
M-1679; Zn alloy.
Forged: 35,000 TS, 23,000 YS; 30 El; 65 Brin.
For structural and pressure components, plumbing fixtures, solenoid valves Good creep resistance.

COMINCO NO. 3330.
M-1679; Zn alloy.
Forged: 48,000 TS; 35,000 YS, 20 El; 90 Brin.
For structural and pressure components, plumbing fixtures, valves, regulators. Good creep resistance.

COMMANDO.
M-435; 1.2 C, 0.25 Mn, 0.2 Si, bal Fe.
For dies; drill rod.

COMMANDO NO. 47.
M-373; 0.45 C, 1.4 Cr, 0.25 V, 0.25 Mo, 2 W, bal Fe.
For hot punches, tools; hot work steel, shock resistant.

COMMELL SPECIAL.
Eng.; 1.20 C, 0.21 Mn, 2.92 W, bal Fe.
For tools, dies, cutters; fast finishing tool steel.

COMMERCE H.
M-1248; Cu alloy.
Cast: 65,000-75,000 TS; 12,000-16,000 YS; 10-2 El; 116-165 Brin.
For resistance welding electrode; 10-15% electrical conductivity.

COMMERCIAL BRASS.
M-8; 65 Cu, 35 Zn.
Hard: 76,000 TS; 4 El; 153 Brin.
Soft: 45,000 TS; 60 El; 52 Brin.
For fixtures, radiators, ornaments; must be annealed.

COMMERCIAL BRONZE.
M-33; 90 Cu, 10 Zn.
Sheets: 32,000 TS; 10,000 YS; 40 El; 50 Brin.
Wire: 100,000 TS; 50,000 YS; 1 El.
For window screen wire, automobile radiators, hardware, ornaments.

COMMERCIAL BRONZE 25.
M-141; 90 Cu, 10 Zn
Hard: 61,000 TS; 54,000 YS; 5 El; 125 Brin.
Soft: 38,000 TS; 12,000 YS; 45 El; 53 Brin.
For weather stripping; corrosion resistant

COMMERCIAL BRONZE 220.
M-8; 10 Zn, bal Cu.
Sheet: 32,000 TS; 10,000 YS; 40 El; 50 Brin
Wire: 100,000 TS; 50,000 YS; 1 El.
For window screen wire, auto radiators, hardware; corrosion resistant.

COMMERCIAL BRONZE 226
M-8; 12.5 Zn, bal Cu.
Hard: 65,000 TS; 52,000 YS, 7 El, 125 Brin.
Soft: 39,000 TS; 13,000 YS, 45 El; 72 Brin.
For costume jewelry, slide fasteners; base for gold plate

COMMERCIAL CARBON DRILL ROD.
M-1702, 0.95-1.05 C, 0.3-0.5 Mn, 0.15-0.3 Si, bal Fe
AISI Type W 1 water hardening tool steel

COMMERCIAL CASTINGS B C
Eng.; 62 Cu, 30 Zn, 6 Sn, 2 Pb.
For name plates, oil cups, instrument cases.

COMMERCIAL DRILL ROD
M-1; 1.1 C, 0.25 Mn, bal Fe. For dowel pins, shafting, push rods, drills; water hardening.

COMMON FORMULA.
Eng., 55 Cu, 25 Zn, 20 Ni.
For electrical resistance; German silver

COMMON TOMBAC.
French, 28 Zn, 72 Cu.
Rolled: 42,000 TS; 25,000 YS; 35 El; 30 RA; 45 Brin.
For cartridge cases, condenser tubes, brazing; corrosion resistant; ductile.

COMMON TYPE METAL "A."
U.S.; 60 Pb, 10 Sn, 30 Sb.
For type metal.

COMMON TYPE METAL "B."
U.S.; 55.5 Pb, 40 Sn, 4.5 Sb.
For type metal.

COMMONWEALTH.
M-1034; 0.3 C, 2 Ni, bal Fe.
80,000 TS.
For trunk frames; tough.

COMO.
M-140, 0.7 C, 9 Mo, 1.5 W, 4 Cr, 1 V, 5 Co, bal Fe.
For lathe and planer tools, drills, hobs, reamers; high speed steel. AISI M-30.

COMOL-17.
M-38, 12 Co, 17 Mo, bal Fe.
Bar: 1,100,000 (BdHd) max., 10,000 Br, 230 Hc, 6900 Bo.
Bar: 125,000 TS; 50,000 Tr.S; C 60 Rock.
For electrical and magnetic equipment.
Permanent magnet High permeability.

COMOL-20
M-60, M-313; 12 Co, 20 Mo, bal Fe.
Cast: (BdHd) max. 1,250,000; residual flux density 8550
For electrical and magnetic equipment.
Permanent magnet High permability.

COMPAX
M-111, M-111a, 0.13 C, 1.4 Cr, 3.8 Ni, 0.5 Mn, bal Fe
Annealed: 100,000 TS, 200-220 Brin
Core Hardened: 145,000 TS; 112,000 YP; 290 Brin.
For plastic molds, large cavity dies for compression molding
Type P 6 tool steel, case hardening

COMPENSATOR ALLOY.
England, Fe Ni
For compensating shunts for electrical equipment, temperature sensitive, magnetic.

COMPLEX ENGLISH METAL
Eng., 87 Sn, 6 Sb, 2 Ni, 2 Cu, 1.5 W, 1 Zn, 0.5 Bi.
For bearings

COMPO.
M-632, 88.5 Cu, 10 Sn, 1.5 graphite.
Sintered: up to 20,000 TS, 5-10 El, 20-90 Brin
For self lubricating porous bronze bushings, porosity and oil content is 10 to 40% by volume.

COMPO 59-E
M-632, 36.5 Cu, 4 Sn, 58.5 Fe, Graphite
Sintered. 12,500 TS, 5.9 Density, 28% oil by volume
For light loaded, low cost bearings, for self-aligning bearings in motors

COMPO 60-Y
M-632, 89 Cu, 9.75 Sn, 1.25 Graphite
Sintered 10,000 TS, 6.0 Density; 30% oil by volume
High oil content plus MoS_2 for additional lubrication for very light loads, as cameras, instruments, light duty appliances

COMPO 61-A
M-632, 87 Cu, 9.5 Sn, 3.5 Graphite.
Sintered 6500 TS, 6.1 Density; 20% oil by volume
For bearings used in light duty applications where noise elimination is important.

COMPO 62-E.
M-632; 36.5 Cu, 4 Sn, 58.5 Fe, 1 Graphite
Sintered: 15,000 TS; 6.2 Density; 23% oil by volume
Good load bearing qualities; for fan motors, tractors and agricultural equipment.

COMPO 63-H
M-632, 89 Cu, 9.75 Sn, 1.25 Graphite.
Sintered. 12,000 TS; 6.3 Density; 27% oil content by volume.

For light loaded, self-aligning bearings in fractional horse power motors.

COMPO 66-H.
M-632; 89 Cu, 9.75 Sn, 1.25 Graphite.
Sintered: 14,700 TS, 6.6 Density; 23% oil by volume.
Standard bearing material, good load bearing qualities.
ASTM B438-67 Gr 1, Type II; SAE 841, PMPMA BT-0010-R.

COMPO 66-Q.
M-632, 90.0 Cu, 10 Sn.
Sintered: 16,000 TS; 6.6 Density; 25% oil by volume.
For bearings and parts requiring light machining, boring or staking, good load bearing qualities.
ASTM B438-67, Gr 1, Type II; SAE 841; PMPMA BT-0010-R

COMPO 66-R
M-632, 87 Cu, 9.5 Sn, 3.5 Graphite
Sintered 15,000 TS; 6.6 Density, 18% oil by volume.
For bearings having oscillating and reciprocating loads, for bearings die cast into place.

COMPO 70-H.
M-632, 89 Cu, 9.75 Sn, 1.25 Graphite.
Sintered: 18,000 TS, 7.0 Density, 15% oil by volume
For heavy duty bearings as in agricultural or construction equipment, and in industrial work.
ASTM B255-61, Type II; SAE 842, PMPMA BT-0010-S

COMPO 70-Q
M-632, 90 Cu, 10 Sn.
Sintered 19,500, 7.0 Density, 20% oil by volume
For bearings requiring heavy machining, severe staking, spinning, and where ductility is important, good for shock and high loading
ASTM B255-61, Type II, SAE 842, PMPMA BT-0010 S.

COMPO 70-R.
M-632, 87 Cu, 9.5 Sn, 3.5 Graphite.
Sintered 18,000 TS, 7.0 Density, 5% oil by Volume
For bearings for oscillating and reciprocating loads, for die casting thin walled bearings into place

COMPOSITE
M-345; C, bal Fe
For tools, dies, water hardening

COMPOSITE DIE.
M-261, C, bal Fe
For tools, dies, water hardening

COMPOSITION NO 1.
M-508, 6 Sn, 3 Pb, 4 Zn, bal Cu.
34,000 TS, 23,000 YS, 20 El, 75 Brin.
For centrifugal castings, general purpose

COMPOSITION BRASS.
84 85 Cu, 4-6 Zn, 4-6 Sn, 4-6 Pb.
26,000 TS, 12,000 YS; 15 El
For bearings, screws, hardware; (ounce metal)

COMSOL
M-200, Ag, Sn, Pb.
Cast: 56,000 TS; 40 El
For soft solder; M P 296°C, retains strength at high temperature.

CONDENSER FOIL.
Eng, 90 Pb, 9 Sn, 1 Sb.
For accumulators; accumulator metal.

CONDOR SPECIAL
M-253; 0.7-1.4 C, Mn, Si, bal Fe.
For drill rods, tools; see Pompton Special.

CONDULOY.
M-1037; 0.23-0.32 Be, 1.4-1.5 Ni, bal Cu.
Cast: 54,000 TS; 21,000 YS; 15 El; 14 RA; 110 Brin.
Heat treated: 84,000 TS; 64,000 YS; 4 El; 7 RA; 189 Brin.
For diaphragms, springs, instrument parts; age-hardenable, now Brush 35-C alloy.

CONEL.
M-942, 38.5 Ni, 3.3 Mn, 3.3 Si, 4.6 Cr, bal Fe.
Cold worked and annealed: 185,000 TS; 145,000 YS; 4 El.
For springs; low thermoelastic coefficient.

CO-NETIC A-152
M-1567; Fe, bal Ni.
Sheet: 21,000 YP, B 43-47 Rock.
For magnetic shielding.

CO-NETIC AA
M-1567; 20 Fe, bal Ni.
Sheet. 57,000 TS, 28,500 YP; B 47-53 Rock.
For electrostatic shielding.
High permeability

CO-NETIC B
M-1567, Fe, bal Ni.
Sheet 58,000 TS, 19,000 YP.
For magnetic shielding

CONFLEX 216.
M-1562, 10% copper layer on AISI 1065 steel
Heat treated: 215,000 TS; 185,000 YS, 5 El
For current carrying springs.
Magnetic, 16% conductivity

CONFLEX 316
M-1562, Carbon spring steel clad with Cu both sides, 90% steel, 10% Cu
Annealed: 74,000 TS; 65,000 YS, 25 El
Rolled: 130,000 TS, 110,000 YS, 2 El
Heat Treated 213,000 TS, 185,000 YS, 5 El
For current carrying springs. 16% conductivity.
High elasticity, low contact resistance.

CONFLEX 326
M-1562, Carbon spring steel clad with Cu both sides 80% steel, 20% Cu
Annealed. 70,000 TS, 61,000 YS, 25 El.
Rolled 120,000 TS, 110,000 YS, 2 El
Heat treated 204,000 TS, 177,000 YS; 6 El
For current carrying springs.
High elasticity, low contact resistance.

CONFLEX 335S
M-1562; Core of age-hardened 17-7 PH double clad with copper.
Aged 155,000 TS, 140,000 YS, 2.5 El
For current carrying springs
30-40% conductivity.

CONFLEX 545
M-1562, AISI 6150 steel double clad on a copper base.
Heat Treated: 145,000 TS, 133,000 YS; 4-5 El.
For flat or cantilever type springs Two thin copper layers clad on the outer surfaces to provide resistance to corrosion
Five layers bonded together Not brazed together. Copper is 45% of cross-section

CONFLEX 720.
M-1562; 20 Mn, 20 Ni, bal Cu.
Hardened: 102,650-175,600 TS, 49,800-149,300 YS; 0.5-15 El; 200-425 VHN
For springs, diaphragms, clips, watch cases, pen-caps.
Nonmagnetic, corrosion resistant. Age-hardenable.

CONGO.
M-140; 0.8 C, 4 Cr, 1.5 V, 4 W, 5 Mo, 12 Co, bal Fe.
For form tools, cut-off knives, reamer blades; high speed steel, oil hardened.

CONGO HOT WORK.
M-140; 0.1 C, 0.5 V, 3.5 Cr, 4 W, 5 Mo, 25 Co, bal Fe.
For brass die, casting dies ,master hobs; age-hardenable, air quenched.

CONICO.
50 Cu, 29 Co, bal Ni.
For magnets for electrical equipment; magnetically soft.

CONLY.
M-746; 4-5 Cu, bal Al.
For bicycles; tubes.

CON-PAC.
M-604; 0.17 C, 1.35 Mn, 0.40 Si, 0.30 Cu, bal Fe
Heat Treated: 80,000 min YS; 100,000 min TS.
For storage tanks, penstocks, bridges and buildings, railroad cars, trucks.
Heat treated carbon steel plates.

CONPERNIK.
M-118; 50 Fe, 50 Ni, trace Mn.
Annealed: 55,000 TS; 20,000 YS; 33 El.
For laminations for transformers, choke coils, high magnetic permeability.

CONQUEROR.
M-688; 0.9 C, 0.4 Mn, 0.3 Si, bal Fe.
For stone drills and tools, punches, chisels; tough and wear resistant.

CONQUEROR.
M-1406; 0.70-0-0.85 C, bal Fe.
Heat treated: 188,000 TS; 143,000 YS, 12 El, 35 RA; 385 Brin.
For press tools, chisels, springs; Type W1; water hardened.

CONQUEROR 14%.
M-1406; 0.65 C, 14 W, 4 Cr, 0.75 V, bal Fe.
For shear blades, punches, drills, taps; high speed steel.

CONQUEROR AA.
M-1406; 0.70 C, 17 W, 4 Cr, 1 V, 0.5 Mo, bal Fe.
For cutters, taps, reamers, hobs, drills; high speed steel.

CONQUEROR HOLLOW DRILL.
M-688; 0.75 C, 0.3 Mn, 0.2 Si, bal Fe.
For hollow stone drills, pneumatic tools; abrasion and shock resistant.

CONQUEROR L. C.
M-1406; 0.45 C, 14 W, 2.7 Cr, 0.4 V, bal Fe.
For forging and extrusion dies, mandrels; oil hardened, hot die steel.

CONQUEROR O.H.D.
M-1406; 1.0 C, 0.25 Mn, 1.6 Cr, 0.5 W, bal Fe.
For cutters, gages, drawing dies, rolls, reamers; cold work steel, oil hardened.

CONSERVALOY.
M-1; 0.60 C, 22 Cr, 8.5 Mn, 0.35 N, bal Fe.
For valves; corrosion and heat resistant.

CONSIL 852.
M-63; 85 Ag, 15 Cd0.
For electric contacts.
Internally oxidized.

CONSIL 866.
M-63; 86.6 Ag, 13.4 Cd.
For electric contacts.

CONSIL 880.
M-63; 88 Ag, 12 Cd.
For electric contacts.

CONSIL 900.
M-63; 90 Ag, 10 CdO.
For electric contacts.
Internally oxidized.

CONSIL 910.
M-63, 91 Ag, 9 Cd.
For electric contacts

CONSIL 983.
M-63; 1.7 Mg, 98.3 Ag
Annealed: 47,000 TS, 15 El; 57 Rock 30 T.
Cold Rolled: 63,000 TS; 5 El; 66 Rock 30 T.
For secondary emitter for television cameras
Elect. cond. 35.

CONSIL 995
M-63; 0.25 max Mg, 0.25 max Ni, 99.4 min Ag.
Annealed 28,000-34,000 TS; 30-40 El, 60-65 Rock 15 T
Cold Worked: 55,000 TS; 6-8 El; 50-60 Rock 30 T.
Hardened 68,000 TS; 56,000 YS; 5-15 El, 68 Rock 30 T.
For electrical contacts, cable connectors, spring clips, relay springs.
Air hardened High elect conductivity

CONSTAHL.
M-716; 0.1 C, 19 Cr, 9 Ni, bal Fe.
For stainless parts; stainless.

CONSTANT
M-1114; 0.95 C, 1.25 Mn, 0.5 Cr, 0.5 W, bal Fe
For tools, dies, non-deforming

CONSTANTAN.
M-44, M-61; 60-45 Cu, 40-55 Ni, 0-1.4 Mn
Annealed: 60,000-70,000 TS, 20,000-30,000 YS; 40-60 El, 50-70 RA, 100-120 Brin.
Rolled: 140,000 TS; 125,000 YS; 1 El; 5 RA; 300 Brin
For electrical resistances, thermocouples; high heat resistance

CONSTANTIN.
M-44; 44-46 Ni, 54 Cu, 0-0.4 Fe, 0-1.34 Mn
For resistance alloy, rheostats, thermocouples, heat resistant.

CONSTANT SPECIAL.
M-1114; 0.95 C, 1.25 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, dies; non-deforming.

CONSTRUCTAL 1.
M-116; Cu Zn, Mg, bal Al
For light alloy parts

CONSTRUCTAL 2.
M-116; 1.2 Cu, 0.9 Mg, 0.6 Si, 0.5 Ti, bal Al.
Aged: 54,000-60,000 TS; 18-25 El; 95-115 Brin.
For aircraft and heavy duty forgings; age-hardenable

CONSTRUCTAL 8.
M-116; 7 Zn, 2.5 Mg, 0.2 Si, 1 Mn, bal Al.
Heat treated: 67,000-74,000 TS; 15-18 El; 120-140 Brin.
For light alloy structural parts; heat treatable.

CONSTRUCTAL 20/42.
M-116; 4.5 Zn, 2.5 Mg, 0.4 Si, 0.6 Mn, 0.1 Cu, bal Al.
Aged: 65,000-71,000 TS; 51,000-60,000 YS; 10-12 El.
For light alloy parts; high strength, age hardenable.

CONSTRUCTAL 20/53.
M-116; 5.0 Zn, 3.0 Mg, 0.4 Si, 0.3 max Cr, 0.1 Cu, bal Al.
Aged: 71,000-77,000 TS; 64,000-68,000 YS; 8 El.
For light alloy parts; high strength, age-hardenable.

CONSTRUCTAL 87.
M-116; 0.28 Fe, 1.24 Mn, 6.87 Zn, 1.62 Mg, 0.75 Si, bal Al.
For light alloy structural parts; heat treatable.

CONSUMET 882.
M-32; 0.35 C, 5.0 Cr, 1.5 Mo, 0.4 V, bal Fe.
Ht. Tr.: 300,000 TS; 250,000 YS; 6 El; C 55 Rock.
For die casting dies, extrusion and forging dies, hot punches, aircraft structural fittings.
Vacuum melted Type H-11 tool steel.

CONTACT BRONZE.
M-141; 8.95 Zn, 1.9 Sn, 0.15 P, bal Cu.
Annealed: 48,000 TS; 54 El 67 Brin.
Hard: 78,000 TS; 7.5 El; 165 Brin.
Spring: 97,500 TS; 3 El; 190 Brin.
For electrical contacts, switches, springs; good spring properties.

CONTACT BRONZE 92.
M-141; 89 Cu, 0.15 P, 1.9 Sn, bal Zn.
Hard: 90,000 TS; 72,000 YS; 3 El; 185 Brin.
For electrical contacts; corrosion resistant.

CONTRACID.
M-296; 0.6 Be, 60 Ni, 15 Cr, 7 Mo, bal Fe.
For springs; corrosion resistant.

CONTRACID-B2M.
M-296; 60 Ni, 18 Cr, 2 Mo, bal Fe.
For clinical apparatus, surgical instruments, pumps, valves.
Corrosion and acid resistant.

CONTRACID B 2.5 M.
M-296, 19.5 Fe, 61 Ni, 15 Cr, 2.5 Mo, 2 Mn.
For chemical apparatus, surgical instruments; heat and corrosion resistant

CONTRACID B 4 M
M-296, 18 Fe, 61 Ni, 15 Cr, 4 Mo, 2 Mn
For chemical apparatus, surgical instruments; heat and corrosion resistant

CONTRACID B 6 W
M-296, 16 Fe, 61 Ni, 15 Cr, 6 W, 2 Mn
For chemical apparatus, surgical instruments, heat and corrosion resistant

CONTRACID B 7 M.
M-296, 16 Fe, 60 Ni, 15 Cr, 7 Mo, 2 Mn.
At 20°C 136,000 TS, 120,000 YS; 23 El.
At 500°C. 107,000 TS, 91,000 YS, 28 El.
For chemical apparatus, surgical instruments, heat and corrosion resistant.

CONTRACID B7MO.
M-296; 60 Ni, 15 Cr, 16 Fe, 2 Mn, 7 Mo.
For jet engine parts, heat and corrosion resistant.

CONTRACID B 10 W.
M-296; 12 Fe, 61 Ni, 15 Cr, 10 W, 2 Mn
At 25°C: 125,000 TS; 112,000 YS, 22 El.
At 500°C: 109,000 TS, 100,000 YS; 18 El.
For chemical apparatus, surgical instruments; heat and corrosion resistant

CONTRACID B W M C
M-296; 14 Fe, 58 Ni, 3 Co, 15 Cr, 3 Mo, 5 W, 2 Mn.
For chemical apparatus, surgical instruments; heat and corrosion resistant.

CONTRALOY.
M-184; C, 28 Cr, 15 Ni, bal Fe
For heat and corrosion resistant parts; now Michiana No. 63.

COOK A.L.Z.
M-1405; 0.4 C, 5 Cr, 0.1 W, 1 Si, 1.5 Mo, 0.6 V, bal Fe.
For punches, pneumatic tools; oil hardened, tough.

COOK B.K.V.
M-1405; 1.9 C, 0.35 Mn, 13.5 Cr, 0.6 Si, bal Fe.
For punches, plastic mold dies, form tools; air or oil hardened, non-deforming.

COOK C.K.K.
M-1405; 1.0 C, 1.4 Cr, 0.3 Mn, 0.25 Si, bal Fe.
For bearings, bushings, blanking and forming dies; water hardened, wear and abrasion resistant.

COOK C.M.C.
M-1405; 0.9 C, 1.3 Mn, 0.95 Cr, 0.3 Si, bal Fe.
For blanking and forming tools, taps, punches; oil hardened, non-deforming.

COOK C.R.P.
M-1405; 0.9 C, 1.3 Mn, 1.0 Cr, 0.25 Si, bal Fe.
For press tools, guages, master hobs, rollers; oil hardened, non-deforming.

COOK E.T.A.
M-1405; 0.9 C, 0.35 Mn, 0.2 Si, 0.1 V, bal Fe.
For drawing, pressing and forming dies; cold work steel, water hardened.

COOK H.D.Z.
M-1405; 0.4 C, 3 Cr, 9 W, 3 V, bal Fe.
For extrusion dies and rams, punches; hot work steel, oil hardened.

COOK I.L.O.
M-1405; C, alloy, bal Fe.
For drawing, forming and coining dies; water hardened

COOK M.K.Z
M-1405; 0.38 C, 3 Cr, 9 W, 0.4 Mo, 0.2 V, bal Fe.
For hot forging and extrusion dies and tools; hot work steel, oil hardened.

COOK M.Y.
M-1405; 0.58 C, 0.4 Mn, 1.0 Cr, 0.95 Si, 0.4 Mo, bal Fe
For chisels, caulking and riveting tools, oil hardened, shock resistant.

COOK'S ALLOY
Eng.; 56-69 Sb, 32-44 Zn.

COOK W Z
M-1405, 0.4 C, 3 Cr, 11 W, 0.2 V, 0.4 Mo, 0.35 Mn, bal Fe
For extrusion dies, die casting dies, tools; hot work steel, oil hardened.

COOPER.
Eng., 40-50 Au, 50-60 Pd.
For dental alloy; corrosion resistant.

COOPER ALLOY 5
M-36, 0.15-0.30 C 4.0-6.0 Cr, 0.40-0.60 Mo, bal Fe.
Cast 110,000 TS; 75,000 YS; 18 El; 30 RA; 200 Brin.
For corrosion resistant parts, oil refinery equipment; corrosion resistant.

COOPER ALLOY 14.
M-36; 0.12-0.35 C, 11-4 Cr, bal Fe.
Cast 75,000 TS; 50,000 YS; 20 El; 30 RA; 180 Brin.
For corrosion resistant castings, valve trim.

COOPER ALLOY 14A.
M-36; 0.10-0.15 C, 11.5-14.0 Cr, 1.25-2.5 Ni, 0.5 max Mo, bal Fe.
Annealed: 115,000 TS, 90,000 YS; 235 Brin.
For furnace parts, chemical and textile plant equipment. AISI 414. Corrosion resistant.

COOPER ALLOY 14 H.
M-36; 0.25-0.35 C, 1 max. Mn, 11-14 Cr, 0.75 max Ni, bal Fe.
Annealed: 99,000 TS; 55,000 YS; 27 El; 48 RA; 190 Brin.
Hardened: 250,000 TS; 225,000 YS; 0 El; 0 RA; 550 Brin.
For grinding parts, castings; wear and abrasion resistant.

COOPER ALLOY 14 I.
M-36; 0.12-0.20 C, 1 max. Mn, 11-14 Cr, 0.75 max Ni, bal Fe.
Cast: 115,000-120,000 TS; 90,000-100,000 YS; 25-20 El; 60-55 RA; 200-240 Brin.
For valve trim, fittings, pump parts; corrosion resistant.

COOPER ALLOY 14S.
M-36; 0.10 C, 12.5 Cr, 0.5 Ni, 0.75 Si, bal Fe
Heat treated: 197,000-116,000 TS; 139,000-96,000 YS; 16-23 El; 42-60 RA, 372-230 Brin.
For valves, valve trim, pump parts; corrosion resistant.

COOPER ALLOY 15.
M-36; 1.5-1.7 C, 12-14 Cr, 1.1-1.5 Mo, 0.75 max. Ni, 3.0-3.5 Co, 0.5-0.75 V, bal Fe.
Annealed: 235 Brin.
Hardened: 600 Brin
For grinding parts, castings; abrasion and wear resistant.

COOPER ALLOY 15A
M-36; 1.5 C, 12-14 Cr, 1 V, 1 Mo, bal Fe.
For valves, pump bodies; corrosion and heat resistant.

COOPER ALLOY 16.
M-36, 0.12-0.30 C, 16-20 Cr, bal Fe
Annealed: 70,000-100,000 TS; 50,000-75,000 YS; 12-5 El; 15-5 RA; 200-225 Brin.
For valve trim for high pressure steam, pump valves; stainless steel, formerly "Sweetaloy No. 16."

COOPER ALLOY 16C.
M-36; 0.30 C, 20-22 Cr, 1 Cu, bal Fe.
Cast: 70,000 TS; 35,000 YS; 3 El, 2 RA; 235 Brin
For rabble blades on ore roasting furnaces; heat resistant.

COOPER ALLOY 16 C3.
M-36; 0.3 max. C, 20-24 Cr, 0.75 max Ni, 0.9-1.2 Cu, bal Fe
Annealed: 70,000-95,000 TS, 35,000-70,000 YS; 7-2 El; 7-2 RA; 185-235 Brin.
For castings for copper plating solutions; corrosion resistant.

COOPER ALLOY 16 H
M-36; 0.95-1.1 C, 16-18 Cr, 0.75 max. Ni, 1 max. Mn, bal Fe.
Cast: 240 Brin
Hardened: 620 Brin.
For wear resistant castings; corrosion resistant.

COOPER ALLOY 17.
M-36; 0.20 max C, 18-20 Cr, 8-10 Ni, bal Fe
Annealed: 75,000-85,000 TS; 40,000-50,000 YS, 40-50 El; 40-55 RA; 180-160 Brin.
For oil refineries, canneries, dairies, pump valves, cocks, fittings; best general acid resisting base iron; "Sweetaloy No. 17."

COOPER ALLOY 17-4 PH.
M-36; 0.05 C, 16.5 Cr, 4.5 Ni, 0.65 Si, 2.8 Cu, bal Fe.
Heat treated: 165,000 TS; 144,000 YS; 19 El; 49 RA; 401 Brin.
For high strength, corrosion resistant parts and castings; heat treatable, stainless.

COOPER ALLOY 17C.
M-36; 0.07-1.0 C, 18 Cr, 8 Ni, bal Fe.
Cast: 84,000 TS; 42,000 YS; 47 El; 50 RA; 165 Brin.
For oil refineries, pumps, dyeing and bleaching equipment, corrosion and heat resistant.

COOPER ALLOY 17ELC.
M-36; 0.025 C, 20 Cr, 8.5 Ni, 1.25 Si, bal Fe.
Annealed: 85,000 TS; 43,000 YS; 54 El; 59 RA; 145 Brin.
For chemical plant equipment, stainless castings; stainless, austenitic.

COOPER ALLOY 17G.
M-36; 0.15-0.30 C, 17-20 Cr, 8-11 Ni, 0.5 max Mo, bal Fe.
Annealed: 80,000 TS; 38,000 YS; 46 El; 170 Brin.
For chemical plant equipment, agitators, mixers, filter presses, valve bodies, pump components.
MIL-S-17509 Cl I, corrosion resistant, austenitic.

COOPER ALLOY 17GM
M-36, 0.06-0.08 C, 17-19 Cr, 12-14 Ni, 0.5 max Mo, bal Fe
Annealed: 78,000 TS; 38,000 YS; 55 El; 140 Brin.
For chemical plant equipment, agitators, mixers, vessels, valve bodies, pumps
Corrosion resistant, austenitic

COOPER ALLOY 17 LL.
M-36, 0.2 max. C, 2 max. Si, 18-20 Cr, 8-10 Ni, 0.2-0.3 Se, bal Fe
W Q 75,000-85,000 TS, 40,000-50,000 YS; 55-40 El, 55-40 RA, 130-160 Brin.
For fittings, valves, pumps, corrosion resistant, free-cutting

COOPER ALLOY 17M-ELC
M-36, 0.025 C, 19 Cr, 12 Ni, 1.25 Si, 2.5 Mo, bal Fe.
Annealed: 84,000 TS, 43,000 YS, 46 El, 59 RA
For chemical plant equipment and castings; acid resistant, austenitic

COOPER ALLOY 17 Mo.
M-36, 0.20 max C, 18-20 Cr, 8-10 Ni, 3 Mo, bal Fe
Annealed 85,000 TS; 45,000 YS; 35 El; 35 RA; 155 Brin
For stainless, heat and corrosion resisting parts pumps; corrosion and heat resistant

COOPER ALLOY 17-S
M-36, 0.10 C, 18 Cr, 8-10 Ni, bal Fe
Cast 84,500 TS; 45,000 YS; 50 El, 50 RA; 165 Brin
For stainless parts, valves, pumps, fittings, stainless, corrosion resistant

COOPER ALLOY 17SCB
M-36, 0.8 C, 18-20 Cr, 8-10 Ni, Cb = 10 × C, bal Fe.
Cast. 80,000 TS, 40,000 YS; 47 El, 50 RA, 150 Brin
Annealed: 90,000 TS; 55,000 YS, 55 El, 55 RA; 140 Brin.
For stainless steel castings, pumps, oil refining; stainless, resists acids, stabilized tough welding.

COOPER ALLOYS 17 Se.
M-36; C, 18-20 Cr, 8-10 Ni, 0.30 Se, bal Fe.
Cast: 85,000 TS; 45,000 YS, 50 El; 50 RA; 165 Brin
For stainless parts; stainless, corrosion resistant; free machining.

COOPER ALLOY 17SELC.
M-36, 0.03 max C, 17-21 Cr, 8-12 Ni, bal Fe.
Annealed: 77,000 TS, 37,000 YS, 55 El; 140 Brin.
For autoclaves, filter press plates, pasteurizers, mixing kettles, pumps, pump sleeves, spray nozzles.
ACI-CF3; AISI 304, austenitic, stainless.

COOPER ALLOY 17 SLL.
M-36; 0.10 max. C, 2 max. Si, 18-20 Cr, 8-10 Ni, 0.2-0.3 Se, bal Fe.
W.Q.: 70,000-80,000 TS; 35,000-45,000 YS; 60-45 El; 60-45 RA; 130-160 Brin.
For fittings, valves, pumps; corrosion resistant, free-cutting.

COOPER ALLOY 17SM.
M-36; 0.08 max C, 19 Cr, 10 Ni, 1.25 Si, 2.5 Mo, bal Fe.
Water quenched: 90,000 TS; 55,000 YS, 50 El; 55 RA; 155 Brin.
For paper mill equipment; corrosion resistant, austenitic.

COOPER ALLOY 17SMELC.
M-36; 0.3 max C, 17-21 Cr, 9-13 Ni, 2-3 Mo, bal Fe.
Annealed: 80,000 TS; 42,000 YS; 50 El; 155-170 Brin.
For chemical plant equipment, acid mixers, filter presses, acid pumps, spray nozzles
ACI-CF3M; AISI 316 L.
Corrosion resistant, austenitic

COOPER ALLOY 17-S-Mo.
M-36; 0.10 max C, 18-20 Cr, 8-12 Ni, 2-3 Mo, bal Fe.
Cast: 85,000 TS; 45,000 YS; 50 El; 50 RA; 165 Brin.
For stainless, heat and corrosion resisting parts, valves; corrosion resistant, stainless.

COOPER ALLOY 17XM.
M-36; 0.08 max C, 18-21 Cr, 9-13 Ni, 3-4 Mo, bal Fe.
Annealed 80,000 TS, 42,000 YS; 50 El, 155-170 Brin.
For chemical plant equipment, acid mixers and pumps, valves, filter presses, spray nozzles.
ACI-CG8M; AISI 317.
Corrosion resistant, austenitic.

COOPER ALLOY 18
M-36, 0.35 max C, 20-22 Ni, 8-10 Cr, bal Fe.
Annealed: 79,000-65,000 TS; 46,500-35,000 YS; 20-30 El, 30-35 RA; 150-180 Brin.
For cracking coil plugs, in oil refineries, thermocouple wells, electric resistance grids; erosion, heat and corrosion resistant; "Sweetaloy No. 18."

COOPER ALLOY 18-8.
M-36; 0.1 C, 18 Cr, 8 Ni, bal Fe.
For stainless parts, austenitic, stainless.

COOPER ALLOY 19.
M-36; 0.35 max C, 27-30 Cr, 0.5-3 Ni, bal Fe.
Cast: 50,000-90,000 TS; 35,000-60,000 YS; 3-1 El; 5-1 RA; 170-205 Brin.
For equipment to resist S gases at high temp., corrosive acids, molten metals; excellent abrasion resistance; "Sweetaloy No. 19."

COOPER ALLOY 19A.
M-36; 0.35 max C, 26-30 Cr, 2-3 Ni, bal Fe.
Cast: 75,000-100,000 TS; 50,000-65,000 YS; 25-15 El; 25-15 RA; 190-210 Brin.
For furnace parts, stainless castings; heat and corrosion resistant.

COOPER ALLOY 19AH
M-36; 1.0 C, 28 Cr, 3 Ni, 0.75 Si, bal Fe.
Cast: 350 Brin.
For roasting furnace blades; corrosion, heat and abrasion resistant.

COOPER ALLOY 19 AM.
M-36; 0.10 max C, 28 Cr, 3 Ni, 0.75 Si, 1.5 Mo, bal Fe.
Cast: 90,000 TS; 75,000 YS; 10 El; 20 RA; 200 Brin.
For paper mill equipment; corrosion resistant.

COOPER ALLOY 19 AMO.
M-36; 0.35 max. C, 27-30 Cr, 2-4 Ni, 1.0-1.5 Mo, bal Fe.
Annealed: 90,000 TS; 75,000 YS; 10 El; 20 RA; 200 Brin.
For soot blower parts; acid mine water pumps; heat and corrosion resistant.

COOPER ALLOY 19B.
M-36, 0.10 max C, 26-30 Cr, 3-4 Ni, 1.0 max Si, 0.1 max Mn, bal Fe.
Cast: 90,000 TS; 65,000 YS; 18 El; 185 Brin.
For chemical and food processing equipment, fittings, gears, impellers, jet engine components.
ACI Type CC-10, heat and abrasion resistant

COOPER ALLOY 20.
M-36; 0.3-0.5 C, 34-37 Ni, 13-18 Cr, bal Fe.
Cast: 60,000-70,000 TS; 35,000-40,000 YS; 6-12 El; 6-12 RA; 165-185 Brin.
For furnace parts, enameling racks, tube supports, retorts; resists heat and flue gases at high temperature, "Sweetaloy No. 20."

COOPER ALLOY 20-10.
M-36; 0.12 max C, 20.5 Cr, 10.5 Ni, 1.25 Si, bal Fe.
Water quenched: 80,000 TS; 50,000 YS, 55 El; 55 RA; 150 Brin.
For stainless parts; stainless, austenitic.

COOPER ALLOY 21.
M-36, 0.3-0.5 C, 62-68 Ni, 12-18 Cr, bal Fe.
Cast: 60,000-75,000 TS, 30,000-50,000 YS; 4-10 El; 4-10 RA; 170-185 Brin.
For carburizing boxes, pots, retorts, heat resisting alloy; "Sweetaloy No. 21."

COOPER ALLOY 21A.
M-36; 0.2 max C, 18-20 Cr, 24-26 Ni, 2-4 Mo, 1.5 Si, bal Fe.
Annealed: 65,000 TS, 30,000 YS; 25 El; 25 RA; 130 Brin.
For heat and corrosion resisting parts; corrosion resistant to hot H_2SO_4.

COOPER ALLOY 21 B.
M-36; 0.07 max C, 1.0-1.5 Si, 2-4 Mo, 18-20 Cr, 22-25 Ni, 1-2 Cu, bal Fe
W.Q.: 65,000-75,000 TS, 30,000-40,000 YS; 45-25 El; 50-25 RA; 130-160 Brin.
For fittings, valves; corrosion resistant, austenitic.

COOPER ALLOY 21C.
M-36, 0.07-0.10 C, 15-20 Cr, 20-25 Ni, 3 Mo, 1.5 Si, bal Fe.
Cast
For acid resistant castings; stainless.

COOPER ALLOY 21 D .
M-36; 0.07 max. C, 3.0-3.5 Si, 2.5-3.0 Mo, 18-20 Cr, 0.4-0.7 Mn, 24-25 Ni, 1.5-2.0 Cu, bal Fe.
W.Q.: 65,000-75,000 TS; 30,000-40,000 YS; 40-25 El; 40-25 RA; 130-160 Brin.
For fittings, valves; corrosion resistant, austenitic.

COOPER ALLOY 21 E.
M-36; 0.15 max. C, 1.5 max. Si, 20 Cr, 80 Ni, 1 max. Mn.
Cast: 70,000-95,000 TS; 30,000-45,000 YS; 30-10 El; 30-10 RA; 160-190 Brin.
For heat resistant castings; Nichrome type alloy.

COOPER ALLOY 22.
M-36; 0.3-0.4 C, 24-28 Cr, 11-14 Ni, bal Fe.
Cast: 80,000-100,000 TS; 40,000-55,000 YS; 20-30 El; 20-30 RA; 165-190 Brin.
For sulfite pulp mills, digester fittings, pump valves, furnace parts; resists sulfurous acids and ammonia; "Sweetaloy No. 22."

COOPER ALLOY 22M.
M-36; 0.2-0.5 C, 24-28 Cr, 10-12 Ni, 3 Mo, bal Fe.
For valves, pumps, fittings; resists sulfite liquors.

COOPER ALLOY 22 P.
M-36; 0.3 max. C, 2 max. Si, 27-30 Cr, 1.5 max. Mn, 8-11 Ni, bal Fe.
Cast: 80,000-100,000 TS; 40,000-55,000 YS; 30-10 El; 30-10 RA; 170-210 Brin.
For furnace parts, sulfite fittings; heat and corrosion resistant, austenitic.

COOPER ALLOY 22PM.
M-36; 0.2-0.5 C, 29 Cr, 9 Ni, 3 Mo, bal Fe.
Cast: 90,000 TS; 60,000 YS; 30 El; 180 Brin.
For pumps, valve fittings; resists sulfite liquors.

COOPER ALLOY 22 S.
M-36; 0.2 max. C, 1.5 max Mn, 2 max. Si, 24-28 Cr, 11-14 Ni, bal Fe.
W.Q.: 80,000-90,000 TS; 35,000-55,000 YS; 45-25 El; 55-25 RA; 135-190 Brin.
For fittings, valves; corrosion and heat resistant to hot HNO_3.

COOPER ALLOY 22S Cb.
M-36; 0.10 max C, 25 Cr, 12 Ni, 1 Si, 1 max Cb, bal Fe.
Water quenched: 90,000 TS; 55,000 YS; 25 El; 25 RA; 175 Brin.
For corrosion and heat resistant parts; resists intergranular corrosion.

COOPER ALLOY 22 SMO.
M-36; 0.1 max. C, 2 max. Si, 24-28 Cr, 11-14 Ni, 2.5-3.5 Mo, bal Fe.
W.Q.: 85,000-95,000 TS; 45,000-70,000 YS; 25-15 El; 25-15 RA; 160-190 Brin.
For valves, fittings, pumps; corrosion resistant to hot sulfite liquors.

COOPER ALLOY 22 W.
M-36; 0.15-0.3 C, 0.75-2.0 Si, 20-25 Cr, 10-14 Ni, 2.5-3.5 W, bal Fe.
Normalize: 93,000 TS; 52,000 YS; 31 El; 30 RA; 185 Brin.
For highly stressed castings; heat and creep resistant, austenitic.

COOPER ALLOY 23.
M-36; 0.35-1.0 C, 15-19 Cr, 64-68 Ni, 2.5 max Si, 2.0 max Mn, 0.5 max Mo, bal Fe.
Cast: 65,000 TS; 36,000 YS; 9 El; 176 Brin.
Aged: 73,000 TS; 44,000 YS; 9 El; 185 Brin.
For autoclaves, carburizing boxes, cyanide pots, roller hearths, salt pots.
ACI-HX, heat and corrosion resistant.

COOPER ALLOY 24.
M-36; 0.35-0.75 C, 17-21 Cr, 37-41 Ni, 2.5 max Si, 2 max Mn, 0.5 max Mo, bal Fe.
As cast: 70,000 TS; 40,000 YS; 9 El; 170 Brin.
For carburizing retorts, cyanide pots, dipping baskets, muffles, lead pots.
ACI-HU, heat and corrosion resistant.

COOPER ALLOY 25.
M-36; 0.2-0.5 C, 19-23 Cr, 23-27 Ni, 2 max Si, 2 max Mn, 0.5 max Mo, bal Fe.
Cast: 68,000 TS; 38,000 YS; 17 El; 160 Brin; At 1400°F: 42,000 TS; 11 El.
For brazing fixtures, torch nozzles, trays, furnace parts, radiant tubes.
ACI-HN, heat and corrosion resistant.

COOPER ALLOY 25-20.
M-36; 0.20-0.30 C, 24-26 Cr, 19-20 Ni, bal Fe.
Cast: 65,000 TS; 45,000 YS; 22 El; 25 RA; 180 Brin.
For furnace parts; heat resistant over 1600°F.

COOPER ALLOY 25-20S.
M-36; 0.20 max C, 23-27 Cr, 19-22 Ni, 2 max Si, 1.5 max Mn, bal Fe.
Annealed: 76,000 TS; 38,000 YS; 37 El; 144 Brin.
For furnace parts, salt pots, heat treating boxes, digesters, pumps.
Heat and corrosion resistant, austenitic.
ACI Type CK-20.

COOPER ALLOY 26.
M-36; 0.2-0.6 C, 28-32 Cr, 18-22 Ni, 2 max Si, 2 max Mn, 0.5 max Mo, bal Fe.
Cast: 82,000 TS; 52,000 YS; 19 El; 192 Brin.
For enameling furnace parts, furnace skids, stack dampers, radiant tubes.
ACI-HL, heat and corrosion resistant.

COOPER ALLOY 27.
M-36; 0.2-0.5 C, 26-30 Cr, 14-18 Ni, 2 max Si, 2 max Mn, 0.5 max Mo, bal Fe.
Cast: 80,000 TS; 45,000 YS; 12 El; 180 Brin.
For billet skids, brazing fixtures, conveyor rollers, furnace rails, lead pots, retorts.
ACI-HI, heat and corrosion resistant.

COOPER ALLOY 28.
M-36; 0.2-0.4 C, 19-23 Cr, 9-12 Ni, 2.0 max Si, 2 max Mn, 0 5 max Mo, bal Fe.
Cast: 85,000 TS; 45,000 YS, 35 El; 165 Brin.
For arc furnace electrodes, annealing boxes, trays and baskets, burner tips, conveyor belts and chains
ACI-HF; AISI 302 B, corrosion resistant, austenitic.

COOPER ALLOY 29.
M-36; 0.2-0.5 C, 26-30 Cr, 8-11 Ni, 2.0 max Si, 2 max Mn, 0.5 max Mo, bal Fe.
Cast: 95,000 TS; 45,000 YS; 20 El; 200 Brin.
For billet skids, furnace chains and conveyors, oil burner parts, rabble arms and blades, recuperators.
ACI-HE, heat and corrosion resistant, austenitic.

COOPER ALLOY 30.
M-36; 0.5 max C, 26-30 Cr, 4-7 Ni, 2 max Si, 1.5 max Mn, 0.5 max Mo, bal Fe.
Cast: 85,000 TS, 48,000 YS; 16 El; 190 Brin.
For brazing furnace parts, furnace blowers, rabble shoes, salt pots, recuperators, gas burners.
ACI-HD, heat and corrosion resistant.

COOPER ALLOY 31.
M-36; 0.2 max C, 8-10 Cr, 1.0 max Si, 0.35-0.65 Mn, 0.9-1.2 Mo, bal Fe.
Annealed: 95,000 TS; 65,000 YS; 23 El; 180 Brin.
Normalized: 107,000 TS; 81,000 YS; 21 El; 220 Brin.
At 1100°F; 44,000 TS; 32,000 YS; 36 El; 58 RA.
For furnace rollers, refinery fittings, trunnions, fan blades.
ACI-HA castings, heat and corrosion resistant.

COOPER ALLOY 58.
M-36; 0.2 max C, 23 Cr, 58 Ni, 0.5 Si, 6 Mo, 7 Cu, 1.5 W, bal Fe.
Cast: 65,000 TS; 55,000 YS; 5 El; 5 RA; 175 Brin.
For H_2SO_4 equipment; "Illium G"; acid resistant.

COOPER ALLOY 60.
M-36; 0.05 max C, 58-62 Cr, 1.0 max Si, 0.3 max Mn, 1.5 max others, bal Ni.
Cast: 137,500 TS; 90,000 YS; 1.5 El; 1.0 RA; 375 Brin.
For furnace parts, where fuel oil containing vanadium pentoxide is burned.
Heat resistant.

COOPER ALLOY 531.
M-36; 0.1 max C, 10-14 Cr, 27-30 Ni, 3-4 Mo, 3-4 Cu, 0.4-0.6 Sb, 0.5-0.8 Si, bal Fe.
Cast: 50,000-70,000 TS; 40,000-50,000 YS.
For castings for oil refineries and chemical plants; corrosion and heat resistant.

COOPER ALLOY CD4MCu.
M-36; 0.04 C, 25-27 Cr, 4.75-6.0 Ni, 1.75-2.25 Mo, 2.75-3.25 Cu, bal Fe
Annealed: 112,700 TS; 81,000 YS, 28 El; 248 Brin.
Aged: 141,000 TS; 100,000 YS; 25 El; 302 Brin.
For pumps, valves, impellers, high pressure components
Precipitation hardening, corrosion and heat resistant.

COOPER ALLOY FA 20.
M-36, 0.07 max C, 1.5 max Si, 3.5 Mo, 19-21 Cr, 2.5 max Mn, 28-30 Ni, 4-5 Cu, bal Fe.
W.Q.: 65,000-85,000 TS; 40,000-50,000 YS; 45-35 El; 50-40 RA; 140-150 Brin.
For fittings, valves, pumps, corrosion resistant; austenitic.

COOPER ALLOY FA20Cb.
M-36, 0.07 max C, 19-22 Cr, 27.5-30.5 Ni, 2-3 Mo, 3-4 Cu, 1 max Cb, bal Fe.
Annealed 75,000 TS; 45,000 YS; 40 El; 145 Brin.
For fittings, valves, pumps.
ACI-CN7MCb, corrosion resistant, austenitic.

COOPER ALLOY KA-4.
M-36, 0.20 C, 18 Cr, 8 Ni, 3 Mo, bal Fe.
For stainless parts; corrosion resistant.

COOPER ALLOY KNC-3
M-36, 0.2-0.4 C, 24-28 Cr, 19-22 Ni, 1-3 Si, 1-2 Mn, bal Fe
Cast. 65,000-85,000 TS; 35,000-50,000 YS; 10-30 El, 10-30 RA, 170-195 Brin.
For heat and corrosion resistant parts; furnace parts; heat and corrosion resistant.

COOPER ALLOY MM
M-36, 0.25 C, 63 Ni, 1.5 Si, 2.5 Fe, bal Cu.
Cast 65,000 TS, 33,000 YS; 25 El; 28 RA; 150 Brin
For chemical plant equipment, corrosion resistant.

COOPER ALLOY MM-H.
M-36, 0.25 C, 63 Ni, 3 Si, 2 Fe, bal Cu.
Cast: 80,000 TS; 50,000 YS; 10 El; 14 RA; 225 Brin
For valve trim, valve parts, pump and turbine parts; corrosion and abrasion resistant.

COOPER ALLOY MM-S.
M-36; 0.25 C, 63 Ni, 4 Si, 2 Fe, bal Cu.
Age hardened: 130,000 TS; 100,000 YS; 2 El; 2 RA, 350 Brin.
For valve trim, pump and turbine parts, age-hardenable, corrosion resistant.

COOPER ALLOY P.H.20.
M-36; 0.07 max C, 21 Cr, 29 Ni, 3 Mo, 3 Cu, 1 max Cb, 0.15 N, bal Fe.
For corrosion resistant and non-galling castings; austenitic, stainless, age-hardenable.

COOPER ALLOY P.H.55A.
M-36; 0.08 max C, 3.0-3.75 Si, 20 Cr, 9 Ni, 4 Mo, bal Fe.
For corrosion resistant castings; austenitic, stainless, high strength.

COOPER ALLOY P.H.55B.
M-36; 0.08 max C, 20 Cr, 9 Ni, 5 Mo, 4 Cu, bal Fe.
For corrosion resistant castings; corrosion and shock resistant.

COOPER ALLOY P.H.55C.
M-36; 0.08 max C, 3.5 Si, 20 Cr, 9 Ni, 4 Mo, 3 Cu, bal Fe.
For corrosion resistant castings; stainless, austenitic.

COOPER ALLOY PH-55D.
M-36; 0.05 max C, 18-21 Cr, 9-12 Ni, 3-5 Si, 3.75-4.25 Mo, 0.75-1.25 Cb, 0.10 N, bal Fe.
For pump parts; precipitation hardening, corrosion and abrasion resistant.

COOPER ALLOY S-21 W.
M-36; 0.40 max C, 15 Cr, 25 Ni, 3.5 W, bal Fe.
For heat, erosion and corrosion resistant parts; heat and corrosion resistant.

COOPER ALLOY S-23.
M-36; 0.20 max C, 2.0 Cr, 40 Ni, bal Fe.
For temperature control application; low thermal expansion.

COOPER ALLOY V2B.
M-36; 0.07 max C, 19 Cr, 10 Ni, 2 Cu, 3.5 Mo, 3 Si, 0.15 Be, bal Fe.
Rolled 140,000 TS; 109,000 YS, 13 El, 16 RA; 302 Brin.
Cast: 109,000 TS, 88,400 YS; 16 El; 22 RA; 269 Brin.
Heat treated: 152,000 TS, 122,000 YS; 3 El; 2 RA; 365 Brin.
For valve discs, plug cocks, impellers, sleeves, stainless, non-galling, hardenable.

COOPERITE
Eng., 80 Ni, 14 W, 6 Zr
For cutting tools; extreme hardness.

COOPER'S SPECULUM.
Eng., 57.8 Cu, 27.3 Sn, 3.6 Zn, 1.2 As, 10 Pt.
For mirrors, reflectors

COPALOY.
M-545; Sn, Sb, Pb.
For bearings, antifriction

COPAN.
U.S; 80-90 Sn, 10-15 Sb, 2-5 Cu, 0.2 Pb.
For bearings; Babbitt.

COPEL.
M-65; 55 Cu, 45 Ni.
60,000 TS, 40 El.
For electrical instruments, rheostats, hot resistances; resistance alloy up to 800°F.

COPELMET-D.
M-1552; W + Cu.
For electrical contacts, welding electrodes.

COPELMET-P.
M-1552; W + Cu.
For electrical contacts, resistance welding electrodes.

COPELMET-PW.
M-1552; W + Cu.
For electrical contacts, resistance welding electrodes.

COPELMET-PW4.
M-1552; WC + Cu.
For facing of electrical contacts, spot, projection and butt welding electrodes, hot riveting dies.
Sintered carbide.

COPERNICK.
M-205; 50 Fe, 50 Ni.
For transformer cores; resistance alloy.

COPPCO 75.
M-682; 0.75 C, 0.30 Mn, 0.25 Si, bal Fe.
For cutters, tools, shears; Type W1; water hardened.

COPPCO 110.
M-682; 1.1 C, 0.30 Mn, 0.25 Si, bal Fe.
For cutters, knives, drills, hobs, reamers; Type W1; water hardened.

COPPCO 120.
M-682; 1.2 C, 0.3 Mn, 0.5 Si, 0.2 Cr, bal Fe.
For knives, drills, reamers, taps; Type W1; water hardened.

COPPCO 200.
M-682; 0.9 C, 1.15 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, dies, taps, guages, master tools; non-deforming, oil hardening.

COPPCO ACE.
M-682; 0.2-0.7 C, 1.5 Ni, 0.55 Cr, bal Fe.
For tools, cutters, dies, punches; oil hardening.

COPPCO ACE A TEMPER.
M-682; 0.7 C, 0.55 Cr, 1.5 Ni, bal Fe.
For punches, collets, forming dies, tough.

COPPCO ACE B TEMPER.
M-682; 0.50 C, 0.55 Cr, 1.5 Ni, bal Fe.
For collets, shear blades, pawls, tough.

COPPCO ACE-C TEMPER.
M-682; 0.20 C, 0.6 Mn, 0.55 Cr, 1.5 Ni, bal Fe.
For carburized tools and parts; tough

COPPCO CRO-TUNG
M-682, 0.5 C, 1.4 Cr, 2.5 W, bal Fe
For punches, chisels, tools; tough

COPPCO EXTRA.
M-682; 0.95 C, 0.25 Mn, bal Fe
For cold heading dies, pneumatic piston tools, tough.

COPPCO FAST FINISHING.
M-682; 1.3 C, 3.75 W, bal Fe.
For fast finishing tools, cutters, oil hardened

COPPCO HOT WORK NO 1.
M-682; 0.35 C, 0.9 Si, 5 Cr, 1.5 Mo, 1.1 W, bal Fe.
For hot work tools and dies, punches, hot work steel.

COPPCO SHOCK.
M-682, 0.55 C, 0.80 Mn, 1.5 Si, 0.2 Cr, 0.35 Mo, bal Fe.
For chisels, pneumatic tools; tough, resists shock.

COPPCO SPECIAL
M-682; 0.98 C, bal Fe.
For burnishing tools, dies, reamers, cutters; water hardening.

COPPCO STANDARD
M-682; 0.9 C, 1.2 Mn, bal Fe.
For broaches, gauges, milling cutters, reamers; non-deforming.

COPPCO UNIVERSAL.
M-682; 1.0 C, 0.25 Mn, 0.25 Si, bal Fe.
For pneumatic tools, punches, dies; water hardening.

COPPER 1[illegible] OF.
M-279; 99.95 min Cu.
Ann: 26,000-36,000 TS; 6000-12,000 YS; 20-44 El.
Cold Rolled: 34,000-60,000 TS; 30,000-58,000 YS, 1-33 El.
For electrical assemblies and severely formed parts; resists hydrogen embrittlement.

COPPER 104 OFS.
M-279; 99.95 min Cu + Ag, 0.027 min Ag.
Ann: 26,000-36,000 TS; 6000-12,000 YS; 20-44 El.
Cold Rolled: 34,000-60,000 TS; 30,000-58,000 YS; 1-33 El.
For electrical assemblies and severely formed parts; resistant to hydrogen embrittlement and elevated temperature softening

COPPER 110 ETP.
M-279; 99.9 min Cu.
Ann: 26,000-36,000 TS; 6,000-12,000 YS; 20-44 El.
Cold rolled: 34,000-60,000 TS; 30,000-58,000 YS; 1-33 El.
Drawn or formed electrical shells and parts; General purpose copper for electrical parts.

COPPER 0112, Low Oxygen ETP.
M-279, 99.90 min Cu, 0.02 max oxygen.
Ann. 26,000-36,000 TS, 6,000-12,000 YS, 20-44 El.
Cold rolled. 34,000-60,000 TS; 30,000-58,000 YS; 1-33 El.
Formed and deep drawn parts, excellent ductility (soft), good tear resistance.

COPPER 0117, Low Oxygen STP
M-279; 99.90 min Cu, 0.034 min Ag, 0.02 max Oxygen
Ann: 26,000-36,000 TS, 6000-12,000 YS; 20-44 El.
Cold rolled: 34,000-60,000 TS, 30,000-58,000 YS; 1-33 El
For commutator and collector rings, severly formed parts, resists softening at elevated temperatures

COPPER 122 DHP
M-279, 99.90 min Cu, 0.015 min P
Ann 26,000-36,000 TS, 6000-12,000 YS; 20-44 El.
For deep drawn copper shells, brazed or welded assemblies.
Cold rolled 34,000-60,000 TS, 30,000-58,000 YS. 1-33 El
For formed copper parts

COPPER 129 FRSTP
M-279, 99.9 min Cu, 0.054 min Ag.
Ann: 26,000-36,000 TS, 6000-12,000 YS, 20-44 El
Cold rolled 34,000-60,000 TS, 30,000-58,000 YS, 1-33 El.
Excellent solderability and high softening temperature
For radiator air channels, radiator fins

COPPER ALLOY Z30A
U.S., 57 min Cu, 1.5 max Pb, 30 min Zn.
Die cast 55,000 TS, 30,000 YS, 15 El, 108 Brin.
For die castings, hardware; yellow brass, good machinability

COPPER ALLOY ZS144A
80-83 Cu, 3.75-4.25 Si, bal Zn
Die Cast. 85,000 TS, 50,000 YS; 25 El; 70 Charpy; B 85-90 Rock.
For die castings.

COPPER ALLOY ZS331A.
63-67 Cu, 0.75-1.25 Si, bal Zn.
Die Cast: 70,000 TS, 35,000 YS; 25 El, 50 Charpy, B 68-72 Rock.
For die castings.

COPPER ALNICO.
M-271, 9-11 Al, 16-18 Ni, 12-13 Co, 5.5-6.5 Cu, bal Fe
For magnets; Alnico II.

COPPER ARC.
M-685; 0.2 C, 0.5 Cu, bal Fe.
For welding electrodes; for cast iron.

COPPER BEARING LOW-METALLOID.
M-377; C, 0.20 min Cu, bal Fe.
For culverts, building, general fabrication; hot rolled, annealed and galvanized sheets.

COPPER-BERYLLIUM 50.
M-1037, M-646; 0.38 Be, 1.55 Co, 1.0 Ag, bal Cu.
Annealed: 45,000 TS; 27 El; 67 Brin.
Cold rolled: 70,000 TS; 13 El; 132 Brin.
Aged: 120,000 TS, 14 El; 234 Brin.
For springs, contacts, diaphragms; corrosion and wear resistant.

COPPERCLAD.
M-725, Ni steel core with pure Cu sleeve.
For sealing in vacuum tubes; 42% Ni in steel.

COPPERIOR.
M-631; 0.1 C, Cu, bal Fe.
For roofing, culverts; corrosion resistant.

COPPER M3.
Russian, 99.86 Cu, 0.01 Pb, 0.03 Zn, 0.01 Fe, 0.02 Sn
Rolled 32,000 TS, 43 El; 69 RA

COPPER-NICKEL 30%.
M 297; 30-33 Ni, 70-67 Cu.
Annealed: 60,500 TS; 34 El.
For electrical resistors, condensers, corrosion resisting apparatus, corrosion resistant

COPPER-NICKEL 40%.
M 297; 40-45 Ni, 60-55 Cu
Annealed 70,000 TS, 38 El.
For electrical resistors, thermocouple element, heat resistant

COPPER NICKEL 67%
M-297, 67 Ni, 33 Cu
Annealed 71,500 TS, 35-40 El
For machine parts, in locomotives, ships, turbines, pumps, corrosion resisting containers, corrosion resistant

COPPER NICKEL 401
M-1499; 55 Cu, 45 Ni
For vacuum tube parts, parts for electron equipment, corrosion resistant

COPPEROID
M-531; C, 0.2 min Cu, bal Fe.
For sheets for construction purposes, automobile furniture, resists rust and atmospheric corrosion

COPPEROID
M-538, Cu coated Zn
For fabricated parts, easily stamped, formed, drawn

COPPEROID
U.S., Cu alloy
For bearings, copper bearing alloy

COPPER'S GOLD.
Eng., 81-67 Cu, 19-30 Pt, 0-4 Zn
For jewelry, ornaments, corrosion resistant.

COPPER-SILICON ALUMINUM 8-2.
M-137; 8 Cu, 2.5 Si, 0.8 Fe, bal Al
Cast: 17,000 TS, 1 El; 70 Brin.
For gear boxes, radiator tanks; non-hardenable.

COPPER-SILICON STEEL.
M-747.
Cast 107,000 TS; 92,000 YS, 1.7 El; 2.2 RA; 269 Brin.
For cast crankshafts.

COPPER'S MIRROR.
Eng.; 58 Cu, 28 Sn, 9.5 Pt, 3.5 Zn, 1.5 As.
For reflectors, mirrors; corrosion resistant

COPPER'S PEN METAL-1.
Eng.; 50 Cu, 25 Au, 25 Ag.
For pen points; corrosion resistant.

COPPER'S PEN METAL-2.
Eng.; 12 Cu, 38 Ag, 50 Pt.
For pen points; corrosion resistant.

COPPER STEEL.
M-377; C, 0.2 min Cu, bal Fe.
For building and general fabrication; bars, plates, shapes.

COPPER STEEL.
M-377; C, 0.20 min Cu, bal Fe.
For track bolts, spikes, tie plates; heat treated bolts.

COPPER STEEL.
M-377; C, 0.20 min Cu, bal Fe.
For woven wire fencing and barbed wire; wire products.

COPPER STEEL.
M-538, copper coated steel.
For fabricated parts; easily stamped, formed, drawn.

COPPER STEEL.
U.S.; 0.37 C, 0.17 Mn, 4 Cu, 0.22 Si, bal Fe.
Rolled: 138,000 TS; 116,000 YS; 11 El, 23 RA; 302 Brin
Annealed: 97,000 TS, 80,500 YS, 16 El; 42 RA, 212 Brin
For structural parts; corrosion resistant

COPPER TIN
M-538, copper coated Sn.
For fabricated parts; easily stamped, formed, drawn.

COPPERWELD WIRE
M-711, Cu on steel core; for cable; clad.

COPPRO NITRIDING G
M-682, 0.3-0.4 C, 0.9-1.4 Cr, 0.15-0.25 Mo, 0.85-1.2 Al, bal Fe
For nitrided parts; nitriding steel

COPPRO NITRIDING G-MODIFIED
M-682; 0.38-0.45 C, 1.4-1.8 Cr, 0.3-0.45 Mo, 0.85-1.2 Al, bal Fe
For nitrided aircraft parts ,nitriding steel

COPPRO NITRIDING H
M 682, 0.2-0.3 C, 0.9-1.4 Cr, 0.15-0.25 Mo, 0.85-1.2 Al, bal Fe
For nitrided parts, nitriding steel

COPREX
M-824, Cu alloy
For bearings; sintered

COP-SIL-LOY.
M-1217, Cu-Ag-Pb.
For reducing wear on friction surfaces; low coefficient of friction

COP-SIL-LOY.
M-1217, 47-53 Pb, bal Cu.
For special parts; sintered

CORBIN
Eng.; 87.5 Al, 12.5 Cu.
For pistons, non-hardenable.

CORE IRON
M-32; 0.06 C, 1 V, bal Fe.
For magnetic and electrical equipment; high permeability.

CORINTH.
M-1; 0.90 C, 0.30 Mn, bal Fe.
For tools, cutters, water hardening.

CORMET-A.
M-1506; nickel.
Sintered: 8200 TS; 8100 YS.
For non-contacting conveyor for extra sensitive materials; sintered pourous Ni, max operating temperature 575°F.

CORMIN BRONZE.
44 Cu, 37 Ni, 11 Sn, 8 Pb.
For hardware; corrosion resistant.

CORNISH BRONZE.
England; 9.6 Sn, 16.5 Pb, 0.8 P, bal Cu.
For bearings; heavy duty.

CORNIX-1.
M-501; 0.20 C, 0.4 Mn, 0.3 Si, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El; B 92 Rock.
For acid containers, mixers, chemical plant and oil refinery equipment.
Corrosion resistant, hardenable.

CORNIX-2.
M-1307; 0.20 C, 0.5 Mn, 12 Cr, 1.15 Mo, 0.5 Ni, 0.3 V, bal Fe.
Annealed: 95,000 TS; 40,000 YS; 25 El; 50 RA, B 92 Rock.
Heat treated: 240,000 TS; 205,000 YS; 9 El; 26 RA; C 50 Rock.
For surgical instruments, hardware, oil refinery and chemical plant equipment.
Corrosion resistant, hardenable.

CORNIX-10.
M-912; 0.10 C, 16 Cr, 13 Ni, Cb, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 50 El, B 80 Rock
For acid containers, mixers, digesters, welded tanks and structures.
Type 16-13 Cb stainless steel, austenitic, corrosion resistant.

CORNIX-40.
M-912; 0.08 C, 16 Cr, 14 Ni, Mo, Cb, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 40 El; B 85 Rock.
For acid containers, mixers, digesters, welded tanks and structures.
Type 16-14 Mo Cb stainless steel, acid resistant, austenitic.

COROMANT C1.
M-101, M-101A, WC, Co.
For cutting tools; sintered carbide.

COROMANT C3
M-101, M-101a; WC, Co.
For finishing cutting tools; sintered carbide.

COROMANT C5.
M-101, M-101a, TaC, WC, Co.
For cutting tools for roughing; sintered carbide.

COROMANT C6.
M-101, M-101a; WC, TiC, Co
For general purpose cutting tools; sintered carbide

COROMANT C7.
M-101, M-101a, WC, TiC, Co.
For cutting tools, dies; sintered carbide.

COROMANT C8.
M-101, M-101a; WC, TiC.
For finishing cutters and tools; sintered carbide.

COROMANT F0A.
M-101, M-101a; Sintered carbide tool material.
For finish cuts and precision machining of steel; crater resistant grade.

COROMANT H05.
M-101, M-101a; Sintered carbide tool material.
Cutting tool for precision finishing of cast iron, hard irons and steels, and heavy metals.

COROMANT H1P.
M-101, M-101a; Sintered carbide tool material.
For cutting tools for machining cast iron; Good wear resistance and toughness.

COROMANT H13.
M-101, M-101a, Sintered carbide tool material.
Cutting tool for general purpose machining of cast iron, steels, hard and tough metals.

COROMANT H20.
M-101, M-101a; Sintered carbide tool material.
Cutting tool for general purpose rough machining cast iron and non-ferrous metals.

COROMANT R1P.
M-101, M-101a; Sintered carbide tool material.
Cutting tool for finish cuts on nickel base, high strength, heat resistant alloys.

COROMANT S1P.
M-101, M-101a, Sintered carbide tool material.
For light roughing and finishing cuts on steel; high wear resistance.

COROMANT S2.
M-101, M-101a; Sintered carbide tool material.
Cutting tool for general purpose machining of steel, tough.

COROMANT S4
M-101, M-101a, Sintered carbide tool material.
Cutting tool for rough machining of steel, good toughness and wear resistance

COROMANT S6
M-101, M-101a, WC, TaC, Co
For cutting tools for roughing, sintered carbide

COROMANT SH
M-101, M-101a, WC, TaC, Co.
For cutting tools for general machining; sintered carbide

CORONA EXTRA M
M-1310; 0.85 C, 9 W, 1 Mo, 4 Cr, bal Fe
For milling cutters, lathe and planer tools, hobs, high speed steel

CORONA EXTRA V.
M-1310, 0.86 C, 4.1 Cr, 0.9 Mo, 2.5 V, 12 W, bal Fe
For lathe and planer tools, drills, hobs; high speed steel

CORONA KOBALT 3.
M-1310, 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2 V, 12 W, bal Fe
For lathe and planer tools, drills, hobs, reamers, high speed steel

CORONA KOBALT 5
M-1310; 1.35 C, W, Cr, V, Co, bal Fe
For fast finishing cutters; high-speed steel.

CORONA KOBALT 5W
M-1310; 0.8 C, 4.7 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, reamers, broaches, taps, hobs, drills; high speed steel.

CORONA KOBALT 10
M-1310; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, milling cutters, hobs; high speed steel

CORONA PRIMA M.
M-1310; 0.95 C, W, Mo, Cr, V, bal Fe.
For cutters, drills, reamers, broaches; high speed steel.

CORONA PRIMA V.
M-1310; 0.82 C, 4.1 Cr, 0.8 Mo, 1.6 V, 8.7 W, bal Fe.
For reamers, drills, broaches, cutters; high speed steel.

CORONA PRIMA W.
M-1310; 0.74 C, 4 Cr, 1 V, 18.5 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

CORONA VIERBRENZ V.
M-1310; 1.3 C, 4.3 Cr, 0.8 Mo, 3.8 V, 12 W, bal Fe.
For cutters, fast finishing tools; high speed steel.

CORONEL.
Eng.; 65-70 Ni, 30-35 Cu.
Cast: 64,000 TS; 32,000 YS; 34 EL; 32 RA.
Rolled. 78,000 TS; 48,000 YS; 42 El; 35 RA.
For valves, pumps, turbine blades; similar to "Monel Metal".

CORONZE.
M-279; 2 8 Al, 1.8 Si, 0.4 Co, bal Cu.
Annealed· 82,000 TS; 54,000 YS; 36 El.
Spring Temper: 125,000 TS; 111,000 YS; 4 El.
For heat exchangers, glass to metal seals, springs, electrical contacts.
Aluminum bronze, corrosion and oxidation resistant. High strength.

CORONZE R 638
M-279, 95.0 Cu, 2.8 Al, 1.8 Si, 0.4 Co.
Ann. 77,000-87,000 TS, 41,000-67,000 YS, 29-42 El
Cold rolled· 90,000-130,000 TS; 70,000-114,000 YS, 2-30 El.
Soft-for-cans, bases, electronic parts; cold rolled for springs, terminals circuit frames.
Stress corrosion resistant, oxidation resistant, good strength.

COROSOLOY
M-964; C, alloy, bal Fe.
For hard surfacing electrodes; corrosion resisting

CORRESIST 13
M-1342, 0 12 max C, 0 4 Si, 13 Cr, bal Fe.
Annealed. 75,000 TS, 40,000 YS; 35 El; 70 RA, 155 Brin.
For turbine blades, valves, pumps, surgical instruments; Type 410; corrosion resistant.

CORRESIST 13H
M-1432, 0 25 C, 14.5 Cr, 1 max Ni, bal Fe.
Annealed· 95,000 TS; 50,000 YS, 25 El, 55 RA, 200 Brin.
For turbine blades, valves, pumps, surgical and dental instruments; corrosion resistant, hardenable.

CORRESIST-13HMo.
M-1342; 0.20 C, 13 Cr, 1 Mo, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El; 150 Brin.
Hardened: 180,000 TS; 150,000 YS; 16 El; C 42 Rock
For chemical and oil refinery equipment, valve trim, gauges, surgical instruments.
Corrosion resistant, hardenable, martensitic.

CORRESIST 17.
M-1342; 0.08 C, 0.4 Si, 17 Cr, bal Fe.
Annealed: 80,000 TS, 50,000 YS; 25 El; 50 RA; 150 Brin.
Cold drawn: 130,000 TS; 120,000 YS; 2 El; 185 Brin.
For oil refinery and dairy equipment, sinks, oil burners; Type 430; corrosion and heat resistant.

CORRESIST 17H.
M-1342; 0.10-0.25 C, 17 Cr, 2 Ni, bal Fe.
Heat treated: 113,800-135,100 TS; 85,300 min YS; 14 min El.
Ferritic-pearlitic chromium stainless.
For food production industries, for pumps, valves, tubes in chemical industries.

CORRESIST 17M.
M-1342; 0.1 max C, 1.8 Mo, 17 Cr, Ti = 7 × C, bal Fe.
Annealed: 90,000 TS; 55,000 YS; 22 El; 48 RA; 170 Brin.
For welded oil refinery and chemical plant equipment; corrosion resistant.

CORRESIST 18/8.
M-1342; 0.12 max C, 18 Cr, 19.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 56 El; 65 RA; 160 Brin.
For welded structures, chemical plant equipment, tanks; Type 347; stainless, austenitic.

CORRESIST 18/8 M.
M-1342, 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin
For welded acid resistant equipment, tanks, mixers; Type 316 Cb, stainless, austenitic.

CORRESIST 18/8 MW.
M-1342, 0.07 max C, 18 Cr, 2 Mo, 10.5 Ni, bal Fe.
Annealed: 85,000 TS, 35,000 YS, 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316, stainless, austenitic.

CORRESIST 18/8 N.
M-1342, 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS, 35,000 YS; 55 El; 75 RA; 150 Brin
Cold drawn· 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302, stainless, austenitic.

CORRESIST 18/8 Nb.
M-1342; 0 07 max C, 18 Cr, 9 Ni, Nb = 8 × C, bal Fe
Quenched: 71,000-106,700 TS; 35,500 min YS, 40 min El
Stainless, austenitic, weldable.
For welded assesmblies in chemical industries, domestic appliances

CORRESIST 18/8 S
M-1342; 0.07 max C, 18 Cr, 9 Ni, bal Fe
Quenched. 71,100-99,600 TS; 28,400 min YS; 50 min El.
Austenitic stainless, for medical instruments, domestic appliances, parts for the chemical industry

CORRESIST 18/8 Ti.
M-1342; 0.07 max C, 18 Cr, 9 Ni, Ti = 5 × C, bal Fe.
Quenched· 71,100-106,700 TS; 35,500 min YS; 40 min El.
Stainless, austenitic, weldable.
For welded assemblies in food, chemical industries and domestic appliances.

CORRESIST 18/8 W.
M-1342; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
Cold drawn: 180,000 TS; 125,000 YS; 10 El; 330 Brin.
For welded chemical plant equipment, tanks; Type 304; stainless, austenitic.

CORRESIST 18/10 MoNb.
M-1342; 0.07 max C, 18 Cr, 11 Ni, 2.2 Mo, Nb = 8 × C, bal Fe.
Quenched: 71,100-106,700 TS; 35,500 min YS; 40 min El.
Stainless, austenitic, weldable.
For welded assemblies in food and chemical industries.

CORRESIST 18/10 MoS.
M-1342; 0.07 max C, 18 Cr, 11 Ni, 2.2 Mo, bal Fe.
Quenched: 71,100-99,600 TS; 28,400 min YS; 45 min El.
Austenitic, excellent corrosion resistance.
For food and chemical industry.

CORRESIST 18/10 MoTi.
M-1342; 0.07 max C, 18 Cr, 11 Ni, 2.2 Mo, Ti = 5 × C, bal Fe.
Quenched: 71,100-106,700 TS; 35,500 min YS; 40 min El.
Stainless, austenitic, weldable.
For welded assemblies in food and chemical industries.

CORRESIST 18/20 MoCu.
M-1342; 0.07 max C, 18 Cr, 20 Ni, 2.2 Mo, 2 Cu, Nb = 8 × C, bal Fe.
Quenched: 71,100-106,700 TS; 32,700 min YS; 40 min El.
Austenitic, stainless; very resistant to attack by H_2SO_4.

CORRESIST 25/25 MoTi.
M-1342; 0.06 max C, 25 Cr, 25 Ni, 2.2 Mo, Ti = 5 × C, bal Fe.
Quenched: 71,100-106,700 TS; 35,500 min YS, 35 min El.
Austenitic, weldable, good corrosion resistance; for welded assemblies in food and chemical industries.

CORRESIST 28.
M-1342, 0.08 C, 28 Cr, bal Fe.
Annealed: 85,000 TS, 50,000 YS; 30 El, 55 RA; 180 Brin.
For furnace parts, heat treating boxes, retorts, heat resistant.

CORRESIST 28/5
M-1342; 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe.
Cast. 90,000 TS, 65,000 YS, 2 El; 212 Brin
Heat treated: 97,000 TS; 65,000 YS; 18 El, 210 Brin.
For cylinder liners, bushings, valve seats and bodies, Type CC-50; corrosion and heat resistant.

CORRESIST 28H
M-1342; 1.2 C, 1.3 Si, 29 Cr, bal Fe
For crushers, rollers, skids, grates, heat and wear resistant.

CORRESIST 28 MH.
M-1342; 1.2 C, 1.3 Si, 29 Cr, 2 Mo, bal Fe.
For crushers, rollers, skids, grates; heat and wear resistant.

CORRESIST G14
M-1342, 0.25 C, 14.5 Cr, 1 max Ni, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin
For cutlery, valves, turbine blades, surgical instruments; Type 420; corrosion resistant.

CORRESIST G17.
M-1342; 0.25 C, 17 Cr, 1.8 max Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
For pumps, valves, marine hardware; Type 431; corrosion resistant.

CORRESIST G18/8.
M-1342; 0.15 C, 1.5 Si, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302; stainless, austenitic.

CORRESIST G18/8 M.
M-1342; 0.15 C, 18 Cr, 2 Mo, 9.5 Ni, bal Fe.
Annealed· 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316, stainless austenitic.

CORRESIST G18/8 Nb.
M-1342; 0.08 max C, 19 Cr, 9 Ni, Nb = 8 × C, bal Fe
Quenched. 64,000-92,400 TS; 28,400 min YS; 20 min El
Austenitic, stainless, weldable casting.
For welded assemblies in food, beverage and dairy industries

CORRESIST G18/8 S
M-1342, 0.07 max C, 19 Cr, 9 Ni, bal Fe.
Quenched 64,000 92,400 TS, 28,400 min YS, 20 min El.
Austenitic, stainless casting
For pumps, shafts, armatures in the chemical industry

CORRESIST G18/10 MoNb
M-1342, 0.10 max C, 18 Cr, 11 Ni, 2 2 Mo, Nb = 8 × C, bal Fe
Quenched 64,000-92,400 TS; 29,900 min YS, 20 min El
Austenitic, stainless, weldable casting
For parts and welded assemblies for use in chemical industry and food plants.

CORRESIST G18/10 MoS
M-1342, 0 07 max C, 18 Cr, 11 Ni, 2 2 Mo, bal Fe.
Quenched 64,000-92,400 TS, 29,900 min YS, 20 min El
Austenitic, stainless, high corrosion resistance; for parts used in chemical plants Casting.

CORRESIST G18/20 MoCu.
M-1342, 0 07 max C, 18 Cr, 20 Ni, 2 2 Mo, 2 Cu, Nb = 8 × C, bal Fe
Quenched 64,000-92,400 TS, 25,600 min YS, 15 min El
Austenitic, stainless, weldable, excellent corrosion resistance, casting
For pickling hooks for H_2SO_4.

CORRESIST G27/4.
M 1342; 0.4 C, 27 Cr, 4 Ni, bal Fe.
Cast. 90,000 TS, 65,000 YS, 2 El, 212 Brin.
Heat treated. 97,000 TS, 65,000 YS, 18 El, 210 Brin
For cylinder liners, bushings, valves, Type CC-50, corrosion and heat resistant

CORRESIST G28.
M-1342; 0 40 C, 29 Cr, bal Fe.
Cast 90,000 TS; 65,000 YS, 2 El; 212 Brin
Heat treated· 97,000 TS, 65,000 YS, 18 El; 210 Brin.
For valve bodies and seats, furnace parts, liners; heat resistant, Type CC-50

CORRESIST G28/5
M-1342, 0.3-0 5 C, 28 Cr, 5 Ni, bal Fe.
Annealed: 71,100-113,800 TS, 3 min El
Corrosion resistant; used in large pumps; casting

CORRESIST G28H.
M-1342; 1.2 C, 1.3 Si, 29 Cr, bal Fe.
For crushers, rollers, skids, grates, rabbles; heat and wear resistant.

CORRESIST G28HM.
M-1342; 1.2 C, 1.3 Si, 29 Cr, 2 Mo, bal Fe.
For crushers, rollers, grates, rabble arms; heat and wear resistant.

CORRESIST G28 Mo.
M-1342; 0.3-0.6 C, 28 Cr, 2.2 Mo, bal Fe.
Annealed: 210-280 Brinnell.
Ferritic, magnetic, stainless casting
For chemical plant, food industries, high temperature parts.

CORRIX METAL.
German; 88.1 Cu, 8.7 Al, 3.2 Fe.
Cast: 78,000-90,000 TS; 30-20 El; 30 RA.
For worm wheels, gears, marine and mining applications; corrosion resistant to acids and alkalis.

CORROCHROM-13G.
M-1309; 0.20 C, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 150 Brin.
Hardened: 240,000 TS; 170,000 YS; 12 El; C 47 Rock
For chemical and oil refinery equipment, surgical instruments, knives, gauges, valve trim.
Corrosion resistant Heat treatable.

CORROCHROM-13M.
M-1309, 0.40 C, 13.0 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El; 150 Brin
Hardened: 250,000 TS, 192,000 YS; 10 El, C 49 Rock
For surgical instruments, knives, cutlery, scissors, shears
Corrosion resistant. Heat treatable.

CORROCHROM 13T
M 1309, 0.20 C, 13.0 Cr, 1.2 Mo, bal Fe.
Annealed 95,000 TS; 50,000 YS; 25 El; 150 Brin
Hardened 180,000 TS, 150,000 YS; 16 El; C 42 Rock
For chemical and oil refining equipment, surgical instruments, valves, pump shafts
Corrosion resistant Heat treatable.

CORROCHROM-13W
M-1309, 0.12 C, 13.0 Cr, bal Fe.
Annealed 85,000 TS, 40,000 YS; 30 El, B 85 Rock.
Hardened. 150,000 TS, 110,000 YS, 22 El, C 38 Rock
For chemical and oil refinery equipment; valve trim.
Corrosion resistant, hardenable.

CORROCHROM-17A
M-1309, 0.13 C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 85,000 TS, 45,000 YS, 25 El, 140 Brin
For furnace and heater parts, oil burners, hardware.
Non hardenable. Corrosion resistant. Free machining.

CORROCHROM-17F.
M-1309; 0.10 C, 17.5 Cr, bal Fe
Annealed: 80,000 TS, 45,000 YS; 28 El; 140 Brin.
Cold Rolled: 130,000 TS; 120,000 YS; 12 El, 190 Brin.
For automotive and architectural trim, hardware, oil burner parts, tanks, furnace parts.
Corrosion resistant, non-hardenable.

CORROCHROM-17N.
M-1309; 0.20 C, 17.0 Cr, 1.4 Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 260 Brin.
Cold drawn: 130,000 TS; 110,000 YS; 15 El; 280 Brin.
For pump shafts, hardware, surgical instruments, valve trim.
Corrosion resistant. Type 431.

CORROCHROM-17T.
M-1309; 0.10 C, 17.5 Cr, Ti = 7 × C, bal Fe.
Annealed: 88,000 TS; 48,000 YS; 20 El; 145 Brin.
For welded structures, tanks, hardware, trim, oil burners.
Non-hardenable. Corrosion Resistant. Welding grade.

CORROCHROM-18E.
M-1309; 0.90 C, 18.0 Cr, 1.2 Mo, 0.1 V, bal Fe.
Heat Treated: 280,000 TS; 265,000 YS; 3 El; C 55 Rock.
For dental and surgical instruments, bearings, pump and valve parts, bushings, nozzles.
Corrosion and wear resistant. Heat treatable.

CORROCHROM-18T.
M-1309; 0.10 C, 17.0 Cr, 1.7 Mo, Ti = 7 × C, bal Fe.
Annealed: 85,000 TS, 45,000 YS, 22 El, 140 Brin.
For welded structures, hardware, furnace and heater parts.
Non-hardenable. Corrosion resistant. Weldable grade.

CORROCHROM-170.
M-1309; 0.35 C, 16.5 Cr, 1.2 Mo, bal Fe.
Annealed: 125,000 TS; 95,000 YS, 20 El, C 24 Rock.
Cold Drawn: 130,000 TS; 110,000 YS, 15 El, C 26 Rock.
For pump shafts, valve trim, hardware, surgical instruments
Corrosion resistant Not hardenable.

CORROCHRONI-187F.
M-1309, 0.15 C, 17.0 Cr, 7.5 Ni, bal Fe.
Annealed: 90,000 TS, 40,000 YS, 50 El; B 85 Rock.
Half Hard 125,000 TS, 75,000 YS, 12 El, C 25 Rock
For chemical plant and oil refinery equipment, fasteners, valve and pump parts
Austenitic, stainless, non-magnetic.

CORROCHRONI-188C
M-1309, 0.12 C, 18.0 Cr, 9.0 Ni, bal Fe.
Annealed 90,000 TS, 40,000 YS, 50 El, B 85 Rock
Cold Rolled 140,000 TS, 120,000 YS, 25 El, B 100 Rock
For chemical plant and oil refinery equipment, hardware, fasteners, pump parts
Austenitic, stainless, non-magnetic.

CORROCHRONI-188T
M-1309; 0.15 C, 18.0 Cr, 0.2 S, 9.0 Ni, bal Fe
Annealed 90,000 TS; 35,000 YS, 50 El, 160 Brin.
Cold Drawn: 125,000 TS, 95,000 YS, 20 El; 277 Brin.
For screw machine products, rivets, fasteners, gears, shafts, fittings.
Free machining, stainless, non-magnetic.

CORROCHRONI-189F.
M-1309, 0.10 C, 18.0 Cr, 10.0 Ni, Ti = 5 × C, bal Fe
Annealed: 85,000 TS, 35,000 YS, 55 El; 150 Brin.
Cold Drawn: 95,000 TS; 60,000 YS; 40 El; 180 Brin.
For exhaust systems, welded structures, engine manifolds, refinery equipment. Austenitic, stabilized. Welding grade, stainless, non-magnetic.

CORROCHRONI-189N.
M-1309; 0.10 C, 18.0 Cr, 10.0 Ni, Cb = 8 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; B 80 Rock.
Cold Drawn: 100,000 TS; 65,000 YS; 40 El; B 95 Rock
For aircraft collector rings, exhaust manifolds, welded structures, superheaters.
Austenitic, nonhardenable. Welding grade, stainless, non-magnetic.

CORROCHRONI-189S.
M-1309; 0.07 C, 18.0 Cr, 10.0 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; B 80 Rock.
For chemical plant and pharmaceutical equipment, tanks, agitators, mixers.
Non-hardenable. Stainless, austenitic, nonmagnetic.

CORROCHRONI-1310K.
M-1309; 0.07 C, 17.0 Cr, 4.5 Mo, 13.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 70 El; B 70 Rock.
Cold Rolled: 150,000 TS; 125,000 YS; 15 El; C 30 Rock.
For textile and dye works equipment, paper and pulp mill equipment, chemical plant mixers and agitators.
Corrosion and heat resistant. Austenitic.
Type 317 stainless steel.

CORROCHRONI-1810A.
M-1309; 0.10 C, 17.5 Cr, 2.3 Mo, 11.5 Ni, Ti = 5 × C, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 50 El; B 83 Rock.
At 1000°F: 55,000 TS; 34,000 YS; 36 El; 69 RA.
For welded structures, chemical and pharmaceutical plant equipment, acid tanks, digesters, vessels.
Austenitic, non-hardenable.
Welding grade, acid resistant, non-magnetic.

CORROCHRONI-1810M.
M-1309; 0.10 C, 17.5 Cr, 2.3 Mo, 11.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 50 El; B 82 Rock.
At 1200°F: 45,000 TS. 30,000 YS; 32 El; C 66 Rock.
For welded structures, chemical and pharmaceutical plant equipment, digesters, acid tanks, mixers.
Austenitic, stabilized, non-hardenable.
Welding grade, stainless, non-magnetic.

CORROCHRONI-1810U.
M-1309, 0.07 C, 17.5 Cr, 2.3 Mo, 11.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 60 El; B 80 Rock.
Cold Drawn: 100,000 TS; 65,000 YS; 40 El; B 95 Rock.
For chemical and pharmaceutical plant equipment, acid containers, mixers, tanks, agitators.
Acid resistant, austenitic, non-magnetic.

CORROCHRONI-1812.
M-1309; 0.07 C, 17.5 Cr, 2.8 Mo, 13.0 Ni, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 60 El; B 78 Rock.
Cold Rolled: 125,000 TS; 90,000 YS; 30 El; C 28 Rock.
For chemical and plastic plant equipment, digesters, tanks, agitators, valve trim.
Type 316, non-hardenable.
Austenitic, stainless, non-magnetic.

CORROCHRONI-1812C.
M-1309; 0.10 C, 17.5 Cr, 2.8 Mo, 13.0 Ni, Cb = 8 × C, bal Fe.
Annealed: 80,000 TS; 30,000 YS, 60 El; B 78 Rock
Cold Rolled: 125,000 TS; 90,000 YS; 30 El; C 28 Rock.
For chemical and plastic plant equipment, digesters, tanks, agitators, valve trim, welded structures.
Non-hardenable, austenitic.
Welding grade, stainless, non-magnetic.

CORRODUR 14.
M-1290; 0.25 C, 14 Cr, 1.0 max Ni, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For turbine blades, cutlery, valves; Type 420; corrosion resistant.

CORRODUR 16-13 N.
M-1290; 0.10 C, 16 Cr, 16 Ni, Cb = 8 × C, bal Fe.
For valves, pumps; corrosion and heat resistant.

CORRODUR 17-13 E3S.
M-1290; 0.10 C, 17 Cr, 13 Ni, 3 Mo, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 42 El; 60 RA; 170 Brin.
For acid resistant chemical plant equipment; Type 317; stainless, austenitic.

CORRODUR 17-13 E5S.
M-1290; 0.10 C, 17 Cr, 13 Ni, 5 Mo, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 42 El; 60 RA; 170 Brin.
For acid resistant chemical plant equipment; Type 317; stainless, austenitic.

CORRODUR 18.
M-1290; 0.25 C, 17 Cr, 1.8 max Ni, bal Fe.
For furnace parts, retorts, heat treating boxes; Type CB-30; corrosion and heat resistant.

CORRODUR 18-8.
M-1290; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
Cold drawn: 180,000 TS, 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, tanks, agitators, filters; Type 302; stainless, austenitic.

CORRODUR 18-8 E
M-1290; 0.15 C, 18 Cr, 2 Mo, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
Cold drawn: 150,000 TS; 135,000 YS; 6 El; 300 Brin.
For acid resistant, chemical plant equipment, tanks; Type 316; stainless, austenitic

CORRODUR 18-8 ES.
M-1290, 0.07 max C, 18 Cr, 2 Mo, 10 5 Ni, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 50 El; 65 RA; 160 Brin.
Cold drawn: 150,000 TS, 135,000 YS; 6 El; 300 Brin.
For acid resistant chemical plant equipment, tanks; Type 316, stainless, austenitic.

CORRODUR 18-8 ESS
M-1290; 0.12 max C, 18 Cr, 2 Mo, 10 5 Ni, Cb = 8 × C, bal Fe.
Annealed· 85,000 TS, 35,000 YS, 50 El; 65 RA; 160 Brin.
For welded acid resistant chemical plant equipment; Type 316 Cb, stainless, austenitic.

CORRODUR 18-8 S.
M-1290; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 60 El; 70 RA; 150 Brin.
Cold drawn: 180,000 TS; 125,000 YS; 10 El; 330 Brin
For welded chemical plant equipment, tanks, vessels; Type 304; stainless, austenitic.

CORRODUR 18-8 SS.
M-1290; 0 07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
Cold drawn: 180,000 TS; 125,000 YS; 10 El; 330 Brin.
For welded chemical plant equipment, tanks, mixers; Type 304; stainless, austenitic.

CORRODUR 20-25 E.
M-1290; 0.12 C, 25 Ni, 20 Cr, 2 Cu, 2 Mo, bal Fe.
Annealed: 100,000 TS; 50,000 YS; 45 El; 60 RA; 195 Brin.
For furnace parts, valves, pumps, turbines; corrosion and heat resistant.

CORRODUR 24-7 E.
M-1290; 0.27 C, 24 Cr, 7 Ni, 2 Mo, bal Fe.
For furnace parts, heat treat boxes, retorts; corrosion and heat resistant, austenitic.

CORRODUR 28-4.
M-1290; 0.4 C, 27 Cr, 4 Ni, bal Fe.
Cast: 90,000 TS; 65,000 YS; 2 El; 212 Brin.
Heat treated: 97,000 TS; 65,000 YS; 18 El; 210 Brin.
For cylinder liners, bushings, valve seats and bodies; Type CC-50; heat resistant.

CORRODUR 30.
M-1290; 1.2 C, 1.3 Si, 29 Cr, bal Fe.
For crushers, rollers, grates, rabble vanes; heat and wear resistant.

CORRODUR 30E.
M-1290; 1.2 C, 1.3 Si, 29 Cr, 2 Mo, bal Fe.
For crushers, rollers, grates, rabble arms; heat and wear resistant.

CORRODUR 30EH.
M-1290; 1 9 C, 29 Cr, 2 Mo, 2 Cu, bal Fe.
For crushers, rollers, grates, rabble arms; heat and wear resistant.

CORRODUR 30H.
M-1290, 1.8 C, 1.3 Si, 29 Cr, bal Fe
For crushers, rollers, grates, rabble arms; heat and wear resistant.

CORRODUR C14
M-1290, 0 22 C, 14.5 Cr, bal Fe
Annealed· 78,000-92,000 TS; 50,000 min YS; 3 min El
Heat treated 85,000-115,000 TS, 64,000-min YS, 12 min El.
Corrosion resistant casting.
Werkstoff Nr. 1 4027; DIN G-X22Cr 14.

CORRODUR C 14 N
M-1290, 0 19 C, 13.0 Cr, 0 50 Ni, bal Fe.
Annealed· 78,000-92,000 TS, 50,000 min YS; 10 min El.
Heat treated 85,000-115,000 TS, 64,000 min YS, 8 min El
Corrosion resistant casting
Werkstoff Nr. 1 4021, DIN G-X 20 Cr13

CORRODUR C 14 W
M-1290, 0 12 C, 12 5 Cr, 0.50 Ni, bal Fe
Annealed 71,000-92,000 TS; 42,500 min YS; 2 min El.
Heat treated: 85,000-112,000 TS; 57,000 min YS; 4 min El
Corrosion resistant casting
Werkstoff Nr. 1 4008; DIN G-X 12 Cr14.
ASTM A296 Gr.CA 15.

CORRODUR C 17.13 E3S.
M-1290; 0.05 C, 16.5 Cr, 13 5 Ni, 2.5 Mo, bal Fe.
Sol ann & age. 69,000 min TS; 30,000 min YS; 25 min El
Corrosion resistant casting.
DIN G-X5CrNiMo 1713.

CORRODUR C 17.13 ESS.
M-1290; 0.05 C, 17.0 Cr, 13.5 Ni, 4 75 Mo, bal Fe.
Sol. ann & age: 69,000 min TS; 35,000 min YS; 20 min El.
Corrosion resistant casting.
Werkstoff Nr. 1.4448; DIN G-X6CrNiMo1713.

CORRODUR C 18.
M-1290; 0.22 C, 17.0 Cr, 1.25 Ni, bal Fe.
Annealed: 85,000-106,000 TS; 57,000 min YS; 2 min El.
Heat treated: 106,000-128,000 TS; 85,000 min YS; 4 min El.
Corrosion resistant casting.
Werkstoff Nr. 1.4059; DIN G-X25CrNi17.

CORRODUR C 18.8.
M-1290; 0.10 C, 18.0 Cr, 8.5 Ni, bal Fe.
Sol. ann & age: 64,000-85,000 TS; 30,000 min YS; 25 min El.
Corrosion resistant casting.
Werkstoff Nr. 1.4312; DIN G-X10CrNi188.

CORRODUR C18.8 E
M-1290; 0.10 C, 18.0 Cr, 9.5 Ni, 2 25 Mo, bal Fe.
Sol. ann. & age: 71,000-92,000 TS; 30,000 min YS; 25 min El.
Corrosion resistant casting.
Werkstoff Nr. 1.4410; DIN G-X CrNiMo 189.

CORRODUR 18.8 ES.
M-1290; 0.07 C, 17.5 Cr, 10 5 Ni, 2.25 Mo, bal Fe.
Sol. ann. & age. 64,000-85,000 TS; 30,000 min YS; 25 min El.
Corrosion resistant casting.
Werkstoff Nr. 1.4408, DIN G-X6CrNiMo 1810

CORRODUR 18.8 ESS.
M-1290; 0 08 C, 17.5 Cr, 11 0 Ni, 2 25 Mo, Nb, bal Fe.
Sol. ann. & age: 64,000-85,000 TS; 30,000 min YS; 20 min El.
Corrosion resistant casting.
Werkstoff Nr. 1 4581; DIN G-X7CrNiMoNb 1810.

CORRODUR C 18.8 ESSD.
M-1290, 0 05 C, 17.0 Cr, 11.5 Ni, 2.25 Mo, 1.5 Mn, Nb, bal Fe.
Sol ann. & age 69,000 min TS; 30,000 min YS; 20 min El.
Corrosion resistant casting
DIN G-X5CrNiMoNb1712.

CORRODUR C 18 8 O.
M-1290, 0 10 C, 18.0 Cr, 8.5 Ni, 0.4 max Mo, bal Fe
Corrosion resistant casting

CORRODUR C 18 8 S.
M-1290, 0 07 C, 18.0 Cr, 9.5 Ni, bal Fe.
Sol ann & age· 70,000 min TS, 30,000 min YS; 25 min El
Corrosion resistant casting
Werkstoff Nr 1 4308, DIN G-X6CrNi 189.
ASTM A296 Gr CF 8

CORRODUR C 18.8 SS
M-1290; 0.8 C, 18.0 Cr, 10 0 Ni, Nb, bal Fe.
Sol. ann. & age· 70,000 min TS, 30,000 min YS; 20 min El.
Corrosion resistant casting
Werkstoff Nr. 1 4552; DIN G-X7CrNiNb189
ASTM A296 Gr CF 8C.

CORRODUR C 18.8 SSO
M-1290; 0.08 C, 18 0 Cr. 10 0 Ni, 0.4 max Mo, Nb, bal Fe.
Corrosion resistant casting.

CORRODUR C 18 E.
M-1290; 0 37 C, 16 5 Cr, 1 15 Mo, bal Fe.
Annealed: 85,000-106,000 TS, 64,000 min YS; 2 min El.
Heat treated. 106,000-128,000 TS, 85,000 min YS; 4 min El
Corrosion resistant casting.
Werkstoff Nr. 1.4122; DIN G-X35CrMo17.

CORRODUR C 20.25 E.
M-1290; 0.05 C, 25 0 Ni, 20.0 Cr, 3.25 Mo, 1.35 Cu, bal Fe.
Sol. ann. & age: 64,000-78,000 TS; 28,000 min YS; 15 min El.
Corrosion resistant casting.
Werkstoff Nr. 1.4500; DIN G-X7NiCrMoCu2520.

CORRODUR C 22.7.
M-1290; 0.16 C, 20.5 Cr, 4.25 Ni, bal Fe.
Sol. ann. & age: 85,000-100,000 TS; 54,000 min YS; 25 min El.
Corrosion resistant casting.
DIN G-X20CrNi214

CORRODUR C 24.7 E.
M-1290; 0.27 C, 23.0 Cr, 7.0 Ni, 2.25 Mo, 1.35 Cu, bal Fe.
As cast: 85,000-100,000 TS; 57,000 min YS; 4 min El.
Sol. ann. & age: 85,000-100,000 TS; 42,500 min YS; 6 min El.
Corrosion resistant casting.
DIN G-X30CrNiMo247.

CORRODUR C 28.4.
M-1290; 0.35 C, 27.0 Cr, 4.0 Ni, bal Fe.
As cast: 64,000-85,000 TS; 42,500 min YS; 4 min El.
Corrosion resistant casting.
Werkstoff Nr. 1.4340; DIN G-X40CrNi274.

CORRODUR C 30.
M-1290; 0.60 C, 29.0 Cr, bal Fe.
As cast: 57,000-64,000 TS.
Corrosion resistant casting
Werkstoff Nr. 1.4085; DIN G-X70Cr29.

CORRODUR C 30 E.
M-1290; 0.65 C, 28.0 Cr, 2.0 Mo, bal Fe.
As cast: 57,000-64,000 TS
Corrosion resistant casting.
Werkstoff Nr. 1.4136; DIN G-X70 CrMo292.

CORRODUR C 30 EH.
M-1290; 1.90 C, 29.0 Cr, 2.0 Mo, 1.35 Cu, bal Fe
Hardenable to 500 Brin max.
Corrosion resistant casting.
DIN G-X190CrMo292.

CORRODUR C 30 H.
M-1290; 1.80 C, 29.0 Cr, bal Fe.
Hardenable to 500 Brin max.
Corrosion resistant casting DIN G-X180Cr29

CORRODUR N 15.
M-1290; 2.9 C, 2.4 Si, 14.5 Ni, 6.0 Cu, 2.0 Cr, bal Fe.
Austenitic nickel-copper cast steel.
DIN G-X300 NiCuCr156.

CORRODUR Sp 120.
M-1290; 1.20 C, 29.0 Cr, bal Fe.
As cast. 57,000-64,000 TS.
Corrosion resistant casting.
Werkstoff Nr. 1.4086, DIN G-X120Cr29.

CORROFEST 13/1.
M-1293; 0.10 C, 13 Cr, bal Fe
Annealed: 75,000 TS; 40,000 YS, 35 El; 70 RA; 155 Brin.
Cold drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA, 205 Brin.
For furnace parts, heat treat boxes, X10Cr13; heat resistant.

CORROFEST 13/2.
M-1293; 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 50 RA; 195 Brin.
Heat treated: 250,000 TS; 215,000 YS; 8 El, 25 RA; 500 Brin.
For cutlery, knives, valves, surgical instruments; X20Cr13; corrosion resistant, hardenable.

CORROFEST 13/2 Mo.
M-1293; 0.2 C, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 22 El; 48 RA; 200 Brin.
For cutlery, knives, chemical plant equipment; X20CrMo13; corrosion resistant, hardenable.

CORROFEST 13/4.
M-1293; 0.4 C, 0.4 Si, 13 Cr, bal Fe.

CORROFEST 17/1.
M-1293; 0.1 max C, 0.4 Si, 17.5 Cr, bal Fe.
Annealed: 80,000 TS; 45,000 YS; 30 El, 55 RA; 170 Brin.
For furnace parts, heat treat boxes, X8Cr17; corrosion and heat resistant.

CORROFEST 17/1 Mo
M-1293; 0.1 max C, 0.4 Si, 17.5 Cr, 1 Mo, Ti = 7 × C, bal Fe
Annealed: 80,000 TS, 45,000 YS; 30 El; 55 RA, 170 Brin.
For chemical plant equipment, X8CrMoTi17; corrosion and heat resistant.

CORROFEST 17/2
M-1293; 0.22 C, 0.4 Si, 17 Cr, 1.5 Ni, bal Fe
Annealed: 80,000 TS; 45,000 YS; 30 El, 55 RA; 170 Brin.
For stainless machine tool parts, X22CrNi17, corrosion resistant. heat treatable

CORROFEST 17/9
M-1293, 0.9 C, 0.4 Si, 18 Cr, 1.15 Mo, 1 V, bal Fe.
For bearings, bushings, pivots, X90CrMoV18, corrosion resistant, hardenable

CORROFEST 18/8
M-1293; 0.15 max C, 0.4 Si, 18 Cr, 8 Ni, bal Fe
Annealed: 80,000 TS, 35,000 YS, 55 El; 65 RA, 150 Brin
Cold drawn: 180,000 TS, 125,000 YS, 10 El, 330 Brin
For chemical plant equipment, tanks, vessels, piping, Type 302; stainless, austenitic.

CORROFESTAL.
M-981, 0.5-2.0 Mg, 0.3-1.5 Si, 0-1.5 Mn, bal Al.
For light alloy parts; corrosion resistant, hardenable

CORROFOND M3
M-1445, 3 Mg, 0.3 Mn, bal Al
Cast: 21,000-29,000 TS, 8,000-12,000 YS, 10-6 El, 45-55 Brin
For light alloy parts; corrosion resistant

CORROFOND M5.
M-1445, 5 Mg, 0.4 Mn, bal Al
Heat treated: 28,000-33,000 TS, 13,000-17,000 YS, 12-8 El, 60-80 Brin
For light alloy parts, corrosion resistant

CORROFOND M7
M-1445; 7 Mg, 0.4 Mn, bal Al.
Heat treated: 37,000-42,000 TS; 19,000-22,000 YS; 11-5 El; 70-80 Brin.
For marine hardware, resists sea water corrosion, age-hardenable.

CORROFOND M-10
M-1445; 10 Mg, 0.4 Mn, bal Al.
Heat treated: 50,000-56,000 TS; 21,000-26,000 YS; 13-6 El; 75-85 Brin
For marine and aircraft parts; heat treatable, resists sea water corrosion.

CORROFOND S2.
M-1445; 2 Si, 0.65 Mg, 0.7 Mn, bal Al
Heat treated: 36,000-42,000 TS; 29,000-39,000 YS; 3-1 El; 90-105 Brin.
For light alloy parts.

CORROFOND S4.
M-1445; 4.2 Si, 0.5 Mn, 0.15 Ti, bal Al.
Cast: 19,000-26,000 TS; 7,000-13,000 YS; 15-9 El; 45-60 Brin.
For light alloy parts; corrosion resistant.

CORROFOND S45.
M-1445; 4 5 Si, 0.65 Mg, 0.7 Mn, bal Al.
Heat treated: 36,000-46,000 TS; 26,000-36,000 YS, 2-1 El; 90-105 Brin.
For light alloy parts; corrosion resistant, age-hardened.

CORRONEL 210.
M-121; 28 Mo, 6 Fe, bal Ni.
For chemical plant equipment, petroleum equipment, high corrosion resistance to HCl and acid chlorides

CORRONEL 220.
M-121; 28 Mo, 3 max Fe, 1 6-2.25 V, bal Ni.
Rolled· 157,000 TS, 82,000 YS; 37 El, 38 RA.
For chemical and petroleum plant equipment, pickling plant.
Acid resistant.

CORRONEL-230.
M-121, 0 08 max C, 0 6 max Si, 1 0 max Cu, 5 0 max Fe, 1 0 max Mn, 1.0 max Ti, 0 5 max Al, 35 0-37 0 Cr, bal Ni.
Annealed 105,700 TS; 46,000 YS, 43 El; 69 RA
For chemical and petrochemical industries, refinery equipment, mixers, agitators High corrosion resistance It resists non-oxidizing acid liquors

CORRONEL B
M-121, 66 Ni, 28 Mo, 6 Fe
For chemical plant equipment, acid resistant, resists hydrocloric and phosphoric acids

CORRONEL B
M-897, M 121, 66 Ni, 28 Mo, 6 Fe
Rolled 134,400 TS, 62,000 YS, 40 El; 40 RA; 250 Brin
For heat exchangers, pump parts, reaction vessels; corrosion resistant

CORRONIUM
Eng; 80 Cu, 15 Zn, 5 Sn
4,000 TS, 38 El, 37 RA, 90 Brin.
Cast or wrought.

CORRONON 1
M-1294, 0 12 max C, 0 4 Si, 13 Cr, bal Fe.
Annealed 90,000 TS, 45,000 YS; 28 El, 55 RA; 180 Brin
For turbine blades, cutlery, knives, X10Cr13, corrosion resistant

CORRONON-2.
M-1294, 0.2 C, 13 Cr, bal Fe
Annealed· 95,000 TS, 50,000 YS; 25 El; 50 RA, 195 Brin.
Heat treated· 250,000 TS, 215,000 YS; 8 El; 25 RA; 500 Brin.
For cutlery, knives, turbine blades; Type 320; corrosion resistant.

CORRONON-8.
M-1294, 0 12 max C, 0 8 Si, 0.8 Al, 6-5 Cr, bal Fe
For oil refinery equipment; X10CrA17; creep resistant.

CORRONON-9.
M-1294; 0.20 C, 13 Cr, 1 Al, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 50 RA; 195 Brin
Heat treated: 250,000 TS, 215,000 YS; 8 El; 25 RA; 500 Brin.
For cutlery, knives, turbine blades, surgical instruments; X20CrA113; corrosion resistant.

CORRONON-10.
M-1294; 0.12 max C, 1 Si, 1 Al; 18 Cr, bal Fe.
Annealed: 80,000 TS; 45,000 YS; 30 El; 55 RA; 170 Brin.
For oil refinery and chemical plant equipment; X10CrA118, corrosion and heat resistant.

CORRONON-11.
M-1294; 0.2 C, 1.2 Si, 25 Cr, 4 Ni, bal Fe
For furnace parts and equipment, heat treat boxes; X20CrNiSi254; heat resistant

CORRONON-12
M-1294, 0 12 max C, 1.5 Si, 1 5 Al, 24 Cr, bal Fe.
For furnace parts and equipment, heat treat boxes; X10CrA124; heat resistant.

CORRONON-16
M-1294; 0 1 max C, 0.4 Si, 17.5 Cr, bal Fe.
Annealed· 80,000 TS, 45,000 YS, 30 El; 55 RA; 170 Brin.
For chemical plant and oil refinery equipment; X8Cr17, corrosion and heat resistant

CORRONON-16N.
M-1294, 0.22 C, 17 Ni, bal Fe.
For chemical plant equipment, X22Ni17, corrosion resistant

CORRONON-16S
M-1294, 0 1 max C, 17.5 Cr, Ti = 7 × C, bal Fe
Annealed. 80,000 TS, 45,000 YS, 30 El, 55 RA, 170 Brin.
For welded structures; X8CrTi17; heat resistant, stabilized

CORRONON-18
M-1294, 0 1 max C, 17 5 Cr, 1 Mo, Ti = 7 × C, bal Fe.
Annealed. 85,000 TS, 48,000 YS; 28 El; 52 RA; 180 Brin
For chemical plant equipment, X8CrMoTi17, heat and corrosion resistant

CORRONON-18H.
M-1294, 0 9 C, 18 Cr, 1.15 Mo, 1 V, bal Fe.
For bearings, linings, X90CrMoV18

CORRONON 20/10.
M-1294, 0 15 C, 2 Si, 19.5 Cr, 9 5 Ni, bal Fe
Annealed· 85,000 TS, 40,000 YS, 50 El, 60 RA, 180 Brin
For chemical plant equipment, X15CrNiSi199, corrosion and heat resistant.

CORRONON 23/20.
M-1294, 0.15 C, 2 Si, 24 Cr, 19 Ni, bal Fe
For furnace parts and equipment, heat treat boxes, corrosion and heat resistant, austenitic.

CORRONON 184E
M-1294; 0.12 max C, 18 Cr, 2 Mo, 10 5 Ni, bal Fe.
Annealed. 80,000 TS, 30,000 YS, 60 El, 80 RA, 135 Brin.
Cold drawn: 150,000 TS, 135,000 YS, 6 El; 300 Brin
For chemical plant equipment, mixers, agitators; filters; Type 316, stainless, austenitic

CORRONON 184S.
M-1294; 0.07 max C, 18 Cr, 2 Mo, 10 5 Ni, bal Fe.
Annealed: 80,000 TS; 30,000 YS, 60 El; 80 RA; 135 Brin
Cold drawn 150,000 TS; 135,000 YS, 6 El, 300 Brin.
For chemical plant equipment, mixers, agitators, filters; Type 316L; stainless, austenitic.

CORRONON 188.
M-1294; 0.12 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
Cold drawn: 180,000 TS; 135,000 YS; 10 El; 330 Brin.
For chemical plant equipment, tanks, vessels, mixers; X12CrNi18-8; austenitic, stainless.

CORRONON 188E.
M-1294; 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
Cold drawn: 95,000 TS; 60,000 YS; 40 El; 60 RA; 185 Brin.
For welded structures, chemical plant equipment; Type 321; austenitic, stainless.

CORRONON 188S.
M-1294; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
Cold drawn: 180,000 TS; 135,000 YS; 10 El, 330 Brin
For kitchen equipment, architectural trim; Type 304; stainless, austenitic.

CORROSALLOY 13.
M-1485; 0.25 max C, 11.5-13.5 Cr, 1 max Ni, bal Fe.
Cast: 101,000 TS; 15 El; 160-260 Brin.
For chemical plant equipment; Brit. BS 1630 B, corrosion resistant.

CORROSALLOY 18.
M-1485; 0.25 max C, 1.0-1.3 Ni, 16-20 Cr, bal Fe.
Cast: 123,200 TS; 10 El; 250 Brin.
For chemical plant and oil refinery equipment; Brit. S 80, corrosion and heat resistant, hardenable.

CORROSALLOY DU.
M-1485; 0.10 max C, 28-30 Ni, 19-21 Cr, 2-3 Mo, 3.5-4.5 Cu, bal Fe.
Cast: 62,800 TS; 30 El; 160 Brin.
For chemical plant equipment; corrosion resistant to H_2SO_4.

CORROSALLOY H.T.
M-1485, 0.05 C, 1.0 max Si, 1.0 max Mn, 4.0 Ni, 17 Cr, 3.5 Cu, bal Fe.
Cast: 140,000 TS; 15 El; 290-330 Brin.
High strength and corrosion resistant alloy for pump and valve applications.

CORROSALLOY M.
M-1485; 0.12 max C, 10-12 Ni, 18-20 Cr, 2.5-3.5 Mo, Cb = 10 × C, bal Fe.
Cast: 78,500 TS; 25 El; 180-220 Brin.
For acid resistant chemical plant equipment, welded parts; Brit. BS 1632 B, stainless, austenitic.

CORROSALLOY NDP.
M-1485; 0.12 max C, 8-10 Ni, 18-20 Cr, Cb = 10 × C, bal Fe.
Cast: 78,500 TS; 30 El; 170-210 Brin.
For welded chemical plant equipment, mixers; Brit. BS 1631 B, stainless, austenitic.

CORROSALLOY S.
M-1485; 0.15 max C, 8-10 Ni, 18-20 Cr, bal Fe.
Cast: 78,500 TS; 30 El; 170-210 Brin.
For chemical plant and oil refinery equipment; austenitic, stainless, Brit. 1631 A.

CORROSIL.
M-1709; 0.70 C, 14 Si, bal Fe.
As cast: 514 Brin.
Corrosion and wear resistant iron, corrosion control anodes.

CORROSIRON.
M-192; M-23; 0.8-1.0 C, 13.5-14.5 Si, bal Fe.
Cast: 16,000 TS; 16,000 YS; 0 El; 0 RA; 350 Brin.
For acid pans, drains, pumps, valves, cocks; corrosion resistant, not forgeable.

CORROSIST B.
M-1485; 0.15 max C, 28-32 Mo, 6 max Fe, bal Ni.
Cast: 78,500 TS; 6 El; 250-300 Brin.
For pumps, valves, turbine parts, chemical plant equipment; resists HCl.

CORROSIST C.
M-1485; 0.15 max C, 17-20 Mo, 3-4 W, 8 max Fe, 14-16 Cr, bal Ni.
Cast. 74,000 TS; 10 El; 250-300 Brin.
For drains, pumps, chemical plant equipment; resists HCl and wet Cl_2.

CORROSIST D.
M-1485, 0.15 max C, 2.0-3.5 Cu, 5 max Fe, 9.0-10.5 Si, bal Fe.
Cast: 49,300 TS; 550-600 Brin.
For valves, pumps, drains, chemical plant equipment, resists boiling H_2SO_4, hard and brittle.

CORROSIST IL
M-1485; 0.15 max C, 22-24 Cr, 3.5-4.5 Mo, 7-8 Cu, 7 max Fe, bal Ni.
Cast 56,000 TS, 12 El, 190-220 Brin.
For chemical plant equipment; resists H_2SO_4.

COR-TEN A
M-604; 0.10 C, 0.40 Mn, 0.12 P, 0.05 S, 0.50 Si, 1.0 Cr, 0.02 min Ti, bal Fe
Plate 70,000 TS, 50,000 YS, 19 El.
For bridges, booms, derricks, mine cars, bus and truck bodies.
High strength-low alloy steel

COR-TEN B.
M-604, M-537; M-67, 0.10-0.19 C, 0.90-1.25 Mn, 0.25-0.40 Cu, 0.40-0.65 Cr, 0.02-0.10 V, bal Fe
Plate 70,000 TS, 50,000 YS, 19 El.
For structures, derricks, booms, mine cars, truck and bus bodies, bridges High strength-low alloy steel

COR-TEN C.
M-604, M-537, M-67, 0.12-0.19 C, 0.90-1.35 Mn, 0.25-0.40 Cu, 0.40-0.70 Cr, 0.04-0.10 V, bal Fe.
Plate 80,000 TS; 60,000 YS, 16 El
For structures, bridges, bus and truck bodies, booms, mine cars, derricks
High strength-low alloy steel.

CORVIC BRONZE
M-33, 98.5 Cu, 1.5 Sn
For chemical engineering equipment; corrosion resistant.

COSINT 1000
M-1526; 20 Co, 16 Cr, 5.5 W, 2.5 Mo, 5.5 Al, 2.5 Ti, 0.02 B, 0.3 Zr, bal Ni.
For high temperature applications; pre-alloyed powder, sintered, heat resistant.

COSMOLOY-F.
U.S.; 0.04 max C, 15 Cr, 3.8 Mo, 2.2 W, 3.4 Ti, 4.7 Al, 0.08 B, 0.07 Zr, bal Ni.
For high temperature applications; heat and corrosion resistant.

COTHIAS ALLOY.
Eng.; 93 Al, 6.5 Cu, 0.5 Zn.
For light weight castings.

COUGAR.
M-1432; 1.55 C, 0.04 Mn, 11.5 Cr, 0.9 V, 0.8 Mo, bal Fe.
AISI Type D2 Cold work tool steel, chromium type.

COURSIER.
M-1546; 0.60-0.70 C, bal Fe.
Hardened: C 58-60 Rock.
For cutting tools, drills, knives, hammers, chisels. Water hardening.

COUSSINAL A.
French; 3 Sn, 2 Pb, 3 Sb, bal Al.
For bearings; anti-friction.

COUSSINAL C.
French; 4 Sn, 4 Cu, 3 Mg, 1 Mn, bal Al.
For bearings; antifriction.

COVAN.
M-140; 0.90 C, 4.0 Cr, 2.0 V, 8.0 Mo, 8.0 Co, bal Fe.
High speed steel for cutting tools, Mo-Co type, good red hardness. AISI M34.

COVANDUR.
M-32; 0.04 C, 49 Co, 1.9 V, 0.2 Se, 0.6 Mn, bal Fe.
For electrical equipment, sonars, ultrasonic transducers. Soft magnet, high magnetic saturation.

COWLES.
Eng., 1.25-11 Al, bal Cu.
For strong corrosion resistant parts; corrosion resistant.

COWLES "A-1."
U.S.; 80 Cu, 10 Al.
For hardware, gears, Al-bronze

COWLES "A-2."
U.S.; 80 Cu, 10 Al.
For hardware, gears; Al-bronze.

COWLES ALUMINUM BRONZE
Eng; 88.4 Cu, 9.74 Al, 0.43 Fe, 1.36 Si.
For gears, trolley wheels, worm wheels; tough, wear resistant.

COWLES "B"
U.S., 92.5 Cu, 7.5 Al.
For hardware, gears, Al-bronze.

COWLES "C-1."
U.S., 94.5 Cu, 5.5 Al
For hardware, gears; Al-bronze.

COWLES "C-2"
U.S; 95 Cu, 5 Al
For hardware, gears; Al-bronze

COWLES "C-3"
U.S.; 95 Cu, 5 Al
For hardware, gears; Al-bronze.

COWLES "D."
U.S., 97.5 Cu, 2.5 Al
For hardware, gears; Al-bronze

COWLES "E"
U.S; 98.75 Cu, 1.25 Al.
For hardware; corrosion resistant.

COWLES HIGH MANGANESE BRASS.
U.S.; 80-67 Cu, 15-18 Mn, 5-13 Zn, 0.1 Al, Si.
For strong corrosion resistant parts; corrosion resistant

COWLES SPECIAL "A"
U.S.; 80 Cu, 11 Al.
For hardware, gears; Al-bronze.

CPI:
M-233; 0.5 C, 2.25 W, 1.5 Cr, 0.25 V, bal Fe.
For hot work dies; hot work steel.

CPT 64AV.
M-739; 0.02 C, 0.3 Fe, 6 Al, 4 V, bal Ti.
Sintered: 119,000 TS; 107,000 YS; Rock C 23.
Heat Treated: 146,000 TS; 133,000 YS; Rock C 27.
For aircraft bearing housings.
Heat treatable. Corrosion resistant.
Sintered powders.

CQ-2.
M-1697; Sintered carbide tool material.
General purpose machining of cast iron, non-ferrous and non-metallic materials.

CQ-3.
M-1697; Sintered carbide tool material.
For light roughing cuts and some finishing cuts on cast iron and non-ferrous metals.

CQ-4.
M-1697; Sintered carbide tool material.
Finish cutting and precision boring of cast iron and non-ferrous metals.

CQ-12.
M-1697; Sintered carbide tool material.
For roughing cuts on cast iron, steel and non-ferrous metals and for wear parts.

CQ-13.
M-1697; Sintered carbide tool material.
For wear parts; moderate shock.

CQ-14.
M-1697; Sintered carbide tool material.
For wear parts, will stand heavy shock.

CQ-15.
M-1697; Sintered carbide tool material.
For wear parts and light impact.

CQ-16.
M-1697; Sintered carbide tool material.
For wear parts and heavy impact applications.

CQ-23
M-1697; Sintered carbide tool material.
For cutting and forming plastics, glass and highly abrasive materials and laminates

CRAIG GOLD.
80 Cu, 10 Ni, 10 Zn.
For jewelry, ornaments.

CRALCLAD.
Japan, Al alloy.
For light alloy parts; clad duralumin.

CRALFER
England, 3 C, Mn, Si, Al, bal Fe.
For machinery castings; cast iron, growth resistant.

CRAMP ALLOY NO. 5.
M-309, 79.3 Cu, 10 Sn, 10 Pb, 0.70 P.
Cast: 28,000-32,000 TS; 18,000-19,000 YS; 4-8 El; 70 Brin.
For bearings for medium speeds and light loads, cross-head and mill bearings; SAE 64.

CRAMP ALLOY NO. 7.
M-309; 75 Cu, 18 Pb, 7 Sn.
Cast: 17,000-32,000 TS; 8,000-12,000 YS; 7-10 El; 45-50 Brin.
For bearings of low compressive load and where lubrication is poor; acid corrosion resistant.

CRAMP ALLOY NO 12
M-309; 87.75 Cu, 6.25 Sn, 4 Zn, 1.5 Pb, 0.5 Ni.
Cast: 32,000-38,000 TS; 16,000-18,000 YS; 20-25 El; 40-50 Brin.
For valves, fittings, cocks, pressure castings; similar to U.S. Navy Composition "M."

CRAMP ALLOY NO. 13.
M-308; 83 Cu, 13.5 Sn, 3.5 Zn.
Cast 23,000-32,000 TS; 13,000-15,000 YS; 4-2 El; 55-65 Brin.
For bearings for heavy duty as for bridges, trunnions, machines, center disks; corrosion resistant to weak sulfurous acid.

CRAMP ALLOY NO. 20.
M-309; 85 Cu, 5 Sn, 5 Zn, 5 Pb.
Cast: 30,000 TS; 25 El.
For bearings for general service; similar to "Ounce" metal.

CRAMP ALLOY NO. 45 (PARSONS Mn BRONZE).
M-309; 55-60 Cu, 38-42 Zn, 0.20 max Pb, 1.5 max Al, 3.5 max Mn, 1.5 max Sn, 0.4-2.0 Fe.
Cast: 65,000-75,000 TS; 33,000-38,000 YS; 30-20 El; 100 Brin.
For ship propellers, heavy duty bushings, bearings, spur and bevel gears, valve stems, valve bodies; corrosion resistant, tough

CRAMP ALLOY NO. 49 (SUPER STRENGTH BRONZE).
M-309; 60-70 Cu, 20-30 Zn, bal special alloy.
Cast: 90,000-115,000 TS; 45,000-68,000 YS; 25-10 El; 185-240 Brin.
For housing nuts, trunnion bearings, expansion plates, worms, worm wheels, spur and bevel gears, valve stems; resists high compressive loads and shock.

CRAMP ALLOY NO. 49A.
M-309; 60-70 Cu, 20-30 Zn, bal Mn, Fe, Al.
Cast: 120,000 TS; 90,000 YS; 10 El; 10 RA; 240 Brin.
For bushings, worms, bearings, gears, valve bodies. Mn-bronze, tough.

CRAMP ALLOY NO. 50.
M-309; 60-70 Cu, 20-30 Zn, bal Mn, Fe, Al.
Cast: 90,000 TS; 45,000 YS; 25 El, 20 RA; 175 Brin.
Forged: 93,000 TS; 50,000 YS; 20 El; 20 RA; 195 Brin.
For bushings, worms, bearings, gears, valve bodies, Mn-bronze, tough.

CRAMP ALLOY NO 50A.
M-309; 60-70 Cu, 20-30 Zn, bal Mn, Fe, Al.
Cast: 100,000 TS; 50,000 YS; 20 El, 18 RA; 150 Brin.
Forged: 105,000 TS; 60,000 YS; 18 El, 18 RA, 210 Brin.
For bushings, worms, bearings, gears, valve bodies, Mn-bronze, tough

CRAMP ALLOY NO. 54 (PARSONS WHITE BRASS SA)
M-309; 78-61 Sn, 4.5-5 Cu, 6-11 Sb, 3.5-13 Pb.
Cast: 12,250 TS; 10,750 YS; 2.7 El; 32-38 Brin.
For bearings for heavy duty service, main and cross-head bearings; Babbitt.

CRAMP ALLOY NO 69 (HYDRAULIC METAL).
M-309, 86.5 Cu, 11 Sn, 2 Zn, 0.50 Pb
35,000-40,000 TS, 16,500-18,500 YS; 10-8 El, 60-65 Brin.
For valve bodies, sleeves, pump parts, cylinder bodies, bearings; for high hydraulic pressures.

CRAMP ALLOY NO. 71 (CRAMP'S NICKEL BRONZE).
M-309; 87.5 Cu, 11 Sn, 1.5 Ni.
Cast: 45,000-50,000 TS, 25,000-27,000 YS; 20-15 El; 85-95 Brin.
For worms, worm gears, bevel and spur gears, high speed bearings, bushings, wearing parts; for high contact speeds and heavy loads

CRAMP ALLOY NO. 73.
M-309; 10 Sn, 10 Pb, 0.7 P, bal Cu.
Cast: 28,000-32,000 TS; 18,000-19,000 YS; 4-8 El; 70 Brin.
For bearings, bushings, shaft sleeves; SAE 64; bearing bronze.

CRAMP ALLOY NO. 78.
M-309; 85-89 Cu, 8-10 Al, 1.0-2.0 Fe.
Cast: 65,000-95,000 TS; 47,000-57,000 YS; 20-4 El; 130-190 Brin.
For acid resistant containers and parts; resistant to acid corrosion at high temperature.

CRAMP ALLOY NO. 83.
M-309; 87-89 Cu, 9-11 Al, 3-4 Fe.
Heat treated: 75,000-85,000 TS; 35,000-40,000 YS; 8-20 El; 165-185 Brin
For bearings, worm gears, spur gears; resists acid corrosion.

CRAMP ALLOY NO. 84.
M-309; 78-82 Cu, 9-11 Al, 3-6 Fe, 3-6 Ni.
Heat treated: 90,000-115,000 TS; 40,000-70,000 YS; 5-20 El, 5-15 RA; 172-300 Brin.
For structural parts; acid resisting.

CRAMP ALLOY NO. 91.
M-309, 87.5 Cu, 8 Sn, 4 Zn, 0.5 Ni.
Cast 35,000-45,000 TS, 17,500-21,000 YS; 30-20 El; 60-70 Brin.
For shaft liners, bushings, pump parts, valve fittings, flanges, connections, similar to "Composion G"

CRAMP ALLOY NO. 97 (CRAMP COPPER ALLOY).
M-309, 99-99.8 Cu.
17,000-22,000 TS, 5,000-7,000 YS, 40-30 El.
For electrical installations for high conductivity, elec cond 75-85%.

CRAMP ALLOY NO 99
M-309, 3.5 Si, 1.5 Fe, 4 Zn, bal Cu
Cast 45,000-55,000 TS, 20,000-28,000 YS; 23-15 El; 120-130 Brin
For gears, bushings, cross-head bearings; silicon bronze

CRAMP ALLOY NO 101 (PARSONS TURBADIUM)
M-309, 47-52 Cu, 40-46 Zn, 1.0-2.5 Ni.
Cast 65,000-75,000 TS, 33,000-40,000 YS, 18-15 El, 90 Brin.
For pump impellers, turbine runners, buckets for water wheels, resists erosive action of water.

CRAMP ALLOY NO. 114
M-309, 67 Ni, 29 Cu, 1.5 Fe, 0.9 Mn, 1.25 Si
Cast 65,000-80,000 TS, 32,500-45,000 YS, 25-40 El; 25-40 RA; 125-150 Brin
For impellers, valve seats, acid resistant; "Monel Metal"

CRAMP ALLOY NO 115
M-309, 5 Sn, 5 Ni, 2 Zn, bal Cu.
Heat treated 50,000-85,000 TS; 22,000-55,000 YS; 40-10 El, 95-150 Brin.
For gears, slippers, bearings, valve bodies; hardenable, heavy duty

CRAMP ALLOY NO 118
M-309; 63 Ni, 30 Cu, 2 Fe, 0.9 Mn, 3-4 Si.
Cast: 100,000-130,000 TS; 75,000-95,000 YS; 1-4 El, 250-325 Brin.
For valve seats; S-Monel, acid resistant.

CRAMP ALLOY NO. 151
M-309; 78-82 Cu, 8-11 Al, 3-6 Fe, 3-6 Ni.
Heat treated: 80,000-115,000 TS, 35,000-70,000 YS; 20-5 El; 172-300 Brin.
For ship propellers; heat treatable, non-galling, corrosion resistant.

CRAMP ALLOY NO. 174.
M-309; 0.20-0.35 Be, 1.4-1.5 Ni, bal Cu.
Cast: 50,000 TS; 20,000 YS; 16 El; 100 Brin.
Heat treated: 80,000 TS; 55,000 YS; 17 El; 210 Brin.
For welding wheels; heat treatable, 40% electrical conductivity.

CRAMP ALLOY NO. 175.
M-309; 0.30-0.90 Cr, 0.5 max Fe, 0.5 max Si, bal Cu.
Cast: 50,000 TS; 40,000 YS; 15 El; 90 Brin.
For welding wheels; heat treatable, 75% electrical conductivity.

CRAMP ALLOY NO. 176.
M-309; 4-5 Cu, 1 Fe, 1.5 max Si, 0.25 max Ti, bal Al.
Cast 32,000 TS; 16,000 YS; 8 El; 60 Brin.
For cylinder heads, gear cases, age-hardenable.

CRAMP ALLOY NO. 177.
M-309; 4-5 Zn, 0.40-0.65 Mn. 0.3-0.6 Cr, bal Al.
Cast. 31,000 TS, 7 El.
For gear cases, general castings; age-hardens at room temperature.

CRAMP ALLOY NO. 275
M-309; 2.6-3.8 T.C., 0.15-1.50 Si, 3-6 Ni, 0.5-2.5 Cr, 0.15-1.50 Mn, bal Fe.
Cast: 50,000-80,000 TS, 500-600 Brin.
For pump plungers, rolls for metal rolling, grinding plates, wear and abrasion resistant; "Ni-Hard."

CRAMP'S SUPER-STRENGTH BRONZE. GRADE "A"
M-309, 57 Cu, 28 Zn, bal hardeners of Mn, Fe, Al
Cast. 115,000 TS, 68,000 YS, 10 El, 10 RA, 240 Brin
Wrought 118,000 TS, 70,000 YS, 8 El; 8 RA
For bushings, bearings, gears, worms, die castings, shafts, valve stems, tube sheets, Mn bronze, C Y P 65000

CRAMP'S SUPER STRENGTH BRONZE, GRADE "B"
M-309, 57 Cu, 28 Zn, bal hardeners of Mn, Fe, Al
Cast 110,000 TS, 63,000 YS. 15 El, 15 RA, 225 Brin
Wrought: 115,000 TS, 65,000 YS; 15 El, 15 RA.
For bushings, bearings, gears, worms, die castings, shafts, valve stems, tube sheets, pump impellers, Mn bronze; C.Y P 60000

CRAMP'S SUPER-STRENGTH BRONZE, GRADE "C"
M-309; 57 Cu, 28 Zn, bal hardeners of Mn, Fe Al
Cast. 100,000 TS, 55,000 YS; 20 El, 18 RA, 200 Brin
Wrought 105,000 TS, 60,000 YS, 18 El, 18 RA
For bushings, bearings, gears, worms, die castings, pump impellers, valve stems; Mn bronze, C Y P 50000

CRAMP'S SUPER-STRENGTH BRONZE, GRADE "D"
M-309, 57 Cu, 28 Zn, bal hardeners of Mn, Fe, Al
Cast: 90,000 TS, 45,000 YS, 25 El, 20 RA, 185 Brin
Wrought: 93,000 TS, 50,000 YS, 20 El; 20 RA.
For bushings, bearings, valve stems, shafts, gears, worms, die castings; Mn bronze, C.Y.P. 40000.

CRANE.
M-387; 0.7-1.2 C, bal Fe.
78,000 TS; 41,000 YS; 150 Brin
For tools, cold chisels; water hardening

CRANE-1.
M-111; C, alloy, bal Fe.
For tool machinery parts; oil hardened.

CRANE NO. 1.
M-1109; 75 Pb, 12.5 Sn, 12.5 Sb.
25.2 Brin.
For bearings, Babbitt

CRANE NO. 2.
M-748; 0.3 C, 2 Ni, 0.75 Cr, 0.25 Mo, bal Fe.
Cast: 100,000 TS.
For castings, valve fittings; for service at 750-1100°F, high pressure service.

CRANE-2.
M-111; 0.50 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, bolts, crankshafts, oil hardened, shock resistant.

CRANE NO. 2.
M-1109; 75 Pb, 10 Sn, 15 Sb.
25.6 Brin.
For bearings, Babbitt.

CRANE NO. 3
M-1109; 80 Pb, 5 Sn, 15 Sb.
25.4 Brin.
For bearings, Babbitt.

CRANE NO. 3 NICKEL ALLOY.
M-748, 0.3 C, 2.0-2.5 Ni, bal Fe.
Cast: 75,000 TS, 55,000 YS, 32 El; 55 RA.
For valves, fittings; low temperature applications.

CRANE NO 4.
M-1109, 92.5 Sn, 0.5 Pb, 3.5 Sb, 3.5 Cu.
22.6 Brin
For bearings, Babbitt

CRANE NO 4 CARBON-MOLYBDENUM.
M-748, 0.15-0.30 C, 0.4-0.6 Mo, 0.5-0.7 Mn, 0.2-0.6 Si, bal Fe.
Cast 80,000 TS, 50,000 YS; 26 El, 50 RA, 165 Brin
For valves and fittings, good creep resistance.

CRANE NO 5
M-1109, 89 Sn, 0.25 Pb, 3.75 Cu, 7 Sb
29.2 Brin
For bearings, Babbitt

CRANE NO 5 CHROME-MOLYBDENUM.
M-748, 0.15-0.30 C, 4.0-6.5 Cr, 0.4-0.65 Mo, 0.45-1.00 Mn, bal Fe
Cast. 105,000 TS; 78,000 YS; 22 El; 52 RA, 212 Brin
For valves, fittings, for temperature up to 1100°F.

CRANE 5 Cr-Mo
M-748, 0.30 C, 4-6 Cr, 0.55 Mo, bal Fe
Cast 110,000 TS, 80,000 YS; 18 El; 245 Brin.
For valves, fittings, piping; corrosion resistant.

CRANE NO 6.
M-1109, 85 Sn, 0.25 Pb, 10.75 Sb, 4 Cu.
30.8 Brin.
For bearings, Babbitt

CRANE NO 7.
M-1109, 81.5 Sn, 4 Pb, 10.5 Sb, 4 Cu
34.6 Brin
For bearings, Babbitt.

CRANE NO 7 CHROME-MOLYBDENUM
M-748, 0.18 max C, 1.0-1.5 Cr, 0.4-0.6 Mo, 0.75 Mn, bal Fe
Cast 78,000 TS; 52,000 YS, 28 El, 60 RA; 165 Brin
For valves, fittings, for temperature up to 1000°F.

CRANE NO. 8.
M-1109, 40 Sn, 48.5 Pb, 10.5 Sb, 1 Cu
23.1 Brin.
For bearings; Babbitt.

CRANE NO. 9 CHROME-MOLYBDENUM.
M-748; 0.18 max C, 2-3 Cr, 0.8-1.1 Mo, 0.7 Mn, bal Fe.
Cast: 85,000 TS; 60,000 YS; 25 El; 55 RA; 180 Brin.
For valves, fittings; high temperature steam service.

CRANE 18-8 Mo.
M-748; 0.10 C, 18-20 Cr, 9-10 Ni, 2-4 Mo, bal Fe.
Cast: 85,000 TS; 48,000 YS; 53 El; 150 Brin.
For valves, fittings; heat and abrasion resistant.

CRANE NO. 44 NICKEL ALLOY.
M-748; Ni, Sn, bal Cu.
For valve seats; wear resistant, resists dilute acids and alkalis.

CRANE NO. 49 NICKEL ALLOY.
M-748; Cu, Sn, bal Ni.
235 Brin.
For valves; corrosion resistant, for temperature up to 850°F.

CRANE CARBON CAST STEEL.
M-748; 0.25 C, 0.65 Mn, 0.4 Si, bal Fe.
Cast: 76,000 TS; 45,000 YS; 30 El; 50 RA; 155 Brin.
For valves, fittings; tough.

CRANE CAST MANGANESE BRONZE.
M-748; Zn, Mn, Pb, bal Cu.
60,000-80,000 TS.
For valve stems, yoke sleeves and bushings; wear resistant.

CRANELOY 20.
M-748; 0.07 max C, 29 Ni, 20 Cr, 2-3 Mo, 4 Cu, bal Fe.
Cast: 65,000-75,000 TS; 28,000-38,000 YS; 35-50 El; 50-40 RA; 120-150 Brin.
For chemical plant equipment, mixers; resists mixed acids, austenitic.

CRANE HARDENED STAINLESS STEEL.
M-748; 16-18 Cr, 0.6-0.8 C, bal Fe.
For discs, seats, valves; resists wear and galling.

CRANE SPECIAL BRASS.
M-748; Sn, Pb, bal Cu.
38,000 TS; 17,000 YS; 10 El
For valves, fittings; for temperatures up to 550°F.

CRANE STEAM BRASS.
M-748; 5 Sn, 5 Pb, 5 Zn, bal Cu
Cast: 37,000 TS; 16,000 YS; 26 El.
For valves, fittings; for temperature up to 450°F.

CRASCO NO. 7.
M-337; 1.05 C, 0.65 Cr, 0.4 Mn, 0.15 V, bal Fe.
For tools, dies; water or oil hardening.

CRASCO ALLOY.
M-337; C, W, Cr, bal Fe.
For tools, chisels; shock resistant

CRASCO BLACK LABEL.
M-337; 1.5 C, 0.4 Mn, 11-13 Cr, 0.8 Mo, 0.2 V, bal Fe.
For tools, dies, hot working dies and long run dies; air hardening, non-shrinking.

CRASCO BROACH STEEL.
M-337; C, alloy, bal Fe
For broaches, punches, dies, resists heavy pressures.

CRASCO DRILL ROD.
M-337; 1.05 C, 0.25 Mn, 0.25 Si, bal Fe.
For pivots, bearings, drill rod.

CRASCO FINISHING.
M-337; 1.4 C, 0.2 V, 4 Cr, 0.5 Si, 0.2 Mn, bal Fe.
For cutters, engravers' tools; fast finishing tool steel.

CRASCO GREEN LABEL.
M-337; 1.0 C, bal Fe.
For tools, dies; water hardening.

CRASCO HIGH SPEED.
M-337; 0.7 C, 4 Cr, 18 W, 1.1 V, bal Fe.
For tools, cutters, drills, reamers; high speed steel.

CRASCO HIGH SPEED MOLY NO. 2.
M-337; 0.83 C, 4.25 Cr, 6.4 W, 5 Mo, 1.8 V, bal Fe.
For tools, cutters, drills, broaches; high speed steel.

CRASCO RED LABEL.
M-337; 0.9 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, dies; cutters, punches; oil hardening, non-shrinking.

CRASCO SHANK STEEL.
M-337; 0.95 C, bal Fe.
For tools, tool shanks; water hardening.

CRASCO SPECIAL VANADIUM.
M-337, 0.9-1.05 C, 0.15-0.25 V, bal Fe.
For tools, dies; water hardening.

CRASCO WHITE LABEL.
M-337, 1.0 C, bal Fe
For tools, dies, water hardening

CRASCO YELLOW LABEL
M-337, 0.45-0.50 C, 0.25 Mn, 0.95 Cr, 0.2 V, bal Fe
For gears, shafts; oil hardening.

CRASFLOY
M-451, C, Ni, Cr, bal Fe
For rolls, hard alloy

CRESCENT DOUBLE SPECIAL.
M-38, 1.3 C, 3.6 W, bal Fe.
For finishing tools, drawing dies; oil hardening.

CRESCENT EXTRA.
M-38, 0.7-1.0 C, bal Fe.
For punches, dies, cutters, general tools; water hardening

CRESCENT HOT WORK NO 2
M-38; 0.95 C, 3.75 Cr, bal Fe
For tools, gripper and header dies, bloom shears; hot work steel

CRESCENT RIM ROLL.
M-38, 1.0 C, 0.5 Cr, bal Fe
For shaping rolls, drawing dies, oil hardening.

CRESCENT SPECIAL
M-38, 1.0 C, bal Fe
For tools, dies, water hardening.

CRESCENT SPECIAL CARBON TOOL.
M-38, 0.9 C, 0.35 Mn, 0.2 Si, bal Fe
For blanking and coining dies, reamers, taps, striking dies; water hardened.

CRESCENT SPECIAL WIRE DIE
M-38, 2.3 C, 0.5 W, 0.3 Mo, bal Fe.
For wire drawing dies, oil hardening

CRESCENT TOOL
M-38, 0.7-1.0 C, bal Fe
For punches, dies, cutters, general tools, water hardening

CREST A.H.
M-1684; 1.0 C, 0.70 Mn, 5.5 Cr, 0.3 V, 1.15 Mo, bal Fe.
Air hardening tool steel for blanking and trimming dies, shear blades, rolling dies, broaches.
AISI A 2.

CRESTALOY.
M-749; 0.5 C, 1.5 Cr, 0.2 V, bal Fe.
For tools, wrenches; oil hardening.

CREST O.H.
M-1684; 0.90 C, 1.15 Mn, 0.65 Cr, 0.25 V, 0.5 W, bal Fe.
Oil hardening tool steel for blanking and bending dies, punches, knurling tools, gauges.
AISI O 1.

CRESTON NO. 5.
M-750; 0.75-1.1 C, bal Fe.
For cold battering tools; water hardening.

CRESTON NO. 6.
M-750; 0.8-1.2 C, bal Fe.
For tools, dies; water hardening.

CRESTON NO. 7.
M-750, 0.9-1.3 C, bal Fe.
For tools, dies, cutters; water hardening.

CRESTON #8.
M-750; 0.90-1.40 C, bal Fe.
For tools, dies, cutters; water hardening.

CREUSABRO 32.
M-1488; 0.20 C, 1.2 Mn, 1.3 Cr, 0.25 Mo, bal Fe.
Normalized: 142,000 TS; 106,000 YS; 10 El
For cement plant equipment, ventilators, screens, coal and mine equipment
Wear resistant.

CREUSABRO 41.
M-1488, 0.35 C, 0.8 Mn, 1.4 Ni, 2.75 Cr, 0.3 Mo, 0.4 max Si, bal Fe
Heat treated. 235,000 TS, 192,000 YS; 4.5 El.
For gears, wear parts, highly stressed components.
Abrasion resistant.

CREUSABRO 43.
M-1488, 0.4 C, 0.4 Mn, 3.75 Ni, 1.7 Cr, 0.4 max Si, bal Fe
Heat treated 242,000 TS, 192,000 YS, 4.5 El
For gears, gear rings, cams, punches, stamping dies
Abrasion resistant.

CREUSABRO M
M-1488, 1.2 C, 13 Mn, 0.6 Si, bal Fe.
Quenched· 128,000 TS, 50,000 YS, 35 El.
For shafts, scraper buckets, crushers, grinders, safes, helmets
Abrasion and wear resistant.

CREUSABRO ML.
M-1488, 0.45 C, 0.6 Mn, 2 Si, bal Fe
Heat treated 214,000 TS, 115,000 YS; 5 El
For conveyors, wear plates
Abrasion and wear resistant.

CREUSABRO MLD
M-1488; 0.45 C, 0.6 Mn, 0.6 max Ni-Cr-Mo, bal Fe.
Heat treated· 221,000 TS; 171,000 YS, 5 El.
For mining chisels, wedges, springs.
Abrasion resistant.

CREUSELSO 22.
M-1488, 0.15 max C, 0.3 max S, 0.5 Mn, 0.1 Si, bal Fe.
Normalized; 50,000-62,000 TS; 28,000 min YS.
For engineering and mechanical structures requiring resistance to brittle fracture.
Good weldability.

CREUSELSO 26
M-1488; 0.20 max C, 0.2 Si, 0.8 Mn, bal Fe.
Normalized: 59,000-72,000 TS; 34,000 min YS.
For engineering and mechanical structures requiring resistance to brittle fractures.
Good weldability.

CREUSELSO 31.
M-1488; 0.20 max C, 0.3 Si, 1.0 Mn, bal Fe.
Normalized: 65,000-78,000 TS; 40,000 min YS.
For engineering and mechanical structures requiring resistance to brittle fracture.
Good weldability.

CREUSELSO 38.
M-1488; 0.20 max C, 0.4 Si, 1.2 Mn, bal Fe.
Normalized: 72,000-93,000 TS; 50,000 min YS.
For pressure vessels, structural steelwork, bridges.
Good weldability. Resists brittle fracture.

CREUSELSO 42
M-1488; 0.24 max C, 0.4 Si, 1.4 Mn, bal Fe
Normalized· 78,000-93,000 TS; 57,000 min YS.
For penstocks, pressure vessels, structural steelwork, bridges.
Good weldability. Resists brittle fracture.

CREUSELSO 50.
M-1488, 0.20 C, 1.4 Mn, 0.4 Si, 0.25 Mo, bal Fe.
Rolled: 72,000 TS; 45,000 YS; 30 El; 150 Brin.
Heat treated: 100,000 TS, 62,000 YS; 20 El; 200 Brin.
For penstocks, pressure vessels, structural steelwork, bridges, derricks.
Good weldability. Resists brittle fracture.

CREUSOT 0.5DF03.
M-1488, 0.40 C, 0.5 Cr, 0.6 Ni, 0.2 Mo, bal Fe.
Oil hardened 142,000-200,000 TS; 120,000 YS; 9 El.
For gears, pinions, axles, crankshafts, fasteners, bolts.
AISI 8640 steel. Tough and shock resistant.

CREUSOT 0.5DF06
M-1488; 0.20 C, 0.5 Cr, 0.5 Ni, 0.2 Mo, bal Fe.
Oil hardened. 142,000-200,000 TS, 120,000 YS, 7 El.
For gears, pinions, bolts, fasteners, crankshafts, engine components
AISI 8620 Case hardening, tough, shock resistant.

CREUSOT 0.5F08
M-1488, 0.15 C, 0.55 Cr, 0.55 Mo, bal Fe.
Heat treated 65,000 TS, 40,000 YS, 22 El
For boilers, steam manifolds, reactors, superheater pipes, turbine casings
ASTM A356 Gr.5.

CREUSOT 1F3.
M-1488, 0.40-0.48 C, 0.75-1.2 Cr, 0.6-0.9 Mn, 0.4 max Si, bal Fe
Heat treated· 193,000 TS; 128,000 YS, 7 El.
For gears, bolts, shafts, axles, oil hardened.

CREUSOT 1F3/4
M-1488; 0.34-0.42 C, 0.75-1.2 Cr, 0.6-0.9 Mn, 0.4 max Si, bal Fe
Heat treated· 295,000 TS, 192,000 YS; 3 El.
For gears, bolts, crankshafts; oil hardened

CREUSOT IF4/5.
M-1488; 0.30-0.37 C, 0.80-1.2 Cr, 0.6-0.9 Mn, 0.4 max Si, bal Fe.
Heat treated· 280,000 TS; 175,000 YS; 4 El.
For gears, bolts, crankshafts; oil hardened.

CREUSOT 1F5/6
M-1488; 0.25-0.32 C, 0.80-1.2 Cr, 0.60-0.90 Mn, 0.40 max Si, bal Fe.
Heat treated: 235,000 TS, 150,000 YS; 5 El.
For gears, bolts, crankshafts, oil hardened.

CREUSOT 1FO3.
M-1488; 0.37-0.45 C, 0.6-0.9 Mn, 0.8-1.2 Cr, 0.15-0.35 Mo, bal Fe.
Heat treated: 200,000 TS; 144,000 YS; 8 El.
For gears, bolts, machine tool parts; oil hardened, tough.

CREUSOT 1FO4.
M-1488; 0.31-0.39 C, 0.85-1.2 Cr, 0.15-0.35 Mo, 0.6-0.9 Mn, bal Fe.
Annealed: 90,000 TS; 58,000 YS; 25 El; B 90 Rock.
Heat treated: 185,000 TS; 168,000 YS; 12 El; 370 Brin.
For gears, countershafts, bolts, fasteners, shafts, axles. Oil hardening, shock resistant.

CREUSOT 1FO5/6.
M-1488; 0.2-0.3 C, 0.6-0.9 Mn, 0.8-1.2 Cr, 0.15-0.35 Mo, bal Fe.
Heat treated: 242,000 TS, 150,000 YS; 5 El.
For gears, bolts, crankshafts, axles; oil hardened, tough.

CREUSOT 1FO7.
M-1488; 0.15-0.22 C, 0.85-1.2 Cr, 0.15-0.35 Mo, bal Fe.
Heat treated: 228,000 TS; 143,000 YS, 6 El.
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT 1FO8.
M-1488, 0.08-0.15 C, 0.8-1.2 Cr, 0.15-0.35 Mo, bal Fe.
Heat treated: 186,000 TS, 114,000 YS; 7 El.
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT 1FV2.
M-1488; 0.45-0.55 C, 1.2-1.6 Cr, 0.4 max Mn, 0.2 V, 0.4 max Si, bal Fe.
Heat treated: 213,000 TS, 143,000 YS, 7 El.
For gears, bolts, springs; oil hardened, shock resistant.

CREUSOT 1.1FO8.
M-1488, 0.13 C, 1 Cr, 0.55 Mo, bal Fe.
Heat treated. 65,000 TS; 45,000 YS, 22 El.
For boilers, steam manifolds, turbine casings, reactors, superheater pipes
ASTM A 387 Gr. B.

CREUSOT 1.2DF3.
M-1488; 0.40 C, 0.6 Cr, 1.2 Ni, bal Fe
Oil hardened: 114,000-157,000 TS; 100,000 YS, 9 El
For gears, clutches, connecting flanges, bolts, fasteners, shafts.
AISI 3140 steel, tough, shock resistant.

CREUSOT 1.2DF6.
M-1488; 0.20 C, 0.6 Cr, 1.2 Ni, bal Fe.
Heat treated: 107,000-142,000 TS; 92,000 YS; 10 El.
For bolts, levers, shafts, pins, fasteners, gears
Case-hardening.
AISI 3120 steel, tough, shock resistant.

CREUSOT 1.3FOV.
M-1488; 0.24 C, 1.25 Cr, 0.6 Mo, 0.25 V, bal Fe
Heat treated: 100,000 TS; 82,000 YS; 16 El, C 25 Rock.
For rotors, hot bolts, hardware, gears, shafts.
Tough, shock resistant.

CREUSOT 1.4DF3
M-1488; 0.30-0.38 C, 1.2-1.6 Ni, 0.8-1.2 Cr, bal Fe.
Heat treated: 295,000 TS; 200,000 YS; 4 El.
For gears, bolts, machine tool parts; oil hardened, tough.

CREUSOT 1.4DF5.
M-1488; 0.22-0.30 C, 1.2-1.6 Ni, 0.80-1.15 Cr, bal Fe.
Heat treated. 250,000 TS; 166,000 YS; 6 El.
For gears, bolts, machine tool parts; oil hardened, tough.

CREUSOT 1.4DF6.
M-1488; 0.16-0.22 C, 1.2-1.6 Ni, 0.85-1.2 Cr, bal Fe.
Heat treated: 222,000 TS; 143,000 YS; 7 El.
For gears, bolts, machine tool parts; case hardened, oil quenched.

CREUSOT 1.4DF7.
M-1488; 0.11-0.18 C, 1.2-1.6 Ni, 0.85-1.2 Cr, bal Fe.
Heat treated: 213,000 TS; 128,000 YS; 7 El.
For gears, bolts, machine tool parts; case hardened, oil quenched.

CREUSOT 1.4DF8.
M-1488, 0.07-0.12 C, 0.6-0.9 Mn, 1.2-1.6 Ni, 0.85-1.2 Cr, bal Fe.
Heat treated. 192,000 TS, 121,000 YS; 8 El.
For gears, bolts, machine tool parts; case hardened, oil quenched.

CREUSOT 1.4DFO6.
M-1488, 0.14-0.22 C, 1.2-1.6 Ni, 0.8-1.2 Cr, 0.1-0.3 Mo, bal Fe
Heat treated: 229,000 TS, 130,000 YS; 6 El.
For gears, bolts, camshafts, case hardened, oil quenched

CREUSOT 1.4DFO7/8.
M-1488; 0.10-0.16 C, 1.2-1.6 Ni, 0.8-1.2 Cr, 0.1-0.3 Mo, bal Fe.
Heat treated: 221,000 TS; 128,000 YS; 7 El.
For gears, bolts, camshafts, cams, case hardened, oil quenched

CREUSOT 1.5DFO.
M-1488; 0.55 C, 1.5 Ni, 1 Cr, 0.3 Mo, bal Fe.
Annealed 262 Brin, 110,000 TS.
Hardened: 208,000 TS; 180,000 PL; C 45 Rock.
For hot stamping dies, punches, brake dies, bushings, set screws
Type 1 6 hot work tool steel, oil harden, shock resistant

CREUSOT 1.5DFO2
M 1488, 0.28 C, 1.4 Cr, 1.5 Ni, 0.38 Mo, bal Fe.
Oil hardened: 200,000 TS, 170,000 YS, 8 El
For aircraft engine parts, propeller shafts, gears, linings, fasteners
Tough, shock resisting.

CREUSOT 1.5DFO6S.
M-1488; 0.20 max C, 0.6 Cr, 1.5 Ni, 0.25 Mo, bal Fe
For gears, bolts, shafts, bridge members, resists low temperature

CREUSOT 1.5DFOV1S
M-1488, 0.22 max C, 1.3 Cr, 1.5 Ni, 0.27 Mo, 0.17 V, bal Fe
For welded structures, bridge members; heat resistant to 550°C

CREUSOT 1.5DFOV4S
M-1488; 0.15 max C, 1.3 Cr, 1.5 Ni, 0.27 Mo, 0.17 V, bal Fe
For welded structures, bridge members; heat resistant to 550°C

CREUSOT 1.7DFOV.
M-1488; 0.55 C, 1.5 Ni, 1 Cr, 0.3 Mo, 0.1 V, bal Fe
For hot stamping dies, punches.
Oil hardening hot-work tool steel.

CREUSOT 1.8DFO 2/3.
M-1488; 0.40 C, 0.8 Cr, 1.8 Ni, 0.25 Mo, bal Fe.
Oil hardened: 156,000-214,000 TS; 128,000 YS, 9 El.
For gears, shafts, crankshafts, fasteners.
AISI 4340 steel. Tough and shock resistant.

CREUSOT 1.8DFO 6/7.
M-1488; 0.20 C, 0.8 Cr, 0.25 Mo, 1.8 Ni, bal Fe.
Oil hardened: 156,000-214,000 TS; 128,000 YS; 8 El.
For gears, pinions, cams, crankshafts, cam shafts, pawls.
AISI 4320 steel. Case hardening, tough and shock resistant.

CREUSOT 2D8.
M-1488; 0.15-0.23 C, 1.8-2.3 Ni, 0.6 max Mn, bal Fe.
Heat treated: 114,000 TS; 65,000 YS; 12 El.
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT 2D9.
M-1488; 0.10-0.15 C, 1.8-2.3 Ni, bal Fe.
Annealed: 70,000 TS; 43,000 YS; 32 El; 150 Brin.
For cams, fasteners, bolts, camshafts, gears.
Case hardening, tough, shock resistant.

CREUSOT 2D10.
M-1488; 0.07-0.14 C, 1.8-2.3 Ni, 0.5 max Mn, bal Fe
Rolled: 100,000 TS; 50,000 YS; 16 El
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT 2D11
M-1488, 0.10 max C, 1.8-2.3 Ni, 0.5 max Mn, bal Fe
Annealed 65,000 TS, 40,000 YS, 36 El, 140 Brin
For cams, camshafts, gears, pinions, fasteners
Case hardening, tough, shock resistant.

CREUSOT 2DF6S.
M-1488, 0.22 max C, 0.6 Cr, 2.0 Ni, bal Fe
For gears, bolts, shafts, bridge members; resists low temperature.

CREUSOT 2.2FO
M-1488; 0.10 C, 2.25 Cr, 1 Mo, bal Fe
Annealed 65,000 TS, 35,000 YS, 24 El
For boilers, steam manifolds, superheater pipes, reactors.
ASTM A 217-WC9

CREUSOT 3D8
M-1488, 0.14-0.22 C, 2.7-3.3 Ni, 0.6 max Mn, bal Fe
Heat treated 128,000 TS; 79,000 YS, 14 El.
For gears, bolts, camshafts, cams, case hardened, oil quenched

CREUSOT 3DF4/5
M-1488, 0.26-0.33 C, 2.7-3.3 Ni, 0.6-0.9 Cr, bal Fe
Heat treated: 150,000 TS, 100,000 YS, 13 El.
For gears, bolts, machine tool parts, oil hardened, tough

CREUSOT 3DF7/8
M-1488, 0.11-0.16 C 2.7-3.3 Ni 0.6-0.9 Cr, 0.3-0.6 Mn, bal Fe
Heat treated 207,000 TS, 120,000 YS, 9 El
For gears, bolts, machine tool parts; case hardened, tough

CREUSOT 3DF8
M-1488; 0.08-0.14 C, 2.7-3.0 Ni, 0.6-0.9 Cr, 0.3-0.6 Mn, bal Fe
Heat treated 166,000 TS, 100,000 YS; 12 El
For gears, bolts, camshafts, cams, case hardened, oil quenched

CREUSOT 3DFO2
M-1488, 0.25-0.35 C, 2.7-3.3 Ni, 0.60-1.0 Cr, 0.2-0.5 Mo, bal Fe
Heat treated 177,000 TS, 127,000 YS; 10 El
For gears, bolts, machine tool parts; oil hardened, tough

CREUSOT 3DFO5.
M-1488, 0.12-0.19 C, 3.0-3.6 Ni, 0.7-1.1 Cr, 0.15-0.35 Mo, bal Fe
Heat treated: 173,000 TS; 136,000 YS, 8 El.
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT 3DFO8.
M-1488; 0.08-0.13 C, 0.6-0.9 Cr, 2.7-3.3 Ni, 0.2-0.4 Mo, bal Fe.
Heat treated: 144,000 TS; 114,000 YS; 10 El.
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT 3FDO1.
M-1488; 0.30-0.38 C, 2.5-3.0 Cr, 1.2-1.6 Ni, 0.2-0.4 Mo, bal Fe.
Heat treated. 235,000 TS; 192,000 YS; 4 El.
For gears, bolts, machine tool parts; oil hardened, tough.

CREUSOT 3FO
M-1488, 0.25-0.35 C, 2.5-3.5 Cr, 0.30-0.60 Mo, bal Fe.
Heat treated: 178,000 TS; 128,000 YS; 9 El.
For gears, bolts, crankshafts; oil hardened, tough.

CREUSOT 3FP
M-1488, 0.3 C, 3 W, 3.2 Cr, Mo, V, bal Fe.
Annealed: 215 Brin.
For nail dies, riveting tools, punches.
Hot work tool steel, tough.

CREUSOT 3.5D8.
M-1488, 0.20 C, 3.5 Ni, 0.9 max Mn, 0.35 max Si, bal Fe
Heat treated 100,000-128,000 TS; 78,000 YS; 14 El
For cryogenic vessels, tanks, equipment.
Shock resistant at cryogenic temperatures.
ASTM A 203D

CREUSOT 3.5DF 3/4.
M 1488; 0.35 C, 1.6 Cr, 3.5 Ni, bal Fe.
Oil hardened 150,000-178,000 TS, 113,000 YS.
For highly loaded gears, pinions, rollers, swivels, clutches
AISI 3335 Tough, shock resistant.

CREUSOT 3.5DF 7/8
M-1488, 0.10 C, 1.6 Cr, 3.5 Ni, bal Fe.
Oil hardened 130,000-170,000 TS; 106,000 YS; 11 El
For shafts, gears, pinions, universal joints
AISI 3310 steel, tough, shock resistant
Case hardening

CREUSOT 3.5 DFO1.
M 1488, 0.3-0.4 C, 3.2-3.8 Ni, 1.2-1.7 Cr, 0.2-0.5 Mo, bal Fe
Heat treated 250,000 TS, 208,000 YS; 5 El
For gears, bolts, machine tool parts, oil hardened, tough.

CREUSOT 4DF2
M-1488, 0.30-0.38 C, 3.5-4.0 Ni, 1.5-1.9 Cr, bal Fe
Heat treated: 242,000 TS, 193,000 YS; 5 El
For gears, bolts, crankshafts, oil hardened, tough

CREUSOT 4DF6
M-1488, 0.08-0.15 C, 3.4-3.9 Ni, 0.7-1.1 Cr, bal Fe.
Heat treated 228,000 TS, 135,000 YS, 8 El.
For gears, bolts, camshafts, cams, case hardened, oil quenched

CREUSOT 4DFO1
M-1488, 0.30-0.40 C, 3.5-4.5 Ni, 1.5-2.0 Cr, 0.35-0.60 Mo, bal Fe.
Heat treated: 270,000 TS; 207,000 YS; 4 El.
For gears, bolts, machine tool parts, oil hardened, tough

CREUSOT 4DFO2
M-1488; 0.28-0.36 C, 3.5-4.5 Ni, 1.1-1.5 Cr, 0.35-0.60 Mo, bal Fe
Heat treated 242,000 TS, 200,000 YS; 4 El.
For gears, bolts, machine tool parts; oil hardened, tough

CREUSOT 4DFO2/3.
M-1488; 0.20-0.30 C, 3.8-4.5 Ni, 1.0-1.4 Cr, 0.35-0.60 Mo, bal Fe.
Heat treated: 192,000 TS; 135,000 YS; 9 El.
For gears, bolts, machine tool parts; oil hardened, tough.

CREUSOT 4DO2.
M-1488; 0.15-0.25 C, 3.7-4.4 Ni, 0.70-1.20 Mo, bal Fe.
Heat treated: 207,000 TS; 178,000 YS; 6 El.
For gears, bolts, camshafts; case hardened, oil quenched.

CREUSOT 4DO6.
M-1488; 0.09-0.15 C, 3.7-4.4 Ni, 0.70-1.2 Mo, bal Fe.
Heat treated: 172,000 TS; 135,000 YS; 8 El.
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT 4PFOV.
M-1488; 0.25 C, 4.2 W. 1.2 Cr, 0.4 Mo, 0.25 V, bal Fe.
Annealed: 238 Brin.
For piercing punches, mandrels, press dies.
Hot work tool steel.

CREUSOT 4.5DF1.
M-1488; 0.37-0.45 C, 4.0-4.6 Ni, 1.5-2.0 Cr, bal Fe.
Heat treated: 250,000 TS; 200,000 YS; 5 El.
For gears, bolts, crankshafts; oil hardened, tough.

CREUSOT 4.5DFO1.
M-1488; 0.35-0.45 C, 4.1-4.9 Ni, 1.4-1.8 Cr, 0.35-0.60 Mo, bal Fe.
Heat treated: 260,000 TS, 207,000 YS; 4 El.
For gears, bolts, machine tool parts; oil hardened, tough.

CREUSOT 5D6.
M-1488; 0.13-0.20 C, 0.4-0.7 Mn, 4.7-5.4 Ni, bal Fe.
Heat treated: 213,000 TS; 127,000 YS, 6 El.
For gears, bolts, machine tool parts; case hardened, oil quenched.

CREUSOT 5D6/7.
M-1488; 0 10-0 16 C, 0.6 max Mn, 4.7-5.4 Ni, bal Fe.
Heat treated: 200,000 TS; 125,000 YS; 8 El.
For gears, bolts, machine tool parts; case hardened, oil quenched.

CREUSOT 5D8.
M-1488; 0.08-0.14 C. 0.6 max Mn, 4.7-5.4 Ni, bal Fe.
Heat treated. 178,000 TS; 112,000 YS; 9 El.
For gears, bolts, machine tool parts; case hardened, oil quenched.

CREUSOT 5FAO.
M-1488, 0.17 max C, 5 Cr, 0.5 Mo, 1 Al, bal Fe.
Heat treated: 114,000 TS; 92,000 YS; 10 El; 240 Brin.
Annealed: 70,000 TS; 30,000 YS; 28 El; 160 Brin.
For heat exchanger tubes, fasteners, oil refinery equipment, valve trim, fittings.
Heat and corrosion resistant. Resists scaling to 1100°F.

CREUSOT 5FOP.
M-1488; 0.35 C, 5 Cr, 1.2 W, 1.2 Mo, 0.5 V, bal Fe.
Annealed. 238 Brin; 110,000 TS; 70,000 YS.
Hardened: 216,000 TS; 185,000 YS; C 58 Rock.
For forging dies, punches, shear blades, drills, screwing dies, bolt heading dies.
Type H 12 hot-work tool steel, tough, air or oil harden, shock resistant.

CREUSOT 5FOV.
M-1488; 0.35 C, 5 Cr, 1.5 Mo, 0.4 V, bal Fe.
Annealed: 235 Brin; 102,000 TS; 66,000 YS.
Hardened: 300,000 TS; 250,000 YS; 6 El; C 55 Rock.
For forging dies, punches, screwing dies, shear blades, gripper and header dies, high temperature bolts.
Type H-11 hot work tool steel, tough, shock resistant.

CREUSOT 9D6.
M-1488; 0.08 max C, 0.8 max Mn, 0.35 max Si, 8.5-10.0 Ni, bal Fe.
Normalized. 93,000 TS; 71,000 YS.
Sheets: 70,000 min TS; 60,000 min YS; 19 min El.
For liquid gas industry, storage or transportation tanks. Weldable cryogenic steel, good low temperature ductility.

CREUSOT 12FFB.
M-1488; 1.6 C, 12 Cr, 0.7 Mo, 0.3 V, bal Fe.
Annealed· 248 Brin, 120,000 TS.
Air hardened: 278,000 TS; 214,000 YS; C 56 Rock.
For shear blades, dies, wear plates, wood tools.
Type D 2 cold work tool steel, oil or air hardening. Nondeforming.

CREUSOT 12FFO.
M-1488. 1.9 C, 12 Cr, 1 Mo, 0 1 bal Fe.
Annealed· 248 Brin.
Hardened· C 64-65 Rock; 525,000 C.S.
For shear blades, dies, wood tools, blanking and lamination dies, rolls, knurls, thread rolling dies.
Wear and abrasion resistant
Type D 4 cold work tool steel, oil or air hardening. Non-deforming.

CREUSOT 13FF.
M-1488, 2 C, 13 Cr, bal Fe
Annealed 248 Brin.
Hardened. C 64-66 Rock.
For punches, cutting off tools, flanging and rolling dies, ceramic molds, shear blades for silicon steels, blanking and forming dies.
Type D 3 cold work tool steel, oil or air hardening, wear resistant

CREUSOT 13FFCo
M-1488; 2 C, 13 5 Cr, 1 Mo, 0.5 V, 3 Co, bal Fe.
Annealed· 277 Brin
Hardened. C 64-66 Rock.
For wood tools, shear blades, dies, blanking and forming dies, punches, ceramic molds.
Cold working tool steel, oil or air harden.
Non-deforming, wear resistant

CREUSOT 14FF.
M-1488; 1.5 C, 14 Cr, 1 Mo, 2 Co, bal Fe.
Annealed: 277 Brin, 120,000 TS; 80,000 El.
Hardened· C 63 Rock; 200,000 TS; 1 El.
For punches, cut-off blades, milling cutters, wood tools, shear blades, rolls, mandrels.
Type D 5 cold work steel, air or oil harden.

CREUSOT A 1B.
M-1488; 0.60-0.70 C, 0.45 max Si, 0.50-0.80 Mn, bal Fe.
Heat treated: 170,000 TS; 116,000 YS; 10 El; 38 RA; 350 Brin
For die blocks, rails, tie rods, springs; water hardened

CREUSOT A 1H.
M-1488; 0.60-0.68 C, 0.40 max Si, 0.65-0.90 Mn, bal Fe.
Heat treated: 165,000 TS; 115,000 YS; 12 El; 40 RA; 330 Brin.
For rails, springs, die blocks; water hardened.

CREUSOT A 2.
M-1488; 0.60 C, 0.65 Mn, 0.45 Si, bal Fe.
Annealed: 110,000-130,000 TS; 269 Brin.
Oil hardened: 170,000 TS; 145,000 YS; 7 El.
For springs, thrust bearings, cams, agricultural machinery, hammers.
AISI 1060 steel.

CREUSOT A 2B.
M-1488; 0.55-0.65 C, 0.45 max Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 325 Brin.
For die blocks, rails, tie rods, springs; water hardened.

CREUSOT A 3/4.
M-1488; 0.50 C, 0.65 Mn, 0.45 Si, bal Fe.
Annealed: 110,000 TS; 55,000 YS, 13 El; 210 Brin
Oil hardened: 120,000-150,000 TS; 90,000 YS.
For drive clutches, gears, cams, shafts, axles, hammers. AISI 1050 steel

CREUSOT A 3/4B.
M-1488, 0.45-0.55 C, 0.45 max Si, 0.50-0.80 Mn, bal Fe.
Annealed: 96,000 TS; 52,000 YS, 16 El, 23 RA; 170 Brin
For axles, gears, crankshafts, bolts, water hardened.

CREUSOT A 3B.
M-1488; 0.50-0.60 C, 0.45 max Si, 0.30-0.80 Mn, bal Fe
Heat treated. 150,000 TS, 110,000 YS; 15 El; 42 RA, 310 Brin
For die blocks, clutch discs, springs, water hardened.

CREUSOT A 3H.
M-1488, 0.48-0.58 C, 0.40 max Si, 0.50-0.80 Mn, bal Fe.
Annealed. 96,000 TS; 52,000 YS, 16 El, 23 RA; 170 Brin
For axles, gears, bolts, shafts, crankshafts; water hardened.

CREUSOT A 4/5B
M-1488; 0.40-0.50 C, 0.45 max Si, 0.50-0.80 Mn, bal Fe.
Hot rolled 98,000 TS; 59,000 YS, 24 El; 45 RA; 212 Brin
For axles, gears, bolts, shafts, water hardened

CREUSOT A 4/5H.
M-1488, 0.40-0.48 C, 0.40 max Si, 0.50-0.80 Mn, bal Fe
Hot rolled: 98,000 TS, 59,000 YS, 24 El; 45 RA; 212 Brin
For axles, gears, bolts, shafts, water hardened

CREUSOT A 4H
M-1488, 0.44-0.52 C, 0.40 max Si, 0.50-0.80 Mn, bal Fe.
Hot rolled 98,000 TS; 59,000 YS; 24 El, 45 RA, 212 Brin.
For axles, gears, bolts, shafts; water hardened.

CREUSOT A 5.
M-1488; 0.40 C, 0.65 Mn, 0.45 Si, bal Fe
Annealed: 98,000 TS; 50,000 YS; 36 El, 180 Brin.
Water hardened: 128,000-157,000 TS, 100,000 YS 9 El
For pins, axles, hammers, fasteners, gears, bolts, shafts. AISI 1040 steel, water harden.

CREUSOT A 5/6H.
M-1488; 0.34-0.40 C, 0.40 max Si, 0.50-0.80 Mn, bal Fe.
Hot rolled: 88,000 TS; 56,000 YS; 28 El; 52 RA; 190 Brin
For gears, bolts, crankshafts; water hardened.

CREUSOT A 5H.
M-1488; 0.38-0.45 C, 0.40 max Si, 0.50-0.80 Mn, bal Fe.
Hot rolled: 91,000 TS; 58,000 YS; 27 El; 50 RA; 200 Brin.
For gears, bolts, crankshafts; water hardened.

CREUSOT A 6/7.
M-1488; 0.30 C, 0.65 Mn, 0.45 Si, bal Fe.
Water hardened: 100,000-135,000 TS; 71,000 YS.
Annealed: 84,000 TS; 42,000 YS; 18 El; 163 Brin.
For shafts, crankshafts, gears, stub axles, levers, cylinders.
AISI 1030 steel, water harden.

CREUSOT A 6/7B.
M-1488, 0.25-0.35 C, 0.45 max Si, 0.50-0.80 Mn, bal Fe.
Hot rolled: 80,000 TS; 50,000 YS; 30 El; 56 RA; 165 Brin.
For gears, shafts, bolts, screws; water hardened.

CREUSOT A 6B.
M-1488; 0.30-4.40 C, 0.45 max Si, 0.50-0.80 Mn, bal Fe.
Hot rolled. 85,000 TS; 54,000 YS; 30 El; 53 RA; 185 Brin.
For gears, shafts, axles, bolts; water hardened.

CREUSOT A 6H.
M-1488, 0.30-0.36 C, 0.40 max Si, 0.50-0.80 Mn, bal Fe.
Hot rolled. 85,000 TS; 54,000 YS; 30 El, 53 RA; 185 Brin.
For gears, bolts, shafts, fasteners; water hardened.

CREUSOT A 7B.
M-1488, 0.22-0.32 C, 0.45 max Si, 0.50-0.80 Mn, bal Fe
Hot rolled: 70,000 TS; 45,000 YS, 31 El; 58 RA; 145 Brin
For gears, bolts, armature shafts, brackets; water hardened.

CREUSOT A 8B
M-1488, 0.20-0.30 C, 0.45 max Si, 0.50-0.80 Mn, bal Fe
Hot rolled: 70,000 TS; 45,000 YS; 31 El; 58 RA, 145 Brin
For gears, bolts, armature shafts, brackets; water hardened

CREUSOT A 9.
M-1488, 0.20 C, 0.65 Mn, 0.45 Si, bal Fe.
Water hardened: 79,000-114,000 TS; 52,000 YP.
Annealed 54,000 TS, 29,000 YS; 30 El; 140 Brin.
For slides, ship components, transmission shafts, fasteners, gears, pinions, cams.
AISI 1020 steel, case harden.

CREUSOT A 9B.
M-1488; 0.15-0.25 C, 0.45 max Si, 0.5-0.8 Mn, bal Fe.
Annealed: 73,000 TS; 42,000 YS; 22 El; 58 RA; 145 Brin
For bolts, cams, bushings, rivets, gears; case hardened, water quenched.

CREUSOT A 9H.
M-1488; 0.15-0.22 C, 0.35 max Si, 0.50-0.80 Mn, bal Fe.
Annealed: 73,000 TS; 41,000 YS; 22 El; 58 RA; 140 Brin
For fan blades, bushings, gears, bolts; case hardened, water quenched.

CREUSOT A 10.
M-1488, 0.16 max C, 0.04 S & P, bal Fe
Annealed: 55,000 TS, 32,000 YS; 26 El.
For boiler drums, steam manifolds, pressure vessels.
ASTM A- 285 Gr.A.

CREUSOT A 10B.
M-1488; 0.10-0.18 C, 0.30 max Si, 0.30-0.60 Mn, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El; 60 RA; 140 Brin.
For bolts, screws, nails, cams, bushings; case hardened.

CREUSOT A 10HC.
M-1488; 0.09-0.16 C, 0.35 max Si, 0.60-0.90 Mn, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin.
For screws, bolts, gears, cams, bushings; case hardened, water quenched.

CREUSOT A 11.
M-1488; 0.10 C, 0.45 Mn, 0.30 max Si, bal Fe.
Water hardened: 64,000-100,000 TS; 43,000 YS.
Annealed: 55,000 TS, 29,000 YS; 30 El; 110 Brin.
For boiler plates, chains, rivets, tubes.
AISI 1010 steel.

CREUSOT A 11B.
M-1488; 0.06-0.15 C, 0.30 max Si, 0.30-0.60 Mn, bal Fe
Annealed: 64,000 TS; 40,000 YS; 28 El, 65 RA; 130 Brin.
For rivets, nails, bolts, nuts, fan blades.

CREUSOT A 11C.
M-1488; 0.06-0.12 C, 0.20 max Si, 0.30-0.60 Mn, bal Fe
Annealed: 64,000 TS; 40,000 YS; 28 El, 65 RA; 130 Brin.
For nails, rivets, bolts, cams; case hardened, water quenched.

CREUSOT A 11HC.
M-1488; 0.06-0.12 C, 0.15 max Si, 0.40-0.65 Mn, bal Fe.
Annealed: 64,000 TS, 40,000 YS, 28 El, 65 RA, 130 Brin .
For nails, rivets, bolts, nuts, cams, case hardened, water quenched

CREUSOT AM6/7S.
M-1488; 0.25 max C, 0.35 max Si, 0.60 min Mn, 0.04 max S and P, bal Fe
For pressure tanks, bridges, hoists, machinery parts

CREUSOT AM8/9S
M-1488; 0.22 max C, 0.35 max Si, 0.60 min Mn, 0.04 max S and P, bal Fe.
For pressure tanks, conduits, naval construction, good weldability

CREUSOT AM9/10S
M-1488, 0.18 max C, 0.25 max Si, 0.40 min Mn, 0.04 max S and P, bal Fe
For case hardened and structural parts, bridges, good weldability.

CREUSOT AM10/11S.
M-1488, 0.16 max C, 0.20 Si, 0.40 min Mn, 0.04 max S and P, bal Fe
For case hardened and structural parts, bridges, good weldability

CREUSOT AM11S.
M-1488; 0.12 max C, 0.20 max Si, 0.40 min Mn, 0.04 max S and P, bal Fe.
For case hardened parts, structural parts, bridges; good weldability.

CREUSOT A 0.
M-1488, 0.72 C, 0.65 Mn, 0.45 Si, bal Fe.
Annealed: 125,000-135,000 TS; 321 Brinell.
Ht. Tr.: 185,000 TS; 136,000 YS; 13 El; C 39 Rock.
For bands, springs, crusher components, hand tools, punches, hammers, shovels, harrows.
AISI 1070 steel, water harden.

CREUSOT A 0/1H.
M-1488; 0.67-0.75 C, 0.40 max Si, 0.60-0.85 Mn, bal Fe.
Heat treated: 174,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin.
For springs, rails, die blocks, clutch discs; water hardened.

CREUSOT A 0B.
M-1488; 0.65-0.80 C, 0.45 max Si, 0.50-0.80 Mn, bal Fe.
Heat treated. 175,000 TS; 130,000 YS; 12 El; 36 RA, 360 Brin.
For die blocks, rails, tie rods, springs; water hardened.

CREUSOT A/0H.
M-1488, 0.75-0.85 C, 0.40 max Si, 0.50-0.75 Mn, bal Fe
Heat treated: 190,000 TS; 145,000 YS; 12 El; 35 RA, 390 Brin.
For springs, rails, die blocks, tools, hammers, water hardened

CREUSOT A 00
M-1488, 0.80-0.93 C, 0.70-1.0 Mn, 0.4 Si, bal Fe
Water hardened: 345,000-400,000 TS
Annealed 100,000 TS; 55,000 YS, 20 El, 198 Brin.
For crusher bars, axes, tools, dies, springs, bearings.
AISI 1085 steel, water hardening.

CREUSOT B 2/3.
M-1488, 0.47-0.55 C, 0.001 B, 0.65-1.1 Mn, 0.3 Si, bal Fe
Heat treated. 320,000-213,000 TS, 177,000 YS, 6 El, 625 Brin
For reactor equipment, water hardened.

CREUSOT B 3/4
M-1488, 0.42-0.49 C, 0.001 B, 0.65-1.1 Mn, 0.3 Si, bal Fe
Heat treated: 290,000-165,000 TS, 578-322 Brin
For reactor equipment, water hardened.

CREUSOT B 4/5
M-1488, 0.37-0.44 C, 0.001 B, 0.65-1.1 Mn, 0.3 Si, bal Fe.
Heat treated. 280,000-157,000 TS, 534-311 Brin
For reactor equipment, water rardened

CREUSOT B 5/6
M-1488, 0.33-0.40 C, 0.001 B, 0.65-1.1 Mn, 0.3 Si, bal Fe
Heat treated 242,000-128,000 TS, 477-256 Brin
For reactor equipment, water hardened.

CREUSOT B 6
M-1488, 0.30-0.37 C, 0.001 B, 0.65-1.1 Mn, 0.3 Si, bal Fe
Heat treated 208,000-114,000 TS; 410-223 Brin
For reactor equipment, water hardened

CREUSOT BD5/6
M-1488, 0.32-0.39 C, 0.2-0.5 Cr, 0.2-0.4 Ni, 0.001 B, 0.08-0.15 Mo, bal Fe.
Heat treated: 178,000-260,000 TS; 150,000-228,000 YS, 9.5 El.
For reactor equipment, oil hardened.

CREUSOT BD8/9
M-1488, 0.17-0.23 C, 0.2-0.5 Cr, 0.2-0.4 Ni, 0.08-0.15 Mo, bal Fe
Heat treated: 186,000-144,000 TS; 156,000-135,000 YS; 6-9 El.
For bolts, gears, machine tool parts; case hardened, oil quenched.

CREUSOT BD9/10.
M-1488; 0.12-0.18 C, 0.2-0.5 Cr, 0.2-0.4 Ni, 0.08-0.15 Mo, 0.001 B, bal Fe.
Heat treated: 178,000 TS; 150,000 YS; 7 El.
For reactor equipment; oil hardened, case hardened.

CREUSOT BF1/2.
M-1488; 0.55-0.65 C, 0.3-0.7 Cr, 0.001 B, 0.65-1.0 Mn, bal Fe.
Heat treated: 330,000 TS; 650 Brin.
For reactor equipment; oil hardened.

CREUSOT BF4/5.
M-1488; 0.37-0.45 C, 0.65-1.1 Mn, 0.3-0.7 Cr, 0.001 B, bal Fe.
Heat treated: 222,000-193,000 TS, 185,000-157,000 YS, 7-8 El.
For reactor equipment; oil hardened.

CREUSOT C 1/2.
M-1488; 1.15 C, bal Fe.
Annealed: 205 Brin; 100,000 TS; 55,000 YS.
Hardened: Rock C 65; 220,000 TS; 155,000 YS.
For milling cutters, taps, reamers, drills, form tools, gauges
Type W 1 water hardening tool steel.
Wear and abrasion resistant.

CREUSOT C 4/5
M-1448, 0.80 C, bal Fe.
Hardened: Rock C 64
Annealed: 192 Brin, 115,000 TS, 65,000 YS
Tempered: 185,000 TS, 135,000 YS; 13 El, C 39 Rock
For cut off and flanging tools, drills, springs, hand tools, drills, hammers.
Type W 1 water hardening tool steel, wear and abrasion resistant

CREUSOT CF
M-1488, 1.0 C, 1.4 Cr, bal Fe
Annealed: 215 Brin, 110,000 TS, 88,000 YS.
Ht. Tr. 240,000 TS, 230,000 YS, 444 Brin
For taps, reamers, stamping dies, bearings, punches, bushings
Type 52100 steel, water or oil harden

CREUSOT CMP
M-1488, 1 C, 1 Mn, 0.5 Cr, 0.5 W, bal Fe
Annealed. 235 Brin, 85,000 TS, 70,000 YS
Ht. Tr. 250,000 TS, 225,000 YS, 8 El, C 50 Rock
For cold stamping dies, cutting tools, punches, rivet sets, upsetters
Type O 1 cold working tool steel

CREUSOT CMV.
M-1488, 0.9 C, 2 Mn, 0.1 V, bal Fe.
Annealed: 235 Brin, 110,000 TS
Hardened: C 63-65 Rock
For cutting tools, flanging tools, cold headers, upsetters, punches, molds, blanking and forming dies
Type O 2 cold work tool steel, deep hardening, shock resistant

CREUSOT DF3.
M-1488, 0.30-0.38 C, 2.5-3.0 Ni, 0.6-0.9 Cr, 0.35-0.65 Mn, bal Fe
Heat treated: 290,000 TS, 200,000 YS; 4 El.
For gears, bolts, machine tool parts, oil hardened, tough

CREUSOT DF4/5
M-1488; 0.25-0.33 C, 2.5-3.0 Ni, 0.6-0.9 Cr, 0.3-0.6 Mn, bal Fe.
Heat treated: 157,000 TS; 107,000 YS; 12 El.
For gears, bolts, machine tool parts; oil hardened, tough.

CREUSOT DF5
M-1488; 0.22-0.30 C, 2.5-3.0 Ni, 0.6-0.9 Cr, 0.3-0.6 Mn, bal Fe.
Heat treated: 150,000 TS; 101,000 YS; 12 El.
For gears, bolts, machine tool parts; oil hardened, tough.

CREUSOT DF6.
M-1488; 0.17-0.25 C, 2.5-3.0 Ni, 0.6-0.9 Cr, 0.35-0.65 Mn, bal Fe.
Heat treated: 165,000 TS; 107,000 YS; 10 El.
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT DF7.
M-1488; 0.11-0.18 C, 2.5-3.0 Ni, 0.6-0.9 Cr, bal Fe.
Heat treated. 213,000 TS; 128,000 YS; 7 El.
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT DF7/8
M-1488, 0.10-0.16 C, 2.5-3.0 Ni, 0.6-0.9 Cr, bal Fe
Heat treated. 200,000 TS, 115,000 YS; 8 El.
For gears, bolts, camshafts, cams, case hardened, oil quenched.

CREUSOT DF8.
M-1488, 0.08-0.14 C, 2.5-3.0 Ni, 0.6-0.9 Cr, bal Fe.
Heat treated: 157,000 TS, 94,000 YS, 11 El.
For gears, bolts, camshafts, cams; case hardened, oil quenched.

CREUSOT DFO3
M-1488; 0.23-0.33 C, 2.4-3.0 Ni, 0.5-0.8 Cr, 0.2-0.5 Mo, bal Fe
Annealed: 110,000 TS, 70,000 YS, 22 El, 220 Brin.
Oil hardened: 170,000 TS, 150,000 YS, 18 El, 350 Brin.
For gears, shafts, bolts, fasteners, fittings, hardware, dies
Water or oil harden, wear resistant

CREUSOT DMF
M-1488, 0.60-0.80 C, 7.9 Mn, 7-9 Ni, 3-4.5 Cr, bal Fe.
Annealed: 114,000 TS, 43,000 YS, 40 El
For corrosion resistant parts; stainless, austenitic

CREUSOT DOF1.
M-1488, 0.35-0.45 C, 4-5 Ni, 0.3-0.6 Cr, 0.7-1.2 Mo, bal Fe.
Heat treated: 270,000 TS, 208,000 YS, 4 El.
For gears, bolts, machine tool parts, oil hardened, tough

CREUSOT FO4
M-1488, 0.31-0.39 C, 0.85-1.2 Cr, 0.15-0.35 Mo, 0.6-0.9 Mn, bal Fe
Heat treated: 285,000 TS, 192,000 YS; 5 El
For gears, bolts, machine tool parts, oil hardened, tough

CREUSOT FO6S
M-1488, 0.28 max C, 1 Cr, 0.25 Mo, 0.6 Mn, bal Fe.
For construction members, heat exchangers

CREUSOT FO6/7S
M-1488, 0.25 max C, 0.25 Mo, 1.0 Cr, bal Fe.
For construction members, heat exchangers.

CREUSOT FO7S
M-1488, 0.22 max C, 0.7 Mn, 0.45 Cr, 0.45 Mo, bal Fe
For pressure tanks, gas cylinders.

CREUSOT FO8S
M-1488, 0.2 max C, 0.45 Cr, 0.45 Mo, 0.35 max Mn, bal Fe.
For pressure tanks, gas cylinders

CREUSOT FOV.
M-1488; 0.25 C, 1 Cr, 1 Mo, 0.25 V, bal Fe.
Heat Treated: 100,000 TS; 82,000 YS; 16 El
For rotors, discs, hot bolts.
ASTM A356 Gr. 9. Tough, shock resistant.

CREUSOT FP.
M-1488; 0.45 C, 2 W, 1 Cr, bal Fe.
Annealed: 205 Brin.
Hardened: C 55 Rock; 300,000 TS; 260,000 YS.
For shear and cut-off blades, punches, dies, chisels, riveting tools, cold battering tools.
Type S1 cold work tool steel, oil hardening.

CREUSOT FR.
M-1488; 0.90-1.1 C, 1.25-1.65 Cr, 0.45 max Mn, 0.40 max Si, bal Fe.
For bearings, liners, bushings; water hardened.

CREUSOT LMO.
M-1488; 1.4 C, 1 Si, 1 Mn, 0.25 Mo, bal Fe.
Annealed: 217 Brin.
For cutting tools, slides, dies.
Oil hardening, abrasion resistant.

CREUSOT M.
M-1488; 1.1-1.3 C, 11-14 Mn, 0.6 max Si, bal Fe.
Annealed: 128,000 TS; 50,000 YS; 35 El.
For wear resistant parts; work hardened, austenitic.

CREUSOT MF6/7S.
M-1488; 0.22 max C, 0.35 max Si, 1.3 Mn, bal Fe.
For pressure tanks, bridges, hoists, machinery parts.

CREUSOT ML.
M-1488; 0.40-0.50 C, 1.6-2.1 Si, 0.40-0.80 Mn, bal Fe.
Heat treated: 242,000 TS; 163,000 YS; 5 El.
For punches, pneumatic tools, springs; water or oil hardened, shock resistant.

CREUSOT MLD.
M-1488; 0.40-0.50 C, 1.6-2.1 Si, 0.40-0.80 Mn, bal Fe.
Heat treated: 242,000 TS; 170,000 YS, 5 El.
For punches, springs, pneumatic tools; oil hardened, shock resistant.

CREUSOT MO7.
M-1488; 0.15 C, 0.55 Mo, 1 Mn, bal Fe.
Heat treated: 70,000 TS; 40,000 YS; 20 El.
For boilers, steam manifolds, turbine casings, reactors, nuclear plants, superheater pipes.
ASTM A356 Gr. 2.

CREUSOT MV6/7S.
M-1488, 0.22 max C, 0.35 max Si, 1.4 Mn, bal Fe.
For pressure tanks, naval construction, machinery parts.

CREUSOT P1.
M-1488; 1.15 C, 2 W, bal Fe.
Annealed: 248 Brin.
Hardened: C 67 Rock.
For dies, drawing dies, drills, reamers, broaches, twist drills, burnishing tools.
Type F2 and F3 water hardening tool steel.

CREUSOT P2.
M-1488; 1.15 C, 5 W, 0.6 Cr, bal Fe.
Annealed: 240 Brin.
Hardened: Rock C 47.
For dies, drawing dies, drills, chisels, reamers, twist drills.
Type F2 water hardening tool steel.

CREUSOT S1SA.
M-1488; 0.35 C, 10 W, 3 Cr, 0.4 V, bal Fe.
Annealed 217 Brin.
Hardened: 243,000 TS, 215,000 YP; 12 El; 37 RA.
For nail dies, punches, shear blades, die casting dies, mandrels, extrusion dies and rams, trimmer dies.
Type H21 hot work tool steel, high red-hardness.

CREUSOT S2V.
M-1488; 0.75 C, 4 Cr, 13 W, 0.7 V, 0.5 Mo, bal Fe.
Annealed: 248 Brin.
For milling cutters, twist drills, lathe tools, reamers. High speed steel.

CREUSOT S3.
M-1488; 0.8 C, 4 Cr, 18 W, 1 V, bal Fe.
Annealed: 240 Brin; 100,000 TS; 75,000 YS; 14 El; 17 RA.
For milling cutters, twist drills, reamers, lathe tools, planning tools.
Type T1 high speed steel, good red-hardness.

CREUSOT S3V.
M-1488; 0.8 C, 4.5 Cr, 18 W, 1.8 V, 0.7 Mo, bal Fe.
Annealed: 255 Brin.
Hardened: C 63-65 Rock.
For milling cutters, twist drills, broaches, reamers, taps, lathe and planer tools.
Type T2 high speed steel, high red-hardness.

CREUSOT SO3.
M-1488; 0.8 C, 4.5 Cr, 6.5 W, 5 Mo, 2 V, bal Fe.
Annealed: 228 Brin
Hardened: C 63-65 Rock.
For milling cutters, twist drills, reamers, broaches, taps, chasers, saws, lathe tools.
Type M2 high speed steel, high red-hardness.

CREUSOT SS5.
M-1488, 0.8 C, 4.5 Cr, 18 W, 1.5 V, 1 Mo, 5 Co, bal Fe.
Annealed: 268 Brin.
Hardened. C 65 Rock.
For piercers, lathe and planing tools, cutters, reamers, broaches, taps, chasers, cut-off tools, drills
Type T4 high speed steel, high red-hardness.

CREUSOT SS5V.
M-1488, 1.5 C, 4.5 Cr, 14 W, 4 V, 0.5 Mo, 6 Co, bal Fe
Annealed 302 Brin.
Hardened C 64-66 Rock
For hard dies, lathe and planing tools, reamers, broaches, drills, blanking dies, form tools.
Type T15 high speed steel, high red hardness.

CREUSOT SS10
M-1488, 0.8 C, 5 Cr, 18 W, 1.7 V, 1 Mo, 10 Co, bal Fe
Annealed: 302 Brin
Hardened C 65 Rock.
For milling cutters, drills, broaches, reamers, taps, lathe and planer tools, shapers
Type T5 high speed steel, high red-hardness.

CREUSOT SS14V.
M-1488, 1.7 C, 4.5 Cr, 14 W, 4 V, 0.5 Mo, 14 Co, bal Fe
Annealed. 340 Brin.
Hardened: C 65-67 Rock
For lathe and planer tools, broaches, chasers, taps, milling cutters
High speed steel, high hot-hardness.

CREUSOT SS 15.
M-1488, 0.75 C, 5 Cr, 18 W, 1.7 V, 0.5 Mo, 15 Co, bal Fe
Annealed: 320 Brin.
Hardened: C 65 Rock.
For broaches, lathe and planer tools, drills, milling cutters, hobs, reamers.
Type T6 high speed steel, high red-hardness.

CREUSOT SV4.
M-1488; 1.3 C, 4.5 Cr, 12 W, 4.5 V, 0.8 Mo, bal Fe.
Annealed: 277 Brin.
For finishing tools, taps, reamers, twist drills.
High speed steel.

CRH 4-17.
M-1647; 0.1 C, 13 Cr, 0.45 Mo, 0.6 max Ni, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
Cold Drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For oil refinery and chemical plant equipment, knives, hardware, table flatware.
Corrosion resistant.

CRILLEY METALS.
M-183; Hg, Sn, bal Cu. 23,000 TS
For bearings; C.S.-92,000.

CRISIL.
M-1620; 0.55 C, 0.5-0.8 Cr, 1.2-1.6 Si, 0.5-0.8 Mn, bal Fe.
Wire: 280,000-335,000 TS; 45 min RA.
For mechanical springs, operating under high stress and moderately high temperatures. Hard drawn steel wire.

CRISTITE 1
M-152, 17 W, 10 Cr, 3.5 C, 2.5 Mo, bal Fe.
For facing dredger, dipper or shovel teeth and bucket lips, agricultural implements, knives, tools, drills, chisels; resists abrasion and high temperature.

CRISTITE 2.
M-152; 17 W, 12 Cr, 3 C, 2 Mo, 0.75 Ti, 0.25 Hf, bal Fe
For hard facing electrode, wear resistant.

CRISTITE 3
M-152; 16 Cr, 3 C, 0.80 Ti, 0.28 Hf, 6 Ni, bal Fe
For hard facing electrode, wear resistant

CRITNIC
U.S., 97 Ni, Ti, 0.2 C
For heat and corrosion resistant parts, corrosion and heat resistant

CRM SPECIAL
M-459, 1.0 C, 1.1 Mn, 1.0 Cr, bal Fe.
For tools, dies; oil hardening

Cr-Ni ROTOR FM.
M-32; 0.55 C, 0.6 Mn, 0.3 Si, 1.5 Cr, 4.0 Ni, bal Fe.
Air hardening tool steel.

CRO-13 Mo
M-1648, 0.15 C, 13 Cr, 0.6 max Mo, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin
Cold Drawn: 100,000 TS, 85,000 YS; 17 El; 60 RA; 205 Brin
For oil refinery and chemical plant equipment, knives, hardware, table flatware.
Corrosion resistant

CROBALITE NO. 1.
M-1052; 48 Co, 30 Cr, 14 W
Welded. 550 Brin.
For hard facing electrode, corrosion and abrasion resistant.

CROBALITE NO. 2.
M-1052; 40 Co, 33 Cr, 18 W, carbides 620 Brin
For tools, cutters, dies; cast to shape, wear resistant.

CROBALITE NO. 3.
M-1052, 40 Co, 33 Cr, 20 W, carbides 630 Brin.
For tools, cutters, dies; cast to shape, wear resistant

CROBALITE NO. 6.
M-1052, 57 Co, 30 Cr, 5 W. 440 Brin.
For hard facing electrode; corrosion and abrasion resistant.

CROBALITE NO. 12.
M-1052; 52 Co, 30 Cr, 10 W. 480 Brin.
For hard facing electrode; corrosion and abrasion resistant.

CROBALT.
M-751; 40-50 Co, 25-30 Cr, 14-20 W.
Cast: 75,000 TS.
For cutters, tools; wear resistant.

CROBALT NO. 1.
M-1052; 48 Co, 30 Cr, 14 W, high C, bal Fe.
Cast: 75,000 TS; 0 El; 0 RA; 580-620 Brin.
For cutting tool bits, milling cutters.
High red-hardness.

CROBALT NO. 2.
M-1052; 40 Co, 33 Cr, 18 W, bal Fe.
Cast. C 61-62 Rock.
For cutters, tools, punches.
Cast alloy, wear resistant.

CROBALT NO. 3.
M 1052, 40 Co, 33 Cr, 20 W, bal Fe.
Cast C 63-64 Rock.
For cutters, tools, punches.
Cast alloy, wear resistant.

CROCAR
M-115, 12 Cr, 2.15 C, 0.75 V, 0.5 Co, 0.30 Si, bal Fe
103,000 TS; 51,000 YS, 14 RA, 212 Brin.
For thread rolling, threading, dies, extrusion dies, gages, heat, abrasion resisting

CROCAR FM.
M-115; 2.15 C, 12 Cr, 0.75 V, 0.5 Co, bal Fe
Annealed. 103,000 TS, 51,000 YS, 14 El, 212 Brin.
For thread rolling dies, extrusion dies, gages; oil or air hardened, free-cutting

CRODI.
M-435, 0.35 C, 0.5 Mn, 1.2 W, 5 Cr, 0.3 V, 1.4 Mo, bal Fe
For punches, dies, shear blades, extension dies, hot work steel.

CRODON
M-980, Cr-Fe
For anodes in electrolytic copper cells; electroplating alloy

CRODUR
M-1331, 2.1 C, 11.5 Cr, bal Fe.
For blanking and forming dies, punches; oil or air hardened, nondeforming.

CRODUR SPEZIAL
M-1331, 2.1 C, 11.5 Cr, 0.7 W, bal Fe
For blanking and forming dies, punches; oil or air hardened, nondeforming.

CRODUR V
M-1331, 2.2 C, 11.5 Cr, 0.1 V, 0.2 Mo, bal Fe
For blanking and forming dies, punches, oil hardened, nondeforming

CRODUR ZAH
M-1331; 1.65 C, 11.5 Cr, 0.1 V, bal Fe
For blanking and forming dies, punches; air hardened, nondeforming.

CROFER 106
M-297, 0.12 max C, 6-7 Cr, 0.6-0.9 Si, 0.6-0.9 Al, bal Fe.
For oil refinery equipment; heat and creep resistant.

CROFER 113.
M-297, 0.12 max C, 12-14 Cr, 1.0-1.3 Si, 0.8-1.1 Al, bal Fe
For oil refinery equipment; heat and creep resistant.

CROFER 118.
M-287; 0.12 max C, 18 Cr, 0.95 V, bal Fe.
For oil refinery equipment, furnace parts; corrosion and heat resistant.

CROFER 118.
M-297; 0.12 max C, 17-19 Cr, 0.8-1.1 Si, 0.8-1.1 Al, bal Fe.
For oil refinery equipment; heat and creep resistant.

CROFER 124.
M-297; 0.12 max C, 23-25 Cr, 1.3-1.6 Si, 1.3-1.6 Al, bal Fe.
For oil refinery equipment; corrosion and heat resistant.

CROFER 218.
M-297; 0.12 max C, 18 Cr, 2 Si, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refinery and dairy equipment, bolts; Type 430; corrosion resistant.

CROFER 230.
M-297; 0.12 C, 29 Cr, bal Fe.
Annealed: 85,000 TS; 50,000 YS; 30 El; 55 RA; 180 Brin.
For furnace parts, heat treat boxes, heat resistant.

CROFER 1300.
M-297; 0.12 max C, 12-14 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For valves, cutlery, turbine blades, corrosion resistant.

CROFER 1300AL.
M-297; 0.06 C, 13 Cr, 0.2 Al, bal Fe.
Annealed: 75,000 TS; 45,000 YS; 20 El; 180 Brin
For heat treating boxes, furnace parts, oil refinery equipment.
Type 405 stainless steel, ferritic, corrosion and heat resistant.

CROFER 1700.
M-297; 0.10 max C, 15.5-17.5 Cr, bal Fe
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil and chemical plant equipment, Type 430; stainless.

CROFER 1700Nb.
M-297; 0.08 C, 17 Cr, 8 Ni, 0.5 Cb, bal Fe
Annealed: 85,000 TS; 40,000 YS; 50 El; B 82 Rock.
For chemical plant equipment, welded tanks and structures.
Type 17-8 Cb. Welding grade, austenitic, stainless.

CROFER 1700Ti.
M-297; 0.10 max C, 16-18 Cr, Ti = 7 × C, bal Fe.
Annealed. 80,000 TS; 50,000 YS; 25 El, 50 RA; 150 Brin.
For welded oil and chemical plant equipment; Type 430Ti; stainless.

CROFER 1702Ti.
M-297; 0.10 max C, 16-18 Cr, 1.5-2.0 Mo, Ti = 7 × C, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
For pumps, marine hardware, valves; Type 431 Ti; stainless.

CROFER 1919.
M-297; 0.15 C, 19.5 Cr, 9.5 Ni, 2 Si, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302; stainless, austenitic.

CROFER 2419.
M-297; 0.15 C, 2 Si, 24 Cr, 19 Ni, bal Fe.
Annealed: 100,000 TS; 45,000 YS; 50 El; 65 RA; 185 Brin.
For valves, pumps, turbine and jet parts; Type 310; stainless, austenitic.

CROFER 2420.
M-297, 0.15 C, 24 Cr, 19 Ni, 1.2 Mn, bal Fe.
Annealed: 100,000 TS; 45,000 YS, 50 El; 65 RA; 185 Brin.
For valves, pumps, turbine and jet parts; Type 310; stainless, austenitic.

CROFER 2504.
M-297; 0.2 C, 25 Cr, 4 Ni, bal Fe.
Cast: 90,000 TS; 65,000 YS; 2 El; 212 Brin.
For cylinder liners, valve seats and bodies; Type CC-50, corrosion and heat resistant.

CROFORM.
English; 60.0 Co, 30.0 Cr, 5.0 Mo, bal Fe
Cast: 100,000-119,000 TS, 50,000-95,000 YS; 5-4 El; 390 Brin.
For dental alloy; corrosion resistant.

CROLOY.
M-357; 1.5 C, 12-14 Cr, 1 V, 0.8 Mo, bal Fe.
For dies, gauges, broaches, wearing plates, non-deforming

CROLOY ½.
M-17, 0.10-0.20 C, 0.5 Mn, 0.5-0.8 Cr, 0.55 Mo, bal Fe.
Tubes 55,000 TS, 30,000 YS, 30 El, 150 Brin.
For oil refinery and heat exchanger tubes; creep resistant

CROLOY 1
M-17, 0.15 max C, 0.80-1.2 Cr, 0.45-0.60 Mo, bal Fe
Tubes 60,000 TS, 30,000 YS; 30 El, 170 Brin.
For high temperature service, resists high temperature and pressure

CROLOY 1¼.
M-17; 0.15 C, 1.0-1.5 Cr, 0.45-0.65 Mo, 0.5-1.0 Si, 0.5 Mn, bal Fe
Tube 60,000 TS, 25,000 YS, 30 El; 40 RA, 163 Brin
For oil refinery and heat exchanger tubes; good creep resistance

CROLOY 1¾
M-17, 0.15 max C, 1.45-2.0 Cr, 0.60-0.80 Mo, bal Fe
Tubes 60,000 TS, 25,000 YS; 30 El; 170 Brin.
For oil refinery equipment, heat exchangers; corrosion resistant to hot oils.

CROLOY 2
M-17; 0.15 C, 0.3-0.6 Mn, 1.75-2.25 Cr, 0.4-0.6 Mo, bal Fe
Annealed: 60,000 TS; 25,000 YS; 30 El; 163 Brin
For tubing for oil refineries, for high temperature use, resists oxidation

CROLOY 2 Si.
M-17, 0.2 C, 2 Si, 2 Cr, bal Fe.
Tube. 60,000 TS; 25,000 YP.
For heat exchangers in sulphuric acid plants
Good strength at high temperatures.
Resists SO_2 corrosion.

CROLOY 2¼.
M-17; 0.15 C, 0.3-0.6 Mn, 2.0-2.5 Cr, 0.9-1.1 Mo, bal Fe.
Annealed: 60,000 TS; 25,000 YS; 30 El; 163 Brin.
For tubing for oil refineries; for high temperature use.

CROLOY 3M.
M-17; 0.15 C, 0.3-0.6 Mn, 2.75-3.25 Cr, 0.8-1.0 Mo, bal Fe.
Annealed: 60,000 TS; 25,000 YS; 30 El; 163 Brin.
For tubing for oil refineries; high temperature use.

CROLOY 5.
M-17; 0.15 C, 4-6 Cr, 0.45-0.65 Mo, bal Fe.
Annealed: 60,000 TS; 25,000 YS; 30 El; 163 Brin.
For tubing for oil refineries; for high temperature use.

CROLOY 5Cb.
M-17; 0.12 max C, 4-6 Cr, 0.45-0.65 Mo, Cb = 10 × C, bal Fe.
Tubes: 60,000 TS; 25,000 YS, 30 El, 170 Brin
For oil refinery equipment, heat exchangers; corrosion resistant to hot oils

CROLOY 5M.
M-17, 0.15-0.20 C, 4-6 Cr, 0.45-0.65 Mo, bal Fe
Annealed: 60,000 TS, 25,000 YS, 30 El, 163 Brin.
For high temperature tubes, resists oxidation to 1200°F

CROLOY 5 Si
M-17, 0.15 C, 0.5 Mn, 4-6 Cr, 1-2 Si, 0.45-0.65 Mo, bal Fe
Annealed 60,000 TS, 30,000 YS; 30 El, 179 Brin.
For tubing for oil refineries, for high temperature use, resists oxidation

CROLOY 5 Ti.
M-17, 0.15 C, 0.5 Mn, 4-6 Cr, 0.5 Si, 0.45-0.65 Mo, Ti, bal Fe
Annealed: 60,000 TS, 30,000 YS, 30 El, 179 Brin.
For tubing for oil refineries, for high temperature use

CROLOY 7
M-17; 0.15 C, 7 Cr, 1.0 Si, 0.45-0.65 Mo, bal Fe
Annealed 60,000 TS, 30,000 YS, 30 El, 179 Brin
For tubing for oil refineries, for high temperature use

CROLOY 8M.
M-17, 0.15 max C, 1 Si, 7-9 Cr, 0.9-1.1 Mo, bal Fe
Tubes: 60,000 TS, 25,000 YS, 30 El, 170 Brin
For oil refinery equipment, heat exchangers; corrosion resistant to hot oils.

CROLOY 9
M-17, C, 9 Cr, 1 Mo, bal Fe
For tubing

CROLOY 9M
M-17; 0.15 max C, 0.5 Mn, 8-10 Cr, 0.9-1.1 Mo, bal Fe
Tubes 60,000 TS, 25,000 YS, 30 El, 179 Brin
For oil refinery and heat exchanger tubes, resists hot oils and creep.

CROLOY 12.
M-17; C, 12-14 Cr, bal Fe
Annealed: 70,000 TS; 150 Brin.
Heat treated: 180,000 TS, 350 Brin.
For tubing; heat and corrosion resistant.

CROLOY 12 Al.
M-17; 0.8 max C, 11.5-14.5 Cr, 0.1-0.3 Al, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 30 El; 60 RA; 150 Brin
For oil refinery equipment; corrosion resistant, slight response to hardening

CROLOY 15-15N.
M-17; 0.15 max C, 16 Cr, 15 Ni, 1.5 Mo, 1.4 W, 1 Cb, bal Fe.
Rolled: 75,000 TS; 30,000 YS; 35 El, 200 Brin.
For pipes for high temperature and pressure service; corrosion resistant, high temperature use to 1500°F.

CROLOY 16-1.
M-17; 0.03 max C, 14-16 Cr, 1.0-1.5 Ni, 0.75 Mn, 0.50 Si, bal Fe.
Tube: 60,000 TS; 35,000 YS; 20 El; 185 Brin.
For nuclear powered pressurized water plants, marine boilers; corrosion resistant to chlorides and caustics

CROLOY 16-6 PH
M-17; 0.03-0.12 C, 0.25-1.0 Mn, 1.0 max Si, 14-18 Cr, 5.5-8.5 Ni, 0.4-1.0 Ti, 1.0 max Al, bal Fe.
Solution Annealed. 127,000 TS, 110,000 YS, 14 El; 27 Rc.
Aged: 220,000 TS; 200,000 YS; 9 El; 45 Rc.
For chemical plant, textile and oil refinery tubular equipment.
Martensitic, preciptation hardening, stainless.

CROLOY 16-8-2.
M-17, 0.10 C, 15 Cr, 8 Ni, 1.5 Mo, bal Fe.
For welding rods; corrosion and heat resistant, nonmagnetic

CROLOY 16-13-3
M-17, 0.08 max C, 16-18 Cr, 11-14 Ni, 2-3 Mo, 2 max Mn, 0.75 max Si, bal Fe
At 70°F: 82,500 TS; 42,300 YS, 55 El; 72 RA; 200 Brin
At 1200°F 53,750 TS; 35,750 YS, 42 El, 55 RA.
For heat exchangers, staam piping, high temperature applications, corrosion resistant, austenitic.

CROLOY 16-13-8
M-17, 0.13 C, 1.5 Mn, 0.6 Si, 15.5-17.0 Cr, 2.5-3.25 Mo, 12.5-14.5 Ni, bal Fe.
For tubing, for high temperature use.

CROLOY 18
M-447, 0.12 C, 15-18 Cr, 0.5 max Ni, bal Fe
Annealed: 70,000-85,000 TS, 40,000-60,000 YS, 27-38 El, 140-180 Brin.
For tubing, corrosion resistant.

CROLOY 18-8.
M-447, M-17, 0.07 C, 18 Cr, 9.5 Ni, bal Fe
Annealed 75,000 TS; 3,000 YS, 50 El; 150 Brin
For tubing; stainless.

CROLOY 18-8S
M-17, 0.07 C, 0.6 Mn, 0.75 Si, 17-19 Cr, 8-10.5 Ni, bal Fe.
Annealed 75,000 TS, 30,000 YS; 35 El, 200 Brin.
For tubing; for high temperature use

CROLOY 18-8 STABILIZED.
M-17, 0.07 C, 0.6 Mn, 0.75 Si, 17-19 Cr, 10-12 Ni, Ti or Cb, bal Fe
Annealed 75,000 TS, 30,000 YS, 35 El; 200 Brin.
For tubing, for high temperature use

CROLOY 18-13-3
M-17, 0.10 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, bal Fe.
Annealed 85,000-90,000 TS; 40,000 YS; 45-50 El; 160 Brin
For chemical and oil refinery equipment, heat and corrosion resistant, austenitic.

CROLOY 19-9DL.
M-17; 0.28-0.55 C, 0.7-1.5 Mn, 18-20 Cr, 8-11 Ni, 1.0-1.7 Mo, 1.0-1.7 W, 0.4 Cb, bal Fe.
H R.: 118,000 TS; 69,000 YS; 58 El; 55 RA; 216 Brin
For jet engine and gas turbine components; corrosion and heat resistant.

CROLOY 25-12.
M-17, M-447; 0.15 max C, 2 max Mn, 0.75 max Si, 22-24 Cr, 12-15 Ni, bal Fe.
At R.T.: 95,000 TS; 48 El; 50,000 YS; B 85 Rock.
At 1500°F: 26,000 TS; 23 El.
For hot petroleum equipment; furnace parts; chemical plant equipment.
Excellent corrosion and oxidation resistance. Good creep properties.

CROLOY 25-20.
M-17; 0.15 C, 1.5 Mn, 0.75 Si, 24-26 Cr, 19-21 Ni, bal Fe.
Annealed: 75,000 TS; 30,000 YS; 35 El; 200 Brin.
For tubing; for high temperature use.

CROLOY 27.
M-447, M-17; 0.20 C, 27 Cr, 1 Ni, 0.12-0.25 N, bal Fe.
Annealed: 75,000-90,000 TS; 45,000-60,000 YS; 15-30 El; 160-195 Brin.
For tubing; acid and alkali resistant.

CROMA.
M-688; 0.35 C, 1.0 Cr, 0.8 Mn, bal Fe.
For machinery parts; formerly Lehigh Croma.

CROMADUR.
M-72; 0.15 max C, 18 Mn, 12.5 Cr, 1 V, 0.2 Ni, bal Fe.
For blading for gas turbine on jet engine; heat resistant.

CROMAL.
M-342, 2-4 Cr, Ni, Mn, bal Al.
65,000-75,000 TS, 50,000-65,000 YS
For airplane parts, milk and oil separators, pistons, propellers; corrosion resisting.

CROMAL
Russia: 1.8 C, 20-22 Cr, 2.2 Si, 3-4 Al, bal Fe.
For furnace equipment, corrosion resistant, cast iron.

CROMALOY.
M-408; 61 Ni, 15 Cr, 4 Mn, 20 Fe.
107,500 TS.
For electric heating devices; heat resistant to 950°C

CROMALOY IV
M-408; 80 Ni, 20 Cr.
134,500 TS.
For heating appliances for high temperature work; heat resistant up to 1150°C.

CROMANSIL.
M-48; 0.10 C, 0.4-0.6 Cr, 1.1-1.4 Mn, 0.7-0.8 Si, bal Fe.
Rolled: 65,000 TS; 45,000 YS; 45 El; 70 RA; 130 Brin.
For staybolts, boilers, pressure vessels, ship plates, tanks; ductile.

CROMANSIL.
M-48; 0.15 C, 0.4-0.6 Cr, 1.1-1.4 Mn, 0.7-0.8 Si, bal Fe.
Rolled: 140,000 TS; 101,000 YS; 38 El; 65 RA; 150 Brin. For staybolts, ship plates, tanks, pressure vessels.

CROMANSIL.
M-48; 0.20 C, 0.4-0.6 Cr, 1.1-1.4 Mn, 0.7-0.8 Si, bal Fe.
Rolled: 90,000 TS; 60,000 YS; 28 El; 62 RA; 200 Brin.
For boilers and pressure vessels; heat treated after welding.

CROMANSIL.
M-48; 0.25 C, 0.4-0.6 Cr, 1.1-1.4 Mn, 0.7-0.8 Si, bal Fe.
Rolled: 115,000 TS; 70,000 YS; 25 El; 60 RA; 220 Brin.
For seamless tubing, boilers, pressure vessels; good workability.

CROMANSIL.
M-48; 0.30 C, 0.4-0.6 Cr, 1.1-1.4 Mn, 0.7-0.8 Si, bal Fe.
Rolled: 140,000 TS; 90,000 YS; 20 El; 50 RA; 265 Brin.
Heat treated: 172,000 TS; 131,000 YS; 11 El; 32 RA, 364 Brin.
For heat treated parts, gears, buildings, bridges; Iz-11.

CROMANSIL.
M-604; 0.35 max C, 0.9-1.5 Mn, 0.60-0.95 Si, 0.30-0.70 Cr, bal Fe.
Minimum: 90,000 TS; 60,000 YS.
For light weight construction, corrosion resisting properties.

CROMAR.
M-1331, 1.0 C, Cr, Mo, V, bal Fe
For tools, dies, cutters, oil hardened.

CROMAR W
M-1331; 1.0 Cr, Mo, W, V, bal Fe
For engravers tools, reamers, broaches; high speed steel.

CROMAX F
M-210, 0.50-0.55 C, 0.20-0.35 Si, 0.50-0.80 Mn, 0.70-0.90 Cr, bal Fe.
For gears, housings, shafts; castings

CROMAX H.
M-210, 0.70-0.75 C, 0.20-0.35 Si, 0.50-0.80 Mn, 1.8-2.0 Cr, bal Fe
For machinery parts, wear plates; castings

CROMAZ-H
M-104; M-771, C, alloy, bal Fe
For furnace parts, heat treating boxes, high heat resistance to 1750°F.

CROMAZ-N
M-104, M-771; C, alloy, bal Fe.
For furnace parts, heat treating boxes, high heat resistance to 1750°F

CROMETEX NO 1.
M-1009, 0.38-0.43 C, 0.7 Mn, 0.3 Si, 0.8 Cr, 0.25 Mo, 1.8 Ni, bal Fe
For arbors, axles, gears, piston rods, shock resistant.

CROMEX-1
Russia, 0.5-1.0 C, 25-32 Cr, 1 Si, bal Fe.
For furnace parts and equipment, heat resistant.

CROMIMPHY 1
M-771, 0.15 max C, 11.5-13.5 Cr, bal Fe.
Heat treated: 120,000-135,000 TS; 110,000-117,000 YS; 16-15 El, 63-58 RA; 220-240 Brin.
For cutlery, valves, turbine blades; Type 410; corrosion resistant

CROMIMPHY NO. 1
M-104, M-771, 0.09-0.12 C, 13-18 Cr, bal Fe.
Heat treated: 92,000-114,000 TS; 71,000-91,000 YS; 25-13 El.
For cooking utensils, food handling equipment, turbine blades; corrosion resistant; Type 403.

CROMIMPHY 1 BIS.
M-104; 0.15 C, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, valves, cutlery; Type 410; corrosion resistant.

CROMIMPHY 1 bis Mo.
M-771; 0.17-0.20 C, 13 Cr, 0.6 Mo, 0.5 max Ni, bal Fe.
Annealed: 90,000 TS; 50,000 YS; 25 El; 50 RA.
Heat Treated: 240,000 TS; 210,000 YS; 9 El; C 50 Rock.
For oil refinery and chemical plant equipment, surgical instruments, cutlery.
Corrosion resistant, hardenable.

CROMIMPHY 2.
M-771; 0.10 C, 0.25 Si, 0.4 Mn, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 30 El; B 82 Rock.
Ht.Tr.: 135,000 TS; 105,000 YS; 10 El; C 30 Rock
For cutlery, knives, springs, shafts, table flatware.
AISI Type 410, corrosion and heat resistant.

CROMIMPHY NO. 2.
M-104, M-771; 0.19-0.27 C, 12-14 Cr, bal Fe.
Heat treated: 107,000-143,000 TS, 85,000-123,000 YS; 22-10 El; 150-300 Brin.
For surgical instruments, pump valves, pistons; Type 420; corrosion resistant.

CROMIMPHY 2C.
M-104; 0.35 C, 13 Cr, bal Fe
Annealed: 95,000 TS; 50,000 YS, 25 El, 55 RA; 196 Brin.
For turbine blades, valves, cutlery; Type 420; corrosion resistant.

CROMIMPHY 4.
M-771; 0.12 max C, 14-18 Cr, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 30 El, 55 RA; 150 Brin
Cold drawn 130,000 TS; 120,000 YS; 2 El; 185 Brin.
For oil refinery equipment, bolts, kitchen sinks, Type 430, stainless, ferritic

CROMIMPHY NO. 4.
M-104, M-771, 0.07-0.12 C, 16-18 Cr, bal Fe.
For chemical plant equipment, Type 430, corrosion resistant.

CROMIMPHY 4 BIS
M-104, 0.15 C, 17 Cr, 1.8 Ni, bal Fe
Annealed: 125,000 TS, 95,000 YS, 20 El; 55 RA, 260 Brin.
For pumps, marine hardware, valves, Type 431, corrosion and heat resistant

CROMIMPHY NO. 6
M-104, M-771; 0.10 max C, 30 Cr, bal Fe.
For furnace parts, rabble arms, pots; heat and corrosion resistant

CROMIMPHY 33.
M-771; 0.30 C, 12 Cr, 0.3 Mo, 1.0 Ni, bal Fe
Annealed: 95,000 TS; 50,000 YS, 25 El; 55 RA.
Heat Treated. 250,000 TS; 215,000 YS; 8 El; C 50 Rock.
For oil refinery and chemical plant equipment, cutlery, surgical instruments, shafts.
Corrosion resistant, hardenable.

CROMIMPHY 2100.
M-771; C, alloy, bal Fe.
For oil refinery equipment; oxidation resistant.

CROMIMPHY 2200
M-771; C, alloy, bal Fe.
For oil refinery equipment; oxidation resistant

CROMIMPHY A5.
M-771; 0.05 C, 0.25 Si, 0.4 Mn, 13 Cr, bal Fe.
Annealed: 75,000 TS, 40,000 YS; 35 El, 155 Brin.
For furnace parts, soot blowers, ladles, for nonferrous molten metals, stirring rods. Corrosion resistant.

CROMIMPHY A8.
M-771; 0.08 max C, 11.5-13 Cr, 0.1-0.3 Al, bal Fe.
Annealed: 80,000 TS; 40,000 YS; 23 El; 70 RA; 150 Brin.
Heat treated: 175,000 TS; 145,000 YS; 21 El; 64 RA; 352 Brin.
For oil refinery and chemical plant equipment; Type 405; corrosion resistant.

CROMIMPHY A8Mo.
M-771; 0.08 C, 0.4 Mn, 0.5 Si, 13 Cr, 0.5 Mo, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 150 Brin.
Cold Drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For oil refinery and chemical plant equipment; knives, hardware, table flatware.
Corrosion resistant.

CROMIMPHY A10M.
M-771; 0.15 max C, 13 Cr, 0.5 Mo, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin
Cold Drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin
For oil refinery and chemical plant equipment; knives, hardware, flatware Corrosion resistant.

CROMIMPHY A15.
M-771, 0.15 min C, 12-14 Cr, bal Fe.
Annealed. 88,000 TS; 40,000 YS; 32 El; 68 RA, 170 Brin.
For cutlery, valve trim, turbine blades; Type 420; stainless, hardenable.

CROMIMPHY A15Mo.
M-771, 0.18 C, 0.4 Mn, 0.1 Si, 13 Cr, 0.5 Mo, bal Fe.
Annealed 90,000 TS, 38,000 YS, 26 El, 55 RA; B 90 Rock
Heat Treated 250,000 TS, 190,000 YS, 10 El, 32 RA, C 49 Rock
For cutlery, knives, bearings, hardware, surgical instruments.
Corrosion resistant, hardenable

CROMIMPHY A18Mo.
M-771, 0.25 max C, 13.0 Cr, 0.5 Mo, bal Fe.
Annealed: 95,000 TS; 40,000 YS; 25 El; 55 RA; B 92 Rock.
Heat Treated 250,000 TS; 210,000 YS; 8 El, 25 RA, C 50 Rock
For surgical instruments, bearings, shafts, gears, knives, cutlery.
Corrosion resistant, hardenable

CROMIMPHY A20Mo
M-771; 0.22 C, 0.4 Mn, 0.2 Si, 12.5 Cr, 1.0 Mo, bal Fe
Annealed 95,000 TS, 40,000 YS; 25 El, 55 RA; B 92 Rock.
Heat Treated: 250,000 TS; 215,000 YS; 8 El; 25 RA; C 50 Rock
For surgical instruments, cutlery, hardware, bearings, knives.
Corrosion resistant, hardenable.

CROMIMPHY A1007 Mo.
M-771; 0.12 max C, 12.5-13.5 Cr, 0.5 Al, 0.7 Mo, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
Cold Drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin
For oil refinery and chemical plant equipment, hardware, knives.
Corrosion resistant.

CROMIMPHY A2100.
M-771; 0.10 C, 12 Cr, 0.6 Mo, 0.25 V, bal Fe.
Annealed: 75,000 TS; 35,000 YS; 30 El; B 90 Rock.
For oil refinery and chemical plant equipment, springs, table flatware.
Corrosion resistant.

CROMIMPHY A2200.
M-771; 0.14-0.20 C, 10-13 Cr, 0.6-1.2 Mo, 0.3 V, bal Fe.
Annealed: 80,000 TS; 40,000 YS; 25 El; B 95 Rock.
Hardened: 220,000 TS; 185,000 YS; 12 El; C 45 Rock.
For surgical instruments, bearings, valves, cutlery.
Corrosion resistant, hardenable.

CROMIMPHY A3100.
M-771; 0.06-0.10 C, 11-13 Cr, 0.8-1.2 Mo, 0.5 max Ni, 0.2-0.3 V, 0.8-1.2 W, bal Fe.
Annealed: 75,000 TS; 35,000 YS; 30 El; 70 RA; B 82 Rock.
Cold Drawn: 95,000 TS; 80,000 YS; 15 El; 60 RA; B 92 Rock.
For springs, table flatware, knives, chemical plant equipment.
Corrosion Resistant.

CROMIMPHY A3200.
M-771; 0.20-0.25 C, 11.0-12.5 Cr, 0.9-1.2 Mo, 0.2-0.3 V, 0.9-1.2 W, bal Fe.
Annealed: 90,000 TS; 40,000 YS, 25 El; B 92 Rock.
Hardened: 245,000 TS; 210,000 YS; 8 El; C 50 Rock
For cutlery, surgical instruments, gears, shafts, hardware.
Corrosion resistant, hardenable

CROMIN-1.
M-897, 9-11 Ni, 19-21 Cr, bal Fe.
For heating elements, useful operating temperature to 650°F.

CROMIN D.
M-61; 30.1 Ni, 63.9 Fe, 0.64 Mn, 0.2 C, 4-7 Cr
Annealed: 83,000 TS
For fans, irons, toasters, motor starters, resistance wire
Corrosion and heat resistant.

CROMINO 0.
M-1315, 0.12 max C, 13 Cr, bal Fe
Annealed: 75,000 TS; 40,000 YS; 35 El, 70 RA; 155 Brin.
For turbine blades, valves, cutlery, surgical instruments; Type 410; stainless

CROMINO 1.
M-1315; 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS, 50,000 YS, 25 El; 55 RA; 195 Brin.
For turbine blades, valves, cutlery, surgical instruments, Type 420; stainless, hardenable.

CROMINO 2 .
M-1315; 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For cutlery, valves, surgical and dental instruments; Type 420; stainless, hardenable.

CROMINO 8M.
M-1315; 0.9 C, 18 Cr, 0.2 Mo, bal Fe.
Annealed: 110,000 TS; 65,000 YS; 18 El; 35 RA; 220 Brin.
Heat treated: 280,000 TS; 270,000 YS; 3 El; 15 RA; 555 Brin.
For cutlery, valves, ball bearings, surgical instruments; corrosion and wear resistant, hardenable.

CROMINO 8MS.
M-1315; 0.12 C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For screw machine products; Type 430F; stainless, free-cutting.

CROMINO 18.
M-1315; 0.08 C, 0.4 Si, 17 Cr, bal Fe.
Annealed 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
Cold drawn: 130,000 TS; 120,000 YS; 2 El; 185 Brin.
For oil refinery and food processing equipment, sinks, Type 430; stainless, ferritic

CROMO.
M-111; 0.4 C, 0.65 Mn, 1.1 Cr, 0.25 Mo, bal Fe.
For gears, shafts, bolts; oil hardening.

CROMO.
M-334; 0.9 C, 1-2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, chisels, bull-dozers; shock tool steel.

CROMODI.
M-1432, C, alloy, bal Fe
Heat treated: 280 Brin
For brake dies, preheat treated, non-deforming.

CROMODIE.
M-56, 0.35 C, 5 Cr, 1.5 Mg, 1 V, 1 Si, 0.3 Mn, bal Fe.
For punches, crimpers, dies; oil hardened, tough

CROMODIE-W
M-56, 0.31 C, 0.9 Si, 0.3 Mn, 5 Cr, 1.75 Mo, 0.25 V, 1.1 W, bal Fe.
For punches, crimpers, dies, oil hardened, tough.

CROMO HIGH V
M-24, M-341; 0.40 C, 5.0 Cr, 1.2 Mo, 1.5 V, bal Fe
Hot work tool steel, for die casting dies, shear blades, oil hardened, AISI H13

CROMOL
M-50, M-1414; 0.40 C, 0.65 Mn, 1.1 Cr, 0.30 Mo, bal Fe
Oil harden: 109,000-162,000 TS, 90,000-144,000 YS, 19-25 El, 54-64 RA; 49-86 Iz
For axles, shafts, crankshafts, gears, bolts, studs, propeller shaft joints
Impact resistant Oil hardening.

CROMOL C-9
M-451, C, Cr, Mo, V, bal Fe
Air hardened: 115,000-181,500 TS, 90,000-127,000 YS, 20-14 El, 63-46 RA, 217-375 Brin.
For rams, sow blocks, dies; alloy steel casting

CRO-MO-LOY
M-435, 1.0 C, 1.0 Mn, 5.0 Cr, 0.25 V, 1.0 Mo, 1 Co, bal Fe
For tools, dies, shear blades, air hardening, non-deforming

CRO-MOL C-10
M-451; C, Cr, V, bal Fe.
For dies; rams, sow blocks; castings.

CROMO N.
M-24, 0.25 C, 1.0 Mn, 1.0 Si, 1.0 Ni, 11.0 Cr, 1.0 Mo, 0.5 V, 0.95 W, 0.10 N, bal Fe.
For hot work applications, extrusion mandrels, forging die inserts, piercer punches, die casting dies

CROMO N.
M-341; 0.23 C, 0.6 Mn, 1.25 Si, 0.75 Ni, 10.0 Cr, 1.2 Mo, 1.0 V, 0.45 W, 0.10 N, bal Fe.
For die casting dies, extrusion mandrels, forging and extrusion tooling.
Resists heat checking and cracking.
Air hardening hot work tool steel.

CROMONITE.
M-451; C, alloy, bal Fe.
For chill rolls; wear resistant.

CROMOTEX NO. 2.
M-1009; 0.43-0.48 C, 0.8 Mn, 0.8-1.1 Cr, 0.2 Mo, 1.8 Ni, bal Fe.
For arbors, axles, gears, piston rods; shock resistant.

CROMOTUNG.
M-289; C, alloy, bal Fe.
For taps, drills, reamers, dies, punches; oil hardened, tough.

CROMO V.
M-24; 0.35 C, 5 Cr, 0.4 V, 1.5 Mo, bal Fe.
Heat treated: 220,000 TS; 186,000 YS; 13 El; 40 RA.
At 1000°F: 145,000 TS; 105,000 YS; 19 El; 65 RA.
For extrusion dies, gripper and header dies, aluminum and magnesium forging dies
Type H11 hot work steel. Resists heat checking.

CROMOVAN.
M-57; 1.4-1.7 C, 12-14 Cr, 0.5-1.0 Mo, 1-1.5 V, bal Fe
Annealed: 110,000 TS; 210 Brin.
Hardened: 278,000 TS, 214,000 YS; 1 El, 0.2 RA, 570 Brin.
For dies for trimming, blanking extrusion, swaging, pressing, thread rolling, etc, taps, punchers, reamers, broaches, shear blades; heat and wear resistant "Chromovan Triple Die Steel"; non-deforming.

CROMOVAN F M
M-57; 1.55 C, 12 Cr, 1 V, 1 Mo, 0.12 S. bal Fe.
For blanking and drawing dies, punchers, gages, air-hardened, non-deforming.

CROMO W
M-24; 0.35 C, 1.05 Si, 1.55 W, 1.65 Mo, 5.15 Cr, bal Fe
Heat treated 216,000 TS; 185,000 YS, 14 El, 52 RA; Rock C 56
For trimmer and hot forging dies, die casting dies, hot sheer blades, punches
Type H12 hot work steel, oil hardening

CROMO W-55
M-24, 0.55 C, 0.85-1.10 Si, 1.0-1.5 W, 4.8-5.1 Cr, 1.0-1.5 Mo, bal Fe
Annealed: 103,000 TS, 65,000 YS, 24 El; C 18 Rock
Heat treated: 290,000 TS; 235,000 YS, 9 El; 22 RA, C 54 Rock.
For blanking and beading dies, cold forming dies, pneumatic tools.
Type A8 hot work steel, air harden
Tough and shock resistant.

CROMO WV.
M-24; 0.35 C, 1.05 Si, 1.55 W, 1.65 Mo, 5.15 Cr, 0.8 V, bal Fe
Heat treated: 218,000 TS; 186,000 YS, 14 El, 53 RA; Rock C 56.
For trimmer and hot forging dies, die casting dies, hot shear blades, punches.
Hot work steel, oil or air hardening. Type H 12

CROMVA.
M-334; 0.5 C, 0.6 Mn, 1 Cr, 0.2 V, bal Fe.
For tools, die casting dies; oil hardening.

CROMVA.
M-334; 0.35 C, 1 Cr, 0.2 V, bal Fe.
For punches, dies, upsetters, crimpers; water or oil hardened.

CRONIFER II.
M-297; 65 Ni, 15 Cr, bal Fe.
Annealed: 92,400-106,600 TS; 30-25 El; 55-45 RA; 130 Brin.
For heat resistant parts; maximum operating temp. 1075°C.

CRONIFER II EXTRA.
M-297; 65 Ni, 15 Cr, bal Fe.
Annealed: 92,400-106,600 TS; 30-25 El; 55-45 RA; 130 Brin.
For heat resistant parts; maximum operating temp 1125°C.

CRONIFER III.
M-297, 30 Ni, 20 Cr, bal Fe.
Annealed: 92,400-99,500 TS; 32-30 El; 50 RA; 150 Brin. For heat resistant parts; maximum operating temperature 1100°C.

CRONIFER III EXTRA.
M-297; 30 Ni, 20 Cr, bal Fe
Annealed: 92,400-99,500 TS; 32-30 El, 50 RA; 150 Brin.
For heat resistant parts; max operating temp. 1150°C

CRONIFFR IV.
M-297; C, 20 Ni, 24 Cr, bal Fe.
Rolled: 85,000-108,000 TS; 43,000 YS.
For furnace parts, salt pots, heat treating equipment; heat resistant to 1050°C in continuous operation

CRONIFER IV-EXTRA
M-297, C, 20 Ni, 24 Cr, bal Fe.
Rolled 85,000-108,000 TS, 43,000 YS
For furnace parts, salt pots, heat treating equipment, heat resistant to 1100°C in continuous operation.

CRONIFFR 1212
M-297, 0.10 max C, 11.5-13.5 Cr, 12.0-14.0 Ni, bal Fe.
For valves, pumps, corrosion resistant.

CRONIFER 1613Nb
M-297, 0.10 max C, 15-17 Cr, 12-14 Ni, Nb = 10 × C + 0.4, bal Fe
For chemical plant equipment; stainless.

CRONIFER 1613NbN.
M-297, 0.10 max C, 15.5-17.5 Cr, 12.5-14.5 Ni, 1.1-1.5 Mo, 0.6-0.8 V, 0.1 N, Nb = 10 × C + 0.4, bal Fe.
For chemical plant equipment, stainless

CRONIFER 1616Nb
M-297, 0.10 max C, 15.5-17.5 Cr, 15.5-17.5 Ni, 1.6-2.0 Mo, Nb = 10 × C + 0.4, bal Fe
For chemical plant equipment, stainless

CRONIFER. 1704
M-297, 0.15 max C, 16-18 Cr, 3.5-5.5 Ni, 5.5-7.5 Mn, 0.17-0.25 N, bal Fe.
For chemical plant equipment, stainless, austenitic.

CRONIFER 1707.
M-297, 0.15 max C, 16-18 Cr, 7-8 Ni, bal Fe
Annealed. 80,000 TS, 35,000 YS, 55 El; 75 RA, 150 Brin
For chemical plant equipment; Type 301; stainless, austenitic

CRONIFER 1805
M-297, 0.15 max C, 17-19 Cr, 4-6 Ni, 7.5-10.0 Mn, 0.17-0.25 N, bal Fe.
For chemical plant equipment; stainless, austenitic.

CRONIFER 1808.
M-297, 0.15 max C, 0.4 Si, 18 Cr, 8 Ni, bal Fe.
Quenched: 78,100-106,000 TS; 50 El; 130-180 Brin.
For textile and food industries; stainless, austenitic.

CRONIFER 1809.
M-297; 0.07 max C, 0.4 Si, 18 Cr, 9 Ni, bal Fe.
Quenched: 78,100-99,500 TS; 50 El; 135-180 Brin.
For textile and food equipment; stainless, austenitic.

CRONIFER 1809 Nb.
M-297; 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 56 El; 65 RA; 160 Brin.
Cold drawn: 100,000 TS; 65,000 YS; 40 El; 60 RA; 205 Brin.
For welded chemical plant equipment, tanks, mixers; Type 347; stainless, austenitic.

CRONIFER 1809NC.
M-297; 0.03 C, 17-19 Cr, 9-11 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 65 El; 75 RA; 140 Brin.
For chemical plant equipment; Type 304L; stainless, austenitic.

CRONIFER 1809 Ti.
M-297, 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 55 El; 65 RA; 150 Brin.
Cold drawn: 95,000 TS; 60,000 YS; 40 El; 60 RA; 185 Brin.
For welded chemical plant equipment, tanks, filters; Type 321; stainless, austenitic.

CRONIFER 1810.
M-297, 0.07 max C, 0.4 Si, 18 Cr, 2 Mo, 10 Ni, bal Fe.
Quenched: 78,100-99,500 TS; 45 El; 140-180 Brin.
For chemical equipment; stainless, austenitic

CRONIFER 1810NB.
M-297; 0.10 max C, 16.5-18.5 Cr, 10.5-12.5 Ni, 2.0-2.5 Mo, Cb = 8 × C, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 50 El; 65 RA; 160 Brin
For welded chemical plant equipment, Type 316Cb, stainless, austenitic.

CRONIFER 1810 Ti.
M-297; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 50 El, 65 RA, 170 Brin.
For welded acid resistant chemical plant equipment; Type 316 Ti; stainless, austenitic.

CRONIFER 1812.
M-297; 0.07 max C, 16.5-18.5 Cr, 11.5-13.5 Ni, 2.5-3.0 Mo, bal Fe.
Annealed: 85,000 TS, 35,000 YS, 50 El; 65 RA; 160 Brin.
For acid resistant equipment; Type 316; stainless, austenitic.

CRONIFER 1812Nb
M-297, 0.10 max C, 16.5-18.5 Cr, 11.5-13.5 Ni, 2.5-3.0 Mo, Nb = 8 × C, bal F
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant equipment, Type 316Cb; stainless, austenitic.

CRONIFER 1812Ti.
M-297; 0.10 max C, 16.5-18.5 Cr, 11.5-13.5 Ni, 2.5-3.0 Mo, Ti = 5 × C, bal Fe.
Annealed, 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For welded chemical plant equipment, Type 316Ti; stainless, austenitic.

CRONIFER 1813.
M-297; 0.07 max C, 16.5-18.5 Cr, 11.5-13.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA 150 Brin.
For chemical plant equipment; Type 304; stainless, austenitic.

CRONIFER 1818Nb.
M-297; 0.07 max C, 16.5-18.5 Cr, 16.5-18.5 Ni, 2.0-2.5 Mo, 1.8-2.2 Cu, Nb = 8 × C, bal Fe.
For acid resistant equipment, stainless, austenitic.

CRONIFER 1818Ti.
M-297; 0.07 max C, 16.5-18.5 Cr, 16.5-18.5 Ni, 2.0-2.5 Mo, 1.8-2.2 Cu, Ti = 5 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant equipment; Type 316Ti; stainless, austenitic.

CRONIFER 1910 Nb
M-297; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Cb = 8 × C, bal Fe
Annealed: 85,000 TS; 40,000 YS, 50 El; 65 RA; 170 Brin
For welded acid resistant chemical plant equipment, Type 316 Cb, stainless, austenitic.

CRONIFER 2012
M-297, 0.20 max C, 19-21 Cr, 11-13 Ni, 1.8-2.3 Si, bal Fe
For high temperature applications; heat resistant.

CRONIFER 2504
M-297, 0.15-0.25 C, 24-26 Cr, 3.5-4.5 Ni, 0.8-1.3 Si, bal Fe
For furnace parts, salt pots, heat resistant

CRONIFER 2520
M-297, 0.20 max C, 24-26 Cr, 17-21 Ni, 1.8-2.3 Si, bal Fe
For high temperature applications, heat resistant

CRONIFER 2520NV
M-297, 0.20 max C, 23-25 Cr, 19-21 Ni, 1.0-1.5 Si, bal Fe
For furnace parts, heat treat boxes, austenitic, corrosion and heat resistant

CRONIFER 2525Ti
M-297, 0.06 max C, 24-26 Cr, 24-26 Ni, 2.0-2.5 Mo, Ti = 5 × C, bal Fe
For furnace parts, heat resistant equipment; corrosion and heat resistant

CRONIMO
M-38; 0.50 C, 3.25 Ni, 1.1 Cr, 0.25 Mo, bal Fe
For dies, oil hardening

CRONIRO
M-1493, 72 Au, 22 Ni, 6 Cr
M.P. 1787-1832°F
For high temperature brazing

CRONIT
Eng.; 60 Ni, 40 Cr
For resistance alloys

CRONITE
M-37; 63.5-67.0 Ni, 13.5-16.0 Cr, 1 Mn, 0.4 Si, 0.8 Al, bal Fe
At 20°C: 67,000-78,000 TS, 0.5-1.5 El, 200-250 Brin.
At 1000°C: 25,000 TS
For carburizing boxes, grids, fire doors, furnace parts; maximum operating temperature 1000°C, heat resistant

CRONITE 428
M-37; 12 Ni, 25 Cr, bal Fe.
For high temperature uses; corrosion and heat resistant.

CRONITE ORD.
M-37; 55 Ni, 18 Cr, bal Fe.
For high temperature uses; corrosion and heat resistant.

CRONITE SR.
M-37; 35 Ni, 20 Cr, bal Fe.
For high temperature uses; corrosion and heat resistant.

CRONITE W.X. 2.
M-37; Ni, Cr, Fe, W.
70,000-120,000 TS.
For drastic temperature conditions.

CRONITUNG.
M-260; C, alloy, bal Fe.

CRONIX.
M-297; 80 Ni, 20 Cr.
Annealed: 92,400-106,600 TS; 35-25 El; 55-50 RA; 145 Brin.
For heating elements; maximum operating temp. 1150°C

CRONIX EXTRA.
M-297, 80 Ni, 20 Cr.
Annealed: 92,400-106,600 TS; 35-25 El; 55-50 RA; 145 Brin.
For heating elements; maximum operating temp 1200°C.

CROTORITE.
M-179, 89.5 Cu, 0.06 Pb, 0.56 Fe, 6.32 Ni, 3.08 Al, 0.62 Mn
50,000-80,000 TS, 32-16 RA.
For paper mill machinery, corrosion resistant

CROTERITE IV
M-179, Ni, Al, Mn, bal Cu.
Annealed: 50,000 TS, 18,000 YS, 48 El; 95 Brin.
Hardened 100,000 TS, 20 El.
For paper mill equipment, pump rods, piston rods, turbine blading; tough, corrosion resistant

CROTERITE V
M-179, Al, bal Cu.
Cast 65,000 TS, 25,000 YS; 35 El, 25 RA; 100 Brin
Hard rolled: 90,000 TS, 40,000 YS, 30 El, 50 RA; 140 Brin
For pump rods, piston rods, valves, impellers, exhaust manifolds, worm wheels, gears, resists high temperatures and corrosion

CROTERITE 7
M-179, Cu, Al, Mn, 2 Fe, bal Zn.
Extruded 84,000 TS; 38,000 YS; 28 El; 25 RA; 140 Brin
Drawn: 84,000 TS, 42,000 YS, 25 El, 25 RA; 150 Brin.
For hardware, corrosion resistant

CROTUNG.
M-151; 0.15 C, 0.5 Mn, 0.5 Si, 5.0 Cr, 1.0 W, bal Fe.
66,500 TS; 25,000 YS; 36 El, 71 RA.
For dies, petroleum still parts; oil hardened.

CROUSE FUSIBLE ALLOY
England; 45 Bi, 25 Sn, 25 Pb, 5 Cd
For fusible alloy, fire extinguishers, M.P. 88°C.

CROVA.
M-1331; 1.15 C, 0.65 Cr, 0.1 V, bal Fe.
For cutters, drills, bearings; water hardened, wear resistant.

CROVA 31.
M-1331, 0.31 C, 0.65 Cr, 0.1 V, bal Fe.
For gears, bolts, fasteners, crankshafts; oil hardened, tough.

CROVA 50.
M-1331; 0.5 C, 0.95 Mn, 1.05 Cr, 0.1 V, bal Fe.
For gears, bolts, springs, crankshafts; oil hardened, shock resistant.

CROVA 115.
M-1331; 1.2 C, 0.65 Cr, 0.1 V, bal Fe.
For bearings, cutters, forming dies; water hardened, wear resistant.

CROVAN.
M-435; 0.35 C, 1 Si, 5 Cr, 1.4 Mo, 0.9 V, bal Fe.
At 1000°F: 186,200 TS; 149,100 YS; 18.6 El; 48.2 RA; 477 Brin.
For die casting dies, extrusion tools, plastic molds; resists thermal shock, non-deforming.

CROVANI.
M-1318; 0.58 C, 1.05 Cr, 0.1 V, bal Fe.
For springs, gears, bolts, studs, oil hardened, shock resistant.

CROW.
M-1, 1.2 C, 0.50 Cr, bal Fe.
For drills, reamers, cutlery dies, gages, tools, drawing dies; water hardening

CROWN
M-73; 0.5 C, 0.9 Cr, 0.2 V, bal Fe
For tools, shafting; high fatigue resistance.

CROWN.
M-261, 0.44 C, 1.3 Cr, 0.15 V, 2.3 W, bal Fe.
For hot or cold trimming dies, punches, chipping chisels, pneumatic tools, mandrels, hot heading dies
Oil hardening, shock resistant.

CROWN.
M-657; 88 Cu, 10 Sn, 2 Zn, 87 Cu, 9 Sn, 4 Zn, 87 Cu, 8 Sn, 5 Zn
Cast: 32,000 TS, 16,000 YS, 21 El
For bearings, pumps, engine castings, heavy duty.

CROWN "W"
M-387, 0.8 C, 2.5 W, bal Fe.
For tools, dies; oil hardened

CRUCAST CA-15
M-38; 0.11 C, 12.5 Cr, bal Fe
Annealed 95,000 TS, 65,000 YS; 25 El; 35 RA, 180 Brin.
Heat treated 120,000-190,000 TS; 105,000-160,000 YS, 18-5 El; 45-12 RA, 250-382 Brin.
For chemical plant equipment, castings, corrosion resistant, hardenable.

CRUCAST CB30
M-38, 0.17 C, 20 Cr, 1 Ni, bal Fe.
Annealed 75,000 TS; 50,000 YS, 4 El, 4 RA, 170 Brin
For chemical plant equipment, castings, corrosion resistant.

CRUCAST CF-8
M-38; 0.06 C, 19 Cr, 10 Ni, bal Fe
Annealed. 71,000 TS: 40,000 YS; 50 El; 50 RA, 140 Brin.
For chemical plant equipment, fittings, valve bodies; stainless, austenitic

CRUCAST CF-8C.
M-38, 0.06 C, 19 Cr, 10 Ni, 1 Cb, bal Fe.
Annealed: 73,000 TS, 42,000 YS; 50 El, 50 RA; 150 Brin.
For welded equipment, valve bodies, mixers, filters; austenitic, stainless

CRUCAST CF-8M.
M-38, 0.06 C, 19 Cr, 10 Ni, 2.4 Mo, bal Fe.
Annealed: 75,000 TS; 45,000 YS, 50 El, 50 RA; 160 Brin.
For chemical plant equipment, fittings, valve bodies, filters; stainless, austenitic, acid resistant.

CRUCAST CF16FA.
M-38; 0.12 C, 19 Cr, 10 Ni, 0.3 S, 0.6 Mo, bal Fe
Annealed: 71,000 TS; 40,000 YS, 45 El; 45 RA; 140 Brin.
For chemical plant equipment, castings; stainless, austenitic.

CRUCAST CF20
M-38; 0.17 C, 19 Cr, 10 Ni, bal Fe.
Annealed: 73,000 TS; 42,000 YS; 50 El; 50 RA; 150 Brin.
For valve bodies, pump bodies; corrosion resistant, austenitic.

CRUCAST HH.
M-38; 0.40 C, 25 Cr, 13 Ni, bal Fe
Cast: 80,000 TS; 40,000 YS; 18 El, 23 RA; 170 Brin.
For chain links, heat treating fixtures, furnace parts, austenitic, corrosion and heat resistant.

CRUCAST HK.
M-38, 0.40 C, 26 Cr, 20 Ni, bal Fe
Cast: 75,000 TS; 40,000 YS, 16 El; 17 RA, 165 Brin
For high temperature castings, furnace equipment, heat resistant to 2100°F; austenitic.

CRUCAST HT
M-38; 0.50 C, 15 Cr, 35 Ni, bal Fe.
Cast: 66,000 TS; 37,000 YS, 7 El; 8 RA, 160 Brin
For quenching fixtures, carburizing boxes; austenitic, corrosion and heat resistant

CRUCIBLE 13% Mn.
M-38; 1.2 C, 13 Mn, bal Fe
For railroad frogs and tracks, wear plates; work hardens, wear and abrasion resistant

CRUCIBLE 17 Cr-4 Ni
M-38; 0.07 max C, 1.0 max Si, 15.5-17.5 Cr, 3.0-5.0 Ni, 3.0-5.0 Cu, 1.0 max Mn, 0.15-0.45 Cb + Ta, bal Fe.
Prec Hard. 900°F 200,000 TS; 185,000 YS, 14 El, 420 Brin (Values vary with treatment)
Precipitation hardening stainless, for valves, pump parts, turbine blades, shafts, fasteners, gears, instrument parts.
AMS 5643 ASTM A 564-66

CRUCIBLE 35% NICKEL-IRON.
M-38; 35 Ni, bal Fe
Annealed: 70,000 TS; 24,000 YS, 36 El, 68 RA, 143 Brin
Cold drawn: 90,000 TS, 70,000 YS; 20 El, 60 RA, 185 Brin.
For instruments, geodetic parts, thermostats, controlled thermal expansion, low

CRUCIBLE 42% NICKEL-IRON
M-38, 42 Ni, 0.08 max C, bal Fe
Annealed 80,000 TS, 30,000 YS, 30 El
For metal to glass seals, thermostats, temperature controls; low coefficient of expansion (controlled).

CRUCIBLE 52 CB BEARING STEEL.
M-38, 0.75-0.90 C, 0.3-0.45 Mn, 0.6-0.9 Si, 0.8-1.1 Cr, 0.25 Ni, 0.50-0.65 Mo, bal Fe.
Oil hardenable to 62-66 Rc.
For bearings, bearing races, hardened shafts

CRUCIBLE 52 CB VAR BEARING STEEL.
M-38; 0.85 C, 0.35 Mn, 0.75 Si, 1.0 Cr, 0.10 Ni, 0.60 Mo, bal Fe.
Oil hardenable to 62-66 Rc.
For bearings, bearing races, hardened shafts.

CRUCIBLE 56
M-38; 0.40 C, 3.3 Cr, 0.6 Mn, 2.75 Mo, 0.4 V, 1 Si, bal Fe.
At 70°F: 300,000 TS; 240,000 YS.
At 1000°F: 230,000 TS; 200,000 YS.
For high temperature applications, shears, punches, heat resistant to 1000°F, hot work steel.

CRUCIBLE 120 ZA.
M-38; 12 Zr, 4.5 Al, bal Ti
For high temperature applications, heat and creep resistant.

CRUCIBLE 201
M-38, 0.15 max C, 5.5-7.5 Mn, 16-18 Cr, 3.5-5.5 Ni, 0.25 max N, bal Fe.
Annealed. 115,000 TS; 55,000 YS; 55 El, 185 Brin
½ H temper. 150,000 TS, 105,000 YS, 25 El.
For chemical plant equipment, stainless, austenitic

CRUCIBLE 202.
M-38, 0.15 max C, 17-19 Cr, 7.5-10.0 Mn, 4-6 Ni, bal Fe
Annealed: 100,000 TS, 50,000 YS, 60 El, 185 Brin
For chemical plant equipment, stainless, austenitic

CRUCIBLE 301
M-38, 0.2 max C, 7 Ni, 17 Cr, bal Fe
Annealed: 110,000 TS, 40,000 YS; 60 El; 165 Brin
Rolled 185,000 TS, 140,000 YS, 8 El, 410 Brin
For aircraft structural members, trailer bodies, diaphragms household utensils, Type 301, stainless, austenitic

CRUCIBLE 302
M-38, 0.2 max C, 18 Cr, 9 Ni, bal Fe
Annealed 90,000 TS, 40,000 YS, 60 El, 70 RA, 165 Brin
For aircraft structural members, chemical plant equipment, Type 302, stainless, austenitic

CRUCIBLE 302B
M-38, 0.2 max C, 9 Ni, 18 Cr, 2.5 Si, bal Fe
Annealed 90,000 TS, 40,000 YS, 50 El, 65 RA, 160 Brin
For heat treat fixtures, tube supports, high temperature applications, Type 302B, stainless, austenitic

CRUCIBLE 303
M-38, 0.20 max C, 0.30 S, 9 Ni, 18 Cr, bal Fe
Annealed 85,000 TS, 40,000 YS, 45 El, 60 RA, 170 Brin
For screw machine products, bolts, screws, fasteners, Type 303, free cutting, stainless.

CRUCIBLE 303 PLUS
M-38; 0.15 max C, 2.0 max Mn, 1.0 max Si, 0.20 max P, 0.15 min S, 17-19 Cr, 8-10 Ni, 0.6 max Mo, bal Fe
Ann 90,000 TS, 35,000 YS, 50 El, 170 Brin
Good machinability, austenitic, corrosion resistant
For stainless hardware to be made on automatic screw machines, fasteners, bolts, studs AMS 5640

CRUCIBLE 303 PLUS X
M-38, 0.15 max C, 2.5-4.5 Mn, 1.0 max Si, 0.20 max P, 0.15 min S, 17-19 Cr, 7.0-10.0 Ni, 0.6 max Mo, bal Fe
Ann 90,000 TS, 35,000 YS; 50 El, 170 Brin
Austenitic, good machinability, corrosion resistant
For stainless screw machine parts, studs, bolts, shafts, fasteners, chemical plants. AMS 5640

CRUCIBLE 304.
M-38; 0.08 max C, 9.5 Ni, 19 Cr, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 60 El; 70 RA, 160 Brin.
For architectural molding and trim; Type 304; stainless, austenitic.

CRUCIBLE 304L.
M-38; 0.03 max C, 9.5 Ni, 19 Cr, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 160 Brin.
For welded structures, chemical plant equipment; Type 304L; austenitic, stainless.

CRUCIBLE 304 PLUS.
M-38; 0.08 C, 2.0 max Mn, 1.0 max Si, 18-20 Cr, 8-12 Ni, bal Fe.
Ann. 85,000 TS; 35,000 YS, 60 El; 170 Brin.
Austenitic, non-magnetic, corrosion resistant, ductile
For shafts, bar and fountain equipment,
food and dairy equipment, valves,
marine equipment.
AMS 5639.

CRUCIBLE 305.
M-38; 0.12 max C, 11.5 Ni, 18 Cr, bal Fe
Annealed. 85,000 TS; 35,000 YS; 55 El; 70 RA, 180 Brin
For spun parts, cold heading, special drawing; Type 305; austenitic, stainless.

CRUCIBLE 307.
M-38; 0.08 max C, 4 Mn, 9.5 Ni, 20.5 Cr, bal Fe.
For welding electrodes; austenitic, stainless

CRUCIBLE 308
M-38, 0.08 max C, 11 Ni, 20 Cr, bal Fe.
For welding electrodes; austenitic, stainless

CRUCIBLE 309
M-38, 0.20 max C, 13.5 Ni, 23 Cr, bal Fe.
Annealed. 90,000 TS, 40,000 YS, 50 El; 65 RA; 160 Brin
For furnace parts, heat treat boxes, boiler baffles, Type 309, austenitic, corrosion and
heat resistant

CRUCIBLE 309B
M-38, 0.20 max C, 2-3 Si, 22-24 Cr, 12-15 Ni, bal Fe
For furnace parts and equipment,
heat treating boxes, heat resistant,
stainless, austenitic.

CRUCIBLE 309S
M-38, 0.08 max C, 13.5 Ni, 23 Cr, bal Fe
Annealed 90,000 TS, 40,000 YS; 50 El, 65 RA, 150 Brin
For furnace parts, heat treat boxes, baffles,
tube supports, Type 309S; austenitic, corrosion and heat resistant

CRUCIBLE 310
M 38, 0.25 max C, 20.5 Ni, 25 Cr, bal Fe
Annealed 100,000 TS, 45,000 YS, 50 El, 65 RA, 180 Brin
For furnace parts and equipment, heat treat boxes, pots; Type 310, austenitic, heat resistant

CRUCIBLE 310CB
M-38, 0.08 max C, 20.5 Ni, 25 Cr, 1 Cb, bal Fe
Annealed 100,000 TS, 45,000 YS, 50 El, 65 RA, 185 Brin.
For welded parts, valves, pumps, furnace parts, austenitic, stainless, heat resistant

CRUCIBLE 310S
M-38, 0.08 max C, 20.5 Ni, 25 Cr, bal Fe.
Annealed: 100,000 TS, 45,000 YS; 50 El; 65 RA, 180 Brin.
For furnace parts and equipment,
heat treat boxes, Type 310S, austenitic,
heat resistant.

CRUCIBLE 311.
M-38; 0.25 max C, 2.5 Si, 25 Ni, 19 Cr, bal Fe.
For heat and scale resistant parts;
austenitic, stainless.

CRUCIBLE 312.
M-38; 0.10 C, 9 Ni, 30 Cr, bal Fe.
For welding electrodes; ferritic-austenitic, stainless.

CRUCIBLE 314.
M-38; 0.25 max C, 2.25 Si, 20.5 Ni, 24.5 Cr, bal Fe.
Annealed: 100,000 TS, 50,000 YS; 45 El, 60 RA; 180 Brin.
For heat and scale resistant parts, furnace parts; austenitic, stainless, heat resistant.

CRUCIBLE 316.
M-38, 0.10 max C, 12 Ni, 17 Cr, 2.5 Mo, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 60 El, 80 RA; 140 Brin.
Cold drawn 150,000 TS, 135,000 YS, 6 El; 300 Brin.
For chemical plant equipment, agitators, digesters, kettles, Type 316, stainless, austenitic.

CRUCIBLE 316L.
M-38, 0.03 max C, 12 Ni, 17 Cr, 2.5 Mo, bal Fe.
Annealed 80,000 TS; 30,000 YS, 60 El, 80 RA; 140 Brin.
Cold drawn. 150,000 TS; 135,000 YS;
6 El, 300 Brin.
For chemical plant equipment, agitators, kettles, digesters, Type 316L, stainless, austenitic

CRUCIBLE 316 PLUS.
M-38; 0.08 max C, 2.0 max Mn, 1.0 max Si,
16-18 Cr, 10-14 Ni, 2.0-3.0 Mo, bal Fe.
Ann: 85,000 TS; 35,000 YS, 55 El, 170 Brin.
Austenitic, very good corrosion resistance,
non-magnetic, weldable
For parts for food and beverage equipment,
pulp handling, chemical plants.
AMS 5648 AISI Type 316 stainless

CRUCIBLE 317
M-38; 0.10 max C, 12.5 Ni, 19 Cr, 3.5 Mo, bal Fe.
Annealed: 85,000-90,000 TS, 40,000-45,000 YS, 50-45 El, 160-170 Brin
For chemical plant equipment, evaporators, kettles, digesters; Type 317, austenitic, stainless.

CRUCIBLE 318
M-38, 0.08 max C, 14 Ni, 18 Cr, 2.5 Mo, 1 Cb, bal Fe
For welded parts, stabilized, austenitic, stainless

CRUCIBLE 321
M-38, 0.08 max C, 9.5 Ni, 18 Cr, 0.5 Ti, bal Fe.
Annealed 85,000 TS, 35,000 YS, 55 El, 65 RA, 165 Brin
Cold drawn: 95,000 TS; 60,000 YS, 40 El,
60 RA, 185 Brin.
For chemical plant equipment, welded construction; stainless, Type 321, austenitic, stabilized

CRUCIBLE 325
M-38, 0.4 C, 1.5 Si, 22 Ni, 8.5 Cr, 1.2 Cu, bal Fe
Annealed 80,000-110,000 TS, 40,000-75,000 YS, 55-30 El, 65-45 RA, 130-205 Brin.
For crude oil and refinery equipment, heat treat boxes, Type 325; heat resistant, austenitic

CRUCIBLE 329
M-38, 0.15 C, 4 Ni, 26.5 Cr, 1.25 Mo, bal Fe
Annealed 95,000 TS, 50,000 YS, 45 El;
60 RA, 160 Brin
For chemical plant equipment, Type 329,
heat resistant

CRUCIBLE 330
M-38; 0.25 max C, 34.5 Ni, 15 Cr, bal Fe
Annealed 80,000 TS; 40,000 YS, 30 El; 30 RA; 160 Brin.
For furnace parts and equipment, fixtures,
pyrometer tubes; Type 330; stainless, austenitic,
heat resistant

CRUCIBLE 347.
M-38; 0.08 max C, 10.5 Ni, 18 Cr, 1 Cb, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 50 El, 70 RA; 180 Brin.
For welded structures, chemical plant equipment; Type 347; stainless, stabilized.

CRUCIBLE 347-F-Se.
M-38; 0.08 max C, 17-19 Cr, 9-13 Ni, Cb = 10 × C, P, Se, bal Fe.
For chemical plant equipment; free-cutting, stainless, austenitic.

CRUCIBLE 403.
M-38; 0.15 max C, 12 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 140 Brin.
Cold drawn. 100,000 TS; 85,000 YS, 60 El; 205 Brin.
For flat springs, hardware, cutlery, tableware, Type 403; corrosion resistant.

CRUCIBLE 405.
M-38, 0.08 max C, 12.5 Cr, 0.2 Al, bal Fe.
Annealed. 70,000 TS, 40,000 YS; 30 El, 60 RA; 150 Brin.
Cold drawn. 85,000 TS; 70,000 YS, 20 El; 60 RA, 185 Brin.
For welded parts, annealing boxes, quenching racks, non-hardenable, ferritic, stainless.

CRUCIBLE 406.
M-38, 0.10 C, 13 Cr, 4 Al, bal Fe.
Annealed: 86,000 TS; 68,000 YS; 25 El; 57 RA; 160 Brin
For electrical resistance parts; non-hardenable, ferritic, stainless.

CRUCIBLE 410.
M-38, 0.15 max C, 12 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El, 70 RA, 140 Brin.
Cold drawn: 100,000 TS; 85,000 YS; 60 El, 205 Brin
For flat springs, hardware, cutlery, tableware, Type 410; corrosion resistant AMS 5613.

CRUCIBLE 414.
M-38; 0.15 max C, 2 Ni, 12 Cr, bal Fe.
Annealed 115,000-120,000 TS, 90,000-105,000 YS, 15-20 El; 60 RA, 235-255 Brin
For corrosion resistant parts, hardenable, martensitic, stainless

CRUCIBLE 416.
M-38; 0.15 max C, 0.30 S, 13 Cr, bal Fe
Annealed 75,000 TS, 40,000 YS: 30 El, 60 RA, 155 Brin
Heat treated 110,000 TS, 85,000 YS, 18 El, 55 RA, 230 Brin
For screw machine products, gears, shafts, Type 416, free-cutting, stainless.

CRUCIBLE 416 PLUS.
M-38, 0.15 max C, 1.25 max Mn, 1.0 max Si, 0.06 max P, 0.15 min S, 12-14 Cr, 0.60 max Mo, bal Fe
Ann: 75,000 TS, 40,000 YS; 30 El, 155 Brin.
Free machining, magnetic, hardenable, corrosion resistant.
For corrosion resistant hardware, screw machine parts, bolts, nuts, shafts.
AISI 416; AMS 5610.

CRUCIBLE 416 PLUS X
M-38; 0.15 max C, 1.5-2.5 Mn, 13 Cr, 1.0 max Si, 0.06 max P, 0.15 min S, 0.6 max Mo, bal Fe.
Ann: 75,000 TS; 40,000 YS; 30 El; 155 Brin.
Free machining, magnetic, hardenable, corrosion resistant.
Parts made on automatic screw machines, bolts, studs, nuts, shafts.
AISI 416. AMS 5610.

CRUCIBLE 420.
M-38; 0.35 C, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 190 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For cutlery, dental and surgical instruments, valve trim; Type 420, stainless, hardenable.

CRUCIBLE 420 DENSIFIED.
M-38; 0.3-0.4 C, 1.0 max Mn, 1.0 max Si, 12-14 Cr, bal Fe.
Air hardenable to 250,000 TS
For plastic molds, glass molds, injection molds.

CRUCIBLE 420F
M-38, 0.35 C, 0.30 S, 13 Cr, bal Fe.
Annealed 95,000 TS; 50,000 YS, 25 El, 55 RA; 190 Brin
Cold drawn 105,000 TS, 85,000 YS; 17 El, 50 RA; 215 Brin
For cutlery, dental and surgical instruments, valve trim, Type 420F, free-cutting, stainless.

CRUCIBLE 420 F-Se
M-38, 0.15 min C, 12-14 Cr, P, Se, bal Fe
For valves, cutlery, knives, free-cutting, corrosion resistant.

CRUCIBLE 420S
M-38, 0.20 C, 13 Cr, bal Fe
Annealed 95,000 TS, 50,000 YS, 25 El, 55 RA, 196 Brin
For corrosion resistant parts, cutlery, surgical instruments, hardenable, free-cutting, stainless

CRUCIBLE 422.
M-38, 0.23 C, 0.9 Mn, 0.14 Si, 0.7 Ni, 13.2 Cr, 0.25 V, 1 W, 1 Mo, bal Fe
At 80°F: 149,000 TS, 125,000 YS, 18 El, 52 RA,
At 1000°F. 96,000 TS, 82,000 YS, 25 El, 67 RA
For compressor blades, valves, furnace parts, stainless, ferritic

CRUCIBLE 422M
M-38, 0.28 C, 0.9 Mn, 0.2 Si, 0.2 Ni, 12 Cr, 0.5 V, 1.7 W, 2.2 Mo, bal Fe
Rolled 177,000 TS, 140,000 YS, 16 El, 46 RA, 350 Brin
Heat treated 253,000 TS, 180,000 YS, 11 El, 36 RA
For jet engine parts, blades, disks, valves, bearings, stainless, hardenable

CRUCIBLE 430
M-38, 0.12 max C, 16 Cr, bal Fe
Annealed 70,000 TS, 40,000 YS, 30 El, 55 RA, 140 Brin
Cold drawn 130,000 TS, 120,000 YS, 2 El
For kitchen sinks, chemical and dairy equipment, bolts, Type 430, stainless, ferritic

CRUCIBLE 430F
M-38, 0.12 max C, 0.30 S, 16 Cr, bal Fe
Annealed. 70,000 TS; 40,000 YS, 30 El, 55 RA; 140 Brin
Cold drawn. 130,000 TS; 120,000 YS; 2 El
For screw machine products, bolts, fasteners, gears; Type 430F; stainless, free cutting.

CRUCIBLE 430-F-Se
M-38, 0.12 C, 14-18 Cr, 0.15 min Se, bal Fe
For stainless parts, shafts, valves; free-cutting, corrosion resistant

CRUCIBLE 431.
M-38; 0.20 max C, 2 Ni, 16 Cr, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
For corrosion resistant parts, valves, marine hardware; hardenable, martensitic, stainless.

CRUCIBLE 440A.
M-38; 0.65 C, 17 Cr, bal Fe.
Annealed: 95,000 TS; 55,000 YS; 20 El; 250 Brin.
Heat treated: 275,000 TS; 240,000 YS; 2 El; 555 Brin.
For cutlery, valves, dental and surgical instruments, bearings; Type 440A, stainless, hardenable.

CRUCIBLE 440B
M-38; 0.85 C, 17 Cr, bal Fe.
Annealed. 107,000 TS; 62,000 YS; 18 El; 35 RA; 220 Brin.
Heat treated: 280,000 TS, 270,000 YS; 3 El; 15 RA; 555 Brin.
For cutlery, valves, dental and surgical instruments, bearings. Type 440B; stainless, hardenable.

CRUCIBLE 440BM.
M-38; 0.95 C, 18 Cr, 0.5 Mo, bal Fe
Annealed: 107,000 TS; 62,000 YS, 18 El; 35 RA; 220 Brin
For corrosion and wear resistant parts, cutlery, bearings, hardenable, martensitic, stainless.

CRUCIBLE 440BMF.
M-38, 0.95 C, 0.30 Si, 18 Cr, 0.5 Mo, bal Fe
Annealed 107,000 TS, 62,000 YS, 18 El, 35 RA; 220 Brin.
For corrosion and wear resistant parts, free-cutting, hardenable, stainless.

CRUCIBLE 440C
M-38, 1.05 C, 17 Cr, bal Fe.
Annealed 110,000 TS, 65,000 YS, 15 El, 30 RA; 225 Brin
Heat treated 290,000 TS, 275,000 YS; 2 El, 12 RA, 575 Brin
For cutlery, valves, bearings, pivots; Type 440C, stainless, hardenable

CRUCIBLE 440 F-Se
M-38, 0.95-1.2 C, 16.5-18.5 Cr, P, Se, bal Fe
For bearings, valves, pivots; stainless, free-cutting, hardenable.

CRUCIBLE 442.
M-38, 0.25 max C, 20.5 Cr, bal Fe.
For corrosion and heat resistant parts; non-hardenable, ferritic, stainless

CRUCIBLE 446
M-38, 0.20 max C, 1.5 max Mn, 23-27 Cr, bal Fe
Ann 80,000 TS, 50,000 YS, 25 El, 86 Rock B.
Magnetic, corrosion resistant, non-hardenable, weldable.
For heat treat equipment, radio tube parts, rotary driers, and retorts, tank cars, combustion chambers
Type 446

CRUCIBLE 501.
M-38; 0.20 C, 4-6 Cr, bal Fe.
Annealed. 70,000 TS, 30,000 YS, 28 El; 65 RA; 160 Brin
Heat treated: 175,000 TS; 135,000 YS; 15 El, 50 RA; 370 Brin.
For furnace parts, valve trim, oil refinery equipment, Type 501, creep resistant.

CRUCIBLE 502.
M-38; 0.10 max C, 4-6 Cr, 0.5 Mo, bal Fe
Annealed: 75,000 TS; 35,000 YS; 26 El; 60 RA; 160 Brin.
For furnace parts, valve trim, oil refinery equipment; Type 502; creep resistant.

CRUCIBLE 1383.
M-38; 0.08 C, 11-13 Cr, 14-16 Ni, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 55 El; 72 RA; 116 Brin.
Cold worked: 80,000 TS; 60,000 YS; 50 El; 70 RA; 140 Brin
For corrosion resistant parts; stainless.

CRUCIBLE 3003.
M-38; 0.60 C, 4.5 Mn, 15 Ni, 12.5 Cr, 3 Al, bal Fe.
For corrosion resistant parts; age-hardenable, high strength, stainless.

CRUCIBLE 3311.
M-38; 0.15 C, 23 Ni, 21.5 Cr, 3.25 Al, bal Fe.
For corrosion resistant parts, age-hardenable, high strength, stainless.

CRUCIBLE 3329.
M-38; 0.40 C, 6.25 Ni, 24 Cr, 4.25 Mo, bal Fe.
For corrosion resistance and strength; hardenable by sigma phase, stainless.

CRUCIBLE A-40.
M-38, 0.10 C, 0.07 N, 0.01 H, bal Ti.
Rolled: 65,000 TS, 50,000 YS, 28 El; 50 RA.
For high temperature applications; for maximum ductility and formability

CRUCIBLE A 55.
M-38, 0.20 max C, 0.015 max H, 0.08 max N, bal Ti
Annealed: 75,000 TS, 65,000 YS, 25 El; 50 RA.
For non-structural aircraft parts, commercial titanium.

CRUCIBLE A 70
M-38, 0.05-0.15 C, 0.07 max N, bal Ti
Annealed 90,000 TS; 80,000 YS, 20 El, 40 RA.
For aircraft parts, commercial titanium.

CRUCIBLE A-110 AT
M-38; 5 Al, 2.5 Si, bal Ti.
Cold drawn: 125,000 TS; 120,000 YS, 18 El, 40 RA; 350 Brin
At 600°F: 88,000 TS, 67,000 YS, 17 El, 45 RA.
At 1200°F: 39,000 TS, 25,000 YS, 38 El, 59 RA.
For compressor blades, jet engine components, high fatigue and creep resistance

CRUCIBLE BETA III.
M-38, 11.5 Mo, 6 Zr, 4.5 Sn, bal Ti
Ht Tr 205,000 TS, 191,000 YS, 7 El, 29 RA
Annealed 122,000 TS, 107,000 YS, 20 El, 32 RA
For aircraft and structural fasteners
Heat treatable beta alloy

CRUCIBLE B 110 Mo
M-38, 30 Mo, bal Ti
For high temperature applications

CRUCIBLE B 120 VCA
M-38, 13.5 V, 11 Cr, 3 Al, bal Ti
Rolled 125,000 TS; 120,000 YS, 10 El
Aged: 200,000 TS, 180,000 YS, 5 El; 5-20 RA.
For missile and aircraft components, honeycomb structures, age-hardened, good formability.

CRUCIBLE C 105 VA
M-38, 14-17 V, 2.5 Al, 2.25-3.25 Al, bal Ti.
Solution-annealed 105,000 TS, 30,000 YS, 16 El; 30 RA.
Aged. 190,000 TS; 182,000 YS, 5 El, 17 RA.
For high temperature applications, aircraft and missile components; heat treatable, good formability and ductility.

CRUCIBLE C 110M.
M-38, 7-9 Mn, bal Ti.
Annealed: 130,000 TS; 120,000 YS; 15 El; 32 RA; 330 Brin
For structural airframe members, skins, stiffeners; good formability.

CRUCIBLE C 115 AMoV.
M-38; 4 Al, 3 Mo, 1 V, bal Fe.
Rolled: 115,000 YS.
For high temperature applications; serviceable to 1100°F, heat treatable.

CRUCIBLE C-120AM.
M-38; 4 Al, 4 Mn, bal Ti.
Rolled: 130,000 TS; 120,000 YS; 10 El.
For aircraft and jet engine components; heat resistant, low density.

CRUCIBLE C-120 AV.
M-38; 6 Al, 4 V, bal Ti.
Annealed: 140,000 TS; 130,000 YS; 15 El; 40 RA
Heat treated: 190,000 TS; 180,000 YS; 10 El; 30 RA.
For jet engine components, ordnance equipment; high temperature strength, creep resistant.

CRUCIBLE C 130AM
M-38; 4 Mn, 4 Al, 0.05 C, bal Ti
Rolled: 150,000 TS; 140,000 YS; 18 El, 40 RA, 330 Brin.
For jet engine components, airframe forgings, bolts, fasteners; good creep strength above 600°F.

CRUCIBLE C 130AMo.
M-38; 6.5 Al, 3.75 Mo, bal Ti
At room temperature. 160,000 TS; 150,000 YS; 15 El; 40 RA.
At 1000°F: 100,000 TS, 90,000 YS
For jet engine discs and blades, fasteners; age-hardenable, alpha-beta alloy.

CRUCIBLE C-135 AMo.
M-38; 6.3-7.3 Al, 3.5-4.5 Mo, 0.15 max C, 0.0125 max H, bal Ti
Rolled: 150,000-170,000 TS; 145,000-155,000 YS; 18-13 El, 45-30 RA
For jet engine components, compressors, missile parts, alpha-beta type, high temperature stability.

CRUCIBLE CCS.
M-38; 0.40 C, 1.15 Si, 0.3 Mn, 5.25 Cr, 4.25 W, bal Fe.
Hardened C 55-58 Rock.
For die casting dies, forging and extrusion tools, dummy blocks
Good high temperature properties
Type H 14 hot work steel, air harden.

CRUCIBLE CMC
M-38, C, Cr, Mn, bal Fe.
For jet engine and missile components, stainless, resists oxidation to 2100°F

CRUCIBLE COLLET
M-38; 0.60 C, 0.40 Ni, 0.80 Cr. 0.90 Mn, 0.20 Mo, bal Fe
For spring collets; oil hardened, shock resistant.

CRUCIBLE COPPER BOND.
M-38; copper welded to steel core.
For nails, staples, line wire, obsolete.

CRUCIBLE CSA39.
M-38; 27 Ni, 18 Cr, 9 Mo, 3 W, bal Fe.
For high temperature applications.

CRUCIBLE CSM NO. 2.
M-38; 0.30 C, 1.65 Cr, 0.45 Mo, bal Fe.
For plastic mold and die casting dies; oil hardened AISI P 20.

CRUCIBLE CVM.
M-38; 0.5 C, 1 Cr, 0.2 V, 0.8 Mn, bal Fe.
For plastic mold and die casting dies; oil hardened.

CRUCIBLE D 6.
M-38; 0.46 C, 0.75 Mn, 0.22 Si, 0.55 Ni, 1.0 Cr, 1.0 Mo, 0.08 V, bal Fe.
Heat treated: 150,000-299,000 TS; 140,000-211,000 YS; 18.4-8.5 El; 60.8-19.0 RA; 360-570 Brin.
For aircraft landing gear and structural components, rocket motor cases, pressure vessels, die blocks; deep hardening, ultra high strength.

CRUCIBLE D-319.
M-38; 0.07 C, 17.5-19.5 Cr, 11.0-15.0 Ni, 2.25-3.0 Mo, bal Fe
For chemical plant equipment; stainless, austenitic.

CRUCIBLE DIAMOND BRAND.
M-38, 1.65 C, 18 Cr, 1 V, bal Fe.
For wear resistant parts, dies; nondeforming, stainless

CRUCIBLE-F
M-1191, 0.4 C, 1.5 Ni, bal Fe
Cast: 80,000 TS, 45,000 YS; 180 Brin
For crankshafts, gears, machinery castings; oil hardening, shock resistant

CRUCIBLE FIVE PLY SAFE & VAULT STEEL
M-38, C, alloy, bal Fe
For safe, vault and jail construction, tough

CRUCIBLE HNM
M-38, 0.30 C, 3.5 Mn, 0.5 Si, 9.5 Ni, 18.5 Cr, 0.25 P, bal Fe
At 80°F 168,000 TS, 124,000 YS, 19.5 El, 31.5 RA, 380 Brin
At [illegible]0°F: 89,000 TS, 80,000 YS; 19.0 El, 38.5 RA
At 1800°F. 49,000 TS, 46,000 YS, 4.0 El; 16.5 RA
For aircraft and jet engine components, structural members, age hardened, stainless

CRUCIBLE HNM
M-38, 0.3 C, 0.5 Ni, 3.5 Mn, 18 Cr, bal Fe
Annealed 116,000 TS, 56,000 YS, 57 El, 192 Brin
Heat treated 168,000 TS, 124 000 YS, 19 El, 352 Brin
For corrosion resistant parts, hardenable, corrosion resistant

CRUCIBLE HOLDER BLOCK STEEL
M-38, 0.50 C, 1.25 Mn, 0.08 S, 0.65 Cr, 0.18 Mo, bal Fe.
Hardenable to 300,000 TS max
For backers for forging dies, brake dies, frames for plastic molds

CRUCIBLE HRB
M-38, 0.12 C, 2.25 Cr, 0.9 Mo, 0.15 Ti, 0.5 V, 0.025 B, 0.4 Mn, bal Fe
Heat treated 160,000 TS, 151,000 YS; 17 El, 60 RA
For high temperature bolts, compressor blades and wheels, high strength and good ductility to 1100°F

CRUCIBLE HTX
M-38, 0.45 C, 21 Cr, 8.5 Ni, 8.5 Mn, 1.5 Mo, 0.23 P, bal Fe.
For corrosion resistant parts, stainless.

CRUCIBLE JAIL BAR STEEL
M-38, C, Mn, Mo, bal Fe.
For jail bars; tough

CRUCIBLE M-252.
M-38; 0.15 C, 0.5 Mn, 19 Cr, 55 Ni, 10 Co, 10 Mo, 2.5 Ti, 1 Al, 2 Fe.
At 70°F: 175,000 TS; 98,000 YS; 25 El.
At 1600°F: 71,200 TS; 70,500 YS; 39.5 El; 55.5 RA.
For jet engine and gas turbine parts; oxidation resistant to 1800°F.

CRUCIBLE M-308.
M-38; 0.04 C, 13 Cr, 33 Ni, 3 Mo, 6.4 W, 2 Ti, 0.3 Al, 0.2 Zr, bal Fe.
For jet engine and gas turbine components; high oxidation resistance.

CRUCIBLE NCR124MOD.
M-38; 0.55 C, 5.0 Mn, 9.5 Ni, bal Fe.
Cold drawn: 120,000-125,000 TS; 90,000-100,000 YS; 16 El; 30 RA; 248-331 Brin.
For aircraft parts, bolts, studs; corrosion and heat resistant .

CRUCIBLE NITRARD NO. 1.
M-76 1.1 C, 12 Cr, Mo, V, bal Fe.
For dies; non-deforming

CRUCIBLE NITRIDING BM.
M-38; 0.35 C, 0.80 Mn, 0.10 S, 1.15 Cr, 0.2 Mo, 1.1 V, bal Fe
For gears, shafts, camshafts, cams; nitriding steel.

CRUCIBLE ORTHOPEDIC STEEL.
M-38; C, alloy, bal Fe.
For orthopedic braces.

CRUCIBLE PHV.
M-38; 0.27 C, 2.8 Ni, 1.15 Cr, 0.4 V, 0.25 Mo, 1.15 Al, bal Fe
Heat treated: 170,000 TS; 159,000 YS; 16 El; 365 Brin.
For dies; oil hardened, tough.

CRUCIBLE RENE 41.
M-38; 0.12 C, 19 Cr, 11.3 Co, 10 Mo, 3 Ti, 1.5 Al, bal Ni
At 70°F 206,000 TS; 154,000 YS, 14 El
At 1500°F 126,000 TS, 118,000 YS, 14 El
For jet engine components, after-burner parts, severely stressed high temperature applications

CRUCIBLE SA22
M-38, 0.22 C, 1.15 Mn, 1 Si, 1.15 Ni, 0.5 Cr, 0.4 Mo, bal Fe
Heat treated 156,000 TS; 129,000 YS; 15 El, 51 RA; 340 Brin
For structures, aircraft sheet components, good weldability, resists softening or tempering.

CRUCIBLE SCB
M-38, 0.08 max C, 13.5 Ni, 23 Cr, 1 Cb, bal Fe.
For welded parts, stabilized austenitic stainless steel

CRUCIBLE SELF-TEM.
M-38, 0.35 C, 0.70 Mn, 0.85 Cr, 0.50 W, 0.40 Mo, bal Fe
Heat treated 137,000 TS, 120,000 YS, 20 El, 65 RA; 300 Brin
For shafting, bolts, machinery parts; oil hardened, shock resistant

CRUCIBLE STAINLESS IRON
M-38, 0.2 C, 12-24 Cr, bal Fe
For stainless articles; stainless and corrosion resistant

CRUCIBLE STAINLESS STEEL
M-38, 11-30 Cr, C, bal Fe.
For stainless articles, corrosion resistant.

CRUCIBLE TXCR.
M-38, 0.40 C, 4.25 Mn, 0.80 Si, 2.4 Cr, 1.3 Mo, 3.75 Ni, bal Fe
Heat treated: 136,000 TS; 4.7 El; 4.0 RA; 380 Brin
For automotive exhaust valves; heat resistant.

CRUCIBLE UHS 260.
M-38; 0.35 C, 1.25 Mn, 1.5 Si, 1.25 Cr, 0.35 Mo, 0.2 V, bal Fe.
Heat treated: 270,000 TS; 230,000 YS; 11 El; 40 RA; 520 Brin.
For landing gears, bomb release hooks, axles; shock resistant, high strength.

CRUCIBLE VERSASTEEL.
M-38; 1.0 C, 0.3 Mn, 2.0 Si, 4.25 Cr, 1.15 V, 2.5 Mo, 0.30 W, bal Fe.
Heat treated: 232,000-360,000 TS, 204,000-307,000 YS; 2-15 El; 2.5-3.0 RA, C 47-61 Rock.
For thread chasers, drills, taps, reamers, dies, punches, thread rolling and swaging dies, slitter knives, cold shears.
Tough and wear resistant.

CRUCIBLE WASPALOY
M-38, 0.07 C, 19 Cr, 56 Ni, 14 Co, 4.3 Mo, 3 Ti, 1.3 Al, 1 Fe.
At 70°F. 188,000 TS; 115,000 YS, 28 El; 25.5 RA.
At 1400°F: 117,000 TS, 99,000 YS; 28 El; 41.0 RA
For jet engine turbine buckets and discs, high temperature bolts; high oxidation resistance.

CRUCIBLE WF11.
M-38: 0.15 C, 19-21 Cr, 9-11 Ni, bal Fe
Heat treated: 160,000 TS; 85,000 YS; 55 El
For aircraft turbine blades, after burners; corrosion and heat resistant.

CRUCIN
M-303, 44 Ni, 56 Cu
For kitchen utensils, kettles; corrosion and wear resistant.

CRUSADER XL
M-73, 1.2 C, 4.1 Cr, 6.0 W, 3.0 V, 5.0 Mo, alloy sulphides, bal Fe
Hardened. C 65 68 Rock
For form cutters, roll turning cutters, lathe and planer tools
Good machineability rating
Type M-3 Type 2 high-speed steel, high red-hardness and edge toughness.

CRUSCA 12B
M-38, 0.10 C, 3.5 Ni, 0.5 Mn, 1.6 Cr, bal Fe.
Heat treated 165,000 TS, 135,000 YS, 16 El; 50 RA, 380 Brin
For machine cut plastic molds; carburizing steel.

CRUSCA COLD HUBBING
M-38, 0.07 C, 0.15 Mn, bal Fe
Heat treated 60,000 TS, 40,000 YS, 30 El, 65 RA; 120 Brin
For cold hubbed dies for plastic molds, case hardening steel, water hardened.

CRUSCA FLAME HARDENING.
M-38, 0.70 C, 0.8 Mn, 0.3 Cr, bal Fe
For flame hardened parts, water hardening.

CRUSCA NEW PROCESS HOLLOW DRILL
M 38, 0.8 C, bal Fe
For tools, hollow drills, water hardening

CRUSCA SOLID DRILL.
M-38, 0.8 C, bal Fe
For solid drills, tools, water hardening.

CRUSCO STEEL.
M-153; 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe.
For piercing points, rolling mill plugs, dies, forming rolls, high abrasion resistance at high temperature.

CR-VICALLOY.
M-Japan; 12 (Cr + V), 52 Co, bal Fe.
For electrical and magnetic equipment.
Permanent magnet.

CRWXI.
M-459; 0.9 C, 1.7 Cr, bal Fe.
For rolls for steel mills; oil hardened.

CRYSTALLOY.
M-1664; 3 Si, bal Fe.
For transformers, lamination for motors and generators.
High magnetic permeability.

CS.
M-459; 0.8 C, 1 Cr, 0.8 Si, bal Fe.
For shears, knives, cutters; oil or water hardened.

CSA.
M-38; 0.20-0.30 C, 5 Mn, 18-20 Cr, 6 Ni, 1.5 Mo, 1.5 W, 0.4 Cb, bal Fe.
For discs and wheels for gas turbines; high heat resistance.

CSA.
M-459; 0.6 C, 1.6 Si, 0.6 Mn, 0.8 Cr, bal Fe.
For tools, springs, chisels; shock resistant.

CSA-G40.8.
M-1253; 0.15-0.22 C, 0.80 Mn, 0.008 max N, 0.35 max Si, bal Fe.
Rolled: 65,000-85,000 TS; 36,000-40,000 YS; 20 El.
For structures, bridges, buildings; high yield strength and good weldability.

CSF SOLDER ROLL STEEL.
M-1437; 5.5 Ni, low C, bal Fe.
For solder rolls and solder wiping mandrels.

C.S.M.
M-260, M-38; 0 7-1.4 C, 0.75 Mn, 0.75 Cr, bal Fe
For wrenches, valve parts, studs, bolts, chisels, springs, shafts, gears; tough, fatigue resistant.

CSM-2.
M-38; M-1214; 0.30 C, 0.75 Mn, 0.5 Si, 1 65 Cr, 0.40 Mo, bal Fe.
For Zn and Sn die casting dies; oil or water hardened.

C.S.M. STEEL.
M-259; 0.15 C, 0.30-0.70 Cr, bal Fe.
Oil treated: 110,000 TS; 25 El; 68 RA, 219 Brin
For springs, gears, axles, shafts, tough

CSN 13-123
M-Poland; 0.23 C, 1.1 Mn, 0.2 V, bal Fe
For gears, shafts, hardware.
Cast case hardening and water hardening.

CSP.
M-459; 1.2 C, 0.5 Cr, bal Fe.
For tools, drills, hobs; water hardening.

CSV1.
M-459; 0.61 C, 0.75 Mn, 1.2 Cr, 0.1 V, bal Fe
For springs, punches; oil hardened, shock resistant

C.T.C. FERRY.
M-121; 45 Ni, 55 Cu.
Annealed: 73,000 TS; 34,000 YS; 47 El; 77 RA; 155 Brin.
For instrument resistances; heat and corrosion resistant.

C.T. METAL.
M-815; Pb alloy.
For slush castings, statues, low M.P.

C.T.V. HOT WORK.
M-261; 0.40 C, 3.5 Cr, 2.4 W, 0.5 V, bal Fe.
For bolt and extrusion dies; hot work steel; oil hardening.

Cu-Be 50.
M-108; 0.5 Be, 2.5 Co, bal Cu.
Annealed: 5[illegible]000 TS; 25,000 YS; 30 El; B 30 Rock.
Ht. Tr.: 120,000 TS; 105,000 YS; 10 El; B 100 Rock.
For wire and strip springs, clips, connectors.
Age-hardenable. Corrosion resistant.
Non-magnetic and non-sparking.

Cu-Be 250.
M-108; 2 Be, 0.25 Co, bal Cu.
Ht. Tr.: 200,000 TS; 180,000 YS; 1-3 El.
For wire and strip springs, clips, connectors.
Non-magnetic, non-sparking
Age-hardenable. Corrosion resistant.

CUBE-ALLOY.
M-63; BeO, bal Cu.
At 68°F: 80,000 TS; 63,000 YS; 12 El, 50 RA.
At 1600°F: 23,000 TS; 22,000 YS; 2 El; 1 RA.
For motor windings, springs, magnet wire, cables, welding electrode tips.
Beryllia-strengthened copper.
High resistance to creep.

CuBe INJECTION MOLD.
M-108; 2.7 Be, 0.5 Co, bal Cu.
Ht. Tr.: 195,000 TS; 170,000 YS, 2 El.
For plastic injection molds and zinc die casting dies
Age-hardenable. Corrosion resistant.

CUBEX.
M-118; 3.2 Si, bal Fe.
For electrical and magnetic equipment, motors, transformers, cores.
Doubly grain oriented

CUFENIUM.
U S., 72-60 Cu, 22-20.5 Ni, bal Fe.
For tableware, nickel silver.

CUFENLOY-30.
M-319, 29.1 Ni, 0 5 Fe, 0 35 Mn, bal Cu
At 75°F· 77,000 TS; 61,000 YS, 58 El
At 700°F 62,000 TS, 19,000 YS, 62 El
At 1050°F 43,000 TS, 16,000 YS, 48 El
For heat exchanger tubes, high strength, ductility and stress corrosion resistance

CUFENLOY-40
M-319; 41 Ni, 2 Fe, 1 Mn, bal Cu
Rolled 85,000 TS
For high-pressure feed water heaters, high strength, high temperature alloy.

CUFERCO
M-118, 96 Cu, 2 Fe, 2 Co.
For spot welding tips, hardenable electric conductivity = 70% Cu.

CUIVRFLECT.
French, Cu alloy
For welding rods

CUIVRE POLI
France, 70 Cu, 30 Zn.
For cartridges, shell cases, condenser tubes; maximum ductility

CU-LEAD-ITE NO 1.
M-481, 70 Cu, 20 Pb, 10 Sn
Cast· 31,000 TS; 11 El; 12 RA, 68 Brin.
For nuts, parts for pneumatic tools subjected to severe pounding and abuse; tough, hard casting.

CU-LEAD-ITE NO 2.
M-481; 68 Cu, 25 Pb, 7 Sn
Cast. 25,000 TS, 16 El, 15 RA; 48 Brin.
For severe service such as bearings in rolling mills, wire mills, diesel engines, ball mills and gyratory crushers; heavy duty.

CU-LEAD-ITE NO 3.
M-481; 65 Cu, 30 Pb, 5 Sn.
Cast: 23,200 TS; 17 El; 18 RA; 43 Brin
For all round bearing service in high speed engines, locomotives, mills and railroads; heavy duty.

CU-LEAD-ITE NO. 4.
M-481; 60 Cu, 38 Pb, 2 Sn.
Cast: 18,500 TS; 14 El; 15 RA; 38 Brin.

For bearings for all small machinery, deep well pumps, conveyors, connecting rods, automobiles and trucks; heavy duty.

CU-LEAD-ITE NO. 5.
M-481; 50 Cu, 50 Pb.
Cast: 6000 TS; 20 El; 21 RA; 14 Brin.
For railroad locomotives, piston packers, metallic packing, bibs, etc.; withstands superheated steam.

CU-LEAD-ITE NO. 6.
M-481; 66 Cu, 34 Pb.
Cast: 8910 TS; 15 El; 16 RA; 28 Brin.
For small high speed machinery, pumps, electric drills, loose pulleys, small tools; heavy duty.

CULVER NCS.
M-1195, 0.50 C, 2 W, 1.65 Cr, 0.25 V, bal Fe.
Annealed: 70,000 TS; 30 El; 64 RA; 165 Brin.
Heat treated. 245,000 TS; 5 El; 18 RA; 525 Brin.
For punches, dies, chisels, pneumatic tools; shock resistant, oil hardened.

CUMANITE.
M-9; C, Mn, bal Fe.
For machine tool parts; wear resistant.

CUMBERLAND
M-213, 0.18-0.23 C, bal Fe.
Rolled: 60,000-70,000 TS, 35,000-45,000 YS; 35-25 El, 60-50 RA.
For shafts, gears; case hardening.

CUMLOY see WEST No. 9, 10, etc

CUNIC
M-602; 45 Ni, 55 Cu
Annealed 62,000 TS, 25 El.
For rheostats, shunts, thermocouples, low temperature resistance

CUNICO-1
M-38, M 1076, 50 Cu, 21 Ni, 29 Co
Rolled 85,000 TS, 210 Brin.
Annealed. 3400 Br, 710 Hc; 2000 Bo
For magnetic and electrical equipment
Permanent magnet, high coercive force

CUNIFE 1
M-1076, 60 Cu, 20 Ni, 20 Fe.
Permanent magnet, cold reduced.
Peak energy product (BdHd) max X 10^6 1.3
Residual Induction, Br, (kilogauss) 5.4.
Coercive force Hc (oersteds) 500.
Most ductile grade of permanent magnet

CUNILOY.
U.S., 25 Cu, 3.8 Mn, 1 Pb, bal Ni
For pump rods, valve parts; corrosion resistant.

CUNIP.
M-63; 1.1 Ni, 0.2-0.3 P, bal Cu
Wire or strip 57,000-98,000 TS, 3-5 El.
For electron tube components, cathode supports, tuning fingers, spring clips. Heat treatable
High strength and electrical conductivity.

CUNISIL 647.
M-8; 0.6 Si, 1.9 Ni, bal Cu .
Ht. Tr: 100,000 TS, 85,000 YS; 15 El; Rock B 95.
For electrical equipment, electrical hardware, machined mechanical fasteners.
Precipitation hardening. Corrosion resistant. 35% electrical conductivity.

CUNISIL 837.
M-8; 97.5 Cu, 1.9 Ni, 0.6 Si.
Precipitation hardened: 90,000 TS; 70,000 YS; 8 El; 90 Rock B.
For electrical apparatus; corrosion resistant.

CUPA.
M-204; Cu plated Al.

CUPAL.
M-127; Cu-clad Al sheet.
For panels for railroad cars; corrosion resisting.

CUPAL.
U.S; 80 Al, 20 Cu.
For copper-clad aluminum; 10 Cu-80 Al-10 Cu.

CUPALLOY
Russia; 0.5 Cr, bal Cu.
For electrical equipment, motors, high conductivity.

CUPALOY.
M-118, M-214; 0.5 Cr, 0.1 Ag, bal Cu.
Rolled: 70,000 TS; 65,000 YS; 15 El; 50 RA; 150 Brin
Cast: 55,000 TS, 35,000 YS, 30 El; 60 RA; 125 Brin
For commutators, slip rings, terminal studs; age-hardenable, high electrical conductivity.

CUPLAT.
M-1493; 40 Pt, 60 Cu.
For brazing cathode structures.
M.P. 1185-1216°C, corrosion resistant. Low vapor pressure.

CUPRALIUM.
German, 7-8 Cu, bal Al.
For light alloy parts; non-hardenable.

CUPRALIUM 12.
German, 11.5-12.5 Cu, bal Al
For light alloy castings, non-hardenable

CUPRALUM.
M-1193, lead clad copper.
For chemical plant equipment, acid resistant

CUPRALUMIN 8
8 Cu, 0.5 Fe, 1.5 Si, bal Al.
For light alloy parts; similar to Alcoa 12

CUPRALUMIN 12
12 Cu, bal Al
Cast 21,000-26,000 TS, 20,000-24,000 YS, 0.5-1.5 El, 80-90 Brin.
For light alloy parts, non-hardenable

CUPRANIUM
Eng., Ni, Zn, bal Cu
For corrosion resistant parts, corrosion resistant

CUPRO-ALUMINUM.
U.S., 10 Al, Fe, bal Cu.
For worm wheels, gears; aluminum bronze

CUPROCHROME.
M-61, 1 Cr, bal Cu.
Annealed. 40,000 TS, 27,000 YS, 25 El
For electron tubes; high conductivity

CUPRODIE see FINKL CUPRODIE

CUPROMAGNESIUM
U.S., 90 Cu, 10 Mg
For cast iron inoculant, graphite spheroidizer.

CUPROMANGANESE
U.S; 90 Cu, 10 Mn.
For staybolts, heat resisting parts; heat resistant.

CUPROMANGANESE TUBES
U.S., 96 Cu, 4 Mn.
For tubes; corrosion resistant.

CUPRON.
M-61; 55 Cu, 45 Ni.
Annealed: 62,000 TS.
For rheostats, voltmeters, shunts, resistances; similar to "Advance", "Ideal", "Constantan" and "Ia-Ia."

CUPRON.
M-897; 45 Ni, 55 Cu.
Annealed: 85,000 TS; 50,000 YS; 50 El.
For strain gauges, rheostats;
low temperature coefficient of resistance.

CUPRONAR 900.
M-677; deoxidized copper, 1.0 Sn.
For welding wire; AWS RCu, ECu.

CUPRONAR 910.
M-677; 2.8-4.0 Si, 0.5 Fe, 94 Min Cu.
For welding wire; silicon bronze, AWS RCuSi-A, ECuSi.

CUPRONAR 920A.
M-677; 4-6 Sn, 0.1-0.35 P, 93.5 min Cu.
For welding wire, phosphorus bronze, AWS RCuSn-A, ECuSn-A.

CUPRONAR 920C.
M-677; 7-9 Sn, 0.05-0.35 P, bal Cu.
For welding wire, phosphorus bronze, AWS ECuSn-C.

CUPRONAR 950.
M-677; 6-9 Al, 0.1 Si, bal Cu.
For welding wires; aluminum bronze, AWS ECuAl-A1.

CUPRO-NICKEL 5% 704
M-279; 93 Cu, 5.5 Ni, 1.5 Fe.
Available annealed or cold rolled.
For welded heat exchanger tubes, corrosion resistant

CUPRO-NICKEL 7% 705.
M-279, 93 Cu, 7 Ni
Ann: 36,000-42,000 TS, 35-42 El
Cold rolled: 39,000-70,000 TS; 1-32 El.
For resistance strips for fuses
Constant resistivity and melting temperature

CURRO-NICKEL 9% 725
M-8; 88.78 Cu, 9.0 Ni, 2.0 Sn, 0.22 Mn
Sheet, hard: 80,000 TS, 76,000 YS; 3 El; 90 Rb
Soft: 52,000 TS; 22,000 YS, 40 El; 42 Rb
For connectors used in telephone, computer and other electrical and electronic systems; tableware, boat hardware

CUPRO-NICKEL 10%.
M-33, 89.25 Cu, 10 Ni, 0.75 Fe.
Annealed 42,000 TS, 14,000 YS, 45 El.
For condenser tubes, heat exchanger tubes, corrosion resistant

CUPRO-NICKEL 10%-510.
M-141; 10 Ni, 0.85 Fe, bal Cu.
Annealed: 46,000 TS; 42 El.
Drawn: 75,000 TS, 10 El.
For condensers and heat exchangers; corrosion resistant.

CUPRO-NICKEL 10%-511
M-141; 88.85 Cu, 10 Ni, 1.15 Fe.
Hard: 50,000 TS; 45,000 YS; 18 El.
Soft: 45,000 TS; 15,000 YS; 40 El.
For condensers and heat exchangers; corrosion resistant.

CUPRO-NICKEL 10% 706.
M-8; 88.35 Cu, 10 Ni, 1.25 Fe, 0.40 Mn.
Hard tube: 60,000 TS; 57,000 YS; 15 El; B 68 Rock.
Soft tube: 44,000 TS; 22,000 YS; 46 El; [illegible] 25 Rock.
For condenser tubes, heat exchangers, marine equipment, oil refinery condensers and evaporators.
Resists general corrosion and stress corrosion cracking.

CUPRO-NICKEL 10% 706.
M-279; 88 Cu, 10 Ni, 1.4 Fe, 0.6 Mn.
Ann: 40,000-50,000 TS; 10,000-25,000 YS; 33-40 El.
Cold rolled: 54,000-88,000 TS; 48,000-84,000 YS; 1-30 El.
For heat exchanger tubes and plates.
Excellent salt water corrosion resistance.

CUPRO-NICKEL 10%-755
M-8; 10 Ni, 0.4 Mn, 1.25 Fe, bal Cu.
Soft: 44,000 TS; 22,000 YS; 46 El
Hard: 60,000 TS; 57,000 YS, 15 El.
For condenser tubes, resists sea water corrosion

CUPRO-NICKEL 20%-520.
M-141, 78.85 Cu, 20 Ni, 0.4 Fe, 0.75 Mn
Soft: 49,000 TS, 14,000 YS; 40 El.
For condensers and heat exchangers; corrosion resistant.

CUPRO-NICKEL 20%-710.
M-8, 78.75 Cu, 20 Ni, 0.75 Fe, 0.5 Mn
Annealed 50,000 TS, 22,000 YS, 45 El
For feed water heaters, corrosion resistant.

CUPRO NICKEL 25% 713
M-279, 75 Cu, 25 Ni.
Ann. 48,000-58,000 TS, 14,000-24,000 YS, 35-45 El
Cold rolled 54,000-94,000 TS; 16,000-89,000 YS, 2-38 El
For heat exchanger tubes and plates
Excellent salt water corrosion resistance

CUPRO NICKEL 30%-531
M-141, 67.75 Cu, 31 Ni, 0.5 Fe, 0.75 Mn
Soft 60,000 TS, 25,000 YS, 45 El, 75 Brin
For condensers and heat exchangers, corrosion resistant

CUPRO NICKEL 30%-702
M-8, 68.9 Cu, 30 Ni, 0.6 Mn, 0.5 Fe
Hard 77,000 TS, 70,000 YS, 5 El, 162 Brin
Soft: 55,000 TS, 22,000 YS, 40 El, 71 Brin
For condenser tubes, corrosion resistant

CUPRO-NICKEL, 30%-707
M-8, 64.15 Cu, 30 Ni 5.25 Fe, 0.60 Mn
Annealed 74,000 TS, 36,000 YS; 30 El
For heat exchanger tubes, high strength, corrosion resistant.

CUPRO NICKEL 30% 715
M-8, 68.9 Cu, 30 Ni, 0.60 Mn, 0.50 Fe.
Hard tube. 70,000 TS, 60,000 YS, 10 El, B 80 Rock
Soft tube 55,000 TS, 22,000 YS; 45 El, B 35 Rock
For vessel condensers, and salt water tubes, heat exchangers, cold headed fasteners
Tough and corrosion resistant

CUPRO-NICKEL 30% 715
M-279; 68.5 Cu, 31 Ni, 0.5 Fe.
Ann: 54,000-60,000 TS; 20,000-22,000 YS, 40-45 El
Cold rolled 58,000-94,000 TS
For heat exchanger tube and sheets.
Good corrosion resistance to high velocity salt water

CUPRO NICKEL 30% 716
M-8, 64.15 Cu, 30 Ni, 5.25 Fe, 0.60 Mn.
Soft tube. 74,000 TS; 36,000 YS; 30 El.
Drawn: 112,000 TS; 90,000 YS; 12 El.
For feedwater heater tubes, heat exchanger tubes, high pressure air and hydraulic lines
Corrosion resistant, high strength.
Elect. cond: 4.6.

CUPRO NICKEL 826.
M-8; 30 Ni, 0.6 Mn, 0.15 Si, bal Cu.
For welding rod; for steel and copper-nickel.

CUPRO-NICKEL NO. 300 ALLOY.
89 Cu, 11 Ni.
For corrosion resistant parts; corrosion resistant

CUPRO-NICKEL BULLET JACKETS
U.S.; 85 Cu, 15 Ni.
For bullet jackets; ductile.

CUPRO-NICKEL COMMERCIAL.
U.S., 98-60 Cu, 2-40 Ni.
For hardware; corrosion resistant.

CUPRO-NICKEL DRIVING BANDS.
U.S., 97.5-95 Cu, 2.5-5 Ni
For driving bands; corrosion resistant.

CUPRO-NICKEL LOCOMOTIVE TUBES
U.S., 97 Cu, 3 Ni
For locomotive tubes, corrosion resistant.

CUPROR.
U.S., 94 Cu, 5.8 Al.
For pump rods, valve stems; corrosision resistant

CUPRO-SILICON.
U.S.; 55 Si, bal Cu
For hardener for copper alloys

CUPROTEC 10180
M-717
Copper-base alloy powder for brazing thin walled copper alloy sections.

CUPROTHAL 30
M-70, M-1150, 2 Ni, bal Cu.
Annealed 30,000-60,000 TS, 60 max El
For heating and resistance elements, max operating temperature 600°F, nonmagnetic

CUPROTHAL 60
M-70, M-1150, 6 Ni, bal Cu
Annealed 35,000-70,000 TS, 55 max El
For heating and resistance elements, max operating temperature 600°F, nonmagnetic.

CUPROTHAL 90
M-70, M-1150, 11 Ni, bal Cu
Annealed 35,000-75,000 TS, 50 max El.
For heating and resistance elements,
max operating temperature 750°F, nonmagnetic.

CUPROTHAL 180
M-70, M-1150, 22 Ni, bal Cu
Annealed 50,000-100,000 TS, 40 max El
For heating and resistance elements, max operating temperature 1000°F, nonmagnetic

CUPROTHAL 294.
M-70, M-1150; 45 Ni, bal Cu
Rolled: 60,000-100,000 TS, 30 El
For resistors; low electrical resistance,
nonmagnetic maximum temperature 1000°F

CUPROTHERM
M-764, Cu-Cr.
For electrical equipment; high hardness.

CUPROVAC E.
M-1214; Cu.
For electrical equipment; gas free,
high purity copper.

CUROLOY.
M-136; 3.0 C, 1.2 Si, 0.9 Mn, alloy, bal Fe.
For rolls; alloy cast iron.

CURTISOL.
M-1502; silver alloy.
For solder for titanium alloys; M.P. 1300-1400°F.

CURTISS.
Eng.; 95.2 Al, 2.5 Cu, 1.5 Mg.
For pistons; heat treatable.

CUSIL.
M-1493; 72 Ag, 28 Cu.
M.P. 1436°F.
For high temperature brazing.
Eutectic alloy. Excellent flow.
High vapor pressure.

CUSILOY.
U.S., 95 Cu, 3-1 Si, 1-1.5 Sn, 0.7-1 Fe.
Soft. 50,000-60,000 TS; 15,000-20,000 YS; 50 El.
For wire; corrosion resistant.

CUSTOM 455.
M-32; 0.03 C, 11.75 Cr, 8.5 Ni, 1.2 Ti, 0.3 Cb, 2.25 Cu, bal Fe.
Hardened: 332,000 TS, 244,000 YS, 13 El, C 50 Rock.
For high temperature bolts, springs, valves.
Maraging, precipitation hardening, tough

CUTANIT.
M-261, M-486; Mo, Ti, WC.
For taps, tools, cutters; cemented carbides.

CUTLERY.
M-472, 0.30-0.40 C, 12-14 Cr, bal Fe.
123,000-157,000 TS, 500 Brin
For cutting tools, high tensile engineering requirements; corrosion resistant

CUTTER ALLOY
M-35, 1.05 C, 0.25 Mn, 0.25 Cr, 0.25 W, bal Fe.
Annealed: 110,000 TS.
For cutting tools for hard materials,
water hardening.

CUT TRODE
M-717, C, Cu, bal Fe.
For cutting electrodes; exothermic coating

CUYO
M-155, 0.2 C, 18 Cr, 8 Ni, bal Fe.
Annealed 75,000 TS
For stainless parts, furnace parts,
stainless and heat resisting

CUZINAL
M-141, 77 Cu, 2.1 Al, 0.03 As, bal Zn
Annealed: 50,000 TS, 65 El.
Drawn 85,000 TS, 10 El.
For condenser and heat exchangers,
embrittlement free

CV see DARWIN CV.

CV 30
M-459, 0.3 C, 0.3 Si, 0.2 Mn, 1.0 Cr, 0.2 Mo. bal Fe.
For gears, shafts, water hardening

CV 60.
M-459, 0.3 C, 0.3 Si, 0.4 Mn, 1.35 Cr, 0.55 Mo, bal Fe.
For gears, shafts; water hardening.

CV 70.
M-459; 0.15 C, 0.3 Si, 0.4 Mn, 1.0 Cr, 0.3 Mo, 0.25 V, bal Fe.
For gears, shafts; case hardened.

CV 110.
M-459; 0.3 C, 0.3 Si, 0.4 Mn, 1.4 Cr, 1.05 Mo, bal Fe.
For gears, shafts; water hardening.

CV 120.
M-459, 0.3 C, 0.3 Si, 0.4 Mn, 1.4 Cr, 0.55 Mo, 0.4 V, bal Fe.
For gears, shafts; water hardening.

CVFS.
M-459; C, Cr, Mn, bal Fe.
For springs; water hardening.

CV1 EXTRA.
M-459; 1.2 C, 0.7 Cr, 0.1 V, bal Fe.
For cutting tools, bearings; wear resistant; keen cutting edge.

C.V.M.
M-1067, 1.0 C, 0.7 Mn, 5 Cr, 1.1 Mo, 0.25 V, bal Fe.
For dies, blanking, trimming and forming dies; air hardening.

C-W.
M-1067, 0.9 C, 1.1 Mn, 0.5 Cr, 0.5 W, 0.35 Si, bal Fe.
For drills, milling cutters, dies; oil hardened.

C.W. CHISEL.
M-114; 0.7 C, bal Fe.
For tools, chisels, oil hardening.

CWM, S 431.
M-459; C, Cr, bal Fe.
Water treated: 78,500-100,800 TS; 50,000-72,000 YS; 27-22 El.

C.W. OIL
M-908, 0.85-0.95 C, 1.0-1.2 Mn, 0.4-0.6 Cr, 0.4-0.6 W, bal Fe
For tools, dies; non-deforming.

CY-2.
M-1697; Sintered carbide tool material
For general purpose and light roughing cuts on steel

CY-4.
M-1697; Sintered carbide tool material.
For wear parts, heavy shock but light impact

CY-5
M-1697; Sintered carbide tool material.
For general purpose machining of carbon and low alloy steels

CY-12
M-1697, Sintered carbide tool material
For roughing cuts on carbon and low alloy steel

CY-14
M-1697; Sintered carbide tool material.
For light roughing cuts and some finishing cuts on carbon and alloy steels.

CY-16.
M-1697, Sintered carbide tool material.
For heavy roughing cuts on carbon and alloy steels

CY-17.
M-1697; Sintered carbide tool material
For heavy roughing cuts at heavy feeds on carbon and alloy steels.

CY-31.
M-1697; Sintered carbide tool material.
For finish cutting and precision boring of carbon and alloy steels.

C.Y. ALLOY.
M-752; Homogeneous abrasion resisting alloy iron casting.
Cast: 30/35 tons/sq. in. TS.
For brake blocks, breaker bars, chute liners, ball mill liners.

CYCLO.
M-114; 0.7 C, 1.2 Mn, bal Fe.
For tools, dies, punches; oil hardening.

CYCLOPS 14 MV replaced by UNITEMP 14MV.

CYCLOPC 17A replaced by UNILOY 325.

CYCLOPS 67 replaced by CYCLOPS S 5.

CYCLOPS B-6.
M-114; 0.75 C, 18 W, 1 V, bal Fe.
For lathe tools, taps, reamers, twist drills, milling cutters, dies, lathe centers; high speed steel; wear and abrasion resistant.

CYCLOPS B 6X replaced by THERMOLD H 26.

CYCLOPS B-9.
M-114; 0.84 C, 0.25 Mn, 0.30 Si, 4.5 Cr, 18.5 W, 2.25 V, 0.5 Mo, bal Fe.
For drills, taps, broaches form tools, milling cutters; high speed steel.

CYCLOPS B-10
M-114; 0.80 C, 1.0 Mo, 18.5 W, 4.5 Cr, 2.0 V, 9.0 Co, bal Fe.
For cutters, lathe and planer tools, form tools, checking tools, cut-off tools.
High abrasion resistance and red-hardness.
AISI-T 5 High speed steel.

CYCLOPS B-44 replaced by THERMOLD H22

CYCLOPS B44J replaced by THERMOLD H21

CYCLOPS EXTRA replaced by CYCLOPS W1.

CYCLOPS K
M-114, C, Cr, W, bal Fe.
For hot work dies, punches, hot work steel.

CYCLOPS K-L DIE STEEL
M-39, 0.35 C, 6 Cr, 6 W, bal Fe
For coining dies, punches, hot heading dies, oil hardened

CYCLOPS K-M DIE STEEL
M-39, 0.45 C, 6 Cr, 6 W, bal Fe
For blanking, forming and gripper dies, hot piercers, water hardened

CYCLOPS L1
M-114, 1.05 C, 0.35 Mn, 0.30 Si, 1.4 Cr, bal Fe
Water hardened 237,000 TS, 226,000 YP, 444 Brin
Cold Drawn 107,000 TS, 87,000 YP, 17 El, 55 RA, 229 Brin
For gauges, knurls, knife edges, taps, dies, arbors, rolls
AISI Type L1 Oil hardening Wear resistant

CYCLOPS L2
M-114, 0.50 C, 0.70 Mn, 0.25 Si, 1.0 Cr, 0.2 V, bal Fe
Annealed 103,000 TS, 74,000 YS, 27 El; 52 RA, 201 Brin
Hardened 298,000 TS, 263,000 YP, 1 El, 5 RA; 610 Brin
For gears, forgings, arbors, crankpins, chuck jaws, die rings, gun barrels, jack screws, rivet sets, shear blades
Tough, shock resisting
AISI Type L2 Oil hardening Fatigue resistant

CYCLOPS L6
M-114, 0.75 C, 0.4 Mn, 0.25 Si, 1.0 Cr, 1.5 Ni, bal Fe
Heat treated. 190,000-305,000 TS, 178,000-280,000 YS, 5-12 El; 17-38 RA, C 43-61 Rock.
For arbors, blanking dies, clutch parts, forming dies, brake dies, punches, pinions, shear blades, spindles, swages
Tough and wear resistant
AISI Type L6 oil hardening tool steel.

CYCLOPS M4.
M-114; 1.3 C, 4.5 Mo, 5.5 W, 4.5 Cr, 4.0 V, bal Fe.
Hardened: C 64-66 Rock
For cutters, broaches, reamers, milling cutters, lathe and planer tools, taps. Counterbore tools
Good abrasion resistance, tough.
AISI Type M4. High speed steel.

CYCLOPS M42.
M-114; 1.10 C, 3.75 Cr, 1.2 V, 1.5 W, 9.5 Mo, 8.0 Co, bal Fe.
Ht. Tr.: 63-67 Rock C .
For finish machining, boring, precision turning, at high speeds; good temperature and wear resistance.
AISI Type M42 High speed tool steel.

CYCLOPS M-T.
M-39; 0.75 C, 1.0 V, 1.5 W, 7 Mo, bal Fe.
For tools; see Motung.

CYCLOPS N-9 replaced by CYCLOPS L6.

CYCLOPS S1.
M-114, 0.50 C, 0.35 Mn, 0.30 Si, 1.5 Cr, 2.25 W, 0.25 V, 0.30 Mo, bal Fe.
Hardened: 260,000-280,000 TS; C 48-55 Rock.
For bolt header dies, chipping and caulking tools, concrete drills, pneumatic tools, shear blades, track tools.
Type S1. Tough and fatigue resistant.

CYCLOPS S2.
M-114; 0.50 C, 0.45 Mn, 1.1 Si, 0.2 V, 0.5 Mo, bal Fe.
Water Harden: 235,000-323,000 TS; 229,000-300,000 YS; 4-10 El; 12-45 RA; C 47-58 Rock.
For hand and pneumatic tools, chisels, stamps, spindles, pipe cutters, rivet sets; flaring tools.
Tough and shock resistant
Type S2. Tough and shock resistant.

CYCLOPS S5
M-114, 0.55 C, 2.0 Si, 0.9 Mn, 0.4 Mo, bal Fe.
Heat Treated: 338,000 TS; 281,000 YS; 5 El; 600 Brin.
Heat Treated 220,000 TS; 207,000 YS; 11 El, 455 Brin
For shear blades, punches, pneumatic tools, rivet sets, chisels
Shock and impact resistant Type S5

CYCLOPS SCK
M-114; 0.70 C, 0.35 Mn, 1.0 Si, 8.5 Cr, 1.0 V, 1.4 Mo, 1.5 Ni, bal Fe.
Ht Tr: 55-61 Rock C
For cold shears, trimmers, woodworking chippers punches; air hardening; resists tempering. good wear resistance

CYCLOPS SPECIAL COLD HEADER replaced by CYCLOPS W2

CYCLOPS T-15.
M-114; 1.5 C, 12.5 W, 4.75 Cr, 5.0 V, 5.0 Co, bal Fe.
Oil harden. C 64-66 Rock
For heavy duty cutters, form tools, lathe and planer tools, broaches, milling cutters, blanking dies, punches.
High red-hardness and abrasion resist.
AISI-T15 High speed steel.

CYCLOPS W1.
M-114; 0.80-1.25 C, 0.25 Mn, 0.25 Si, bal Fe.
Annealed: 95,000 TS, 50,000 YS; 22 El; 195 Brin.
Water Hardened: 200,000-215,000 TS; 138,000-152,000 YS; 11-12 El; 400-600 Brin.
For punches, beading tools, cold heading dies, axles, drills, reamers, files, woodworking tools.
Wear and abrasion resistance.
Water hardening high carbon steel.

CYCLOPS W2.
M-114; 0.80-1.25 C, 0.25 Mn, 0.25 Si, 0.25 V, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 21 El; 200 Brin.
Water Hardened: 216,000 TS; 152,000 YS; 11 El; 32 RA; 600 Brin.
For punches, beading tools, cold heading dies, axles, drills, reamers, woodworking tools, files, die rings.
Wear and abrasion resistant.
Water hardening high carbon steel.

CYKLOP.
M-1315; 0.3 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion press rams and liners, punches; hot work steel, oil hardened.

CYKLOP Co.
M-1315; 0.3 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe.
For extrusion press rams and liners, punches; hot work steel.

CYKLOP EXTRA.
M-1315; 0.65 C, 3.75 Cr, 0.85 Mo, 0.7 V, 8.5 W, bal Fe.
For lathe and planer tools, reamers, drills, hobs; high speed steel.

CYLINDER IRON.
M-165; 3-3.25 C, 0.40-0.75 Mn, 2-2.25 Si, bal Fe.
For engine cylinders, pistons, piston rings; cast iron.

CYLINDER IRON.
M-165; 3-3.5 C, 0.5-0.8 Mn, 1.75-2.75 Si, 1-1.5 Ni, 0.3-0.4 Cr, bal Fe.
For engine cylinders; cast iron.

CYMBAL METAL.
U.S.; 78 Cu, 22 Zn.
For architectural and ornamental parts; red brass.

CYPRUS BRONZE.
65 Cu, 30 Pb, 5 Sn.
17,000 TS; 6-8 El; 41 Brin.
For bearings, hardware; heavy duty.

D-1 DISSTON.
M-357, 0.8 C, bal Fe
For tools, general purpose.

D-2.
M-338, 3.0 max Mg, 1.5 Mn, bal Al.
Annealed: 28,000 TS; 24 El.
Hard rolled: 40,000 TS; 5 El
For light alloy parts, panelling; can be cold worked; corrosion resistant.

D-2.
M-739, 3.0-3.5 Cu, 7.25-7.75 Sb, 0.1-0.14 Te, bal Sn.
For engine bearings, steel backed Babbitt.

D-2 ALLOY.
M-28; 2.5 Mg, bal Al.
Annealed: 28,000 TS; 14,000 YS; 24 El; 46 Brin.
Hard rolled: 44,000 TS; 40,000 YS, 5 El, 76 Brin.
For sheets, tubes, light alloy parts; non-hardenable.

D-2-DISSTON.
M-357; C, bal Fe.
For tools; water hardening.

D2-SA TOOL.
M-357; C, bal Fe.
For tools; general purpose.

D-6-CO.
M-357, 0.8 C, 4 Cr, 6 Co, 1.75 V, 18 W, bal Fe.
For tools, cutters; high speed steel.

D7 ALLOY.
M-137; 2.2-2.8 Cu, 4.5-5.5 Si, 0.3-0.7 Mn, bal Al.
Cast: 26,000-36,000 TS; 8,000-12,000 YS; 10-5 El; 60-65 Brin.
For heavy duty castings; age-hardenable.

"D7" QUALITY.
M-179; Cu, bal Zn.
Extruded: 55,000 TS; 50 El; 45 RA.
For rivets; cold working qualities.

D8 ALLOY.
M-137; 2-4 Cu, 3-6 Si, 0.3-0.7 Mn, 0.35 max Ni, bal Al.
Cast: 22,000-35,000 TS; 10,000-30,000 YS; 3-2 El; 60-100 Brin.
For hydraulic units, gear cases; hardenable.

D8 (D8W; D8 WP).
M-106; 2-4 Cu, 4-6 Si, 0.3-0.7 Mn, bal Al.
Sand cast, Sol. treat (D8W): 22,400-26,800 TS, 12,300 YS; 2-3 El; 70 Brin; 1-3 Izod.
Chill cast, Sol. treat and age (D8WP) 45,000-47,000 TS; 40,000 YS; 1 El, 110 Brin; 0.6 Izod.
Castings for good strength, hydraulic pressure.
BS L79.

D9 ALLOY.
M-137; 3.2-4.0 Cu, 4.5-5.5 Si, 0.3-0.7 Mn, bal Al.
36,000-44,000 TS; 15,000-28,000 YS; 8-4 El; 75-105 Brin.
For light alloy parts; hardenable.

D 9 Mo.
M-357; 1.15 C, 0.2 Mo, bal Fe.
For taps, knives; water hardening.

D9-VA
M-357; 1.15 C, 0.6 Mn, 0.2 V, 0.6 Si, bal Fe.
For taps, twist drills, reamers, tools; water hardening

D-10.
M-989; brass and graphite
For oil-less bearing; powder metallurgy, operating temperature from 69-800°F.

D12 ALLOY
M-137; 6.2-7.2 Cu, 0.15-0.40 Mg, 5-6 Si, 0-1.25 Fe, bal Al.
Heat treated: 40,000-49,000 TS; 34,000 YS, 0 El, 130 Brin.
For pistons, cylinder heads; age-hardenable.

D 22 S.
M-459; C, Cr, Ni, Mo, bal Fe.
15-13 El.
For machinery parts, oil hardened

D-29 CHISEL STEEL.
M-357, 0.5 C, 1.4 Si, 0.4 Mo, bal Fe.
For chisels, shear blades.

D-29 KNIFE.
M-357, 0.65 C, 1.4 Si, 0.1 V, 0.4 Mo, bal Fe
For chipper knives; tough

D.70.
M-50; 0.03 max C, 4.0-4.5 Ni, 11.5-12.5 Cr, 4.0-4.5 Mo, 14.0-15.0 Co, Ti, Al, Nb, B, Zr, bal Fe.
For jet engine and gas turbine components, aircraft and aerospace equipment, missiles.
Stainless maraging steel. Low work hardening Precipitation hardening.

DACAR.
M-69; 0.7-1.2 C, bal Fe.
For machinery parts; water hardening.

DAIDO ST-1.
M-1545; 0.13-0.18 C, 1.35-1.85 Mn, 0.3-0.6 Si, 0.35 max Cu, bal Fe.
Rolled. 78,000 min TS; 51,000 min YP; 18% min El.
For buildings, bridges, agricultural equipment, structural members, case hardened parts.
Constructional steel, shock resistant.

DAIDO ST-2.
M-1545, 0.15-0.20 C, 1.2-1.5 Mn, 0.30-0.65 Si, 0.35 max Cu, bal Fe.
Rolled: 78,000 min TS; 51,000 min YP; 18% min El.
For buildings, bridges, structural members, agricultural equipment.
Constructional steel, tough.

DAIMLER BEARING METAL.
Eng.; 76 Cu, 3 Sn, 20 Zn, 1 Pb.
For bearings, bushings; corrosion resistant.

DAIRY METAL.
M-252; 68 Cu, 1.5 Sn, 28 Ni, 0.5 Pb, 2.0 flux.
For stainless filters; corrosion resisting.

DAIRYWHITE.
U.S.; Zn, Ni, bal Cu.
For dairy equipment; nickel silver, corrosion resistant.

DALTON FUSIBLE ALLOY.
England, 60 Bi, 15 Sn, 25 Pb.
For fusible alloy, fire extinguishers; M.P. 92°C.

DALZELL STEEL
M-530, 0.4-0.6 C, bal Fe.
For machinery parts, water hardened

DAMAR.
Eng., 76 Cu, 13 Pb, 11 Sn
For bearings; heavy duty

DAMASCITE.
M-211; Fe.
For molded iron parts, machine pads, strength of carbon steel.

DAMASCUS
M-754, Sn, Pb, bal Cu
For bearings.

DAMASCUS
M-73, 0.55 C, 0.25 Cr, 0.90 Mn, 0.20 V, 1.95 Si, bal Fe
For chisels, stamps, cold cutters, punches, shears, oil hardening

DAMASCUS BRONZE
England; 13 Pb, 10 Sn, bal Cu
For bearings, ornaments; plastic bronze

DAMPING
U.S.; 87 Mn, 13 Cu
For alloy for meters; low temperature resistance coefficient.

DAMSTADT BELL METAL
Germany, 74-72.5 Cu, 21.7 21.1 Sn, 2 12 Pb, 0.19-0.05 Fe, 2-2.6 Ni
For bells, corrosion resistant

DANA AUTO SPECIAL
M-1260, M-1261, 6.5 Sb, 3 Cu, bal Sn.
Cast 69 El, 24-25 Brin.
For engine bearings, shock resistant, Babbitt metal

DANA COMMON
M-1260, M-1261, 10 Sn, 13.5 Sb, 0.5 Cu, bal Pb.
Cast 42 El, 28-30 Brin
For transmission bearings; Babbitt

DANA DIESEL
M-1260, M-1261, 2 Pb, 6.5 Cu, 8 Sb, bal Sn
Cast 22 El, 30-31 Brin.
For diesel engine bearings, wear resistant, Babbitt metal.

DANA STEAM.
M-1260, M-1261, 11.5 Sb, 5.5 Cu, 3 Pb, bal Sn.
Cast 19 El, 33-35 Brin.
For steam turbine and generator bearings, wear resistant, Babbitt metal.

DANALLOY-I.
M-1606; Au-Ni-Mg, bal Ag.
Rolled: 82,000 TS, 78,000 YS.
For circuit board retainers, micro circuit back-up plates, relay contacts.

High heat and electrical conductivity.
Non-magnetic. Heat treatable.

DANALLOY-II.
M-1606; Au-Ni-Mg, bal Ag.
Rolled: 66,000 TS; 60,000 YS.
For circuit board retainers, micro-circuit back-up plates, relay contacts.
High heat and electrical conductivity. Non-magnetic. Heat treatable.

DANDELION METAL.
Eng.; 72 Pb, 18 Sb, 10 Sn.
For heavy duty machine bearings and locomotive cross-head linings; high strength Babbitt.

DANISH MINT.
Eng.; 92 Cu, 6 Al, 2 Ni.
For coinage; corrosion resistant.

DANNEMORA.
M-434; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For coining dies; high speed steel.

DANNEMORA NO. O.
M-350; C, W, bal Fe.
For tools, dies; oil hardened.

DANNEMORA AD 95.
M-1067; C, Cr, W, V, bal Fe.
For coining dies, oil hardening.

DANNEMORA BEST.
M-387; 0.9-1.1 C, bal Fe
For drills, reamers, punches, broaches; Type W1; water hardened.

DANNEMORA DB59.
M-608; 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe.
For cutters, hobs, high speed steel

DANNEMORA EXTRA BEST.
M-350, 0.7-1.2 C, bal Fe.
For tools, water hardened.

DANNEMORA SELF-HARDENING.
M-350, C, W, bal Fe.
For tools, cutters, dies; oil hardened.

DANNEMORA STANDARD.
M-387, 0.9-1.1 C, bal Fe
For tools, drills, taps; water hardened.

DANNEMORA VERY BEST.
M-387; 1.0-1.2 C, bal Fe.
For tools, cutters, drills; water hardened.

DARCET FUSIBLE ALLOY.
England; 50 Bi, 25 Sn, 25 Pb.
For boiler safety plugs, fire extinguishers; M.P 93°C.

DARGRAPH.
M-40; 1.45 C, 1.0 Si ,0.25 Mo, bal Fe.
Annealed: 84,500 TS; 49,500 YS, 25 El, 40 RA; 197 Brin.
Heat treated: 218,000-164,000 TS; 177,000-136,000 YS; 8.5-13 El; 14-23 RA; 388-302 Brin.
For wear plates, cams, cutters, dies, punches; oil hardened, wear resistant, graphite steel.

DARK RED GOLD.
Eng.; 50 Au, 50 Cu.
For onranments; corrosion resistant.

DART.
M-73; 0.42 C, 1.05 Si, 0.6 Mn, 3.3 Cr, 2.5 Mo, 0.37 V, bal Fe.
Hardened: 53-59 Rock C.
Hot work die steel with extra high carbon for higher hardness and wear resistance; forging dies, hot forming and press dies.
AISI Type H 10 hot work tool steel.

DARWIN.
M-487, M-40; C, alloy, bal Fe.
For high speed tools, hack-saw blades, tools, cutters; super high speed steel.

DARWIN-1.
M-40; 1.5 C, 12 Cr, 1 Mo, bal Fe.
For drawing and forming dies, punches; Type D2; air hardened, non-deforming.

DARWIN NO. 1 AIR HARDENING.
M-40; 1.45-1.60 C, 11-12 Cr, 0.20-0.35 V, 0.7-0.8 Mo, bal Fe.
For tools, dies; non-deforming.

DARWIN NO. 1 FM.
M-40; 1.5 C, 12 Cr, 0.3 V, 0.8 Mo, 0.2 S, bal Fe.
For dies, tools, punches, crimpers; air or oil hardened, good machinability, resists galling.

DARWIN 5V.
M-40; 1.50 C, 5.0 Cr, 5.0 V, 12.5 W, 5.0 Co, bal Fe.
High speed tool steel, Cr-W-V-Co type, for cutting tools for tough metal; good red hardness and good wear properties; AISI T15.

DARWIN 19.
M-40; 0.7 C, 18 W, 4 Cr, 2 V, 8 Co, bal Fe.
For tools, cutters, reamers; high speed steel.

DARWIN 93.
M-40; 0.30 C, 3.5 Cr, 0.30 V, 10 W, 0.4 Si, bal Fe.
For dies, hot work steel.

DARWIN NO. 505.
M-40, 0.65-0.75 C, 3.75-4.25 Cr, 17-18 W, 1.5-1.75 V, 7-8 Co, 0.7-1.0 Mo, bal Fe.
For tools, cutters; high speed steel.

DARWIN 505 SPECIAL.
M-40; 0.80 C, 4.0 Cr, 2.0 V, 18.0 W, 0.8 Mo, 9.0 Co, bal Fe.
High speed steel cutting tool, tungsten-cobalt type; good red hardness, AISI T5.

DARWIN NO. 1366.
M-40, M-487, 0.70 C, 4.5 Cr, 20 W, 2 V, 12 Co, bal Fe
For lathe and planer tools, form cutters, high speed steel, oil hardened.

DARWIN 3581.
M-40; C, alloy, bal Fe.
For chisels, tough and shock resistant.

DARWIN ACD.
M-40, C, bal Fe.
For dies; water hardening.

DARWIN "ALNI."
M-487; 59 Fe, 4 Cu, 24 Ni, 13 Al.
For permanent magnets; magnetic steel.

DARWIN BEST WARRANTED.
M-40, M-487; high C, bal Fe.
For tools; water hardening.

DARWIN "BKM."
M-40, M-487; C, Ni, Cr, bal Fe.
For Bakelite molds; oil hardening.

DARWIN BRAKE DIE STEEL.
M-40; C, Cr, Mo, bal Fe.
For brake dies; oil hardened.

DARWIN BRAND "H."
M-40; 0.95 C, 0.4 Cr, 0.2 V, 1.0 Mn, bal Fe.
For dies, blanking, forming and trimming dies, taps, broaches; oil hardening, non-deforming; resistant to wear.

DARWIN BRAND L-35.
M-40; C, alloy, bal Fe.
For heading dies.

DARWIN C C.
M-40; 0.55-0.65 C, 0.3-0.4 Cr, 0.60-75 W, 0.55-0.65 Mo, 0.95-1.1 Si, bal Fe.
For tools, punches; oil hardening.

DARWIN C.L. NO. 1.
M-40; C, alloy, bal Fe.
For arc welding electrodes, hard surfacing; coated, tough and abrasion resistant.

DARWIN COBALT MAGNET.
M-40; C, 3 Co, bal Fe.
For permanent magnets.

DARWIN COBALT MAGNET.
M-40; C, 6 Co, bal Fe.
For permanent magnets.

DARWIN COBALT MAGNET.
M-40; C, 9 Co, bal Fe.
For permanent magnets.

DARWIN COBALT MAGNET.
M-40; C, 15 Co, bal Fe.
For permanent magnets.

DARWIN COBALT MAGNET.
M-40; C, 35 Co, bal Fe.
For permanent magnets.

DARWIN C V.
M-40; 1.1-1.15 C, 0.2-0.4 Cr, 0.25-0.35 V, bal Fe.
For tools, taps, drills; water hardening.

DARWIN D-93.
M-40, M-487; C, alloy, bal Fe.
For hot working dies and tools; hot die steel.

DARWIN "DCI."
M-40, M-487; C, alloy, bal Fe.
For electrical equipment, magnetic parts; magnetic alloy.

DARWIN DUREX.
M-40, M-487; high C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, cutters, reamers, dies, gauges, punches; high speed steel.

DARWIN EE.
M-40; 1.35 C, 0.15 Cr, 4.0 W, 0.35 V, bal Fe.
For cutters, shears, tools; water hardening.

DARWIN EXTRA QUALITY.
M-40; M-487; 1.0 C, bal Fe.
For drills, taps, tools, cutters, reamers; Type W1, water hardened.

DARWIN EXTRA SPECIAL.
M-40, M-487; 1.1 C, bal Fe.
For drills, taps, hobs, reamers; Type W1; water hardened.

DARWIN EXTRA TOUGH.
M-40; C, alloy, bal Fe.
For punches, chisels, pneumatic tools; Type S6; oil hardened, shock resistant.

DARWIN FLAME HRD.
M-40; 0.50 C, 1.2 Mn, 0.5 Si, 1.4 Cr, 0.1 V, 0.4 Mo, bal Fe.
Air hardening tool steel for shafts, arbors.

DARWIN H.A.W.
M-40; 0.35 C, 5 Cr, 0.4 V, 1.5 Mo, bal Fe.
For shears, punches, hot work tools; Type H11; hot work steel.

DARWIN H.W.S.
M-40; 0.35 C, 5 Cr, 0.4 V, 1.5 W, 1.5 Mo, bal Fe.
For dies, punches, hot work tools; Type H12; hot work steel.

DARWIN I W I.
M-40; 0.40 C, 3 Cr, 9-10 W, 0.2-0.3 V, bal Fe.
For tools, dies, punches; hot work steel.

DARWIN LOW AIR.
M-40; 0.75 C, 2.0 Mn, 0.3 Si, 1.0 Cr, 1.35 Mo, bal Fe.
Air hardening tool steel; AISI A6.

DARWIN M3.
M-40; 1.0 C, 4 Cr, 2.7 V, 6 W, 5 Mo, bal Fe.
For reamers, drills, taps, lathe and planer tools; Type M3; high speed steel.

DARWIN MT-6.
M-40; 0.85 C, 6 W, 4 Cr, 1.5 V, 6 Mo, bal Fe.
For cutters, tools; high speed steel.

DARWIN N-32.
M-40; 0.38 C, 3-4 Ni, 0.6 Mn, bal Fe.
Oil hardened.
For chisels; oil hardened.

DARWIN OHT.
M-40, M-487; 0.9 C, 1.0 Mn, 0.5 Cr, 0.5 W, bal Fe.
For crimpers, punches, jaws, dies, cutters; Type O1; non-deforming, oil hardened.

DARWIN P-20.
M-40; 0.30 C, 0.75 Cr, 0.25 Mo, bal Fe.
Oil or water hardening tool steel for molds; AISI P20.

DARWIN PRK-33.
M-40; 3.7 C, 13.5 Cr, bal Fe.
For welding electrodes; air hardening.

DARWIN SPECIAL
M-40; 1 2 C, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, taps, hobs, reamers, cutters; Type W1; water hardened.

DARWIN SPECIAL CARBON.
M-40; 0.9 C, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El, 30 RA; 400 Brin.
For drills, taps, hobs, reamers, lathe cutters; Type W1, water hardened.

DARWIN-SSC
M-40; C, bal Fe
For machine tool parts; water hardened.

DARWIN STANDARD.
M-40; 0.8-1.1 C, 0.25 Si, 0.25 Mn, bal Fe.
Water hardened. 166,000-216,000 TS; 110,000-150,000 YS, 11-15 El; 32-37 RA; 330-600 Brin.
For taps, drills, reamers, punches, stamps, knurls, mandrels.
Type W1 water hardening.

DARWIN TEMPER TOUGH.
M-40; 0.7 C, 0.75 Cr, 1.5 Ni, 0.25 Mo, bal Fe.
For brake dies, bushings, jigs, cams, chucks; Type L6; oil hardened.

DARWIN "TTS."
M-40, M-487; C, W, bal Fe
For tools; oil hardening.

DARWIN WARRANTED.
M-40, M-487; high C, bal Fe.
For tools; water hardening.

DARWIN "W" BRAND.
M-40; 0.45 C, 0.85-0.95 Cr, 1.0 W, bal Fe.
For tools, dies, punches; oil hardening.

DARWINS 6/5/2.
M-487; 0.85 C, 6 W, 4 Cr, 2 V, 5 Mo, bal Fe.
Heat treated: C 63-67 Rock.
For woodworking machine tools, taps, slitting saws, reamers, boring and planing tools, drawing dies.
High speed steel Type M2.

DARWINS 18/8.
M-487; 0.14 max C, 7.5-9.0 Ni, 17.5-19.0 Cr, bal Fe.
Annealed: 78,000 TS; 27,000 YS; 30 El; 130 Brin.
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For food, chemical and brewing process equipment; Type 302; stainless, austenitic.

DARWINS 18/8 (316).
M-487; 0.14 max C, 17.5-19 Cr, 10-12 Ni, 2-3 Mo, bal Fe.
Bars: 78,000 TS; 27,000 YS; 30 El.
For equipment handling sulfite liquors; Type 316; stainless, austenitic.

DARWINS 18/8 (316a).
M-487; 0.08 max C, 17.5-19.0 Cr, 8.5-10.5 Ni, 1.25-2.25 Mo, 0.25-0.40 Ti, bal Fe.
Bars: 78,000 TS; 27,000 YS; 30 El.
For acid resistant chemical plant equipment; Type 316Ti; stainless, austenitic.

DARWINS 18/8 CB.
M-487; 0.10 max C, 17.5-19.0 Cr, 10-12 Ni, Cb = 10 × C, bal Fe.
Bars: 78,000 TS; 27,000 YS, 30 El.
For welded chemical plant equipment, Type 347; austenitic, stainless.

DARWINS 18/8 FZ.
M-487; 0.14 max C, 7.9-9.0 Ni, 17.5-19.0 Cr, 0.2 S, 0.5 max Mo, bal Fe
Bars: 78,000 TS, 27,000 YS; 30 El.
For stainless screw machine products; Type 303, free-cutting, stainless.

DARWINS 18/8 LC
M-487, 0.07 max C, 8.0-10.0 Ni, 17.5-19.0 Cr, bal Fe.
Annealed 78,000 TS; 27,000 YS; 30 El.
Cold drawn· 180,000 TS; 125,000 YS, 10 El; 330 Brin.
For welded chemical plant and dyeing equipment, Type 304; stainless, austenitic.

DARWINS 18/8 Mo
M-487, 0.14 max C, 17.5-19.0 Cr, 8-10 Ni, 3-3.5 Mo, bal Fe.
Bars 78,000 TS, 27,000 YS; 30 El.
For acid resistant equipment; Type 317, stainless, austenitic.

DARWINS 18/8 WDP.
M-487, 0.07 max C, 8-10 Ni, 17.5-19.0 Cr, Ti = 5 × C, bal Fe
Bars: 78,000 TS; 27,000 YS, 30 El
For welded structures and chemical plant equipment; Type 321, austenitic, stainless.

DARWINS 26
M-487, Ni, bal Fe.
For glass-to-metal seals, controlled expansion.

DARWINS 55
M-487; 0.2 max C, 23 Cr, 55 Ni, 4 Mo, 2 W, 10 max Fe, 5 Cu.
For chemical plant and pickling equipment; resists hot or cold H_2SO_4

DARWINS 168.
M-487; 0.75 C, 17 Cr, bal Fe.
For knives, bearings, cutlery, valves; Type 440A; stainless.

DARWINS 426.
M-487; Ni, bal Fe.
For glass-to-metal seals; controlled expansion.

DARWINS 654A.
M-487; 0.1 max C, 60 Ni, 20 Mo, bal Fe.
For chemical plant equipment; resists HCl and H_2SO_4.

DARWINS 655B.
M-487; 0.1 max C, 65 Ni, 27 Mo, bal Fe.
For chemical plant equipment; resists HCl and H_2SO_4.

DARWINS 656C.
M-487; 0.1 max C, 14 Cr, 58 Ni, 17 Mo, 5 W, bal Fe.
For chemical plant and high temperature equipment; resists HNO_3 and HCl.

DARWINS 1031.
M-487; Ni, bal Fe.
For thermostats; controlled expansion.

DARWINS 1366.
M-487; 0.73 C, 20 W, 4.5 Cr, 2 V, 12 Co, bal Fe.
Heat Treated: C 64-66 Rock.
For boring and turning tools, reamers, lathe and planer tools, broaches, milling cutters.
High speed steel Type T6, high red-hardness, abrasion resistant.

DARWIN'S COBALT FAST WORK.
M-487; C, Co, Cr, Mo, bal Fe
For press tools, cutters; oil hardened.

DARWINS D.C.C.M.
M-487; C, alloy, bal Fe.
For punches, crimpers, upsetters; cold work steel.

DARWINS DSC.
M-487, 0.30-0.40 C, 13-14 Cr, 1 max Ni, bal Fe.
Heat treated 100,000 TS; 20 El; 152-255 Brin
For cutlery, knives, valves; hardenable, stainless, EN56D.

DARWIN'S DUROR
M-487; C, alloy, bal Fe.
For files; water hardened.

DARWIN'S EXTRA.
M-487, C, alloy, bal Fe.
For files, water hardened.

DARWINS F.
M-487; Ni, bal Fe
For glass-to-metal seals; controlled expansion

DARWINS HS 22.
M-487, 0.75 C, 22 W, 5 Cr, 2 V, bal Fe.
For roll turning tools, lathe and planer cutters, hacksaws, high speed steel

DARWINS H W 1
M-487; C, alloy, bal Fe.
For pressure casting dies; hot work steel, resists thermal shock

DARWINS H W.2.
M-487, C, alloy, bal Fe.
For pressure casting dies; hot work steel, abrasion resistant

DARWINS H.W 3.
M-487, C, alloy, bal Fe
For extrusion and drawing dies, forging tools; hot work steel, oil hardened.

DARWINS H.W.4
M-487, C, alloy, bal Fe
For die casting dies, hot work steel, resists thermal shock

DARWINS H W.5.
M-487; C, alloy, bal Fe
For hot piercing and forming punches, bolt dies, forging tools; hot work steel, oil hardened.

DARWINS K-ALLOY.
M-487; 0.15 max C, 23 Cr, 23 Ni, 2 Mo, 4 Cu, bal Fe.
For chemical plant equipment; resists H_2SO_4

DARWINS N. 1932.
M-487; C, alloy, bal Fe.
For chisels, punches, upsetters; shock resistant, oil hardened.

DARWINS S61F.
M-487; 0.12 max C, 12-14 Cr, 0.2-0.3 S, 1 max Ni, bal Fe.
Heat treated: 100,000 TS; 20 El; 155-207 Brin.
For pump rods, valves, cutlery, surgical instruments; Type 410F; stainless, free-cutting.

DARWINS S61.
M-487; 0.12 max C, 12-14 Cr, 1 max Ni, bal Fe.
Heat treated: 100,000 TS; 20 El; 155-255 Brin.
For pump rods, valves, cutlery, surgical instruments; Type 410; stainless.

DARWINS S62.
M-487; 0.18-0.25 C, 12-14 Cr, 1.0 max Ni, bal Fe.
Heat treated: 100,000 TS; 20 El; 155-255 Brin.
For surgical instruments, chemical plant equipment; EN56C-D; stainless, hardenable.

DARWINS S62F.
M-487; 0.18-0.25 C, 12-14 Cr, 1 max Ni, 0.2-0.3 S, bal Fe.
Heat treated: 100,000 TS; 20 El; 152-255 Brin.
For screw machine products, bolts, screws; Type 420F; stainless, free-cutting.

DARWINS S80.
M-487; 0.12-0.18 C, 16-18 Cr, 1.6-2.0 Ni, bal Fe
Heat treated: 123,000 TS; 15 El; 248 Brin.
For pumps, fittings, valves; hardenable, stainless, EN57.

DARWINS S80F.
M-487; 0.15-0.25 C, 16-18 Cr, 1-3 Ni, 0.5 max Mo, 0.25 S, bal Fe.
Heat treated: 123,000 TS; 15 El; 248 Brin.
For pumps, fittings, valves; hardenable, stainless, free-cutting.

DARWIN'S TRIPLE LIFE.
M-487; C, alloy, bal Fe.
For files; water hardened.

DARWIN'S T.T.S.
M-487; C, 1.5 W, bal Fe.
For surgical instruments, taps, reamers, drills, cutters, hacksaws; water hardened.

DARWIN'S VANADIA.
M-487; C, W, alloy, bal Fe.
For hacksaw blades; water hardened.

DAUPHINOX-TPMo.
M-1649: 0.25 C, 13 Cr, 0.8 Mo, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El, 55 RA.
Heat Treated: 250,000 TS, 215,000 YS; 8 El; C 52 Rock.
For oil refinery and chemical plant equipment, bearings, cutlery, shafts, surgical instruments, scissors. Corrosion resistant, hardenable.

DAVIGNON.
Eng.; 58 Au, 37 Cu, 5 Al.
For jewelry, ornaments; corrosion resistant.

DAVIS METAL.
M-145; 1.5 Mn, 29 Ni, 2 Fe, 67 Cu, 0.5 C, Si.
Cast: 60,000 TS; 35,000 YS; 18 El; 120 Brin.
For valves and fittings, turbine blades, throttle valves; corrosion and heat resisting.

DAVIS METAL.
M-145; 0.2 C, 0.3 Mn, 1 Mn, 25 Ni, 6 Fe, 67 Cu, 0.8 Pb.
For valves, fittings.

DAWSON.
M-1705; 0.65 C, 0.9 Mn, 2.0 Si, bal Fe.
Shock resisting tool steel, water hardening AISI S4.

DAWSON'S BRONZE.
Eng.; 83.9 Cu, 15.9 Sn, 0.10 Pb, 0.05 As.
Cast: 30,000 TS; 146 Brin.
For journal bearings; very fluid.

DBL.
M-1; 0.80 C, 0.5-0.8 Si, 4.0 Cr, 5.5 W, 1.5 V, 3.5-4.0 Mo, bal Fe.
For tools, cutters; high speed steel.

DBL-2.
M-1; 0.8 C, 0.3 Mn, 0.3 Si, 4 Cr, 2 V, 6 W, 5 Mo, bal Fe.
For tools, cutters; high speed steel.

D.B.L. 2½.
M-1, 1.0 C, 4 Cr, 6.25 W, 2.5 V, 6.25 Mo, bal Fe.
High speed tool steel, W-Mo type for lathe and planer tools, form tools, broaches, drills, reamers, hobs, taps, AISI M3.

D.B.L. 3
M-1; 1.15 C, 4 Cr, 6 W, 3 V, 5.5 Mo, bal Fe.
High speed tool steel, W-Mo-V type for lathe and planer tools, broaches, form tools, hobs, taps, AISI M3.

DC (see FINKL DC).

D-C-33
M-335; 0.33 C, 1.05 Si, 1.55 W, 1.65 Mo, 5.15 Cr, bal Fe
Air hardening; for tools, dies
AISI H12 Hot work steel.

DCM ALLOY
M-937, M-31, M-167, M-1317; 0.08 max C, 15 Cr, 3.5 Ti, 0.08 B, 4.6 Al, 4.5-6.0 Mo, 4-6 Fe, bal Ni
Heat treated 140,000 TS, 116,000 YS; 5 El, 9 RA.
For turbine blades, jet engine components, age hardenable, high stress-rupture strength.

DCN 2W.
M-459, C, Cr, Ni, bal Fe.
22-19 El.
For machinery parts.

DCN 3W.
M-459, C, Cr, Ni, bal Fe
20 El
For machinery parts.

DCN 60
M-459, C, Ni, bal Fe.
For electric resistance wire

DCN 80
M-459; C, Ni, bal Fe.
For electric resistance wire.

DCNA.
M-459, C, Cr, Ni, bal Fe.
8-7 El.
For machinery parts; oil hardened.

DCN EXTRA
M-459, C, Cr, Ni, W, Mo, bal Fe.
16-13 El.
For machinery parts.

DCNO.
M-459; C, Cr, Ni, Mo, bal Fe.
10-8.
For machinery parts; oil hardened.

DCNR.
M-459; 0.38 C, 4.0 Ni, 1.3 Cr, 0.25 Mo, 0.1 V, bal Fe.
For forging dies, hot work rollers; oil or air hardened, tough.

DCN SPEZIAL.
M-459; C, Cr, Ni, W, Mo, V, bal Fe.
15-12 El.
For machinery parts.

D & D SPECIAL O.H.
M-755; 0.7 C, 0.8 Cr, 0.2 Mo, bal Fe.
For tools, dies; oil hardening.

D-DIE.
M-1704; 1.55 C, 11.5 Cr, 0.9 V, 0.8 Mo, bal Fe.
Air or oil hardening cold work tool steel, high carbon-high chromium type.
For punching and trimming dies, gages, broaches.
AISI D2.

DECOBRA.
Eng.; 74.4 Cu, 5.4 Zn, 19 Ni, 0.8 Fe, 0.4 Mn.
For ornamental parts, hardware; corrosion resistant.

DEEFIVE.
M-1097, 60-85 Au, bal Ag, Cu, Pt, Zn.
Cast. 112,000 TS; 1 El, 237 Brin.
For dentures, dental inlays; cast, hard.

DEEFOUR.
M-1097, 60-85 Au, bal Ag, Cu, Pt, Zn.
Cast. 113,000 TS, 1 El, 249 Brin
For dentures; cast, hard.

DEEFOURTEEN.
M-1097, 60-85 Au, bal Ag, Cu, Pt, Zn
Cast: 113,000 TS, 1 El, 243 Brin.
For dental inlays, dentures; cast, hard

DEELITE.
M-1097, 60-85 Au, bal Ag, Cu, Pt, Zn.
Cast 97,000 TS; 2 El; 189 Brin.
For dentures, dental inlays, cast, hard

DEEONE
M-1097; 60-85 Au, bal Ag, Cu, Pt, Zn
Cast: 32,000 TS, 20 El, 65 Brin.
For dental inlays, soft

DEEPEP
M-1097; 60 85 Au, bal Ag, Cu, Pt, Zn
Wrought 154,000 TS, 3 El, 270 Brin.
For dentures, wire.

DEESEVEN
M-1097, 60-85 Au, bal Ag, Cu, Pt, Zn.
Cast 95,000 TS, 1 El, 200 Brin
For dental inlays; cast, hard.

DEESIX
M-1097, 60-85 Au, bal Ag, Cu, Pt. Zn.
Cast 86,000 TS, 2 El, 189 Brin
For dentures, dental inlays; cast, hard

DEETHREE
M-1097, 60-85 Au, bal Ag, Cu, Pt, Zn.
Cast: 106,000 TS, 1 El, 219 Brin.
For dental inlays, dentures; castings, hard.

DEETWO.
M-1097, 60-85 Au, bal Ag, Cu, Pt, Zn.
Cast: 53,000 TS; 18 El, 105 Brin.
For dental inlays

DEFENDER BABBITT.
M-178, 82 Pb, 6.5 Sn, 11 Sb
Cast: 16,100 TS; 7,680 YS; 19.5 Brin.
For bearings; resists shock.

DEFIHEAT.
M-100; 0.30 C, 0.50 Mn, 0.75 Si, 25-30 Cr, bal Fe.
Annealed: 75,000-100,000 TS; 55,000-80,000 YS, 35-23 El; 65-45 RA; 160-200 Brin.
For stainless articles, furnace parts; corrosion and heat resistant.

DEFIRUST.
M-100, 0.12 max C, 0.40 Mn, 0.50 Si, 12-15 Cr, bal Fe.
Annealed: 75,000 TS; 44,000 YS; 37 El; 78 RA; 152 Brin.
Heat treated: 110,000-180,000 TS; 90,000-168,000 YS; 22-10 El; 65-50 RA; 229-352 Brin.
For stainless articles, turbine blades, valves; corrosion resisting, difficulty weldable.

DEFIRUST NO. 410.
M-100; 0.12 max C, 10-13.5 Cr, bal Fe.
For turbine blades; corrosion resistant.

DEFIRUST NO. 416.
M-100; 0.12 max C, 0.5 Si, 12-14 Cr, bal Fe.
For corrosion resistant parts; free machining.

DEFIRUST MACHINING.
M-100, 0.12 max C, 12-15 Cr, 0.50 max Si, 0.25-0.50 S, bal Fe.
Hardened: 122,500 TS; 90,000 YS; 18 El; 56 RA; 239 Brin
Annealed: 76,000 TS; 45,000 YS; 38 El; 62 RA; 156 Brin.
For bolts, nuts, screw machine products, stainless, free machining

DEFIRUST N.
M-100, 0.12 C, 10-13.5 Cr, 2.0 max Ni, bal Fe.
For corrosion resistant parts, corrosion resistant

DEFIRUST SPECIAL.
M-100; 0.12 max C, 0.40 Mn, 0.50 Si, 16-18 Cr, bal Fe.
Annealed: 75,000 TS, 42,000 YS; 37 El, 70 RA, 156 Brin.
Cold drawn: 105,000 TS; 85,000-65,000 YS, 15-23 El, 65-54 RA; 210-170 Brin
For stainless articles, nitric acid equipment, ornamental trim; non-hardenable, corrosion resistant.

DEFIRUST, TURBINE
M-100, C, 11.5-13.0 Cr, bal Fe
Tempered 105,000 TS, 77,000 YS, 23 El, 68 RA. 212 Brin.
For turbine blades, valves, structural and machine parts, corrosion resistant

DEFISTAIN.
M-100, 0.20 max C, 0.50 Mn, 0.50 Si, 17-19 Cr, 7-9 Ni, bal Fe
Annealed: 85,000 TS, 40,000 YS, 61 El, 75 RA, 160 Brin.
Cold worked 85,000-160,000 TS, 34,000-150,000 YS, 61-18 El, 75-52 RA, 135-260 Brin
For stainless articles, chemical apparatus, valves, trim, corrosion resistant, non-magnetic

DEFISTAIN, MACHINING
M-100: C, 18-20 Cr, 8-10 Ni, 0.30 S, bal Fe
Annealed. 90,000 TS, 35,000 YS, 53 El, 64 RA; 150 Brin
Cold drawn. 100,000 TS, 85,000 YS; 35 El; 50 RA; 215 Brin
For valve and pump parts, free machining, stainless.

DEFISTAIN, SPECIAL.
M-100, 0.07 max C, 19 Cr, 9 Ni, bal Fe
Annealed. 90,000 TS, 35,000 YS; 65 El, 70 RA; 142 Brin.
For welded structures especially if annealing after welding is impracticable, stainless, corrosion resistant

DEFISTAIN, SPECIAL.
M-100, 0.20 max C, 19 Cr, 9 Ni.
Annealed: 90,000 TS, 45,000 YS; 60 El; 65 RA; 150 Brin.
For welded structures especially if annealing after welding is impracticable; stainless; corrosion resistant.

DEGUSSA ALLOY.
Eng.; 66 Cu, 34 Zn, traces Fe.
For hardware, lamp fixtures, ornamental parts; yellow brass.

DELAIR.
M-452; 1.0 C, 5.0 Cr, 1.0 Mo, 0.4 V, bal Fe.
Annealed: 105,000 TS; 52,000 YS; 26 El; C 18 Rock.
Heat treated: 253,000 TS; 200,000 YS; 3 El; C 53 Rock.
For blanking and trimming dies, cutters, engravers tools, shear blades, broaches, thread rolling dies.
Type A 2 air hardening tool steel. Tough, wear resistant.

DELAWARE EXTRA.
M-432; 0.60-1.5 C, bal Fe.
For tools and parts, drills; water hardening.

DELAWARE H.S.
M-432; 0.82 C, 5 Mo, 6.5 W, 4 Cr, 2 V, bal Fe.
Heat treated: Rock C 63-67.
For lathe and planer tools, drills, taps, chasers, reamers, drawing dies.
Type M 2 high-speed steel. High toughness and wear resistant.

DELAWARE S.T.
M-432; C, Mn, Si, V, Mo, bal Fe.
Alloy tool steel, shock resisting type.

DELAWARE STANDARD.
M-432; 0.7-1.2 C, bal Fe.
For tools and parts, taps; water hardening.

DELCAR.
M-432; 0.60-1.4 C, bal Fe.
For drills, taps, springs, hobs, reamers, punches; Type W 1; water hardened.

DELCONDEX 10.
M-338; 10 Ni, 0.8 Mn, 0.8 Fe, bal Cu.
Cold drawn: 62,700 TS; 44,800 YS; 14 El; 145 Brin.
For condenser tubes, heat exchangers and fittings; resists impingement corrosion.

DELCONDEX 12.
M-338; 10 5 Ni, 1.4 Fe, 0.8 Mn, bal Cu.
For condenser tubes; corrosion resistant.

DELCONDEX 20.
M-338; 20 Ni, 0.5 Fe, 0.7 Mn, bal Cu.
For condenser tubes, boiler feed water heaters; excellent for brackish water

DELCONDEX 30.
M-338; 31 Ni, 0.8 Fe, 0.8 Mn, bal Cu.
Annealed: 60,500 TS; 20,200 YS; 42 El; 95 Brin.
Cold drawn: 82,900 TS; 67,200 YS; 14 El; 172 Brin.
For marine condenser tubes; resists sea water corrosion.

DELCONDEX 31.
M-338; 30.5 Ni, 0.6 Fe, 0.7 Mn, bal Cu.
For marine condenser tubes; corrosion resistant.

DELCONDEX 32.
M-338; 31 Ni, 2 Fe, 2 Mn, bal Cu.
For condenser tubes for marine construction; resists abrasion and sea water impingement.

DELCONION.
M-338; 5 5.Ni, 1.2 Fe, 0.6 Mn, bal Cu.
Cold drawn: 74,000 TS; 67,000 YS; 3 El; 146 Brin.
For sea water pipes and condensers; good formability.

DELCROME 50V.
M-41, M-1580; 27 Cr, 2.75 C, 0.75 V, bal Fe.
Cast: 51-54 Rc.
High wear resistance, heat treatable for machining.
Hardfacing electrode for cold abrasion application.

DELCROME 450.
M-1580; 12 Cr, 0.2 C, 86 Fe.
Cast: 45 Rock C.
For submerged arc welding; good general properties.

DELCROME-C.
M-1580; 21 Cr, 3.75 C, bal Fe.
Cast: C 54 Rock.
For tappet tips and rocker pads in internal combustion engines.
Wear resistant. Resists mineral abrasion.

DELCHROME R.
M-1580; 30 Cr, 3 W, 6 Mn, 61 Fe.
Cast: 53 Rock C.
For hard facing, especially on wearing parts of earth moving equipment.

DELETOTS ALLOY.
80 Cu, 18 Zn, 2 Mn For brass solder, cartridge cases; extremely ductile.

DELFER.
M-1580; 16.5 Co, 13.5 Cr, 5.5 W, 9 Mo, 2.5 C, bal Fe.
Cast: 100,000 TS; 600 Brin.
For hard facing electrodes for abrasion resisting castings.
Heat and wear resistant.

DELFER B
M-1580, 6 Co, 18 Cr, 3.2 C, 16 Mo, 2 V, bal Fe.
Hard facing electrode; for extreme conditions of abrasive wear by hard gritty particles; hardness 62 Rc.

DELHI GRADE A
M-15, M-76; 16-18 Cr, 0.10 max C, 0.5 max Si, 0.5 Mn, bal Fe
Rolled: 110,000 TS; 10 El; 25 RA; 200 Brin
Annealed 70,000 TS; 45,000 YS, 30 El; 60 RA; 160 Brin.
For ornamental work, tanks, max. operating temperature 1600°F., austenitic, corrosion resistant.

DELHI HARD
M-15, M-1; 17.5 Cr, 1 0 C, 0.12 Ni, 1.13 Si, bal Fe
Annealed 90,000 TS, 40,000 YS, 25 El; 50 RA; 195 Brin.
Heat treated. 225,000 TS, 185,000 YS, 9 El, 25 RA; 420 Brin.
For structures; see Silcrome 17.

DELHI IRON.
M-76, M-15; 16.5-18 Cr, 0.10-0.11 C, 0.75-1.0 Si, bal Fe
For replacing galvanized iron, for roofing, auto body sheets, see Silcrome 17.

DELHI IRON GRADE "S"
M-15, M-1; 11 5-14 Cr, 0.12 max C, 0.5 Si, 0.5 Mn, bal Fe
Annealed: 45,000 TS, 30,000 YS; 30 El; 60 RA; 130 Brin
Heat treated. 130,000 TS, 100,000 YS; 21 El; 68 RA; 235 Brin.
For turbine blades, pump rods, valves, cutlery, machine parts; see Silcrome 12.

DELHI SPECIAL.
M-15; 0.14 C, 0.46 Mn, 0.64 Si, 17 Cr, bal Fe.
At 70°F.: 65,000 TS; 40,000 YS; 32 El; 63 RA.
At 1500°F.: 10,000 TS; 8000 YS; 90 El; 98 RA.
For furnace linings, conveyors, furnace parts; heat and corrosion resistant

DELHI TOUGH IRON.
M-15, M-76; 17 Cr, 1.25 Si, 0.3 Mn, 0.07 C, bal Fe.
For corrosion resisting parts; corrosion resistant; see Silcrome 17.

DELLOY NO. 4.
M-756; Co-Cr-W.
For cutting tools.

DELLOY NO. 6.
M-756; Co-Cr-W.
For cutting tools.

DELLOY NO. 7.
M-756; Co-Cr-W.
For cutting tools.

DELLOY NO. 9.
M-756; Co-Cr-W.
For cutting tools.

DELLOYD
M-756; Co-Cr-W.
For hard facing welding electrodes; heat and corrosion resistant.

DELLOY DC-7.
M-756; WC + Co.
For cutters for iron and nonferrous; sintered carbide.

DELLOY DS-8.
M-756, WC + Co.
For cutters for steel, sintered carbide.

DELLOY G-P.
M-756, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For cutters, tools; high speed steel.

DELORO 1300K.
M-41, 0.05-0.12 C, 0.3-1.0 Mn, 0.5-1.0 Si, 27-29 Cr, 48-52 Co, bal Fe.
Cast 78,000 TS, 46,000 YS; 8 El, 250 Brin.
For furnace parts, grates, quenching baskets, salt bath electrodes.
Good oxidation resistance at 2200°F and excellent thermal shock resistance

DELORO ALLOY 45
M-41, M-1580, 7.5 Cr, 1.5 Fe, 4 Si, 1.5 B, bal Ni.
Cast: 35-42 Rc
Hardfacing electrode for abrasion and corrosion resistance

DELORO ALLOY 50.
M-41; M-1580, 10 Cr, 4 Mo, 4 Si, 1.5 B, bal Ni.
Cast: 49-52 Rc.
Hardfacing electrode for abrasion and corrosion resistance.

DELORO ALLOY 60
M-41, M-1580, 15 Cr, 4.5 Fe, 4.5 Si, 3 B, bal Ni.
Cast: 59-62 Rc.
Hardfacing electrode for abrasion and corrosion resistance.

DELORO ALLOY B
M-41, M-1580, 0.1 C, 29 Mo, 5 Fe, bal Ni.
Cast: 80,000 TS, 22-28 Rc
High corrosion and oxidation resistance for chemical industry.

DELORO ALLOY C.
M-41, M-1580; 17 Cr, 5 W, 0.1 C, 17 Mo, 6 Fe, bal Ni.
Cast: 80,000 TS, 23-31 Rc.
For hardfacing drop forging dies, readily machinable.

DELORO ALLOY RT1.
M-1580; 15 Cr, 4 W, 0.4 C, 53 Ni, 15 Mo, 5 Fe, 7 Nb.
Cast: 300 Brin, approx.
For hardfacing and build-up; corrosion resistant and resistant to abrasive wear and impact at high temperatures.

DELORO PW22.
M-1580; 1.2 Cr, 95 Ni, 2.5 Si, 1.3 B.
Cast: 200-250 Brin, approx.
For hardfacing and build-up; good corrosion resistance; machinable.

DELORO SF40.
M-1580; 7.5 Cr, 1.5 Fe, 4 Si, 1.5 B, bal Ni.
Cast: C 39 Rock.
For hard facing; machinable.
Abrasion and corrosion resistance.

DELORO SF50.
M-1580; 10 Cr, 4 Fe, 4 Si, 1.5 B, bal Ni.
Cast: C 51 Rock.
For hardfacing.
Wear and corrosion resistance.

DELORO SF60.
M-1580; 15 Cr, 4.5 Fe, 4.5 Si, 3 B, bal Ni.
Cast: C 60 Rock.
For hardfacing. Abrasion and corrosion resistant.

DELORO STELLITE 1.
M-41; 33 Cr, 13 W, 2.5 C, bal Co.
Cast: 80,000 TS; 51-58 Rc.
For hardfacing electrode; heat and wear resistant.

DELORO STELLITE 3.
M-41; 30 Cr, 13 W, 2.4 C, bal Co.
Cast: 80,000 TS; 51-58 Rc.
For castings; high abrasion and corrosion resistant.

DELORO STELLITE 4.
M-41; 31 Cr, 14 W, 1 C, bal Co.
Cast: 130,000 TS; 45-49 Rc.
High temperature strength and wear resistant castings.

DELORO STELLITE 6.
M-41; 26 Cr, 5 W, 1 C, bal Co.
Cast: 116,000 TS; 39-43 Rc.
For hardfacing electrode, heat, shock and wear resistant

DELORO STELLITE 7.
M-41, 26 Cr, 6 W, 0.4 C, bal Co.
Cast: 120,000 TS, 30-35 Rc.
Corrosion resistant and high temperature strength with good ductility and resistance to thermal shock.

DELORO STELLITE 8.
M-41; 30 Cr, 0.2 C, 6 Mo, bal Co.
Cast. 120,000 TS, 30-35 Rc
Thermal shock resistant, high temperature strength; corrosion resistant.

DELORO STELLITE 12.
M-41, 29 Cr, 9 W, 1.8 C, bal Co
Cast: 108,000 TS; 47-51 Rc.
For hardfacing electrode, heat and wear resistant.

DELORO STELLITE 20
M-41; 33 Cr, 18 W, 2.5 C, bal Co.
Cast: 80,000 TS; 55-59 Rc.
High abrasion and corrosion resistance.

DELORO STELLITE 100.
M-41; 34 Cr, 19 W, 2.0 C, bal Co.
Cast: 56,000 TS; 61-66 Rc.
Tool bits, milling cutter blades etc.

DELORO STELLITE X-40.
M-41; 25 Cr, 7 W, 0.3 C, 10 Ni, bal Co.
Cast: 96,000 TS; 30-35 Rc.
Corrosion resistant, high temperature strength and resistance to thermal shock.

DELSTEEL ALLOY.
M-432; C, Mn, S, V, Mo, bal Fe.
Alloy tool steel, shock resisting type. AISI S 5.

DELSTEEL ALLOY S.T.
M-432; 0.35-0.42 C, 0.2 V, 0.4 Mn, 0.5 Mo, 0.018 S, bal Fe.
Water quenched: 280,000 TS; 240,000 YS; 9.5 El; 29 RA; 570 Brin.
For chisels, rivet sets, shear blades; tough.

DELTA II.
M-764; 56.0-61.0 Cu, 2.0 max Ni, 0.2-3.0 Mn, 0.5-1.5 Fe, 0-0.5 Sn, 1.3-2.5 Al, 0-0.8 Si, 0-0.8 Pb, bal Zn.
Hard: 85,300 TS; 39,800 YS; 10 El; 140 Brin.
For ship propellers, hardware, bolts, valve stems, fittings.
High strength and corrosion resistance.

DELTA III.
M-764; 56.0-61.0 Cu, 2.0 max Ni, 0.2-3.0 Mn, 1.5 max Fe, 0.5 max Sn, 0.4-1.3 Al, 0.8 max Si, 1.0 max Pb, bal Zn.
Hard: 71,000 TS; 31,300 YS; 12 El; 120 Brin.
For ship propellers, marine hardware, bolts, valve stems, fittings.
High strength and corrosion resistant.

DELTA IV.
M-764; 56.0-61.0 Cu, 0-2.0 Ni, 0.5-3.0 Mn, 0.5-1.5 Fe, 0.5 max Sn, bal Zn.
Hard: 64,000 TS; 40,000 YS; 20 El; 110 Brin.
For ship propellers, marine hardware, bolts, valve stems.
High strength, corrosion resistant.

DELTA ALUMINUM BRONZE CA1.
M-156; 10 Al, 5 Fe, 5 Ni, 0.25 Mn, bal Cu.
Light drawn: 110,000 TS; 67,000 YS; 15 El; 220 Brin.
High strength aluminum bronze, corrosion resistant

DELTA ALUMINUM BRONZE CA2
M-156; 10.5 Al, 4.5 Fe, 4.5 Ni, 0.5 Mn, bal Cu.
Light drawn: 115,000 TS; 45,000 YS, 20 El; 160 Brin.
Strong, more ductile aluminum bronze, corrosion resistant.

DELTA ALUMINUM BRONZE CA3.
M-156; 9.2 Al, 4.2 Fe, 4.2 Ni, 0.25 Mn, bal Cu.
Light drawn: 100,000 TS; 47,000 YS; 25 El, 170 Brin.
For bronze parts subject to shock; 20 ft lb. Izod.

DELTA ALUMINUM BRONZE CA4
M-156; 11.5 Al, 5.5 Fe, 5.5 Ni, 1.5 Mn, bal Cu.
Light drawn: 130,000 TS, 60,000 YS; 5 El, 230 Brin.
For high strength hot-stampings

DELTA ALUMINUM BRONZE CA5.
M-156; 9.6 Al, 2.25 Fe, 1.5 Ni, 0.3 Mn, bal Cu.
Light drawn: 90,000 TS; 47,000 YS, 15 El, 170 Brin.
Wear resistant, for valve guides on internal combustion engines.

DELTA ALUMINUM BRONZE CA6.
M-156; 8.6 Al, 2 Fe, 0.2 Mn, bal Cu.
Light drawn: 90,000 TS; 43,000 YS; 25 El; 160 Brin.
High impact strength; for pump spindles, valve stems, etc.

DELTA ALUMINUM BRONZE CA7.
M-156; 9.6 Al, 2 Fe, 0.25 Mn, bal Cu.
Light drawn: 90,000 TS; 43,000 YS; 25 El; 160 Brin.
For corrosion resistant bolts and hardware.

DELTA ALUMINUM BRONZE CA8.
M-156; 9.4 Al, 0.25 Mn, bal Cu.
Light drawn: 78,000 TS; 37,000 YS; 25 El; 160 Brin.
Resistant to sulphuric acid.

DELTA ALUMINUM BRONZE CA9.
M-156; 10 Al, 0.25 Mn, 1.5 Pb, bal Cu.
Light drawn: 78,000 TS; 36,000 YS; 10 El; 155 Brin.
For machined parts.

DELTA ALUMINUM BRONZE CA10.
M-156, 6.75 Al, 2 Si, bal Cu.
Light drawn: 80,000 TS; 40,000 YS; 25 El; 170 Brin.
High strength machined parts; highly corrosion resistant.

DELTA ALUMINUM BRONZE CA11.
M-156; 6.2 Al, 0.9 Fe, 0.3 Mn, 2.2 Si, bal Cu.
Light drawn: 80,000 TS; 40,000 YS, 35 El.
Izod 25 ft. lbs.; for parts subject to shock.

DELTA ALUMINUM BRONZE CA12.
M-156; 6.2 Al, 0.7 Fe, 0.2 Mn, 2.2 Si, bal Cu
Light drawn: 80,000 TS, 45,000 YS; 35 El.
For parts subject to shock; Izod 30 ft. lbs.; non-magnetic

DELTA ALUMINUM BRONZE CA13.
M-156, 7 Al, bal Cu
Light drawn 67,000 TS; 25,000 YS; 30 El, 120 Brin.
For cold formed components

DELTA ALUMINUM BRONZE CA14
M-156, 10 Al, 3 Fe, 1.5 Ni, 3 Mn, 0.9 Sn, bal Cu.
Light drawn. 170 Brin
Wear resistant, for parts subject to stress corrosion

DELTA ALUMINUM BRONZE CA15.
M-156, 3 Al, 6.75 Ni, 0.5 Mn, bal Cu
Rolled. 90,000 TS, 50,000 YS, 20 El; 180 Brin.
For paper mill beater bars, etc.

DELTA ALUMINUM BRONZE CA16
M-156, 11 Al, 5.5 Fe, 4.5 Ni, 1.5 Mn, bal Cu
For high strength stamped parts.

DELTABRA.
M-338, 77 Cu, 2 Al, 0.03 As, bal Zn
Cold drawn 82,880 TS, 76,160 YS, 8 El
For condenser tubes, tanker heater tubes, resists sea water corrosion

DELTA BRONZE II.
M-156, M-103, 55-65 Cu, 30-44.9 Zn, 0.1-5.0 Fe.
Cast 76,000 TS, 10 El
Extruded: 84,000 TS, 14 El
For tubes, ornamental and sanitary fittings, automobile parts, corrosion resistant.

DELTA BRONZE III
M-156, M-103, 40-98 Cu, 1.8-45 Zn, 0.1-5.0 Fe, 0.1-10.0 Sn.
Cast 49,000 TS, 30 El.
Extruded: 72,000 TS; 29 El.
For solid drawn tubes for hydraulic purposes, condensers, gears, valves, pump parts, corrosion resistant.

DELTA BRONZE NO. VII.
M-156; Cu alloy
For valves, spindles, internal combustion engine parts; heat and corrosion resistant

DELTA BRONZE NO. VIII.
M-156; Cu alloy.
For marine parts, bearings having no casings; shock and wear resistant.

DELTA BRONZE NO. IX.
M-156; Cu alloy.
For bearings, antifriction lining; low frictional resistance.

DELTA BRONZE NO. IXa.
M-156; Cu alloy.
For bearings, antifriction lining; low frictional resistance.

DELTA COLD FORMING BRASS CF1.
M-156; 62.25 Cu, bal Zn.
Annealed: 55,000 TS; 17,000 YS; 50 El; 70 Brin.
Hard drawn: 120,000 TS; 70,000 YS; 4 El; 160 Brin.
For screws, rivets, nails cold formed.

DELTA COLD FORMING BRASS CF2.
M-156; 62.25 Cu, bal Zn.
Annealed: 55,000 TS; 17,000 YS; 50 El; 70 Brin.
Hard drawn: 120,000 TS, 70,000 YS; 4 El; 160 Brin.
Mainly for wood screws.

DELTA COLD FORMING BRASS CF3.
M-156; 63 Cu, 0.15 Si, bal Zn.
Annealed: 55,000 TS; 17,000 YS; 50 El; 70 Brin
Hard drawn: 120,000 TS, 70,000 YS; 4 El; 160 Brin.
Bent and welded into chain links; low fuming, easily welded.

DELTA COLD FORMING BRASS CF4.
M-156, 63.5 Cu, bal Zn.
Annealed: 55,000 TS; 17,000 YS; 50 El; 70 Brin.
Hard drawn· 120,000 TS; 70,000 YS, 4 El; 160 Brin.
Good ductility, for screws, rivets.

DELTA COLD FORMING BRASS CF5.
M-156; 65 Cu, bal Zn.
Annealed. 55,000 TS; 17,000 YS; 50 El, 70 Brin.
Hard drawn. 120,000 TS; 70,000 YS; 4 El; 160 Brin.
For cold forging, cold bending and forming

DELTA COLD FORMING BRASS CF6
M 156, 67 5 Cu, bal Zn.
Annealed 55,000 TS; 17,000 YS, 50 El, 70 Brin.
Hard drawn. 120,000 TS; 70,000 YS, 4 El; 160 Brin
Wire for metallizing.

DELTA COLD FORMING BRASS CF7.
M-156, 70 Cu, bal Zn
Annealed: 45,000 TS, 16,000 YS; 60 El; 60 Brin
Hard drawn 120,000 TS; 70,000 YS, 4 El; 170 Brin
For cold extrusion, spinning.

DELTA COLD FORMING BRASS CF8
M-156, 71 Cu, 0.04 As, bal Zn.
Annealed· 45,000 TS, 16,000 YS, 60 El; 60 Brin.
Hard drawn: 120,000 TS, 70,000 YS; 4 El, 170 Brin.
For redrawing and weaving wire, anti-dezincification.

DELTA COLD FORMING BRASS CF9
M-156, 80 Cu, bal Zn.
Annealed. 45,000 TS; 15,000 YS, 60 El, 60 Brin
Hard drawn· 110,000 TS, 70,000 YS; 4 El, 170 Brin.
Excellent cold working properties.

DELTA COLD FORMING BRASS CF10.
M-156, 85 Cu, bal Zn.
Annealed: 45,000 TS; 15,000 YS; 50 El; 60 Brin.
Hard drawn: 95,000 TS; 70,000 YS; 4 El; 150 Brin.
Excellent cold working properties; Red Brass.

DELTA COLD FORMING BRASS CF11.
M-156; 90 Cu, bal Zn.
Annealed: 40,000 TS; 12,000 YS; 45 El; 55 Brin.
Hard drawn: 80,000 TS; 65,000 YS; 4 El, 130 Brin.
Excellent cold working properties; Gilding brass.

DELTA COLD FORMING BRASS CF12.
M-156; 88 Cu, 1 Sn, bal Zn.
Annealed· 40,000 TS; 11,000 YS; 50 El; 50 Brin.
Hard drawn: 80,000 TS; 60,000 YS; 5 El; 155 Brin.
Excellent cold working properties; Fire Bronze.

DELTA COLD FORMING BRASS CF13.
M-156; 80 Cu, 2 Sn, bal Zn.
Annealed: 55,000 TS; 60 El.

DELTA COLD FORMING BRASS CF21.
M-156; 59 Cu, bal Zn.
Light drawn: 57,000 TS; 36,000 YS; 35 El; 110 Brin.
For windshield frame sections, etc; limited cold bending.

DELTA COLD FORMING BRASS CF22.
M-156; 60.5 Cu, bal Zn.
Light drawn: 60,000 TS; 30,000 YS; 35 El; 110 Brin.
For bending, cold forging, hot working; Muntz metal.

DELTA COLD FORMING BRASS CF23.
M-156; 60.5 Cu, 0.5 Pb, bal Zn.
Light drawn: 55,000 TS; 25,000 YS; 35 El; 100 Brin.
For nut blanking, etc.; leaded Muntz metal.

DELTA COLD FORMING BRASS CF24.
M-156; 60.5 Cu, 1 Pb, bal Zn.
Light drawn: 55,000 TS; 27,000 YS; 30 El; 100 Brin.
For machining and cold forming parts.

DELTA COLD FORMING BRASS CF25.
M-156; 61 Cu, 0.3 Pb, bal Zn.
Drawn: 75,000 TS; 5 El.
For bending and some machining.

DELTA COLD FORMING BRASS CF26
M-156; 63.5 Cu, 0.3 Pb, bal Zn.
Light drawn: 55,000 TS, 40 El.
For cold heading and drilling.

DELTA COLD FORMING BRASS CF27.
M-156, 63 Cu, 1.8 Pb, bal Zn.
Extruded product for subsequent rolling.

DELTA COLD FORMING BRASS CF28
M-156; 65 Cu, 1.1 Pb, bal Zn.
Extruded product for subsequent rolling.

DELTA COPPER C 1.
M-156; ETP or FRHC extruded and drawn 99 9 Cu.
Annealed. 33,000 TS, 15,000 YS; 50 El; 45 Brin.
Hard drawn: 55,000 TS; 50,000 YS; 5 El; 90 Brin.
Wire for rivets, etc.

DELTA COPPER C 2
M-156; ETP or FRHC Hot rolled and drawn 99.9 Cu
Annealed. 33,000 TS; 15,000 YS; 50 El; 45 Brin.
Hard drawn· 55,000 TS, 50,000 YS; 5 El; 90 Brin.
Wire for nails, etc.

DELTA COPPER C 3.
M-156, DHP 99.85 Cu
Annealed: 34,000 TS; 15,000 YS; 50 El; 45 Brin.
Hard drawn: 54 000 TS; 47,000 YS, 10 El, 95 Brin.
Tubes only, for water, gas, etc

DELTA HIGH TENSILE BRASS HT1.
M-156; 57 Cu, 1 Pb, 0.75 Sn, 0.75 Fe, 1.5 Mn, bal Zn.
Light drawn: 80,000 TS; 40,000 YS, 22 El; 135 Brin.
General purpose high tensile brass; for pump rods, valve spindles, etc.

DELTA HIGH TENSILE BRASS HT2.
M-156; 57.5 Cu, 1 Pb, 0.5 Sn, 0.75 Fe, 1 Al, 1.5 Mn, bal Zn.
Light drawn: 80,000 TS; 38,000 YS; 20 El; 120 Brin.
For pump rods, valve spindles; not suitable for plating.

DELTA HIGH TENSILE BRASS HT3.
M-156; 58.25 Cu, 0.65 Pb, 0.9 Sn, 0.9 Fe, 0.6 Al, 0.5 Mn, bal Zn.
Light drawn: 82,000 TS; 40,000 YS; 20 El; 135 Brin.
For pump rods, valve spindles; readily machinable.

DELTA HIGH TENSILE BRASS HT4.
M-156; 58.25 Cu, 0.9 Sn, 0.9 Fe, 0.6 Al, 0.5 Mn, bal Zn.
Light drawn: 82,000 TS; 40,000 YS; 20 El; 135 Brin.
For valve spindles, general marine work.

DELTA HIGH TENSILE BRASS HT5.
M-156; 58 Cu, 0.25 Pb, 1 Sn, 0.75 Fe, 1.5 Mn, bal Zn.
Light drawn: 82,000 TS; 43,000 YS; 20 El; 150 Brin.
For general purpose, plating and soldering.

DELTA HIGH TENSILE BRASS HT6.
M-156; 58 Cu, 1.2 Sn, 1.1 Fe, 0.3 Al, 0.2 Mn, bal Zn.
Light drawn: 72,000 TS; 36,000 YS; 25 El; 135 Brin.
For marine shafts, rolled tubes.

DELTA HIGH TENSILE BRASS HT7.
M-156; 57.5 Cu, 0.75 Sn, 0.75 Fe, 1.25 Mn, bal Zn.
Light drawn: 74,000 TS; 37,000 YS; 25 El; 135 Brin.
For parts subject to shock; Izod 20-25 ft, lbs.

DELTA HIGH TENSILE BRASS HT8.
M-156; 57 Cu, 1 Sn, 1 Fe, 0.75 Al, 1.5 Mn, bal Zn.
Light drawn: 85,000 TS; 42,000 YS; 25 El; 150 Brin.
For high pressure marine fittings.

DELTA HIGH TENSILE BRASS HT9.
M-156; 57 Cu, 0.75 Pb, 0.3 Sn, 1 Fe, 0.75 Al, 0.75 Mn, bal Zn.
Light drawn: 75,000 TS; 40,000 YS; 15 El; 120 Brin.
For special hot stampings.

DELTA HIGH TENSILE BRASS HT10.
M-156; 57 Cu, 0.75 Pb, 0.3 Sn, 1 Fe, 2.5 Al, 1.5 Mn, bal Zn.
For hot stampings; easily machined.

DELTA HIGH TENSILE BRASS HT11.
M-156; 58 Cu, 0.75 Pb, 0.75 Fe, 1.5 Al, 1 Mn, bal Zn.
Light drawn: 78,000 TS; 40,000 YS; 15 El.
For hot stampings; easily machined.

DELTA HIGH TENSILE BRASS HT12.
M-156; 57.5 Cu, 0.85 Pb, 0.65 Fe, 0.3 Al, 1.75 Mn, bal Zn.
Light drawn: 160 Brin.
For conveyer belt segments; hard wearing alloy.

DELTA HIGH TENSILE BRASS HT13.
M-156; 58 Cu, 2.25 Pb, 1 Sn, 0.35 Fe, 0.35 Al, 1.5 Mn, bal Zn.
Light drawn: 72,000 TS; 32,000 YS, 20 El; 115 Brin.
For valve spindles, bearing bushes; free machining.

DELTA HIGH TENSILE BRASS HT14.
M-156; 58.25 Cu, 1.5 Pb, 0.75 Sn, 0.75 Fe, 0.3 Al, 0.75 Mn, bal Zn.
For high pressure gas fittings; free machining.

DELTA HIGH TENSILE BRASS HT15.
M-156; 62 Cu, 0.4 Pb, 0.25 Sn, 1 Al, 0.4 Mn, bal Zn.
For golf ball moulds.

DELTA HIGH TENSILE BRASS HT16.
M-156; 65.8 Cu, 0.85 Sn, 1.4 Fe, 3 Al, 0.6 Mn, bal Zn.
Light drawn: 85,000 TS; 42,000 YS; 20 El; 155 Brin.
Wear and corrosion resistant brass.

DELTA HIGH TENSILE BRASS HT17.
M-156; 67.5 Cu, 1.4 Fe, 4.8 Al, 0.5 Mn, bal Zn.
Light drawn: 98,000 TS; 50,000 YS; 15 El; 185 Brin.
For bearing plates, wear strip.

DELTA HIGH TENSILE BRASS HT18.
M-156; 70 Cu, 2 Fe, 6 Al, 3 Mn, bal Zn.
Light drawn: 110,000 TS; 60,000 YS; 12 El; 220 Brin.
For gears, cams, press slides, etc.

DELTA HIGH TENSILE BRASS HT19.
M-156; 57.25 Cu, 1 Pb, 0.25 Sn, 0.5 Fe, 0.75 Al, 1 Mn, 2 Ni, bal Zn.
For gas water heating equipment; good hot corrosion resistance.

DELTA HIGH TENSILE BRASS HT20.
M-156; 57.25 Cu, 0.5 Pb, 1.5 Al, 2.5 Mn, 0.75 Si, bal Zn.
Light drawn: 90,000 TS; 40,000 YS; 15 El; 155 Brin
For bearings and bushings.

DELTA HIGH TENSILE BRASS HT21.
M-156; 58 Cu, 1.75 Al, 3 Mn, 1 Si, bal Zn.
Light drawn: 80,000 TS; 40,000 YS. 15 El, 130 Brin.
For gearbox components.

DELTA HIGH TENSILE BRASS HT22.
M-156; 60 Cu, 3 Pb, 2.5 Mn, bal Zn.
Resistance alloy; resistivity 17.

DELTA HIGH TENSILE BRASS HT23.
M-156; 56 Cu, 3 Pb, 6.3 Mn, bal Zn.
Resistance alloy; resistivity 20

DELTA HIGH TENSILE BRASS HT24
M-156, 58 Cu, 0.75 Sn, 0.5 Fe, 0.2 Mn, bal Zn.
Drawn. 80,000 TS, 60,000 YS, 15 El; 130 Brin
Metallizing wire.

DELTA, KRUPP.
M-72, 54-56 Cu, 41-42 Zn, 0.7-1.8 Pb, 0.86-1.28 Fe, 0.8-1.4 Mn
For high strength structural castings, tough

DELTAL
M-1356, 0.6-1.4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, 0.3 max Cr, bal Al
Annealed 21,000 TS, 80,000 YS, 24 El, 36 Brin
Hard 32,000 TS, 29,000 YS, 6 El
For structural members.

DELTAL.
M-1548, 0.3-1.5 Si, 0.2-1.5 Mn, 0.5-2.0 Mg, bal Al
Ht. Tr. 56,000 TS, 52,000 YS, 12 El; 120 Brin.
For general structures, scaffolds, rails, booms, water heater tubes.
Heat treatable, good fabricability

DELTA MANGANESE BRASS MB1.
M-156; 57 Cu, 1.25 Mn, 2.25 Pb, bal Zn.
Light drawn. 67,000 TS; 27,000 YS; 30 El, 95 Brin.
Architectural uses; good machinability.

DELTA MANGANESE BRASS MB2.
M-156; 57 Cu, 1.25 Mn, 1.25 Pb, bal Zn.
Light drawn. 67,000 TS; 27,000 YS; 30 El; 95 Brin.
Architectural uses; "warmer" appearance.

DELTA MANGANESE BRASS MB3.
M-156; 55.5 Cu, 1.25 Mn, bal Zn.
Architectural uses.

DELTA MANGANESE BRASS MB4
M-156; 57.75 Cu, 1.25 Mn, bal Zn.
Architectural uses, good cold bending.

DELTA MANGANESE BRONZE MB5.
M-156; 58.5 Cu, 0.35 Mn, 1.25 Fe, 1 Sn, bal Zn.
Light drawn: 70,000 TS; 35,000 YS; 15 El; 115 Brin.
American standard CA675.

DELTAMAX.
M-1; 50 Fe, 50 Ni.
For magnets, choke cores; grain-oriented.

DELTA-MU.
M-1089; 45 Ni, 5 Cr, bal Fe.
For magnetic cores; high electrical resistivity.

DELTA NAVAL BRASS N 1.
M-156; 61.5 Cu, 1.2 Sn, 0.2 Pb, bal Zn.
Light drawn: 55,000 TS; 24,000 YS; 25 El; 110 Brin.
Limited machining and hot stamping; good corrosion resistance.

DELTA NAVAL BRASS N 2.
M-156; 61.5 Cu, 1.2 Sn, bal Zn.
Light drawn: 55,000 TS; 22,000 YS; 30 El; 90 Brin.
For cold forming, instrument components; non-magnetic.

DELTA NAVAL BRASS N 3.
M-156; 58.5 Cu, 0.8 Sn, bal Zn.
Light drawn: 58,000 TS, 27,000 YS; 20 El; 100 Brin.
Good hot stamping, reasonable machinability

DELTA NAVAL BRASS N 4.
M-156; 60.75 Cu, 1.2 Sn, 1.5 Pb, bal Zn
Light drawn 55,000 TS, 20 El; 100 Brin
Good machining alloy.

DELTA NAVAL BRASS N 5.
M-156; 60.25 Cu, 0.75 Sn, bal Zn.
Light drawn: 60,000 TS; 27,000 YS; 25 El, 90 Brin
American standard CA 482

DELTA NAVAL BRASS N 6.
M-156; 60.25 Cu, 0.75 Sn, 0.6 Pb, bal Zn.
Light drawn: 60,000 TS, 27,000 YS, 20 El, 90 Brin.
American standard CA 482.

DELTA NAVAL BRASS N 7.
M-156, 60.25 Cu, 0.75 Sn, 1.5 Pb, bal Zn
Light drawn 60,000 TS, 27,000 YS; 20 El; 90 Brin
American standard CA 485

DELTA NAVAL BRASS N 8
M 156, 58 Cu, 1.2 Sn, 2 Pb, bal Zn
Light drawn 60,000 TS; 25,000 YS, 20 El, 100 Brin
Free machining alloy, also hot-stamping.

DELTA NAVAL BRASS N 9.
M-156, 60 Cu, 1.1 Sn, bal Zn
Drawn 80,000 TS, 15 El, 200 Brin.
For electrical switching parts.

DELTA NAVAL BRASS N 10
M-156, 61 Cu, 1.75 Sn, bal Zn
Light drawn: 60,000 TS, 20 El, 120 Brin
For electrical plug pins

DELTA NICKEL SILVER NS1
M-156; 45.5 Cu, 9.5 Ni, 2 Pb, 0.3 Mn, bal Zn
Light drawn: 90,000 TS, 45,000 YS, 20 El; 150 Brin.
For machining and hot stamping decorative and ornamental parts

DELTA NICKEL SILVER NS2.
M-156; 40 Cu, 13.25 Ni, 1.9 Pb, 2 Mn, bal Zn.
Light drawn. 90,000 TS, 58,000 YS; 15 El; 150 Brin.
For decorative and ornamental parts; colour of sterling silver.

DELTA NICKEL SILVER NS3.
M-156; 46.5 Cu, 9.25 Ni, bal Zn
Light drawn 80,000 TS; 30 El
For window fittings, warm pink color.

DELTA NICKEL SILVER NS4.
M-156; 51.5 Cu, 5.5 Ni, bal Zn.
For decorative purposes; yellow color.

DELTA NICKEL SILVER NS5.
M-156, 45.5 Cu, 9.5 Ni, 2 Pb, bal Zn.
Light drawn: 89,000 TS; 20 El; 130 Brin.
For instrument components; non-magnetic.

DELTA NICKEL SILVER NS6.
M-156; 49.5 Cu, 9.8 Ni, 0.35 Mn, bal Zn.
Rolled: 83,000 TS; 42,000 YS; 18 El; 145 Brin.
Rolled bar and sheet; lead free.

DELTA PHOSPHOR BRONZE PB1.
M-156; 5 Sn, 0.2 P, bal Cu.
Annealed: 60,000 TS; 30,000 YS; 50 El; 90 Brin.
Hard drawn: 130,000 TS; 70,000 YS; 4 El; 200 Brin.
Wire for redrawing, etc.

DELTA PHOSPHOR BRONZE PB2.
M-156; 7 Sn, 0.2 P, bal Cu.
Annealed: 60,000 TS; 30,000 YS, 50 El; 90 Brin.
Hard drawn: 130,000 TS; 70,000 YS, 4 El; 220 Brin.
For springs.

DELTA PHOSPHOR BRONZE PB3.
M-156; 8 Sn, 0.3 P, bal Cu.
Anealed: 60,000 TS, 30,000 YS; 50 El; 80 Brin.
Hard drawn: 130,000 TS; 70,000 YS; 4 El; 230 Brin.
For Fourdrinier wire in paper making.

DELTA PHOSPHOR BRONZE PB4
M-156; 6 Sn, 0.25 P, bal Cu.
Annealed. 60,000 TS; 30,000 YS; 50 El, 90 Brin
Hard drawn 130,000 TS, 70,000 YS; 4 El; 210 Brin
Wire for redrawing, etc.

DELTA PROPELLER BRONZE
M-156; Cu alloy
67,000 TS, 20 El.
For propellers, propeller blades, corrosion resistant, malleable.

DELTA STAMPING BRASS S 1
M-156, 57.25 Cu, 2 Pb, bal Zn
Light drawn: 60,000 TS, 30,000 YS, 20 El; 120 Brin
For general purpose hot brass stampings.

DELTA STAMPING BRASS S 2.
M-156; 59 Cu, 1.75 Pb, bal Zn.
Light drawn 60,000 TS; 25,000 YS; 25 El, 110 Brin.
For hot brass stampings, some cold formability

DELTA STAMPING BRASS S 3
M-156; 59.5 Cu, 2.25 Pb, bal Zn
Light drawn 60,000 TS; 25,000 YS; 25 El; 110 Brin.
For hot brass stampings, improved machinability.

DELTA STAMPING BRASS S 4
M-156, 55 Cu, 2.75 Pb, 0.2 Sn, bal Zn
For gas tap components, etc.

DELTA STAMPING BRASS S 5
M-156, 59 Cu, 1 Pb, bal Zn
Light drawn: 62,000 TS; 30,000 YS; 25 El; 110 Brin.
For hot brass stampings, also cold forming.

DELTA STAMPING BRASS S 6.
M-156; 58.5 Cu, 1.75 Pb, bal Zn
Light drawn 60,000 TS; 30,000 YS; 20 El, 110 Brin.
For hot brass stampings, non-magnetic.

DELTA STAMPING BRASS S 7
M-156, 57.5 Cu, 2 Pb, bal Zn.
Light drawn: 60,000 TS; 30,000 YS; 20 El; 120 Brin
For hot stamped instrument components; non magnetic

DELTA STAMPING BRASS S 8.
M-156, 58.25 Cu, 1.75 Pb, bal Zn.
Light drawn: 63,000 TS, 35,000 YS, 15 El; 120 Brin.
For valve bodies, etc.

DELTA STAMPING BRASS S 9.
M-156; 70 Cu, 1.75 Al, 0.03 As, bal Zn
For hot stamped water fittings; anti-dezincification.

DELTA T II.
M-764, 10 Al, 2 Mn, 2 Fe, bal Cu.
Rolled. 85,000 TS; 42,000 YS; 15 El; 150 Brin.
For paper and chemical industries, pump shafts, valve components
Aluminum bronze. Wear and corrosion resistant.

DELTOXAL.
M-1356; 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al.
Annealed: 28,000 TS; 13,000 YS; 30 El; 47 Brin.
Hard: 42,000 TS; 37,000 YS.
For aircraft and missile and marine parts; corrosion resistant to sea water.

DELTA TURNING AND RIVETING BRASS TR1.
M-156; 61.5 Cu, 2.25 Pb, bal Zn.
Light drawn: 55,000 TS; 35,000 YS; 25 El; 100 Brin.
Standard turning and riveting brass; good machinability.

DELTA TURNING AND RIVETING BRASS TR2.
M-156; 62.5 Cu, 2.25 Pb, bal Zn.
Light drawn: 55,000 TS; 30,000 YS; 25 El; 100 Brin.
Turning and riveting brass; machinable and ductile.

DELTA TURNING AND RIVETING BRASS TR3.
M-156; 60.5 Cu, 1.75 Pb, bal Zn.
Light drawn: 55,000 TS; 35,000 YS; 25 El; 100 Brin.
Good turning, riveting, hot stamping.

DELTA TURNING AND RIVETING BRASS TR4.
M-156; 61.5 Cu, 1.25 Pb, bal Zn.
Light drawn: 55,000 TS, 28,000 YS; 25 El; 100 Brin
Good machining and riveting.

DELTA TURNING AND RIVETING BRASS TR5
M-156; 60.5 Cu, 2.5 Pb, bal Zn.
Light drawn: 55,000 TS, 35,000 YS; 25 El; 100 Brin.
For machined instruments parts; non-magnetic.

DELTA TURNING AND RIVETING BRASS TR6.
M-156, 62.5 Cu, 1.25 Pb, bal Zn
Light drawn: 55,000 TS; 28,000 YS, 25 El; 100 Brin.
For cold shaped instrument parts; non-magnetic.

DELTA TURNING AND RIVETING BRASS TR7
M-156; 63.25 Cu, 1.8 Pb, bal Zn.
Light drawn: 55,000 TS; 30,000 YS. 25 El; 110 Brin
For machining and riveting; high purity.

DELTA TURNING BRASS T 1.
M-156, 57 Cu, 3 Pb, bal Zn.
Light drawn: 60,000 TS; 25,000 YS, 20 El, 120 Brin.
For general purpose machined components.

DELTA TURNING BRASS T 2.
M-156; 57.7 Cu, 2.75 Pb, bal Zn.
Light drawn; 60,000 TS; 25,000 YS; 20 El; 120 Brin.
For machined components; also hot stamping.

DELTA TURNING BRASS T 3
M-156; 57.7 Cu, 3.5 Pb, 0.3 Sn, bal Zn
Light drawn. 60,000 TS, 20 El; 100 Brin.
For high speed machining and intricate slotting and drilling.

DELTA TURNING BRASS T 4.
M-156; 58 Cu, 2 Pb, 0.6 Sn, bal Zn.
For roller bearing cages; good corrosion resistance.

DELTA TURNING BRASS T 5.
M-156; 61.5 Cu, 3.25 Pb, bal Zn
Light drawn: 55,000 TS; 30,000 YS; 25 El; 110 Brin
For automatic machining; also for thread rolling

DELTA TURNING BRASS T 6.
M-156; 65 Cu, 3.25 Pb, bal Zn.
Light drawn: 55,000 TS, 25 El, 110 Brin.
For very fine deep drilling, high purity.

DELTA TURNING BRASS T 7.
M-156; 57.5 Cu, 3 Pb, bal Zn.
Light drawn· 60,000 TS; 25,000 YS; 20 El; 120 Brin.
For machined instrument components; non-magnetic.

DELTA TURNING BRASS T 8.
M-156; 56.5 Cu, 2.25 Pb, bal Zn.
Light drawn: 60,000 TS, 25,000 YS; 20 El; 120 Brin.
For machined components and hot stamping.

DELTA TURNING BRASS T 9.
M-156; 56.25 Cu, 2.75 Pb, bal Zn.
Light drawn: 60,000 TS; 25,000 YS; 20 El; 120 Brin.
For hollow shapes as bolt sections; very good for plating.

DELTA TURNING BRASS T 10.
M-156; 57.5 Cu, 2.5 Pb, 0.5 Al, bal Zn.
Extruded: 55,000 TS; 25,000 YS; 25 El; 100 Brin
For hinges, lock sections; natural bright finish.

DELTA WELDING ALLOY W 1
M-156; 60.5 Cu, 0.4 Si, 0.4 Sn, bal Zn.
As welded· 56,000 TS; 40,000 YS; 20 El; 130 Brin.
For brazing copper and mild steel.

DELTA WELDING ALLOY W 2
M-156; 60.5 Cu, 0.3 Si, bal Zn.
Rod as manufactured: 75,000 TS; 15 El.
For brazing copper and mild steel.

DELTA WELDING ALLOY W 3.
M-156, 59.5 Cu, 0.2 Si, 0.3 Sn, bal Zn.
For brazing copper and mild steel

DELTA WELDING ALLOY W 4.
M-156, 59.5 Cu, 0.25 Si, 0.4 Sn, 0.4 Fe, 0.2 Mn, bal Zn.
Welded 56,000 TS
High tensile brass weld; for brazing copper and cast iron.

DELTA WELDING ALLOY W 5
M-156, 48.5 Cu, 9 Ni, 0.25 Si, 0.4 Mn, bal Zn.
Welded: 60,000 TS
Nickel silver weld metal, for brazing ferrous metals

DELTA WELDING ALLOY W 6
M-156, 48 Cu, 8.5 Ni, 0.25 Si, 0.3 Sn, 0.4 Mn, bal Zn.
Nickel silver weld metal, for brazing ferrous metals

DELTA WELDING ALLOY W 7
M-156, 48 Cu, 10 Ni, 0.15 Si, 0.02 P, bal Zn
Rod as manufactured· 100,000 TS, 56,000 YS, 15 El, 210 Brin
Nickel silver weld metal; for brazing ferrous metals

DELTA WELDING ALLOY W 8
M-156, 58.5 Cu, 0.5 Ni, 0.4 Si, 0.8 Sn, 0.4 Fe, 0.4 Mn, bal Zn
As welded· 60,000 TS
High tensile brass weld, for brazing copper and cast iron.

DELTA WELDING ALLOY W 9
M-156, 57.5 Cu, 0.1 Si, 0.8 Sn, 0.8 Fe, 0.3 Mn, bal Zn
Rod as manufactured 80,000 TS, 170 Brin
High tensile brass weld, for brazing copper and cast iron

DELTA WELDING ALLOY W 10
M-156, 7 Al, 0.4 Si, bal Cu
Welded 67,000 TS
For welding aluminum bronzes

DELTA WELDING ALLOY W 11.
M-156, 9.4 Al; 0.5 Mn, bal Cu.
As welded· 67,000 TS
For welding aluminum bronze, high impact strength

DELTA WELDING ALLOY W 12.
M-156; 9.75 Al, 2.25 Fe, 1.75 Mn, bal Cu.
As welded· 63,000 TS
For welding aluminum bronzes.

DELTUMIN
M-1548; 3.5-5.5 Cu, 0.2-1.5 Si, 0.1-1.5 Mn, 0.2-2.0 Mg, bal Al
Ht Tr.· 70,000 TS; 60,000 YS; 13 El; 135 Brin.
For fittings, hardware, aircraft engine components.
Heat treatable, high tensile and fatigue strength.

DE LUXE-9.
M-1145; 0.9 C, 0.25 Mn, 0.2 Si, bal Fe.
For header dies, reamers.

DE LUXE-10.
M-1145; 1.05 C, 0.25 Mn, 0.2 Si, bal Fe.
For dies, forming tools.

DE LUXE-12.
M-1145; 1.2 C, 0.25 Mn, 0.2 Si, bal Fe.
For cutters; for nonferrous metals.

DEM NO. 1
M-1066; 63 3 Ag, bal Cu.
For silver solder, M.P 1275°F.

DEM NO 2
M-1066; 66 7 Ag, bal Cu.
For silver solder, M.P. 1363°F

DEM NO 10.
M-1066; 22 2 Ag, bal Cu.
For silver solder, M P 1207°F

DEM NO. 22
M-1066; 50 Ag, bal Cu
For silver solder; M P 1255°F

DEM NO 23
M-1066, 60 Ag, bal Cu
For silver solder, M P 1248°F

DEM NO 37
M-1066, 9 Ag, bal Cu
For silver solder, M P 1510°F.

DEM NO 41
M-1066; 71 8 Ag, bal Cu
For silver solder, M P. 1434°F

DEM NO 43
M 1066, 54 Ag, bal Cu
For silver solder, M P 1223°F.

DEM NO 48
M-1066, 17 Ag, bal Cu
For silver solder, M P 1382°F

DEM NO 64
M-1066, 19-20 Ag, bal Cu
For silver solder, M P 1430°F.

DEM NO 65
M-1066, 40 Ag, bal Cu
For silver solder, M P 1233°F

DEM NO 66
M-1066, 64-66 Ag, bal Cu.
For silver solder, M P 1280°F

DEM NO. 69
M-1066, 44-46 Ag, bal Cu.
For silver solder, M P 1250°F.

DEM NO 71
M-1066, 49-51 Ag, bal Cu
For silver solder; M P 1160°F.

DEM NO. 73.
M-1066, 49-51 Ag, bal Cu
For silver solder; M.P 1195°F

DEM NO 102.
M-1066; 41.7 Au, bal Cu
For gold solder, M.P. 1436°F-1508°F.

DEM NO. 104.
M-1066; 41 7 Au, bal Cu.
For gold solder; M.P 1248°F-1318°F

DEM NO. 106
M-1066; 41.7 Au, bal Cu.
For gold solder; M.P. 1378°F-1410°F

DEM NO. 110.
M-1066; 58.3 Au, bal Cu.
For gold solder; M.P. 1395°F-1310°F.

DEM NO. 112.
M-1066; 50 Au, bal Cu.
For gold solder; M.P. 1420°F-1495°F.

DEM NO. 114.
M-1066; 33.3 Au, bal Cu.
For gold solder; M.P. 1360°F-1392°F.

DEM NO. 115.
M-1066; 33.3 Au, bal Cu.
For gold solder; M.P. 1245°F-1310°F.

DEM NO. 119.
M-1066; 25 Au, bal Cu.
For gold solder, M.P. 1350°F-1141°F.

DEM NO. 120.
M-1066, 41.7 Au, bal Cu
For gold solder; M P. 1378°F-1418°F.

DEM NO. 293.
M-1066; 50 Au, bal Cu
For gold solder; M P 1317°F-1255°F

DEM NO. 426
M-1066; 33 3 Au, bal Cu
For gold solder; M P. 1407°F-1522°F.

DEM NO. 429
M-1066, 50 Au, bal Cu.
For gold solder, M.P 1392°F-1373°F.

DEM NO 430.
M-1066, 58 3 Au, bal Cu
For gold solder, M P 1323°F-1248°F

DEM NO 431.
M-1066, 58 3 Au, bal Cu.
For gold solder; M.P 1495°F-1440°F

DEM NO SSFI-70
M-1066; 46 Ag, bal Cu.
For silver solder; M.P. 1171°F

DEM NO SSEI-82
M 1066, 46 Ag, bal Cu
For silver solder; M P 1165°F.

DEMARK
M-1078, Ti C, Co.
For thread gauging dies, sintered carbide.

DEMO BRONZE
61 Cu, 33 Pb, 4-6 Sn, 2-1 Ni
18,000 TS, 3 El; 0 35 RA, 52 Brin.
For bearings, utensils; C.U S.-56,000

DENAVIS.
M-755, 0 7 1 2 C, bal Fe.
For tools, cutters, water hardening.

DENAVIS HIGH SPEED
M-755; 0 7 C, 18 W, 4 Cr, bal Fe
For tools, cutters, reamers; high speed steel.

DENINE
M-435; 1.2 C, 1 5 W, bal Fe
For taps, drawing dies, water hardened.

DENSALLOY
M-1388; 90 W, 6 Ni, 4 Cu.
Sintered · 85,000-115,000 TS; 10-2 El, 400 Brin.
For balance weights, centrifugal clutches; sintered; heavy metal.

DENSE STEEL.
U S.; Cr, Si, Mo, C, bal Fe.
For tools.

DENSIFIED CRU-DIE.
M-38; 0.55 C, 0 9 Mn, 0 3 Si, 0.8 Ni, 1.05 Cr, 0.40 Mo, bal Fe.
Furnished in 4 hardness ranges (269-429 Brin) for forging large sections of tool steels, particularly for dies

DENSITE.
M-1423; 1.4 C, 11-13 Cr, 0.8 Mo, 0.2 min V, bal Fe.
For cutting, forming and trimming dies; air hardened.

DENSITE AH.
M-1423; 1.5 C, 12 Cr, 1 Mo, bal Fe.
For forming and drawing dies, punches; Type D 2; air hardened, non-deforming.

DENSO IRON.
M-95; 3 C, Cr, Mo, bal Fe.
For rolls; chilled iron.

DENTAL BURR (1%W).
M-38; 1.15 C, 1.25 W, bal Fe.
For dental burrs; oil hardening.

DENTAL BURR (3½%W).
M-38; 1.05 C, 0.75 Cr, 3.5 W, bal Fe.
For dental burrs; oil hardening.

DENTALLOY.
M-216; 38.14 Bi, 26.42 Pb, 31.67 Sn, 2.64 Cd, 1 Sb, 0.06 Cu.
Cast: 15 Brin.
For dental castings, models; see "Cerrodent."

DEOXIDIZED COPPER.
M-33; 99.9 + Cu, 0.02 P.
Annealed: 33,000 TS; 10,000 YS; 45 El.
Rolled: 50,000 TS, 45,000 YS, 6 El.
For condensers, evaporators; corrosion resistant.

DEOXIDIZED COPPER 105.
M-141; 99.9 min Cu, 0.02 P.
Hard: 55,000 TS; 50,000 YS; 8 El; 107 Brin.
Soft: 32,000 TS; 10,000 YS; 45 El; 40 Brin.
For deep drawing, water tubes; deoxidized copper.

DEOXIDIZED LEADED COPPER-129.
M-8; 0.80-1.2 Pb, 99.90 min Cu + Pb.
Hard: 51,000-60,000 TS; 46,000-55,000 YS; 14-10 El; 83-100 Brin.
For contact pins and inserts, screw machine products; high thermal and electrical conductivity, free-cutting, corrosion resistant

DEOXOLOY.
M-126.
For general brass and bronze deoxidizer.

DEOXOLOY.
M-1265; Cu alloy.
For deoxidizer for Cu alloys.

DEPAL.
M-757; 2 Cu, 2 Mn, 2 Ni, bal Al.
Cast: 20,000-26,000 TS; 10,000-14,000 YS; 1.5-3.5 El; 55-65 Brin.
For pistons, cylinder heads; age-hardenable.

DEURANCE METAL.
Eng.; 33.3 Sn, 44.5 Sb, 22.2 Cu.
For locomotive bearing; Babbitt

DEUTRO 18/8.
M-1300; 0.80-0.20 C, 2 max Mn, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
Cold drawn: 125,000 TS; 95,000 YS; 25 El; 55 RA; 277 Brin.
For oil refinery and chemical plant equipment; Type 302; stainless, austenitic.

DEUTRO 18/8 MS.
M-1300; 0.10 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 60-50 El; 75-60 RA; 150-190 Brin.
For chemical plant equipment, mixers, agitators, filters; Type 316; stainless, austenitic.

DEUTRO 18/8S.
M-1300; 0.08 max C, 18-20 Cr, 8-11 Ni, 2 max Mn, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 60 El; 135 Brin.
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 330 Brin.
For chemical plant equipment, welded structures; Type 304, stainless, austenitic.

DEUTRO 20/15.
M-1300, 0.2 max C, 22-24 Cr, 12-15 Ni, 2 max Mn, 1 max Si, bal Fe.
Annealed: 85,000-95,000 TS, 40,000-50,000 YS; 45-55 El; 150-185 Brin.
For heat treating boxes, oil refinery and chemical plant equipment; Type 309, austenitic, heat resistant.

DEUTRO 23/20
M-1300; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El, 65 RA; 180 Brin.
At 1200°F: 57,000 TS; 22,000 YS; 32 El, 45 RA
For furnace parts and equipment, heat treating boxes; Type 310, austenitic, heat resistant

DEVILS IRON
M-1, Si, bal Fe.
For core transformers, telephone components; soft magnet, grain oriented

DEW-AMS EXTRA.
M-459, 0.55 C, 0.20 Si, 0.70 Mn, 1.1 Cr, 0.45 Mo, 1.7 Ni, 0.10 V, bal Fe.
Heat treated: 230,000-250,000 TS.
For extrusion dies, stems, punches, rivet sets.
Hot work steel, tough

DEWARD.
M-1, 0.9 C, 1.5 Mn, 0.2 Si, 0.08 Cr, 0.3 Mo, bal Fe
Oil hardened 167,000-180,000 TS, 300-600 Brin
For gages, punches, dies, taps, reamers, cutters, saws
Type 02 non-deforming tool steel. Shock resistant

DEW CMS
M-459, 0.43 C, 0.20 Si, 1.30 Mn, 1.8 Cr, 0.20 Mo, bal Fe.
Heat treated 170,000-190,000 TS
For extrusion dies, liners, containers.
Hot work steel. Resists high pressure

DEW D12L
M-459, 0.55 C, 1.1 Cr, 0.75 Mo, 1.7 Ni, 0.1 V, bal Fe
For press dies and extrusion press stems, heavy duty forging dies, die inserts, upsetters.
Oil or air hardening. Tough, shock resistant

DEW E38Mo
M-459; 0.38 C, 1.0 Si, 5.3 Cr, 1.5 Mo, 0.45 V, bal Fe.
Heat treated: 300,000 TS; 250,000 YS, 6 El; C 55 Rock.
Annealed: 102,000 TS, 66,000 YS; 28 El; B 93 Rock
For aluminum and magnesium die casting dies, cold chamber die casting cylinders and pistons.
Air or oil hardening, good hot hardness, resists thermal shock.

DEW E38V.
M-459; 0.40 C, 1.0 Si, 5.3 Cr, 1.4 Mo, 1.0 V, bal Fe.
Annealed: 100,000 TS; 65,000 YS; 30 El; B 92 Rock.
Heat treated: 280,000 TS; 240,000 YS; 8 El; C 52 Rock.
For oil or water cooled mandrels, extrusion press dies, aluminum die casting dies.
Hot wear resistance, tough and shock resistance.

DEW E38W.
M-459; 0.38 C, 1.2 Si, 5.6 Cr, 1.5 Mo, 0.3 V, 1.5 W, bal Fe.
Annealed: 100,000 TS; 60,000 YS; 28 El; B 92 Rock.
Heat treated: 275,000 TS; 235,000 YS; 8 El; C 52 Rock.
For extrusion presses, die casting dies, forging dies, hot punches, gripper and header dies.
Hot work tool steel. Hot wear resistance. Tough and shock resistant.

DEW ECR.
M-459; 0.70 C, 0.3 Cr, 0.3 Mn, 0.25 Si, bal Fe.
Annealed: 110,000 TS; 60,000 YS; 20 El, 190 Brin.
For axes, hammers, crimpers, springs, punches.
Water hardening.

DEW GSE.
M-459; 0.52 C, 1.3 Si, 0.70 Mn, 13.5 Cr, 13.0 Ni, 1.2 V, 1.3 W, bal Fe.
For extrusion dies up to 1100°F.
Excellent hot hardness. Resists thermal shock.
Hot work steel, austenitic.

DEW SPEZIAL-MS.
M-459, 0.28 C, 1.2 Cr, 1.4 Mo, 0.25 V, 2.3 W, 2.3 Co, bal Fe
For die casting dies.
Hot work tool steel, insensible to hot checking.

DEW SPEZIAL W5
M-459, 0.3 C, 2.35 Cr, 0.55 V, 4.25 W, bal Fe
For hot screw, rivet and nut dies, press mandrels, extrusion dies, hot punches, piercers, shear blades, die casting dies
Hot work tool steel Good hot hardness

DEW WM559
M-459, 0.42 C, 0.60 Si, 0.40 Mn, 1.4 Cr, 0.45 Mo, 0.80 V, 0.45 W, bal Fe
Heat treated 170,000 TS
For extrusion dies, water cooled dummy blocks
Hot work steel.

DEWRANCE CM50
M-1489, 93.25 Ni, 3.5 Si, 2.25 B
For high temperature brazing; flow point 1055°C, high ductility.

DEWRANCE CM52
M-1489, 91.25 Ni, 4.5 Si, 2.9 B
For high temperature brazing; flow point 992°C, resists molten Ni, Hg, and Hg vapor

DEWRANCE CM53.
M-1489, 82 Ni, 7.1 Cr, 4.5 Si, 2.9 B.
For high temperature brazing, flow point 996°C, corrosion resistant

DEWRANCE CM56
M-1489, 71 Ni, 15 Cr, 4.5 Si, 3.5 B
For high temperature brazing; flow point 1030°C, corrosion resistant.

DEXITE NO 14.
M-207; 0.75 C, 0.8 Mn, 0.94 Cr, 1.8 Ni, 0.4 Mo, bal Fe.
Oil hardening tool steels, for dies, drills, shear blades, swaging dies.

DEXITE NO 15.
M-207; C, alloy, bal Fe.
For boring tools, cams, rollers, reamers, gauges; deep hardening.

DEXITE NO. 16.
M-207; C, alloy, bal Fe.
For chisels, shovel teeth, wrenches, crushers; abrasion resistant, water hardening, tough.

DEXITE AH.
M-207; 1.15 C, 0.8 Mn, 0.2 Si, 5.45 Cr, 0.35 V, 1.25 Mo, bal Fe.
Air hardening cold work tool steel, high carbon; good wear resistance.

DEXITE AH MODIFIED.
M-207; 0.55 C, 0.9 Mn, 0.25 Si, 3.5 Cr, 0.25 Ni, 0.25 V, 1.4 Mo, bal Fe.
Air hardenable tool steel.

DEX-TUNG.
M-207; 0.32 C, 0.93 Cr, 0.48 Mo, 0.47 W, bal Fe.
Heat treated: 177,000-265,000 TS; 170,000-208,000 YS; 19-14 El.
For gears, shafting, clutch parts, punches, collets, blacksmith tools; oil hardened.

D.G. ALLOY.
M-2a; 88 Cu, 7.5 Sn, 2.5 Ni, 2 Zn.
25-15 El; 70-80 Brin.
For shafts, staybolts, bearings, stuffing boxes; corrosion resistant.

D.G. CYCLONE
M-1724; 0.75 C, 4.5 Cr, 18 W, 1.25 V, 5.7 Co, bal Fe.
For tools, cutters; high speed steel.

D-H NO. 11
M-44; Cu-Ni.
For thermocouples, extension leads; 30 ohms/c.m.f.

D-H NO. 14.
M-44, 42 Ni, 5 Cr, bal Fe.
Cold drawn: 140,000 TS; 135,000 YS.
For high temperature applications; heat resistant.

D-H NO 30.
M-44, 2.25 Ni, bal Cu.
Rolled: 30,000-60,000 TS.
For corrosion resistant parts; corrosion resistant.

D-H 30 OHM ALLOY
M-44, 2 Ni, bal Cu
For electrical resistance; 30 ohms/c.m.f

D-H NO. 33.
M-44; 0.05 C, 3 Si, bal Ni.
For thermocouples, stable in reducing atmosphere.

D-H NO. 52
M-44; 50-51 Ni, bal Fe.
Wrought: 150,000-70,000 TS.
For glass to metal seal, grid wire; max operating temperature 500°C.

D-H60-OHM ALLOY.
M-44; 5 Ni, bal Cu
For electrical resistances; 60 ohms/c.m.f.

D-H 90 OHM ALLOY.
M-44, 10 Ni, bal Cu.
For electrical resistance, 90 ohms/c.m.f.

D-H NO. 95.
M-44, 10 Ni, bal Cu
For resistances, 90 ohms/c.m.f.

D-H NO. 99.
M-44; 99.5 Ni.
For electrical equipment, resistance thermocouples; heat and corrosion resistant.

D-H NO. 111
M-44; Cu, bal Ni
Rolled. 30,000-60,000 TS.
For corrosion resistant parts, corrosion resistant.

DH NO. 129.
M-44; Ni (pure).
For control of electron emission in the cathode of electronic tubes.
Trace element control.

D-H No. 133.
M-44; 3 Si, bal Ni.
Rolled: 75,000-150,000 TS.
For high temperature applications; heat and corrosion resistant.

D-H NO. 142.
M-44; 41 Ni, bal Fe.
Rolled: 70,000-150,000 TS.
For metal to glass seals, thermostats; matches 8160 glass expansion.

D-H NO. 146.
M-44; 46 Ni, bal Fe.
For electrical equipment; high permeability.

D-H NO. 146.
M-44; 46 Ni, bal Fe.
Rolled: 70,000-150,000 TS;
For seals with ceramic coated materials; special expansion properties.

D-H NO. 152.
M-44; 51 Ni, bal Fe.
Rolled: 70,000-150,000 TS.
For thermostats, glass seals, high frequency transformers; controlled expansion.

D-H180-OHM ALLOY.
M-44; 23 Ni, bal Cu.
For electrical resistance, 180 ohms/c.m.f.

DH NO. 241.
M-44; 19.5 Cr, 1.45 Si, 0.03 C, bal Ni.
For furnace heating elements, moving belts and conveyors, retorts.
High heat and oxidation resistant

DH NO 242.
M-44; 0.03 C, 1.2 Si, 19 5 Cr, 1.1 Cb, bal Ni.
For thermocouples, conveyor belts; high heat resistant; stable in reducing atmosphere.

DH NO 243.
M-44; 19.50 Cr, 1.45 Si, 1.8 Mn, 0.03 C, bal Ni.
For furnace heating elements, furnace belts and conveyors.
High heat and oxidation resistant.

D-H NO. 245.
M-44, 0 05 C, 20 Cr, 5 Al, 1 5 Si, bal Ni.
Wire: 130,000-180,000 TS; 70,000-130,000 YS; 40-10 El; 195-250 Brin.
For heating elements, for operating temperature to 2300°F.

D-H NO. 399.
M-44; 0.15-0.25 Si, bal Ni.
For cathode nickel; heat resistant; active type

D-H NO. 446.
M-44; 28 Cr, bal Fe.
For glass-to-metal seal; heat resistant.

DH NO. 499.
M-44; 100 Ni plus trace elements control for control of electron emission in the cathode of electron tubes.
For electron tube cathodes. Passive type.

DH NO. 520.
M-44; 35.0 Ni, 21.5 Cr, 2.0 Si, 1.0 Cb, 0.05 C, bal Fe.
For furnace heating elements, furnace belts and conveyors.
High heat and oxidation resistance.

DH NO. 525
M-44; 35 Ni, 19.5 Cr, 1.45 Si, 0.05 C, bal Fe.
Rolled: 150,000-70,000 TS; 35 El.
For high temperature resistors.
Heat resistant to 800°C.

D-H NO. 599.
M-44; 0.15-0.25 Si, bal Ni.
For cathode nickel; active type.

D-H NO. 799.
M-44; 0.12-0.20 Si, bal Ni.
For cathode nickel; active type.

D-H NO. 899.
M-44; 0 02-0.07 Si, bal Ni.
For cathode nickel; normal type.

D-H NO 999.
M-44; Ni.
For cathode nickel; passive type.

D-H A-NICKEL.
M-44; Ni
For magnetostriction, jewelry, mechanical parts.

D-H D-NICKEL.
M-44; 4-5 Mn, bal Ni.
For heating element lead wire, lamp fuse leads.

D-H DURANICKEL.
M-44; 93.5 Ni, 0 35 Fe, 0.3 Mn, 0.5 Si, 0.15 C, 4 5 Al
Wrought: 90,000-250,000 TS; 30,000-150,000 YS; 50-2 El; 65-15 RA, 140-380 Brin.
For electrical equipment, Z-Nickel Type A.

D-H-E-NICKEL
M-44; 2 Mn, bal Ni.
For lead wire lamp bulbs, grid wire radio tubes.

D-H Ni-HARD
M-1016; 4 5 Ni, 3.2 C, 1 5 Cr, 1 0 Si, bal Fe.
For ball and rod mill liners, pump casings, impellers; heat resistant castings.

D-H NIROSTA
M-44, 9 Ni, 18 Cr, bal Fe
Wrought 250,000 80,000 TS
For heat and corrosion resistant parts, heat and corrosion resistant, max operating temperature 800°C.

D-H NO. R. 63.
M-44, 4 Mn, 1 Si, bal Ni.
Wrought: 175,000-70,000 TS.
For spark plug electrodes, resistances; heat resistant to 750°C.

D-H PERMANICKEL
M-44, 0 2-0 6 Mn, 0.6 max Fe, 0.4 max C, 0.35 max Si, bal Ni
Age-hardened 180,000-230,000 TS; 130,000-175,000 YS; 10-2 El.
For springs, Z-Nickel Type B

D-H-S BRONZE NO 1
M-758, 62-66 Cu, 4.5-7.0 Al, 2.0-3.5 Fe, 3.0-4.0 Mn, bal Zn.
120,000 TS, 95,000 YS; 12 El; 12 RA, 240 Brin
For gears, bearings, valve stems; resists acid, wear and shock

D-H-S BRONZE NO. 2.
M-758; 62-66 Cu, 4.5-7.0 Al, 2 0-3.5 Fe, 3.0-4.0 Mn, bal Zn
115-000-120,000 TS, 90,000-95,000 YS; 12-16 El; 12-19 RA; 235-275 Brin
For worm gears, rolling mill housing nuts; resists acid, wear and shock.

D-H-S BRONZE NO. 3
M-758, 62-66 Cu, 4.5-7.0 Al, 2 0-3.5 Fe, 3.0-4 0 Mn, bal Zn.
105,000 TS; 60,000 YS; 17 El; 17 RA; 200 Brin.
For gears, bearings, resists acid, wear and shock.

D-H-S BRONZE NO. 4.
M-758; 62-66 Cu, 4.5-7.0 Al, 2.0-3.5 Fe, 3.0-4.0 Mn, bal Zn.
90,000 TS; 45,000 YS; 25 El; 25 RA; 185 Brin.
For gears, bearings; resists acid, wear and shock.

D-H Z-NICKEL.
M-44; 0.3 max C, 4.0-4.75 Al, bal Ni.
For high temperature applications; two types, see Duranickel or Permanickel.

DIABOLIQUE SATAN NO. 2.
M-1043; 1.15 C, 1.9 W, 0.45 Cr, bal Fe.
For cutters, tools; fast finishing tool steel; 115WC19.

DIALLIST.
M-1010; Ni-Al-Co-Fe.
For permanent magnets; high corercive force.

DI-ALLOY.
M-1080; Al, Cu, bal Zn.
For die castings.

DIALLOY.
M-820; C, Mn, Cr, Ni, Mo, bal Fe.
For battering tools, punches, high impact and fatigue resistance.

DIALOX.
M-1246; Al_2O_3
For cutting tools, wear parts; ceramic aluminum oxide.

DIALOY
M-349; 50 Bi, bal Pb, Sn, Cd.
For dental tooth impressions, dental bridge work, models; expands on solidifying.

DIAMANT
M-1114, 1.3 C, 4.5 W, bal Fe
For tools, dies, cutters; fast finishing steel

DIAMANT
M-1344; 1.42 C, W, V, bal Fe
For fast finishing cutters, engraving tools; water hardened

DIAMANT 3.
M-459, 1.35 C, 0.1 Cr, 0.1 V, bal Fe
For fluting tools; water or oil hardened

DIAMANT 5
M-459; 1.3 C, 0.2 Cr, 4.75 W, bal Fe.
For drawing dies; oil hardening.

DIAMANT 5.
M-1344, 1.3 C, 4.75 W, 0.2 max Cr, bal Fe
For fast finishing cutters, engravers tools; water hardened.

DIAMANT 12.
M-1344; 2.1 C, 11.5 Cr, bal Fe
For blanking and forming dies, oil or water hardened.

DIAMANT 44.
M-1291, M-1114; 1.4 C, 4 W, V, bal Fe.
For fast finishing cutters, engraver's tools
Water hardened, high wear resistance.

DIAMANT BRONZE.
German; Al, Si, bal Cu.
For propellers, hardware; corrosion resistant.

DIAMANTBRONZE.
M-330; 58 Cu, 1 Ni, 1 Mn, 1 Al, 1 Fe, bal Zn.
20 El.
For valve guage fittings; corrosion resistant.

DIAMANT EXTRA.
M-459; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For gun rifling tools, engraving tools; high speed steel.

DIAMANT EXTRA.
M-459; 1.5 C, W, Cr, V, bal Fe.
For fast finishing cutters, engravers tools; water hardened.

DIAMANT EXTRA DURO.
M-616; 1.3 C, 4.5 W, bal Fe.
For tools, dies, cutters; fast finishing steel.

DIAMANT HK.
M-1318; 1.42 C, W, V, bal Fe.
For fast finishing cutters, engravers tools; water hardened.

DIAMANT HOCHHART.
M-1308; 1.42 C, W, V, bal Fe.
For fast finishing cutters, engravers tools; water hardened.

DIAMANT R.
M-459, 1.42 C, W, V, bal Fe.
For fast finishing cutters, engravers tools, water hardened.

DIAMANT R.
M-459; 1.4 C, 0.3 Cr, 0.25 V, 3 W, bal Fe
For grooving tools; cold work steel.

DIAMANT R6.
M-1287, 1.42 C, W, V, bal Fe
For fast finishing cutters, engravers tools; water hardened

DIAMANT SPECIAL
M-1114, M-1291; 1.3 C, 5 W, 1.5 Cr, 0.5 V, bal Fe.
For punches, dies, upsetters, crimpers
Non-deforming, oil or water hardening, shock and wear resistant.

DIAMANT WDSA.
M-1314, 1.42 C, W, V, bal Fe.
For fast finishing cutters, engravers tools; water hardened.

DIAMEND 27
M-677; 0.9-1.1 C, 3.7-4.3 Mn, 0.5-1.0 Si, 11-13 Cr, bal Fe.
Welded. 260-300 Brin.
For hardfacing electrodes; work hardenable, for applications having severe impact

DIAMEND 63.
M-677, 0.9 C, 1.0 Mn, 0.7 Si, 5 Cr, 8.5 Mo, 2 Co, 1.0 V, 2.5 W, bal Fe
Welded 60 Rc
For hardfacing electrodes, high speed tool steel resistant to abrasion, oxidation, light impact to 1000°F.

DIAMEND 305
M-677; 0.1 C, 1.2 Mn, 0.6 Si, 2 Cr, 0.5 Mo, bal Fe.
Welded. 37 Rc
For hardfacing electrodes; pearlitic, machinable steel for build-up and repair of worn machine parts.

DIAMEND 350
M-677; 0.15 C, 1.0 Mn, 0.6 Si, 2 Cr, 0.4 Mo, bal Fe.
Welded: 37 Rc.
For hardfacing electrodes, pearlitic, machinable steel for repair of worn machine parts.

DIAMEND 500.
M-677; 0.4 C, 1.0 Mn, 0.6 Si, 3.5 Cr, 0.5 Mo, bal Fe.
Welded: 55 Rc.
For hardfacing electrodes; martensitic steel to withstand severe abrasion, heavy impact.

DIAMEND 600
M-677; 0.6 C, 1.0 Mn, 0.6 Si, 4 Cr, 0.5 Mo, bal Fe.
Welded: 60 Rc.
For hardfacing electrodes; martensitic steel to withstand severe abrasion with mild impact.

DIAMEND 605.
M-677; 0.6 C, 1.0 Mn, 0.9 Si, 4.5 Cr, 0.7 V, bal Fe.
Welded: 57 Rc.
For hardfacing electrodes; martensitic steel to resist severe abrasion especially on alloy steels.

DIAMEND B.
M-677; 2.0 C, 0.4 Mn, 0.5 Si, 4.5 Cr, bal Fe.
Welded: 55 Rc.
For hardfacing electrodes; martensitic cast iron general purpose electrode.

DIAMITE.
M-278; 3-5 Ni, 1-2 Cr, 3-3½ C, 1.1-1.5 Si, 0.6-0.9 Mn, bal Fe.
Cast: 600-725 Brin.
For liners for chutes, pulverizer hammers, sand pump parts, welding rod for hard facing; alloy white iron; resistant to abrasion.

DIAMITE.
M-790; WC.
For cutting tools; sintered carbide.

DIAMOND NO. 1 B.16.D.
M-1415; 1.25 C, 3 W, 0.15 V, bal Fe.
For drawing and burnishing dies; water hardened, wear resistant.

DIAMOND A.
M-85; 2.2 C, 0.4 V, 11.5 W, bal Fe.
For dies; air hardening.

DIAMOND A.11.
M-1415; 1.7 C, 7 W, bal Fe.
For turning and planing tools, cold drawing dies; fast finishing steel, wear resistant.

DIAMOND ALLOY.
M-759; 45 Co, 40 Mo, 15 Cr.
For cutters, tools; wear and abrasion resistant.

DIAMOND B.
M-85; 2 C, 12 Cr, 0.8 V, 0.4 Mo, bal Fe.
For cold work tools, blanking and forming dies; abrasion resistant, non-deforming, oil hardened.

DIAMOND BRAND.
M-85; 1.7 C, 0.45 Mn, 18.57 Cr, 0.55 V, bal Fe.
For tools, dies, valves, punches; rust and abrasion resisting.

DIAMOND BRONZE.
U.S.; 10 Al, 2 Si, bal Cu.
For pump parts, valves, marine parts. hardware; high strength; corrosion resistant.

DIAMOND D-406.
M-1726; Sintered carbide tool material.
Cutting tools for cast iron; blast nozzles, valve trim.

DIAMOND D-406N.
M-1726; Sintered carbide tool material.
Hard wear resistant material for valve trim; corrosion resistant.

DIAMOND D-409.
M-1726; Sintered carbide tool material.
Cutting tools for machining cast iron.

DIAMOND D-409N.
M-1726; Sintered carbide tool material.
For valve trim; corrosion resistant and erosion resistant.

DIAMOND E.
M-999; 0.6-1.4 C, bal Fe.
For punches, taps, springs, hobs, reamers; water hardened; Type W1.

DIAMOND G BRONZE.
M-741; Pb, Sn, bal Cu.
For bearings, bushings; tough.

DIAMOND M.
M-57; 1.35 C, 0.3 Cr, bal Fe.
For form cutters, tools, dies; water hardened.

DIAMOND OO.
M-261, M-486; 1.6 C, 0.6 Cr, 1 V, 5.5 W, bal Fe.
For finishing tools, form tools, rifling tools; for light cuts.

DIAMOND S.
M-373; C as desired, V optional, 0.025 max P, 0.025 max S, bal Fe.
Water hardening tool steel; AISI W1.

DIAMOND S-1.
M-288; 0.30 C, 18 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

DIAMOND S EXTRA
M-373; C as desired, 0.20 V, bal Fe.
Water hardening tool steel; AISI W2.

DIAMOND T.
M-288; 0.30 C, 12 Cr, 25 Ni, bal Fe.
For heat resistant parts; heat resistant.

DIAMONITE.
M-355; 95.65 W, 3.91 C, bal Fe.
For cutting tools, dies; W_2C + WC.

DIAPHRAGM BRASS
U.S.; 95 Cu, 3 Sn, 2 Zn.
For diaphragms, corrosion resistant.

DIAWELD.
M-72, 4.2-4.4 C, 1.8 Si, 5-6 Mn, 30 Cr, bal Fe.
For hard surfacing electrodes; corrosion resistant.

DIBRONZE.
M-13; Al, Fe, bal Cu
For bending and forming dies, deep drawing dies; Al Bronze, resists wear and galling.

DICA A.
M-69, 0.42 C, 0.75 Mn, 1.0 Cr, 0.2 Mo, bal Fe.
For die casting dies; oil hardening.

DICA B.
M-69; 0.33 C, 4.8 Cr, 0.4 Mn, 1.5 Mo, 1.0 Si, 0.2 V, bal Fe.
For Al die casting dies, hot gripper and header dies; hot work steel, air or oil hardened

DICA B MOD.
M-69, 0.37 C, 1 Si, 5 Cr, 0.5 V, 1.35 Mo, bal Fe.
For upsetters, punches, shears, extrusion tools; hot work steel, oil hardened.

DICA B TOOL ROOM.
M-69, 0.42 C, 1 Si, 4.85 Cr, 0.35 V, 1.5 Mo, bal Fe.
For upsetters, punches, shears; hot work steel, oil hardened.

DICA B-VANADIUM.
M-69; 0.35 C, 5 Cr, 1 V, 1.5 Mo, bal Fe.
For Al and Mg die casting dies; Type H13, oil hardened.

DICA (FLAME HARD) CAST TO SHAPE.
M-69; 0.50 C, 0.75 Mn, 0.25 Si, 1.0 Cr, 0.20 Mo, bal Fe.
Hardness normally 250-300 Brin, or can be annealed.
For automobile bumper dies.
Oil hardening tool steel.

DICAL.
M-760; 12 Si, bal Cu.
For light alloy castings; die cast.

DICK'S BEARING BRONZE.
Eng.; 80 Cu, 10 Pb, 9.2 Sn, 0.8 P.
For bearings.

DICROME.
M-56; 0.60 C, 0.25 Si, 0.60 Mn, 0.60 Cr, bal Fe.
For punches, heading dies, axes; Brit. EN11.

DIDBY'S CUPRITIC ALLOY.
18 Cu, 18 Cr, 72 Fe.

DIECARB.
M-57; 4.6-5.6 C, 65-90 W, 6.25 Co, 0.5-2 Fe, 0-5 Ta.
For blanking and forming dies; shock resistant, sintered.

DIE CAST.
M-336; 0.45 C, 1.0 Si, 1.4 Cr, 2.2 W, 0.2 V, 0.3 Mo, bal Fe.
For aluminum die casting dies; non-warping.

DIE CAST NO. 1.
M-1423; 0.35-0.40 C, 1.3 Mo, 0.5 V, 1.0 Si, 5.2 Cr, bal Fe.
For blanking and forging dies; hot work steel, tough and wear resistant.

DIE CASTING ALLOY "A."
91-84 Sn, 2-9 Sb, 4.5-8 Cu.
For high grade bearings; anti-friction.

DIE CASTING ALLOY "B."
91-84 Sn, 10-17 Sb, 0-1 Cu.
For light duty bearings; anti-friction

DIE CASTING ALLOY "C"
80 Sn, 10 Pb, 10 Sb.
For light duty bearings, anti-friction

DIE CASTING ALLOY "D."
61-5 Sn, 25 Pb, 10.5 Sb, 3 Cu.
For light duty bearings, anti-friction

DIE CASTING ALLOY "E"
74 Zn, 15 Sn, 6 Al, 5 Cu.
For soft work die castings, anti-friction.

DIE CASTING ALLOY "F."
85 Zn, 8 Sn, 4 Cu, 3 Al
For standard die castings, anti-friction

DIE CASTING ALLOY "G"
82-75 Zn, 13.75 Al, 3 Cu
For hard die castings

DIE CASTING ALLOY "H"
46 Zn, 31 Sn, 20 Cu, 3 Sb
For hard die castings.

DIE CASTING ALLOY "I"
86.5 Zn, 10.75 Cu, 2.75 Al
For die castings

DIE CASTING ALLOY "J."
90-83 Zn, 5-11 Cu, 2-5 Al, 1-5 Sn
For die castings.

DIECRAT
M-1149, 0.75 C, 2.0 Mn, 0.3 Si, 1.0 Cr, 1.35 Mo, bal Fe.
Air hardening cold work tool steel; AISI A6.

DIEHARD BB
M-56; 1.5 C, 0.3 Si, 0.3 Mn, 12 Cr, 1.15 V, 1.3 Co, bal Fe
For dies; nondeforming

DIEHARD HCD
M-56; 2.0 C, 0.3 Si, 0.3 Mn, 12.9 Cr, bal Fe
For dies; nondeforming.

DIEHARD LC.
M-56; 0.85 C, 0.3 Si, 0.3 Mn, 12 Cr, 1.15 V, 1.3 Co, bal Fe.
For dies; nondeforming.

DIEHL GR. A.
M-822; 1.0 C, 0.3 Mn, 0.25 Si, bal Fe.
For drills, taps, reamers, hobs, broaches, cutters; Type W1; water hardened.

DIE L.
M-343; 1.45-1.55 C, 12.5-14 Cr, 0.65-0.75 Co, 1.1 V, bal Fe.
For dies, broaches, reamers; non-deforming.

DIEMAC.
M-1680; 3.2 C, 2.6 Si, 1.0 Ni, 0.6 Mo, 0.10 S, 0.10 P, bal Fe.
For casting dies, and permanent molds for Al, Zn, Pb, alloys and plastic casting by gravity or injection molding.

DIENETT GERMAN SILVER.
Eng.; 51 Cu, 32 Zn, 9.5 Pb, 6.4 Ni, 1.6 Sn
For ornamental, hardware novelties; free-cutting.

DIESEL BEARINGS.
Eng.; 80 Sn, 15 Sb, 5 Cu.
For bearings for Diesel engines, Babbitt.

DIESEL OIL ENGINE BABBITT
M-88, 9-11 Sb, 4-6 Cu, bal Sn.
34-4 Brin
For bearings for diesel engines, resists impact loading.

DIE STEEL.
M-373, 0.7 C, bal Fe.
For tools, dies; oil hardened

DIE STEEL NO. 13200
M-373, 0.7 C, bal Fe.
For dies, tools, punches; water or oil hardening

DIETEMPER-1
M-1431; 0.40 C, 1.5 Cr, 0.25 V, 1 Mo, 0.65 Mn, bal Fe
For forging and die casting dies, hot work steel, oil hardened

DIETEMPER-2
M-1431, 0.30 C, 2.75 Cr, 0.30 Mo, 9.5 W, 1.6 Ni, bal Fe
For extrusion dies, rams, punches, hot work steel, oil hardened.

DIEWEAR
M-820, 0.90 C, 1 Mn, 0.5 Cr, 0.5 W, bal Fe
For dies, punches, blanking and forming dies, Type Ol, oil hardened, non-deforming

DIEWELD.
M-607, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tool steel welding electrodes; high speed steel

DI-HARD see XALOY 100

DI HW
M-1287, 1.3 C, 0.20 max Cr, 4.75 W, 0.3 Mn, bal Fe.
For bearings, liners, forming and blanking dies; water hardened

DI-IRON
M-664, 3.2 C, 2.2 Si, 1.5 Ni, 0.8 Cr, 0.15 Mo, bal Fe
Cast: 50,000-60,000 TS, 230-290 Brin
For dies, gears, housings, shafts; cast iron; Tr.S. 4100, Tr.D 320

DILATHERM 15.
M-27, 0.1 C, 36 Ni, bal Fe.
For minimum expansion; low coefficient of expansion.

DILATHERM 85.
M-27.
For heat conductors.

DILATHERM 90.
M-27; 0.1 C, 0.1 Si, 25 Cr, bal Fe.
For glass to metal seals; low coefficient of expansion

DILPHY.
M-771; Ni, bal Fe.
For thermostats; controlled coefficient of expansion; high expansion alloy.

DILVER.
M-104; 46-42 Ni, 54-58 Fe.
For heating elements, leads in electric light bulbs; similar to "Platinite."

DILVER O.
M-104, M-771; 25 Cr, bal Fe.
For glass sealing and for high temperature applications corrosion and heat resistant.

DILVER P.
M-104, M-771; 29 Ni, 17 Co, bal Fe
For glass sealing and for high temperature applications; corrosion and heat resistant.

DILVER Pl.
M-771, nickel alloy.
For electronic equipment; glass sealing alloy.

DILVER T.
M-771; nickel alloy.
For electronic equipment; glass sealing alloy.

DI-METAL NO. 2.
M-815; 3.5-4.5 Al, 2.5-3.5 Cu, 0.02-0.10 Mg, 1.0 max Fe, bal Zn.
Die cast: 48,000-52,000 TS; 8-5 El; 100-105 Brin.
For die castings; general purpose.

DI-METAL NO. 3.
M-815, 3.5-4.3 Al, 0.75-1.25 Cu, 0.03-0.08 Mg, 1.0 max Fe, bal Zn.
Die cast 40,000-41,000 TS; 10-5 El, 75-85 Brin.
For die castings; general purpose.

DI-METAL NO. 5.
M-815; 3.5-4.3 Al, 0.75-1.25 Cu, 0.03-0.08 Mg, 1.0 max Fe, bal Zn
Die cast: 45,000-48,000 TS; 7-3 El; 95-100 Brin.
For die castings; general purpose

DI-MOL.
M-357; 0.8 C, 4.0 Cr, 1.0 V, 1.5 W, 9 Mo, bal Fe
For hacksaw blades, cutters, tools, reamers; high speed steel.

DIMPALLOY.
England; Zn, bal Cu.
For brazing of brasses and bronzes.

DIP METAL.
70 Cu, 0.5 Sn, 0.5 Pb, 0.5 Ni, bal Zn.
Rolled: 35,000 TS; 50 El.
For hardware; free-cutting.

DIPPING BRASS.
U.S.; 67 Cu, 33 Zn.
For deep drawn, spun or stamped parts; high ductility.

DIPPIT.
M-565; 94.5 Pb, 5 Sn, 0.5 Cu.
For high melting solder.

"DI" QUALITY.
M-179; Cu, Mn, bal Zn
Extruded: 66,000 TS; 35,000 YS; 30 El, 25 RA; 120 Brin.
Drawn: 80,000 TS; 44,000 YS; 22 El; 20 RA; 130 Brin.
For hot stampings; manganese bronze.

DI R35.
M-1287; 1.42 C, W, V, 0.30 Mn, 0.25 Si, bal Fe.
For cutters, bearings, forming dies; water hardened.

DIRIGOLD.
M-594; 9-10 Al, 1.1-2.0 Ni, 0-1.7 Sn, bal Cu.
For strong corrosion resisting parts, ornamental castings; corrosion resistant.

DIRILYTE METAL.
M-761; 5 Al, bal Cu.
For tableware; color of gold Al bronze.

DISC ALLOY.
M-1490; 0.04 C, 0.9 Mn, 0.8 Si, 13.5 Cr, 26 Ni, 2.75 Mo, 1.75 Ti, 0.1 Al, bal Fe.
For furnace parts, retorts, combustion chambers, salt pots, heat treating equipment.
Heat and corrosion resistant.

DISCALOY.
M-118; 0.08 max C, 0.35 max Al, 0.6-1.0 Si, 0.6-1.0 Mn, 1.35-1.85 Ti, 2.5-3.5 Mo, 12-15 Cr, 24-28 Ni, bal Fe.
At 70°F. 145,000 TS; 106,000 YS; 19 El; 23 RA.
At 1200°F: 104,000 TS; 91,000 YS; 19 El; 24 RA.
At 1350°F: 82,000 TS; 74,000 YS; 14 El; 26 RA.
For turbine discs, bolts, extrusion dies, non-magnetic gears and pinions; austenitic, heat resistant.

DISCALOY 24
M-118; 0.36 C, 13.5 Cr, 26 Ni, 4 Mo, 1.6 Ti, 1 Si, 1.4 Mn, 0.1 Al, bal Fe.
For jet and gas turbine components; corrosion and heat resistant.

DISQUE E
M-884, 0.45 C, 0.70 Mn, 1.75 Si, bal Fe.
For agricultural equipment, plows; oil hardened, shock resistant

DISQUE H.
M-884, 0.55 C, 0.70 Mn, 1.75 Si, bal Fe.
For agricultural equipment, plows, oil hardened, shock resistant.

DISSTEEL 812
M-357, 1.8 C, 12 Cr, bal Fe.
For dies, non-deforming.

DISSTON 6-N-6
M-357, 0.8 C, 4 Cr, 1 V, 6 W, 6 Mo, bal Fe.
For cutting tools, taps, reamers, broaches; high speed steel

DISSTON 6N6 M2
M-357, 0.82 C, 4.25 Cr, 6.35 W, 5 Mo, 2 V, bal Fe.
For tools, cutters, high speed steel.

DISSTON 66.
M-357, C, 6 W, 6 Mo, 4 Cr, 1 V, 2 Cu, bal Fe
For cutting tools, high speed steel.

DISSTON NO 712
M-357; C, alloy, bal Fe.
For dies, tools, oil hardened

DISSTON NO 819
M-357, 1.25 C, 0.3 Mn, 0.4 Cr, bal Fe.
For lawn mower blades; tough.

DISSTON NO 821.
M-357; 1.2 C, 0.2 V, bal Fe
For tools; water hardening

DISSTON NO 825.
M-357; 0.9 C, 0.4 Mn, 2.25 Cr, bal Fe.
For lawn mower blades; tough.

DISSTON NO. 826.
M-357; 1.3 C, 0.2 V, bal Fe.
For tools; water hardening.

DISSTON NO. 827.
M-357; 0.7 C, 1.6 Ni, 1 Cr, 0.3 Cu, bal Fe.

DISSTON NO. 841.
M-357; 0.4 C, 0.3 Mn, 0.7 Cr, 0.2 Mo, bal Fe.
For lawn mower blades; tough.

DISSTON NO. 842.
M-357; 1.0 C, 0.3 Mn, 1.0 Cr, bal Fe.
For lawn mower blades; oil hardening.

DISSTON NO. 844.
M-357; 0.85 C, 0.8 Cr, 0.25 Si, bal Fe.
For finishing tools, cutters; oil hardened.

DISSTON NO. 871.
M-357; 0.55 C, 0.65 Mn, 0.2 Mo, bal Fe.
For cutting tools; oil hardened.

DISSTON NO. 872.
M-357; 0.35 C, 3.25 Cr, 9.25 W, 0.3 V, bal Fe.
For die casting dies; oil hardening.

DISSTON NO. 873.
M-357; 0.38 C, 5 Cr, 1.25 W, 1.35 Mo, 0.4 V, 1.0 Si, bal Fe.
For punching, shearing and forming dies; oil hardening, hot work steel.

DISSTON NO. 5170.
M-357; 0.7 C, 0.3 Mn, bal Fe.
For lawn mower blades; water hardening.

DISSTON NO. 5190.
M-357; 0.9 C, 0.3 Mn, bal Fe.
For lawn mower blades; water hardening.

DISSTON NO. 5390.
M-357; 0.9 C, 0.7 Mn, bal Fe.
For lawn mower blades; water hardening.

DISSTON NO. 51110.
M-357; 1.1 C, 0.3 Mn, bal Fe.
For lawn mower blades; water hardening.

DISSTON BEST see **BEST (DISSTON)**

DISSTON D 12 CO
M-357; C, alloy, bal Fe
For tools, dies, oil hardening.

DISSTON EXTRA see **EXTRA (DISSTON).**

DISSTON FAST FINISHING
see **FAST FINISHING (DISSTON).**

DISSTON HRW
M-140; 0.95 C, 3.75 Cr, bal Fe
For hot work dies; headers, punches, hot work steel, oil hardened

DISSTON SPECIAL see **SPECIAL (DISSTON).**

DISSTON STAINLESS A
M-357; 0.30 C, 14 Cr, bal Fe
For corrosion resistant parts; corrosion resistant.

DISSTON STAINLESS B.
M-357, 0.60 C, 17 Cr, bal Fe
For corrosion and heat resistant parts; corrosion and heat resistant.

DISSTON STAINLESS D.
M-357; 0.45 C, 1.0 Si, 8.75 Cr, 1.4 Mo, 2.0 Cu, bal Fe.
For stainless parts; stainless.

DISSTON STAINLESS IRON.
M-357; 0.10 C, 12-14 Cr, bal Fe.
For heat and corrosion resistant parts, heat and corrosion resistant

DISSTON STANDARD
see **STANDARD (DISSTON).**

DIVCO 40/60 NO. 180 SOLDER.
M-1121; 40 Sn, 60 Pb
For solder; rosin core.

DIXI NO. 3.
M-344; C, Cr, bal Fe.
For tools and dies.

DIXIE BRAND.
M-365; 0.7-1.4 C, bal Fe.
For tools, dies, drills; water hardening.

DIXOILBRONZ.
M-590; 10 Sn, 2 Zn, bal Cu.
For bearings, bushings, gears, liners; corrosion resistant.

D & J ANTIFRICTION METAL-1.
Eng.; 10 Sb, 80-85 Zn, 5-8 Sn.
For bearings, bushings; Babbitt.

D & J ANTIFRICTION METAL-2.
Eng, 1.6 Cu, 0.4 Sb, 52 Zn, 46 Sn.
For bearings, bushings; Babbitt.

DLP COPPER 120.
M-8; 99.9 + Cu, 0.01 P.
Hard: 45,000 TS; 40,000 YS, 10 El, 75 Brin.
Soft: 33,000 TS; 10,000 YS, 45 El; 42 Brin.
For electrical apparatus, high conductivity.

DM.
M-268; 19.76 Cu, 55.12 Fe, 0.57 Si, 0.87 Ni, 0.29 C, 15.18 Cr.
For corrosion resistant parts; formerly "Durbin"

DM2-45
M-376; 0.30-0.45 C, 0.7-1 Mn, 0.8-1.1 Cr, 0.5-0.7 Mo, bal Fe.
Heat treated: 125,000 TS, 105,000 YS; 16 El; 50 RA, 250 Brin.
For high temperature bolting; resists heat to 950°F.

D & M-7-G
M-40, C, alloy, bal Fe.
For arc welding electrodes, coated, hard surfacing, air hardening

D & M-7-0
M-40, C, alloy, bal Fe.
For arc welding electrodes; coated, self hardening

DM-35
M-376, 0.33-0.40 C, 1.0-1.5 Cr, 0.4-0.6 Mo, 0.55-0.75 Si, 0.45-0.65 Mn, bal Fe.
Heat treated 125,000 TS, 105,000 YS; 16 El, 50 RA, 250 Brin
For high temperature bolting, flanges, fittings, heat resistant

DM-45
M-376, 0.45 C, 0.55 Mn, 1.25 Cr, 0.50 Mo, 0.65 Si, bal Fe.
Normalized 146,000 TS, 108,000 YS, 17.5 El, 47.4 RA, 285 Brin
For gears, forgings, high temperature bolts; heat resistant to 950°F

D & M-92
M-40; C, alloy, bal Fe
For welding rods, shock resistant.

D & M-305.
M-40; C, bal Fe.
For arc welding rods, coated.

D-M-E NO 1.
M-1568, 0.28-0.34 C, 0.6-0.9 Mn, bal Fe.
Plate: 165-185 Brin
For plastic molds
AISI C1030, water hardening

D-M-E NO. 2.
M-1079, 0.42-0.49 C, 0.8-1.1 Cr, 0.15 min V, 0.6-0.9 Mn, bal Fe.
Hardened. 107,500 TS, 88,000 YS; 15.5 El; 33.8 RA; 225-300 Brin.
For die casting mold bases and molds, cavity plates; for Zn die casting.

D-M-E NO. 2H.
M-1568, M-1616; 0.55 C, 1.15 Mn, 0.20 Mo, 0.75 Cr, 0.08 max S, 0.035 max P, 0.25 Si, bal Fe.
Plate: 252-302 Brin; 150,000 TS; 130,000 YS; 20 El; 60 RA.
For plastic molds and die casting dies, holder blocks.
Free-cutting, water or oil hardening.

D-M-E NO. 3.
M-1568, M-1616; 0.36 C, 0.85 Mn, 0.25 Si, 1.0 Cr, 0.2 V, 0.5 Mo, bal Fe.
Plate: 262-311 Brin.
Heat Treated. 206,000 TS; 175,000 YP; 12 El; 418 Brin.
For cavity plates and inserts in die casting dies; zinc die casting dies, aluminum die casting dies.
Type P20 tool steel. Oil hardened.

D-M-E NO. 5.
M-1568, M-1616; 0.35 C, 5.0 Cr, 1.5 Mo, 1.0 V, bal Fe.
Annealed: 209 Brin.
Ht. Tr.: 270,000 TS; 240,000 YS; 10 El; 30 RA; 540 Brin.
For heavy duty compression tools, die casting dies, bolt dies, aluminum extrusion dies, plastic molds.
Vacuum degassed forgings. Type H13 tool steel, ground flat stock.

DMOC WEICH.
M-459; C, Cr, Mo, bal Fe.
14 El.
For machinery parts.

D & M-LT.
M-40; C, alloy, bal Fe.
For arc welding rods; coated

D & M-U2.
M-40; C, alloy, bal Fe
For welding rods; self hardening

DN-1.
M-459; C, Mn, Ni, bal Fe
20-16 El
For machinery parts

DN 3.
M-459; C, Ni, bal Fe.
21-17 El.
For machinery parts.

DN 5.
M-459; C, Ni, bal Fe.
20-16 El
For machinery parts

DN-15.
M-Germany, 0.4-0.6 C, 11-13 Ni, 4-6 Mn, 3 Cr, 0.5 Mo, bal Fe.
For aeronautical structures, gas turbines and internal combustion engines.
Austenitic steel, stainless Coefficient of expansion similar to that of aluminum

DN 15.
M-459; C, Ni, Mn, bal Fe
For non-magnetic parts; non-magnetic.

DN 25.
M-459; C, Ni, Mn, bal Fe.
For non-magnetic parts; non-magnetic.

DN 33.
M-459; C, Ni, bal Fe.
For wire for electrical apparatus.

DN 36.
M-459; C, Ni, bal Fe.
For wire for electrical apparatus.

DN 42.
M-459; C, Ni, bal Fe.
For wire for electrical apparatus.

D.N.S.
M-1724; 0.25-0.35 C, 0.5-0.7 Mo, bal Fe.
Heat treated: 85,000-120,000 TS; 60,000-95,000 YS; 40-31 El; 70-80 RA.
For nuts, gears, shafts, bolts, fasteners; water hardened

D.N.V. (see SIMONDS DNV).

DO-1.
M-1424; Sintered carbide.
For rough cutting and chip removal on cast iron and non-ferrous metals.

DO-2.
M-1424; Sintered carbide.
General purpose cutting tool for cast iron and non-ferrous metals; good resistance to wear.

DO-3.
M-1424, Sintered carbide.
Cutting tool for finish cutting on cast iron and non-ferrous metals.

DO-4.
M-1424, Sintered carbide.
Cutting tool for finishing and precision boring of cast iron and non-ferrous metals

DO-10
M-1424, Sintered carbide
For wear and shock resistance.

DO-11
M-1424; Sintered carbide.
For light impact duty

DO-13
M-1424, Sintered carbide
For medium impact duty

DO-14
M-1424, Sintered carbide
For heavy impact duty

DO-15
M-1424, Sintered carbide
Cutting tools for heavy roughing and interrupted cuts on steel

DO-16
M-1424, Sintered carbide.
For general purpose cutting tool on steel

DO-17
M-1424, Sintered carbide.
Cutting tools for finish cutting steel.

DO-18
M-1424; Sintered carbide.
Cutting tools for finish cutting and precision boring steel.

DO-30
M-1424; Sintered carbide
Cutting tools for rough machining of cast iron and non-ferrous metal.

DO-34
M-1424, Sintered carbide.
Cutting tools for general purpose machining and finishing of steel.

DO-35.
M-1424, Sintered carbide
Cutting tools for heavy, roughing, interrupted cuts on steel.

DO-36.
M-1424; Sintered carbide.
Cutting tools for general purpose machining of steel.

DO ALL AIR HARDENING AISI-A2.
M-1424; 1.0 C, 0.6 Mn, 5.25 Cr, 1.1 Mo, 0.25 V, 0.12 S, bal Fe.
Free machining, precision ground.
For dies, punches, taps, shear blades, reamers, gages.

DO ALL AIR HARDENING AISI-A6.
M-1424; 0.70 C, 2.1 Mn, 1.0 Cr, 1.3 Mo, 0.3 Si, 0.12 S, bal Fe.
Free machining, precision ground.
For blanking and coining dies, shear blades, jigs, and fixtures, punches.

DO ALL LOW CARBON AISI-1018.
M-1424; 0.18 C, 0.6 Mn, 0.2 Si, bal Fe.
Precision ground flat stock.
For patterns, jigs, fixtures, machine parts that do not require heat treatment.

DO ALL M41.
M-1424; 1.10 C, 4.25 Cr, 2.0 V, 6.75 W, 3.75 Mo, 5.0 Co, bal Fe.
High speed steel for cutting tools, tungsten-molybdenum-cobalt type; AISI M-41.

DO ALL OIL HARDENING AISI-O1
M-1424; 0.90 C, 1.2 Mn, 0.3 Si, 0.5 W, 0.5 Cr, 0.2 V, bal Fe.
Precision ground flat stock.
For blanking and trimming dies, cutters, punches, special gages.

DO ALL O H.
M-1424; 1.2 C, 0.55 Cr, 0.33 Mo, 0.75 Mn, bal Fe.
For dies, punches, gages, machine parts; oil hardened

DO ALLOY
M-1424, Co, Cr, W
Cast alloy for general purpose machining, high red hardness and shock resistance.

DO ALL T1
M-1424, 0.73 C, 4.0 Cr, 1.1 V, 18.0 W, bal Fe.
High speed steel, general purpose cutting tools, tungsten type, AISI T1.

DOBLINSCHE ALLOY.
German, 50 max Si, Co, bal.
For chemical construction, corrosion resistant

DOCTOR METAL.
Eng ; 88 Cu, 9.5 Zn, 2.5 Sn.
For corrosion resistant brass parts; corrosion resistant.

DODGE D-1.
M-762; 0.30 C, 1.2 Mn, 0.3 Cr, 0.3 Mo, bal Fe.
Cast: 80,000 TS; 55,000 YS; 22 El, 40 RA; 163 Brin.
For structural parts; water hardening

DODGE D-2.
M-762, 0.15-0.23 C, 0.5-0.7 Mn, 0.4-0.6 Mo, bal Fe.
Cast. 65,000 TS; 37,000 YS; 24 El; 36 RA; 143 Brin
For turbine castings, steam valves and fittings; creep resistant

DODGE D-2 A.
M-762; 0.20-0.28 C, 0.5-0.7 Mn, 0.4-0.6 Mo, bal Fe.
Cast 70,000 TS; 45,000 YS; 22 El; 35 RA; 149 Brin.
For valves, pump casings, turbines; water hardening.

DODGE D-2 B.
M-762; 0.20-0.28 C, 0.5-0.7 Mn, 0.5-0.8 Cr, 0.4-0.6 Mo, bal Fe.
Cast: 70,000 TS; 45,000 YS; 22 El; 35 RA; 143 Brin.
For high temperature applications; resists graphitization at high temperature.

DODGE D-2 C.
M-762; 0.15 max C, 0.5-0.7 Mn, 0.5-1.0 Si, 1.0-1.5 Cr, 0.45-0.65 Mo, bal Fe.
Cast: 70,000 TS; 40,000 YS; 22 El; 35 RA; 153 Brin.
For high temperature applications.

DODGE D3.
M-762; 0.30 C, 0.95 Cr, 0.20 Mo, bal Fe.
Annealed: 88,000 TS; 60,000 YS; 180 Brin.
Heat treated: 137,000 TS; 109,000 YS; 13.5% El; 31.2% RA.
Normalized: 115,000 TS; 95,000 YS; 16% El; 35% RA.
Uses: gears, bolts, shafts, housings, cylinders, fittings.
Type 4130 steel castings.

DODGE D-4
M-762; 0.38-0.44 C, 0.8 Mn, bal Fe.
Cast: 80,000-95,000 TS; 43,000-60,000 YS; 25-15 El; 35-20 RA; 143-174 Brin.
For gears, dies, wear plates, structural castings; water hardened.

DODGE D-5.
M-762, 0.38-0.43 C, 0.75-1.00 Mn, 0.8-1.1 Cr, 0.15-0.25 Mo, bal Fe.
Normalized. 100,000 TS; 65,000 YS; 15 El; 30 RA
For gears, shafts; suitable for nitriding

DODGE D-6.
M-762; 0.60-0.75 C, 0.7-0.9 Mn, bal Fe.
Cast: 85,000-110,000 TS; 45,000-65,000 YS; 20-10 El, 25-15 RA; 175-220 Brin.
For bending, blanking and forming dies; wear resistant

DODGE D-7.
M-762, 0.15-0.20 C, 0.4-0.6 Mn, 4.5-6.0 Cr, 0.4-0.6 Mo, bal Fe.
Cast: 90,000 TS; 60,000 YS; 18 El, 30 RA; 197-240 Brin.
For valve bodies, fittings, pump cases; resists corrosion.

DODGE D-8
M-762; 0.2 max C, 0.5-0.7 Mn, 1.0-1.5 Cr, 0.4-0.6 Mo, bal Fe.
Cast: 70,000 TS; 45,000 YS, 22 El, 35 RA; 153 Brin
For high temperature applications; creep resistant.

DODGE D-9
M-762; 0.15 max C, 0.7 Mn, 0.6 Si, 2-3 Cr, 0.8-1.1 Mo, bal Fe
Cast: 70,000 TS; 45,000 YS, 22 El; 45 RA; 163 Brin.
For high temperature applications, creep resistant.

DODGE D10.
M-762; 0.12 max C, 0.3 max Mn, 0.6 max Si, bal Fe
Cast: 48,000 TS; 29,000 YP; 30 El; 45 RA.
For electrical applications, motor and generator housings, pole pieces, magnetic chucks. High permeability.

DODGE D11.
M-762; 0.10 max C, 0.5-0.8 Mn, 3-4 Ni, bal Fe.
Cast: 70,000 TS; 40,000 YP; 28 El; 50 RA.
For gears, housings, bolts, shafts, fittings, valves, pumps.
Tough, oil hardening, shock resistant. Suitable for use to minus 150°F

DODGE D-12.
M-762, 0.18-0.20 C, 0.55-0.65 Mn, 2.25-2.75 Ni, bal Fe.
Cast: 75,000 TS; 48,000 YS; 24 El; 35 RA; 153 Brin.
For low temperature applications; tough.

DODGE D14.
M-762; 0.40 C, 1.8 Ni, 0.8 Cr, 0.25 Mo, bal Fe.
Annealed: 120,000 TS; 80,000 YS; 240 Brin.
Heat treated: 185,000 TS; 165,000 YS; 380 Brin.
Uses: Gears, pressure vessels, die blocks, bushings, shafts, dies, fittings.
Type 4340 steel castings; Tough, oil hardening.

DODGE DTS 30W8.
M-762; 0.30-0.35 C, 3.0-3.5 Cr, 8.0-9.0 W, 0.20-0.30 V, bal Fe.
At 80°F: 200,000 TS; 173,000 YS; 8% El; 30% RA.
At 1200°F: 108,000 TS; 85,000 YS; 4% El; 9% RA.
Uses: Brass forging dies and inserts, extrusion dies, punches, gripper and swaging dies, permanent molds.
Type H21 hot work steel castings; Red-hard.

DODGE DTS 40.
M-762; 0.35-0.45 C, 0.90-1.20 Si, 4.75-5.25 Cr, 1.20-1.50 Mo, 0.75-1.00 V, bal Fe.
At 80°F: 217,000 TS; 184,000 YS; 8% El, 14% RA.
At 1000°F: 155,000 TS, 125,000 YS; 8.8% El; 24% RA.
Uses: extrusion dies, gripper and header dies, hot punches, mandrels, trimming dies
Type H13 hot work steel. Will not heat check, air hardening. Tough castings.

DODGE DTS 60.
M-762; 0.55-0.65 C, 0.40-0.50 Ni, 1.2-1.3 Cr, 0.50-0.70 Mo, 0.12-0.18 V, bal Fe.
Heat treated. C 42-65 Rock.
For brake dies, bushings, cams, gears, jigs, chucks, shear blades, pinions, trimmer dies.
Tough, oil hardening, wear resistant

DODGE DTS 100.
M-762; 0.95-1.05 C, 5.0-5.5 Cr, 1.0-1.25 Mo, 0.35-0.45 V, bal Fe.
Ht. Tr.: 250,000 TS; 190,000 YS, C 50 Rock
For trimming and deep drawing dies, blanking and forming dies, cams, gauges, master tools, extrusion dies.
Type A2 tool steel. Air hardening Tough castings

DODGE DTS 150
M-762; 1.45-1.55 C, 11.5-12.5 Cr, 0.70-0.90 Mo, 0.18-0.24 V, bal Fe.
Heat treated: 278,000 TS, 214,000 YS; 1 El, C 57 Rock
For blanking and drawing dies, threading dies, burnishing tools, cams, collars, coining and forming dies
Type D-2 tool stel castings Air hardening, abrasion resistant.

DODGE DTS 165.
M-762; 1.55-1.65 C, 12.5-14.0 Cr, 0.3-0.45 V, 0.70-0.90 Mo, 0.70-0.90 Co, bal Fe.
Ht. Tr.: 280,000 TS; 210,000 YS, C 57 Rock
For drawing and blanking dies, cams, punches, gauges, trimming dies. Deep hardening, non-deforming castings. High wear and compression resistance. Type D2 air hardening tool steel.

DODGE DX.
M-762; 0.18-0.24 C, 0.4-0.6 Mn, bal Fe.
Castings: 60,000 TS; 30 000 YS; 26 El, 38 RA; 163 Brin.
For castings for locomotives, valves, fittings; weldable.

DODGE DZ.
M-762, 0.26-0.32 C, 0.6-0.8 Mn, bal Fe.
Cast. 70,000 TS, 30,000 YS, 24 El; 36 RA; 143 Brin.
For general castings, water hardening.

DOFASCO.
M-1033; 0.3 C, 2-3 Ni, 0.9-1.1 Cr, 0.3-0.4 Mo, bal Fe.
For valves, fittings, oil crusher roll shells; high pressure service to 1100°F.

DOFASCOLOY NO. 1.
M-1033; 0.18 max C, 1.0 max Mn, 0.90 max Ni, 0.60 max Cu, bal Fe.
Plate: 63,000 min TS; 42,000 min YS; 24 min El.
For tanks, trailers, trucks, auto frames, mine cars, buckets, stokers, cranes.
High strength, low alloy steel.

DOFASCOLOY NO. 2.
M-1033; 0.15 max C, 1.0 max Mn, 0.90 max Ni, 0.60 max Cu, bal Fe.
Plate: 65,000 min TS; 45,000 min YS; 19 min El.
For tanks, trailers, trucks, auto frames, mine cars, buckets, stokers, cranes, booms
High strength, low alloy steel

DOFASCOLOY 42 W
M-1033, 0.21 C, 1.35 Mn, 0.3 Si, 0.005-0.05 Cb, bal Fe
60,000 min TS, 42,000 min YS
For structural work.
ASTM Standard A 572.

DOFASCOLOY 45 W.
M-1033; 0.22 C, 1.35 Mn, 0.3 Si, 0.005-0.05 Cb, bal Fe
60,000 min TS, 45,000 min YS, 22 min El.
For structural work
ASTM Standard A 572

DOFASCOLOY 50 W
M-1033, 0.23 C, 1.35 Mn, 0.3 Si, 0.005-0.05 Cb. bal Fe
65,000 min TS, 50,000 min YS, 22 min El
For structural work
ASTM Standard A 572

DOFASCOLOY 55 W
M-1033, 0.25 C, 1.35 Mn, 0.3 Si, 0.005-0.05 Cb, bal Fe
70,000 min TS, 55,000 min YS, 20 min El
For structural work
ASTM Standard A 572

DOFASCOLOY 60W
M-1033, 0.26 C, 1.35 Mn, 0.3 Si, 0.005-0.05 Cb, bal Fe.
75,000 min TS, 60,000 min YS, 18 min El.
For structural work
ASTM Standard A 572

DOFASCOLOY M.
M-1033; 0.25 max C, 1.5 max Mn, 0.30 min Cu, bal Fe
Plate 63,000 min TS; 42,000 min YS, 24 min El.
For tanks, trailers, trucks, auto frames, cranes, booms, buckets, stokers.
High strength low alloy steel.

DOFASCOLOY MV.
M-1033, 0.22 max C, 1.25 max Mn, 0.20 min Cu, 0.02 min V, bal Fe.
Plate. 63,000 min TS; 42,000 min YS; min El.
For tanks, trailers, trucks, auto frames, booms, cranes, buckets, stokers.
High strength low alloy steel.

DOFASCOLOY P
M-1033; 0.16 max C, 0.60 max Mn, 0.12 max P, 0.035 max S, 0.15-0.35 Si, 0.90 max Ni, 0.60 max Cr, 0.60 max Cu, bal Fe.
Plate: 63,000 min TS; 42,000 min YS; 24 min El.
For tanks, trailers, trucks, auto frames, mine cars, buckets, stokers, cranes.
High strength low alloy steel.

DOFASCOLOY W.
M-1033; 0.25 max C, 0.50-1.25 Mn, 0.01 min Cb, bal Fe.
Gr. 45 W: 65,000 min TS; 45,000 min YS; 18 min El.
Gr. 50 W: 70,000 min TS; 50,000 min YS; 18 min El.
Gr. 55 W: 70,000 min TS; 55,000 min YS; 17 min El.
Gr. 60 W: 75,000 min TS; 60,000 min YS; 16 min El.
For trucks, tanks, trailers, cranes, booms.
High strength low alloy steel

DOHLEN-CSV35.
M-1348; 0.38 C, Cr, V, Si, bal Fe.
For machine tool parts, gears, shafts, fasteners, crankshafts.
Oil hardening, tough, shock resisting.

DOHLEN CSV45.
M-1348, 0.45 C, Cr, V, Si, bal Fe
For machine tool parts, springs, gears, bolts; oil hardened, tough

DOHLEN DELTA PEB.
M-1348, 0.55 C. 0.90 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe
For header dies, upsetters, punches; oil hardened, tough

DOHLEN DP1W
M-1348; 0.15 C 0.15-0.35 Si, 0.25-0.50 Mn, bal Fe
Annealed· 70,000 TS; 40,000 YS, 25 El, 60 RA, 145 Brin
For gears, cams, camshafts, machine tool parts, case hardening steel.

DOHLEN DP3W.
M-1348; 0.35 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Hot rolled 85,000 TS, 55,000 YS; 30 El, 53 RA; 185 Brin.
For gears, bolts, machine tool parts, fasteners, water hardened.

DOHLEN DP4W.
M-1348; 0.45 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Hot rolled· 98,000 TS, 60,000 YS, 24 El; 45 RA; 212 Brin.
For gears, bolts, machine tool parts, fasteners, water hardened

DOHLEN DP6W
M-1348, 0.60 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Heat treated 160,000 TS, 115,000 YS, 12 El, 40 RA, 325 Brin.
For gears, bolts, springs, rails, axles, shafts, water hardened

DOHLEN DP7 EXTRA.
M-1348, 0.70 C, 0.25 max S, 0.25 max Mn, bal Fe
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin
For springs, tools, rails, punches, mandrels, water hardened; Type W 1.

DOHLEN DP7 PRIMA.
M-1348; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin.
For springs, tools, rails, punches, mandrels; water hardened; Type W 1.

DOHLEN DP7W.
M-1348; 0.70 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin.
For springs, tools, punches, mandrels; water hardened; Type W 1.

DOHLEN DP8.
M-1348; 0.85 C, 0.25 max Si. 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 12 El; 33 RA; 400 Brin.
For tools, springs, drills, taps, cutters; Type W 1; water hardened.

DOHLEN DP8 PRIMA.
M-1348; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 12 El; 33 RA; 400 Brin.
For springs, tools, cutters, taps, drills; water hardened; Type W 1.

DOHLEN DP8W.
M-1348; 0.9 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated: 195,000 TS; 150,000 YS; 10 El; 30 RA, 410 Brin.
For springs, tools, cutters, dies, drills, taps; Type W 1; water hardened

DOHLEN DP10 EXTRA.
M-1348, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 100,000 TS; 53,000 YS, 21 El; 42 RA, 200 Brin
For springs, tools, cutters, dies, drills, taps; Type W 1, water hardened.

DOHLEN DP10 PRIMA
M-1348; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed 100,000 TS, 53,000 YS; 21 El. 42 RA, 200 Brin
For springs, tools, taps, drills, reamers; Type W 1, water hardened

DOHLEN DP11 EXTRA
M-1348, 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed 110,000 TS, 58,000 YS, 18 El; 40 RA, 210 Brin
For springs, tools, drills, taps, reamers, Type W 1, water hardened.

DOHLEN DP11 PRIMA
M-1348, 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed. 110,000 TS, 58,000 YS, 18 El, 40 RA, 210 Brin
For springs, tools, reamers, broaches, Type W 1, water hardened

DOHLEN DP12 PRIMA
M-1348, 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For cutters, tools, drills, taps, reamers, Type W 1, water hardened.

DOHLEN DSW1
M-1348, 0.3 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion press liners and rams, oil hardened, hot work steel.

DOHLEN DSW2
M-1348, 0.30 C 2.35 Cr, 0.6 V, 4.25 W, bal Fe
For hot work tools, dies, punches; hot work steel, oil hardened.

DOHLEN GSR.
M-1348, 0.67 C, 1.3 Si, 0.5 Mn, 0.5 Cr, bal Fe.
For punches, dies, shears, upsetters; oil hardened, tough.

DOHLEN KE.
M-1348, 0.20 C, 1.15 Cr, 1.25 Mn, bal Fe
For camshafts, cams, bolts; case hardened, tough.

DOHLEN P 53.
M-1348; 0.50 C, 1.05 Cr, 3.25 Ni, 0.5 Mn, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

DOHLEN SAR.
M-1348; 1.15 C, 0.65 Cr, 0.10 V, 0.30 Mn, bal Fe.
For blanking and header dies; oil hardened, abrasion resistant.

DOHLEN STANDARD.
M-1348; 0.90 C, 1.9 Mn, 0.10 V, bal Fe.
For punches, blanking and forming dies; oil hardened, non-deforming.

DOLER BRASS 1.
M-158; 65 Cu, 34 Zn, 1 Si.
Die cast: 65,000 TS; 35,000 YS; 15 El; 120 Brin.
For die castings; silicon brass.

DOLER BRASS 4.
M-158; 81.5 Cu, 14.5 Zn, 4.0 Si.
Die cast: 85,000 TS; 50,000 YS; 10 El; 170 Brin.
For die castings; corrosion resistant.

DOLER-MAG.
M-158; 9 Al, 0.1-0.3 Cu, 0.6 Zn, bal Mg.
Die cast: 34,000 TS; 23,000 YS; 4 El; 60 Brin.
For general purpose die castings.

DOLER-ZINC 3.
M-158; 4 Al, 0.04 Mg, 0.2 Cu, bal Zn.
Die cast: 41,000 TS; 10 El; 82 Brin.
For die castings, instrument housings, ornamental grill; C.S. 60,500, S.S. 30,900.

DOLER-ZINC 5.
M-158; 1 Cu, 4 Al, 0.04 Mg, bal Zn.
Die cast: 47,000 TS; 7 El; 90 Brin.
For die castings; C.S. 87,300, S.S. 38,400.

DOLER-ZINC 8.
M-158; 0.5 Mn, 0.25 Al, bal Zn.
Cast: 20,000 TS; 60 Brin.
For die castings, ornaments, instrument cases; solders readily.

DOLLAR BLUE CHIP.
Eng.; 0.62 C, 4.33 Cr, 17.82 W, 1.66 V, 3.93 Co, bal Fe.
For tools, cutters, reamers; high speed steel.

DOMAL AM80A.
M-1239; 8 Al, 0.2 Mn, bal Mg.
Cast: 24,000-27,000 TS; 10,000-12,500 YS; 4-7 El, 48-52 Brin.
Forged: 42,000-48,000 TS; 28,000-32,000 YS; 8-12 El; 54-58 Brin.
For aircraft castings, housings, crankcases; age-hardenable, high strength.

DOMAL AM100A.
M-1239; 10 Al, 0.1 Mn, bal Mg.
Cast: 22,000 TS; 12,000 YS; 1-3 El; 55 Brin.
Heat treated: 38,000 TS; 20,000 YS; 1-4 El; 80 Brin.
For high strength castings; age-hardenable.

DOMAL AS100.
M-1239; 10 Al, 0.5 Zn, bal Mg.
For die castings, instrument cases; high strength

DOMAL AZ21X.
M-1239; 1.2-2.0 Al, 0.4-0.75 Zn, 0.20 min Mn, bal Mg.
Extruded: 32,000 TS; 18,000 YS; 5 El.
Tube: 32,000 TS; 15,000 YS; 5 El.
Forged: 32,000 TS; 17,000 YS; 5 El.
For airframes, cowles, tanks, structures; good weldability and workability.

DOMAL AZ31B.
M-1239; 9 Al, 0.3 Mn, bal Mg.
Extruded: 37,000 TS; 28,000 YS; 12 El; 49 Brin.
For aircraft structures; high ductility.

DOMAL AZ31X.
M-1239; 2.5-3.5 Al, 0.6-1.4 Zn, 0.20 min Mn, bal Mg.
Extruded: 32,000-34,000 TS; 16,000-20,000 YS; 6-8 El.
Plate ½ Hard: 33,000-39,000 TS; 16,000-29,000 YS; 10-4 El.
For aircraft parts; good formability.

DOMAL AZ61A.
M-1239; 6.5 Al, 1 Zn, bal Mg.
Extruded: 44,000 TS; 30,000 YS; 14 El; 60 Brin.
For aircraft structures; strong and tough.

DOMAL AZ61X.
M-1239; 5.8-7.2 Al, 0.4-1.5 Zn, 0.2 min Mn, bal Mg.
Extruded: 39,000 TS; 24,000 YS; 9 El.
Forged: 38,000 TS; 22,000 YS; 6 El.
Tube: 36,000 TS; 16,000 YS; 7 El.
For aircraft parts; good weldability.

DOMAL AZ63A.
M-1239; 2.7-3.3 Zn, 0.2 min Mn, bal Mg.
Cast: 27,000 TS; 14,000 YS; 16 El; 50 Brin.
Heat treated: 40,000 TS; 24,000 YS; 10 El; 60 Brin.
For cylinder heads, pistons, high strength castings; age-hardenable.

DOMAL AZ80A.
M-1239; 8.5 Al, 0.5 Zn, bal Mg.
Extruded: 48,000 TS; 32,000 YS; 12 El; 60 Brin.
Heat treated: 52,000 TS; 36,000 YS; 5 El; 82 Brin.
For cylinder heads, valve and pump bodies; age-hardenable

DOMAL AZ80X.
M-1239; 7.5-9.2 Al, 0.2-0.8 Zn, 0.2 min Mn, bal Mg.
F-temper: 43,000 TS, 28,000 YS; 6 El
T6-temper: 47,000 TS; 30,000 YS; 2 El.
For aircraft parts; age hardenable.

DOMAL AZ91B
M-1239; 9 Al, 0.6 Zn, bal Mg.
Die cast· 33,000 TS, 22,000 YS, 3 El; 60 Brin.
For die castings, instrument housings; good strength.

DOMAL AZ91C
M-1239; 9 Al, 0.5 Zn, bal Mg.
Die cast: 38,000 TS; 19,000 YS; 9 El; 59 Brin.
Heat treated: 40,000 TS; 20,000 YS; 4 El; 66 Brin.
For general high strength castings; age-hardenable.

DOMAL-AZ91X.
M-1239, 8.3-9 7 Al, 0.4-1 0 Zn, 0.2-0 4 Mn, 0.1 max Si, bal Mg
Die cast. 33,000 TS, 22,000 YS, 3 El, 60 Brin.
Sand cast. 24,000 TS; 14,000 YS; 2 El; 52 Brin
Ht. Tr.: 40,000 TS; 19,000 YS; 4 El; 66 Brin.
For instrument housings, portable tools, casings.
Age-hardenable.

DOMAL AZ92A.
M-1239; 9 Al, 2 Zn, bal Mg.
Cast. 24,000 TS; 14,000 YS, 2 El; 65 Brin.
Heat treated: 40,000 TS; 23,000 YS; 2 El; 84 Brin.
For aircraft engine components; age-hardenable.

DOMAL EZ33.
M-1239; 2.0-3.5 Zn, 2.5-4.0 rare earths, 0.5-1.0 Zr, bal Mg.
T5-temper: 20,000 TS; 13,000 YS; 3 El.
For engine castings, diffuser and compressor casings; heat and creep resistant to 500°F.

DOMAL HZ32.
M-1239; 3.0 Th, 2.3 Zn, 0.7 Mn, bal Mg.
At 20°C: 30,000 TS; 13,000 YS; 7 El.
At 250°C: 14,900 TS; 9000 YS; 50 El.
At 350°C: 10,000 TS; 40 El.
For jet engine and missile components; high creep resistance to 660°F.

DOMAL M1B.
M-1239; 1.2 Mn, bal Mg.
F-temper: 33,000 TS; 27,000 YS; 44 El.
H24-temper: 37,000 TS; 28,000 YS; 7 El; 56 Brin.
For parts subjected to high stresses; good weldability and corrosion resistance.

DOMAL TA54A.
M-1239; 5 Sn, 3 Al, bal Mg.
Forged: 40,000 TS; 28,000 YS; 12 El; 52 Brin.
For pistons; high ductility.

DOMAL ZH62.
M-1239; 5.8 Zn, 1.8 Th, 0.7 Zr, bal Mg.
Cast: 40,000 TS, 24,000 YS; 8.5 El.
Sheet: 48,000 TS; 42,000 YS; 15 El.
Extruded: 49,000 TS; 42,000 YS; 20 El.
For aircraft engine and missile components; good formability and weldability.

DOMAL ZK31.
M-1239; 2.5-3.5 Zn, 0.5-1.0 Zr, bal Mg.
Extruded: 40,000 TS; 28,000 YS; 5 El.
Forged: 38,000 TS; 26,000 YS; 5 El.
For airframe structural parts, landing wheels, gear casings; heavy duty service.

DOMAL ZK60.
M-1239; 4.8-6.5 Al, 0.5 min Zr, 0.003 max Fe. bal Mg.
F-temper· 42,000 TS; 28,000 YS, 5 El
T5-temper. 44,000 TS; 32,000 YS, 4 El.
Cast: 35,000 TS; 18,000 YS, 8 El.
T6-temper· 42,000 TS; 26,000 YS; 5 El.
For aircraft structural members; age hardenable, shock resistant.

DOMESTIC.
M 389; 0.7-1.2 C, bal Fe
For tools, punches, taps; water hardening

DOMINIAL 170.
M-1352; 0.45 C, Cr, Ni, bal Fe
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant

DOMINIAL BA
M-1352, 1.05 C, 6 Cr, W, bal Fe.
For oil refinery equipment, creep and wear resistant

DOMINIAL BZM
M-1352, C, alloy, bal Fe
For gears, shafts, bolts, oil hardening

DOMINIAL CH
M-1352, 2.1 C, 11.5 Cr, bal Fe.
For blanking and forming dies; oil or air hardened, nondeforming

DOMINIAL CH160W
M-1352, 1.65 C, 11.5 Cr, 0.2 Mo, 0.1 V, bal Fe
For blanking and forming dies, punches, air hardened, nondeforming

DOMINIAL CH165.
M-1352; 1.65 C, 11.5 Cr, 0.1 V, bal Fe.
For blanking and forming dies, punches; air hardened, nondeforming

DOMINIAL CHW
M-1352, 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For blanking and forming dies, punches; oil or air hardened, nondeforming.

DOMINIAL CM167.
M-1352; 0.45 C, 1.4 Cr, 0.7 Mo, 0.3 V, bal Fe
For gears, bolts, crankshafts, fasteners; oil hardened, tough.

DOMINIAL DAG.
M-1352; 1.45 C, 0.6 Mn, 1.4 Cr, bal Fe.
For bearings, sleeves, blanking dies; water hardened, wear resistant.

DOMINIAL DS.
M-1352; 0.38 C, 6 Cr, 0.9 Si, 0.1 V, bal Fe.
For oil refinery equipment, creep and heat resistant.

DOMINIAL DSW.
M-1352; 0.35 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold heading dies, crimpers, punches, upsetters; oil hardened, tough.

DOMINIAL DWK.
M-1352; 1.3 C, 0.2 max Cr, 4.75 W, bal Fe.
For engravers tools, cutters, oil hardened.

DOMINIAL EC4.
M-1352; 0.13 C, 3.5 Ni, 0.7 Cr, bal Fe.
For bolts, fasteners, gears, cams, camshafts; case hardening steel, shock resistant.

DOMINIAL EC5.
M-1352, 0.13 C, 1.1 Cr, 4.5 Ni, bal Fe.
For gears, cams, camshafts; case hardening steel, shock resistant.

DOMINIAL ECNL.
M-1352; 0.19 C, 1.25 Cr, 0.2 Mo, 3.75 Ni, bal Fe.
For gears, bolts, camshafts, fasteners; case hardening steel, shock resistant.

DOMINIAL EXTRA.
M-1352; 1.05 C, 1.2 Cr, 0.5 Mn, bal Fe.
For bearings, liners, sleeves, water hardened, wear resistant.

DOMINIAL FGS.
M-1352; 1.25 C, 1.15 Si, 0.7 Mn, 1.2 Cr, bal Fe.
For bearings, liners, sleeves; oil hardened, wear resistant

DOMINIAL GH
M-1352, 2.1 C, 11.5 Cr, bal Fe
For blanking and forming dies, punches, oil or air hardened, nondeforming

DOMINIAL KC15
M-1352, 0.45 C, 1.5 Cr, 1.0 Si, 0.1 V, bal Fe
For springs, gears, bolts, crankshafts, oil hardened, shock resistant

DOMINIAL KHP
M-1352; 0.15 C, 0.65 Cr, 0.5 Mn, bal Fe
For gears, pinions, cams, camshafts, case hardening steel

DOMINIAL KL.
M-1352, 0.55 C, 0.9 Si, 0.3 Mn, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold heading dies, crimpers, punches, upsetters; oil hardened.

DOMINIAL KST.
M-1352, 1.0 C, 0.2 Si, 0.25 Mn, 0.1 V, bal Fe
For cutters, drills, taps, reamers, broaches; Type W 2, water hardened.

DOMINIAL KTW.
M-1352; 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, shafts, bolts, studs, crankshafts; oil hardened, tough.

DOMINIAL KZR.
M-1352, 1.4 C, 0.3 Cr, 0.1 V, bal Fe.
For engravers tools, cutters, taps, reamers; water hardened.

DOMINIAL MA.
M-1352, 0.3 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe
For upsetters, riveters, punches, crimpers, hot work steel, oil hardened.

DOMINIAL MAK.
M-1352, 0.3 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For upsetters, riveters, punches; hot work steel, oil hardened.

DOMINIAL MA SUPRA.
M-1352, 0.3 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe.
For extrusion press rams, hot punches, shears; hot work steel, oil hardened.

DOMINIAL MC.
M-1352; 0.3 C, 2.5 Cr, 0.2 Mo, 0.15 V, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, tough.

DOMINIAL MK.
M-1352; 1.05 C, Mn, Cr, bal Fe.
For drills, taps, bearings, races; water hardened, wear resistant.

DOMINIAL MKST.
M-1352; 0.9 C, 0.1 V, 1.9 Mn, 0.25 Si, bal Fe.
For punches, forming dies, shears, crimpers; oil hardened, nondeforming.

DOMINAL N400.
M-1352; 0.45 C, Ni, Cr, Mo, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant.

DOMINIAL PD.
M-1352; 0.65 C, 3.75 Cr, 0.85 Mo, 0.7 V, 8.5 W, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel.

DOMINIAL PK.
M-1352; 0.45 C, 1.05 Cr, 0.2 V, 1.85 W, bal Fe.
For cold heading tools, punches, mandrels; oil hardened, tough

DOMINIAL PK17.
M-1352, 0.45 C, W, Cr, V, bal Fe.
For hot shears and punches, upsetters; hot work tools, oil hardened

DOMINIAL PW15.
M-1352, 0.55 C, 0.7 Cr, 0.18 V, 1.65 Ni, 0.18 Mo, bal Fe.
For gears, bolts, crankshafts, oil hardened, shock resistant.

DOMINIAL PWM.
M-1352; 0.56 C, 0.6 Mn, Cr, Mo, Ni, V, bal Fe.
For gears, bolts, crankshafts, axles, oil hardened, shock resistant.

DOMINIAL R 13F
M-1352; 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 EL; 70 RA; 155 Brin.
Cold drawn: 100,000 TS, 85,000 YS, 17 El, 60 RA; 205 Brin.
For turbine blades, surgical instruments, valves, cutlery; Type 410; stainless.

DOMINIAL RAN.
M-1352; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS, 55 El; 75 RA; 150 Brin.
Cold drawn, 180,000 TS, 150,000 YS; 10 El, 250 Brin.
For chemical plant equipment, tanks, mixers, filters, Type 302, stainless, austenitic.

DOMINIAL RAS.
M-1352, 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe
Annealed: 85,000 TS, 35,000 YS; 55 El; 65 RA; 150 Brin.
Cold drawn: 95,000 TS; 60,000 YS; 40 El, 60 RA; 185 Brin.
For welded chemical plant equipment, tanks, mixers; Type 321; stainless, austenitic.

DOMINIAL RAS4.
M-1352; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 45 El; 60 RA; 160 Brin.
For welded acid resistant chemical plant equipment; Type 316 Ti; stainless, austenitic.

DOMINIAL RF.
M-1352; 0.4 C, 13 Cr, 0.4 Si, 0.3 Mn, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 200 Brin.
For valves, cutlery, surgical and dental instruments; Type 420; stainless, hardenable.

DOMINIAL RM13.
M-1352, 0.2 C, 13 Cr, 0.4 Si, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El; 55 RA; 200 Brin.
For valves, cutlery, turbine blades, surgical instruments; Type 420; stainless, hardenable.

DOMINIAL RM13H
M-1352, 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 200 Brin
For valves, cutlery, surgical and dental instruments; Type 420; stainless, hardenable.

DOMINIAL RM13Mo.
M-1352; 0.2 C, 0.4 Si, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 200 Brin
For turbine blades, valves, cutlery; Type 420Mo, stainless.

DOMINIAL RM17.
M-1352, 0.22 C, 17 Cr, 1.5 Ni, 0.4 Si, bal Fe.
Annealed: 125,000 TS, 95,000 YS, 20 El; 55 RA; 260 Brin
Cold drawn 130,000 TS, 110,000 YS; 15 El; 35 RA; 270 Brin.
For pumps, valves, marine hardware; Type 431, stainless.

DOMINIAL RM174
M-1352, 0.35 C, 0.4 Si, 16.5 Cr, 1.15 Mo, bal Fe.
For chemical plant equipment, furnace parts; corrosion and heat resistant

DOMINIAL RM189.
M-1352, 0.90 C, 18 Cr, 2 Mo, bal Fe
For cutlery, valves, ball bearings, surgical instruments, Type 440B; corrosion resistant, hardenable.

DOMINIAL SES
M-1352, 1.15 C, 0.65 Cr, 0.1 V, 0.3 Mn, bal Fe.
For bearings, sleeves, cutters, water hardened, wear resistant

DOMINIAL SGW.
M-1352; 0.9 C, 0.3 Mn, 0.8 Cr, bal Fe.
For cutters, bearings, sleeves, water hardened, wear resistant.

DOMINIAL SN
M-1352; 0.5 C, 0.5 Mn, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, bolts, crankshafts, axles, fasteners; oil hardened, shock resistant.

DOMINIAL SP.
M-1352, 0.70 C, 1.7 Si, 0.70 Mn, bal Fe.
For punches, dies, upsetters, springs, crimpers, oil hardened, tough.

DOMINIAL SS50.
M-1352; 0.50 C, 0.85 Mn, 1.0 Cr, 0.09 V, bal Fe.
For gears, springs, bolts, studs, crankshafts; oil hardened, shock resistant.

DOMINIAL VSF.
M-1352; 0.90 C, 1.0 Mn, 0.37 Si, bal Fe.
For drills, taps, reamers, hobs, broaches; water hardened, wear resistant.

DOMINIAL W 44.
M-1352; 0.45 C, 1.35 Cr, 0.45 Mo, 0.8 V, 0.45 W, bal Fe.
For cold heading dies, upsetters, riveters; oil hardened, tough.

DOMINIAL WEH.
M-1352; 0.2 C, 1.25 Mn, 1.15 Cr, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel.

DOMINIAL WF.
M-1352; 1.2 C, 0.2 Cr, 0.1 V, 1.0 W, bal Fe.
For blanking and forming dies, cutters; water hardened, wear resistant.

DOMINIAL WF2.
M-1352, 1.15 C, W, bal Fe.
For blanking dies, cutters, punches; water hardened, wear resistant.

DOMINIAL WMK.
M-1352; 0.30 C, 1.0 Si, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For cold heading dies, punches, upsetters; oil hardened, tough.

DOMINIAL WR.
M-1352, 1.4 C, 1 Si, 0.18 V, 3.75 W, bal Fe .
For bearings, forming dies, cutters; water hardened

DOMITE 30
M-763, 3.2 C, 1.5 Ni, 2 Si, bal Fe
Cast. 30,000 TS, 180 Brin
For stamping dies, pulleys, cast iron, Tr S. 2200.

DOMITE 35
M-763, 3.5 C, 2.5 Si, bal Fe
Cast: 35,000 TS, 190 Brin
For pumps, die shoes, evaporators, cast iron, Tr S 2400

DOMITE 45
M-763, 3.3 C, 2.2 Si, bal Fe
Cast: 45,000 TS, 220 Brin.
For gears, flywheels, pump impellers; cast iron, Tr S 2800.

DOMITE 55
M-763, 3.1 C, 1.5 Si, bal Fe.
Cast: 55,000 TS, 250 Brin
For crankshafts, forming dies, gears, cast iron, Tr S. 3400.

DOMITE Ni-HARD.
M-763; 4.2-4.7 Ni, 3-3.6 C, 1.4-2.5 Cr, 0.5 Si, 0.4-6 Mn, bal Fe.
Cast: 50,000-60,000 TS, 600-725 Brin.
For wear resistant castings, wear and abrasion resistant.

DOMITE NODULOY.
M-763; 3.3 T.C 1.9 Si, bal Fe.
Cast. 115,000 TS, 2 El.
Annealed: 75,000 TS; 15 El.
For high strength castings; high ductility.

DOMITE WEAR RESISTING A.
M 763; high C, alloy, Si, bal Fe
Cast: 200 Brin.
For wheels, brake shoes, brick dies; pearlitic cast iron.

DOMITE WEAR RESISTING B.
M-763; high C, alloy, Si, bal Fe.
Cast: 300 Brin.
For iron liners, plow points, wheels; wear resistant cast iron.

DOMITE WEAR RESISTING C.
M-763; high C, alloy, Si, bal Fe.
Cast: 475 Brin.
For railway wheels, brake shoes; chilled cast iron.

DOMITE WEAR RESISTING D.
M-763; high C, alloy, Si, bal Fe.
Cast: 600 Brin.
For railway wheels, wear, parts; chilled cast iron.

DONAL.
M-1548; 0.3-0.5 Si, 1.0-2.0 Mn, bal Al.
Soft: 22,000 TS; 35 El, 30 Brin
Half hard. 26,000 TS; 21,000 YS; 5-15 El; 40-50 Brin.
For general structures, containers, heat exchangers, trim
Non-hardenable. Corrosion resistant.

DONAL.
M-764, 98.5 Al, 1.5 Mn.
For light alloy parts, die castings.

DONEGAL D-1.
M-1223; 0.20 C, 0.65 Mn, bal Fe
Annealed 60,000 TS; 30,000 YS, 24 El, 35 RA; 130 Brin
For machine tool parts, gears, shafts, ASTM Gr. WCA.

DONEGAL D-2
M-1223; 0.27 C, 0.65 Mn, bal Fe
Annealed 70,000 TS; 35,000 YS; 24 El, 35 RA, 140 Brin.
For machine tool parts, gears, housings, ASTM Gr WCB

DONEGAL D-3
M-1223, 0.40 C, 0.65 Mn, bal Fe
Normalized 80,000 TS, 40,000 YS, 18 El; 30 RA, 165 Brin
For gears, housings, shafts, machine tool parts, ASTM Gr 80-40

DONEGAL D-4
M-1223, 0.20 C, 0.65 Mn, 0.90 Ni, 0.65 Cr, 0.55 Mo, bal Fe
Normalized 70,000 TS, 40,000 YS, 20 El, 35 RA; 160 Brin
For gears, bolts, crankshafts, housings, ASTM Gr WC4, shock resistant.

DONEGAL D-5
M-1223, 0.20 C, 0.80 Ni, 0.70 Cr, 1.0 Mo, 0.60 Mn, bal Fe
Normalized 70,000 TS; 40,000 YS; 20 El, 35 RA: 160 Brin.
For gears, housings, machine tool parts, ASTM Gr WC5; case hardened, shock resistant.

DONEGAL D-6
M-1223, 0.20 C, 0.65 Mn, 1.25 Cr, 0.55 Mo, bal Fe.
Normalized 70,000 TS, 40,000 YS, 20 El, 35 RA, 160 Brin
For gears, housings, machine tool parts, ASTM Gr. W 6

DONEGAL D-7
M 1223, 0.30 C, 1.35 Mn, bal Fe
Normalized 90,000 TS, 60,000 YS, 20 El, 40 RA, 190 Brin.
For gears, bolts, crankshafts, machine tool parts; ASTM Gr 90-60; water or oil hardened.

DONEGAL D-8.
M-1223, 0.30 C, 1.3 Mn, 0.25 Mo, bal Fe.
Normalized: 90,000 TS; 60,000 YS; 20 El; 40 RA, 190 Brin.
For gears, bolts, crankshafts, machine tool parts; tough.

DONEGAL D-9.
M-1223; 0.18 C, 0.5 Cr, 1.0 Mo, 0.60 Mn, bal Fe.
Normalized: 70,000 TS; 40,000 YS; 20 El; 35 RA; 160 Brin.
For machine tool parts, ASTM Gr. WC9.

DONEGAL D-10.
M-1223; 0.30 C, 0.65 Mn, 0.60 Ni, 0.60 Cr, 0.50 Mo, bal Fe.
Normalized: 100,000 TS; 60,000 YS; 15 El; 30 RA; 202 Brin.
Water hardened: 150,000 TS; 125,000 YS; 10 El; 25 RA; 320 Brin.
For machine tool parts.

DONEGAL D-11.
M-1223; 0.20 C, 0.65 Mn, 0.55 Mo, bal Fe.
Normalized· 65,000 TS; 35,000 YS; 24 El; 35 RA; 145 Brin.
For machine tool parts, gears, shafts; ASTM Gr. WC1.

DONEGAL D-12
M-1223; 0.20 C, 0.50 Mn, 9.0 Cr, 1.0 Mo, bal Fe.
Normalized. 90,000 TS; 60,000 YS; 18 El; 35 RA; 190 Brin.
For oil refinery equipment; ASTM Gr. C 12; creep resistant.

DONEGAL D-13
M-1223; 0.25 C, 0.65 Mn, 2.5 Ni, bal Fe.
Normalized: 65,000 TS; 40,000 YS; 24 El; 35 RA; 179 Brin.
For gears, machine tool parts; ASTM Gr. CL2, tough.

DONEGAL D-14.
M-1223; 0.15 C, 0.65 Mn, 3.5 Ni, bal Fe.
Normalized: 65,000 TS; 40,000 YS; 25 El, 35 RA; 179 Brin.
For gears, bolts, machine tool parts; ASTM Gr. CL3, shock resistant.

DONEGAL D-15.
M-1223; C, alloy, bal Fe.
For armor; tough.

DONEGAL D-16.
M-1223; 0.20 C, 0.60 Mn, 5.0 Cr, 0.5 Mo, bal Fe
Normalized: 90,000 TS; 60,000 YS; 18 El; 35 RA, 190 Brin.
For oil refinery equipment; ASTM Gr. C 5, creep resistant.

DONEGAL D-20.
M-1223; 0.07 C, 18-22 Cr, 21-31 Ni, 2.5 Mo, 4.0 Cu, bal Fe
Cast. 65,000 TS; 30,000 YS, 30 El; 150 Brin
For chemical plant equipment; ACI Type CN-7M, austenitic, stainless.

DONEGAL D-21.
M-1223; 0.15 max C, 11-14 Cr, 1.0 max Ni, bal Fe.
Cast: 90,000 TS; 65,000 YS, 18 El; 30 RA; 200 Brin.
For chemical plant equipment, valves, cutlery; ACI Type CA15, corrosion resistant.

DONEGAL D-23.
M-1223; 0.20-0.40 C, 11.5-14.0 Cr, 1.0 max Ni, bal Fe.
Cast: 110,000 TS; 75,000 YS; 15 El; 25 RA; 220 Brin.
For valves, cutlery, chemical plant equipment; ACI Type CA40; corrosion resistant.

DONEGAL D-24.
M-1223; 0.30 max C, 18-22 Cr, 2 max Ni, bal Fe.
Cast: 65,000-95,000 TS; 30,000-60,000 YS; 15 El; 170-195 Brin.
For furnace parts, heat treating boxes; ACI Type CB30; corrosion resistant.

DONEGAL D-25.
M-1223; 0.50 max C, 26-30 Cr, 4 max Ni, bal Fe.
Cast: 55,000 TS; 190 Brin.
Heat treated: 97,000 TS; 65,000 YS; 18 El; 210 Brin.
For cylinder liners, bushings, valve seats; ACI Type CC50; corrosion resistant.

DONEGAL D-26.
M-1223, 0.30 max C, 26-30 Cr, 8-11 Ni, bal Fe.
Cast. 80,000 TS; 40,000 YS; 10-20 El; 20 RA; 170 Brin.
For furnace parts, salt pots, heat treating boxes; ACI Type CE30; austenitic, stainless.

DONEGAL D-27.
M-1223; 0.20 max C, 18-21 Cr, 8-11 Ni, bal Fe.
Cast 70,000 TS; 30,000 YS; 30 El; 160 Brin
For furnace parts, heat treating boxes, retorts; ACI Type CF20, stainless, austenitic.

DONEGAL D-28.
M-1223, 0.08 max C, 18-21 Cr, 8-11 Ni, bal Fe.
Cast: 70,000 TS, 28,000 YS, 35 El; 150 Brin.
For furnace parts, chemical plant equipment; ACI Type CF8; stainless, austenitic

DONEGAL D-29.
M-1223, 0.16 max C, 18-21 Cr, 9-10 Ni, 0.20-0.35 Se, bal Fe.
Cast· 70,000 TS; 30,000 YS; 25 El; 150 Brin.
For chemical plant equipment, ACI Type CF16F; free-cutting, stainless.

DONEGAL D-30.
M-1223, 0.08 max C, 18-21 Cr, 9-12 Ni, Cb = 8 × C, bal Fe.
Cast. 70,000 TS, 30,000 YS, 30 El, 150 Brin.
For welded chemical plant equipment; ACI Type CF8C; stainless, austenitic.

DONEGAL D-31.
M-1223, 0.08 max C, 18-21 Cr, 9-12 Ni, 2-3 Mo, bal Fe
Cast 70,000 TS, 30,000 YS, 30 El, 150 Brin
For acid resistant chemical plant equipment, ACI Type CF8M; stainless, austenitic.

DONEGAL D-32
M-1223, 0.20 max C, 22-26 Cr, 12-15 Ni, bal Fe.
Cast· 70,000 TS, 30,000 YS, 30 El; 150 Brin.
For furnace parts, heat treating boxes, retorts, ACI Type CH20, corrosion and heat resistant

DONEGAL D-33
M-1223; 0.20 max C, 23-27 Cr, 19-22 Ni, bal Fe.
Cast 65,000 TS, 28,000 YS, 30 El; 170 Brin
For retorts, pots, furnace equipment and parts; ACI Type CK20, corrosion and heat resistant.

DONEGAL D-40.
M-1223; 0.20-0.50 C, 24-28 Cr, 11-14 Ni, bal Fe.
Cast: 75,000 TS; 35,000 YS; 15 El; 200 Brin.
For furnace shafts, beams, rollers, tube supports; ACI Type HH, corrosion and heat resistant

DONEGAL D-41
M-1223, 0.20-0.50 C, 26-30 Cr, 8-11 Ni, bal Fe
Cast: 85,000 TS, 40,000 YS; 9 El; 170 Brin.
For furnace parts, retorts, salt pots; ACI Type HE, corrosion and heat resistant.

DONEGAL D-42.
M-1223, 0.20-0.60 C, 24-28 Cr, 18-22 Ni, bal Fe.
Cast. 75,000 TS; 35,000 YS; 15 El; 170 Brin.
For furnace parts, retorts, skids, stack dampers; ACI Type HK; corrosion and heat resistant.

DONEGAL D-43.
M-1223; 0.35-0.75 C, 13-17 Cr, 33-37 Ni, bal Fe.
Cast: 65,000 TS; 40,000 YS; 4-10 El; 12 RA; 180 Brin.
For salt pots, furnace parts, heat treating boxes; ACI Type HT; corrosion and heat resistant.

DONEGAL DC-40.
M-1223; 0.25 C, 0.75 Mn, 0.75 Si, 1.5 Ni, 19 Cr, bal Fe.
Annealed: 95,000 TS; 60,000 YS; 15 El; 195 Brin.
For chemical and food processing equipment, furnace parts; ACI-CB30; corrosion resistant.

DONEGAL DC-41.
M-1223; 0.10 C, 0.65 Mn, 0.8 Si, 0.5 Ni, 12.5 Cr, bal Fe.
Annealed: 95,000 TS; 78,000 YS; 22 El; 185 Brin.
Heat treated: 163,000-213,000 TS; 75,000-173,000 YS; 28-6 El; 59-9 RA; 185-415 Brin.
For chemical and food processing equipment, ship propellers; ACI-CA15; corrosion resistant.

DONEGAL DC-42.
M-1223; 0.3 C, 0.75 Mn, 0.75 Si, 3 Ni, 28 Cr, bal Fe.
Cast: 95,000 TS; 60,000 YS; 15 El; 193 Brin.
Annealed: 97,000 TS; 65,000 YS; 18 El; 210 Brin.
For bushings, impellers, cylinder liners, valve seats and bodies; ACI-CC50; corrosion resistant.

DONEGAL DC-43.
M-1223, 0.08 C, 0.75 Mn, 1.25 Si, 10.5 Ni, 19.5 Cr, Cb, bal Fe.
Cast: 70,000 TS; 30,000 YS; 30 El; 150 Brin.
For chemical and food processing equipment; ACI-CF8C; corrosion resistant, austenitic.

DONEGAL DC-44.
M-1223; 0.08 max C, 0.75 Mn, 1.25 Si, 9 Ni, 19.5 Cr, bal Fe.
Cast: 70,000 TS; 28,000 YS; 35 El; 150 Brin.
For chemical and food processing equipment; ACI-CF8; corrosion resistant, austenitic.

DONEGAL DC-45.
M-1223; 0.16 max C, 0.75 Mn, 1.25 Si, 9 Ni, 19.5 Cr, Se, bal Fe.
Cast: 70,000 TS, 28,000 YS; 30 El; 150 Brin.
For chemical and food processing equipment; ACI-CF16F, corrosion resistant, austenitic.

DONEGAL DC-46
M-1223; 0.08 max C, 0.75 Mn, 1.25 Si, 10 Ni, 19.5 Cr, Mo, bal Fe.
Cast: 70,000 TS, 30,000 YS; 30 El; 150 Brin.
For chemical and food processing equipment; ACI-CF8M; corrosion resistant, austenitic.

DONEGAL DC-47.
M-1223; 0.20 max C, 0.75 Mn, 1.25 Si, 9 Ni, 19.5 Cr, bal Fe.
Cast: 70,000 TS, 30,000 YS, 30 El, 150 Brin.
For chemical and food processing equipment, ACI-CF20, corrosion resistant, austenitic.

DONEGAL DC-48
M-1223; 0.20 max C, 0.75 Mn, 1.25 Si, 13.5 Ni, 24.5 Cr, bal Fe
Cast: 70,000 TS; 30,000 YS, 30 El; 170 Brin
For chemical plant equipment, furnace parts; ACI-CH20; corrosion and heat resistant.

DONEGAL DC-49.
M-1223; 0.20 max C, 0.75 Mn, 1.25 Si, 20.5 Ni, 25 Cr, bal Fe.
Cast: 65,000 TS; 28,000 YS; 30 El; 170 Brin.
For chemical plant equipment, furnace parts; ACI-CK20; corrosion and heat resistant.

DONEGAL DC-50.
M-1223, 0.05 C, 16.5 Cr, 4 Ni, 4 Cu, bal Fe.
Heat treated: 180,000-210,000 TS; 165,000-200,000 YS; 15-6 El; 60-30 RA; 375-440 Brin.
For chemical plant equipment; age hardenable, corrosion resistant.

DOPPLOY 30.
M-479; 2.0 Si, 0.8 Mn, 3.0 total C, 18.5 Ni, 2.5 Cr, bal Fe.
Cast: 35,000 TS.
For casting jacketed kettles, agitators, etc., corrosion resistant.

DOQUAT.
Russian; Fe-W.
For cutting tools; hard sintered alloy.

DORIUM "D."
70 Cu, 30 Zn.
For condenser tubes.

DORRENBERG A 50.
M-614; 0.56 C, Ni, Cr, Mo, V, bal Fe.
For crankshafts, punches, dies; oil hardened, shock resistant.

DORRENBERG CN60.
M-614; 0.15 C, Ni, Cr, bal Fe.
For gears, bolts, machine tool parts, case hardened, shock resistant.

DORRENBERG CP10V.
M-614; 2.1 C, 0.35 Si, 0.3 Mn, 11.5 Cr, bal Fe.
For blanking and forming dies, gages, punches; oil hardened, non-deforming.

DORRENBERG CPP.
M-614; 1.65 C, 11.5 Cr, 0.1 V, bal Fe.
For blanking and forming dies, gages, punches; air hardened, non-deforming.

DORRENBERG CPW.
M-614; 2.1 C, 0.25 Si, 11.5 Cr, 0.7 W, bal Fe.
For blanking and forming dies, gages, punches; oil hardened, non-deforming.

DORRENBERG DGS.
M-614; 0.58 C, Mn, Si, bal Fe.
For machine tool parts; oil hardened.

DORRENBERG DM1.
M-614; 0.45 C, 1.4 Cr, 0.7 Mo, 0.3 V, bal Fe
For gears, machine tool parts, oil hardened, tough

DORRENBERG DML.
M-614; 0.50 C, Cr, Mo, bal Fe.
For gears, bolts, studs, fasteners; oil hardened, shock resistant

DORRENBERG ECN4M.
M-614; 0.19 C, 1.25 Cr, 0.2 Mo, 3.75 Ni, bal Fe.
For gears, bolts, camshafts, cams, case hardened

DORRENBERG EPM1.
M-614; 0.19 C, 1.25 Cr, 0.20 Mo, 3.75 Ni, bal Fe
For gears, cams, camshafts, fasteners; case hardened, shock resistant.

DORRENBERG EPM2.
M-614; 0.20 C, 1.15 Cr, 1.25 Mn, bal Fe.
For gears, cams, camshafts, case hardened, tough.

DORRENBERG EXTRA NO. 10.
M-614; 0.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 325 Brin.
For tools, punches, springs, axes, hammers; water hardened.

DORRENBERG EXTRA 12
M-614; 6.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
For springs, tools, rails, hammers; water hardened.

DORRENBERG EXTRA 16.
M-614; 0.55 C, 0.10-0.40 Si, 0.50-0.70 Mn, bal Fe.
Heat treated: 150,000 TS; 110,000 YS; 15 El; 45 RA; 310 Brin.
For tools, punches, hammers, water hardened.

DORRENBERG GWS2.
M-614; 0.90 C, 1.2 Cr, 1.15 Si, 0.70 Mn, bal Fe.
For punches, cutters, bearings, bushings; oil hardened, wear resistant.

DORRENBERG GWS4.
M-614; 1.25 C, 1.2 Cr, 1.15 Si, 0.7 Mn, bal Fe.
For cutters, dies, bearings, bushings; oil hardened, wear resistant.

DORRENBERG H24CN.
M-614; 0.2 C, 1.2 Si, 25 Cr, 4 Ni, bal Fe.
For valve seats and bodies, bushings; corrosion and heat resistant.

DORRENBERG HC15
M-614; 0.12 max C, 2.2 Si, 13 Cr, bal Fe.
For oil refinery and chemical plant equipment; corrosion and heat resistant.

DORRENBERG HC17M.
M-614; 0.30 C, 16 Cr, Mo, bal Fe.
For oil refinery and chemical plant equipment; corrosion and heat resistant.

DORRENBERG HC22.
M-614; 0.20 C, 18 Cr, 1 Al, bal Fe.
For oil refinery equipment; corrosion and heat resistant.

DORRENBERG HC25.
M-614; 0.12 max C, 1.5 Si, 1.5 Al, 24 Cr, bal Fe.
For heat treating boxes, furnace parts and equipment; heat resistant.

DORRENBERG HC30.
M-614; 0.20 C, 29 Cr, 1 Al, bal Fe.
For heat treating boxes, furnace parts and equipment; heat resistant.

DORRENBERG HC50.
M-614; 0.40 C, 0.40 Si, 0.30 Mn, 13 Cr, bal Fe.
For cutlery, surgical instruments; corrosion resistant.

DORRENBERG HCN.
M-614; 0.15 C, 24 Cr, 19 Ni, bal Fe.
For furnace parts, pots, retorts; Type 314; corrosion resistant.

DORRENBERG HCNN.
M-614; 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment; Type 302; stainless, austenitic.

DORRENBERG MAB.
M-614; 1.1 C, W, Cr, V, bal Fe.
For cutters, dies, tools; oil hardened.

DORRENBERG MCM.
M-614; 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, bolts, fasteners, shafts, oil hardened, tough.

DORRENBERG MS.
M-614; 0.53 C, 0.90 Si, 0.90 Mn, bal Fe.
For gears, bolts, shafts, fasteners, water hardened

DORRENBERG NC15.
M-614; 0.45 C, Cr, Ni, bal Fe.
For gears, shafts, machine tool parts; oil hardened, shock resistant.

DORRENBERG NC15A.
M-614; 0.50 C, Ni, Cr, bal Fe.
For gears, shafts, machine tool parts; oil hardened, shock resistant.

DORRENBERG NCM1.
M-614; 0.55 C, 0.6 Mn, 0.70 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For forging and heading dies, upsetters; oil hardened, tough.

DORRENBERG P 60.
M-614; 0.61 C, 0.85 Si, 0.75 Mn, 1.18 Cr, 0.10 V, bal Fe.
For dies, punches, gauges, shear blades; oil hardened, tough.

DORRENBERG PC130.
M-614; 0.38 C, Si, Cr, V, bal Fe.
For gears, shafts, machine tool parts; oil hardened, tough.

DORRENBERG PMV.
M-614; 0.58 C, 0.95 Mn, 1.0 Cr, 0.09 V, bal Fe.
For springs, gears, bolts; oil hardened, tough.

DORRENBERG PMVW.
M-614; 0.50 C, 1.0 Cr, 0.09 V, 0.85 Mn, bal Fe.
For springs, gears, bolts; oil hardened, shock resistant.

DORRENBERG PNC EXTRA.
M-614; 0.50 C, 1.05 Cr, 3.25 Ni, 0.5 Mn, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

DORRENBERG PV3W.
M-614; 0.85 C, 1.0 Cr, bal Fe.
For bearings, cutters, liners, bushings; water hardened, wear resistant.

DORRENBERG PV4.
M-614; 0.85 C, 1.15 Cr, bal Fe.
For bearings, cutters, liners, bushings, water hardened, wear resistant.

DORRENBERG PV5.
M-614; 1.15 C, 0.65 Cr, 0.1 V, bal Fe.
For bearings, cutters, liners, bushings, water hardened, wear resistant.

DORRENBERG PV15.
M-614; 1.0 C, 1.1 Cr, 0.07 Mn, bal Fe.
For bearings, bushings, liners; water hardened, wear resistant

DORRENBERG PV35.
M-614; 1.5 C, Cr, Si, bal Fe.
For tools, dies; oil hardened.

DORRENBERG R 15.
M-614; 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed 75,000 TS, 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, cutlery, valves, Type 410; stainless.

DORRENBERG R 17
M-614; 0.90 C, Si, Cr, Mo, bal Fe.
For bearings, liners, bushings; oil hardened, wear resistant.

DORRENBERG R 18.
M-614; 0.22 C, 17 Cr, 1.5 Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin
For pumps, marine hardware, valves; Type 431; corrosion resistant.

DORRENBERG R 25.
M-614; 0.2 C, 13 Cr, 0.4 Si, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin
For turbine blades, valves, cutlery; Type 420, stainless.

DORRENBERG R 45.
M-614; 0.40 C, 0.30 Mn, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS, 50,000 YS; 25 El; 55 RA; 195 Brin.
For valves, cutlery, turbine blades; Type 420; stainless.

DORRENBERG SA.
M-614; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, vessels; Type 302; stainless, austenitic.

DORRENBERG SAT.
M-614; 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, tanks, mixers; Type 321; stainless, austenitic.

DORRENBERG SAW.
M-614; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
For chemical plant equipment, tanks: Type 304; stainless, austenitic.

DORRENBERG SB.
M-614; 0.1 max C, 18 Cr, 9.5 Ni, 2 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks, Type 316; stainless, austenitic.

DORRENBERG SBT.
M-614, 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed 85,000 TS, 35,000 YS; 50 El. 65 RA; 160 Brin
For welded acid resistant chemical plant equipment, Type 316Ti, austenitic, stainless

DORRENBERG SBW.
M-614; 0.07 max C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe
Annealed: 90,000 TS, 40,000 YS, 45 El; 60 RA, 180 Brin.
For acid resistant chemical plant equipment, tanks; Type 317, stainless, austenitic

DORRENBERG SPEZIAL NR. 2
M-614, 0.40 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Hot rolled. 91,000 TS; 58,000 YS; 27 El, 50 RA; 200 Brin.
For fishplates, gears, bolts, fasteners, water hardened

DORRENBERG ST2
M-614; 0.70 C, 1.7 Si, 0.70 Mn, bal Fe.
For springs, punches, chisels, oil hardened, shock resistant.

DORRENBERG STP.
M-614; 0.67 C, 1.3 Si, 0.50 Mn, 0.5 Cr, bal Fe
For springs, punches, chisels; oil hardened, shock resistant.

DORRENBERG VNC4.
M-614; 0.40 C, Ni, Cr, Mo, bal Fe.
For gears, bolts, crankshafts, oil hardened, shock resistant.

DORRENBERG W 4
M-614, 0.30 C, 1.0 Si, 0.4 Mn, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For extrusion arms, punches, upsetters; oil hardened, tough.

DORRENBERG W 5.
M-614, 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For extrusion arms, punches, upsetters; oil hardened, hot work steel.

DORRENBERG W 9.
M-614; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion rams and liners, upsetters; oil hardened, hot work steel.

DORRENBERG WC11.
M-614; 0.30 C, 2.4 Cr, 0.25 V, 8.5 W, 2.0 Co, bal Fe.
For extrusion rams and liners, upsetters; oil hardened, hot work steel.

DORRENBERG WD1.
M-614; 1.2 C, 0.2 Cr, 0.1 V, 1.0 W, bal Fe.
For blanking and forming dies; oil hardened, wear resistant.

DORRENBERG Z 1A.
M-614; 1.1 C, Mo, V, bal Fe.
For cutters, blanking and forming dies; oil hardened, wear resistant.

DORRENBERG Z 1B.
M-614; 0.90 C, 1.9 Mn, 0.1 V, bal Fe.
For punches, blanking and forming dies; oil hardened, non-deforming.

DORRENBERG Z 3C.
M-614; C, alloy, bal Fe.
For machine tool parts; oil hardened.

DOS SPEZIAL.
M-1291, 0.3 C, 2.5 Cr, 0.2 Mo, 0.15 V, bal Fe.
For gears, pinions, bolts, studs, crankshafts; oil hardened, shock resistant.

DOUBLE BRONZE
England; 6.5 Al, skin of pure Cu, bal Cu.
For electrical equipment; wire.

DOUBLE CLOCHE 0.1
M-1546, 1.3 C, 5 W, bal Fe.
Hardened C 63-65 Rock.
For cold work tools, punches, bending dies, piercing tools, bearings.
Cold working steel, shock and wear resisting.
Water or oil hardening.

DOUBLE CLOCHE 2 3.
M-1546, 1.10 C, 0.5 Cr, 2.1 W, bal Fe
Hardened. C 60-64 Rock.
For cold working tools, punches, hobs, bending dies, drills, cutters.
Oil or water hardening Cold working steel, shock resisting.

DOUBLE CLOCHE E.
M-1546, 1.45 C, 3.25 W, 0.3 Cr, 0.25 V, bal Fe
For cold working tools, bending dies, punches, reamers, cutters
Cold, working steel, shock and wear resistant
Oil hardening.

DOUBLE CONQUEROR.
M-1406; 1.1-1.4 C, bal Fe.
For roll turning tools, rock drills, punches; water hardened, wear resistant

DOUBLE EXTRA BEST
M-1408; high C, W, bal Fe.
For turning tools; oil or water hardened

DOUBLE EXTRA LION.
M-1415, 0.75 C, 19 W, 4 Cr, 1.2 V, 2 Co, 0.5 Mo, bal Fe.
For drills, reamers, lathe and planer tools, hobs, broaches, high speed steel.

DOUBLE GEANT.
M-1118; 0.7 C, 18 W, 9 Co, 4 Cr, 2 V, 1 Mo, bal Fe.
For tools, dies, cutters, high speed steel.

DOUBLE GRIFFIN.
M-1112; 0.35 C, 1.75 Cr, 3.5 Ni, 0.3 Mn, bal Fe.
For shears, punches, pneumatic tools; hot work steel, oil hardened, shock resistant.

DOUBLE GRIFFIN SUPER CHISEL.
M-1112; C, alloy, bal Fe.
For tools, chisels; tough.

DOUBLE MUSHET.
M-233; C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, cutters; high speed steel.

DOUBLE RAPID.
M-1405; 0.8 C, 4.5 Cr, 18.5 W, 5.5 Co, 0.3 Mo, 1.2 V, bal Fe.
For lathe and planer tools, reamers, drills, hobs; high speed steel.

DOUBLE SATAN.
M-1043; 0.55 C, 5 W, 3.5 Cr, bal Fe.
For hot work tools and dies; hot work steel, oil hardened.

DOUBLE SEVEN.
M-210; 1.25 C, 12.5 Cr, 2.7 Co.
For shear blades, cold forging dies, blanking dies; air hardened, non-deforming.

DOUBLE SEVEN.
M-365; 1.3 C, 13.3 Cr, 3-4.5 Co, 0.25 Mo, 1 Ni, bal Fe.
For tools, broaches, lamination dies; non-deforming.

DOUBLE SIX.
M-210; 1.9 C, 12.5 Cr, 0.8 Mo, 0.25 V, bal Fe.
For dies, plug and ring gages, press tools; oil or air hardened, non-deforming.

DOUBLE SIX.
M-365; 2.25 C, 14 Cr, bal Fe.
For blanking and drawing dies, gages; non-shrinking.

DOUBLE SIX SUPER.
M-210; 1.9 C, 12.5 Cr, 0.8 Mo, 0.25 V, bal Fe.
Ht. Tr.: 275,000 TS; 210,000 YS; 1 El; C 58 Rock.
For blanking, coining and drawing dies.
Plug and ring gauges, mandrels, press tools, reamers, broaches. Non-shrinking. Air hardening

DOUBLE SPECIAL.
M-38; 1.3 C, 3-6 W, bal Fe.
For tools, finishing tools; shallow hardening.

DOUBLE SPECIAL.
M-618; 1.4 C, 5 W, 0.8 Cr, bal Fe.
For turning and finishing cutters; fast finishing, water hardened.

DOUBLE SUPER EXPRESS.
M-1408; 0.7 C, 22 W, 5 Cr, 1 V, bal Fe.
For cutters for asbestos and rubber; high speed steel.

DOUBLE SUPER HYDRA.
M-1411; 0.80 C, 18 W, 4.5 Cr, 1.75 V, 5 Co, bal Fe.
For broaches, drills, reamers, lathe tools; high speed steel.

DOUBLE TWELVE.
M-210; 0.35 C, 12.0 Cr, 12.0 W, 1.0 V, bal Fe
For master hobs for beryllium-copper, mold inserts in the plastic industry, brass die casting molds, extrusion dies.
Oil hardening.

DOUBLE YOU CHROME.
M-1113; 2.25 C, 13 Cr, bal Fe.
For tools, dies; non-shrink.

DOUBLE YOU DIE.
M-1113; 0.9 C, 3.75 Cr, bal Fe.
For tools, dies; air hardened.

DOUBLE YOU HOT STUFF.
M-1113; C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe.
For tools, hot dies; hot die steel.

DOUX.
M-1495; 0.20 C, 0.25 Si, 0.80 Mn, bal Fe.
Annealed: 47,000 TS; 28,000 YS; 35 El; 137 Brin.
For oil refinery tubes.

DOVER.
M-1705; 1.0 C, 0.25 Mn, 0.25 Si, bal Fe.
Water hardening tool steel. AISI W 1.

DOW METAL O1 replaced by AZ80A.

DOWMETAL AM60X1.
M-43; 6 Al, 0.25 Mn, 0.0004 Be, bal Mg.
For cast automobile wheels.
Tough and ductile.

DOWMETAL AZ91B replaced by AZ91B.

DOWMETAL G replaced by AM100A.

DOWMETAL H replaced by AZ63A.

DOWMETAL HK31A see HK31A.

DOWMETAL J replaced by AZ61A.

DOWMETAL ZK60A see ZK60A.

DRACO.
M-39, M-114; 0.66-1.15 C, 0.2 V, bal Fe.
For tools, stamping dies, cold heading dies, taps; high strength and toughness.

DRACO 3460.
M-1117; 0.15 C, 23 Cr, 14 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 50 El; B 83 Rock.
For heat treating boxes, furnace parts, salt pots, brazing fixtures, combustion chambers.
Type 309 stainless steel, austenitic, heat resistant

DRACO DV.
M-114, 1 C, 0.3 Mn, 0.45 V, bal Fe.
For cold header dies, edge tools; shock resistant.

DRAGON
M-1, 0.35 C, 0.55 Mn, 0.70 Cr, 0.25 Mo, bal Fe.
For bucket teeth, keys, studs, bolts, water hardening.

DRAWALLOY 240.
M-765; 0.2 C, 18 Cr, 8 Ni, bal Fe.
Cast: 240-260 Brin.
For hard surfacing welding rods; austenitic, non-magnetic.

DRAWING BRASS.
M-8, M-33; 67-70 Cu, 30-33 Zn.
Hard: 77,000 TS, 67,000 YS; 15 El; 50 RA; 145 Brin.
For seamless tubes, condensers and evaporators; deep drawing.

DREADNOUGHT.
M-38, 0.80 C, 0.28 Mn, 4.0 Cr, 18 W, 1.03 V, bal Fe.
Oil or air.
For tools, dies, punches, general purpose tools; high speed steel; R.H.C. 64 min.

DREWOSTA.
M-1294; 1.42 C, W, V, bal Fe.
For engravers tools, forming and blanking dies; water hardened, wear resistant.

DRILL.
M-377; 0.85 C, 0.50 Mn, 0.25 Si, bal Fe.
For drills, chisels, shear blades, axes, hammers; water hardening.

DRILLALLOY.
M-432; 0.65 C, 0.70 Mn, 0.40 Mo, bal Fe.
For mine drills, tools; water hardened.

DRILL ROD.
M-341; 1.2 C, bal Fe.
For drills, tools; water hardened.

DRILL ROD BRASS.
U.S.; 62 Cu, 35.5 Zn, 2.5 Pb.
For automatic screw machine parts; drills and turns easily.

DRIL-TEC 88.
M-717; hard carbides in non-ferrous matrix.
For hard surfacing using torch.
Wear and abrasion resistant.
For earth moving equipment, etc.

DRITTEL SILVER.
German; 66.6 Al, 33.3 Ag.
For ornamental trade.

DRIVER 30 ALLOY.
M-61; 98 Cu, 2 Ni.
Annealed: 30,000 TS.
Cold worked: 60,000 TS.
For resistances, precision resistors, rheostats, instruments.
Max. operating temperature 600°F in air

DRIVER 60 ALLOY.
M-61, 94 Cu, 2 Ni.
Annealed: 35,000 TS.
Cold worked: 70,000 TS.
For resistances, resistors, rheostats instruments.
Max. operating temperature 600°F in air.

DRIVER 90 ALLOY
M-61; 88 Cu, 12 Ni.
Annealed: 35,000 TS.
Cold worked 75,000 TS.
For resistances, rheostats, precision resistors, instruments.
Max. operating temperature 800°F in air.

DRIVER 180 ALLOY
M-61, 78 Cu, 22 Ni
Annealed: 50,000 TS
Cold worked: 100,000 TS
For resistances, precision resistors, rheostats, instruments
Max. operating temperature 1000°F in air.

DRW COPPER.
M-558, Electrolytic tough pitch copper.
For electrical applications and general usage in rod and wire applications.

DSC HIGH C.
M-157; 0.25-0.80 C, bal Fe.
For springs, water hardened.

DS-LEAD.
M-1656; 99.9 Pb, 0.1 PbO.
Sheet: 6000 TS; 5800 YS; 18 El; 6500 CS.
At 300°F: 3250 TS; 20 El
For chemical construction, storage batteries, counterweights, roofing, gutters.
Dispersion strengthened, fine-grained, corrosion resistant.

DTD.
England, 0.40 C, 3 Cr, 0.8 Mo, 0.2 V, bal Fe.
For gas turbine parts; creep resistant.

D.T.D. 49B.
British; 0.35-0.45 C, 1.00-1.75 Si, 0.5-1.0 Mn, 12.5-14.5 Cr, 12.5-14.5 Ni, 2-3 W, bal Fe.
For aircraft valves; austenitic

DTD 424.
Brit., Cu, Si, bal Al.
For castings; age-hardenable.

DUALOY.
M-358; C, W, bal Fe.
For tools, dies; water hardening.

DUCOL STEEL.
M-530; 0.3-0.5 C, 1.7 Mn, bal Fe.
For machinery parts; water hardened.

DUCOL W 21.
M-530; 0.23 C, 1.7 max Mn, 0.5 max Ni, 0.25 max Cr, bal Fe.
Cold drawn: 83,000-97,000 TS, 46,000 YS; 18-14 El.
For bridges, rail cars, building structures; good weldability.

DUCOL W 25.
M-530; 0.2 max C, 1.5 max Mn, 0.5 max Ni, 0.3 max Cr, 0.3 max Mo, bal Fe.
Tempered: 83,000 min TS; 61,000 min YS; 15 min El.
For bridges, rail cars, building structures; good weldability.

DUCOL W 30
M-530, 0.18 max C, 1.4 max Mn, 0.8 max Cr, 0.5 max Ni, 0.25 max Mo, 0.1 max V, 0.5 max Cu, bal Fe.
Tempered: 85,000 min TS; 66,000 min YS; 15 min El.
For building structures, rail cars, bridges; good weldability.

DUCTALLOY.
M-128, M-1099; 3.0-3.5 T.C., 2.0-2.5 Si, 0.15 Mg, 0.6 Mn, bal Fe.
Cast: 115,000 TS, 1 El; 230 Brin.
Annealed: 60,000 TS; 20 El; 175 Brin.
For machinery castings, gears, shafts; ductile cast iron.

DUCTALLOY 60
M-1099; 3.4-4.0 C, 2-3 Si, 0.2-0.6 Mn, 2 max Ni, bal Fe.
Cast. 60,000-80,000 TS, 45,000-60,000 YS; 15-10 El, 140-200 Brin
For valve and pump bodies, compressor heads, gear housings, nodular iron, ferritic.

DUCTALLOY 80
M-1099, 3.3-3.8 C, 2-3 Si, 0.2-0.6 Mn, 2 max Ni, bal Fe
Cast 80,000-110,000 TS, 60,000-75,000 YS; 10-3 El, 230-280 Brin
For anvils for forging hammers, impellers, cams, roll dies, nodular iron, pearlitic.

DUCTALLOY A50.
M-1099; 2.7-3.3 C, 2.2-3.2 Si, 1.5-2.5 Mn, 20-26 Ni, bal Fe
Cast 50,000-68,000 TS, 25,000-38,000 YS, 40-20 El; 120-150 Brin
For pumps and valve impellers, grids; nodular iron, austenitic, corrosion resistant.

DUCTALUMINUM 356S
M-1099; 0.20-0.40 Mg, 6.5-7.5 Si, 0.20 max Cu, 0.5 max Fe, 0.2 max Ti, bal Al
Heat treated: 42,000 TS, 35,000 YS, 3 El.
For aircraft castings, age-hardenable.

DUCTALUMINUM 356T
M-1099, 0.2-0.4 Mg, 6.5-7.5 Si, 0.20 max Cu, 0.5 max Mn, 0.2 max Ti, bal Al.
Heat treated: 38,000 TS, 28,000 YS; 6 El.
For aircraft castings; age-hardenable.

DUCTILE CECOLLOY.
M-474; 3.3-3.6 T.C., 2.2-2.6 Si, 0.5 Mg, bal Fe.
Cast and annealed: 60,000-80,000 TS; 40,000-60,000 YS; 10-5 El.
For castings, forging hammer components; good machinability, ductile cast iron.

DUCTILEND 70.
M-677; 0.06 C, 0.6 Mn, 0.4 Si, 0.1 Mo, bal Fe.
For welding electrodes; class E7018.

DUCTILEND 70 Mo.
M-677; 0.05 C, 0.8 Mn, 0.6 Si, 0.6 Mo, bal Fe.
For welding electrodes; class E7018-Al, carbon-molybdenum steel.

DUCTILEND 80.
M-677; 0.6 C, 0.8 Mn, 0.5 Si, 0.9 Ni, 0.15 Mo, bal Fe.
For welding electrodes; class E8018-C3, 1% nickel steel.

DUCTILEND 85.
M-677, 0.05 C, 1.0 Mn, 0.5 Si, 1.5 Ni, O.3 Mo, bal Fe.
For welding electrodes; class E9018M, for joints in HY80 and steels of 90,000-100,000 psi TS range.

DUCTILEND 90.
M-677; 0.06 C, 1.5 Mn, 0.4 Si, 0.45 Mo, bal Fe.
For welding electrodes; class E9018-D1, manganese-molybdenum steel of 90,000 psi tensile strength range.

DUCTILEND 100
M-677; 0.05 C, 1.4 Mn, 0.5 Si, 1.8 Ni, 0.35, bal Fe.
For welding electrodes; class E10018-M, for joints in HY80 and steels of 100,000-110,000 psi TS range.

DUCTILEND 110.
M-677, 0.05 C, 1.6 Mn, 0.4 Si, 2.2 Ni, 0.4 Mo, bal Fe
For welding electrodes; class E11018-M, for joints in HY 80 and "T" steel, etc, of 110-000-120,000 psi TS range.

DUCTILEND 120.
M-677, 0.05 C, 1.9 Mn, 0.55 Si, 0.5 Cr, 2.2 Ni, 0.45 Mo, bal Fe.
For welding electrodes, class E12018-M for joints in HY100 and "T" steel, etc., of 120,000 psi TS.

DUCTILE IRON.
M-1267; 3.3 C, 2.5 Si, 0.7 Mn, 0.05 Mg, bal Fe.
Cast: 60,000-90,000 TS, 45,000-65,000 YS, 10-2 El, 163-277 Brin.
For gears, crankshafts, hydraulic castings, high strength ductile iron.

DUCTILE IRON, FERRITIC.
M-68; 3-4 T.C., 1-3 Si, 0.10-0.60 Mn, 0.10 max P, 0-2 Ni, bal Fe.
Annealed 60,000 TS, 45,000 YS, 15 El, 143-207 Brin.
For pressure castings, maximum toughness, ductile cast iron.

DUCTILE IRON, HARDENED.
M-68; 3-4 T.C, 1-3 Si, 0.10-0.60 Mn, 0.10 max P, 0-2 Ni, bal Fe.
Heat treated: 120,000 TS; 9,000 YS; 2 El, 269-388 Brin.
For gears, dies, machine tool parts, ductile cast iron.

DUCTILE IRON, PEARLITIC
M-68, 3-4 T.C., 1-3 Si, 0.10-0.60 Mn, 0.10 max P, 0-2 Ni, bal Fe.
Normalized: 100,000 TS; 70,000 YS; 3 El, 225-302 Brin.
For gears, crankshafts, agricultural equipment; wear resistant, ductile cast iron.

DUCTILE IRON, SEMI-PEARLITIC.
M-68: 3-4 T.C., 1-3 Si, 0.10-0.60 Mn, 0.10 max P, 0-2 Ni, bal Fe.
Cast: 85,000 TS; 55,000 YS, 3 El; 200-280 Brin.
For heavy machinery castings; wear resistant, ductile cast iron.

DUCTILITE.
M-1282; 3.3-3.5 C, 2.2-2.5 Si, 0.7 Mn, 0.05 Mg, bal Fe.
Cast: 70,000-100,000 TS; 15-5 El; 210-250 Brin.
For earth moving equipment; ductile cast iron.

DUCTILOY see NAX HIGH TENSILE.

DUCTLIRON TYPE GS.
M-1256; 3.3 C, 0.7 Mn, 2.2 Si, 0.05 Mg, bal Fe.
Cast: 75,000 TS; 55,000 YS; 1-4 El; 217-269 Brin.
For gears, shafts, machine tool housings; ductile cast iron.

DUCTLIRON TYPE GSF.
M-1256; 3.3 C, 0.7 Mn, 2.2 Si, 0.05 Mg, bal Fe.
Cast: 60,000 TS; 45,000 YS; 5-10 El; 207 Brin.
Annealed: 20 El; 170 Brin.
For gears, shafts, machine tool housings, ductile cast iron.

DUDLEY'S BEARING METALS.
Eng ; 98 Sn, 1.6 Cu, 0.3 Pb.
For bearings.

DUDLEY'S BRONZE "B."
Eng ; 77 Cu, 8 Sn, 15 Pb
For bearings, bushings, heavy duty

DUDLEY'S BRONZE "K"
Eng., 77 Cu, 10.5 Sn, 12.5 Pb.
For bearings, bronze castings, heavy duty.

DUDLEYS PHOSPHOR BRONZE
Eng , 80 Cu, 10 Sn, 9.6 Pb, 0.8 P.
30,000 TS, 6 El, 55 Brin
For bearings, heavy duty.

DUEX.
M-1546, 0.88 C, 17.5 W, 8 Co, 1.5 V, 1.2 Mo, bal Fe
Hardened. C 64-66 Rock
For lathe machining high manganese steels, heavy duty lathe and planer tools, broaches, hobs, boring tools.
High speed steel, oil hardening High red-hardness

DUFOUR WHITE GOLD
Eng , 75 Au, 21.5 Pb, 4.5 Pt
For ornaments; corrosion resistant.

DUKANE
M-755, 0.4 C, bal Fe.
For gears, shafts; water hardening.

DUKANE DRILL ROD.
M-370, 0.95-1.05 C, bal Fe
For dowel pins, mandrels, screw machine parts, shafts, small tools
AISI Type W1 Water hardening tool steel.

DUKE-KIDD
M-358, 0.9 C, bal Fe
For tools, drills, taps; water hardened.

DUKE'S METAL
Eng., 12 Cr, 1.5 C, 4 Co, 0.6 Si, 0.4 W, 0.2 Mn, bal Fe.
For tools, dies, corrosion and heat resisting parts, non-deforming

DUKE'S METAL
Eng.; 40 Ni, 30 Cu, 30 Fe.
For corrosion resistant and heat resistant parts; corrosion and heat resistant.

DUKEX.
M-358; C, W, bal Fe.
For cutting tools; water hardening.

DULLRAY.
M-121; 33-35 Ni, 3-5 Cr, bal Fe.
46,000 TS.
For electrical resistances, motor starter resistances; for temperatures below dull red; known as "Ferrozoid."

DUMAT.
M-118; 46 Ni, 54 Fe, sheath of Cu.
Rolled: 70,000 TS; 18 El.
For glass to metal seals, lead-in wires; thermal expansion similar to soft glass.

DUMET.
M-104; 54 Fe, 46 Ni, plated with Cu.
82,000 TS; 54,600 YS; 38 El; 65 RA.
For resistance alloy for sealing in leads in electric light bulbs and radio tubes; platinite wire with an oxidized Cu plated coating.

DUMORE.
M-289; 0.95-1.05 C, 5.0-5.5 Cr, 0.95-1.25 Mo, bal Fe.
For blanking, forming and drawing dies; air hardened.

DUMOST NO. 1.
M-97; 0.85 C, 0.30 Mn, 0.30 V, bal Fe.
For punching, shearing and forming dies; water hardening.

DUMOST NO. 2
M-97; 0.95 C, 0.30 Mn, 0.30 V, bal Fe.
For punching, shearing, forming dies; water hardening.

DUMOST NO. 3
M-97; 1.1 C, 0.3 V, bal Fe.
For tools, drills, taps; water hardening.

DUMOST NO. 16.
M-97, 1.6 C, 0.3 V, bal Fe.
For reamers, special tools, water hardened, keen cutting edge

DUNELT 3
M-1413, 0.08-0.13 C, 0.30 max Si, 0.4-0.7 Mn, bal Fe
Normalized 58,000 TS; 45,000 YS; 30 El, 60 RA; 130 Brin
For staybolts, case hardened

DUNELT 4.
M-1413; 0.25-0.35 C, 0.5-1.1 Mn, 0.10-0.20 S, 0.6 max P, bal Fe
Heat treated 78,500-101,000 TS; 15 El
For bolts, nuts, studs, free-cutting, water hardened

DUNELT 5
M-1413, 0.10-0.20 C, 1.0-1.5 Mn, 0.10-0.20 S, 0.06 max P, bal Fe.
Heat treated 78,500 TS, 15 El
For nuts, bolts, studs, case hardened, free-cutting

DUNELT 6.
M-1413, 0.35-0.45 C, 0.4-1.0 Mn, 0.30 max Si, bal Fe.
Heat treated 92,000-112,000 TS, 22-18 El.
For gears, pinions, shafts, axles, machinery parts, water hardened.

DUNELT 7.
M-1413, 0.10-0.20 C, 1.0-1.5 Mn, 0.2-0.4 S, 0.05-0.20 P, bal Fe.
Cold drawn. 78,000-103,000 TS; 15 El
For fasteners, bolts, screws, nuts, studs, case hardened, free-cutting

DUNELT 10
M-1413; 0.28-0.35 C, 2.75-3.25 Ni, 0.30 max Cr, bal Fe.
Heat treated 100,000 TS; 74,000 YS, 22 El; 192 Brin.
For axles, shafts, tie rods, bolts, connecting rods; oil hardened, shock resistant.

DUNELT 14.
M-1413; 0.10-0.18 C, 0.30 max Si, 0.5-0.9 Mn, bal Fe.
Heat treated: 72,000 TS; 20 El; 50 RA.
For cams, gears, camshafts; case hardened.

DUNELT 15.
M-1413; 0.10-0.15 C, 2.75-3.50 Ni, 0.30 max Cr, bal Fe.
Heat treated: 101,000-135,000 TS; 18 El; 45 RA.
For gears, cams, camshafts, valve tappets; case hardened, shock resistant.

DUNELT 16.
M-1413; 0.10-0.15 C, 3.0-3.5 Ni, 0.8-1.1 Cr, bal Fe.
Heat treated: 123,000 TS; 18 El.
For gears, cams, camshafts, worm gears; case hardened, shock resistant.

DUNELT 17
M-1413; 0.08-0.14 C, 4.6-5.4 Ni, 0.30 max Cr, bal Fe
Heat treated: 103,000 TS, 20 El.
For gears, cams, camshafts, valve tappets; case hardened, shock resistant

DUNELT 18.
M-1413, 0.10-0.16 C, 4.6-5.4 Ni, 0.30 max Cr, 0.30 Mo, bal Fe.
Heat treated: 145,000 TS; 14 El.
For gears, cams, camshafts, valve tappets; case hardened, shock resistant

DUNELT 20.
M-1413; 0.12-0.20 C, 1.5-2.0 Ni, 0.2-0.3 Mo, bal Fe
Heat treated. 101,000-135,000 TS, 18 El.
For gears, cams, camshafts, valve tappets; case hardened, shock resistant

DUNELT 21
M-1413, 0.15-0.25 C, 1.0 max Mn, 0.35 max Si, bal Fe.
Hot rolled 56,000 TS; 25 El
Cold drawn: 63,000 TS, 17 El
For fasteners, screws, bolts, machinery parts, case hardened

DUNELT 26.
M-1413, 0.35-0.45 C, 0.5-1.0 Ni, 0.4-1.0 Mn, 0.3 max Si, bal Fe.
Heat treated: 90,000-112,000 TS, 22 El
For axles, gears, crankshafts, connecting rods; oil hardened, tough.

DUNELT 33
M-1413, 0.30-0.45 C, 0.80-1.2 Cr, 0.6-1.0 Mn, 0.3 max Si, bal Fe
Heat treated: 100,000-145,000 TS, 24-18 El
For shafts, gears, bolts, studs, oil or water hardened, tough.

DUNELT 34
M-1413, 0.30-0.45 C, 0.90-1.5 Cr, 0.2-0.4 Mo, 0.5-0.8 Mn, bal Fe.
Heat treated: 112,000-168,000 TS; 22-15 El.
For crankshafts, connecting rods, bolts; oil hardened, tough

DUNELT 36.
M-1413, 0.35-0.50 C, 1.0-1.5 Cr, 0.15-0.25 V, bal Fe
Heat treated. 123,000-168,000 TS; 20-15 El; 241-341 Brin.
For crankshafts, connecting rods, bolts; oil or water hardened, tough

DUNELT 39.
M-1413, 0.15-0.30 C, 1.3-1.8 Mn, 0.30 max Si, bal Fe
Heat treated 90,000-125,000 TS, 20 El; 163-225 Brin.
For gears, cams, camshafts, bolts; case hardened, tough.

DUNELT 40.
M-1413; 0.3-0.4 C, 1.2-1.8 Mn, bal Fe.
Heat treated: 90,000-135,000 TS; 20 El, 163-293 Brin.
For gears, axles, crankshafts; oil or water hardened

DUNELT 41.
M-1413; 0.30-0.45 C, 1.1-1.4 Mn, 0.15 max S, bal Fe.
Heat treated: 90,000-125,000 TS; 15 El; 163-293 Brin.
For gears, shafts, crankshafts, axles; free-cutting, oil or water hardened.

DUNELT 50.
M-1413; 0.25-0.40 C, 1.2-1.8 Mn, 0.20-0.40 Mo, bal Fe
Heat treated: 100,000-145,000 TS; 22-16 El; 192-352 Brin.
For crankshafts, axles, studs, bolts, nuts; oil or water hardened, tough.

DUNELT 51.
M-1413; 0.30-0.40 C, 1.3-1.8 Mn, 0.35-0.55 Mo, bal Fe.
Heat treated: 123,000-168,000 TS; 20-16 El; 248-341 Brin.
For crankshafts, axles, studs, connecting rods; oil hardened, tough.

DUNELT 53.
M-1413; 0.5-0.6 C, 0.5-0.9 Mn, 0.8 max Ni, bal Fe.
Heat treated. 112,000-135,000 TS; 18-15 El; 223-286 Brin.
For gears, pinions, axles, shafts, bolts; oil hardened.

DUNELT 55.
M-1413; 0.25-0.33 C, 0.45-0.70 Mn, 2.75-3.75 Ni, 0.5-1.0 Cr, bal Fe.
Heat treated: 112,000-145,000 TS; 22-18 El; 223-311 Brin.
For crankshafts, connecting rods, propeller shafts, oil hardened, shock resistant.

DUNELT 60.
M-1413, 0.32-0.28 C, 3.0-3.75 Ni, 0.5-1.0 Cr, bal Fe.
Heat treated. 135,000-168,000 TS; 17 El; 262-352 Brin.
For crankshafts, connecting rods, propeller shafts; oil hardened, shock resistant.

DUNELT 61.
M-1413; 0.15 max C, 1.0 max Mn, 1.0 max Ni, 12 min Cr, bal Fe.
Heat treated: 78,000-103,000 TS; 25 El; 140-223 Brin
For valves, pump spindles, golf club heads, corrosion resistant, oil hardened.

DUNELT 62.
M-1413; 0.15-0.35 C, 12 min Cr, 1.0 max Ni, bal Fe.
Heat treated: 100,000-125,000 TS, 20 El; 192-269 Brin.
For chemical and textile plant equipment; corrosion resistant.

DUNELT 63.
M-1413; 0.25 max C, 15-20 Cr, 1 min Ni, bal Fe.
Heat treated: 125,000 TS; 15 El, 241 Brin.
For chemical and textile plant equipment, corrosion resistant.

DUNELT 64.
M-1413; 0.27-0.44 C, 2.3-2.8 Ni, 0.5-0.9 Cr, 0.4-0.7 Mo, bal Fe.
Heat treated: 123,000-225,000 TS, 18-20 El; 255-444 Brin.
For axles, gears, crankshafts, connecting rods, oil hardened, shock resistant.

DUNELT 65.
M-1413; 0.22-0.32 C, 2.75-3.25 Ni, 1.0-1.4 Cr, 0.65 max Mo, 0.25 max V, bal Fe.
Heat treated: 125,000-168,000 TS; 18-16 El, 248-352 Brin.
For axles, gears, crankshafts, shafts, bolts; oil hardened, shock resistant.

DUNELT 67.
M-1413; 0.15-0.35 C, 3.0-3.5 Cr, 0.3-0.8 Mo, 0.4 max Ni, bal Fe.
Heat treated: 103,000-168,000 TS; 20-15 El; 203-341 Brin.
For cylinders, crankpins, gears, bolts; oil hardened, tough.

DUNELT 69.
M-1413; 0.35-0.45 C, 3.25-3.75 Ni, 0.30 max Cr, bal Fe.
Heat treated: 123,000-145,000 TS; 20-18 El; 248-302 Brin.
For connecting rods, axles, crankshafts; oil hardened, shock resistant.

DUNELT 82M.
M-1413; 0.12-0.18 C, 3.8-4.5 Ni, 1.0-1.4 Cr, 0.15-0.35 Mo, bal Fe.
Heat treated: 190,000 TS; 12 El.
For gears, cams, camshafts, fasteners; case hardened, shock resistant.

DUNELT 83.
M-1413, 0.4-0.5 C, 3.0-3.75 Si, 0.5 max Ni, 7.5-9.5 Cr, bal Fe
Annealed: 255 Brin.
For heat resistant valves; corrosion and heat resistant

DUNELT 84.
M-1413; 0.30-0.50 C, 12-16 Cr, 2-4 W, 0.55 max Mo, bal Fe.
Annealed: 302 Brin.
For high duty valves, corrosion and heat resistant

DUNELT 88.
M-1413, 0.20 max C, 8-10 Ni, 16-20 Cr, bal Fe
Heat treated: 7[illegible],000 TS; 30 El
For chemical and dye plant equipment; stainless, austenitic.

DUNELT 90
M-1413, 0.9-1.1 C, 1.0-1.5 Cr, 0.30-0.75 Mn, 0.25 max Ni, bal Fe.
Annealed: 229 Brin
For ball and roller bearings, liners, oil and water hardened, wear resistant.

DUNELT 100.
M-1413; 0.35-0.45 C, 0.45-0.65 Mn, 1.3-1.8 Ni, 0.90-1.4 Cr, bal Fe
Heat treated: 125,000-145,000 TS, 18 El; 248-302 Brin
For gears, pinions, shafts, axles; oil hardened, shock resistant.

DUNELT 101.
M-1413, 0.35-0.45 C, 0.9-1.4 Cr, 0.20-0.35 Mo, 1.3-1.8 Ni, bal Fe
Heat treated: 112,000-224,000 TS, 20-8 El; 217-444 Brin.
For gears, pinions, shafts, axles, bolts; oil hardened, shock resistant

DUNELT 128.
M-1413; 0.25-0.35 C, 3.9-4.5 Ni, 1.1-1.5 Cr, bal Fe.
Heat treated. 224,000 TS; 10 El, 444 Brin
For camshafts, gears, bolts; oil hardened, shock resistant.

DUNELT 129.
M-1413; 0.25-0.35 C, 3.75-4.5 Ni, 1.0-1.5 Cr, 0.2-0.4 Mo, bal Fe.
Heat treated: 224,000 TS; 12 El; 444 Brin.
For gears, pinions, shafts, bolts; oil hardened, shock resistant.

DUNKIRK EZ.
M-1; 1.3 C, 1.0 Mn, 1.4 Si, 0.25 Cr, 1.25 Mo, bal Fe.

For dies, gauges, forming rolls, bushings, liners; free machining.

DUNNLEVIC & JONES ANTIFRICTION METAL.
Eng.; 60 Pb, 20 Sb, 20 Zn.
For bearings, bushings; Babbitt.

DUNNLEVIC & JONES RUSSIAN.
Russian; 80 Zn, 8 Cu, 12 Sb.
For bearings; antifriction.

DUPLEX.
M-627; 0.9-1.1 C, 0.2 Si, 0.2 Mn, bal Fe.
Water Hardened: 200,000-216,000 TS; 138,000-152,000 YS; 11-13 El; 32-35 RA; 388-600 Brin
For taps, drills, reamers, punches, stamps, knurls, mandrels.
Type W1 water hardening

DUPLEX C.H. NO. 1.
M-38; 0.10 C, 3.5 Ni, 1.5 Cr, bal Fe.
Heat treated: 195,000 TS; 170,000 YS; 15 El; 50 RA; 321-375 Brin.
For carburized parts, camshafts, connecting rods; case-hardened steel.

DUPLEX C.H. NO. 2.
M-38; 0.20 C, 1.7 Ni, 1.0 Cr, bal Fe.
Heat treated: 165,000 TS; 140,000 YS; 12 El; 50 RA; 260-302 Brin.
For carburized parts, gears, pinions, case-hardened steel

DUPLEX C.H. NO. 3
M-38; 0.15 C, 3 Ni, 0.7 Cr, bal Fe.
Heat treated: 170,000 TS, 155,000 YS; 14 El, 48 RA; 296-311 Brin
For carburized parts; case-hardened steel

DUPLEX GEAR NO 1.
M-38, 3.5 Ni, 1.25 Cr, 0.40 C, bal Fe
Annealed: 95,000 TS, 65,000 YS; 29 El; 62 RA; 187 Brin
Heat treated: 275,000 TS; 24,000 YS, 11 El; 37 RA, 490 Brin
For gears, shafts, axles, crankshafts; oil hardening.

DUPLEX GEAR NO. 2.
M-38, 1.5 Ni, 1.0 Cr, 0.50 C, bal Fe
Annealed: 98,000 TS; 60,000 YS; 25 El, 58 RA, 196 Brin.
Heat treated. 265,000 TS; 220,000 YS, 9 El; 28 RA; 512 Brin
For gears, shafts, axles, crankshafts, oil hardening

DUPLEX GEAR NO. 3.
M-38; 3.0 Ni, 0.75 Cr, 0.35 C, bal Fe
Annealed: 100,000 TS; 60,000 YS, 25 El; 59 RA
Toughened: 135,000 TS; 110,000 YS, 18 El, 56 RA, 311 Brin
For gears, shafts, axles, crankshafts; oil hardening

DU PONT D-14.
M-522; 5 Zr, bal Cb
Rolled: 75,000 TS; 60,000 YS.
For hot surfaces on space re-entry vehicles; high heat resistance.

DU PONT D-36.
M-522; 10 Ti, 5 Zr, bal Cb
Rolled: 80,000 TS; 70,000 YS
For hot surfaces on space re-entry vehicles, high heat resistance.

DUPONT FA 22.
M-522, 0.07 C, 29 Ni, 3 Cu, 2 Mo, bal Fe.
For chemical plant equipment; resists H_2SO_4.

DUPONT NO. 1364.
M-522; 0.07 max C, 2.5 Si, 0.75 Mn, 20.5 Cr, 28.5 Ni, Cu, bal Fe.
Cast: 72,000 TS; 35,000 YS; 45 El; 150 Brin.
For heat and corrosion resistant castings; heat and corrosion resistant.

DUPONT METAL.
M-308; 96 Cu, 3 Si, 1 Mn, 0.1 Fe.
For bolts, screws, turnbuckles for airplanes; same as "Everdur"; non-corrosive.

DUQUESNE SPECIAL.
M-451; C, Cr, Mo, bal Fe.
For rolls, subjected to severe service.

DUR 500.
M-459; 1.0 C, 1.8 Mn, 0.25 Si, 1.8 Cr, 0.1 Al, 0.2 Ti, bal Fe.
For welding electrode

DURABIL.
M-358; C, bal Fe.
For tools and dies; water hardening.

DURACAST No. 7 see WEST No 7, etc

DURACHROME.
M-513; 2.0 C, 1.25 Si, 3 Cr, 5 Mo, bal Fe.
For valve seat inserts; alloy cast iron.

DURACID
M-323, 16 Si, 3 C, bal Fe. Cast.
For chemical apparatus; corrosion resistant; cast iron.

DURAFLEX.
M-8, 1-10 Sn, 0.01-0.30 P, bal Cu.
O-temper 55,000 TS
H-temper: 72,000 TS
Spring temper: 91,000 TS.
For springs, clips, diaphragms, P-Bronze, high endurance limit

DURAL.
M-4, 91.7-93.9 Al, 6-4 Cu, 0.63-0.59 Mn, 0.46 Mg, 0.8 Fe, 0.2 Si, 0.11 Cr.
For light alloy parts, aircraft structures; age-hardenable

DURAL A
M-487; C, alloy, bal Fe.
For turning tools.

DURAL B
M-487, C, alloy, bal Fe.
For coal cutter picks, for welding of hard facing material, abrasion resistant.

DURAL C
M-487, C, alloy, bal Fe
For valve parts, dry battery manufacture; chemical and abrasive resistance.

DURALFA
M-658, Al alloy
For light alloy parts.

DURALIMIN
Russia; 4 Cu, bal Al.
For light alloy parts; age-hardenable.

DURALINE
M-435, 0.35 C, 1.3 Si, 3.5 Cr, 0.85 V, 4.25 Mo, bal Fe.
At 1000°F: 216,000 TS; 8.5 El; 28.3 RA; 633 Brin.
For extrusion tools and dies; high hot strength and hardness.

DURALINOX.
French; 4.5 Mg, 95.5 Al
For light alloy parts; formerly "Alumag."

DURALINOX.
M-767; 7 Mg, bal Al.
Rolled: 18-22 El.
For floors, partitions.

DURALINOX 5.
M-767; 5 Mg, 0.5 Mn, bal Al.
For light alloy parts; corrosion resistant.

DURALINOX P.
M-767; 12 Mg, 0.5 Mn, bal Al.
For light alloy parts; corrosion resistant.

DURALIT.
French; 3 Cu, 0.5 Ni, 0.5 Mg, 0.7 Si, 1 Ti, bal Al.
For forged connecting rods; age-hardenable.

DURALITE.
M-541, M-1219; 3 Cu, 0.7 Si, 0.5 Ni, 0.5 Mg, 1.5 Fe, 0.2 Ti, bal Al.
Aged: 55,000-67,000 TS; 41,000-51,000 YS; 18-10 El; 115-140 Brin.
For auto and aircraft parts, pistons; age-hardenable.

DURALITE 35.
M-541; 3.3-3.8 Cu, 1.3-1.6 Fe, 0.5-0.7 Si, 0.5-0.7 Mg, 0.05-0.15 Ti, 0.5-0.8 Ni, bal Al.
TA Temper: 56,000-65,000 TS; 42,000-50,000 YS; 9-15 El; 125-145 Brin.
For pistons, fasteners, bolts.
Age-hardenable. High strength.

DURALITE 35.
M-624; 3.3-3.8 Cu, 1.3-1.6 Fe, 0.5-0.7 Si, 0.55-0.75 Mg, bal Al.
Annealed. 28,000 TS; 18,000 YS; 15 El, 55 Brin.
TA-Temper: 64,000 TS; 50,000 YS; 9 El, 145 Brin.
For general engineering components, structures, fittings, fasteners, bolts.
Age-hardenable, high strength.

DURALLOY.
M-465; 1-3.5 Ni, 1-2 Cr, C, bal Fe.
For castings; cast steel.

DURALOY.
M-210, 1.3-1.4 C, 0.5 max Si, 13-15 Mn, 1.5-1.7 Cr, bal Fe.
For wear plates, tread plates, wear and abrasion resistant castings.

DURALOY.
M-1120, 0.25 C, 23-30 Cr, bal Fe.
Annealed: 95,000 TS; 60,000 TS; 25 El, 200 Brin
For heat treating boxes, furnace parts, fittings, valves, exhaust manifolds.
Type 446 stainless steel, heat and corrosion resistant

DURALOY NO 15-35
M-45; 0.3 C, 35 Ni, 15 Cr, bal Fe
Cast: 69,000 TS, 2 El.
For furnace parts; resists heat to 2100°F; can be forged or rolled only at high temperatures.

DURALOY "18-8."
M-45; 0.5 Mn, 0.2 max C, 7-10 Ni, 17-20 Cr, bal Fe.
Rolled: 115,000 TS; 80,000 YS; 50 El.
Cast: 80,000 TS, 35,000 YS, 35 El.
For stainless articles; stainless, resists heat to 1600°F.

DURALOY 18-8S.
M-45; 17-19 Cr, 7-9 Ni, 0.07 max C, 1.0 Mn, bal Fe.
Cast: 65,000 TS; 35,000 YS; 35 El; 180 Brin.
For stainless steel castings; heat and corrosion resistant.

DURALOY 18-8 SMO.
M-45; 17-19 Cr, 7-9 Ni, 0.07 max C, 2-4 Mo, 1.0 Mn, bal Fe.
Cast: 65,000 TS; 35,000 YS; 35 El; 180 Brin.
For stainless steel castings; heat and corrosion resistant.

DURALOY 25-20 Mo.
M-45; 24-26 Cr, 19-21 Ni, 0.20 C, 2-3 Mo, bal Fe.
Cast: 65,000 TS; 45,000 YS; 20 El; 185 Brin
For stainless steel castings; heat and corrosion resistant.

DURALOY "A."
M-45; 0.5 Mn, 0.2-1.0 C, 27-30 Cr, bal Fe.
Rolled: 80,000-90,000 TS; 60,000-70,000 YS; 10-27 El; 15-45 RA.
Cast: 40,000-50,000 TS; 30,000-40,000 YS; 1 El; 0-2 RA.
For valves and pump parts, furnace parts, rabble arms; resists oxidation, corrosion and abrasion.

DURALOY "B."
M-45; 0.5 Mn, 0.2 max C, 16-18 Cr, bal Fe.
Rolled: 95,000 TS; 75,000 YS; 35 El; 150 Brin.
Cast: 80,000-90,000 TS; 60,000-70,000 YS; 10-19 El; 160 Brin.
For valves and pump parts, furnace parts, rabble arms; resists heat to 1550°F; corrosion resisting.

DURALOY "C."
M-45, 0.3 C, 12-14 Cr, bal Fe.
Cast: 100,000-110,000 TS, 75,000-85,000 YS.
For furnace parts, heat resisting to 135°F.

DURALOY CA
M-45, 0.3 C, 12-14 Cr, bal Fe
For dies, extrusion liners; corrosion resistant.

DURALOY CA-15
M-45, 0.15 max C, 11-14 Cr, bal Fe
Heat treated. 100,000-203,000 TS; 75,000-173,000 YS; 28-6 El, 62-9 RA, 185-415 Brin
For pumps, valves, bushings, gears, impellers, ferritic, corrosion resistant, Type 410

DURALOY CA40
M-45, 0.30-0.40 C, 11-14 Cr, bal Fe
Annealed 95,000 TS, 60,000 YS; 25 El, 190 Brin
Heat treated. 220,000 TS, 165,000 YS, 1 El; 470 Brin
For fan blades, oil pump pistons, chemical plant equipment, heat resistant to 1200°F.

DURALOY CB
M-45, 0.2 C, 16-18 Cr, bal Fe.
Cast 90,000 TS; 70,000 YS, 15 El
For chemical equipment, pump parts, valves, corrosion resistant, resists heat to 1500°F.

DURALOY CB-30.
M-45, 0.30 max C, 18-22 Cr, bal Fe
For valve sleeves, chemical equipment impellers, corrosion resistant.

DURALOY CC
M-45, 0.2 C, 27-30 Cr, bal Fe.
Cast: 50,000 TS, 40,000 YS, 1 El.
For pumps, valves, rabble arms and blades; corrosion and heat resistant up to 2100°F.

DURALOY CC-50.
M-45, 0.50 max C, 26-30 Cr, max Ni, bal Fe.
For lead pots, pump and valve bodies, furnace parts; heat and corrosion resistant.

DURALOY CE30.
M-45, 0.30 max C, 26-30 Cr, 3-11 Ni, bal Fe.
Cast. 95,000 TS; 60,000 YS; 15 El; 170 Brin.
Annealed 97,000 TS; 63,000 YS; 18 El; 170 Brin.
For pumps, valves, pipe fittings, chemical plant equipment, ferritic, corrosion resistant.

DURALOY CF.
M-45; 0.1 C, 7-9 Ni, 17-21 Cr, bal Fe.
Heat treated: 75,000 TS, 40,000 YS, 50 El.
For pump parts, valves, digesters; corrosion resistant; resists oxidation up to 1500°F.

DURALOY CF-7.
M-45; 0.07 max C, 18-20 Cr, 8-10 Ni, bal Fe.
For valves, impellers, autoclaves, pipe fittings; corrosion resistant; austenitic.

DURALOY CF-7C.
M-45; 0.07 max C, 18-20 Cr, 8-10 Ni, Cb, bal Fe.
For corrosion resistant parts, welded structures; corrosion resistant, austenitic, stabilized.

DURALOY CF-7M.
M-45; 0.07 max C, 18-20 Cr, 8-10 Ni, 2-3 Mo, bal Fe.
For valves, autoclaves; acid resistant; austenitic.

DURALOY CF-7Se.
M-45; 0.07 max C, 18-20 Cr, 8-10 Ni, Se, bal Fe.
For valves, fittings, autoclaves; free-cutting, stainless, austenitic.

DURALOY CF-10.
M-45, 0.10 max C, 18-20 Cr, 8-10 Ni, bal Fe.
Cast.
For valves, autoclaves, impellers; austenitic, stainless.

DURALOY CF-10M.
M-45, 0.10 max C, 18-20 Cr, 8-10 Ni, 2-3 Mo, bal Fe.
For valves, fittings; resists salt water, austenitic, stainless.

DURALOY CF-16
M-45, 0.16 max C, 18-20 Cr, 8-10 Ni, bal Fe.
Annealed: 77,000 TS, 40,000 YS; 52 El, 150 Brin
For valves, impellers, autoclaves, stainless, austenitic, non-magnetic.

DURALOY CF-16M
M-46, 0.16 C, 18-20 Cr, 8-10 Ni, 2-3 Mo, bal Fe.
For valves, autoclaves, fittings; acid resistant, austenitic

DURALOY CG-7.
M-46, 0.07 max C, 20-22 Cr, 10-12 Ni, bal Fe
For valves, impellers, pump casings. austenitic, stainless

DURALOY CG-7C
M-45, 0.07 max C, 17-20 Cr, 10 Ni, Cb, bal Fe.
For valves, fittings, autoclaves. stabilized, austenitic, stainless

DURALOY CG-7M.
M-45, 0.07 C, 17-20 Cr, 10-14 Ni, 2-3 Mo, bal Fe
For paper and rayon industry equipment, valves, rolls, piping, stainless, austenitic

DURALOY CG-10
M-46; 0.10 max C, 20-22 Cr, 10-12 Ni, bal Fe
For valves, autoclaves, pipe fittings, stainless, austenitic.

DURALOY CG-16.
M-46; 0.16 max C, 20-22 Cr, 10-12 Ni, bal Fe.
For valves, impellers, autoclaves; austenitic, stainless

DURALOY CG-16SE
M-46, 0.16 max C, 17-20 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
For valves, fittings, autoclaves; austenitic, stainless, free cutting

DURALOY CH-10
M-45, 0.10 max C, 22-26 Cr, 12-15 Ni, bal Fe
For pump bushings, liners, roasting equipment, stainless, austenitic.

DURALOY CH-20.
M-45; 0.20 max C, 22-26 Cr, 12-15 Ni, bal Fe.
For chemical roasting equipment; heat and corrosion resistant

DURALOY CK25.
M-45; 0.2 C, 25 Cr, 20 Ni, bal Fe.
For carburizing and heat treating boxes; heat resistant.

DURALOY CM-25.
M-45; C, 19-22 Ni, 8-11 Cr, bal Fe.
For corrosion resistant parts; for special applications.

DURALOY CT-7.
M-45; 0.07 C, 15 Cr, 35 Ni, bal Fe.
For special food and dairy process equipment; heat and corrosion resistant.

DURALOY DF-20.
M-45; 0.20 max C, 18-20 Cr, 8-10 Ni, bal Fe.
For valves, autoclaves, impellers, stainless, austenitic

DURALOY "H"
M-45; 2.75 C, 27-30 Cr, bal Fe
Cast: 50,000-60,000 TS; 0 El; 450-500 Brin
For abrasion resisting castings, hard surface welding rods, heat resisting, abrasion resisting.

DURALOY H-2
M-45; 1.5 C, 12 Cr, bal Fe
For dies, conveyor bars and plates, molds; abrasion resistant, heat treatable.

DURALOY HA
M-45, 0.15 C, 11-14 Cr, 0.9-1.2 Mo, bal Fe
Annealed 95,000 TS, 65,000 YS, 23 El; 60 RA, 180 Brin
Normalized 107,000 TS, 81,000 YS, 21 El, 56 RA; 220 Brin.
For furnace rollers and conveyors, fan blades, heat and corrosion resistant

DURALOY HC
M-45, 0.5 max C, 26-30 Cr, 4 max Ni. 0.5 max Mo, bal Fe
Cast 70,000 TS, 65,000 YS; 2 El, 190 Brin.
Aged 115,000 TS, 80,000 YS, 18 El, 230 Brin.
For roasting furnaces, rabble arms, tuyeres, blowers, heat resistant

DURALOY HCA
M-45, C, 28 Cr, bal Fe
For screen conveyors, pumps, corrosion resistant

DURALOY HCN
M-45, C, 25 Cr, 12 Ni, bal Fe
For jig grates, heat and corrosion resistant.

DURALOY HD
M-45, C, 26-30 Cr, 3-7 Ni, bal Fe.
Cast
For oil and gas burner parts, heat and corrosion resistant.

DURALOY HE
M-45, C, 26-30 Cr, 8-11 Ni, bal Fe
For chains, conveyors, furnace parts; resists high S-atmosphere, corrosion resistant

DURALOY HF
M-46, C, 17-20 Cr, 8-10 Ni, bal Fe.
For furnace dampers, glass kiln convevor rolls; heat and corrosion resistant.

DURALOY HH
M-45, 0.2 C, 9-13 Ni, 23-28 Cr, bal Fe
Cast 70,000 TS, 45,000 YS, 50 El.
For furnace parts, soot blowers, kiln parts, resists oxidation up to 2100°F

DURALOY HI.
M-45; C, 26-33 Cr, 14-17 Ni, bal Fe.
For retorts for distillation of Mg, heat and corrosion resistant.

DURALOY HL.
M-45; 0.2 C, 9-13 Ni, 23-28 Cr, bal Fe.
For furnace parts; heat resistant.

DURALOY HN.
M-45; 18-22 Cr, 23-26 Ni, bal Fe.
For heat treating furnaces and boxes; heat and corrosion resistant.

DURALOY-HOM.
M-45; nickel alloy.
At 1600°F: 33,000 TS.
At 2000°F: 13,500 TS.
For high temperature castings; maintains high working strength to 2200°F.

DURALOY HP.
M-45; C, 28-32 Cr, 29-31 Ni, bal Fe.
For oil cracking equipment; heat and corrosion resistant.

DURALOY HT.
M-45; 0.2 C, 34-37 Ni, 13-17 Cr, bal Fe.
Cast: 60,000 TS; 35,000 YS; 5 El.
For furnace parts; retorts; heat resistant.

DURALOY HU.
M-45; C, 17-21 Cr, 37-41 Ni, bal Fe.
Cast.
For salt pots, retorts, annealing boxes; heat and corrosion resistant.

DURALOY HW.
M-45; 0.02 C, 14 Cr, 60 Ni, bal Fe.
Cast: 68,000 TS; 36,000 YS; 4 El; 179 Brin.
Aged: 75,000 TS; 38,000 YS, 4 El; 205 Brin
For furnace parts, retorts, heat treating boxes; corrosion and heat resistant.

DURALOY HX.
M-45; 0.2 C, 15-19 Cr, 64-68 Ni, bal Fe.
Cast: 75,000 TS; 50,000 YS; 14 El.
For furnace parts, transmission chains, combustion chambers.
Heat and corrosion resistant.

DURALOY MH.
M-45; C, 28 Cr, bal Fe.
For sand blast segments, sand pumps; heat and abrasion resistant.

DURALOY "N."
M-45; 0.25-0.50 C, 20-30 Cr, 8-14 Ni, bal Fe.
Rolled: 95,000-130,000 TS; 60,000-105,000 YS; 55-45 El; 65-50 RA; 160-260 Brin.
Cast: 85,000-110,000 TS, 40-30 El.
Resists heat to 2100°F; can be rolled or forged; for furnace parts, grids.

DURALOY NSMO.
M-45; 23-25 Cr, 11-13 Ni, 0.15 max C, 2-3 Mo, bal Fe.
Cast: 75,000 TS; 35,000 YS; 25 El; 195 Brin.
For stainless steel castings; heat and corrosion resistant.

DURALOY R.
M-45; C, 17 Cr, bal Fe.
For plungers, tumbler molds and valves; corrosion resistant.

DURALPLAT
M-457; base metal of Cu containing Duralumin coated with a Cu free Duralumin
For light alloy parts; Brit. Pat. 318999; high corrosion resistance.

DURALUM
Germ.: 79 Al, 11 Mg, 10 Cu, 0.5 P.
For light alloy parts; non-hardened.

DURALUMIN.
M-4; 3.5-4.5 Cu, 0.3-0.6 Mg, 0.0-0.8 Mn, 0.4-1.0 Fe, 0.0-1.0 Si, bal Al.
Annealed: 32,000-36,000 TS; 7,000-10,000 YS; 34 El; 45-55 Brin.
Heat treated: 63,000 TS; 30,000-40,000 YS; 18-25 El.
For airplane and dirigible construction; same as "Alcoa No. 17"; age-hardening alloy.

DURALUMIN 3L-1.
England; 4.5 Cu, bal Al.
For housings, cases, structures, screw machine products; age-hardenable, high strength.

DURALUMIN 3L-3.
England; 4.5 Cu, bal Al.
For housings, cases, structures, screw machine products; age-hardenable, high strength.

DURALUMIN 681A.
M-254, M-338, M-457; 4.5 Cu, 0.5 Mg, 0.6 Mn, bal Al.
For light alloy parts, age-hardenable.

DURALUMIN 681B.
M-768, M-457, M-254; 4.5 Cu, 0.5 Mg, 0.6 Mn, bal Al.
Heat treated: 65,000 TS; 45,000 YS
For light alloy parts, heat treatable.

DURALUMIN 681H.
M-254, M-768, M-338; 2.5 Cu, 0.5 Mg, bal Al
Heat treated: 51,000 TS; 25 El
For light alloy parts, heat treatable.

DURALUMIN 681K.
M-768; M-457, M-254, M-767; 0.2 Mg, bal Al.
Heat treated: 31,000 TS, 20 El
For light alloy parts; heat treatable.

DURALUMIN 6817B.
M-768; M-254, M-338, 0.6 Si, 4.5 Cu, 0.5 Mg, 0.8 Mn, bal Al.
Heat treated: 62,000-88,000 TS, 14-3 El; 128-175 Brin.
For light alloy parts, heat treatable

DURALUMIN "B"
M-338; 3.5-4.5 Cu, 0.4-0.7 Mn, 0.4-0.7 Mg, bal Al.
Untreated: 40,000 TS, 30,000 YS; 18 RA, 60 Brin.
Treated: 55,000 TS; 40,000 YS, 15 El; 20 RA; 115 Brin
For light alloy parts; Iz-15

DURALUMIN-C.
M-338, 5.5 Cu, 0.4 Pb, 0.4 Bi, bal Al.
Heat treated: 42,000 TS, 30,000 YS; 12 El.
For machined components, fasteners; good machinability, age-hardenable.

DURALUMIN DM31.
M-768, M-254, M-338; 0.6 Si, 4.0 Cu, 1.0 Mg, 1.2 Mn, bal Al
Heat treated: 71,000-74,000 TS; 57,000-60,000 YS, 10-12 El; 125-140 Brin.
For light alloy parts; heat treatable.

DURALUMIN E.
Eng., 3.0-4.5 Cu, 1.0 max Si, 1.0 max Mg, 1.2 max Mn, bal Al.
60,000 TS; 52,000 YS; 8 El.
For light alloy parts; heat treatable.

DURALUMIN E.
M-338, 1.5 Cu, 1.0 max Mg, 1.0 max Fe, 1.0 Si, 0.6 Mn, bal Al.
Heat treated: 50,000-58,000 TS; 40,000-49,000 YS; 15-8 El; 130-160 Brin.
For aircraft structural parts; age-hardenable.

DURALUMIN F.
M-338; 1.0 Mg, 0.5 Si, 0.25 Cr, 0.25 Cu, bal Al.
WP-temper: 40,400 TS; 33,600 YS; 10 El.
Annealed: 18,000 TS; 15 El.
For extrusions of intricate sections; age-hardenable.

DURALUMIN G.
M-338; 3.5-4.5 Cu, 0.7-1.5 Mn, 1.4-1.8 Mg, bal Al.
Rolled: 65,000 TS; 40,000 YS; 15-8 El.
Extruded: 69,000 TS; 45,000 YS; 15 El.
For aircraft structures and panels; age-hardenable.

DURALUMIN H.
M-338; 0.6 Mn, 1.0 Si, 0.6 Mg, bal Al.
Heat treated: 50,000-55,000 TS; 10-16 El.
For light alloy parts, formed sections and extruded rods; age-hardening alloy; corrosion resistant.

DURALUMIN HX.
M-338; 0-1 Cu, 0.7 max Fe, 0.5-1.2 Mg, 0-1 Mn, 0.7-1.2 Si, bal Al
Heat treated: 52,000 TS; 40,000 YS; 13 El; 100 Brin.
For light alloy parts; spinnings and pressings.

DURALUMIN IMITATION.
Eng.; 79 Al, 11 Mg, 10 Cu, 0.05 P.
For light alloy parts; age-hardened.

DURALUMIN J.
M-338; 2.25 Cu, 1.5 Mg, 0.9 Si, 1.2 Fe, 1 Ni, bal Al.
Aged. 56,000 TS; 38,000 YS, 8 El.
For aircraft structures and parts; age-hardenable

DURALUMIN K.
M-338, 1 Cu, 2.7 Mg, 0.4 Mn, 6 Zn, bal Al
Aged 72,000-78,000 TS, 60,000-67,000 YS, 7-5 El
For aircraft engine components; age-hardenable, high strength

DURALUMIN K
M-457; 0.5-2.0 Mg, 0.3-1.5 Si, 0-1.5 Mn, bal Al.
For light alloy parts, corrosion resistant, hardenable.

DURALUMIN K
M-1548, 0.3-1.5 Si, 1.5 Mn, 0.5-2.0 Mg, bal Al.
Heat treated 50,000 TS; 35,000 YS, 10-20 El; 100 Brin
For hardware, fasteners Age-hardenable

DURALUMIN KC.
M-338, 1.0 Cu, 2.75 Mg, 0.4 Mn, 6.0 Zn, Cr, bal Al.
Ht Tr 78,000 TS, 68,000 YS, 7 El
For aircraft engine components.
Heat treatable, high strength.

DURALUMIN L.
M-338; 1.5 Cu, 2.0-3.5 Mg, 0.5 Si, 0.5 Fe, 0.25-1.0 Mn, 0.2 Ti, 4.5-6.5 Zn, bal Al.
WP-temper: 72,000-78,000 TS; 60,500-67,000 YS; 7-5 El
For aircraft engine components; age-hardened, high strength

DURALUMIN LC.
M-338, 0.6 Cu, 2.6 Mg, 0.5 Mn, 6 Zn, 0.05 Cr, bal Al.
Ht. Tr : 73,000 TS; 62,000 YS, 5 El
For aircraft engine components.
Heat treatable, high strength

DURALUMIN M.
M-338, 1.5-3.0 Cu, 0.7 max Fe, 0.2-0.5 Mg, 0.7 max Si, bal Al.
Heat treated: 40,000 TS; 18,000 YS; 25 El; 90 Brin
For rivets.

DURALUMIN Q.
M-338; 4.2 Cu, 0.9 Mg, 0.5 Mn, bal Al.
For aircraft structures and components; age-hardenable.

DURALUMIN S.
M-338; 3.5-4.8 Cu, 0.8 Si, 1 max Mg, 1 max Fe, bal Al.
Heat treated: 62,000-75,000 TS; 54,000-62,000 YS; 12-8 El; 110-130 Brin.
For aircraft engine components; age-hardenable, high strength.

DURALUMIN SPECIAL "Y."
Eng.; 92.5 Al, 4 Cu, 2 Ni, 1.5 Mg.
For dirigible, airplane and motor car light alloy parts; age hardening.

DURALUMIN SUPER.
German; 5.5 Cu, 0.3 Fe, 1.0 Mg, 0.6 Mn, 0.6 Si, bal Al.
71,000-78,000 TS; 10-20 El; 130-140 Brin.
For light alloy parts; heat treatable.

DURALUMIN T.
M-338, M-457; 2.1 Cu, 0.5-1.5 Fe, 0.3-1.5 Mg, 2 max Ni, 1 max Mn, bal Al.
Heat treated: 62,000 TS; 41,000 YS; 12 El; 130 Brin.
For aircraft engine forgings, age-hardenable.

DURALUMIN, VICKERS
M-338; 3.5-4.5 Cu, 0.4-0.7 Mn, 0.4-0.7 Mg, 0.75 max Fe, 94.5 Al.
Sheets: 56,000 TS; 33,500 YS; 8-15 El.
Bars: 45,000-56,000 TS; 22,500-33,500 YS; 15 El, 20 RA.
For airplane and dirigible parts, crankcases, cylinder heads, pistons, airscrews; light alloy, age-hardening.

DURALUMIN W.
M-78, M-457; 4 Cu, 0.3 Fe, 1.5 Mg, 1 Ni, 0.2 Si, bal Al.
For light alloy parts, aircraft, age-hardenable

DURALUMIN W
M-1548, 3.5-4.5 Cu, 1.0-1.8 Mg, 1.8-2.2 Ni, bal Al
Heat treated: 60,000 TS, 35,000 YS; 10 El, 100-200 Brin
For fasteners, hardware, engine components
Heat treatable, high strength.

DURALUMIN X.
M 338, 0.75 Mg, 1 Si, bal Al.
WP-temper: 40,400 TS, 33,600 YS; 10 El
Annealed 18,000 TS; 15 El
For extrusions of intricate sections, age-hardenable

DURALUMIN Z
German, 4.3-5.0 Cu, 0.3 Fe, 0.9 Mg, 0.6 Mn, 0.6 Si, bal Al.
68,000-71,000 TS, 12-14 El, 130-135 Brin
For light alloy parts, heat treatable

DURAMIUM.
M-358: 0.7 C, 18 W, 4 Cr, 1 V, bal Fe
For reamers, hobs, drills, taps; high speed steel.

DURAMOLD A
M-24, 0.07 C, 0.35 Mn, 4.5 Cr, 0.5 Mo, bal Fe
For hobbing cavity molds, air hardening, wear resistant, high core hardness. AISI P4

DURAMOLD B
M-24, 0.07 C, 0.25 Ni, 0.95 Cr, 0.25 Mo, bal Fe
For cold hobbing cavity, molds, oil hardening, medium core hardness AISI P2

DURAMOLD N
M-24; 0.10 C 1.5 Cr, 3.25 Ni, bal Fe
Ht Tr 130,000-173,000 TS, 88,000-142,000 YS; 15-20 El, 262-340 Brin.
For plastic molds
Type P6 case hardening tool steel.

DURAMOLD Ni-Cr.
M-24; 0.10 C, 0.60 Cr, 1.25 Ni, bal Fe.
Ht Tr : 100,000 TS, 70,000 YS; 200 El.
For plastic molds cold hubbed.
Good core strength and toughness.
Type P3 tool steel Case hardened.

DURANA-1.
Germ.; 64-78 Cu, 29.5 Zn, 2.2 Sn, 1.7 Al, 1.5 Fe.
60,000-65,000 TS; 14 El.
For chemical equipment construction; also known as "Duranametal"; corrosion resistant.

DURANA-2.
Germ; 65 Cu, 30 Zn, 1.5 Al, 1.5 Fe, 2 Pb.
For chemical equipment; also known as "Duranametal"; corrosion resistant, high strength.

DURANA-3.
Germ.; 59 Cu, 40 Zn, 1 Sn, 0.3 Fe, 0.4 Pb.
For chemical equipment, high strength.

DURANAL.
German; 5-10 Mg, 0.6 Mn, 0.2 Si, bal Al.
For light alloy parts.

DURANALIUM.
M-457; 5-10 Mg, bal Al.
For light alloy parts, aircraft castings; corrosion resistant.

DURANALIUM.
M-1548; 0.3-0.6 Mn, 2.5-9.0 Mg, bal Al.
Bars: 26,000-57,000 TS; 8500-34,000 YS; 15-25 El, 45-100 Brin.
For hardware, fittings, fasteners. Age-hardenable.

DURANALIUM 2 S.
M-457; 2.0-2.5 Mg, 1-2 Mn, 0-0.2 Sb, bal Al.
Soft: 26,000 TS, 12,000 YS; 25 El; 45 Brin.
Hard: 45,000 TS, 36,000 YS; 3 El, 75 Brin
For light alloy parts; corrosion resistant.

DURANALIUM 2S.
M-1548; 1.0-2.0 Mn, 2.0-2.5 Mg, bal Al.
Bar: 26,000-34,000 TS; 8500-17,000 YS, 15-25 El; 50-60 Brin.
For light weight parts

DURANALIUM 3.
M-457; 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al.
Soft: 28,000 TS; 13,000 YS, 30 El; 47 Brin.
Hard: 42,000 TS, 37,000 YS, 8 El; 77 Brin
For light alloy parts; resists sea water corrosion.

DURANALIUM 3.5
M-457, 2-6 Mg, 0.25-0.75 Mn, bal Al.
Cast: 20,000-22,000 TS; 11,000-15,000 YS; 3-5 El, 54-58 Brin
For rivets, bolts, screws, corrosion resistant.

DURANALIUM 5.
M-457; 4-6 Mg, bal Al.
Soft: 35,000 TS; 18,000 YS; 26 El, 60 Brin.
Hard: 55,000 TS; 45,000 YS; 4 El; 105 Brin.
For light alloy parts, corrosion resistant.

DURANALIUM 7.
M-457; 7 Mg, 0.45 Mn, bal Al.
Rolled: 52,000 TS; 32,000 YS, 12 El; 115 Brin.
For seaplane pontoons, propellers; resists sea water corrosion.

DURANALIUM 9.
M-457; 8-10 Mg, bal Al.
Soft: 50,000 TS; 25,000 YS; 15 El; 80 Brin.
Hard: 65,000 TS; 45,000 YS; 10 El; 110 Brin.
For light alloy parts; corrosion resistant.

DURANCE BEARINGS.
German; 44.5 Sb, 33.3 Sn, 22.2 Cu.
For bearings, Babbitt.

DURAND'S ALLOY.
Eng.; 67 Al, 33 Zn.
For strong and tough light weight parts; non-hardenable

DURANIC
French; 96 Al, 2 Mn, 2 Ni.
23,000-26,000 TS; 1.0-2.5 El; 60-70 Brin.
For light alloy parts; non-hardenable.

DURANICKEL replaced by
DURANICKEL ALLOY 301.

DURANICKEL ALLOY 301.
M-1499; 96.5 Ni, 0.15 C, 0.25 Mn, 0.30 Fe, 0.005 S, 0.5 Si, 0.13 Cu, 4.38 Al, 0.63 Ti.
Annealed: 90,000-120,000 TS; 30,000-60,000 YS; 55-35 El; 135-185 Brin.
Annealed and aged: 150,000-190,000 TS; 110,000-140,000 YS, 30-20 El; 285-360 Brin
For extrusion press parts; molds used in glass industry; clips, diaphragms, and springs.
Corrosion resistant, high strength and hardness.

DURANMIUM.
M-358, C, W, bal Fe.
For high speed cutting tools, high speed steel.

DURAPERM.
M-1084; 84.5 Fe, 9.5 Si, 6.0 Al
Hard, brittle, soft-magnetic, alloy.
Saturation induction 9 K Gausses
Coercive force: .05 oersteds
(H max = 2.0 oersteds
For pole tips in magnetic recording heads which operate from audio through the video frequency range

DURAPLAT.
M-457, 3.5-5.5 Cu, 0.2-2 Mg, 1 Si, 1 Mn, bal Al.
For light alloy parts, Al ply alloy, bonded; corrosion resistant

DURASPUN
M-45, 0.2 C, 18 Cr, 8 Ni, bal Fe.
For sleeves, liners, centrifugally cast tubes, corrosion resistant

DURAWELD
M-1246, WC
For hard facing electrode, sintered

DURAWELD NO 1
M-769
For hard facing welding rods; wear resistant.

DURAWELD NO 2
M-769.
For hard facing welding rods, wear resistant

DURAWELD NO. 3.
M-769.
For hard facing welding rods, wear resistant

DURAWELD NO. 4.
M-769
For hard facing welding rods; wear resistant

DURAX
M-333; 0.50 C, 1.5 Cr, 2.5 W, bal Fe
For tools, dies, Type S1, oil hardened, shock resistant.

DURAX D.
M-459, 0.35 C, 1 Si, 1 Cr, 0.2 V, 2 W, bal Fe.
For pneumatic snaps, punches, oil hardened, shock resistant

DURAX EXTRA HART.
M-459, 0.80 C, W, Cr, V, bal Fe.
For cutters, tools, dies; oil hardened.

DURAX H.
M-459; 0.55 C, 1.2 Cr, 0.4 V, 2.0 W, bal Fe.
For heading and forming dies; upsetters; oil hardened, tough.

DURAX Mo3.
M-459, M-1496; 0.30 C, 0.30 Mn, 0.30 Si, 3.0 Cr, 2.8 Mo, 0.5 V, bal Fe.
Heat treated: 215,000-230,000 TS.
For extrusion dies, mandrels, die casting dies, hot work tools.
Hot work steel. Thermal shock resistant.

DURAX N.
M-459; 0.35 C, 1 Cr, 3.5 Ni, 0.2 V, 5.3 W, bal Fe
For extrusion and piercing mandrels; hot work steel, tough, oil hardened.

DURAX SPECIAL.
M-459, 0.35 C, 1.1 Cr, 0.2 V, 3.7 W, 1.0 Si, bal Fe.
For hot work tools, dies, upsetting tools, extrusion press components, shears, punches. Oil hardenable, tough.

DURAX W2.
M-459; 0.45 C, 1.2 Cr, 0.9 Si, 0.2 V, 2 W, bal Fe
For pneumatic rivet tools, shear cutters, tools
Oil hardening, shock resisting.

DURAX W3
M-459, 0.5 C, 1.5 Cr, 2.2 W, 0.2 V, bal Fe.
For riveting sets, hot chisels; oil hardened, tough

DURAX W5
M-459; 0.30 C, 2.3 Cr, 0.6 V, 4.25 W, bal Fe.
For cold work tools, upsetters, punches; oil hardened, tough

DURAZIT.
M-1246, WC.
For hard facing electrode; sintered.

DURAZIT I
M 1246; Co Cr-W
Cast 580 Brin
For chemical equipment, hard facing

DURAZIT II
M-1246, Co-Cr-W
Cast 460 Brin
For chemical equipment, hard facing

DURBAR
M-142, 70-72 Cu, 20-24 Pb, 4-10 Sn
For bearings, ornaments.

DURCILIUM
M 770, 94.3 Al, 4.0 Cu, 0.7 Mg, 0.5 Mn, 0.5 Si
Annealed 34,000 TS, 17,000 YS, 16 El, 45 Brin.
Hardened 61,000 TS, 37,000 YS, 16 El, 110 Brin
For light alloy parts, aircraft structures, age hardenable

DURCILIUM F
M-770, M-1275, 3.4-4.8 Cu, 0.7 Mg, 0.8 Si, 1 Fe, 0.4 1.2 Mn, 0.2 Ni, 0.2 Zn, 0.2 Ti, bal Al
W-temper· 58,200 TS, 42,600 YS, 8-13 El
For structural members, age-hardened

DURCILIUM-F.
M-1444, 3.4-3.8 Cu, 0.55-0.85 Mg, 0.6-0.9 Si, 1 Fe, 0.4 1.2 Mn, 0.2 Ni, 0.2 Zn, 0.3 Ti, bal Al.
WP-temper: 74,000 TS, 65,000 YS, 12 El.
W-temper: 65,000 TS, 36,000 YS, 16 El.
For aircraft structures; age-hardenable.

DURCILIUM K.
M-770; M-1275, 3.5-5.0 Cu, 0.4-1.2 Mg, 0.7 Si, 0.7 Fe, 0.4-1.2 Mn, 0.3 Ti, bal Al.
Heat treated: 53,800-56,000 TS; 31,400-33,600 YS; 15-10 El
For structural members, age-hardened, corrosion resistant.

DURCILIUM L.
M-770, M-1275; 3.5-5.8 Cu, 0.6 Mg, 1.5 Si, 1 Fe, 1.2 Mn, 0.3 Ti, bal Al.
W-temper: 53,800-56,000 TS; 31,400-33,600 YS; 15-10 El.
WP-temper: 62,000-67,200 TS; 53,800-58,200 YS; 8-6 El.
For structural members; age-hardened.

DURCILIUM M.
M-770, M-1275; 1-2 Cu, 0.5-1.2 Mg, 0.7-1.2 Si, 0.7 Fe, 1.0 Mn, 0.2 Ti, bal Al.
W-temper· 42,100 TS, 32,400 YS, 18 El.
WP-temper. 62,000 TS, 49,800 YS, 13 El
For aircraft and other structural members; age hardenable.

DURCILIUM-M
M-1444; 1.2 Cu, 0.5-1.25 Mg, 0.75-1.25 Si, 0.75 Fe, 1 Mn, 0.2 Ti, bal Al.
WP-temper· 62,700 TS 49,300 YS, 13 El
W-temper· 42,600 TS, 31,400 YS, 18 El.
For aircraft structures, age-hardenable.

DURCILIUM R
M-770, M-1275; 0.15 Cu, 0.4-1.5 Mg, 0.7-1.3 Si, 0.6 Fe, 1 Mn, 0.2 Ti, bal Al.
W-temper· 27,000 TS, 15,700 YS, 18 El.
WP-temper 40,400 TS; 33,600 YS, 10 El
For structural members; age-hardened, corrosion resistant.

DURCILIUM-R.
M-1444, 0.15 Cu, 0.4-1.5 Mg, 0.75-1.3 Si, 0.6 Fe, 1 Mn, 0.2 Ti, bal Al
WP-temper 47,100 TS, 40,400 YS; 12 El
P temper· 31,400 TS, 26,900 YS, 20 El
For aircraft and light alloy parts, age-hardenable, corrosion resistant

DURCILIUM W.
M-770, M 1275, 0.15 Cu, 0.4 0.9 Mg, 0.3-0.7 Si, 0.6 Fe, 0.2 Ti, bal Al
M-temper 15,700 TS, 11,200 YS, 15 El
W-temper. 24,600 TS, 15,700 YS, 23 El.
WP-temper 31,400 TS 26,900 YS, 14 El.
For structural members, age hardened

DURCILIUM-W
M-1444, 0.15 Cu, 0.4-0.9 Mg, 0.3-0.7 Si, 0.6 Fe, 0.2 Ti, bal Al
WP-temper 31,400 TS, 26,900 YS, 14 El
P-temper 24,600 TS, 15,700 YS, 23 El
For aircraft and light alloy parts, age-hardenable, corrosion resistant

DURCILIUM-Y
M-1444, Al alloy
Rolled 15,700 TS, 12 El.
For light alloy parts, corrosion resistant, good weldability

DURCILIUM-Z
M-1444, Cu, Mg, Si, Ti, bal Al
WP-temper· 76,500-88,500 TS, 67,000-80,000 YS, 10 El
For aircraft structures, age-hardenable.

DURCO 18-8
M-46, 0.10 min C, 18 Cr, 8 Ni, 1.0 Si, 0.6 max Mn, bal Fe
70,000 TS, 30,000 YS, 40-45 El, 40-45 RA; 150 Brin
For stainless parts, chemical plant and food handling equipment; corrosion resistant

DURCO 18-8-S.
M-46, 19-17 Cr, 9-7 Ni, 0.50 Mn, 1.0 Si, <0.07 C, bal Fe.
Cast· 70,000 TS; 30,000 YS; 40-50 El; 40-50 RA; 150 Brin.
For food handling and chemical plant equipment; corrosion resisting to HNO_3.

DURCO 18-8-S-Cb.
M-46; 0.07 max C, 18-22 Cr, 9-12 Ni, 1 max Cb, 2 max Si, 1.5 max Mn, bal Fe.
Annealed: 70,000 TS; 30,000 YS; 30 El; 40 RA; 150 Brin.
For corrosion resistant castings; corrosion resistant.

DURCO 18-8-S-Mo.
M-46; 0.07 max C, 18 Cr, 8 Ni, 1.0 max Si, 0.60 max Mn, 2-4 Mo, bal Fe.
70,000 TS; 30,000 YS; 40-45 El; 40-45 RA; 150 Brin.
For handling hot sulfite liquors in the pulp industries and H_3PO_4; corrosion resistant, stainless.

DURCO 18-8-S-Mo-Cb.
M-46; 0.07 max C, 18-22 Cr, 9-12 Ni, 2-3 Mo, 1 max Cb, bal Fe.
Annealed: 70,000 TS; 30,000 YS; 30 El; 40 RA; 150 Brin.
For corrosion resistant castings; corrosion resistant

DURCO 25-12.
M-46; 0.2 C, 22-26 Cr, 12-15 Ni, 2 max Si, 1 5 max Mn, bal Fe.
Annealed: 70,000 TS; 30,000 YS; 30 El; 40 RA; 150 Brin.
For heat and corrosion resistant castings; corrosion and heat resistant.

DURCO 25-12-S.
M-46; 0 07 max C, 22-26 Cr, 12-15 Ni, 1.5 max Si, 1.5 max Mn, bal Fe.
Annealed: 65,000 TS, 28,000 YS, 30 El; 40 RA, 150 Brin.
For heat and corrosion resistant castings, heat and corrosion resistant, ACI-CH-10

DURCO D-10.
M-46; 56 Ni, 23 Cr, 4 Mo, 2 W, 1 Mn, 8 Cu.
Cast: 60,000 TS; 5 El; 5 RA; 180 Brin.
For heat and corrosion resistant parts; non-magnetic.

DURCO D-12.
M-46; 0.12 max C, 12 Cr, bal Fe.
For valve and pump parts, corrosion resistant

DUREDGE.
M-333, 0.55 C, 1 6 Si, 0.4 Mo, 0.6 V, bal Fe.
For cutting tools, chisels, rivet sets, shear blades, will maintain keen cutting edge, hard and tough

DUREDGE.
M-336; 0.55 C, 0.75 Mn, 0.35 Mo, 2 0 Si, bal Fe.
For punches, shears, dies; water or oil hardening

DUREHETE.
M-1724; 0.40 C, 0.9 Cr, 1.0 Mo, bal Fe.
For high temperature use, turbine valves, bolts, pipe flanges, creep resisting steel; resists high pressure superheated steam.

DUREHETE 900
M-1724; 0.35-0.45 C, 1.0-1.5 Cr, 0.5-0.8 Mo, 0.5 max Si, bal Fe
Heat treated: 147,000 TS; 136,000 YS; 22 El.
For high temperature bolts, studs, fasteners, high creep resistance.
B.S. 970-En20B; ASTM A193-61T Gr 7A.

DUREHETE 950.
M-1724; 0.30-0.45 C, 1 0-1.5 Cr, 0.5-0.8 Mo, 0.2-0.3 V, bal Fe.
Heat treated: 144,000 TS; 135,000 YS; 25 El; 64 RA.
For high temperature bolts, studs, fasteners; heat resistant to 950°F.
B.S. 1506-661; ASTM A193-61T Gr B16.

DUREHETE 1050.
M-1724; 0.10-0.25 C, 0.9-1.3 Cr, 0.85-1.1 Mo, 0.6-0.8 V, bal Fe.
Heat treated: 130,000 TS; 115,000 YS; 20 El.
For bolting, fasteners, high temperature applications; heat resistant to 1050°F.

DUREHETE 1055.
M-1724; 0.15-0.25 C, 0.9-1.3 Cr, 0.85-1.1 Mo, 0 6-0.8 V, 0.05-0.20 Ti, 0.001-0.01 B, bal Fe.
Heat treated: 122,000 min TS; 100,000 min YS; 43 min El.
For bolts required to operate at 500-565°C.
For use in steam power plant.

DURENER MN20.
M-457; 0.5-1.5 Mn, 0 3 max Cr, bal Al.
Soft: 16,000 TS; 6000 YS, 40 El.
Hard: 29,000 TS; 27,000 YS; 10 El.
For cooking utensils, heat exchangers, tanks, furniture; good forming and welding properties.

DURENER Z8.
M 457, Zn, Cu, Mg, bal Al.
For light alloy parts

DUREX.
M-839; 4.4-4.7 total C, 10 Sn, 83.22 Cu, 0 60 impurities
30-40 Brin
For bearings (porous to absorb oil—25% oil by volume), carbon present as graphite

DUREX.
M-487; 0 7 C, 18 5 W, 4 5 Cr, 1 0 V, bal Fe
For shaping and planing tools, broaches, hobs; high speed steel.

DUREX BRONZE
M-839; 95 Cu, 5 Sn.
Cast 30,000-40,000 TS; 65-100 Brin
For bearings; sintered.

DUREX BRONZE NO 46.
M-839, 10 Sn, 1 2 graphite, bal Cu.
Sintered: 13,000-25,000 TS, 2 0 El; 25-40 Brin.
For bearings, sintered, C.S. 79000

DUREX IRON NO 62
M-839; 1 0 C, bal Fe.
Sintered: 28,000 TS; 0 5 El
For bearing, sintered, C.S. 160,000

DUREX IRON NO 93
M-839, 7 5 Cu, bal Fe.
Sintered 15,000-35,000 TS, 1-7 El; 90 Brin.
For bearings; sintered alloy

DUREX IRON 362
M-839; 20 Cu, 1 C, bal Fe.
75,000 TS; 1 El, 185 Brin
For gears, cams; copper infiltrated sintered steel.

DURICHLOR.
M-46; 14 min Si, 3 min Mo, bal Fe
Cast: 17,000 TS
For pumps, valves, pipes, fittings, exhaust fans, resists HCl corrosion; cast alloy

DURIMET-20.
M-46; 29 Ni, 20 Cr, 2-3 Mo, 4 Cu, 1 Si, 0 07 max C, bal Fe.
Cast: 65,000-75,000 TS; 28,000-38,000 YS; 35-50 El, 40-50 RA, 120-150 Brin.
Wrought. 85,000 TS, 35,000 YS; 50 El; 150 Brin.
For chemical plant equipment, corrosion resistant to mixed acids.

DURINVAL.
M-104, M-771; 42 Ni, 2 Al, 2 Ti, bal Fe.
For chronometer springs; age-hardenable, corrosion resistant.

DURIRON.
M-46; 82.2 Fe, 14.5 Si, 0.66 Mn, 0.8 C.
10,000 TS.
For insoluble anodes, agitators, crucibles, condensers, kettles, evaporators; very brittle, non-corrosive.

DURITAS.
M-261, M-486; WC.
For dies, nibs; cemented carbides.

DURITE.
M-35; C, W, bal Fe.
For tools, dies; hot work steel.

DURMES.
M-457; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, 0.5-2.5 Pb, Sn, Cd, Bi, bal Al.
For screw machine products; free-cutting.

DURO 6.
M-459; 0.71 C, 0.22 Si, 0.27 Mn, bal Fe.
For springs, tools, axes, rails, crimpers; Type W 1; water hardened.

DURO 70.
M-459; 0.56 C, 0.3 Si, 0.55 Mn, bal Fe.
For shafts, rails, axles, gears, crankshafts; water hardened.

DURO-CHIP.
M-750; 0.6 C, 0.7 Mn, 1.85 Si, 0.5 Mo, 0.25 V, bal Fe.
For hand and pneumatic chisels, caulking tools; shock resistant, oil hardening.

DUROCHROME.
M-513, C, Si, Cr, Mo, bal Fe
For valve seat inserts, cast iron, wear resistant.

DUROCYL
M-185, 3 C, 2 Si, 0.8 Mn, 0 3 Cr, bal Fe
Cast 38,000 TS; 240 Brin
For cylinder liners, wear plates; centrifugally cast iron.

DURODE
M-575; Cu alloy.
For spot welding electrodes, high conductivity.

DURODE CC.
M-575, Cu alloy.
For resistance welding electrode, high electrical conductivity.

DURODE XH.
M-575, Cu alloy.
For resistance welding electrode, high electrical conductivity.

DURODI.
M-55; 0 5-0.6 C, 0 90 Mo, 0 55 Mn, 0 8 Cr, 1 6 Ni, bal Fe.
Heat treated: 225,000-130,000 TS; 200,000-120,000 YS; 15-26 El; 43-51 RA; 460-275 Brin.
For hot work die steel, punches, upsetting and gripping dies, shear knives, tough steel, air hardening, non-distorting.

DURODIE.
M-261; 0.4 C, 3.3 Cr, 2.7 W, 0.3 V, bal Fe.
For bolt dies, hot extrusion dies, swaging dies; hot work steel.

DURO HIGH SPEED.
M-81; 0.8 C, 18.5 W, 4 Mo, 4 Cr, 7 Co, bal Fe.
For heavy duty cutters; high speed steel.

DUROLITH.
Germ.; Zn base alloy.
For die castings; Br. P. 411557.

DURON.
M-459; 0.50 C, Si, Cr, V, bal Fe.
For shafts, gears, springs, crankshafts; oil hardened, shock resistant.

DURON H.
M-459; 0.6 C, 0.85 Si, 0.75 Mn, 1.18 Cr, 0.1 V, bal Fe.
For springs, shafts, axes, crankshafts; oil hardened, shock resistant.

DURON W.
M-459; 0.40 C, Si, Mn, Cr, V, bal Fe.
For gears, shafts, crankshafts; oil hardened, shock resistant.

DURONZE I.
M-141; 97 Cu, 1 Si, 1.5 Sn.
Annealed: 45,000 TS.
Cold drawn: 135,000 TS.
For general use, bolts, cable, hardware, cap screws; corrosion resisting.

DURONZE II (BRIDGEPORT 632).
M-141; 3 Si, bal Cu.
Sand cast: 50,000 TS; 40 El; 50 RA; D 93 Brin.
Annealed: 70,000 TS; 55 El; 65 RA; F 85 Brin.
For pole line hardware, marine hardware, water storage tanks, chemical vats, range boilers; strong, hot forging alloy; corrosion resistant.

DURONZE III.
M-141; 2.5 Si, bal Cu.
Forged: 90,000 TS; 50,000 YS; 27 El, 35 RA; 165 Brin.
Annealed: 90,000 TS, 30 El; 35 RA; 160 Brin.
For boat shafting, pump rods, pinions, gears; corrosion resistant.

DURONZE IV.
M-141; 5 Al, bal Cu.
Annealed: 65,000 TS, 45 El.
For condenser tubes, sea water corrosion resistant.

DURONZE 606.
M-141, 3.0 Si, 0 95 Mn, bal Cu
Hard: 90,000 TS; 45,000 YS; 18 El; B 85 Rock.
Soft 55,000 TS, 22,000 YS, 55 El, B 50 Rock
For bolts, gears, valve stems, marine hardware, clutch disks. Corrosion resistant, tough, wear resistant.

DURONZE 609
M-141, 2 Si, bal Cu
Hard: 75,000 TS, 40,000 YS, 10 El; 138 Brin.
Soft: 50,000 TS, 20,000 YS, 40 El, 63 Brin
For bolts, cold headed parts, gears, shafts, formerly Duronze V; corrosion resistant.

DURONZE 632
M-141; 2 95 Si, 0.10 Fe, bal Cu.
Annealed 63,000 TS, 30,000 YS, 55 El, F 90 Rock.
Hard 90,000 TS, 45,000 YS; 18 El; B 85 Rock.
For poleline hardware, nuts, bolts, wire and cable connectors, cap screws, springs, conduits, rivets. 7% elect. cond.—corrosion resistant.

DURONZE 707
M-141; 91 Cu, 2 Si, 7 Al
For bolts, gears, valve stems, marine hardware; tough, corrosion resistant

DURONZE 708.
M-141, 6.75 Al, 1.75 Si, bal Cu.
Annealed: 85,000 TS; 40,000 YS; 30 El, 165 Brin.
For valve parts, bolts, fasteners; corrosion and wear resistant, hot forgeable.

DUROPLAT.
German; Al coated Duralumin.
For bimetal parts.

DURSILIUM.
France; 4-5 Cu, bal Al.
For light alloy parts; age-hardenable.

DUTCH BOY NO. 1 JOURNAL.
M-88; Sb, Cu, bal Sn.
Cast: 32.4 Brin.
For heavy pressure bearings;
Babbitt, resists heavy crushing strains.

DUTCH BOY 111.
M-88, 50 Pb, 50 Sn.
Cast: 6400 TS; 40 El; 12.7 Brin.
For solder; M.P. 361-414°F; S.S. 5800.

DUTCH BOY 222.
M-88; 55 Pb, 45 Sn.
Cast: 6600 TS; 40 El; 12.7 Brin.
For solder; M.P. 361-424°F; S.S. 5700.

DUTCH BOY 333.
M-88; Pb, Sn.
Cast: 6400 TS; 41 El; 12.6 Brin.
For solder; M.P. 361-437°F, S.S 5500.

DUTCH BOY 444.
M-88; Pb, Sn.
Cast: 6600 TS; 40 El; 13.3 Brin.
For solder; M.P. 361-437°F; S.S. 5625.

DUTCH BOY 555.
M-88; Pb, Sn.
Cast: 6700 TS, 39 El; 13.3 Brin.
For solder; M.P. 361-448°F; S.S. 5525.

DUTCH BOY 666.
M-88; Pb, Sn.
Cast: 7000 TS, 35 El; 14.0 Brin.
For solder; M P. 361-460°F; S S. 5450.

DUTCH BOY 777.
M-88; Pb, Sn.
Cast: 7000 TS; 33 El; 13.9 Brin.
For solder, M P. 361-460°F; S S. 5375.

DUTCH BOY 888.
M-88; Pb, Sn.
Cast: 70,000 TS; 30 El; 13.9 Brin.
For solder; M.P. 361-468°F; "Plumbers solder"

DUTCH BOY BEARING METAL.
M-88; Sb, Cu, bal Sn.
Cast: 23.5 Brin.
For bearings for machinery and general mill work;
Babbitt, for slow moving machinery.

DUTCH BOY GENUINE BABBITT.
M-88; 88.9 Sn, 7.4 Sb, 3.7 Cu.
Cast: 26.7 Brin.
For bearings; Babbitt.

DUTCH BOY P-A-F.
M-88; Pb-Sn-Sb-Cu.
For bearings; Babbitt.

DUTCH BOY STERLING JOURNAL.
M-88; Sb, Cu, bal Sn.
Cast: 23.3 Brin.
For bearings for stationary gas engines;
Babbitt, resists heavy crushing strains.

DUTCH METAL.
76-80 Cu, 24-20 Zn.
Cast: 38,400 TS; 22,750 YS; 33 El; 33 RA; 45 Brin.
Hard rolled: 66,900 TS; 66,900 YS; 12 El;
42 RA; 145 Brin.
For cheap jewelry, gold leaf; red brass.

DUTCH SILVER.
Eng.; 81.5 Sn, 8.8 Sb, 9.6 Cu.
For tableware, novelties, art metal pieces;
corrosion resistant.

DUTCH WHITE METAL.
Eng.; 81.5 Sn, 8.8 Sb, 9.6 Cu.
For bearings, antifriction purposes; Babbitt.

DUTRAX.
M-358; C, bal Fe.
For machinery parts.

DUTRAX 3.
M-333; 0.45 C, 0.8 Cr, 1.1 W, 0.25 Mo, bal Fe.
For plastic mold dies; oil hardening.

DUTRAX 7.
M-333, 0.45 C, 1.25 Cr, 2.15 W, 0.2 Si, bal Fe.
For plastic mold dies; oil hardening.

DUVAL AU.
M-1115; 0.95 C, 0.3 Mn, 0.25 Si, bal Fe.
For drills, taps, punches, springs, tools;
Type W 1; water hardened.

DUVAL DU-MUV.
M-1115; 0.8-1.0 C, 0.3 Mn, 0.2 Si, bal Fe.
For cutters, drills, reamers, taps, broaches, springs;
Type W 1; water hardened.

DUVAL EXTRA F
M-1115; 0.7 C, 18 W, 5 Co, 4 Cr, 1.3 V, bal Fe.
For lathe and planer tools, reamers, drills,
taps, broaches, high speed steel, oil hardened.

DUVAL MU.
M-1115; 1.10 C, 0.3 Mn, 0.25 Si, bal Fe
For taps, drills, cutters, reamers;
Type W 1, water hardened

DUVAL SF1
M-1115; 0.9-1.1 C, 0.5-1.0 Cr, 3.5-4.5 W, 0.1 V,
bal Fe
For cold work tools, headers, forming dies;
cold work steel, oil hardened.

DUVAL SF2
M-1115; 0.5 C, 1.5 Cr, 2.25 W, 0.2 V, bal Fe.
For tools, dies, shears, punches,
hot work steel, oil hardened.

DUVAL U 7.
M-1115, 0.70 C, 0.3 Mn, 0.25 Si, bal Fe.
For springs, punches, tools, crimpers;
Type W 1; water hardened.

DUVAL U 8.
M-1115; 0.75 C, 0.3 Mn, 0.25 Si, bal Fe
For punches, drills, springs, dies, tools; Type W 1,
water hardened

DUVAN.
M-358, C, V, bal Fe.
For tools, drills, water hardening.

DUX 4.
M-1724, 0.5 C, 1.0 Cr, 2.25 W, 0.6 Si, bal Fe.
For chisels, caulking tools; shock resistant.

DYCAST NO. 1.
M-73; 0.40 C, 5 Cr, 0.30 Mn, 0.50 V, 0.80 Mo,
1.0 Si, bal Fe
For die casting dies and cores; resists heat checking,
hot work steel.

DYCRO.
M-1433; 1.5 C, 12 Cr, 0.25 V, 0.8 Mo, bal Fe.
For blanking and forming dies, broaches;
air hardened, non-deforming.

DYCRO-1.
M-1431; 1 C, Cr, Mn, Mo, bal Fe.
For tools, dies; air hardened.

DY-KROME.
M-750; 1.5 C, 12 Cr, 0.2 V, 0.8 Mo, bal Fe.
For blanking dies, broaches, cold extrusion dies;
air hardening.

DYMAL.
M-750; 0.9 C, 0.5 Cr, 1.15 Mn, 0.5 W, bal Fe.
For Bakelite molding dies, gages, hobs,
forming tools; non-deforming.

DYMAL AH.

M-750; 1.65-2.1 C, 0.25 Mn, 11-13 Cr, 0.35 V, 0.90 Mo, bal Fe.

For dies, tools; nondeforming.

DYMAL OH.

M-750; 0.90 C, 1.1 Mn, 0.5 Cr, 0.5 W, 0.2-0.3 V, bal Fe.

For dies, hobs, milling cutters, gauges; oil hardening.

DYNABRAZE 145 FC.

M-717;

Flux coated bronze rod for brazing steel and cast iron. Bonding temp; 1400-1600°F. 65,000 TS.

DYNACUT.

M-73, 1.2 C, 2.7 W, 3.75 Cr, 1.6 V, 8.0 Mo, 8.2 Co, bal Fe.

Hardened: C 65-66 Rock.

For cutters, in heavy duty machining, drills, reamers, broaches.

Type M-43 high-speed steel, wear resistant. High red hardness.

DYNAFLEX.

M-73, 0.40 C, 0.30 Mn, 0.90 Si, 5.0 Cr, 1.3 Mo, 0.45 V, bal Fe

Air hardened: 300,000 TS; 250,000 YS; 7 El; 30 RA; 525 Brin

For punches, upsetters, extrusion dies, hot work steel; AISI Type H 11.

DYNALLOY II

M-537; 0.15 C, 0.80 Mn, 0.30 Si, 0.45 Cu, 0.10 Mo, 0.55 Ni, bal Fe

Rolled 62,000 TS, 45,000 YS, 25 El

For railroad and agriculture equipment, mine cars, high strength, low alloy construction steel.

DYNALLOY 600

M-266, 58 Cu, 0.8 Si, 1.5 Al, 2.5 Mn, bal Zn

HH Temper: 75,000-100,000 TS, 40,000-65,000 YS; 12-18 El; B 82-88 Rock.

Forged 68,000 TS, 34,000 YS, 18 El; B 78 Rock.

For bearings, worms and worm wheels, bushings.

Forgeable bearing alloy, corrosion resistant.

DYNALLOY 601

M-266; 61 Cu, 0.8 Si, 2.5 Mn, bal Zn.

HH Temper: 70,000-85,000 TS, 40,000-65,000 YS, 15-25 El; B 70-87 Rock.

For bearings, worm wheels, bushings.

Mate with soft member. Corrosion resistant

DYNALLOY 602

M-266; 61 Cu, 1.0 Pb, 1.0 Si, 2.5 Mn, bal Zn.

HH Temper. 70,000-85,000 TS; 40,000-65,000 YS; 15-25 El; B 70-87 Rock.

For bearings, bushings, gears.

Leaded forgeable bearing alloy, corrosion resistant

DYNALLOY 603.

M-266; 59 Cu, 1 Pb, 1 Si, 2.5 Mn, bal Zn.

Heat treated 75,000 TS, 45,000 YS; 20 El; B 85 Rock.

For bearings, bushings, gears.

Forgeable leaded bearing alloy, corrosion resistant.

DYNALLOY 604.

M-266, 61 Cu, 2.5 Pb, 1 Si, 2.5 Mn, bal Zn.

HH Temper: 65,000-80,000 TS; 40,000-60,000 YS; 10-20 El; B 75-86 Rock.

For bearings, pump gears, valve stems.

High leaded bearing alloy, corrosion resistant.

DYNALLOY 605.

M-266; 62 Cu, 0.6 Pb, 1 Si, 2.5 Mn, bal Zn

HH Temper: 70,000-75,000 TS; 45,000-55,000 YS; 18-25 El; B 75-82 Rock.

For bearings, pump gears, valve stems.

Low leaded bearing alloy, corrosion resistant.

DYNALLOY 6731 (603).

M-266; 2.75 Mn, 1.0 Pb, 1.0 Si, 60 Cu, bal Zn.

Forged: 50,000 TS; 30,000 YS; 15 El; B 65 Rock.

Heat treated: 75,000 TS; 45,000 YS; 20 El; B 82 Rock.

For gears, bushings, bearings, pump barrels, machinery parts.

Leaded forging brass.

DYNAMAX.

65 Ni, 33 Fe, 2 Mo.

For toroidal cores; high permeability.

DYNAMIC C-1.

M-451; 0.2-0.3 C, 0.5-0.8 Mn, bal Fe.

For cast steel parts; pearlitic.

DYNAMIC C-1-3.

M-451, 0.25-0.35 C, 0.6-0.8 Mn, bal Fe.

For castings; water hardening

DYNAMIC C-1-4.

M-451; 0.35-0.45 C, 0.65-0.85 Mn, bal Fe.

For gears, pinions, coupling boxes; water hardening.

DYNAMIC C-1-5.

M-451, 0.4-0.5 C, 0.65-0.85 Mn, bal Fe.

For gears, pinions, power shovels; water hardening.

DYNAMIC C-1-6.

M-451; 0.5-0.6 C, 0.65-0.85 Mn, bal Fe.

For cams, bottom plates; wear hardening

DYNAMIC C-1-7.

M-451; 0.7-0.8 C, 0.65-0.85 Mn, bal Fe.

For castings, abrasion resistant.

DYNAMIC C-2.

M-451; 0.25-0.35 C, 0.9-1.4 Mn, 0.25-0.45 Ni, 0.05-0.15 Mo, bal Fe

Cast 85,000 TS, 52,500 YS; 30 El, 57 RA

For tractor frames, locomotive castings; resists shock and impact; Iz-45

DYNAMIC C-2-A

M-451, 0.35-0.45 C, 1.0-1.5 Mn, 0.25-0.45 Ni, 0.05-0.15 Mo, bal Fe.

For crawler shoes, gears, sprockets; wear resistant.

DYNAMIC C-3.

M-451, 0.25-0.35 C, 1.0-1.5 Mn, 0.1-0.2 Mo, bal Fe.

Cast: 96,000 TS, 68,000 YS, 24 El, 48 RA.

For sprockets, spindles, wheel centers, crossheads, gears, wear resistant; resists shock and impact.

DYNAMIC C-3A

M-451, 0.4 C, 1.2 Mn, 0.15 Mo, bal Fe

Cast.

For gears, racks, sprockets, wear resistant

DYNAMIC C-4

M-451; 0.25 C, 0.9 Mn, 0.8 Cr, 1.9 Ni, 0.5 Mo, bal Fe

Heat treated: 120,000 TS; 100,000 YS; 15 El, 30 RA; 321 Brin.

For rolling mill pinions; impact resistant.

DYNAMIC C-5.

M-451, 0.3 C, 1 Mn, 0.7 Ni, 0.4 Mo, bal Fe.

Cast.

For rams, saw blocks.

DYNAMIC C-6

M-451, 0.4-0.7 C, 3 Cr, 0.4 Mo, bal Fe.

Cast

For sand mills, rock crushers; abrasion resistant.

DYNAMIC C-7.

M-451, 0.4 C, 0.9 Mn, 0.5 Cr, 1.5 Ni, 0.5 Mo, bal Fe.

Cast.

For steel castings, crane wheels; high strength.

DYNAMIC C-8.
M-451; 0.25-0.35 C, 1.0-1.5 Mn, 0.3-0.7 Cr, 0.4-0.8 Ni, 0.2-0.4 V, bal Fe.
For gears, sprockets; tough, high impact resistant.

DYNAMIC C-9.
M-451; C, Mn, V, bal Fe.
Cast.
For steel castings; air hardened.

DYNAMIC C-10.
M-451; C, Cr, Mo, bal Fe.
Cast.
For die blocks, crane wheels; wear resistant.

DYNAMO.
M-200; 0.12 C, 0.2 Si, 0.1 Mn, bal Fe.
For electrical purposes; high magnetic permeability.

DYNAMO.
M-368; 0.7-0.9 C, bal Fe.
For tools, dies, jigs; water hardening.

DYNAMO SHEET STEEL.
U.S.; 3-4 Si, < 0.1 C, < 0.3 Mn, < 0.03 P + S, bal Fe.
For laminated sheets for dynamos, electrical equipment; Hadfields silicon steel type.

DYNAMO STEEL.
M-331; 0.09 C, bal Fe.
For dynamo parts; high permeability.

DYNATRODE 666.
M-717;
Electrode for AC-DC welding of mild steel; strength 70,000 psi.

DYNATRODE 777.
M-717;
Mild steel electrode for AC-DC welding of mild steel. 76,000 TS.

DYNAVAN.
M-73; 1.55 C, 12.5 W, 4.7 Cr, 5 V, 5 Co, bal Fe.
Hardened: C 64-66 Rock.
For cutting tools, blanking dies, broaches, drills, milling cutters.
Type T-15 high-speed steel. Heat and abrasion resistant. High red-hardness.

DYNAVAR.
M-1084; 0.15 C, 2 Mn, 15 Ni, 7 Mo, 20 Cr, 0.04 Be, 40 Co, bal Fe.
Aged: 330,000-360,000 TS; 260,000-280,000 YS; 560-600 Brin.
Rolled: 260,000-290,000 TS; 200,000-220,000 YS; 480-500 Brin.
For springs, flapper valves, valve parts, electronic components; corrosion resistant, age-hardenable, non-magnetic.

DYN-EL.
M-537; 0.12 C, 0.6 Mn, 0.4 Cu, bal Fe.
Heat treated: 72,000 TS, 58,000 YS; 28 El; 60 Brin.
For railroads, trucks, buses.

DYNELEC.
M-691; 2.5 Si, bal Fe.
For armatures, electric motors and generators; high permeability.

DYN-GZ10.
M-1218, M-1218a; 89.25 Cu, 10 Sn, 0.5 Ni, 0.25 P.
Cast: 29,000-50,000 TS; 16,000-27,000 YS; 29-8 El; 70-85 Brin.
For nuts, bearings, valve guides, bushings; phosphor bronze, tough.

DYN-GZ14.
M-1218, M-1218a; 86.15 Cu, 11.5 Sn, 2 Ni, 0.3 P.
Cast: 27,000-42,500 TS; 16,000-25,000 YS; 25-6 El; 90-110 Brin.
For worm wheels, toggle pads, bearings; phosphor bronze, shock resistant.

DYN-RM.
M-1218, M-1218a; 83.2 Cu, 10 Sn, 2.5 Ni, 4 Pb, 0.3 P.
Cast: 25,000-41,000 TS; 16,000-22,500 YS; 20-6 El; 80-100 Brin.
For mill bearings, bushings, liners; phosphor bronze, shock resistant.

D.Y.O.
M-32; 0.3 C, 0.3 Mn, 0.25 Si, 4 Cr, 14.5 W, 0.5 V, bal Fe.
Heat treated: 205,000 TS.
For tools, forging dies; red-hard, hot work steel.

DYSOID.
Eng.; 63 Cu, 18 Pb, 10 Sn, 10 Zn.
For hardware; free-cutting.

DZ.
M-459, C, bal Fe.
For scales, rules; water hardened.

D-Z-L MARINE NICKEL GENUINE.
M-178; 88 Sn, bal Sb and Cu.
Cast: 17,0000 TS; 9510 YS; 29.6 Brin.
For bearings subject to shock and heat; pouring temperature 850-925°F.

E1 DYNAMO.
Russia; 0.10 max C, 1.0 Si, 0.03 max Mn, bal Fe
For motor stators and rotors; high permeability.

E2 DYNAMO.
Russia, 0.10 max C, 0.03 max Mn, 2.0 Si, bal Fe.
For motor stators and rotors; high permeability

E3 TRANSFORMER.
Russia; 0.10 max C, 0.30 max Mn, 3 Si, bal Fe.
For transformers; high permeability.

E4 TRANSFORMER
Russia; 0.10 max C, 0.30 max Mn, 4.0 Si, bal Fe
For transformers; high permeability.

E18 Co5.
M-Germany; 0.78 C, 4.2 Cr, 0.6 Mo, 18.8 W, 1.53 V, 5.72 Co, bal Fe.
Hardened C 64-66 Rock
For tools and cutters, reamers, taps, broaches, lathe and planer tools.
High speed steel, type T 4, high red-hardness.

E18 Co10.
M-Germany; 0.75 C, 18 W, 4 Cr, 1.5 V, 0.7 Mo, 10 Co, bal Fe.
Hardened: C 64-66 Rock.
For lathe and planer tools, drills, reamers, form cutters, broaches, form tools, gear cutters.
For heavy duty work.
High speed steel, Type T5. Red-hard.

E20M.
M-459; 0.2 C, 1.2 Mn, 1.2 Cr, bal Fe.
For bakelite molds; water or oil hardened.

E 21 S.
M-459; C, Cr, Mo, Ni, bal Fe.
Oil treated: 150,000-177,000 TS; 128,000-157,000 YS; 12-9 El.
For machinery parts; gears, shafts; oil hardening, shock resistant.

E 22 S.
M-459; C, Cr, Ni, Mo, bal Fe.
Oil treated: 171,000-199,000 TS; 150,000-177,000 YS; 1-8 El.
For machinery parts; oil hardening.

E NO. 25.
M-69; 1.0 C, 0.35 Mn, 0.25 V, bal Fe.
For tools, concrete breakers; water hardened.

E38 Mo.
M-459, M-1496; 0.38 C, 1.0 Si, 5.3 Cr, 1.5 Mo, 0.45 V, bal Fe.
Annealed: 102,000 TS; 66,000 YS; 28 El; 197 Brin.
Hardened: 300,000 TS; 250,000 YS; 6 El; C 55 Rock.
For Al & Mg die casting dies, components for die casting machines.
Air or oil hardening. Thermal shock resistant, Type H11.

E38 V.
M-459, M-1496; 0.4 C, 1.0 Si, 5.3 Cr, 1.4 Mo, 1.0 V, bal Fe.
Annealed: 98,000 TS; 74,000 YS; 28 El; 210 Brin.
Hardened: 220,000 TS; 182,000 YS; 12 El; 430 Brin.
For extrusion press mandrels, aluminum die casting dies.
Air or oil hardening. Thermal shock resistant, Type H13.

E38 W.
M-459, M-1496, 0.38 C, 1.2 Si, 5.6 Cr, 1.5 Mo, 0.3 V, 1 5 W, bal Fe.
Ht Tr. 216,000 TS; 185,000 YP; 14 El; 53 RA.
For metal extrusion press components, die casting dies, forging dies, hot shear blades.
Air or oil hardening Thermal shock resistance Type H12.

E 724Z.
M-459; C, Cr, Ni, bal Fe
Oil treated. 171,000-193,000 TS; 150,000-171,000 YS, 13-10 El.
For gears, shafts; oil hardening, tough.

E1318.
Russia, 0 6 max C, 16-18 Cr, 4.5-6 5 Al, 0.6 max Ni, bal Fe.
For electrical resistance and heating elements; applications to 1100°C.

E1340
Russia, 0.15 max C, 23-27 Cr, 4-7 Al, 0.6 max Ni, bal Fe.
For electrical resistance and heating elements; applications to 1200°C.

E1503.
Russia, 0.5-0.6 C, 7.5-9 5 Mn, 0.7 Si, 3.8-4.5 Cr, 8-10 Ni, bal Fe.
For instrument parts, nonmagnetic.

E1919
M-Russia; 0.83 C, 10.0 Co, 4.0 Cr, 1.8 V, 10.0 W, bal Fe.
Ht. Tr.: Rock C 64-66.
For cutters, lathe and planer tools, form cutters, drills.
High speed steel. High red-hardness.

E1931.
M-Russia; 1.49 C, 4 0 Cr, 4.4 V, 10.6 W, 4.9 Co, bal Fe.
Hardened: C 65-68 Rock.
For cutters, drills, broaches, milling cutters, taps, reamers.
High red-hardness Abrasion resistant. High speed steel. Type T 15.

E1940.
M-Russia; 0.83 C, 4.0 Cr, 2.1 V, 18.0 W, 5.0 Co, bal Fe.
Hardened: C 62-65 Rock.
For cutters, boring tools, lathe and planer tools, gun-barrel drills, roll turning tools.
High speed steel, type T4. Red-hard.

E-52100 WIRE.
M-12; 0.95-1.10 C, 0.2-0.5 Mn, 0 03 max P, 0.35 max S, 0.15-0.30 Si, 1.3-1.6 Cr, bal Fe.
For roller and ball bearings; water hardened.

EAGLE A BABBITT.
M-88; Sn, Sb, bal Pb.
At 70°F: 23.5 Brin.
At 212°F: 11.9 Brin.
For bearings, bushings; Babbitt.

EAGLE MUSIC WIRE.
M-774; 0.9 C, bal Fe.
For wire, springs; water hardened.

"E" ALLOY.
M-311; 20 Zn, 2.5-3 Cu, 0.2-1 Si, 0.5 Mg, 0.5 Mn, Fe, bal Al.
Hot rolled: 67,000 TS; 53,000 YS; 15 El.
For light weight structures; non-hardenable.

EARLUMIN.
Spain; 4-5 Cu, bal Al.
For light alloy parts; age-hardenable.

EASTERN 12R.
M-775, 6-8 Cu, 1-4 Si, 2.5 Zn, 1-4 Fe, 0.6 Mg, bal Al
Cast: 19,000 TS; 14,000 YS; 2 El.
For light alloy parts, Aluminum 113, SAE33.

EASTERN NO 20.
M-1014; 0 07 max C, 24-30 Ni, 19-21 Cr, 2-3 Mo, 3-4 Cu, 2 max Mn, bal Fe.
Sheet 90,000 TS, 50,000 YS; 35 El; B 90 Rock.
At 1000°F 76,000 TS, 32,000 YS; 48 El; 60 RA.
For acid handling equipment, pickling racks, mixing tanks. Austenitic, stainless. Carpenter 20. Acid resistant.

EASTERN 29-9
M-775; C, 29 Cr, 9 Ni, bal Fe.
Cast: 97,000 TS, 49,000 YS; 28 El; 90-95 Brin.
For valves, pumps, headers, corrosion resistant.

EASTERN 36.
M-775, 0.1 C, 2.3-3.1 Si, 0.03 Mg, 0.2 Zn, 0.6 Fe, 0.2 Mn, bal Al.
Cast 17,000 TS; 5500 YS; 20 El.
For light alloy parts.

EASTERN NO 41
M-1014, 0.09 C, 19 Cr, 11 Co, 10 Mo, 3 Ti, 1.5 Al, bal Ni
Heat treated. 206,000 TS, 154,000 YS, 14 El.
At 1400°F. 160,000 TS, 136,000 YS. 11 El.
For jet engine components, afterburners, turbine casings, combustion liners, turbine buckets
Similar to Rene 41, High strength at 1600-1800°F.

EASTERN NO. 155.
M-1014; 0.15 C, 0 65 Si, 1-2 Mn, 22 Cr, 20 Ni, 3 Mo, 1 Cb, 3 W, 20 Co, bal Fe.
Sheet: 118,000 TS; 56,000 YS; 49 El.
At 1000°F: 94,000 TS; 40,000 YS; 54 El.
For aircraft cabin heaters, exhaust stacks, afterburners, rocket chambers. Similar to Multimet N-155. High heat and corrosion resistance.

EASTERN NO. 200.
M-1014; 99 Min Ni, 0.25 max Cu, 0.35 max Mn, 0.15 max C, 0.40 max Fe.
Hard: 115,000 TS; 105,000 YS; 2 El; B 90 min Rock.
Soft: 55,000 TS; 15,000 YS; 55 El; B 70 max Rock.
For production and handling of fluorine and

bromine, food processing equipment, chemical shipping drums.
Similar to Inco 200, high corrosion resistance, good cryogenic ductility.

EASTERN NO. 286.
M-1014; 0.05 C, 1.5 Mn, 15 Cr, 0.3 V, 26 Ni, 1.2 Mo, 2.2 Ti, 0.2 Al, bal Fe.
Aged: 155,000 TS; 105,000 YS; 24 El; 302 Brin.
At 1200°F: 110,000 TS; 88,000 YS; 13 El; 14 RA.
For jet engine and supercharger components, fasteners, turbine parts.
Similar to A-286 alloy, age-hardenable. High heat and corrosion resistance.

EASTERN 500T.
M-775; 0.4-1.0 Cu, 0.35 Si, 0.2-0.5 Mg, 7-8 Zn, 1 Fe, 0.6 Mn, bal Al.
Aged: 30,000 TS; 22,000 YS; 3 El.
For light alloy parts; Alloy ZC81A.

EASTERN NO. 530
M-1014; 0.08 max C, 3-4.5 W, 14-16 Cr, 15-17 Mo, bal Ni.
Sheet: 129,000 TS; 64,000 YS; 37 El; 31 RA.
At 1200°F: 95,000 TS; 46,000 YS; 22 El; 22 RA.
For chemical and petroleum equipment, oil refinery components, exhaust stacks, combustion chambers.
Similar to Hastelloy C, corrosion and heat resistant.

EASTERN NO 600.
M-1014; 14-17 Cr, 6-10 Fe, bal Ni.
Annealed. 90,000 TS; 40,000 YS, 45 El; B 75 Rock.
Cold Drawn: 150,000 TS; 125,000 YS; 10 El; C 30 Rock.
For regenerators, coolers, heaters, furnace muffles, combustion liners, thermocouple tubes
Similar to Inconel. High oxidation and corrosion resistance.

EASTERN NO. 605
M-1014; 0.05-0.15 C, 1-2 Mn, 19-21 Cr, 14-16 W, 9-11 Ni, 3 max Fe, bal Co.
Annealed: 155,000 TS; 75,000 YS; 60 El; C 22 Rock.
At 1000°F. 82,000 TS; 38,000 YS; 24 El
For gas turbine and jet engine components, fasteners
Similar to Haynes 25 and L-605 alloy.
High heat and corrosion resistant.

EASTERN NO. 702.
M-1014; 14-17 Cr, 2.7-3.7 Al, 0.25-1.0 Ti, bal Ni
Age-Hardened 142,000 TS; 82,000 YS; 38 El.
At 1000°F: 120,000 TS; 74,000 YS, 40 El.
For combustion liners, jet engine turbines.
Age-hardenable.
Similar to Inconel 702. High oxidation and corrosion resistant.

EASTERN NO. 718.
M-1014; 17-21 Cr, 4.5-5.7 Cb, 2.8-3.3 Mo, 0.2-1.0 Al, 0.3-1.3 Ti, 50-55 Ni, bal Fe.
Annealed: 130,000 TS; 60,000 YS; 45 El.
Age-Hardened: 190,000 TS; 150,000 YS; 25 El.
For aircraft and jet engine structural components.
Similar to Inconel 718, age-hardenable. Oxidation and corrosion resistant.

EASTERN NO. 750.
M-1014; 14-17 Cr, 5-9 Fe, 2.2-2.7 Ti, 0.4-1.0 Al, 0.7-1.2 Cb, bal Ni.
Heat treated: 170,000 TS; 115,000 YS; 18 El; 25 RA.
For gas turbine wheels, and rotor blades, turbo superchargers, jet engine afterburners, pressure vessels.
Similar to Inconel X-750, tough, age-hardenable, corrosion and oxidation resistant.

EASTERN NO. 801.
M-1014; 32 Ni, 1 Ti, 0.04 C, 0.75 Mn, 44.5 Fe, 0.007 S, 0.15 Cu, 20.5 Cr.
Sheet: 90,000 TS; 40,000 YS; 40 El.
At 1000°F: 75,000 TS; 30,000 YS; 35 El.
For combustion liners, furnace parts, heaters, high temperature parts. Excellent oxidation resistance to 1700°F. Similar to Incoloy T.
High tensile and rupture strength.

EASTERN NO 1030
M-1014, 12-15 Co, 3.5-5.0 Mo, 2.75-3.25 Ti, 1.0-1.5 Al, 0.02 0.15 Zr, 0.001-0.01 B, 18-21 Cr, bal Ni.
Heat treated: 188,000 TS; 115,000 YS; 28 El; 25 RA
At 1400°F: 117,000 TS; 99,000 YS; 28 El, 41 RA.
For jet engine turbine buckets, discs, fasteners, combustion chambers Similar to Waspaloy, high temperature strength, oxidation resistant.

EASTERN 32510
M-775; Malleable Iron Casting
Cast: 50,000 TS, 32,500 YS, 10 El; 110-135 Brin.
Excellent machinability
ASTM A47-52 Grade 32510.

EASTERN 35018.
M-775; Malleable Iron Casting
Cast: 53,000 TS, 35,000 YS, 18 El; 110-135 Brin
Good machinability
ASTM A47-52 Grade 35018

EASTERN FS-18-8FM
M-1014, 0.15 max C, 17-19 Cr, 8-10 Ni, 0.07 min P or S, 0.6 max Zr, bal Fe.
Annealed 80,000 TS; 35,000 YS, 50 El, 65 RA; 150 Brin
For shafts, gears, chemical plant equipment, Type 303; free-cutting, stainless

EASTERN ES-18-11.
M-1014; 0.12 max C, 17-19 Cr, 10-13 Ni, 0.03 max S, 0.04 max P, bal Fe
For spun and formed parts, Type 305, stainless, austenitic.

EASTERN ES-18-12-3Mo
M-1014, 0.08 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 50 El; 65 RA; 160 Brin
For chemical plant equipment; Type 316, stainless, austenitic.

EASTERN ES-18-12-3Mo-L.
M-1014, 0.03 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed 85,000 TS, 35,000 YS, 55 El; 70 RA; 155 Brin.
For chemical plant equipment, welded structures; Type 316L; stainless, austenitic.

EASTERN ES-18-12-4Mo.
M-1014, 0.08 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, bal Fe
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For chemical plant equipment, mixers, agitators; Type 317; stainless, austenitic.

EASTERN G-35.
M-775; C, bal Fe.
35,000 TS; 0 El; 215 Brin.
For pressure fittings, cams, castings; gray cast iron.

EASTERN G-40.
M-775; C, alloy, bal Fe.
40,000 TS; 0 El; 240 Brin.
For die blocks, stoker parts, castings; heat resistant cast iron.

EASTERN GR.P1.
M-775; 3 C, Si, Mn, bal Fe.
Cast: 70,000 TS; 48,000 YS; 10 El; 187 Brin.
For gears, shafts, housings; pearlitic malleable iron.

EASTERN GR.P2
M-775; 3 C, Si, Mn, bal Fe.
Cast: 75,000 TS; 50,000 YS; 8 El; 201 Brin.
For gears, shafts, housings; pearlitic malleable iron.

EASTERN GR.P3.
M-775; 3 C, Si, Mn, bal Fe.
Cast. 80,000 TS; 60,000 YS, 5 El; 217 Brin.
For gears, shafts, housings; pearlitic malleable iron.

EASTERN GR.P4.
M-775, 3 C, Si, Mn, bal Fe.
Cast· 85,000 TS; 55,000 YS; 4 El; 207 Brin.
For gears, shafts, housings; pearlitic malleable iron.

EASTERN GR P5
M-775, 3 C, Si, Mn, bal Fe
Cast· 75,000 TS; 50,000 YS, 4 El, 201 Brin.
For gears, shafts, housings; pearlitic malleable iron.

EASTERN GR P6.
M-775, 3 C, Si, Mn, bal Fe.
Cast: 65,000 TS, 45,000 YS; 10 El, 187 Brin.
For gears, shafts, housings, pearlitic malleable.

EASTERN H-55.
M-775, 2.2 C, 1.3 Si, alloy, bal Fe
Cast 55,000 TS, 0 El, 270 Brin.
For lapping plates, rolls, pressure fittings, castings; gray cast iron Tr. S. 3200

EASTERN H-60
M-775, 2.2 C, 1 Si, 0.5 Mn, bal Fe
Cast. 60,000 TS, 0 El, 270 Brin.
For manhole covers, cylinders, rolls, brake drums, die blocks; gray cast iron, wear resistant.

EASTERN H-65.
M-775, 2.2 C, 1 Si, alloy, bal Fe
Cast· 65,000 TS, 0 El, 300 Brin.
For die blocks, stoker parts, castings; heat resistant cast iron up to 1200°F.

EASTERN N.
M-775; C, 16 Cr, bal Fe.
Annealed 50,000 TS, 0 El, 195 Brin
For carburizing and annealing boxes, castings, furnaces; heat resistant cast iron to 1500°F.

EASTERN N-1.
M-775, C, 28 Cr, 12 Ni, bal Fe
Cast. 75,000 TS, 60,000 YS; 2 El, 260 Brin
For rabble arms, pump parts, furnace parts, heat resistant cast iron.

EASTERN N-2.
M-775; C, 28 Cr, bal Fe.
Cast· 50,000 TS; 40,000 YS; 1 El, 225 Brin.
For annealing boxes, lead pots, pump and valve bodies, heat resistant cast iron to S atm.

EASTERN N-3
M-775; C, 23 Cr, bal Fe.
Cast· 65,000 TS; 50,000 YS; 1 El; 260 Brin.
For glass industry, stainless castings, glass molds, stainless, resists scaling to 1600°F.

EASTERN N-4.
M-775; C, 20 Cr, 64 Ni, bal Fe.
Cast. 60,000 TS, 45,000 YS; 2 El; 250 Brin.
For carburizing boxes, glass molds, pyrometer tubes; heat resistant to 1800°F.

EASTERN N-5.
M-775; C, 20 Cr, 38 Ni, bal Fe.
Cast: 65,000 TS; 45,000 YS; 4 El; 235 Brin.
For furnace parts, grids, rollers, hearth plates; heat resistant to 1650°F.

EASTERN N-6.
M-775; C, 8 Cr, 22 Ni, bal Fe.
Cast: 75,000 TS; 40,000 YS; 20 El; 160 Brin.
For ship propellers, pump and valve bodies; stainless, heat resistant to 1800°F.

EASTERN N-8.
M-775; C, 23 Cr, bal Fe.
Cast: 65,000 TS, 55,000 YS; 0 El; 555 Brin.
For heat resistance; abrasion resistant.

EASTERN "Z" METAL.
M-775; 2.0-2.6 C, 1 Si, 1 Mn, bal Fe.
Cast: 75,000 TS; 50,000 YS; 12 El; 180 Brin.
For air drill parts, sprockets, gears, unions; malleable cast iron.

EASTON PM 216.
M-1710, 0.80 C (incl. 0.75 graphite), 0.43 Mn, 0.41 Ni, 0.73 Mo, 2.05 Cu, bal Fe.
140-300 mesh metal powder for sintering.
Produces hardenable steel.

EASTON RZ 365
M-1710; 98.7 Fe, 0.22 Mn, 0.06 C (typical).
140-300 mesh iron powder for sintering.

EASTON RZ 365 MM.
M-1710; 0.11-0.14 C, 0.55 Mn, 98.6 Fe.
140-300 mesh powder for sintering.

EASTON RZ 365 S
M-1710, 0.08 C, 0.17 Mn, 0.31 S, 98.5 Fe.
140-300 mesh iron powder for sintering.
For free machining material

EASTON RZ 4600.
M-1710, 0.08 C, 1.84 Ni, 0.30 Mo, 0.21 Mn, bal Fe.
140-300 mesh metal powder for sintering.
Mixed with varying amounts of graphite before sintering will permit product similar in composition to AISI 46XX.

EASY
M-686, 65 Ag, 20 Cu, 15 Zn.
For silversmithing solder for sterling, M.P. 1280-1325°F

EASY-FLO.
M-63, 50 Ag, 15.5 Cu, 16.5 Zn, 18 Cd.
For brazing, M.P. 1175-1200°F; corrosion resistant. AMS 4770C, AWS BAg-la

EASY-FLO 3.
M-63; 50 Ag, 15.5 Cu, 15.5 Zn, 16 Cd, 3 Ni.
M.P. 1170°F, Flow P 1270°F.
For brazing stainless steels with corrosion resisting joints; brazing carbide tips.
AMS 4771 A, AWS BAg-3.

EASY-FLO 30
M-63, 30 Ag, 27 Cu, 23 Zn, 20 Cd.
M.P 1125°F, Flow P. 1310°F
60,000 TS expected when joining 1020 steel.
General purpose brazing alloys, particularly for leak tight joints.
AWS BAg-2a.

EASY-FLO 35.
M-63; 35 Ag, 26 Cu, 21 Zn, 16 Cd.
M.P. 1125°F; Flow P. 1295°F.
General purpose low melting brazing alloy for brazing ferrous and non-ferrous alloys.
AMS 4768A; AWS BAg-2.

EASY-FLO 45.
M-63; 45 Ag, 15 Cu, 16 Zn, 24 Cd.
M.P. 1125°F; Flow P. 1145°F.
For brazing ferrous and non-ferrous alloys; lowest flow point of silver braze alloys.
AMS 4769 A; AWS BAg-1.

EATONITE.
M-947; 2.0-2.75 C, 37-41 Ni, 14 W, 27-31 Cr, 9-11 Co, 1 max Si, 8 max Fe.
At 1300°F; 302 Brin.
For valve facing, valve seats and faces; retains hardness at high temperature.

E.B. ALLOY.
M-1, M-435; 0.50 C, 4 Cr, 0.4 V, 0.5 Mo, bal Fe.
Heat treated: 217,000-308,000 TS; 176,000-229,000 YS; 6-13 El; 6-34 RA; 44-56 Rock C.
For shears, header dies, hot work steel, air or oil hardening.

"E.B.D." BEARING.
Eng.; 90-88 Cu, 10 Sn, 5 P + Sn, 2 Zn.
For bearings; strong.

E-BRITE 26-1.
M-663; 0.005 max C, 0.40 max Si, 0.40 max Mn, 25-27.5 Cr, 0.75-1.25 Mo, 0.0150 max N, 0.5 max Cu + Ni, bal Fe.
Ann: 70,000 TS; 45,000 YS; 42 El; 86 RA.
(Supplied as ingots for remelting.)
Good resistance to impact, intergranular corrosion, pitting and crevice corrosion, and immune to chloride stress cracking.
For parts for marine and desalting equipment, food processing, petroleum industries.

"EB" SILVER BRAZING ALLOY.
M-63; 57 Ag, Mn, Sn, bal Cu
For silver brazing of carbides; M.P. 1120-1345°F.

E.C. 124.
Eng.; 12 Si, 1 Cu, 0.5 Mg, 1 N, bal Al.
For light alloy parts; cast or pressed.

ECCENTRIC RING.
Eng.; 84 Cu, 14 Sn, 2 Zn.
For bearings, bells.

ECLAIR.
M-1043, 0.62 C, 14 W, bal Fe.
For hot work tools; oil hardened.

ECLAIR 33.
M-1043; 0.82 C, 6 W, 4.5 Mo, 1.5 V, bal Fe.
For lathe and planer tools, reamers, cutters; oil hardened.

ECLAIR 44.
M-1043; 0.82 C, 10 W, 1.5 V, 0.65 Mo, bal Fe.
For lathe and planer tools; oil hardened.

ECLAIR 55.
M-1043; 0.82 C, 10 W, 3 Co, 1.5 V, 0.7 Mo, bal Fe
For lathe and planer tools, reamers, oil hardened

ECLAIR 88.
M-1043; 0.82 C, 6.5 W, 5 Mo, 2 V, bal Fe.
For lathe and planer tools, drills, hobs, taps; oil hardened.

ECLAIR 99.
M-1043; 0.92 C, 10 W, 9 Co, 2 V, 0.6 Mo, bal Fe.
For dies; oil hardened.

ECLIPSE 75.
C, alloy, bal Fe.
For cold hobbing tools; water hardened.

ECLIPSE BRONZE.
M-241; Sn, bal Cu.
For hardware; white nickel bronze.

E.C.N. ALLOY.
M-107; C, Ni, Cr, bal Fe.
At 20°C.: 67,000-78,000 TS.
At 1000°C.: 33,000 TS.
For case-hardening boxes, glass molds, retorts, stills, fire boxes, muffles, crucibles, pumps; highly resistant to heat and corrosion.

E Co 3.
M-Germany; 0.8 C, 12 W, 4 Cr, 1.9 V, 0.85 Mo, 3 Co, bal Fe
Hardened: C 64-67 Rock.
For lathe and planer tools, reamers, broaches, drills, form cutters, taps, hobs.
High red-hardness.
High speed steel, Type T8.

ECONO.
M-140; 0.4 C, 0.2 Mn, 3.75 Cr, 0.75 V, 1.1 W, 5.75 Mo, bal Fe.
For tools, cutters, hot work dies; hot work steel.

ECONO NO. 1-V
M-1683; 1.05 C, 0.25 V, bal Fe.
Water hardening tool steel; AISI W2.

ECONO-2.
M-1683; 0.75 C, 1.25 Ni, 0.80 Cr, 0.25 Mo, 0.15 V, bal Fe.
Heat treated: 121,000-208,000 TS; 90,000-180,000 PL, C 29-45 Rock
For brake dies, bushings, cams, shear blades, gears, set screws, swaging and forming dies, punches
Type L6, tough, oil hardening

ECONO-5.
M-1683, 1.0 C, 5 Cr, 1 Mo, 0.4 V, 0.4 Mn, bal Fe
Annealed: 103,000 TS; 52,000 YS, 26 El; C 18 Rock
Hardened. 178,000-253,000 TS, 146,000-200,000 YS; 3-12 El, 7-32 RA, C 41-53 Rock.
For blanking and trimming dies, shears, cutters, gauges, lamination dies
Type A2, air hardening, nondeforming, cold work tool steel, tough

ECONOMET.
M-59; 0.35-0.75 C, 8-12 Cr, 28-32 Ni, bal Fe.
For heat treating boxes, furnace parts
Heat and abrasion resistance

ECONOMET 4.
M-59; 0.36-0.50 C, 16-23 Cr, 7-11 Ni, bal Fe
For heat and corrosion resistant parts, stainless, heat and corrosion resistant

ECONOMY HARDFACE
M-9, 1.0 C, 5 Cr, 1.7 Mo, bal Fe.
Welded. 450-550 Brin.
For hard facing electrode, abrasion resistant, air hardened.

ECONOMY HARDFACE C.
M-9, 0.5 C, 3 Cr, 1.7 Mo, bal Fe
Welded: 500 Brin.
For hard facing electrode; wear and abrasion resistant

EDAL.
Ger; 5 Mg, bal Al.
Cast: 40,000-64,000 TS; 21,000-43,000 YS, 5-31 El; 1 RA.
For welding rods, light alloy parts, heat treatable.

EDCO PHOSPHOR BRONZE
M-1035; 91.5 Cu, 8.25 Sn, 0.25 P.
Cast: 30,000 TS; 7-10 El; 163 Brin.
For welding rod, M.P. 1010°C.

EDELBRONZE.
M-557; Sn, bal Cu.
For chemical plant and textile industry equipment; corrosion resistant.

EDELMESSING.
German; Zn, alloy, bal Cu.
For ornamental hardware; high tensile brass.

EDELSTAHL-MTS5.
M-459; 0.20 C, 11.5 Cr, 1 Mo, 0.4 Ni, 0.3 V, bal Fe.
Annealed: 92,000 TS; 38,000 YS; 26 El; B 90 Rock.
Hardened: 235,000 TS, 195,000 YS, 10 El; C 46 Rock.
For valves, bearings, cutlery, surgical instruments. Corrosion resistant, hardenable.

EDELSTAHL-MTS6.
M-459; 0.17 C, 11.5 Cr, 0.6 Mo, 0.6 Ni, 0.25 V, bal Fe.
Annealed. 80,000 TS; 40,000 YS; 25 El; B 92 Rock.
Hardened. 200,000 TS, 165,000 YS, 12 El, C 45 Rock.
For table hardware, surgical instruments, springs, cutlery Corrosion resistant, hardenable.

EDELWEISS AKRO 6.
M-1308, 0.12 max C, 0.8 Si, 0.8 Al, 6.5 Cr, bal Fe
For oil refining equipment; creep and heat resistant.

EDELWEISS ALSICRO 8.
M-1308, 0.12 max C, 0.8 Si, 0.8 Al, 6.5 Cr, bal Fe.
For oil refining equipment, creep and heat resistant.

EDELWEISS R1
M-1308, 0.15 C, 2 Si, 24 Cr, 19 Ni, bal Fe
For furnace parts, heat treating boxes, Type CK-20; corrosion and heat resistant

EDELWEISS R1G
M-1308, 0.4 C, 2 Si, 25 Cr, 19 Ni, bal Fe
Cast 75,000 TS, 50,000 YS; 17 El, 170 Brin.
Aged 85,000 TS, 50,000 YS, 10 El, 190 Brin
For furnace parts, retorts, heat treating boxes, Type HK, corrosion and heat resistant

EDELWEISS R9
M-1308; 0.15 max C, 20 Cr, 14.5 Ni, 0.9 Mo, 1.2 Cb, 0.8 Ti, bal Fe
For furnace parts, heat treating boxes, retorts; corrosion and heat resistant.

EDELWEISS R9G
M 1308, 0.4 C, 22 Cr, 2 Si, 9.5 Ni, bal Fe.
Cast: 85,000 TS; 45,000 YS, 35 El, 165 Brin.
For heat treating boxes, chains, conveyor belts, corrosion and heat resistant

EDELWEISS R16
M-1308, 0.15 C, 19.5 Cr, 9.5 Ni, 2 Si, bal Fe
Cast 72,000 TS; 36,000 YS; 35 El; 40 RA, 145 Brin.
For chemical plant equipment, mixers, filters; Type CF-16F, corrosion and heat resistant.

EDELWEISS R25.
M-1308; 0.12 max C, 1.5 Si, 1.5 Al, 24 Cr, bal Fe.
For furnace parts, oil refinery equipment, heat and creep resistant

EDELWEISS R25N.
M-1308; 0.2 C, 1.2 Si, 25 Cr, 4 Ni, bal Fe.
Cast. 90,000 TS; 65,000 YS; 2 El; 212 Brin.
For furnace parts, retorts, heat treating boxes, corrosion and heat resistant.

EDELWEISS R25NG.
M-1308; 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe.
Cast. 90,000 TS; 65,000 YS; 2 El; 212 Brin.
Heat treated· 97,000 TS; 65,000 YS; 18 El; 210 Brin.
For cylinder liners, bushings, valve seat and bodies, Type CC-50; heat resistant.

EDGAR ALLEN NO. 5 HOT DIE.
M-210; 0.32 C, 3.25 Cr, 9.5 W, 0.35 V, bal Fe.
For hot shear blades, press and form dies, piercers; hot work steel, oil hardened.

EDGAR ALLEN 66.
M-210; 2.25 C, 13 Cr, bal Fe.
For dies; non-deforming.

EDGAR ALLEN A.13.
M-210; 0.40 C, 1.15 Cr, 1.5 Ni, 0.3 Mo, 0.6 Mn, bal Fe.
Heat treated. 224,000-251,000 TS; 215,000-224,000 YS; 10-12 El, 477-512 Brin.
For arbors, axles, beaters, bolts, connecting rods; shock resistant, oil hardened.

EDGAR ALLEN A.100.
M-210; 0.32 C, 0.65 Cr, 2.5 Ni, 0.55 Mo, bal Fe.
Heat treated: 160,000-275,000 TS; 138,000-230,000 YS; 11-18 El; 32-58 RA; 300-450 Brin.
For arbors, boring bars, collets, dies, gears, tough, oil hardened.

EDGAR ALLEN AM.1
M-210; 0.35 C, 1.35 W, 5 Cr, 1.5 Mo, 0.45 V, bal Fe
For Al and brass extrusion dies, heading tools; hot work steel, resists heat checking.

EDGAR ALLEN AM.3.
M-210, 0.40 C, 5 Cr, 1.35 Mo, 1.1 V, bal Fe.
For Al die casting dies, extrusion and forming tools, hot work steel, resists heat checking.

EDGAR ALLEN DOUBLE 12.
M-210, 0.3 C, 12 Cr, 12 W, bal Fe.
Ht. Tr.: C 38-42 Rock
For liquid hobbing of beryllium copper cavity molds for plastics, brass and copper extrusion dies Air or oil hardening
Hot work steel, Type H23.

EDGAR ALLEN FIVE PLY STEEL.
M-210, C, bal Fe
For engineering construction, manufactured in plates containing 3 layers of soft steel and 2 layers of hard steel.

EDGAR ALLEN GENUINE DOUBLE SHEAR STEEL.
M-210, C, bal Fe
For carving knives, water hardening

EDGAR ALLEN IMPERIAL.
M-210; 1.4 C, 0.75 Cr, 4.5 W, bal Fe.
For cutting tools, drills, reamers, textile needles.
Water hardening. Wear resistant.

EDGAR ALLEN K-9
M-210, 0.95 C, 0.75 Cr, 0.85 Mn, 0.5 W, bal Fe.
For dies, stay taps, broaches, milling cutters, plug gauges, oil hardened, tough.

EDGAR ALLEN N.I F.E 30.
M-210, 70 Fe, 30 Ni.
For compensating shunts for electrical equipment, thermo-sensitive, magnetic

EDGAR ALLEN SPECIAL CHROME.
M-210; C, Cr, bal Fe.
For thread rolling dies, retains hardness at high temperatures.

EDGAR ALLEN STAGPICK.
M-210; C, Cr, V, bal Fe.
For coal cutter picks; tough, hard and shock resisting

EDGAR ALLEN TOOL CLASS "C."
M-210, 0.6-1.35 C, bal Fe.
For spiral springs, chisels, punches, shear blades, drills, reamers, taps, dies; water hardening.

EDGAR ALLEN TOOL CLASS "V."
M-210; 0.6-1.35 C, bal Fe.
For spiral springs, chisels, punches, shear-blades, drills, reamers, taps; water hardening.

EDGAR ALLEN V.S. 4.
M-210; 1.05 C, 0.30 Mn, 0.25 V, bal Fe.
For cold heading dies; Type W2; water hardened.

EDGAR ALLEN YWA.
M-210; 0.28 C, 0.45 Si, 1.3 Cr, 3.4 Ni, 5.8 W, 0.25 V, bal Fe.
For extension dies, mandrels; oil hardened, shock resistant.

EDM alloy "A."
M-57; Cu, bal W.
For electric discharge machining electrodes.
Copper infiltrated tungsten.

EDM alloy "S."
M-57; 85.91 W, 9.15 Ag.
Sintered: 100,000 TS; B 100 Rock.
For EDM electrodes for electric discharge machining.
Silver infiltrated tungsten.

EDM alloy "SA."
M-57; 75 W, 25 Ag.
Sintered: 125,000 TR.S.; B 100 Rock.
For electric discharge machining electrodes
Silver infiltrated tungsten.

EDWARDS SPECULUM.
German; 70-63 Cu, 25-32 Sn, 2.4-1.6 As, 2.6-0 Zn.
For reflectors, mirrors; corrosion resistant

EE (see Darwin EE).

EEL BRAND ANTIFRICTION METAL.
M-526; 75 Pb, 6 Sn, 0.9 Cu, 1.5 Cd, 1 Ni, 0.1 P, 0.5 As, Sb.
For bearings, antifriction metal, Babbitt.

EGALITE.
M-161; Al alloy.
For light alloy parts; subject to special process while in molten state.

EHRHARDS B.M.
England; 84.4 Zn, 0.2 Sn, 10.9 Cu, 1.2 Pb, 2.5 Al
For bearings; will not resist heat or live steam.

EHRHARDS TYPE.
Eng.; 89 Zn, 3 Cu, 6 Sn, 2 Pb.
For type metal.

EHRHARDT'S METAL.
German; 89 Zn, 4 Cu, 4 Sn, 3 Pb
For bearings, bushings; Babbitt

E.H.W. NO. 1.
M-73; 0.25 C, 15 W, 4 Cr, bal Fe.
For hot work tools and dies, hot work steel.

E.H.W. NO. 3.
M-73; 0.3 C, 4 Cr, 9 W, 0.5 V, bal Fe.
For tools, punches, dies; hot work steel.

"E.H.W." STEEL.
M-73; 0.25-0.35 C, 8.9-9.5 W, 3-3.6 Cr, bal Fe.
For hot working dies, gripper and header dies for automatic bolt machines; oil hardening.

EI 435.
M-Russia; 0.10 C, 20 Cr, 0.2 Ti, bal Ni.
Heat treated: 103,000 TS; 60,000 YS; 50 El, 50 RA.
For gas turbine and jet engine components, combustion chambers.
Heat and oxidation resistant.

EI 437.
Russia; C, alloy, bal Fe.
For machine tool parts; oil hardened.

EI-437.
M-Russia; 0.03-0.05 C, 20-21 Cr, 2.5-2.8 Ti, 0.8-1.0 Al, bal Ni.
Heat treated: 147,000 TS; 41 El; 35 RA; C 35 Rock.
For turbine buckets and discs, rotor blades.
High creep strength.
High heat resistant. Similar to Nimonic 80A.

EI-437B.
M-Russia; 0.08 C, 20 Cr, 0.7 Al, 2.6 Ti, 0.005 B, bal Ni.
Heat treated: 132,000 TS; 80,000 YS; 45 El, 36 RA.
At 800°C: 62,000 TS; 53,000 YS; 8 El; 10 RA
For turbine buckets and discs. High creep strength
Boron modified Nimonic 80A.
High heat and corrosion resistant.

EI-802.
M-Russia, 0.11-0.18 C, 11-13 Cr, 0.5 Mo, 0.5-1.0 Ni, 0.15-0.30 V, 0.7-1.0 W, bal Fe
Annealed: 85,000 TS, 40,000 YS, 22 El; B 95 Rock.
For cutlery, valves, bearings, surgical instruments.
Corrosion resistant, hardenable.

EI-993
M-Russia; 0.20 C, 12 Cr, 0.4 Cb, 0.04 Mo, 0.1 Ni, 0.3 V, 0.6 W, bal Fe.
Annealed: 95,000 TS, 42,000 YS; 24 El; B 95 Rock
Hardened. 240,000 TS, 195,000 YS; 10 El, C 48 Rock.
For bearings, cutlery, hardware, surgical instruments, valves
Corrosion resistant, hardenable

EIGHTEEN PER CENT.
Eng; 65 Cu, 17 Zn, 18 Ni
For base for silver plated flatware, nickel silver

EINHEITSMETALL.
German, 79 Pb, 14 Sb, 5.3 Sn, 1.5 Cu.
For bearings, bushings, Babbitt.

E.I S 49
M-64, 0.85 C, 5 Cr, 0.25 Mn, bal Fe
Hardened. 560 Brin
For trimmers, dies, shears, for heavy shearing

EIS 77.
M-64, 0.35 C, 4 Cr, 12 W, 0.25 V, bal Fe.
For hot work dies, shears, punches; oil or air hardened.

EIS 96.
M-64; 0.55 C, 0.8 Mn, 1 Cr, 0.45 Mo, 0.08 V, bal Fe
For plastic molding dies, oil hardened.

EIS 718.
M-64; 0.35 C, 4.95 Cr, 1.25 W, 1.5 Mo, 1.0 Si, bal Fe
For hot work dies, shears, punches; oil or air hardened.

E.I.S. B-76.
M-64; 1.0 C, 0.6 Cr, 1.2 Mn, 0.20 V, 0.5 W, bal Fe.
For dies, cold blanking and forming dies; non-deforming, oil hardened.

E.I.S. C-57.
M-64; 0.6 C, 1 Cr, 2 Ni, 0.12 V, 0.8 Mo, bal Fe.
For shear blades, knives, punches, upsetters; hot work steel, oil hardened.

EISENBRONZE-1.
German; 57.5 Cu, 39.5 Zn, 1 Sn, 0.3 Pb, 1.3 Fe, 0.3 Al.
For marine parts, hardware; iron bronze.

EISENBRONZE-2.
German; 82.5 Cu, 4.45 Zn, 8.55 Sn, 3.95 Fe.
For marine parts, hardware; iron bronze.

EISENNICKEL 36.
M-303; 36 Ni, bal Fe.
For bimetal thermostats; controlled expansion.

EISENNICKEL 42.
M-303; 42 Ni, bal Fe.
For bimetal thermostats; controlled expansion.

EISENNICKEL 48.
M-303; 48 Ni, bal Fe
For glass to metal seals, controlled expansion.

EISENNICKEL 50.
M-303; 50 Ni, bal Fe
For glass to metal seals; controlled expansion.

EISENNICKEL 60.
M-303; 60 Ni, bal Fe.
For glass to metal seals, controlled expansion.

EISFNNICKEL 75.
M-297, 78 5 Ni, bal Fe
For magnetic and electrical equipment, motors; soft magnet, high permeability

EIS-H5.
M-64, 0.55 C, 1 Cr, 0 45 Mo, 0.08 V, 0 8 Mn, bal Fe
For plastic mold dies, oil hardened

E I S H-41
M 64, 1.0 C, 4 Cr, 0 15 V, 0.25 Mo, bal Fe
For hot work dies, trimmers, oil or air hardening

EIS-H720
M-64, 0 40 C, 5 25 Cr, 1 15 Mo, 1 V, bal Fe
For die casting dies and inserts, Type H11, air hardened

EIS-H-721.
M-64; 0 35 C, 0 35 Mn, 5 Cr, 1 55 Mo, 1 25 W, 1 Si, 0 2 V, bal Fe
Air hardened. 550 Brin.
For dies, inserts, punches, liners, rams; hot work, press, upsetter, extrusions

EISLERS BRONZE
U.S , 6 Zn, bal Cu
For electrical contacts, springs, good conductivity.

E I S R-43
M-64; 1.5 C, 12 Cr, bal Fe
For shear blades, trimmers, air hardened, light shearings

E I S R-97.
M-64, 0 5 C, 0 4 Cr, 1.0 Mn, 0 4 Mo, 2.1 Si, bal Fe
For dies, inserts, shear knives, oil hardened, heavy shearing

EIS-R-718.
M-64; 0.35 C, 5 Cr, 2 Mo, 1 Si, bal Fe.
Air hardened: 550 Brin.
For dies, inserts, punches; hot work, press, upsetter, extrusions.

EIS-R-720.
M-64, 0 4 C, 0.4 Mn, 5.25 Cr, 1.15 Mo, 1 V, bal Fe.
Air hardened 560 Brin.
For dies and inserts, die casting

E.I.S. T-51.
M-64, 0.6 C, 0 7 Mn, 1.4 Ni, 0.7 Cr, 2.2 W, 0.2 V, bal Fe.
For trimming and forming dies; oil hardened, hot or cold work steel.

EIS-T-71.
M-64; 0.5 C, 0 3 Mn, 1.2 Cr, 2.4 Ni, 1 Si, bal Fe
Oil hardened: 560 Brin.
For shear knives, punches; cold heavy duty, cold and semi-hot.

E.I.S. T-73.
M-64; 0.30 C, 3.5 Cr, 0 35 V, 10 W, bal Fe.
For inserts, dies, punches; hot work brass forgings.

EIS-T77.
M-64; 0.33 C, 4 Co, 12 W, 0 25 V, 0.3 Mn, bal Fe.
For hot shearing dies, extrusion liners; oil hardened, hot work steel.

E.I.S T-79.
M-64; 0.4 C, 5 Cr, 0.2 V, 4.0 W, 0 6 Mo, bal Fe.
For hot work dies, inserts; heavy shearing.

E I.S. T-717.
M-64; 0.35 C, 5 Cr, 1.35 Mo, 1 2 W, 1 Si, bal Fe.
For shears, knives, oil hardened.

EIS-T721.
M-64, 0.3 C, 5 Cr, 1.5 Mo, 1 25 W, 0 2 V, bal Fe.
For die casting dies, oil hardened, hot work steel.

EIS-V2.
M-64, 0 8 C, 0 4 Mn, V, Si, bal Fe
Water hardened 600 Brin
For shear knives, cold heavy duty.

EIS-V3.
M-64; 0 95 C, 0 4 Mn, Si, V, bal Fe.
Water hardened 620 Brin.
For shear knives, trimmers, cold light shearing

EK5.
Russia; 0 9-1 0 C, 5 5-6 5 Cr, 5 5-6.5 Co, bal Fe
For permanent magnet, heat treated

EK15
Russia, 0 9-1.0 C, 7 5-8 5 Cr, 14-16 Co, 1.5 Mo, bal Fe
For permanent magnet, heat treated

EK30A
Various foundries, 3 0 RE (Ce, etc), 0 3 Zr, bal Mg
T6-Temper 20,000-23,000 TS, 14,000-16,000 YS; 2-3 El
At 600°F 12,000 TS, 8,000 YS, 70 El.
Magnesium sand casting, good pressure tightness, weldability and corrosion resistance
For parts operating at 350-500°F ASTM B80 57T.

EK41A
Various foundries, 4 0 RE (Ce, etc), 0 6 Zr, bal Mg
T6-Temper 22,000-25,000 TS, 16,000 18,000 YS; 1-3 El
At 600°F· 13,000 TS, 9,000 YS, 53 El
Magnesium sand casting with good pressure tightness, weldability and corrosion resistance.
For parts operating at 350-600°F
ASTM B80-57T, B199 57T, AMS 4440, 4441.

EK-81.
M-114, 1 35 C, 12 75 Cr, 0 8 Mo, 3 Co, bal Fe
For blanking and forming dies, punches; air hardening

EKH3.
Russia, 0.9-1 1 C, 0 4 max Mn, 2 8-3 8 Cr, bal Fe.
For permanent magnet; heat treated

ELASTIC.
M-1318, 0 50 C, 1.0 Cr, 0.09 V, bal Fe
For gears, springs, bolts, studs, countershafts; oil hardened, shock resistant.

ELASTIC NO. 4.
M-349; 81 Au-Pt, bal Cu, Ag, Zn.
Soft· 117,500 TS; 86,500 YS, 15 El.
Heat treated 173,000 TS; 131,500 YS, 7 El.
For dental wire clasps, orthopedic appliances; M.P. 1925°F.

ELASTUF 44.
M-307, M-213; 0.5 C, 0.90 Cr, 0.90 Ni, 0.55 Mo, bal Fe.
Heat treated: 185,000-220,000 TS; 160,000-200,000 YS; 17-10 El; 50-30 RA; 42-46 Rc.
For gears, shafts, compression dies; preheat treated bars.

ELASTUF Pb.
M-307; 0.50 C, 0.92 Mn, 0.93 Cr, 0.20 Mo, 0.15-0.35 Pb, bal Fe.
Hard: 150,000 TS; 115,000 YS; 17 El; 52 RA; 302 Brin.
For gears, shafting; free-cutting, preheat treated.

ELASTUF PENN Machinery Steel.
M-307; M-213; 0.4-0.48 C, 1.25 Mn, bal Fe.
Hot rolled: 100,000-125,000 TS; 50,000-75,000 YS; 16-15 El; 32-30 RA; 197-217 Brin.
For spindles, lead screws, shafts, chuck and jack screws, bolts, arbors, gears; tough, excellent machinability.

ELASTUF STRAINFREE.
M-307; 0.44 C, 1.45 Mn, 0.03 P, 0.28 S, bal Fe.
Cold drawn, stress tempered, 100,000 min YS.
For gears, shafting; free cutting.

ELASTUF TYPE A2.
M-307; 0.50 C, 0.85 Mn, 1.03 Cr, 0.35 Mo, 0.07 V, bal Fe.
Pre-hardened: 125,000 min YS; Avg. hardness 321 BHN.
For gears, shafts, axles, boring bars, crankshafts.

ELCOMET K
M-263; 22 Ni, 23 Cr, 1.25-1.0 Si, 3.5-4.0 Cu, 2.0 Mo, 0.30 Mn, 0.12 max C, bal Fe.
For spinner heads, valves, pumps; resists abrasion and corrosion.

ELECKTRO.
M-1311; 0.85 C, 0.25 Si, 0.25 Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El, 30 RA; 400 Brin.
For springs, tools, drills, taps, reamers; Type W1; water hardened.

ELECKTROBRONZE.
M-330; 10 Al, Mn, Fe, bal Cu.
For valve gages, fittings; Al-bronze, corrosion resistant.

ELECTALLOY NO. 2.
M-1208; 2.7-3.2 G.C., 0.4-0.7 C.C., 2.0-2.9 Si, 0.8-1.2 Ni, 0.9-1.3 Mo, 0.4 Cr, bal Fe
Cast: 60,000 TS
For piston rings; cast iron, wear resistant.

ELECTALLOY NO. 3.
M-1208; 2.8-3.2 T.C., 0.7-1.15 C.C., 2.1-2.7 Si, 0.5-1.2 Mn, 0.6-1.2 Mo, 0.8-1.2 Cr, bal Fe.
Cast: 70,000 TS
For piston rings; cast iron, wear resistant.

ELECTALLOY NO. 4.
M-1208, 3.75-3.85 T.C., 2.8 max Si, 0.7 Mn, 1 Ni, 0.9 Mo, 0.3 Cr, bal Fe.
Cast: 50,000 TS.
For piston rings; cast iron, wear resistant.

ELECTRA JAP.
M-114; 1.2 C, 0.6 Mn, 0.55 Cr, bal Fe.
For taps, edge tools; water or oil hardening.

ELECTRA JAP M.
M-114; 1.2 C, 0.85 Mn, 0.5 Cr, 0.6 Mo, bal Fe.
For taps, edge tools; water or oil hardening.

ELECTREX.
M-35; 0.90 C, 0.35 Mn, bal Fe.
For brake dies, shafts, arbors; water hardening.

ELECTRICAL GOLD ALLOY.
Eng.; 70 Au, 25 Ag, 5 Ni.
For contacts.

ELECTRIC SPINDLE.
M-38; 0.70 C, 1.15 Mn, 0.5 Cr, bal Fe.
For machine tool spindles; water or oil hardening.

ELECTRITE NO. 1.
M-73; 0.70 C, 4 Cr, 18 W, 1.0 V, 0.30 Mn, bal Fe.
For twist drills, reamers, milling cutters, tools; high speed steel.

ELECTRITE 5.
M-73; 0.6 C, 18 W, 4 Cr, 1 V, bal Fe.
For bolt trimmers, header inserts, punches; high speed steel.

ELECTRITE NO. 5XL.
M-73; 0.6 C, 18 W, 4 Cr, S, 1 V, bal Fe.
For bolt trimmers, header inserts, punches, cutters; high speed steel.

ELECTRITE NO. 7.
M-73; 0.65 C, 6.5 W, 5 Mo, 4 Cr, 2 V
For extrusion dies, header inserts; high speed steel.

ELECTRITE NO 7XL.
M-73; 0.65 C, 6.5 W, S, 5 Mo, 4 Cr, 2 V, bal Fe.
For extrusion dies, header inserts, high speed steel

ELECTRITE NO. 19.
M-73; 0.84 C, 4 Cr, 0.25 Mn, 2 V, 18 W, bal Fe.
For tools, cutters, blanking and boring tools, broaches; abrasion resistant, high speed steel.

ELECTRITE NO. 19XL.
M-73; 0.84 C, 4 Cr, 2 V, S, 18 W, bal Fe.
For lathe and planer tools, hobs, drills, taps, high speed steel

ELECTRITE CO-6.
M-73, 0.9 C, 6 W, 4 Cr, 2 V, 5 Mo, 9 Co, bal Fe
For tools, cutters, high speed steel

ELECTRITE Co-6XL
M-73; 0.9 C, 6 W, 4 Cr, S, 2 V, 5 Mo, 9 Co, bal Fe
For lathe and planer tools, reamers, broaches, taps, high speed steel.

ELECTRITE CO-12.
M-73, 0.86 C, 4.0 W, 4.1 Cr, 1.8 V, 5.0 Mo, 12.0 Co, bal Fe.
Hardened: C 64-68 Rock
For high speed lathe tools; very good red hardness
AISI Type M6 High speed tool steel.

ELECTRITE COBALT.
M-73; 0.7 C, 5 Co, 18 W, 4 Cr, 1 V, bal Fe
For tools for heavy hogging cuts, high speed steel

ELECTRITE COBALT XL.
M-73; 0.7 C, 5 Co, 18 W, S, 4 Cr, 1 V, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel

ELECTRITE CORSAIR XL.
M-73, 1.02 C, 6.1 W, 4 Cr, 2.4 V, 6 Mo, S, bal Fe.
For broaches, form tools; high speed steel.

ELECTRITE CROMOLON
M-73; 0.9 C, 1.5 W, 9 Mo, 8 Cr, 1.5 V, 4 Co, bal Fe.
For taps, cutters; high speed steel.

ELECTRITE CRUSADER-XL.
M-73; 1.2 C, 4.1 Cr, 6.0 W, 3.0 V, 5.0 Mo, alloy sulphides, bal Fe
Hardened: C 65-68 Rock.
For form cutters, roll turning tools, lathe and planer tools.
Good machinability rating.
Type M3 Type 2 high-speed steel, high-red hardness and edge toughness.

ELECTRITE DOUBLE SIX.
M-73; 0.85 C, 5.5 W, 4 Cr, 1.5 V, 4.5 Mo, bal Fe.
For countersink and counterbore tools; high speed steel.

ELECTRITE DOUBLE SIX M-2.
M-73; 0.83 C, 6.5 W, 5 Mo, 4 Cr, 2 V, bal Fe.
For cutting tools, drills, taps, broaches, reamers; high speed steel.

ELECTRITE DOUBLE SIX M-2XL.
M-73; 0.8 C, 4 Cr, 6 W, 6 Mo, 2 V, bal Fe.
For lathe and planer tools, reamers, hobs, taps; high speed steel.

ELECTRITE DYNACUT
M-73; 1.2 C, 2.7 W, 3.75 Cr, 1.6 V, 8.0 Mo, 8.2 Co, bal Fe.
Hardened: C 65-66 Rock.
For cutters in heavy duty machining, broaches, chasers, drills
Type M-43 high-speed steel, wear resistant High red-hardness.

ELECTRITE DYNAMAX.
M-73; 1.08 C, 1.5 W, 3.75 Cr, 1.15 V, 9.5 Mo, 8.0 Co, bal Fe
Hardened: C 65-70 Rock
For cutting tools requiring long production runs or heavy duty machining, very high wear resistance; good red hardness.
AISI Type M-42 High speed tool steel.

ELECTRITE DYNAVAN.
M-73; 1.5 C, 4.5 Cr, 13.5 W, 4.75 V, 5 Co, 0.5 Mo, bal Fe
For inserted blade cutting tools; high speed steel.

ELECTRITE DYNAVAN XL
M-73, 1.5 C, 4.5 Cr, 13.5 W, 4.75 V, 5 Co, S, 0.5 Mo, bal Fe
For inserted blade cutting tools; high speed steel

ELECTRITE KELVAN.
M-73, 0.88 C, 1.7 W, 3.75 Cr, 1.15 V, 9.6 Mo, 8.4 Co, bal Fe
Hardened: C 63-67 Rock.
For lathe tools and other machine tools, very good red hardness and wear resistance
AISI Type M-33 High speed tool steel

ELECTRITE LACOMO
M-73; 0.8 C, 4 Cr, 5 Co, 1.25 V, 1.5 W, 8.5 Mo, bal Fe.
For hobs, saw teeth, lathe tools, reamers, high speed steel.

ELECTRITE MCH.
M-73; 0.50 C, 6.2 Mo, 1 W, 3.7 Cr, 0.75 V, bal Fe.
For forging dies, punches, shear blades, hot work steel, resists heat checking

ELECTRITE MCL
M-73; 0.30 C, 6.2 Mo, 1 W, 3.7 Cr, 0.75 V, bal Fe.
For forging dies, dummy blocks, extrusion dies; hot work steel, oil hardened.

ELECTRITE MV-1.
M-73; 0.8 C, 4.1 Cr, 4.25 Mo, 1.1 V, bal Fe.
For cutting tools, small taps, thread rolls; low alloy high speed steel.

ELECTRITE MV-2.
M-73; 0.88 C, 4.1 Cr, 4.25 Mo, 2.0 V, bal Fe.
For cutting tools, pipe taps, thread chasers; low alloy high speed steel.

ELECTRITE MV-3.
M-73; 1.18 C, 4.1 Cr, 4.25 Mo, 3.15 V, bal Fe.
For cutting tools; special high speed steel; abrasion resistant.

ELECTRITE MV-4.
M-73; 1.4 C, 4.1 Cr, 4.25 Mo, 4.15 V, bal Fe.
For cutting tools; special high speed steel, abrasion resistant.

ELECTRITE STARK.
M-73; 1.33 C, 5.5 W, 4.5 Cr, 4.0 V, 4.5 Mo, bal Fe.
Hardened: C 64-66 Rock.
For drills, reamers, lathe and planer tools, chisels, plastic core pins, chasers.
Type M-4 Tool steel. Abrasion resistant and tough.
High speed steel.

ELECTRITE SUPER COBALT.
M-73; 0.8 C, 2 V, 9 Co, 18 W, 4 Cr, bal Fe.
For tools, high speed cutting tools; high speed steel.

ELECTRITE SUPER COBALT XL.
M-73; 0.8 C, 2 V, 9 Co, S, 18 W, 4 Cr, bal Fe.
For lathe and planer tools, reamers, broaches, taps; Type T5; high speed steel.

ELECTRITE TATMO.
M-73, 0.8 C, 3.25-4.25 Cr, 1.25-2 W, 0.75-1.5 V, 7.5-9.5 Mo, (Co), bal Fe.
For reamers, lathe tools, drills, broaches, dies, hot work dies, cutting tools; high speed steel; wear resistant

ELECTRITE TATMO V.
M-73, 1.0 C, 1.75 W, 3.75 Cr, 2.05 V, 8.75 Mo, bal Fe.
Hardened: C 65-68 Rock
For cutters, drills, reamers, lathe and planer tools, form tools, broaches
Type M-7 high speed steel. Good red-hardness and edge toughness.

ELECTRITE TATMO XL
M-73; 0.8 C, 3.25-4.25 Cr, 1.2-2.0 W, 0.7-1.5 V, 7.5-9.5 Mo, Co, S, bal Fe
For reamers, drills, lathe and planer tools, hobs; Type M1; high speed steel.

ELECTRITE T.N W
M-73, 0.85 C, 4 Cr, 28 V, 8 Mo, bal Fe
For form cutters, taps, drills; high speed steel.

ELECTRITE TNW-XL.
M-73, 0.85 C, 4 Cr, 2 V, S, 8 Mo, bal Fe.
For form cutters, reamers, taps, drills; high speed steel.

ELECTRITE U
M-73, 0.70 C, 0.30 Mn, 4.0 Cr, 14 W, 0.2 V, bal Fe.
For tools, dies, gages, reamers; high speed steel.

ELECTRITE UB
M-73, 0.75 C, 4 Cr, 5 Co, 2 V, 14 W, bal Fe.
For reamers, blades, cutting tools, high speed steel

ELECTRITE ULTRA COBALT
M-73; 0.8 C, 2.0 V, 12 Co, 18 W, 4 Cr, bal Fe.
For tools, high speed cutting tools; high speed steel.

ELECTRITE ULTRAVAN.
M-73; 1.5 C, 6.3 W, 4.25 Cr, 4.75 V, 5 Mo, 5 Co, bal Fe
For inserted blade cutting tools, high speed steel.

ELECTRITE ULTRAVAN XL.
M-73; 1.5 C, 6.3 W, 4.2 Cr, 4.7 V, 5 Mo, 5 Co, S, bal Fe
For inserted blade cutting tools; high speed steel.

ELECTRITE VANADIUM
M-73, 1.1 C, 18 W, 4 Cr, 3.5 V, bal Fe.
C 67 Brin.
For high speed tools for cutting hard materials; high speed steel.

ELECTRITE VANADIUM XL.
M-73; 1.1 C, 18 W, 4 Cr, S, 3.5 V, bal Fe.
For cutters for hard materials; Type T3; high speed steel.

ELECTRO.
M-388; 0.7 C, 6 W, 6 Mo, bal Fe.
For high speed cutting tools; high speed steel.

ELECTRO-ALLOY H3.
England; Ni, Cr.
For high temperature applications; heat and corrosion resistant.

ELECTRO HIGH SPEED.
Eng.; 0.76 Cu, 0.45 Mn, 2.95 Cr, 13.24 W, 1.51 V, bal Fe.
For tools, cutters, drills; high speed steel.

ELECTROLOY.
M-778; Cu alloy.
For welding equipment.

ELECTROLOY.
M-1523, 15 Cr, 60 Ni, bal Fe.
Wire. 95,000-175,000 TS
For resistors; high electrical resistance.

ELECTROLOY 1.
M-777, M-778; Cu-W.
Bars: 135,000 TS, 130 Brin.
For resistance welding electrode, 35% electrical conductivity, for stainless steel.

ELECTROLOY 10.
M-777, M-778, Cu-W.
Bars. 160,000 TS; 205 Brin.
For resistance welding electrode; 28% electrical conductivity, for inserts and facings.

ELECTROLOY 20.
M-777, M-778, Cu-W.
Bars: 170,000 TS; 228 Brin.
For resistance welding electrode; for heavy projection welding.

ELECTROLOY 100.
M-777, M-778; Cu-W.
Bars: 200,000 TS; Rockwell A76.
For resistance welding electrode; 30% electrical conductivity, for Red Brass.

ELECTROLOY GRADE B.
M-778; Cu alloy.
175,000 TS; 5 El; 365 Brin.
For facing and inserts on projection welding electrodes, electrical conductivity 40-45%.

ELECTROLOY GRADE BX.
M-778; Cu alloy.
95,000 TS; 4-8 El, 210-228 Brin.
For flash and butt welding dies; electrical conductivity 50%.

ELECTROLOY GRADE C.
M-778; Cu alloy.
60,000 TS; 20 El, 150 Brin.
For spot welding tips; electrical conductivity 55-65%.

ELECTROLOY GRADE XX.
M-778; Cu alloy.
70,000 TS; 20 El; 150 Brin.
For spot welding tips; electrical conductivity 90%.

ELECTROLOY MOLIN 2.
M-777, M-778; Cu alloy.
Cast: 65,000-75,000 TS; 12,000-16,000 YS; 10-2 El; 116-165 Brin.
For resistance welding electrode; 10-15% electrical conductivity.

ELECTROLOY TX.
M-777, M-778; Cu alloy.
Bars: 100,000 TS; 50,000 YS; 10 El; 185 Brin.
Cast: 85,000 TS; 45,000 YS; 10 El; 180 Brin.
For resistance welding electrode; for stainless steel.

ELECTROLYTIC IRON.
M-205; 0.006 C, 0.004 S, 0.005 Si, 0.015 Cu, 99.965 Fe.
Forged. 55,000 TS; 48,500 YS; 33 El; 83 RA.
For thin seamless tubing, magnetic cores, electrical instruments; brittle as deposited.

ELECTROLYTIC TOUGH PITCH COPPER.
M-33; 99.9 Cu, 0.04 oxygen.
Annealed: 30,000 TS; 10,000 YS; 45 El; 48 Brin.
Cold drawn· 50,000 TS, 45,000 YS; 6 El; 106 Brin
For electric conductors, anodes, bus bars, radiators, high conductivity

ELECTROLYTIC TOUGH PITCH COPPER 100.
M-8, 99.9 + Cu.
Hard 55,000 TS, 45,000 YS; 5 El
For electric conductors, pipes, tubes; high conductivity.

ELECTROLYTIC TOUGH PITCH COPPER 110.
M-8, 99.9 + Cu
Hard: 48,000 TS; 40,000 YS, 15 El, B 45 Rock
Soft: 32,000 TS, 10,000 YS, 50 El, F 45 Rock
For roofering, flashing, gutters, architectural shapes, fasteners, plating anodes
Elect cond 101.

ELECTROMATIC
United States, 0.75 C, bal Fe
For springs, oil tempered wire.

ELECTROMET CALCIUM-ALUMINUM-SILICON
M-48; 10-14 Ca, 8-12 Al, 50-53 Si
For deoxidizing and degasifying steel.

ELECTROMET CALCIUM-MANGANESE-SILICON
M-48, 16-20 Ca, 14-18 Mn, 53-59 Si, bal Fe
Used as a scavenger for steel, cleanser of oxides and gases.

ELECTROMET CALCIUM-SILICON.
M-48; 30-33 Ca, 60,65 Si, 1.5-3 Fe
For metallurgical applications, deoxidizer and degasifier, graded according to Ca content.

ELECTROMET CHROMIUM CARBIDE
M-48; 86.1-86.6 Cr, 12.8-13.3 total C.
Sintered: Rockwell A88.
For extrusion dies, gage blocks; pressed or slip-cast and sintered

ELECTROMET CHROMIUM-COPPER
M-48; 8-11 Cr, 88-90 Cu, 1 max Fe, 0.5 max Si.
For metallurgical applications.

ELECTROMET CHROMIUM (HIGH CARBON).
M-48; 9-11 C, 87-90 Cr, bal Fe
For production of nonferrous Cr alloys, deoxidized; graded according to carbon content.

ELECTROMET CHROMIUM METAL (LOW C)
M-48; 97 min Cr, 1 max Fe, 0.2 or 0.5 max C.
For Cr bearing alloy production; Cr-additions.

ELECTROMET COLUMBIUM METAL.
M-48, 0.27 C, 0.01 N, 0.04 oxygen, 0.1 Ta, 0.5 ppm B, bal Cb.
Cold drawn: 82,500 TS; 72,000 YS; 17 El; 68 RA.
Annealed: 50,000 TS; 36,000 YS; 49 El; 82 RA.
For atomic reactors, chemical processing equipment, high temperature alloys; high heat and corrosion resistance.

ELECTROMET DISTILLED CALCIUM.
M-48; 99.48 Ca, 0.045 Fe, 0.025 Mn, 0.03 Ni, 0.03 C, 0.004 Cr.
Rolled: 16,700 TS; 12,300 YS; 7 El; 35 RA.
Annealed: 6960 TS; 1990 YS; 51 El; 58 RA.
For alloying agent for Al, Pb, Si, copper deoxidizer; getter for electronic tubes

ELECTROMET FERRO-BORON.
M-48; 17-25 B, 0.5 max Al, 1 max Si, 0.5 max C, bal Fe.
For deoxidizer and degasifier additions to steel; boron, boron additions

ELECTROMET FERRO-CHROME (FOUNDRY).
M-48, 5-7 C, 62-66 Cr, 7-10 Si, bal Fe
For metallurgical applications, ladle additions of Cr to cast iron; dissolves readily.

ELECTROMET FERRO-CHROME (HIGH CARBON).
M-48, 4.5-7 C, 1-3 Si, 65-70 Cr, bal Fe.
For production of Cr steels and cast irons; graded according to carbon content

ELECTROMET FERRO-CHROME (LOW CARBON).
M-48, 67-73 Cr, 0.02-2.0 C, 0.2-1.0 Si, bal Fe.
For stainless steels, graded according to carbon content.

ELECTROMET FERRO-CHROME (NITROGEN)
M-48, approximately 0.75 N, 0.10 max C, 67-71 Cr, 0.3-1 Si, bal Fe
For metallurgical applications for high Cr steels; graded according to N_2 content

ELECTROMET FERROCHROME SILICON
M-48, 33-57 Cr, 23-48 Si, 0.05 max C, bal Fe.
For production of stainless steel, to reduce metal value in slag

ELECTROMET FERRO-COLUMBIUM
M-48, 50-60 Cb, 8.0 max Si, 0.4 max C, bal Fe.
For additions to stainless steel and high temperature alloys of Cb, increases strength at elevated temperatures.

ELECTROMET FERRO-MANGANESE (LOW CARBON)
M-48, 0.07-0.50 C, 85-90 Mn, bal Fe.
For high Mn additions to low C steels, metallurgical applications; graded according to carbon content.

ELECTROMET FERRO-MANGANESE (LOW IRON)
M-48, 85-90 Mn, 2 max Fe, 3 max Si, approx 7.0 C, bal Fe
For metallurgical applications in non-ferrous alloys, where high Mn, low Fe are needed.

ELECTROMET FERRO-MANGANESE (MEDIUM CARBON)
M-48, 1.5 C, 1.5 max Si, 80-85 Mn, bal Fe.
For high Mn additions to medium C steels, metallurgical applications; for low C-Mn steels.

ELECTROMET FERROMANGANESE SILICON.
M-48; 63-66 Mn, 28-32 Si, 0.10 max C, 0.05 max P, bal Fe.
For slag reducing agent and Mn additions to steel.

ELECTROMET FERRO-MANGANESE (STANDARD).
M-48; 74-76 Mn, 1 max Si, 0.3 max P, approx 7 C, bal Fe.
For metallurgical applications, alloy deoxidizer.

ELECTROMET FERRO-SILICON (15%).
M-48; 14-20 Si, 1.0 max C, 74-84 Fe, 0.05 max P, 0.04 max S.
For addition of Si to steel, metallurgical applications; graded according to Si content.

ELECTROMET FERRO-SILICON (50%).
M-48; 47-51 Si, bal Fe.
For metallurgical applications, graphitizer and deoxidizer; graded according to Si content.

ELECTROMET FERROSILICON (50% LOW Al).
M-48; 47-51 Si, 0.4 max Al, bal Fe.
For additions of Si to steel and cast iron; deoxidizer.

ELECTROMET FERROSILICON (65% LOW Al).
M-48, 64.5-69.5 Si, 0.5 max Al, bal Fe.
For production of electrical sheet steel, deoxidizer; Si-additions.

ELECTROMET FERRO-SILICON (75%).
M-48, 73-78 Si, bal Fe.
For metallurgical applications, silicon additions; graded according to Si content

ELECTROMET FERROSILICON (75% LOW Al).
M-48, 73-78 Si, 0.5 max Al, bal Fe
For deoxidizer and alloy for steel, silicon additions; inoculant for cast iron

ELECTROMET FERRO-SILICON (85%)
M-48; 83-88 Si, bal Fe
For high silicon alloys, metallurgical applications; inoculant for cast iron

ELECTROMET FERROSILICON (85% LOW Al).
M-48, 83-88 Si, 0.5 max Al, bal Fe
For deoxidizer and alloy for steel, inoculant for cast iron.

ELECTROMET FERRO-SILICON (90%)
M-48, 92-95 Si, bal Fe.
For high silicon alloys, metallurgical applications; graded according to Si content.

ELECTROMET FERROSILICON (90% LOW Al).
M-48; 92-95 Si, 0.5 max Al, bal Fe.
For deoxidizer and alloy for steel; inoculant for cast iron

ELECTROMET FERROSILICON-CHROME.
M-48, 50-54 Cr, 28-32 Si, 1.25 max C, bal Fe
For ladle additions of Cr and Si to steel, alloying.

ELECTROMET FERRO-TUNGSTEN.
M-48; 70 80 W, 0.6 max C, bal Fe.
For steel alloys, alloying W to steel, graded according to C content.

ELECTROMET FERRO-VANADIUM.
M-48; 55-50 V, 10 max Si, 3 max C, bal Fe
For metallurgical applications, steel alloys, V additions; graded according to C and Si content.

ELECTROMET LOW PHOSPHORUS FERROMANGANESE.
M-48; 90 min Mn, 0.06 max P, 0.07 max C, bal Fe.
For Mn additions to austenitic stainless steels, alloying.

ELECTROMET MANGANESE.
M-48; 2.5 max Fe, 1.5 max Si, 0.2 max C, 96 min Mn.
For metallurgical applications, alloying, deoxidizer; graded according to C and Fe content.

ELECTROMET MANGANESE-BORON.
M-48, 75 Mn, 17.5 min B, 5 max Fe, 1.5 max Si, 3 max C.
For deoxidizer, degasifier and cleanser; for nonferrous alloys.

ELECTROMET MANGANESE-COPPER.
M-48; 28-32 Mn, 65-70 Cu, 4 max Fe, 0.75 max Si.
For non-ferrous metallurgical applications; graded according to Fe content.

ELECTROMET MANGANESE-NICKEL TITANIUM.
M-48; 0.10 max C, 6-8 Mn, 29-31 Ni, 46.5-48.5 Ti, 12.5-14.5 Al, 1 max Fe, 0.2 max Si.
For Ti additions to high temperature alloys.

ELECTROMET NICKEL BORON.
M-48; 15-18 B, 3 max Fe, 0.5 max C, bal Ni.
For addition agent for Ni and Al alloys; for alloying in hard abrasion resistant alloys.

ELECTROMET NICKEL-ZIRCONIUM.
M-48; 43-50 Ni, 25-30 Zr, 2 max Fe, 10 max Si, approx 15 Al.
For deoxidizer and degasifier for Ni and Fe alloys.

ELECTROMET SILICO-MANGANESE.
M-48; 3.0 max C, 65-68 Mn, 12-21 Si, bal Fe.
For metallurgical applications, alloying, and deoxidizing; graded according to carbon content.

ELECTROMET SILICON (REFINED).
M-48; 96 min Si, 2 max Fe.
For metallurgical applications for Cu and Al silicon alloys; graded according to Fe content

ELECTROMET SILICON-SPIEGEL.
M-48; 25-30 Mn, 5-8 Si, 2-4 C, bal Fe.
For metallurgical applications; furnished in standard and special grades.

ELECTROMET SILICON TITANIUM.
M-48; 40-50 Ti, 45-50 Si, 3 max Fe.
For tool and die steels, also nonferrous alloys; titanium additions.

ELECTROMET SPIEGELEISEN.
M-48; 19-28 Mn, 1.0 max Si, bal Fe, C.
For metallurgical applications; graded according to Mn content.

ELECTROMET TANTALUM METAL.
M-48; 0.015 C, 0.001 H, 0.01 Fe, bal Ta.
Cold drawn: 114,200 TS; 104,500 YS, 19 El; 76 RA; 205 Brin.
Recrystallized: 54,900 TS; 37,700 YS; 54 El; 92 RA; 103 Brin.
For heat exchangers, bayonet heaters, pickling tanks; high corrosion resistance.

ELECTROMET TITANIUM CARBIDE.
M-48; 95 min TiC, 19.2 min combined C, 0.2 max Fe, 0.3 max free C.
For additions to tungsten carbide; pressed or slip-cast and sintered.

ELECTROMET VANADIUM METAL.
M-48; 0.10 C, 0.10 H, 0.10 N, 0.10 O, bal V.
Annealed: 60,000-70,000 TS; 49,100 YS; 30-20 El; 80-70 RA; 140 Brin.
For atomic reactor structures.

ELECTROMET ZIRCONIUM (12-15%).
M-48; 12-15 Zr, 39-43 Si, 0.30 max C, bal Fe.
For ferrous metallurgical applications, steel deoxidizer; nitride and sulfide former.

ELECTROMET ZIRCONIUM (35-40%).
M-48; 35-40 Zr, 47-52 Si, 0.5 max C, bal Fe.
For ferrous metallurgical applications, deoxidizer; nitride and sulfide former.

ELECTRON AZ-31.
M-78; 3.3 Al, 0.3-0.5 Mn, 1.25 Zn, bal Mg.
Cast: 36,000-40,000 TS; 25,000-29,000 YS; 12-8 El; 50 Brin.
For light alloy parts, structures; C.S.-49000-52000.

ELECTRON AZ61.
Eng.; 5.5-7.0 Al, 0.1-1.0 Zn, 0.1-0.5 Mn, bal Mg.
Used to hold broken bones together.

ELECTRON AZ-855.
M-106, M-78; 8.5-9.0 Al, 0.2-0.6 Zn, 0.1-0.3 Mn, 0.5 max impurities, bal Mg
Forged: 40,500-49,000 TS; 22,500-31,000 YS; 15-8 El; 15-10 RA; 65-75 Brin.
For forgings, aircraft components; Iz-4-6.

ELECTRON "A.Z.G."
M-78, M-217; 6 Al, 3 Zn, 0.35 Mn, 0.3 Si, bal Mg.
Cast: 23,000-29,000 TS, 14,500-19,000 YS; 6-3 El, 7 RA; 55 Brin.
For automobile and airplane engine crankshafts; high fatigue strength.

ELECTRON "A.Z.M."
M-78, M-217, M-338; 6 Al, 1 Zn, 0.2-0.5 Mn, 0.2 Si, bal Mg
Rolled: 49,000 TS; 31,000 YS; 14 El, 27 RA; 70 Brin.
Forgings 45,000 TS; 29,000 YS, 8 El; 70 Brin.
For extruded and forged light alloy parts, airplane propellers, bus body frames; general structural work.

ELECTRON AZMQ.
M-78, 6.5 Al, 1 Zn, 0.3-0.5 Mn, bal Mg
Cast. 41,000-47,000 TS; 31,000-33,000 YS; 16-10 El, 55 Brin
Extruded: 46,000 TS, 32,000 YS; 13 El; 27 RA; 55 Brin.
For light alloy parts, now obsolete, C.S.-50000-56000.

ELECTRON ZS-32
M-106, M-78; 5 Al, 1 Zn, bal Mg
Forged: 7 El, 15-5 RA; 53 Brin
For forgings, pistons; hardenable.

ELECTROPLATE.
Eng.; 50-70 Cu, 10-20 Ni, 5-30 Zn.
Base for silver plate, tableware.

ELECTRO SHEET COPPER FOIL, Commercial Quality.
M-8, 99.5 + Cu.
Foils in rolls, ½ oz-7 oz/sq ft.
40,000 TS (nominal) 4.5-13 El; 94.3-99.5 elec. conductivity.
For electrical coil windings, transformer windings, flexible cable, electrostatic shielding, die stamped circuits

ELECTROTYPE (STANDARD).
Eng.; 93 Pb, 4 Sb, 3 Sn.
For electrotype.

ELECTRUM.
Eng., 52 Cu, 26 Ni, 23 Zn.
For corrosion resisting parts; nickel silver.

ELECTRUM.
Eng., 55-58 Au, 15-45 Ag.
For jewelry, ornaments; corrosion resistant .

ELECTRUNITE BOILER TUBING.
M-97, M-395; 0.2-0.3 C, bal Fe.
For boiler and heat exchanger tubes; welded tubes (electric).

ELECTRUNITE ENDURO.
M-395; 0.15 C, 18 Cr, 8 Ni, bal Fe.
For welded tubing; corrosion and heat resistant.

ELECTRUNITE STEEL TUBING.
M-395; 0.2 C, 0.8 Ni, 0.4 Cr, bal Fe.
For mechanical tubing; electric welded.

ELEFANT EXTRA ZH.
M-614; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, taps, reamers, hobs, broaches; Type W1; water hardened.

ELEFANT HART.
M-614; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For engravers tools, taps, milling cutters, hobs; Type W1; water hardened.

ELEFANT MH.
M-614; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 60,000 YS; 18 El, 40 RA; 210 Brin.
For drills, taps, reamers, hobs, broaches, Type W1, water hardened.

ELEFANT NR. 3.
M-614; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS, 21 El; 42 RA; 200 Brin.
For drills, taps, reamers, hobs, cutters, punches; Type W1, water hardened.

ELEFANT NR. 4.
M-614, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 190,000 TS, 145,000 YS, 12 El; 35 RA; 400 Brin.
For drills, taps, springs, hobs; Type W1; water hardened.

ELEFANT NR 5
M-614, 0.70 C 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated 175,000 TS, 130,000 YS; 12 El, 36 RA; 360 Brin
For springs, tools, hammers, rails, axes; Type W1, water hardened

ELEFANT ZAH
M-614; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS, 130,000 YS; 12 El; 36 RA, 360 Brin
For springs, tools, rails, axes, hammers; Type W1; water hardened.

ELEFANT ZH
M-614, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 190,000 TS; 145,000 YS, 12 El 35 RA, 400 Brin.
For springs, cutters, drills, taps, reamers; Type W1, water hardened.

ELEKTROBRONZE
M-330; 81 Cu, 10 Al, bal Mn, Fe.
20 El, 160-170 Brin.
For valve gauge fittings; corrosion resistant.

ELEKTRON A5.
M-137; 5 Al, bal Mg.
For light alloy parts.

ELEKTRON A6.
M-338; 6 Al, 1 Zn, 0.2 Mn, bal Mg.
Rolled: 40,000 TS; 23,000 YS; 8 El.
For high strength parts; age-hardenable.

ELEKTRON A8
M-106, M-78; 8 max Al, 0.4 max Zn, 0.4 Mn, bal Mg.
Sand cast: 29,400 TS; 115,000 YS; 4 El; 7 RA; 55 Brin.
Aged: 36,000 TS; 21,000 YS; 13 El; 9 RA; 60 Brin.
For engine components, housings, gear cases; sand and permanent mold castings, age-hardenable.

ELEKTRON A8.
M-137; 7.9-9.0 Al, 0.3-1.0 Zn, 0.15-0.40 Mn, 0.15 max Cu, bal Mg.
Sand cast: 22,800 TS, 11,400 YS; 4 El; 55 Brin.
Permanent mold: 27,000 TS; 10,000 YS; 4.5 El; 60 Brin.
Heat treated: 36,000 TS; 13,000 YS; 12 El; 60 Brin.
For aircraft parts, general purpose castings; age-hardenable.

ELEKTRON A 8.
M-338; 8 Al, 0.5 Zn, 0.3 Mn, bal Mg.
Heat treated: 28,000 TS; 10,000 YS, 5 El; 50 Brin.
Annealed: 39,000-20,000 TS; 12,000-10,000 YS; 2-5 El; 60-50 Brin.
For forgings.

ELEKTRON A8.
M-784, M-1130, 8.0 Al, 0.5 Zn, 0.3 Mn, 0.2 Si, bal Mg.
Cast: 22,000 TS; 11,000 YS; 5 El; 50 Brin.
Heat treated: 38,000 TS; 11,000 YS; 9 El; 60 Brin.
For gear and blower casings for aero engines; sand or die castings.

ELEKTRON A8 HP.
M-106; 7.5-9.0 Al, 0.3-1.0 Zn, 0.15-0.4 Mn, (low residuals) bal Mg.
As sand cast: 18,000-22,400 TS, 10,000-12,400 YS; 0-2 El; 55 Brin; 0.5 Izod.
Chill cast, heat treated: 29,000-36,000 TS, 15,500-18,000 YS, 2-4 El; 75 Brin; 0.6 Izod.
General purpose sand or gravity die magnesium alloy casting
Gen. Eng BS 2970: MAG 2; MAG 7.

ELEKTRON A8HT.
M-106, M-78, 8 Al, 1 Zn, 0.5 Mn, bal Mg.
Heat treated 26,000-32,000 TS; 6-10 El, 50 Brin.
For light alloy parts, sand and permanent mold castings.

ELEKTRON A9V.
M-137; 8.5 Al, 0.5 Zn, 0.3 Mn, bal Mg.
For light alloy parts, heat treatable.

ELEKTRON AM-503.
M-78, M-338; 0.2 Al, 0.2 Zn, 2.5 Mn, 0.2 Cu, 0.4 Si, bal Mg
Cast: 14,000-18,000 TS; 3 El; 30 Brin
Rolled: 40,000 TS; 22,000 YS; 5 El; 20 RA.
For light alloy parts, aircraft pannelling, cowling, fairing, easy to weld, rolled sheets.

ELEKTRON AM503.
M-137, M-1130, 1-2 Mn, bal Mg.
Rolled: 29,000 40,000 TS; 13,500-22,500 YS; 14-5 El, 35-45 Brin
For sheet, shapes, aircraft; for welding.

ELEKTRON AM503
M-784, 1.8 Mn, 0.2 Si, bal Mg.
Cast: 14,000 TS; 40,000 YS; 3 El; 45 Brin
For light alloy parts, corrosion resistant.

ELEKTRON AZ31.
M-137; 2.5-3.5 Al, 0.5-1.5 Zn, 0.2-0.4 Mn, bal Mg.
Cast: 21,000 TS, 11,000 YS; 7 El, 45 Brin.
Chilled: 30,000 TS, 11,000 YS; 15 El; 45 Brin.
For brake shoes, sand or gravity die cast.

ELEKTRON AZ31.
M-338, M-1130, M-784; 3 Al, 1 Zn, 0.3 Mn, bal Mg.
Rolled: 32,000-42,000 TS, 16,000-29,000 YS; 20-4 El; 45-50 Brin.
For aircraft structures, truck bodies, oil tanks; extrusion alloy.

ELEKTRON AZ91.
M-78; 9.5 Al, 0.5 Zn, 0.2 Mn, bal Mg.
Cast: 24,000 TS; 13,500 YS; 2 El; 65 Brin.
For die castings, engine parts; thin sections.

ELEKTRON AZ91.
M-137, M-106; 9.0-10.5 Al, 0.1-1.0 Zn, 0.2-0.4 Mn, bal Mg.
Sand cast: 20,000 TS; 16,000 YS; 2 El; 60 Brin.
Permanent mold: 28,000 TS; 16,000 YS; 5 El; 70 Brin.
For engine casings, aircraft parts; age-hardenable.

ELEKTRON AZ91.
M-784, M-1130; 9.5 Al, 0.5 Zn, 0.3 Mn, 0.2 Si, bal Mg.
Cast: 20,000 TS; 11,000 YS; 3 El; 50 Brin.
Heat treated: 34,000 TS; 18,000 YS; 1 El; 80 Brin.
For aircraft engine parts, crankcases; sand or die castings.

ELEKTRON AZ-855.
M-338; 8.5 Al, 0.4 Zn, 0.2 Mn, bal Mg.
Forged: 45,000-55,000 TS; 22,400-34,000 YS; 14-8 El; 20-18 RA; 70-80 Brin.
For air screw forgings, extruded and forged light alloy parts; age-hardening alloy; corrosion resistant.

ELEKTRON AZ855.
M-784, M-1130; 7.8 Al, 0.4 Zn, 0.3 Mn, 0.1 Si, bal Mg.
Forged: 44,000-49,900 TS; 28,000-32,000 YS; 12-8 El; 65-75 Brin.
For propeller blades, forgings; press forgings.

ELEKTRON AZM.
M-784, M-1130; 6.2 Al, 1.0 Zn, 0.3 Mn, 0.2 Si, bal Mg.
Forged: 40,000 TS; 24,000 YS; 10 El, 70 Brin.
Extruded: 49,000 TS, 31,000 YS; 10 El; 70 Brin
For aircraft wings and fuselage; general construction.

ELEKTRON C.
M-784; 8 Al, 0.4 Zn, 0.3 Mn, bal Mg.
Cast: 24,000 TS; 12,000 YS; 2 El; 60 Brin.
Heat treated: 36,000 TS; 17,000 YS; 2 El; 80 Brin.
For light parts, engine parts; heat treatable.

ELEKTRON C.
M-1130; 7.5-9.5 Al, 0.3-1.5 Zn, 0.15 min Mn, bal Mg.
Cast: 24,100 TS; 11,200 YS; 4 El; 60 Brin.
T4-temper: 35,000 TS; 11,200 YS; 8 El, 60 Brin.
T6-temper: 35,000 TS; 14,000 YS; 2 El; 80 Brin.
For aircraft engine components, rear axle casings; age hardenable.

ELEKTRON M2.
M-338; 1.5 Mn, bal Mg.
Rolled: 34,000 TS; 18,000 YS; 4 El.
For housings, tanks, cold formed parts; corrosion resistant, ductile.

ELEKTRON MCZ.
M-106; 2.5-4.0 Rare Earth, 0.4-1.0 Zr, bal Mg.
Sand cast: 20,000-25,000 TS; 12,200-13,400 YS 3-5 El; 50-60 Brin; 1 Izod.
Sand and gravity die cast magnesium alloy casting; creep resistant.

ELEKTRON MCZ.
M-1130; 0.4-1.0 Zr, 2.5-4.0 Mischmetal, bal Mg.
Annealed: 20,000-25,000 TS; 11,000-13,500 YS; 6-3 El; 45-55 Brin.
For engine components, aircraft structural parts; high creep strength at 500°F.

ELEKTRON MG5.
M-106; 0.15 Cu, 0.6 Si, 0.75 Fe, 1.0 Mn, 0.2 Ti, bal Al.
Extruded: 36,000 TS; 14,000 YS; 22 El; 70 RA; 90 Brin.
¼ H-temper: 42,600 TS; 31,400 YS; 8 El; 90 Brin.
For seaplane propellers, rivets; resists sea water corrosion.

ELEKTRON-MSR.
M-1130; 2 Ag, 0.7-2.5 rare earths, 0.7 Zr, bal Mg.
Heat treated: 78,000-79,000 TS; 50,400-55,000 YS; 4-2 El; 70-90 Brin.
For transmission cases; heat treatable.

ELEKTRON-MTZ.
M-1130; 3.0 Th, 0.7 Zr, bal Mg.
T6 Temper: 26,000-32,000 TS; 11,000-14,000 YS; 5-10 El; 55 Brinell.
For airframes, rockets and missile components.
Good creep resistance and high temperature strength to 700°F.

ELEKTRON RZ5.
M-106, 0.75-1.75 Rare Earth, 3.5-5.0 Zn, 0.4-1.0 Zr, bal Mg.
Sand cast: 24,600-27,000 TS; 12,400-14,500 YS, 3-5 El; 55-65 Brin, 1.5 Izod.
Sand and gravity die cast magnesium alloy casting; weldable, for casting "spidery" castings.
Gen. Eng. BS 2970 MAG 5.

ELEKTRON RZ5.
M-1130, M-137, M-452; 0.75-1.75 rare earths, 3.5-5.0 Zn, 0.4-1.0 Zr, bal Mg
Heat treated: 30,000-32,000 TS, 20,000-22,000 YS; 5-3 El; 65-75 Brin.
For structural and engine parts; age-hardenable, high temperature use to 400°F.

ELEKTRON TZ6.
M-106; 1.5-2.3 Th, 5.0-5.8 Zn, 0.4-1.0 Zr, bal Mg
Sand cast; 38,000-42,500 TS; 21,000-24,600 YS, 5-12 El; 65-75 Brin, 1.5 Izod.
High strength thorium alloy, magnesium base casting; for use up to 150°C.
AIRCRAFT DID 5015 (England)

ELEKTRON TZ6
M-1130; 5.5 Zn, 0.7 Zr, 1.8 Th, bal Mg.
Cast: 38,000 TS; 23,000 YS; 5 El, 65 Brin.
Stabilized: 43,500 TS, 26,500 YS, 15 El; 75 Brin.
For gear casings, engine castings; used to 400°F.

ELEKTRON Z5Z.
M-106; 3.5-5.5 Zn, 0.4-1.0 Zr, bal Mg.
Sand cast: 29,000-33,500 TS; 15,700-17,900 YS; 7-10 El; 55-65 Brin; 3 Izod
Sand and gravity die cast magnesium alloy castings; high yield strength; airframe applications.
Gen. Eng. BS 2970 MAG 4.

ELEKTRON Z5Z.
M-137; 3.5-5.5 Zn, 0.4-1.0 Zr, 0.15 max Mn, bal Mg.
Cast: 33,600 TS; 17,500 YS; 10 El; 55 Brin.
Heat treated: 38,200 TS; 22,000 YS; 7 El; 65 Brin.
For high strength castings; age-hardenable.

ELEKTRON Z5Z.
M-1130; 3.5-4.5 Zn, 0.4-1.0 Zr, bal Mg.
Cast: 37,000 TS; 19,000 YS; 8-15 El; 60 Brin.
Heat treated: 40,000 TS; 25,000 YS; 7 El; 75 Brin.
For structural and engine parts; age-hardenable, for high temperature service.

ELEKTRON ZREO.
M-106; 2.5-4.0 Rare Earth, 0.3-0.7 Zn, 0.4-1.0 Zr, bal Mg.
Sand cast: 20,000-22,400 TS; 12,300-13,400 YS; 3-5 El; 50-60 Brin; 1 Izod.

Sand and gravity die magnesium alloy casting;
improved resistance to sea water; hardenable,
weldable. AIRCRAFT DTD 718 (England).

ELEKTRON ZREO.
M-1130; 0.5 Zn, 0.6 Zr, 2.7 rare earths, bal Mg.
Annealed: 20,000-24,500 TS; 12,000-15,000 YS;
6-3 El; 50-60 Brin.
For jet and turbine parts; creep resistant,
used to 500°F.

ELEKTRON ZRE1.
M-106; 2.5-4.0 Rare Earth, 0.8-3.0 Zn, 0.4-1.0 Zr,
bal Mg.
Sand cast: 20,000-22,400 TS; 12,300-13,400 YS;
3-5 El; 50-60 Brin; 1 Izod.
Sand and gravity die magnesium alloy casting;
pressure tight, heat treatable, weldable,
good creep resistance up to 250°C.
Gen. Eng. BS 2970 MAG 6

ELEKTRON ZRE1
M-137; 2.5-4.0 rare earths, 0.8-3.0 Zn, 0.4-1.0 Zr,
bal Mg.
At 20°C: 24,000 TS; 14,600 YS; 5 El; 50 Brin.
At 200°C: 20,200 TS, 8960 YS; 30 El
For engine and turbine castings,
high creep and heat resistance.

ELEKTRON ZRE1.
M-1130, M-784, M-1045; 2.75 Ce, 0.6 Zr, 2.25 Zn,
bal Mg
Annealed: 22,000 TS; 12,000 YS; 5 El, 55 Brin.
Heat treated: 40,500 TS; 23,500 YS; 5 El, 75 Brin.
For light parts, aircraft engine parts,
heat resistant, operating to 500°F

ELEKTRON ZT1.
M-106, 2.5-4.0 Th, 1.7-2.5 Zn, 0.4-1.0 Zr, bal Mg.
Sand cast 27,000-31,400 TS, 12,300-13,400 YS,
5-8 El, 50-60 Brin; 1.5 Izod
Sand and gravity die cast magnesium alloy casting;
free from porosity; creep resistant to 350°C.
AIRCRAFT DTD 5005 (England).

ELEKTRON ZT1
M-1045, M-1130, 3 Th, 2.3 Zn, 0.7 Zr, bal Mg
Heat treated· 27,000-31,500 TS; 12,500-15,000 YS;
5-10 El, 50-60 Brin
For jet engine and aircraft castings,
age hardenable, used up to 600°F.

ELEKTRON ZTX.
M-1130, 2.5 Th, 1.0 Zn, 0.6 Zr, bal Mg
At 20°C: 33,600 TS, 20,200 YS; 15 El.
At 225°C: 14,600 TS; 9500 YS, 32 El.
For light weight parts, housings, castings.
Extrusion and forging alloy.

ELEKTRON ZTY.
M-1130; 0.7 Th, 0.7 Zr, 0.5 Zn, bal Mg
Rolled 75,000-91,000 TS; 47,000-69,000 YS,
20-10 El; 60-80 Brin.
For aircraft and high temperature components;
creep resistant to 660°F approximately.

ELEKTRON ZW1
M-338; 1.5 Zn, 0.7 Zr, bal Mg.
Extruded· 45,000 TS; 31,500 YS; 5 El.
Rolled: 40,000 TS; 27,000 YS; 8 El.
For aircraft structures; heavy duty.

ELEKTRON ZW1.
M-1130; 0.75-1.50 Zn, 0.5-1.0 Zr, 0.15 max Mn,
0.2 max Al, bal Mg.
Extruded: 36,000-45,000 TS; 24,500-33,500 YS;
10-20 El; 60-75 Brin.
Sheet: 33,500-40,000 TS; 22,500-29,000 YS;
8-18 El; 55-70 Brin.
For airframe structures, cowlings, skins, ribs;
for maximum weldability.

ELEKTRON ZW 2.
M-784; 2 Zn, 0.7 Zr, bal Mg.
Tube: 39,000 TS; 5 El; 75 Brin.
For light parts; non-hardenable.

ELEKTRON ZW 3.
M-338, M-784; 3 Zn, 0.7 Zr, bal Mg.
Rolled: 37,000 TS; 24,000 YS; 18 El; 60 Brin.
Forgings: 49,000 TS, 33,000 YS; 8 El; 80 Brin.
For light parts, aircraft structures; heavy duty.

ELEKTRON ZW3.
M-1130; 2.5-4.0 Zn, 0.5-1.0 Zr, 0.15 max Mn,
bal Mg.
Extruded: 40,000-51,500 TS; 29,000-40,500 YS;
10-25 El; 65-75 Brin.
For airframe construction, skins, cowlings;
free from stress-corrosion cracking.

ELEKTRON ZW6.
M-1130, 5.5 Zn, 0.7 Zr, bal Mg
Extruded· 49,000 TS; 38,000 YS; 10 El.
Heat treated· 51,000 TS; 42,000 YS; 8 El.
For aircraft construction, floor beams;
age hardenable, shock and impact resistant

ELEKTRON ZZ.
M-338; 3 Zn, 0.5 Zr, bal Mg.
For sheets, extrusions, tubes

ELEKTRON ZZ.
M-1130; 0.5-1.0 Zr, 1.0-5.0 Zn, 4 max Cd, bal Mg.
For aircraft extrusions, high temperature use.

ELEPHANT BRAND HARDENING NO 1
M-103; 4 P, 50 Sn, bal Cu.
For hardener for Cu alloys.

ELEPHANT BRAND HARDENING NO 2.
M-103, 7 P, 10 Sn, bal Cu
For hardener for Cu alloys

ELEPHANT BRAND NO. 2 METAL
M-103; 97.85 Cu, 2 Sn, 0.15 P.
For flexible hose, welding rod, line wire,
Phosphor Bronze Grade E

ELEPHANT BRAND NO. 3 METAL.
M-103; 96.95 Cu, 3 Sn, 0.05 P.
For electric contacts, cold heading stock;
Phosphor Bronze Grade E.

ELEPHANT BRAND NO 13 D.
M-103, 4-6 Sn, 4-6 Pb, 0.1 P, bal Cu
55,000 TS, 30,000 YS; 12 El
For hardware; free-cutting

ELEPHANT BRAND NO. 16 METAL
M-103, 95.7 Cu, 4 Sn, 0.3 P.
For springs, knife switches, diaphragms, elec.
contacts, Phosphor Bronze Grade A.

ELEPHANT BRAND NO. 22 METAL.
M-103; 94.7 Cu, 5 Sn, 0.3 P
For diaphragms, welding rods, springs,
Phosphor Bronze Grade A

ELEPHANT BRAND NO. 25 METAL.
M-103; 94.45 Cu, 4 Sn, 0.25 Pb, 0.3 P.
Rods: 55,000-70,000 TS; 5.25 El.
For bolts, nuts, hardware;
Phosphor Bronze Grade B

ELEPHANT BRAND NO 28 METAL.
M-103; 9 Sn, 0.3 Zn, 0.01-0.35 P, bal Cu.
Rolled: 70,000-100,000 TS; 55,000-80,000 YS;
15-20 El.
For diaphragms; P-Bronze Gr. D.

ELEPHANT BRAND NO. 113.
M-103; 90 Cu, 10 Al.
42,500 TS; 19,000 YS; 9 El.
For hardware, corrosion resistant.

ELEPHANT BRAND NO. 126R METAL.
M-103; 97.2 Cu, 2.75 Sn, 0.05 P.
For springs, diaphragms, friction plates; Phosphor Bronze Grade E.

ELEPHANT BRAND NO. 133 METAL.
M-103; 93.75 Cu, 5 Sn, 1 Pb, 0.25 P.
Rods: 55,000-70,000 TS; 5-25 El.
For screw machine parts; Phosphor Bronze Grade B 1.

ELEPHANT BRAND NO. 170 METAL.
M-103; 91.85 Cu, 8 Sn, 0.15 P.
For springs, diaphragms, gears, welding rod; Phosphor Bronze Grade C.

ELEPHANT BRAND NO. 175 METAL.
M-103; 93.8 Cu, 6 Sn, 0.2 P.
For fuse clips, welding rod, wire cloth; Phosphor Bronze Grade F.

ELEPHANT BRAND NO. 192 METAL.
M-103; 98.95 Cu, 1 Sn, 0.05 P.
For springs, hot forgings, signal wire; Phosphor Bronze Grade E.

ELEPHANT BRAND PHOSPHOR BRONZE, GRADE A.
M-103; 95.5 Cu, 3.9 Sn, 0.3 P.
Rolled rod: 45,000-80,000 TS; 50-25 El.
For springs, knife switches, diaphragms; very tough.

ELEPHANT BRAND PHOSPHOR BRONZE, GRADE B.
M-103; 96 Cu, 3.25 Sn, 0.25 Pb, 0.5 P.
Rolled: 45,000-80,000 TS; 40-12 El.
For machine castings, pinions, cog-wheels, propeller screws, piston rods, hardware; corrosion resistant, tough and hard

ELEPHANT BRAND PHOSPHOR BRONZE GRADE B-1.
M-156, M-103; 94 Cu, 5.0 Sn, 1 Pb, 0.5 P.
Rolled rod: 60,000-70,000 TS; 25 Brin.
For rods; rolled or drawn.

ELEPHANT BRAND PHOSPHOR BRONZE, GRADE C.
M-103; 92 Cu, 8 Sn, 0.5 P.
Rolled rod: 75,000-106,000 TS; 52-20 El.
For valves, cocks, cylinder liners; wear and corrosion resistant; hard and durable.

ELEPHANT BRAND PHOSPHOR BRONZE, GRADE D.
M-103; 90 Cu, 10 Sn, 0.5 P.
Rolled rod: 89,000-135,000 TS; 29-16 El.
For gears, valves, pumps, plungers, slides, powder mill tools; hard.

ELEPHANT BRAND PHOSPHOR BRONZE, GRADE E.
M-103; 2 Sn, 0.15 P, bal Cu.
For valves, bearings of heated rolls; very hard.

ELEPHANT BRAND PHOSPHOR BRONZE, GRADE F-2.
M-103; 18.5 Sn, 0.5 P, bal Cu.
Chill cast: 43,000 TS; 0.2 El; 170 Brin.
For slow moving bearings under extreme pressures; hard.

ELEPHANT BRAND PHOSPHOR BRONZE, GRADE G.
M-103; 90 Cu, 5 Sn, 5 Pb, 0.35 P.
For rods, bolts; very tough.

ELEPHANT BRAND PHOSPHOR BRONZE GRADE H.
M-156, M-103; 97.5 Cu, 2.5 Sn, 0.08 P.
For sheets, wire; rolled or drawn.

ELEPHANT BRAND PHOSPHOR BRONZE, GRADE S.
M-103; 0.7-1.0 P, 9-11 Sn, 8-11 Pb, bal Cu.
Cast: 35,000-40,000 TS; 19,000-31,000 YS; 4-3 El; 57-90 Brin.
For bearings for locomotive, marine and stationary engines, roll neck bearings, piston rings; very hard and durable.

ELEPHANT BRAND PHOSPHOR BRONZE GRADE V.
M-156, M-103; 87 Cu, 7 Sn, 6 Pb, 0.5 P.
For rods; rolled or drawn.

ELEPHANT BRAND PHOSPHOR BRONZE NO. 64.
M-103; 79.8 Cu, 10 Sn, 10 Pb, 0.2 P.
For castings; pressure tight.

ELEPHANT BRAND PHOSPHOR BRONZE NO. 130.
M-103; 90 Cu, 5 Sn, 5 Pb, P.
Cast: 55,000 TS; 45,000 YS; 20 El.
For bearings; heavy loads

ELEPHANT BRAND PHOSPHOR BRONZE NO. 146L.
M-103; 88 Cu, 10 Sn, 2 Pb
For castings, hardware; free-cutting.

ELEPHANT BRAND PHOSPHOR BRONZE NO 187.
M-103; 88 Cu, 8 Sn, 4 Pb, P.
For bearings; heavy duty.

ELEPHANT BRAND PHOSPHOR BRONZE NO. 190.
M-450; 10 Sn, 5 Pb, bal Cu.
For bearings; heavy duty.

ELEPHANT BRAND PHOSPHOR BRONZE NO. GK.
M-103; 83 5 Cu, 8 Sn, 8 Pb, 0.5 P.
For castings, hardware; free-cutting

ELEPHANT BRAND PHOSPHOR BRONZE NO. SN 1.
M-103; 78.9 Cu, 10.5 Sn, 9 Pb, 0.75 Ni, 0 85 P.
For bearings; heavy duty.

ELGILOY.
M-1712; 40 Co, 20 Cr, 15 Ni, 7 Mo, 2 Mn, 15 Fe, 0 15 C, 0.05 Be
Heat treated: 380,000 TS, 280,000 YS, 702 Brin.
Available in wire, rod, strip, cable, tubing for springs, watch parts, non-magnetic, corrosion resistant.

ELGINITE.
M-1087, Cr, Ni, Fe, Mo, Mn, bal Co.
For temperature compensating hair springs; constant flexibility from −35 to 122°F.

ELHANCO.
Eng.; 0.7-1.2 C, 0.2 V, bal Fe.
For general tools; water hardening.

ELIANITE I.
Italy; 15 Si, 0.6 Mn, bal Fe.
For pumps, valves, drains, chemical plant equipment; acid resistant, brittle.

ELIANITE II.
Italy; 15 Si, 0.5 Mn, 2.2 Ni, 0.82 C, bal Fe.
For pumps, valves, chemical plant equipment; acid resistant, brittle.

ELINVAR.
M-104, M-373, M-32; 36 Ni, 12 Cr, 1-2 Si, 0.8 C, W, bal Fe.
Rolled: 107,000 TS; 64,500 YS.
For watches, chronometers, hair springs, resistances; slightly magnetic.

ELINVAR EXTRA.
M-68, M-1084; 41-43 Ni, 2.4 Ti, 5.5 Cr, 0.6 max C, 0.5 Mn, 0.4 Si, bal Fe.
Heat treated: 90,000 TS; 35,000 YS; 40 El; 125 Brin.
Aged: 180,000 TS; 115,000 YS; 18 El; 330 Brin.
Cold drawn: 200,000 TS; 180,000 YS; 7 El; 420 Brin.
For springs, diaphragms, bourdon tubes; constant modulus.

ELITE.
M-1294; 1.35 C, W, Co, bal Fe.
For blanking and forming dies, punches; oil hardening, wear resistant.

ELKALOY A.
M-265; 1 Cd, 99 Cu.
Bars: 65,000 TS; 60,000 YS; 15 El; 50 RA; 120 Brin.
For electrodes for resistance welding of steel.
Elect. cond. 90%.

ELKALOY D
M-265; Al, bal Cu.
Cast: 70,000 TS; 30,000 YS; 8 El; 8 RA, 200 Brin.
For welding electrodes; 20% electrical conductivity.

ELKALOY D110
M-265, Al, Fe, bal Cu.
Cast 90,000 TS; 12 El, 176 Brin.
For bearings, gibs, slides, valve seats and stems; 12% conductivity, corrosion resistant

ELKALOY D-120.
M-265; 11.0-12 2 Al, 3 25-4 5 Fe, bal Cu
Cast: 80,000-85,000 TS; 35,000-70,000 YS; 10-2 El; 200-350 RA.
For bushings, bearings, forming and flash welder dies; Al bronze, heat treatable, wear resistant

ELKALOY D130.
M-265; Al, Fe, bal Cu
Cast: 85,000 TS; 0 5 El, 350 Brin
For forming dies and rolls, guide posts; 9% conductivity, Al-bronze.

ELKONITE 1W3.
M-265, 44 Cu, 56 W.
Bars 63,000 TS.
For resistance electrodes for spot welding steel, electrical contacts
Elect. cond 55%.

ELKONITE 3W3.
M-265; 32 Cu, 68 W.
Sintered 75,000 TS, 178 Brin.
For electrical contacts.
50% elect. cond.

ELKONITE 3W53.
M-265; W Cu.
Heat treated: 120,000 TS; Rockwell B105.
For resisting welding electrodes; 30% electrical conductivity

ELKONITE 5-S.
M-265; 88 W, 12 Ag.
Sintered 55,000 TS; 30 Rock C.
Density: 17.53; Elec. cond.: 38%.
For rocket nozzles; elevated temp. erosion resistant material

ELKONITE 5W3.
M-265; 30 Cu, 70 W.
Sintered: 200 Brin.
For resistance welding electrode for steel.
48% electrical conductivity.

ELKONITE 10W3.
M-265; 74 W, 26 Cu.
Sintered: 90,000 TS; 225 Brin.
For resistance welding electrodes, valve seats, switches, bearings.
Sintered powder metallurgy. 46 Elect. cond.

ELKONITE 10-W-53.
M-265; Cu, bal W.
Heat treated: 160,000 TS
For resistance welding dies; heat treatable.

ELKONITE 20S.
M-265; 27.5 Ag, 72.5 W.
Sintered: 70,000 TS; 200 Brin.
For spot welding resistance electrodes for stainless steel. Elect. cond. 49%.

ELKONITE 20W3.
M-265; Cu, W.
For welding electrodes; sintered, 36% cond.

ELKONITE 30W3.
M-265; 20 Cu, 80 W.
Sintered: 98,000 TS; 200 Brin.
For dies, welding dies; difficult to machine.

ELKONITE 35S.
M-265; 35 Ag, 65 W.
Sintered: 55,000 TS; B 85 Rock.
For electrical contacts.
52% elect. cond.

ELKONITE 50S.
M-265, 49 Ag, 51 W.
Sintered: 35,000 TS; B 55 Rock.
For electrical contacts

ELKRO.
M-357; 0.5 C, 0.95 Cr, 0.2 V, bal Fe.
For dies, oil hardening.

ELMARID.
Eng; 5.9 C, 83 W, 4.5 Co, 0.4 Fe.
For tips for high speed tools, dies; $W_2C + WC$.

ELMEDUR.
M-1246, W-alloy.
For resistance welding electrodes; sintered alloy.

ELMET.
M-1246; TiC, Co, Cr, Ni.
For electrical contacts; sintered.

ELMET 2H.
M-780, Mo-Ag.
130 Brin.
For electrical contacts, sintered

ELMET 3C.
M-780, W-Cu-Ni
198 Brin.
For electric contacts; sintered.

ELMET 4.
M-780, W-Cu-Ni.
275 Brin
For electrical contacts; sintered.

ELMET 5d
M-780, W-Ag.
180 Brin.
For electric contacts, sintered.

ELMET 5K.
M-780, W-Ag.
110 Brin.
For electric contacts, sintered.

ELMET C.
M-780; Cu alloy.
120 Brin
For welding electrode; 82% conductivity; for welding iron (spot)

ELMET Cu.
M-780; Cu alloy.
350 Brin.
For welding electrodes; 36% conductivity; spot welding of copper.

ELMET H-1.
M-780; Cu alloy.
120 Brin.
For welding electrodes; butt welding, 59% conductivity.

ELMET H-2.
M-780; Cu alloy.
180 Brin.
For butt welding electrodes; 45% conductivity.

ELMET H-3.
M-780; W, bal Cu.
For butt welding electrodes; 36% conductivity.

ELMET H-3.
M-1246; W-alloy.
For resistance welding electrodes; sintered alloy.

ELMET HEAVY METAL.
M-1246; W-alloy.
For flywheel, weights; for protection against radioactivity.

ELMET HR.
M-1246; TiC, Ni, Co, Cr.
Sintered.
For dies, tools, jet engine components; high oxidation resistance.

ELMET-ROTUNG.
M-1246, W, Cu.
Sintered
For electrical contacts.

ELMET S17
M-1246; W, Cu, Ni.
For balancing weights, isotope containers; heavy metal

ELMET S18
M-1246; W, Ni.
For balancing weights, isotope containers; heavy metal.

ELMET-SILVUNG.
M-1246; W, Ag.
For electrical contacts; sintered alloy.

ELMET U.
M-780; Cu alloy
180 Brin
For spot welding electrodes, 68% conductivity.

ELMET-W
M-1246, Cu, Cr.
For resistance welding electrodes, sintered alloy

ELNERS GERMAN SILVER
Eng., 57 4 Cu, 26 6 Zn, 13 Ni, 3 Fe
For ornaments, nickel silver.

ELOXAL
Ger., Al alloy.
For light alloy parts; anodically oxidized.

ELTUN DIE STEEL.
M-357, 0 4 C, 3 Cr, 9 W, 0.2 V, bal Fe
For tools, dies, bolt and rivet dies, hot work steel

ELVERITE A.
M-17, M-447; 3.4-3.7 C, 0.5-1 Si, bal Fe.
Cast: 500 Brin.
For tube mill linings, wheels, jaw crusher sprockets; wear resisting, chilled cast iron.

ELVERITE "B."
M-447; 3.3 C, 2.4 Si, 1.5 Ni, 0.7 Cr, bal Fe.
For wear resisting cast parts in pulverizers, crushers, stamp mills, conveyors; chilled cast iron.

ELVERITE C.
M-447, 1.0 1.8 Cr, 3.5 C, 0.25-1 0 Si, 4.5 Ni, 0.6 Mo, bal Fe.
Sand cast: 40,000-50,000 TS; 650-700 Brin.
For coal and cement pulverizers, crushers, mixers, abrasion resistant

ELVERITE D.
M-447; 3.3 C, 2.2 Si, 0.4 Mo, 0.7 Mn, bal Fe.
For castings; abrasive and wear resistant, cast iron.

EM 15.
M-1; Ni, bal Fe.
For glass to metal seals; controlled expansion.

EM 51.
5-6 Ce, 1.2 Mn, bal Mg.
For aircraft engine parts; heat treatable.

EM-62.
German; 6 Ce, 2 Mn, bal Mg.
For engine cylinder heads; high temperature use.

EMBEEBUSH METAL.
M-179; Cu alloy.
For castings; corrosion resistant.

EME.
M-85; 0.15 C, 19 Cr, 12 Ni, 3 W, 1 Cb, bal Fe.
Rolled: 135,000 TS; 100,000 YS; 20 El; 45 RA.
Forged: 115,000 TS; 80,000 YS; 25 El; 50 RA.
For jet engine and missile components, stainless and heat resistant, creep resistant.

EM IV.
M-459; 0 14 C, 3 Mn, 0.12 Si, bal Fe.
For welding electrode; general purpose.

EMK.
Eng; 71 Fe, 19 Mo, 19 Co, 0.8 Si.
For alloy for sealing in glass; coefficient of expansion 92 × 10^{-7}

EMOCW.
M-459, C, Cr, Mo, bal Fe.
Oil treated: 114,000-143,000 TS; 85,000-114,000 YS; 17-11 El
For gears, shafts, oil hardening, tough.

EMP 300 M
M-1716; 99 + Fe, 0 01 max C, 0.15 Mn, 0.005 P, 0.010 S, 0 02 Si, H_2 loss = 0 12%.
High grade iron powder for sintering.
Particle size: 97% thru 100 mesh screen.
52% thru 250 mesh screen.
To be blended, usually with graphite and zinc stearate, compressed and sintered

EMP 400 MS.
M-1716; 99.3 Fe, 0.02 C, 0.25 Mn, 0 007 P, 0 20 S, 0.02 max Si, 0.10 O_2.
High grade iron powder for sintering.
Particle size· 97% through 100 mesh screen
51% through 250 mesh screen.
To be blended, usually with graphite and zinc stearate, compressed and sintered.
This grade produces free-machining material.

EMP 4600
M-1716, 0 01 max C, 0 20 Mn, 0 008 P, 0 015 S, 0.02 Si, 0 09 O_2, 1.90 Ni, 0.50 Mo, bal Fe.
High grade iron alloy powder for sintering
Particle size 97% through 100 mesh screen.
53% through 250 mesh screen.
To be blended, usually with graphite and zinc stearate, compressed and sintered
This grade permits oil hardenable parts.

EMP 8600.
M-1716, 0 02 C, 0.20 Mn, 0 01 P, 0 015 S, 0.47 Cr, 0 10 Si, 0 62 Ni, 0.40 Mo, 0.24 O_2, bal Fe
High grade iron alloy powder for sintering
Particle size· 97% through 100 mesh screen.
52% through 250 mesh screen.
To be blended, usually with graphite and zinc stearate, compressed and sintered.
This grade produces 8600 alloy steel.

EMP 9400
M-1716; 0 02 C, 0 20 Mn, 0.01 P, 0.015 S, 0.10 Si, 0.27 Cr, 0 28 Ni, 0.21 Mo, 0.15 O_2, bal Fe
High grade iron alloy powder for sintering.
Particle size: 97% through 100 mesh screen.
52% through 250 mesh screen.
To be blended, usually with graphite and zinc stearate, compressed and sintered.
This grade produces 9400 alloy steel.

EMPEDUR.
M-1246; WC, Fe.
Sintered.
For hard facing electrode; sintered.

EMPEROR.
M-107; 0.2 C, 20 Cr, 10 Ni, bal Fe.
For hardening boxes, carburizing pans, furnaces, crucibles, glass molds; heat and corrosion resistant.

EMPEROR.
Ger.; Sn, Sb, Pb.
For bearings; anti-friction.

EMPEROR BRASS.
Eng.; 60 Cu, 20 Al, 20 Zn.
For corrosion resistant parts; corrosion resistant.

EMPEROR CHROME NICKEL ALLOY.
M-107; 0.2 C, 9 Ni, 19 Cr, bal Fe.
For furnace parts; heat resistant, stainless, austenitic.

EMPIRE 12.
M-162; 0.25 C, 2-3 Ni, 1-1.5 Cr, 0.7 Mn, 0.3 Mo, bal Fe.
For castings; tough.

EMPIRE 18.
M-162; 0.25 max C, 4-6 Cr, 0.5 Mn, bal Fe.
For castings; for oil well and refineries.

EMPIRE NO. 18
M-162; 0.2 C, 18 Cr, bal Fe
80,000-100,000 TS; 65,000-75,000 YS; 25-15 El, 40-30 RA, 170-200 Brin.
For corrosion resisting parts; corrosion resistant

EMPIRE NO 18-8
M-162, 0.15 C, 18 Cr, 8 Ni, bal Fe.
80,000-100,000 TS; 35,000-50,000 YS, 15-5 El, 20-10 RA.
For stainless and corrosion resisting parts; stainless, corrosion resistant.

EMPIRE NO. 24-12.
M-162; 0.25 C, 24 Cr, 12 Ni, bal Fe.
70,000-90,000 TS; 30,000-45,000 YS; 15-5 El, 20-10 RA
For heat and corrosion resisting parts; heat and corrosion resisting.

EMPIRE NO. 25-5.
M-162; 0.2 C, 25 Cr, 5 Ni, bal Fe.
For heat and corrosion resisting parts; heat and corrosion resisting.

EMPIRE NO. 30
M-162; 0.3 C, 30 Cr, bal Fe.
40,000-50,000 TS; 30,000-40,000 YS; 1-0 El; 2-0 RA.
For heat and corrosion resisting parts; heat and corrosion resistant.

EMPIRE NO. 35-15.
M-162; 0.35 C, 15 Cr, 35 Ni, bal Fe
60-000-70,000 TS; 8-2 El; 3-1 RA; 180 Brin.
For heat and corrosion resisting parts; heat and corrosion resistant.

EMPIRE NO. 60-20.
M-162, 0.50 C, 20 Cr, 60 Ni, bal Fe.
80,000-90,000 TS, 50,000-60,000 YS; 25-20 El; 50-40 RA.
For heat and corrosion resisting parts; heat and corrosion resistant.

EMPIRE NO. 75-20.
M-162; 75 Ni, 20 Cr, 5 Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

EMPIRE CF-3.
M-162; 0.03 max C, 18-21 Cr, 9-12 Ni, bal Fe.
Cast: 75,000 TS; 36,000 YS; 45 El; 140 Brin.
For welded fabrications, chemical plant equipment; stainless, austenitic; Type 304L.

EMPIRE CF-3M.
M-162; 0.03 max C, 18-21 Cr, 10-13 Ni, 2-3 Mo, bal Fe.
Cast: 78,000 TS; 40,000 YS; 44 El; 150 Brin.
For welded acid resistant castings; stainless, austenitic; Type 316L.

EMPIRE CF-16FA.
M-162; 0.16 max C, 18-21 Cr, 9-12 Ni, 0.2-0.3 Se, 0.15 max Mo, bal Fe.
Cast: 75,000 TS, 35,000 YS; 40 El, 160 Brin.
For chemical, paper, textile and bleaching equipment; stainless, austenitic, free-cutting.

EMPIRE CF-30.
M-162, 0.30 max C, 17-20 Cr, 8-11 Ni, bal Fe.
Cast 80,000 TS, 40,000 YS, 40 El; 160 Brin
For chemical plant and electrical equipment, stainless, austenitic.

EMPIRE "D."
M-162; C, 26 Cr, 4 Mo, 25 Ni, 1 V, bal Fe.
For engineering applications; heat and corrosion resistant

EMPIRE STEEL
M-38, 0.08-0.18 C, bal Fe
For screw machine products; case hardening.

EMRO
M-1432; C, alloy, bal Fe.
For gears, shafts, hooks, chains, chisels, shock and fatigue resistant.

EN12KHG.
Russia, 0.5-0.6 C, 4.5-5.5 Mn, 3.0-4.5 Cr, 11-13 Ni, bal Fe
For instrumental parts; paramagnetic.

EN25.
Russia; 0.3-0.6 C, 2-3 Cr, 22-25 Ni, bal Fe
For instrument parts; paramagnetic.

EN36.
Russia, 0.26 max C, 0.7 max Mn, 0.35 max Si, 35-37 Ni, bal Fe.
For electrical equipment, instruments, low coefficient of expansion

EN42
Russia, 0.3 max C, 0.8 max Mn, 0.4 max Si, 42-44 Ni, bal Fe.
For calibrating instruments; controlled expansion coefficient.

EN60.
Russia; 0.25 max C, 0.7-1.5 Mn, 12-15 Cr, 3.5-5.5 Al, bal Fe.
For electrical resistance and heating elements; applications to 1100°C.

ENDEWRANCE-50.
M-1489; 1.8-5.0 B, 3.0-5.0 Si, 2 max Cr, 3.5 max Fe, bal Ni.
Cast: C 40-62 Rock.
For hard facing electrodes for pump sleeves, steam valves, gauges.
Heat, corrosion and wear resistant.

ENDEWRANCE-51.
M-1489, 1.8-5.0 B, 3.0-5.0 Si, 2 max Cr, 3.5 max Fe, bal Ni.
Cast. C 40-62 Rock
For hard facing electrodes for pump sleeves, steam valves, gauges.
Heat, corrosion and wear resistant.

ENDEWRANCE-52.
M-1489; 1.8-5.0 B, 3.0-5.0 Si, 2 max Cr, 3.5 max Fe, bal Ni.
Cast: C 40-62 Rock.
For hard facing pump sleeves, steam valves, gauges.
Corrosion, heat and wear resistant.

ENDEWRANCE-53.
M-1489; 1.8-5.0 B, 3.0-5.0 Si, 2 max Cr, 3.5 max Fe, bal Ni.
Cast: C 40-62 Rock.
For hardfacing pump sleeves, steam valves, gauges.
Corrosion, heat and wear resistant.

ENDEWRANCE 202.
M-1489; 0.05-0 12 C, 0.18 Ti, 0.6 Cb, 26-30 Cr, 47-52 Co, bal Fe.
Cast: 135,000 TS; 48,000 YS; 10 El; 10 RA; 250 Brin.
Wrought· 132,000 TS; 61,000 YS; 7 El; 6 RA; 350 Brin.
For furnace baffles, burner tips, sintering grates, quench baskets.
Corrosion and heat resistant. Resists thermal shock.

ENDEWRANCE-CM2.
M-1489, 23 Cr, 28 Mo, 10 Co, bal Fe.
Cast 112,000 TS; Rock C 50-54.
For hard facing welding rods, rollers, steel mill guides, pug mill paddles, coal pulverizing hammers.
Heat and corrosion resistant. High wear resistance.

ENDEWRANCE-CM 18
M-1489; 25 Cr, 15 Ni, 8 Mo, 25 Co, bal Fe.
Cast. Rock C 40-42, 62,000 TS
For welding rods, steam valves, punches, pump sleeves, hot trimming dies.
High wear resistance Heat and corrosion resistance.

ENDEWRANCE-CM.40
M-1489, 30 Cr, 10 Ni, 10 Co, 14 W, bal Fe
Cast: 64,000 TS; C 38-42 Rock.
For welding rods, valve and valve seats, gas turbine parts, superchargers.
Heat, corrosion and wear resistant.

ENDURANCE AA.
M-657, 87 Cu, 12 Sn, 1 P.
For aero and motor bronze castings; wear resistant, low coefficient of friction.

ENDURANCE BB.
M-657; 89 Cu, 10.5 Sn, 0.5 P
For bushings, resists abrasive wear.

ENDURANCE CC.
M-657, 89-65 Cu, 10 Sn, 0.35 P.
For pumps, collars, bearings; corrosion resistant.

ENDURANCE DD
M-657; 80 Cu, 10 Sn, 9 75 Pb, 0.25 P.
For railway bearings, connecting rod bearings; heavy duty.

ENDURANCE EE.
M-657, 84 Cu, 9.5 Sn, 6 3 Pb, 0.2 P.
For railway bearings, connecting rod bearings; heavy duty

ENDURO 17-7.
M-97; 0.15 max C, 2 max Mn, 1 max Si, 16-18 Cr, 6-8 Ni, bal Fe.
Annealed· 110,000 TS; 40,000 YS; 60 RA; 165 Brin.
½ H-temper: 150,000 TS; 110,000 YS, 16 El; 320 Brin.
Hard: 185,000 TS; 140,000 YS; 9 El; 410 Brin.
For transportation equipment and aircraft parts; stainless, austenitic; Type 301.

ENDURO 18-8.
M-97; 0.15 max C, 2.0 Mn, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed: 85,000-90,000 TS; 35,000-40,000 YS; 50-60 El; 65-70 RA; 156-160 Brin.
For evaporators, vessels, chemical engineering equipment, sterilizers, marine parts; stainless; resists scaling to 1450°F; Type 302

ENDURO 18-8 B.
M-97; 0.15 max C, 2 max Mn, 2-3 Si, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed: 90,000-95,000 TS; 40,000 YS; 55-50 El; 65 RA; 156-160 Brin.
For annealing boxes, furnace parts, pump parts, pre-heaters, stainless, resists oxidation to 1700°F; Type 302B.

ENDURO 18-8 Cb.
M-97; 0.15 C, 17-19 Cr, 7.0-9.5 Ni, Cb = 6-10 × C, bal Fe.
Annealed· 80,000-90,000 TS; 35,000-45,000 YS; 60-55 El; 60-55 RA; 135-185 Brin.
For stainless parts, welded structures, tanks; non-magnetic, austenitic

ENDURO 18-8 F.M
M-97, 0.15 max C, 17-19 Cr, 8-10 Ni, 0.07 P, S or Se, 0 6 max Mo or Zr, bal Fe.
Heat treated· 101,700 TS; 46,900 YS, 55 El, 62 RA; 179 Brin.
Annealed. 90,000 TS, 35,000 YS; 50 El; 55 RA; 160 Brin
For tanks, vessels, chemical engineering equipment, pump shafts, valves; stainless and heat resistant; free machining

ENDURO 18-8 F.S
M-97, 0 12 max C, 17-19 Cr, 10-13 Ni, bal Fe
Annealed 85,000 TS; 38,000 YS, 50 El, 880 Brin
For spinners, stainless parts, stainless, austenitic, Type 305.

ENDURO 18-8 HT.
M-97, 0 08-0.20 C, 17-20 Cr, 7-10 Ni, 1 5 max Mn, bal Fe.
Annealed. 85,000 TS; 35,000 YS, 50 El; 80 Rb.
Hard 185,000 TS; 140,000 YS; 5 El, 40 Rc
For bus bodies, airplanes, trucks, stainless austenitic.

ENDURO 18-8 Mo.
M-97; 0 16 max C, 1.5 Mn, 0.75 max Si, 18-22 Cr, 7-10 5 Ni, 2-4 Mo, bal Fe.
For stainless and corrosion resisting parts, corrosion resistant, stainless; Type 316

ENDURO 18-8 S
M-97, 0 08 max C, 2 max Mn, 18-20 Cr, 8-11 Ni, bal Fe.
Annealed: 85,000 TS, 35,000 YS, 55 El; 70 RA, 150 Brin.
For welded stainless structures where severe acid corrosion and high temperatures are encountered; stainless, corrosion resistant, Type 304.

ENDURO 18-8S-Cb.
M-97; 0.08 max C, 17-19 Cr, 9-12 Ni, 2 max Mn, Cb = 10 × C, bal Fe.
Annealed. 80,000-95,000 TS; 35,000-45,000 YS; 60-55 El; 60-55 RA; 160 Brin.
For airplane exhaust stacks, collector rings, heat resistors; stainless, austenitic, corrosion and heat resistant; Type 347.

ENDURO 18-8 S-Mo.
M-97; 0.10 max C, 2 Mn, 16-18.0 Cr, 10-14 Ni, 2-3 Mo, 0.1 max Si, bal Fe.
Annealed: 80,000-90,000 TS; 30,000-40,000 YS; 50-60 El; 65-70 RA; 150-156 Brin.
For textile and dye equipment, chemical apparatus, paper and pulp mill equipment, stainless, corrosion resistant; Type 316.

ENDURO 18-8 S-Mo-Cb.
M-97; 0.08 max C, 2 max Mn, 1 max Si, 17-19 Cr, 13-15 Ni, 2-3 Mo, Cb(Ta) = 10 × C min, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 40 El; 172 Brin.
For corrosion and heat resistant parts; corrosion resistant, high temperature strength, austenitic.

ENDURO 18-8 S-Ti.
M-97; 0.08 C, 2.0 Mn, 1.0 max Si, 17-19 Cr, 7-9 Ni, Ti = 5 × C, bal Fe.
Annealed: 85,000-90,000 TS, 35,000 YS; 55-50 El; 65 RA; 150-156 Brin.
For welded stainless structures where severe acid corrosion and high temperatures are encountered; stainless, corrosion resistant; Type 321.

ENDURO 18.8 Ti.
M-97; 0.16 max C, 0.6 max Mn, Ti, 0.75 max Si, 16.5-20.0 Cr, 7.0-10.5 Ni, 0.8 Mo, bal Fe.
Annealed: 80,000 TS; 35,000 YS, 65 El; 65 RA; 170 Brin.
For stainless parts, welded structures; stainless and heat resistant.

ENDURO 19-9 S-Mo.
M-97; 0.10 max C, 2 max Mn, 1 max Si, 18-20 Cr, 11-14 Ni, 3-4 Mo, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El; 165 Brin
For corrosion and heat resistant parts; corrosion resistant, high temperature strength, austenitic.

ENDURO 19-9S Ti.
M-97; 0.07 max C, 19 Cr, 9 Ni, Ti, bal Fe
For stainless parts; stainless.

ENDURO 20-10 S.
M-97; 0.08 max C, 19-21 Cr, 10-12 Ni, 0.2 max Mn, bal Fe.
Annealed: 85,000-95,000 TS; 40,000-60,000 YS, 45-50 El; 60 RA; 150 Brin.
For working electrodes and filler rods; heat and corrosion resistant.

ENDURO 20-23
M-97; 0.20 max C, 18-23 Cr, 0.50 max Si, bal Fe.
For stainless parts, still and condenser tubes, pump parts, fittings, valves; stainless, heat and corrosion resistant.

ENDURO 20-25.
M-97; 0.25 max C, 19-21 Cr, 24-26 Ni, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

ENDURO 201.
M-97; 0.15 max C, 5.5-7.5 Mn, 16-8 Cr, 3.5-5.5 Ni, 0.25 N, bal Fe.
Rolled: 115,000 TS, 55,000 YS; 55 El; 185 Brin.
For railroad car bodies; Type 201; stainless, austenitic.

ENDURO 202.
M-97; 0.15 max C, 7.5-10.0 Mn, 17-19 Cr, 4-6 Ni, 0.25 max N, bal Fe.
Rolled: 105,000 TS; 55,000 YS; 55 El; 185 Brin.
For kitchen utensils, storage and pasteurizing equipment; Type 202; stainless, austenitic.

ENDURO "A.A."
M-97; 0.12 max C, 14-18 Cr, 1.0 max Mn, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 60 RA; 163 Brin.
For valves, heat transfer parts, condenser tubes, nitrogen fixation apparatus, pumps; non-hardening, corrosion resistant; Type 430; heat resistant to 1400°F.

ENDURO AA-FM.
M-97; 0.12 max C, 14-18 Cr, 0.60 max Mo, 0.07 min P, S or Se, 0.60 max Mo or Zr, bal Fe.
Annealed: 80,000 TS; 55,000 YS; 25 El; 60 RA; 170 Brin.
Rolled: 90,000 TS; 80,000 YS; 15 El; 55 RA; 190 Brin.
For pump shafts, trim, oil burner parts, hardware, tanks, valves, screw machine parts; free machining, corrosion resistant.

ENDURO AA HIGH CARBON.
M-97; 0.9-1.2 C, 16-18 Cr, bal Fe.
Annealed: 125,000 TS; 90,000 YS; 10 El; 30 RA; 265 Brin.
Hardened: 240,000 TS; 200,000 YS; 5 El; 10 RA; 550 Brin.
For corrosion resistant parts, valves, bearings; corrosion and wear resistant; Type 440 C.

ENDURO AA-Ni.
M-97; 0.20 max C, 1 max Mn, 1 max Si, 15-17 Cr, 1.25-2.50 Ni, bal Fe.
Wire: 135,000 TS; 115,000 YS, 10 El; 50 RA; 290 Brin.
Bars: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
For spring temper applications, corrosion resistant, Type 431.

ENDURO "F.C."
M-97, 0.15 max C, 1.25 max Mn, 12-14 Cr, 0.07 max P, 1 S, Se, 0.6 max Mo, Zr, bal Fe
Annealed: 75,000 TS, 40,000 YS, 30 El, 60 RA; 160 Brin
Hardened: 110,000 TS, 85,000 YS; 18 El, 55 RA, 230 Brin.
For turbine blades, valve stems, chemical engineering equipment, pump shafts, bushings, stainless, corrosion and heat resistant; free machining, Type 416

ENDURO "H.C."
M-97, 0.35 max C, 23-27 Cr, 1.0 max Mn, bal Fe.
Annealed: 80,000 TS; 45,000 YS, 25 El; 45 RA; 179 Brin.
For annealing boxes, glass molds, valves, fittings, rabble arms, furnace parts, stainless, corrosion resistant, resists heat to 1900°F; Type 446

ENDURO "H.C.N."
M-97; 0.20 max C, 20 max Mn, 1.0 max Si, 22-24 Cr, 12-15 Ni, bal Fe.
Annealed: 90,000 TS, 45,000 YS, 50 El, 60 RA; 170 Brin.
For furnace parts, oil refining and chemical plant equipment, skid rails; stainless, corrosion and heat resistant; resists heat to 1950°F.

ENDURO H.C.N. LOW CARBON.
M-97; 0.08 max C, 2 max Mn, 1 max Si, 22-24 Cr, 12-15 Ni, bal Fe
Annealed: 90,000 TS; 45,000 YS; 50 El; 60 RA; 170 Brin.
For furnace parts, skid rails, oil refining and chemical equipment; stainless and heat resistant to 1950°F.

ENDURO K.A.-2 F.M.
M-97; 0.1-0.2 C, 0.75-1.25 Mn, 16.5-20.0 Cr, 7.0-10.5 Ni, 0.4-0.6 Mo, bal Fe.
For stainless parts; stainless and heat resistant.

ENDURON.
M-494; 1.9 C, 1.9 Si, 0.06 P, 16 Cr, bal Fe.
Cast: 78,000 TS; 269-321 Brin.
For piston rings, cylinder liners; heat and abrasion resistant.

ENDURO NC-3.
M-97; 0.25 max C, 2.0 Mn, 1.5 Si, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 95,000 TS, 45,000 YS; 45 El; 65 RA; 183 Brin.
For retorts, valves, furnace parts, pump parts, rails, heat and corrosion resistant to 2000°F.

ENDURO S-1.
M-97; 0.15 max C, 11.5-13.5 Cr, bal Fe.
Annealed: 65,000 TS; 35,000 YS; 35 El, 70 RA; 155 Brin.
Heat treated: 110,000 TS; 85,000 YS; 23 El; 65 RA; 225 Brin.
For cutlery, pump shafts, steam turbine parts, valve seats, rifle and revolver barrels; stainless and heat resistant; Type 410.

ENDURO S-1 ALUMINUM.
M-97; 0.08 max C, 11.5-13.5 Cr, 0.10-0.30 Al, bal Fe
Annealed: 65,000 TS; 40,000 YS; 25 El; 170 Brin.
Cold drawn: 85,000 TS; 70,000 YS, 20 El; 60 RA; 185 Brin.
For oil refining equipment; creep and heat resistant.

ENDURO S-1-Ni
M-97; 0.15 max C, 1 max Mn, 1 max Si, 11.5-13.0 Cr, 1.25-2.50 Ni, bal Fe
Heat treated: 210,000 TS, 105,000 YS; 15 El; 228 Brin
For heat treated springs; corrosion resistant, Type 414

ENDURO "S" HIGH CARBON.
M-97, 0.15 min C, 12-14 Cr, bal Fe
Annealed 95,000 TS, 50,000 YS, 25 El, 55 RA, 195 Brin
For corrosion resistant parts, valves, cutlery; corrosion resistant, Type 420

ENDURO "S" TURBINE QUALITY
M-97, 0.15 max C, 11.5-13.0 Cr, bal Fe
Annealed 70,000 TS; 40,000 YS; 30 El; 60 RA; 155 Brin
Hardened 110,000 TS; 85,000 YS; 20 El, 55 RA; 225 Brin
For turbine blades and parts; corrosion and heat resistant, Type 410

ENDWELDUR
M-653, 0.2 C, bal Fe.
Normalized: 55,000 TS
For chains.

ENDWELDUR 85.
M-653; 0.4 C, bal Fe
Normalized: 85,000 TS.
For chains.

ENDWELDUR 125
M-653; 0.4 C, 3.5 Ni, bal Fe.
Heat treated: 125,000 TS.
For chains.

ENEBRA BRONZE.
M-557; Sn, bal Cu.
For high static and dynamic parts, corrosion resistant.

ENEBRA EDELBRONZE NI.
M-557; Sn, bal Cu.
Sand cast: 50,000-65,000 TS; 21,000-36,000 YS; 30-20 El; 110-130 Brin.
For chemical industries; corrosion resistant.

ENEBRA EDELBRONZE TO.
M-557; Sn, bal Cu.
Sand cast: 71,000-85,000 TS; 26,000-36,000 YS; 30-20 El; 120-150 Brin.
For chemical and textile industries; corrosion resistant.

ENEBRA EDELBRONZE TU-I.
M-557; Sn, bal Cu.
Sand cast: 92,000-107,500 TS; 43,000-56,000 YS; 15-8 El; 150-190 Brin.
For chemical and textile industries, corrosion resistant.

ENEBRA EDELBRONZE TU-II.
M-557; Sn, bal Cu.
Sand cast: 78,500-92,000 TS; 28,000-43,000 YS, 30-20 El; 120-150 Brin
For chemical and textile industries; corrosion resistant.

ENEBRA LAGERBRONZE B-33
M-557; Sn, bal Cu.
For machine parts, automobile and diesel engine parts, high strength.

ENEBRA LAGERBRONZE BZ-20.
M-557, Sn, bal Cu.
For machine parts, automobile and diesel engine parts, high strength.

ENEBRA LAGERBRONZE BZ-25.
M-557; Sn, bal Cu.
For machine parts, automobile and diesel engine parts, high strength

ENEBRA LAGERBRONZE PN.
M-557, Sn, bal Cu.
36,000-51,000 TS; 23,000-28,000 YS, 18-10 El, 70-90 Brin
For pump parts, corrosion resistant

ENEBRA SONDERMESSINGE S-IM
M-557, Zn, bal Cu
78,400-93,000 TS; 36,000-43,000 YS, 15-10 El 130-160 Brin.
For general construction

ENEBRA SONDERMESSINGE S-IIM.
M-557, Zn, bal Cu
56,000-72,000 TS, 19,000-25,000 YS; 35-25 El, 90-120 Brin
For general construction

ENEBRA SPEZIALBRONZE EH-I.
M-557; Sn, bal Cu
85,000-100,800 TS, 36,000-50,000 YS; 15-10 El, 150-180 Brin
For electrical industries.

ENEBRA SPEZIALBRONZE EH-II.
M-557; Sn, bal Cu
72,000-85,000 TS, 28,000-36,000 YS; 25-15 El; 130-150 Brin
For electrical industries

ENEBRA SPEZIALBRONZE EH-III.
M-557, Sn, bal Cu.
72,000-78,500 TS, 25,000-31,000 YS, 30-20 El; 110-130 Brin
For electrical industries.

ENGALOY 129
M-686; 60 Pd, 40 Ni.
For brazing electronic components.
M P. 2260°F Eutectic alloy Good wetability.

ENGALOY 135
M-686; 21 Pd, 48 Ni, 31 Mn.
Shear strength: 38,000 at 1250°F and 20,000 at 1500°F and 50,000 At R.T.
For brazing electronic components.
Eutectic alloy. Melting point 2050°F. Good wetability and ductility.

ENGALOY 142.
M-686; 60 Pd, 39.8 Ni, 0.05 B, 0.15 Li.
For brazing electronic components.
M.P. 1630°F. Eutectic alloy.
Good wetability and ductility.

ENGALOY 238.
M-686; 80 Au, 20 Cu.
Annealed: 67,200 TS; 17 El.
For brazing electronic components.
M.P. 1630°F. Eutectic alloy. Good wetability and ductility.

ENGALOY 241.
M-686; 50 Au, 50 Cu.
Annealed wire: 77,800 TS; 32 El.
For brazing filler metal for electronic applications.
M.P. 950-975°C.

ENGALOY 242.
M-686; 37.5 Au, 62 5 Cu.
Annealed. 53,400 TS, 35 El.
For brazing electronic components.
M.P. 1814-1859°F.
Good wetability and ductility.

ENGALOY 243.
M-686; 35 Au, 62 Cu, 3 Ni.
Annealed: 93,700 TS; 9 El
For brazing electronic components.
M P 1787-1886°F. Good wetability and ductility

ENGALOY 255.
M-686, 82 Au, 18 Ni.
Annealed 100,800 TS; 5 El.
For brazing electronic components
M P. 1742°F. Eutectic alloy Good wetability and ductility

ENGALOY 259.
M-686; 94 Au, 6 Cu.
Annealed wire: 39,600 TS; 31 El.
For brazing filler metal for electronic applications
M P. 965-990°C.

ENGALOY 260.
M-686; 35 Au, 65 Cu
Annealed: 53,900 TS; 40 El.
For brazing electronic components.
M P 1832-1870°F. Good wetability.

ENGALOY 261
M-686; 75 Au, 5 Ag, 20 Cu.
Annealed wire: 78,900 TS, 36 El.
Uses: Brazing alloy for electronic components
M.P. 1625-1640°F. Good wetability and ductility.

ENGALOY 265.
M-686, 72 Au, 22 Ni, 6 Cr.
Uses: Brazing alloy for electronic components.
M P. 1785-1835°F.
Good wetability and ductility.

ENGALOY 269.
M-686; 81.5 Au, 15.5 Cu, 3 Ni
Annealed: Wire 90,000 TS; 25 El.
For brazing filler metal for electronic applications.
M.P 900-910°C.

ENGALOY 428.
M-686; 5 Pd, 95 Ag.
Annealed wire. 31,500 TS; 28 El
Uses. Brazing alloy for electronic components.
M.P. 1780-1850°F.
Good wetability and ductility.

ENGALOY 431.
M-686; 10 Pd, 90 Ag.
Annealed wire: 31,600 TS; 44 El
For brazing alloy for electronic components
M.P. 1835-1950°F.
Good wetability and ductility.

ENGALOY 440.
M-686; 20 Pd, 75 Ag, 5 Mn.
Shear strength of 19,000 at 1250°F and 14,000 at 1500°F.
For brazing electronic components.
M.P. 1830-2050°F. Good wetability.

ENGALOY 441.
M-686; 33 Pd, 64 Ag, 3 Mn.
Shear strength of 27,000 at 1250°F and 18,000 at 1500°F
For brazing electronic components.
M.P. 2100-2190°F. Good wetability.

ENGALOY 447
M-686, 20 Pd, 80 Ag.
Annealed wire: 39,000 TS, 34 El
For brazing alloy for electronic components.
M.P. 1960-2150°F.
Good wetability and ductility

ENGALOY 478.
M-686; 5 Pd, 68 Ag, 27 Cu
Annealed wire. 65,100 TS, 23 El.
For brazing alloy for electronic components.
M.P 1480-1490°F
Good wetability and ductility.

ENGALOY 485
M-686, 30 Pd, 70 Ag.
Uses: Brazing alloy for electronic components.
M.P. 2120-2250°F. Good wetability and ductility.

ENGALOY 490
M-686, 15 Pd, 65 Ag, 20 Cu
Annealed wire 68,300 TS, 20 El
Uses. Brazing alloy for electronic components
M P Brazing alloy for electronic components
M.P. 1565-1650°F
Good wetability and ductility.

ENGALOY 491
M-686, 10 Pd, 58 Ag, 32 Cu
Annealed wire 69,500 TS, 22 El
Uses. Brazing alloy for electronic components.
M.P. 1520-1565°F
Good wetability and ductility.

ENGALOY 492.
M-686, 25 Pd, 54 Ag, 21 Cu
Annealed wire 73,000 TS, 15 El.
Uses Brazing alloy for electronic components.
M P 1650-1740°F.
Good wetability and ductility.

ENGALOY 493
M 686, 20 Pd, 52 Ag, 28 Cu
Annealed wire 71,700 TS, 25 El.
Uses Brazing alloy for electronic components.
M P 1615-1650°F Good wetability and ductility

ENGALOY 845.
M-686; 84.6 Ag, 7.5 Cu, 2 2 Pb, 5.5 In, 0 2 Li.
For brazing electronic components.
M P. 1400-1615°F
Good wetability and ductility.

ENGALOY EI 14597.
M-686, 55 Cu, 20 Pd, 15 Ni, 10 Mn.
Shear strength: 27,000 at 1000°F, 21,000 at 1250°F and 18,000 at 1500°F
For brazing electronic components
M.P. 1940-2020°F.
Good wetability and ductility.

ENGELHARD ALLOY NO 18
M-18; 75 Pt, 25 Ir.
For thermocouple wire, magnetos, electrical contacts, thermostats, lab. ware, surgical tools, voltage regulators, potentiometer wire, jewelry.

ENGELHARD ALLOY NO 26.
M-18; 70 Pt, 30 Ir.
For thermocouple wire, magnetos, electrical contacts, thermostats, lab. ware, surgical tools, voltage regulators, potentiometer wire, jewelry.

ENGELHARD ALLOY NO 109.
M-18, 90 Pt, 10 Ir
For thermocouple wire, magnetos, electrical contacts, thermostats, lab ware, surgical tools, voltage regulators, potentiometer wire, jewelry.

ENGELHARD ALLOY NO 141.
M-18; 6 Pt, 69 Au, 25 Ag.
For electrical contacts

ENGELHARD ALLOY NO 158.
M-18, 85 Pt, 15 Ir
For thermocouple wire, magnetos, electrical contacts, thermostats, lab ware, surgical tools, voltage regulators, potentiometer wire, jewelry.

ENGELHARD ALLOY NO 190
M-18, 3 Pt, 97 Ag
For electrical contacts

ENGELHARD ALLOY NO 208
M-18; 80 Pt, 20 Ir
For thermocouple wire, magnetos, electrical contacts, thermostats, lab ware, surgical tools, voltage regulators, potentiometer wire, jewelry.

ENGELHARD ALLOY NO 349
M-18; 75 Pd, 25 Ag
For hydrogen purification

ENGELHARD ALLOY NO 430
M-18, 95 Pt, 5 Ru
For contact material, resistance wire, jewelry

ENGELHARD ALLOY NO 661
M-18, 60 Pd, 40 Cu
For sliding contacts and slip rings

ENGELHARD ALLOY NO 1453
M 18, 50 Pd, 50 Ag
Dental material

ENGELHARD ALLOY NO 1560.
M-18, 10 Pt, 35 Pd, 10 Au, 30 Ag, 14 Cu, 1 Zn
For electrical contacts.

ENGELHARD ALLOY 1751
M 18; 23.2 Co, 76.8 Pt
Bar: C 26 Rock; 9,500,000 (BH) max, 6450 Br, 4300 Hc, 3770 Bo
For permanent magnets in watches, electrical and magnetic instruments
Ductile, high coercive force

ENGELHARD ALLOY NO 1990
M-18, 40 Pd, 60 Au.
For thermocouples, resistance wire.

ENGELHARD ALLOY NO 2006
M-18, 100% Ag
For solder, electrical contacts, chemical processing equipment

ENGELHARD ALLOY NO 2246.
M-18; 90 Pt, 5 Pd, 5 Rh
For nitric acid catalyst.

ENGELHARD ALLOY NO 2576.
M-18, 30 Pt, 70 Au.
For spinnerettes.

ENGELHARD ALLOY NO 3004.
M-18, 100% Au
For chemical equipment.

ENGELHARD ALLOY NO 3947.
M-18; 75 Au, 12 Ag, 13 Cu.
18 K gold jewelry.

ENGELHARD ALLOY NO 4
M-18; 100% Ir.
For crucibles, spark plug electro
temperature apparatus.

ENGELHARD 4556
M-237, M-1036; 1.7 Mg, bal Ag
Annealed: 46,000 TS; 15 El, Rock (30T)
Cold Drawn: 62,000 TS, 5 El; Rock (30T) 6
For secondary emitter in television camera tubes.
Elect. cond. 35 annealed, 32 cold rolled

ENGELHARD ALLOY NO 5009.
M-18, 100% Os
Alloying element for: pen nibs, record player needles, electrical contacts and instrument pivots

ENGELHARD ALLOY NO 5033
M-18, 75 Au, 18.5 Ni, 1 Cu, 5.5 Zn
18 K white gold jewelry

ENGELHARD ALLOY NO 5124
M-18, 4 Pt, 26 Pd, 25 Au, 28 Ag, 16 Cu, 1 Zn.
Dental material.

ENGELHARD ALLOY NO 5330.
M-18, 13.95 Pt, 83 Pd, 3.05 Au
For thermocouple wire

ENGELHARD ALLOY NO 5355
M-18, 31.4 Pt, 55 Pd, 13.6 Au
For thermocouple wire.

ENGELHARD ALLOY NO 6007
M 18, 100% Pd
For telephone relay contacts

ENGELHARD ALLOY NO 6031
M-18, 92 Pt, 8 W.
For spark plug electrodes, electrical contacts, strain gages

ENGELHARD ALLOY NO 6346
M 18, 56.25 Au, 24.96 Cu, 12.64 Ni, 6.15 Zn
14 K jewelry alloy

ENGELHARD ALLOY NO 6361.
M-18; 56.25 Au, 8.75 Ag, 30.63 Cu, 4.37 Zn
14 K jewelry alloy

ENGELHARD ALLOY NO 6395
M-18, 97 Pt, 3 Ru
For contact material, resistance wire, jewelry

ENGELHARD ALLOY NO 6429
M-18, 72.9 Au, 16.1 Ag, 11 Cu
For electrical contacts

ENGELHARD ALLOY NO 6551
M-18, 85 Pt, 15 Ni.
For cathode emitter wire.

ENGELHARD ALLOY NO 7005
M 18, 100% Rh
For plated reflectors, sliding electrical contact plate, jewelry plate

ENGELHARD ALLOY NO 7070
M-18, 95 Pt, 5 Au.
For electrical ribbon, spinnerettes, brazing wire, lab ware

ENGELHARD ALLOY NO 7146.
M-18; 70 Pt, 30 Rh.
For thermocouples, resistance heaters, spinnerettes, glass manufacturing, nitric acid catalyst.

ENGELHARD ALLOY NO 7450
M-18; 95 Pt, 5 Rh
For thermocouples, resistance heaters, spinnerettes, glass manufacturing, nitric acid catalyst.

ENGELHARD ALLOY NO 7500, 7526, 7542.
M-18; 90 Pt, 10 Rh.
For thermocouples, resistance heaters, spinnerettes, glass manufacturing, nitric acid catalyst.

ENGELHARD ALLOY NO 7609; 11,775.
M-18; 80 Pt, 20 Rh.
For thermocouples, resistance heaters, spinnerettes, glass manufacturing, nitric acid catalyst.

ENGELHARD ALLOY NO 7658.
M-18; 91 Pt, 9 W.
For spark plug electrodes, electrical contacts, strain gages.

ENGELHARD ALLOY NO 7674.
M-18; 34.95 Pd, 65.05 Au.
For thermocouple wire.

ENGELHARD ALLOY NO 7872.
M-18; 90 Pt, 10 Ru.
For contact material, resistance wire, jewelry.

ENGELHARD ALLOY NO 8003.
M-18; 100% Ru.
Hardener for Pt and Pd; alloyed with 90% Pt for aircraft magneto contacts.

ENGELHARD ALLOY NO 8227.
M-18; 75 Au, 22 Ag, 3 Ni.
For thermostats

ENGELHARD ALLOY NO 8318.
M-18; 92 Pd, 8 W.
Potentiometer resistor wire

ENGELHARD ALLOY NO 8383.
M-18; 60 Pt, 40 Rh.
For thermocouples, resistance heaters, spinnerettes, glass manufacturing, nitric acid catalyst.

ENGELHARD ALLOY NO 8391.
M-18; 95.5 Pd, 4.5 Ru
For electrical contacts, jewelry

ENGELHARD ALLOY NO 8904.
M-18, 96 Pt, 4 Ru.
For contact material, resistance wire, jewelry.

ENGELHARD ALLOY NO 8938.
M-18; 94 Pt, 6 Ru.
For contact material, resistance wire, jewelry.

ENGELHARD ALLOY NO 8961.
M-18, 87 Pt, 13 Rh.
For thermocouples, resistance heaters, spinnerettes, glass manufacturing, nitric acid catalyst

ENGELHARD ALLOY NO 8987.
M-18; 93.5 Pd, 6.5 Ru.
For resistor wire, white jewelry alloy.

ENGELHARD ALLOY NO 9001.
M-18; 100% Pt.
For electrical contacts, thermocouples, resistance thermometers, metal to glass seals, lab. ware, cathodic protection.

ENGELHARD 15065.
M-237; M-1036; 0.2 Mg, 0.20 Ni, bal Ag.
Annealed: 32,000-38,000 TS; 12-27 El; 75 Knoop Hard.
Hardened: 68,000-74,000 TS; 2-6 El; 169 Knoop Hard.
For springs, switches, relays.
Oxidation hardened. Good spring properties. 75% elec. cond. as hardened.

ENGELHARD 16527.
M-237, M-1036; 0.15 Mg, 0.20 Ni, bal Ag.
Annealed: 28,000-34,000 TS; 20-38 El; 82 Knoop.
Hardened: 58,000-64,000 TS; 9-16 El; 143 Knoop.
For springs, switches.
Oxidation hardened.
75% elec. cond. as hardened.

ENGELHARD ALLOY NO 17632.
M-18; 8.5 Pt, 72.5 Au, 4.75 Ag, 14 Cu, 0.25 Zn.
For electrical contacts.

ENGELHARD ALLOY NO 19182.
M-18; 77.7 Pt, 22.3 Co.
For magnets.

ENGINEERING.
M-472; 0.18-0.25 C, 12-14 Cr, bal Fe.
Heat treated. 100,000-200,000 TS; 8-20 El; 201-460 Brin.
For hydraulic and steam equipment, valves, valve seats, corrosion resistant; Type 420.

ENGLISH-1
Eng.; 61.3 Cu, 19.1 Zn, 19.1 Ni.
For knives, forks, etc for silver plating; nickel silver.

ENGLISH-2.
Eng ; 70.3 Cu, 29.3 Zn, 0.17 Sn, 0.26 Pb.
For hardware; free-cutting.

ENGLISH ALLOY
Eng.; 53 Sn, 33 Pb, 11 Sb, 2.4 Cu, 1 Zn.
For bearings, bushings, Babbitt.

ENGLISH B.M.
England, 80 Zn, 14.5 Sn, 5.5 Cu.
For bearings; will not resist heat or live steam.

ENGLISH BRASS
Eng.; 70 Cu, 29 Zn, 0.3 Pb, 0.2 Sn
For hardware, novelties; free-cutting

ENGLISH GERMAN SILVER
Eng ; 59.4 Cu, 25 Zn, 13 Ni, 3 Fe.
For ornamental parts, corrosion resistant

ENGLISH LINOTYPE.
Eng.; 83 Pb, 5 Sn, 12 Sb.
For type metal for linotype machines

ENGLISH PENNY BRONZE
England; 3 Sn, 1.5 Zn, bal Cu
For springs, corrosion resistant.

ENGLISH PEWTER.
Eng.; 81.2 Sn, 5.7 Sb, 1.6 Cu, 11.5 Pb.
For bearings, ornaments, household utensils; corrosion resistant.

ENGLISH PHOSPHOR BRONZE.
England; 10 Sn, 9.6 Pb, 1 P, bal Cu.
For bearings, gear wheels; heavy duty

ENGLISH SPECULUM.
Eng.; 67 Cu, 33 Zn.
For deep drawing, spinning, stamping; high ductility.

ENGLISH STEREOTYPE (STANDARD).
Eng , 82.5 Pb, 4.5 Sn, 13 Sb.
For type metal.

ENGLISH TYPE METAL (A).
Eng.; 63.2 Pb, 12 Sn, 24 Sb, 0.8 Cu
For type metal.

ENGLISH TYPE METAL (B).
Eng.; 60.5 Pb, 14.5 Sn, 24.2 Sb, 0.8 Cu.
For type metal.

ENGLISH TYPE METAL "D."
Eng.; 58 Pb, 15 Sn, 26 Sb, 1.0 Cu.
For type metal.

ENGLISH TYPE METAL "E."
Eng.; 77.5 Pb, 6.5 Sn, 16 Sb.
For type metal.

ENGLISH TYPE METAL OLD "C."
Eng.; 69.2 Pb, 9.1 Sn, 19.5 Sb, 1.7 Cu.
For type metal.

ENGRAVER PLATE.
M-38; 0.35 C, bal Fe.
For engraver's plates.

ENGRAVER'S BRASS.
U.S.; 66 Cu, 33 Zn, 1 Pb.
For engravings; free-cutting.

ENGRAVER'S BRASS.
M-102; 62.5-64.5 Cu, 1.5-2.5 Pb, bal Zn.
Annealed: 45,000 TS; 50 El.
Hard: 73,000 TS; 7 El.
For gears, watch and clock backs; free cutting.

ENGRAVERS BRASS 63.
M-141; 65.5 Cu, 33.4 Zn, 1.1 Pb.
Hard: 74,000 TS; 60,000 YS; 7 El; 150 Brin.
Soft: 49,000 TS; 17,000 YS; 54 El; 61 Brin.
For engraved items, dials; brass.

"E" NICKEL replaced by **NICKEL 212.**

ENORM S.
M-1339; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, drills, reamers; high speed steel.

ENTECROD 192
M-717; Cd, Ag alloy.
Cast. 11,000 TS
For solder, hard, 650-700°F bonding temperature.

EPCO-OIL HARD
M-781; 1.0 C, 0.5 Cr, 1.0 Mn, 0.5 W, bal Fe.
For dies, gauges, master tools, non-deforming.

EPCO-WATER HARD.
M-781; 1.05 C, 0.25 Mn, bal Fe.
For blanking forming, and trimming dies; water hardened

ERA 59.
M-62, 0.25-0.40 C, 1.3-1.8 Mn, 0.20-0.35 Mo, bal Fe
Bar. 100,000-145,000 TS; 72,000-112,000 YS, 16-22% El; 201-341 Brin.
For gears, crankshafts, fasteners, bolts
Water harden, shock resistant

ERA 60 M
M-62; 0.18 C, 0.05-0.35 Si, 1.1-1.5 Mn, 0.10-0.18 S, 0.05 max P, bal Fe.
Bar: 90,000 TS, 20 El, 52,000 YS; 190 Brin.
Annealed. 62,000 TS; 40,000 YS; 32 El, 121 Brin
Heat treated: 102,000 TS, 74,000 YS, 26 El; 269 Brin.
For gears, bolts, cams, camshafts, bushings, clips, jaws, fasteners.
SAE 1118 case hardening steel. Free-cutting, shock resistant.

ERA 131.
M-62; C, Mo, Cr, Cu, bal Fe.
For tubes for steam turbines; creep resistant.

ERA 156.
M-62, 0.30-0.40 C, 1.3-1.8 Mn, 0.35-0.55 Mo, bal Fe.
Bar: 100,000-145,000 TS; 72,000-112,000 YS; 16-22% El; 201-341 Brin
For gears, shafts, axles, bolts, crankshafts, countershafts
Oil hardening, shock resisting.

ERA 165.
M-62; 0.15-0.25 C, 1.4-1.8 Mn, 0.4-0.7 Ni, 0.15-0.35 Mo, bal Fe.
Bar: 90,000 TS; 60,000 YS; 22% El; 200 Brin.
For gears, bolts, fasteners, shafts.
Oil or water harden.

ERA 171.
M-62; 0.30-0.50 C, 2.5-3.5 Cr, 0.40 max Ni, 0.70-1.20 Mo, 0.10-0.30 V, bal Fe.
Oil hardened: 190,000 TS; 152,000 YS; 10% El.
For gears, bolts, cams, camshafts, rolls.
Nitriding steel, wear and abrasion resistant.

ERA 1414.
M-62; C, 14 Cr, 14 Ni, W, bal Fe.
For exhaust valves; heat resistant.

ERA 7393.
M-62; C, 18 Cr, 8 Ni, Mo, W, Ti, bal Fe.
For gas turbine rotors, blades; heat resistant.

ERA 16356 see **ERA H R 7.**

E.R.A. "A.T.V."
Eng.; 13.4 Cr, 22.6 Ni, 3.3 W, 1.5 Mn, 1.8 Si, bal Fe.
For heat and corrosion resisting parts; stainless and corrosion resistant.

ERA A.T.V
M-62, 0.3 C, 14 Cr, 28 Ni, 4 W, 1.5 Mn, 1.8 Si, bal Fe.
108,000 TS; 60,000 YS; 25 El; 45 RA.
For high duty I.C. engine valves, supercharger rotors; heat resisting.

ERA BORON 1.
M-62; 0.10 C, 0.5 Si, 0.3 Mn, 1.0 B, bal Fe.
For nuclear reactors; for neutron absorption

ERA BORON 2.
M-62, 0.10 C, 0.5 Si, 0.3 Mn, 2.0 B, bal Fe.
For nuclear reactors; for neutron absorption.

ERA BORON 3
M-62, 0.10 C, 0.5 Si, 0.3 Mn, 3.0 B, bal Fe
For nuclear reactors, for neutron absorption.

ERA BORON 4
M-62, 0.10 C, 0.5 Si, 0.3 Mn, 4.0 B, bal Fe.
For nuclear reactors; for neutron absorption.

ERA C R 2.
M-62; C, 20 Cr, 8 Ni, Cu, W, bal Fe.
For impellers, castings; stainless

ERA C R 3
M-62, C, 10 Cr, 20 Ni, Cu, W, bal Fe.
For stainless parts, corrosion resistant.

ERA CR4
M-62, 0.10 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed. 95,000 TS, 45,000 YS; 50 El; 60 RA, 190 Brin.
For acid resistant parts, chemical plant equipment; Type 316, stainless, austenitic

ERA CR4S
M-62; 0.10 C, 18 Cr, 9 Ni, 2 Mo, Ti, bal Fe.
Annealed. 95,000 TS; 45,000 YS; 50 El; 60 RA, 190 Brin
For chemical plant equipment; Type 316Ti, stainless, austenitic.

ERA C R BORON.
M-62; 0.08 C, 0.5 Si, 0.3 Mn, 2-4 B, 18 Cr, 10 Ni, bal Fe.
For nuclear reactors; for neutron absorption

ERA C.R I.
M-62, 0.1 C, 18 Cr, 8 Ni, 0.5-1.5 Mn, bal Fe.
88,000-132,000 TS, 66,000-88,000 YS; 75-37 El; 150-230 Brin
For domestic utensils, fittings, chemical plant equipment; corrosion resistant; austenitic

ERA C R.I.L.
M-62; 0.08 C, 18 Cr, 8 Ni, bal Fe.
For chemical equipment; austenitic, stainless.

ERA C.R.I.S.
M-62; 0.1 C, 18 Cr, 8 Ni, 0.1 Ti, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El; 60 RA; 175 Brin.
For chemical equipment, welded structures; Type 321; austenitic, stainless.

ERA C.R.I.S. (Cb).
M-62; C, 18 Cr, 8 Ni, Cb, bal Fe.
For stainless equipment to be welded; stabilized.

ERA H.R.-1.
M-62; 22 Cr, 0.7 Ni, 0.2 Si, 0.4 W, 0.2 C, bal Fe.
At 20°C: 130,000 TS; 85,000 YS; 37 El, 37 RA; 200 Brin.
At 700°C: 69,000 TS, 35 El, 57 RA.
At 1000°C: 45,000 TS; 30 El; 64 RA.
For engine valves, crucibles, furnace conveyors, dredger parts, carburizing boxes,
corrosion resisting, stainless; range of alloys.

ERA HR2.
M-62; 0.25 C, 21 Cr, 7 Ni, 1.5 Si, bal Fe.
Annealed: 85,000 TS; 42,000 YS; 45 El; 60 RA; 180 Brin.
For furnace parts, heat treat boxes,
heat and corrosion resistant.

ERA HR3
M-62; 0.2 max C, 25 Cr, 20 Ni, bal Fe.
Annealed: 95,000 TS, 45,000 YS; 50 El; 65 RA; 180 Brin.
For furnace parts, heat treat boxes,
engine components; Type 310, austenitic,
heat resistant.

ERA H.R 4.
M-62; C, 28 Cr, bal Fe.
For heat resistant castings, resists scaling to 1150°C.

ERA H.R. 5.
M-62, C, 12 Cr, 60 Ni, bal Fe.
For high temperature equipment, heat resistant.

ERA H.R. 6
M-62; C, 25 Cr, 12 Ni, bal Fe.
For furnace parts, heat resistant to 1050°C in S atm.

ERA HR7.
M-62; 0.3 C, 15 Cr, 35 Ni, bal Fe.
Cast: 70,000 TS; 40,000 YP; 10 El, 170 Brin.
At 1600°F; 22,000 TS; 28 El; 36 RA.
For carburizing boxes, trays, furnace parts, grills.
Oxidation and heat resistant

ERA H.R.I.S
M-62; 21 Cr, 7 Ni, 3.5 Si, bal Fe.
For heat resistant castings; heat resistant.

"ERA" MANGANESE STEEL.
M-62; 1.25 C, 11-14 Mn, bal Fe
85,000-100,000 TS; 60-80 El.
For crushers, dredging machines, soldiers helmets; wear resisting; non-magnetic.

ERAYDO.
M-226, M-240; 1-3 Cu, 0.03-0.1 Ag, bal Zn.
Rolled: 30,000-50,000 TS; 12,000-22,000 YS; 40-15 El.
For panels, indoor trim, electrical appliances, drawn cases; rustless, non-magnetic.

ERCO.
M-1425; 0.8 C, bal Fe.
For dies to resist alternate heating and cooling; water hardened.

ERFTAL.
Germany; 0.04 Fe, 99.9 Al.
For reflectors; a high gloss mill aluminum.

ERGAL 55.
M-541; M-1220; M-1283; 5.8 Zn, 2.5 Mg, 1.6 Cu, 0.2 Mn, 0.15 Cr, 0.08 Ti, bal Al.
TA-Temper: 90,000 TS; 80,000 YS; 6 El; 160 Brin.
For cast aircraft components, hardware.
Self-aging, high strength cast alloy.

ERGAL 60.
M-1220, M-1283, 6.8 Zn, 2.5 Mg, 1.6 Cu, 0.1 Ti, 0.2 Mn, 0.15 Cr, bal Al.
Cast.
For aircraft castings; self-aging.

ERGAL 65.
M-541, M-1220, M-1283; 7.8 Zn, 2.5 Mg, 1.6 Cu, 0.2 Mn, 0.15 Cr, 0.1 Ti, bal Al.
TA-Temper: 82,000-96,000 TS; 72,000-85,000 YS; 4-9 El; 150-180 Brin
For cast aircraft components.
Self-aging, high strength cast alloy.

ERGALPLAT 65
M-541; 1.5-1.7 Cu, 2.5 Mg, 0.2 Mn, 8 Zn, bal Al.
R-Temper: 27,000-37,000 TS, 23,000 YS, 8-20 El.
TA-Temper: 80,000-94,000 TS; 71,000-85,000 YS; 4-14 El.
For aircraft constructional parts; self-aging
Heat and corrosion resistant.
High strength and fatigue resistant

ERGES 4.
M-1368; 0.6-1.4 Mg, 0-1.6 Si, 0.6-1.0 Mn, 0-0.3 Cr, bal Al.
For chemical equipment, corrosion resistant

ERGSTE 13
M-1333, 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El, 70 RA; 155 Brin
Cold drawn: 100,000 TS, 85,000 YS, 17 El; 60 RA; 205 Brin
For turbine blades, valve trim, chemical plant equipment, Type 410; corrosion resistant.

ERGSTE 17.
M-1333; 0.8 C, 17 Cr, bal Fe.
Annealed 107,000 TS, 62,000 YS, 18 El, 35 RA, 220 Brin
Heat treated: 280,000 TS; 270,000 YS, 3 El; 15 RA, 555 Brin.
For bearings, valves, surgical instruments;
Type 440B, corrosion resistant, hardenable

ERGSTE 17L.
M-1333; 0.10 C, 17 Cr, 2 Mo, bal Fe
Annealed. 125,000 TS, 95,000 YS; 20 El, 55 RA; 260 Brin.
For chemical plant equipment, corrosion resistant.

ERGSTE 17LT.
M-1333, 0.1 max C, 17 Cr, 1.8 Mo, Ti = 7 × C, bal Fe
Annealed 130,000 TS, 98,000 YS, 20 El; 53 RA, 260 Brin
For chemical plant welded structures;
corrosion resistant, stabilized

ERGSTE 17T.
M-1333; 0.1 max C, 17.5 Cr, Ti = 7 × C, bal Fe
Annealed: 130,000 TS; 98,000 YS; 20 El; 53 RA; 260 Brin
For chemical plant welded equipment;
corrosion resistant, stabilized.

ERGSTE 17U.
M-1333; 0.12 max C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 160 Brin.
For screw machine products, chemical plant equipment; Type 430F; corrosion resistant.

ERGSTE 25L.
M-1333; 0.15 C, 16 Cr, 0.2 Mo, 0.2 S, bal Fe.
Annealed: 80,000 TS; 50,000 YS;
25 El; 50 RA; 160 Brin.
For screw machine products, chemical plant equipment; Type 430F; corrosion resistant.

ERGSTE 80K.
M-1333; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA;
150 Brin.
For chemical plant equipment, tanks;
Type 302; stainless, austenitic.

ERGSTE 80P.
M-1333, 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 60 El; 70 RA;
150 Brin.
Cold drawn: 180,000 TS; 125,000 YS; 10 El;
330 Brin.
For chemical plant equipment, welded tanks, mixers;
Type 304, stainless, austenitic.

ERGSTE 80S.
M-1333; 0.1 max C, 18 Cr, 8.5 Ni, bal Fe
Annealed: 85,000 TS; 35,000 YS, 60 El; 70 RA,
150 Brin.
Cold drawn: 180,000 TS; 125,000 YS, 10 El,
330 Brin
For chemical plant equipment, welded tanks, mixers,
Type 304, stainless, austenitic.

ERGSTE 80T.
M 1333, 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C,
bal Fe.
Annealed 85,000 TS, 35,000 YS; 55 El,
65 RA, 150 Brin.
Cold drawn 95,000 TS; 60,000 YS; 40 El; 60 RA;
185 Brin
For welded structures, chemical plant equipment;
Type 321, stainless, austenitic.

ERGSTE 80U.
M-1333, 0.12 C, 8.5 Ni, 18 Cr, bal Fe
Annealed: 80,000 TS; 35,000 YS; 55 El, 75 RA;
150 Brin.
For chemical plant equipment, fasteners,
Type 302, stainless, austenitic

ERGSTE 80X.
M-1333; 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C,
bal Fe
Annealed 90,000 TS, 35,000 YS, 56 El,
65 RA; 160 Brin.
Cold drawn. 100,000 TS, 65,000 YS; 40 El; 60 RA,
202 Brin
For welded structures, chemical plant equipment;
Type 347, stainless, austenitic

ERGSTE 82P.
M-1333; 0.07 max C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe
Annealed. 80,000 TS; 35,000 YS; 55 El;
70 RA; 150 Brin.
Cold drawn: 140,000 TS, 130,000 YS; 7 El;
280 Brin.
For acid resistant equipment, mixers, agitators;
Type 316L; stainless, austenitic.

ERGSTE 82RT.
M-1333; 0.05 C, 18 Cr, 10 Ni, Cu, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El, 70 RA;
150 Brin.
For chemical plant equipment; stainless, austenitic.

ERGSTE 82S.
M-1333; 0.1 max C, 18 Cr, 9.5 Ni, 2 Mo, bal Fe
Annealed: 85,000 TS; 35,000 YS;
50 El; 65 RA; 160 Brin.
Cold drawn: 150,000 TS; 135,000 YS; 6 El;
300 Brin.
For acid resistant equipment, mixers, agitators;
Type 316; stainless, austenitic.

ERGSTE 82T.
M-1333; 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo,
Ti × 4 = C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA;
160 Brin.
Cold drawn: 150,000 TS; 135,000 YS; 6 El;
300 Brin.
For welded acid resistant equipment; Type 316Ti;
stainless, austenitic.

ERGSTE 82X.
M-1333; 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo,
Cb = 8 × C, bal Fe
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA;
160 Brin
Cold drawn: 150,000 TS; 135,000 YS, 6 El,
300 Brin.
For welded acid resistant equipment;
Type 316Cb; stainless, austenitic.

ERGSTE 120.
M-1333; 0.10 max C, 12.5 Cr, 13 Ni, bal Fe
For chemical plant equipment, corrosion resistant

ERGSTE 135P.
M 1333; 0.07 C, 17 Cr, 13 Ni, 2 Mo, bal Fe
Annealed: 85,000 TS; 35,000 YS, 50 El,
65 RA; 160 Brin.
Cold drawn: 150,000 TS; 135,000 YS,
6 El; 300 Brin
For acid resistant equipment, mixers, agitators;
Type 316; stainless, austenitic.

ERGSTE 182RT
M-1333; 0.07 max C, 17.5 Cr, 17.5 Ni, 2 Mo, 2 Cu,
Ti = 7 × C, bal Fe.
Annealed 85,000 TS; 35,000 YS; 50 El, 65 RA;
160 Brin
For welded acid resistant, equipment, tanks, mixers,
stainless, austenitic, stabilized.

ERGSTE CN20.
M-1333, 0.13 C, Cr, Mo, bal Fe
For gears, cams, camshafts; case hardening, tough.

ERGSTE CN30.
M-1333; 0.15 C, Ni, Cr, bal Fe.
For gears, bolts, machine tool parts;
case hardening, tough

ERGSTE CN60
M-1333, 0.15 C, Ni, Cr, bal Fe.
For gears, bolts, machine tool parts; case hardened,
shock resistant.

ERGSTE CN80.
M-1333; 0.15 C, Ni, Cr, bal Fe.
For gears, bolts, machine tool parts,
case hardened, shock resistant.

ERGSTE E110S.
M-1333; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS, 58,000 YS; 18 El; 40 RA;
210 Brin.
For springs, tools, drills, taps, reamers;
Type W1; water hardened.

ERGSTE ESCV110.
M-1333, 1.15 C, 0.65 Cr, 0.1 V, 0.3 Mn, bal Fe.
For bearings, bushings, cutters; oil hardened, tough.

ERGSTE ESWV.
M-1333; 1.2 C, 0.20 Cr, 0.1 V, 1.0 W, bal Fe.
For forming dies, shears; oil hardened.

ERGSTE K13.
M-1333; 0.13 C, 0.3-0.5 Si, 0.25-0.50 Mn, bal Fe.
Annealed: 70,000 TS, 40,000 YS; 25 El;
60 RA; 145 Brin.
For gears, bolts, machine tool parts;
case hardening steel.

ERGSTE K20.
M-1333; 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For cutlery, valves, turbine blades, surgical instruments; Type 420; stainless.

ERGSTE K20L.
M-1333; 0.2 C, 0.4 Si, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For turbine blades, cutlery, valves; Type 420 Mo; stainless.

ERGSTE K20N.
M-1333; 0.22 C, 0.4 Si, 17 Cr, 1.5 Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
For pumps, marine hardware, valves; Type 431; corrosion and heat resistant.

ERGSTE K40.
M-1333; 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For cutlery, valves, surgical instruments; Type 420; stainless.

ERGSTE K90.
M-1333; 0.85 C, Cr, V, bal Fe.
For tools, cutters, drills, taps, broaches; water or oil hardened.

ERGSTE K90L.
M-1333; 0.90 C, Cr, Mo, bal Fe.
For bearings, punches, cutters; water or oil hardened.

ERHARD BRONZE.
German; Zn, Cu, Al.
For ornamental fittings.

ERIE.
M-1705; 1.0 C, 0.35 Mn, 0.2 Si, bal Fe.
Water hardening tool steel. AISI W1.

ERIE NO. 5.
M-1425; 0.7 C, alloy, bal Fe.
For shear blades, punches, blacksmith tools; water hardened.

ERIE AA.
M-1425; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For lathe and planer tools, drills, reamers, taps; high speed steel.

ERIE EXTRA.
M-1705; 1.0 C, 0.35 Mn, 0.2 Si, bal Fe.
Water hardening tool steel. AISI W1.

ERIE RA.
M-1425; 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe.
For tools, drills, lathe and planer cutters; high speed steel.

ERIE SPECIAL.
M-1705; 1.0 C, 0.35 Mn, 0.2 Si, bal Fe.
Water hardening tool steel. AISI W1.

ERK ADG.
M-1336; 2.1 C, 11.5 Cr, 0.3 Mn, bal Fe.
For blanking and forming dies, gauges; oil hardened, non-deforming.

ERKENZWEIG BRA.
M-1336; 0.20 C, 0.40 Si, 0.3 Mn, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
For turbine blades, valves, cutlery, dental instruments; Type 420; stainless.

ERKENZWEIG EX.
M-1336; 1.4 C, 0.30 Cr, 0.10 V, 0.30 Mn, bal Fe.
For forming dies, engraving tools, cutters; water hardened, wear resistant.

ERKENZWEIG EXTRA BEST MH.
M-1336; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 58,000 YS; 20 El; 40 RA; 210 Brin.
For springs, tools, cutters, drills, broaches; Type W1; water hardened.

ERKENZWEIG EXTRA BEST Z.
M-1336; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For punches, drills, taps, reamers, cutters; Type W1; water hardened.

ERKENZWEIG EXTRA BEST ZH.
M-1336; 1.0 C, 0.25 max Mn, 0.25 max Si, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, taps, drills, cutters; Type W1; water hardened.

ERKENZWEIG HB.
M-1336; 1.4 C, 0.30 Cr, 0.1 V, bal Fe.
For header dies, cutters, bearings, oil hardened, tough.

ERKENZWEIG KM45.
M-1336; 0.50 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, pinions, crankshafts, forging dies; oil hardened, shock resistant.

ERKENZWEIG KWB.
M-1336; 1.05 C, 1.0 Cr, 1.15 W, 0.90 Mn, bal Fe.
For cutters, shears, header dies; oil hardened, tough.

ERKENZWEIG NH.
M-1336; 0.95 C, W, Mo, Cr, bal Fe.
For lathe and planer tools, drills; high speed steel.

ERKENZWEIG NHA.
M-1336, 1.35 C, W, Co, Cr, V, bal Fe.
For engravers' tools, forming and blanking dies; high speed steel.

ERKENZWEIG NHB.
M-1336; 0.79 C, 4.75 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, broaches, reamers, drills; high speed steel.

ERKENZWEIG NHC.
M-1336, 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel

ERKENZWEIG NHE.
M-1336; 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For engravers' tools, blanking and forming dies; high speed steel.

ERKENZWEIG NHH.
M-1336; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

ERKENZWEIG NHPC.
M-1336; 0.86 C, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

ERKENZWEIG NHUC.
M-1336; 0.86 C, 0.85 Mo, 2.5 V, 12 W, 4.1 Cr, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel.

ERKENZWEIG PKU.
M-1336; 1.0 C, 0.1 V, 0.25 Mn, bal Fe.
Heat treated: 200,000 TS; 130,000 YS; 8 El; 25 RA; 400 Brin.
For reamers, drills, drawing and forming dies; oil or water hardened, wear resistant.

ERKENZWEIG PLDI.
M-1336; 0.55 C, 0.18 V, 1.85 W, 0.9 Si, 1.05 Cr, bal Fe
For heading and forging dies, upsetters, punches; oil hardened, tough.

ERKENZWEIG PLD III.
M-1336; 0.35 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For heading and forging dies, upsetters, punches; oil hardened, tough.

ERKENZWEIG PSA.
M-1336; 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe.
For blanking and forming dies, cutters, punches; oil hardened, wear resistant

ERKENZWEIG PSX.
M-1336; 1.4 C, 0.30 Cr, 0.10 V, 0.30 Mn, bal Fe.
For blanking and forming dies, bearings, oil or water hardened.

ERKENZWEIG SPEZIAL K.
M-1336, 2.1 C, 11.5 Cr, 0.30 Mn, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming.

ERKENZWEIG SPWC.
M-1336; 0.30 C, 2.0 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe.
For extrusion rams, dies, liners; oil hardened, hot work steel.

ERKENZWEIG SWK III.
M-1336, 0.67 C, 1.3 Si, 0.5 Mn, 0.5 Cr, bal Fe.
For springs, shear blades, punches, oil hardened, shock resistant.

ERKENZWEIG SWK V.
M-1336 0.45 C, Cr, Ni, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant

ERKENZWEIG SWK VI
M-1336, 2.1 C, 11.5 Cr, 0.70 W, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming.

ERKENZWEIG SWK VII
M-1336, 0.45 C, W, Cr, V, bal Fe
For shear blades, forging and heading dies; oil hardened, tough.

ERKENZWEIG SWK VIII.
M-1336; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion rams, dies and liners; hot work steel, oil hardened.

ERKENZWEIG WCR.
M-1336; 1.42 C, W, V, bal Fe.
For blanking and heading dies; oil hardened, wear resistant.

ERKENZWEIG WNC 40.
M-1336; 0.50 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

ERM 3A.
M-1083; 0.9-1.1 Ni, 0.18-0.25 P, 0.1-0.15 S, bal Cu
Bar: 62,000-78,000 TS; 18-25 El; 150-175 Brin.
For electrical switchgear and resistance welding equipment, electrical contacts.
55-60% electrical conductivity.

ERMAL.
M-51; 2.2-2.4 C, 0.9-1.0 Si, 0.7-0.8 Mn, bal Fe.
Cast: 62,000-67,000 TS; 46,000-48,000 YS; 5-3 El; 5-4 RA; 179-225 Brin.
For brake drums, wrench handles, break levers, bolts, gears; wear and corrosion resisting

ERMALITE.
M-51; 2.4-2.6 total C, 1.6-2.0 graphitic C, 0.6-0.8 combined C, 1.9-2.0 Si, 0.4-0.45 Si, 0.35-0.45 Ni, or Mo, bal Fe.
Cast. 60,000-65,000 TS; 60,000-65,000 YS, 1-2 El; 240-250 Brin.
For brake drums, wear and shock resisting.

ERM ALW.
M-1083; 0.5-0.7 Te, 0.08-0.12 Ni, bal Cu.
Bar: 38,000-45,000 TS; 15-18 El; 95-110 Brin.
For spot and seam welding of aluminum alloys.
High conductivity resistance welding electrode.

ERMANN METAL.
50 Bi, 25 Sn, 25 Pb.
For low fusion parts; M.P. 93°C

ERM CCS
M-1083; 0.5-0.8 Cr, bal Cu
Bar: 66,000-78,000 TS; 20-30 El; 135-160 Brin
For switchgear and resistance welding equipment, rotor bars.
High electrical conductivity both at room and elevated temperatures

ERM HSM
M-1083; 0.5-0.8 Te, 0.02-0.05 oxygen, bal Cu.
Bar. 37,000-41,000 TS; 14-25 El; 90 Brin
For commutator bars, gas welding nozzles.
95-98% electrical conductivity.

ERM NS.
M-1083; 0.3-0.5 Be, 2.0-2.5 Co, bal Cu.
Bar· 112,000-123,000 TS; 10 El; 240-310 Brinell
For machine parts and resistance welding equipment.
High strength and hardness. Age-hardenable.

ERM SC65
M-1083, 5.5-6.5 Ag, 0.02-0.04 oxygen, bal Cu.
Forged. 63,000-67,000 TS; 12.5 El; 125-150 Brin.
For high duty seam welding electrode.
82-86% conductivity.

ERODUR E 2.
M-1290; 2.0 C, 2.1 Cr, bal Fe
Hardenable to 500-600 Brin.
Castings for wear resistant parts or tools
DIN GS-200CrMn8, Werkstoff Nr 1.2129.

ERODUR E 16 SR
M-1290; 1.6 C, 12.0 Cr, 0.75 Mo, 0.25 V, bal Fe.
Hardenable to 500-600 Brin
Castings for wear resistant parts or tools
DIN G-X160CrMoV12.

ERODUR E 28.
M-1290, 2.7 C, 28.0 Cr, bal Fe
Hardenable to 500-600 Brin.
Castings for wear resistant parts or tools.
DIN G-X270Cr29.

ERODUR E-C1 H.
M-1290; 0.80 C, 1.8 Cr, bal Fe
Hardenable to 400 Brin.
Castings for wear resisting parts or tools.
DIN GS-80Cr7.

ERODUR E-CM 1H.
M-1290; 0.42 C, 1.0 Cr, 0.20 Mo, bal Fe
Cast, heat treated: 118,000-184,000 TS; 100,000-145,000 YS; 9-4 El.
Castings for wear resistant parts or tools.
DIN GS-42CrMo4; Werkstoff Nr. 1.7225.

ERODUR E-VMS.
M-1290; 0.30 C, 1.25 Mn, bal Fe.
Heat treated: 106,000-128,000 TS; 78,000 min YS; 12 min El.
Castings for small wear resisting parts or tools.
DIN GS-30Mn5; Werkstoff Nr. 1.5066.

ERODUR MNA 1.
M-1290; 1.2 C, 13.0 Cr, bal Fe.
Sol. ann. & age: 84,000 min TS; 42,500 min YS; 25 min El.
Austenitic manganese steel casting; work hardens to hard, wear resistant martensite.
DIN G-X120Mn12; Werkstoff 1.3401.

ERODUR MNA 1 U.
M-1290; 1.05 C, 12.0 Mn, bal Fe.
Sol. ann. & age: 84,000 min TS; 42,500 min YS; 25 min El.
Austenitic manganese steel casting; work-hardens to hard, wear resistant martensite.
DIN G-X100Mn12.

ERODUR MNA 2.
M-1290; 1.4 C, 17.0 Mn, 2.25 Cr, bal Fe.
Sol. ann. & age: 100,000 min TS; 57,000 min YS; 15 min El.
Austenitic wear resistant casting.
DIN G-X140MnCr162.

ERZBERG WEICH.
M-1314; 0.35 C, 0.25-0.50 Si, 0.20-0.80 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS, 30 El; 53 RA; 185 Brin.
For gears, bolts, shafts, machine tool parts, water hardened.

ERZBERG ZAH.
M-1314, 0.45 C, 0.25-0.50 Si, 0.20-0.80 Mn, bal Fe
Hot rolled: 98,000 TS; 60,000 YS; 24 El; 45 RA, 215 Brin.
For gears, bolts, shafts, machine tool parts; water hardened.

ERZBERG ZAHHART.
M-1314; 0.60 C, 0.25-0.50 Si, 0.20-0.80 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS, 12 El; 40 RA; 325 Brin.
For gears, axles, rails, shafts, punches; water hardened.

ES3.
M-459; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed. 110,000 TS; 58,000 YS; 18 El; 40 RA; 210 Brin.
For drills, taps, reamers, broaches, Type W1; water hardened.

ES4.
M-459; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, taps, hobs, reamers, springs; Type W1; water hardened.

ES5.
M-459; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, drills, taps, reamers; Type W1; water hardened.

ES6.
M-459; 0.8-1.2 C, 0.25 Si, 0.25 Mn, bal Fe.
Water hardened: 166,000-216,000 TS; 100,000-150,000 YS; 11-15 El; 32-37 RA; 330-600 Brin.
For taps, drills, reamers, punches, stamps, knurls, mandrels.
Type W1 water hardening.

ES-12.
M-1014; 0.15 max C, 11-14 Cr, 0.25-0.45 Mn, bal Fe.
Annealed: 75,000 TS; 48,000 YS; 20 El; 180 Brin.
For corrosion resistant parts, turbine blades; Type 410; magnetic, corrosion resistant.

ES-15-35.
M-1014; 0.15 max C, 17-20 Ni, 34-37 Cr, bal Fe.
Annealed: 80,000 TS; 40,000 YS; 40 El, 150 Brin.
For salt pots, furnace equipment, heat treating boxes; heat resistant, austenitic; Type 330.

ES 17-7.
M-1014; 0.09-0.15 C, 6-8 Ni, 2 max Mn, 16-18 Cr, bal Fe.
Annealed: 100,000 TS; 40,000 YS, 55 El, 80 Rb.
Worked: 185,000 TS; 140,000 YS; 16 El; 43 Rc
For refrigerator and kitchen equipment trim; Type 301; corrosion resistant, non-magnetic.

ES-18-8.
M-1014; 0.09-0.20 C, 2 max Mn, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed. 90,000 TS, 40,000 YS, 55 El, 180 Brin.
For stainless parts, chemical plant equipment, Type 302, austenitic, non-magnetic

ES-18-8 LC.
M-1014, 0.08 max C, 2 max Mn, 18-20 Cr, 8-10 Ni, bal Fe
Annealed: 85,000 TS, 35,000 YS; 60 El, 180 Brin
For stainless parts, chemical plant equipment; austenitic, non-magnetic; Type 304.

ES 18 8Si
M-1014, 0.08-0.15 C, 2-3 Si, 17-19 Cr, 8-10 Ni, bal Fe
Annealed: 95,000 TS; 50,000 YS; 45 El, B90 Brin
For heat resistant parts, furnace equipment, stainless, non-magnetic

ES-18-10 CB
M-1014; 0.10 max C, 2 max Mn, 17-19 Cr, 9-13 Ni, Cb = 8 × C, bal Fe
Annealed. 90,000 TS; 45,000 YS, 45 El, 180 Brin
For welded tanks, manifolds, stainless parts, Type 347; heat and corrosion resistant

ES-18-10Cb-LO-Ta.
M-1014, 0.08 max C, 17-19 Cr, 9-13 Ni, Cb = 8 × C, 0.10 max Ta, bal Fe
Annealed: 88,000 TS; 45,000 YS, 45 El; 160 Brin
For chemical plant equipment, welded structures, stainless, austenitic, Type 348

ES-18-10 TI
M-1014; 0.10 max C, 2 max Mn, 17-19 Cr, 9-12 Ni, Ti = 5 × C, bal Fe
Annealed. 85,000 TS, 40,000 YS, 50 El, 180 Brin.
For exhaust manifolds, welded tanks, stainless parts; Type 321; heat and corrosion resistant.

ES-19-9DL
M-1014; 0.28-0.35 C, 18-21 Cr, 8-11 Ni, 1.0-1.7 Mo, 1.0-1.7 W, 0.25-0.60 Cb, 0.1-0.35 Ti, bal Fe.
Annealed: 110,000 TS, 55,000 YS, 35 El, 185 Brin.
For jet engine and turbine components; high oxidation resistance.

ES-19-9L.
M-1014, 0.03 max C, 18-20 Cr, 8-12 Ni, bal Fe.
Annealed: 78,000 TS; 35,000 YS; 52 El, 144 Brin.
For chemical plant equipment; stainless, austenitic; Type 304L.

ES 19-12 MoL.
M-1014; 0.03 max C, 2.0 max Mn, 1.0 max Si, 18-20 Cr, 11-15 Ni, 3.0-4.0 Mo, bal Fe.
Stainless sheet, plate, strip, coil
Ann: 80,000-90,000 TS; 30,000-50,000 YS; 45-52 El; Rb 77-83.

Excellent corrosion resistance; resistant to scaling up to 1600°F.
For food processing equipment, paper pulp, chemical plant equipment, fountain pens.
AISI 317L.

ES-25-12.
M-1014; 0.20 max C, 2 max Mn, 1.25 max Si, 22-24 Cr, 12-15 Ni, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 45 El; 185 Brin.
For furnace parts, heat resistant parts, heat treating boxes; heat and corrosion resistant; Type 309.

ES-25-20.
M-1014; 0.08 max C, 2 max Mn, 1.5 max Si, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 85,000 TS; 45,000 YS, 45 El; 185 Brin.
For furnace parts, carburizing and annealing boxes; Type 310; heat and corrosion resistant.

"E.S.A."
M-73; 1.4 C, 4 W, 0.5 Cr, 0.3 V, bal Fe.
For finishing tools, reamers; abrasion resistant.

E.S.C. Alloys see B.S.C. Alloys.

ESCO NO. 1B.
M-438, 0.30 C, 1.0 Mn, 0.40-0.60 Si, bal Fe.
Cast. 79,000 TS; 46,000 YS; 30 El, 47 RA; 163 Brin
For housings, gears, shafts, machine tool parts, water hardened.

ESCO 5
M-438; 0.05 C, 16.05 Cr, 4.02 Ni, 2.82 Cu, 0.56 Mn, 0.61 Si, bal Fe.
Annealed 138,000 TS, 113,000 YS; 14% El; 315 Brin.
Heat Treated 180,000 TS, 156,000 YS; 3% El; 6% RA, 418 Brin
Uses Pump impellers, valves.
Precipitation hardening stainless steel

ESCO NO 5T
M-438, 0.20 max C, 8-10 Cr, 0.9-1.2 Mo, bal Fe
Cast 90,000-105,000 TS, 65,000-85,000 YS, 18-22 El, 40-55 RA; 200-240 Brin.
For oil refinery equipment, Type HA; corrosion resistant.

ESCO NO. 5W
M-438, 0.20 max C, 4.0-6.5 Cr, 0.45-0.65 Mo, bal Fe
Cast 90,000-100,000 TS; 75,000-80,000 YS; 18-24 El, 45-60 RA, 190-248 Brin.
For oil refinery equipment, Type 501, corrosion resistant

ESCO NO 5X.
M-438, 0.20 max C, 4.0-6.5 Cr, 0.45-0.65 Mo, bal Fe
For oil refinery equipment; Type 502, corrosion resistant

ESCO NO. 6-T
M-438, 0.15 max C, 3-4 Ni, 0.6 Mn, 0.5 Si, bal Fe.

ESCO NO 12M.
M-438, 0.25-0.35 C, 0.2-0.3 Mo, 0.03-0.07 V, 1.0-1.3 Mn, 0.5 Si, bal Fe.
Cast 102,000 TS; 81,000 YS; 21 El; 225 Brin.
Heat treated 257,000 TS; 91,000 YS, 5 El; 495 Brin.
For earth moving equipment, dredging and cement equipment; wear, shock and abrasion resistant.

ESCO NO. 14.
M-438; 1.15-1.25 C, 12-14 Mn, 0.4-1.0 Si, bal Fe.
Cast: 120,000 TS; 55,000 YS, 20 El, 200 Brin.
For rock and ore crushers, earth moving equipment; impact, shock and abrasion resistant.

ESCO NO. 16-N.
M-438; 0.25 C, 2.5-3.0 Cr, 0.40-0.65 Mo, 1 Mn, bal Fe.
For oil refinery equipment; creep resistant.

ESCO NO. 16W.
M-438; 0.20 max C, 1.0-1.5 Cr, 0.45-0.65 Mo, 0.5-0.8 Mn, bal Fe.
Cast: 80,000-90,000 TS; 50,000-70,000 YS; 22 El; 210-220 Brin
For structural and steam turbine components; high temperature use.

ESCO NO. 16Z.
M-438; 0.18 max C, 2.0-2.7 Cr, 0.9-1.2 Mo, bal Fe.
Cast: 70,000-100,000 TS; 40,000-75,000 YS; 21-20 El; 200-220 Brin
For structural and steam turbine components; high temperature use.

ESCO NO. 18CW.
M-438; 0.65-0.75 C, 1.9-2.4 Cr, 0.4-0.6 Ni, 0.25 max Mo, bal Fe.
Cast: 135,000-180,000 TS; 118,000-130,000 YS; 12-4 El; 290-390 Brin
For liners for abrasion slurries, wear resistant.

ESCO NO 20
M-438; 0.07 max C, 19-22 Cr, 27.5-31 Ni, 1.8-2.5 Mo, 3.0-3.5 Cu, bal Fe.
Cast: 68,000 TS; 30,000 YS; 47 El; 60 RA; 125 Brin.
For acid resistant equipment; Type CN-7M, austenitic, corrosion resistant.

ESCO NO 20.
M-748, 0.07 C, 29 Ni, 20 Cr, 2-3 Mo, 4 Cu, bal Fe.
Cast: 65,000-75,000 TS; 28,000-38,000 YS; 50-35 El, 50-40 RA; 120-150 Brin.
For chemical plant equipment, valves, resists mixed acids, austenitic.

ESCO NO. 21.
M-438, 0.70 max C, 96.5 min Ni, 2 max Si, 0.75 max Mn, bal Fe.
Cast: 60,000 TS; 25,000 YS; 25 El; 30 RA; 120 Brin.
For corrosion and heat resistant castings, cast nickel, corrosion and heat resistant.

ESCO NO 22.
M-438; 0.30 max C, 62-68 Ni, 3 max Fe, bal Cu.
Cast 75,000 TS, 32,000 YS, 50 El, 50 RA; 120 Brin
For corrosion resistant parts, cast Monel, corrosion resistant

ESCO NO. 22H.
M-438, 0.35 max C, 0.5-1.5 Mn, 2.5 max Fe, 1 Si, 62-68 Ni, bal Cu.
Cast. 85,000-120,000 TS; 50,000-80,000 YS; 20-10 El, 175-250 Brin.
For chemical plant equipment, cast H-Monel, corrosion resistant

ESCO NO. 22S.
M-438, 0.35 max C, 0.5-1.5 Mn, 2.5 max Fe, 1.0-2.2 Si, 62-68 Ni, bal Cu
Cast 120,000-145,000 TS; 80,000-130,000 YS; 4-1 El, 275-350 Brin
For chemical plant equipment, age-hardenable, cast S Monel, corrosion resistant.

ESCO NO. 23
M-438; 0.20 max C, 12-15 Cr, 76-79 Ni, 6 max Fe.
Cast. 80,000 TS; 37,000 YS; 16 El; 5 RA; 150 Brin.
At 1200°F: 63,000 TS; 25,000 YS; 39 El.
At 1800°F: 72,000 TS; 3800 YS; 118 El.
For nitriding containers; cast Inconel, corrosion and heat resistant.

ESCO NO. 26.
M-438; 0.12 max C, 26-30 Mo, 4-7 Fe, bal Ni:
Cast: 78,000 TS; 56,000 YS; 12 El; 12 RA; 196 Brin.
For corrosion resistant equipment; Hastelloy B; corrosion resistant.

ESCO NO. 27.
M-438; 0.15 max C, 15.5-17.5 Cr, 16-18 Mo, 3.7-4.7 W, 4.0-7.0 Fe, bal Ni.
Cast: 70,000 TS; 50,000 YS; 15 El; 22 RA; 200 Brin.
For corrosion resistant equipment; Hastelloy C.

ESCO NO. 28.
M-438; 11 max Si, 4 max Cu, 1 Mn, 1 Al, bal Ni.
Cast: 36,000-40,000 TS; 35,000-40,000 YS, 0 El; 0 RA; 484-545 Brin.
For pump valves; Hastelloy D; resists HCl and H_2SO_4.

ESCO NO. 32.
M-438; 0.20-0.40 C, 12 Cr, 1 max Ni, bal Fe.
Heat treated: 200,000 TS; 150,000 YS; 5 El; 7 RA; 450 Brin.
For cutlery, valves, furnace parts; Type CA40; corrosion resistant.

ESCO NO. 32B.
M-438; 0.06-0.15 C, 11.5-13.5 Cr, 0.25 max Ni, bal Fe.
Heat treated: 160,000 TS; 145,000 YS; 12 El, 25 RA; 360 Brin.
For turbine blades, valves, cutlery; Type 403; corrosion and heat resistant.

ESCO NO. 32C.
M-438; 0.06-0.15 C, 11.5-14 Cr, 1 max Ni, 0.5 max Mo, bal Fe.
Heat treated: 200,000-135,000 TS; 150,000-115,000 YS; 7-17 El; 6-43 RA; 390-260 Brin.
Cast: 115,000-100,000 TS; 100,000-75,000 YS; 20-30 El; 52 RA; 225-185 Brin.
For cutlery, valves, pump parts; Type CA15; corrosion resistant.

ESCO NO. 33-A.
M-438; 0.60-0.75 C, 1 Mn, 16-18 Cr, 0.75 Mo, bal Fe.
Heat treated. 400 Brin.
For bearings, races, pivots, valves, cutlery; Type 440A; stainless, hardenable.

ESCO NO. 33-B.
M-438, 0.75-0.95 C, 16-18 Cr, 0.75 max Mo, 1 Mn, 1 Si, bal Fe.
Annealed: 107,000 TS; 62,000 YS; 18 El; 35 RA; 220 Brin.
For bearings, cutlery, valves; Type 440 B; stainless, hardenable.

ESCO NO. 33C.
M-438; 0.95-1.2 C, 16-18 Cr, 0.75 max Mo, bal Fe.
For bearings, valves; Type 440C; corrosion resistant.

ESCO NO. 35AW.
M-438; 2.3-2.8 C, 1.25 Mn, 24-28 Cr, bal Fe.
Cast: 630 Brin.
Annealed· 370 Brin.
For roasters, impellers; high abrasion resistance.

ESCO NO. 35C.
M-438; 0.50 C, 28 Cr, 3 max Ni, bal Fe.
For furnace parts, heat resistant parts; Type CC-50.

ESCO NO. 35H.
M-438; 0.50 max C, 26-30 Cr, 4 max Ni, bal Fe.
At 1400°F: 10,500 TS; 8700 YS; 65 El.
At 1800°F: 2500 TS; 2100 YS, 110 El.
At 70°F: 75,000 TS; 66,000 YS.
For furnace rabble arms, sintering bars, grates, dampers; heat resistant to 2000°F in S atmosphere.

ESCO NO. 35-T.
M-438; 0.50 C, 26-30 Cr, 4-7 Ni, 0.5 max Mo, bal Fe.
Cast: 97,000 TS; 65,000 YS; 18 El; 212 Brin.
For cylinder liners, valves, furnace parts; Type CC50; corrosion and heat resistant.

ESCO NO. 36.
M-438; 0.20 max C, 26-30 Cr, 3-4 Ni, 1.5 Mo, bal Fe.
For corrosion and heat resisting parts; acid resistant.

ESCO NO. 36PH.
M-438; 0.07 C, 16 Cr, 4 Ni, 2.5 Cu, bal Fe.
Heat treated: 160,000 TS; 145,000 YS; 12 El; 25 RA; 360 Brin.
For corrosion resistant castings; age-hardenable, high strength.

ESCO NO. 37 PH
M-438; 0.04 C, 1 Mn, 1 Si, 25-27 Cr, 4.75-6.0 Ni, 1.75-2.25 Mo, 2.75-3.25 Cu, bal Fe.
Heat treated: 130,000-144,000 TS; 95,000-105,000 YS; 10-22 El; 15-41 RA; 285-321 Brin
For chemical plant equipment, digesters, autoclaves; high corrosion resistance.

ESCO NO. 40
M-438, 0.16 C, 20 Cr, 9 Ni, bal Fe
Cast: 80,000 TS, 35,000 YS; 15 El; 150 Brin.
For chemical and plastic plant equipment; Type CF-8; stainless, austenitic.

ESCO NO. 40F
M-438, 0.16 max C, 18-21 Cr, 9-12 Ni, 1.5 max Mo, 0.20-0.35 Se, bal Fe
Cast: 72,000 TS, 35,000 YS; 58 El, 60 RA, 140 Brin
For chemical plant equipment, Type CF-16F; corrosion resistant, free-cutting

ESCO NO 40H.
M-438; 0.20-0.40 C, 18-23 Cr, 9-12 Ni, 0.5 max Mo, bal Fe
At 1200°F 57,000 TS; 16 El
At 1600°F· 22,000 TS, 22 El.
At 70°F. 90,000 TS, 50,000 YS; 25 El.
For furnace dampers, oil still supports, annealing furnaces; strength and scale resistant to 1600°F, Type HF

ESCO NO 40L.
M-438, 0.03 max C, 18-21 Cr, 8-11 Ni, bal Fe
Cast. 65,000 TS, 28,000 YS, 55 El, 60 RA; 140 Brin.
For chemical plant equipment, tanks, mixers; Type 304L, austenitic, stainless

ESCO NO 40S
M-438, 0.08 max C, 18-21 Cr, 8-11 Ni, bal Fe.
Cast 72,000 TS; 32,000 YS; 60 El, 65 RA, 140 Brin.
For chemical plant equipment; Type CF-8; austenitic, corrosion resistant

ESCO NO 40T.
M-438, 0.08 max C, 17-20 Cr, 9-12 Ni, bal Fe.
Cast 65,000 TS; 28,000 YS; 45 El; 50 RA; 125 Brin.
For chemical plant equipment; Type 305; austenitic, stainless.

ESCO NO. 41.
M-438, 0.08 max C, 18-21 Cr, 9-12 Ni, Cb = 8 × C, bal Fe.
Cast: 72,000 TS; 36,000 YS; 35 El; 35 RA; 145 Brin

For welded chemical plant equipment; Type CF8C; austenitic, stainless.

ESCO NO. 41W.
M-438; 0.08 max C, 18-21 Cr, 9-12 Ni, Cb + Ti = 10 × C, bal Fe.
Cast: 72,000 TS; 36,000 YS; 35 El; 35 RA; 145 Brin.
For welded chemical plant equipment; Type CF-8C; austenitic, stainless.

ESCO NO. 43.
M-438; 0.20 max C, 22-26 Cr, 10-13 Ni, bal Fe.
For corrosion and heat resisting parts; heat and corrosion resistant.

ESCO NO. 43C.
M-438; 0.20 max C, 22-26 Cr, 12-15 Ni, bal Fe.
Cast: 70,000 TS; 30,000 YS; 35 El; 60 RA; 150 Brin.
For furnace parts, heat treat boxes; Type CH-20; austenitic, heat resistant.

ESCO NO. 43H.
M-438; 0.20-0.50 C, 24-28 Cr, 11-14 Ni, 1.5 max Mo, 0.2 N, bal Fe.
At 1400°F: 35,000 TS; 18,000 YS; 12 El.
At 1800°F: 11,000 TS, 7000 YS; 30 El.
At 70°F. 85,000 TS, 45,000 YS, 15 El.
For furnace shafts, beams and rollers, tube supports; Type HH; scale resistant to 2000°F.

ESCO NO. 44.
M-438; 0.03 max C, 17.5-18.5 Cr, 12.0-13.0 Ni, 2.0-3.0 Mo, 0.2-0.3 Cb, 0.5-1.0 Mn, bal Fe.
Cast. 71,500-76,500 TS; 42,750-48,250 YS; 39-47 El, 45-50 RA; 170 Brin
For heat exchanger tubes; corrosion and heat resistant

ESCO NO 45
M-438, 0.20 max C, 18-22 Cr, 7-9 Ni, bal Fe.
For turbine castings, chemical plant equipment; Type CF-20, stainless, austenitic

ESCO NO 45L
M-438, 0.03 max C, 18-21 Cr, 10-13 Ni, 2-3 Mo, bal Fe
Cast: 70,000 TS; 35,000 YS, 40 El; 55 RA; 170 Brin
For acid resistant chemical plant equipment; Type 316L; austenitic, stainless

ESCO NO. 45S.
M-438, 0.08 max C, 18-21 Cr, 9-12 Ni, 2-3 Mo, bal Fe.
Cast: 80,000 TS, 42,000 YS; 45 El; 65 RA, 170 Brin
For acid resistant equipment, Type CF-8M, stainless

ESCO NO 45T
M-438; 0.08 max C, 16-19 Cr, 13-15 Ni, 2-3 Mo, bal Fe.
Cast 70,000 TS, 30,000 YS, 50 El; 62 RA; 125 Brin
For acid resistant equipment; Type 316; stainless, austenitic.

ESCO NO 46.
M-438; 0.2-0.5 C, 26-30 Cr, 14-18 Ni, bal Fe.
For heat resistant parts, furnace equipment; stainless and heat resistant, austenitic.

ESCO NO 48.
M-438; 0.2-0.6 C, 28-32 Cr, 18-22 Ni, bal Fe
Cast: 85,000 TS; 50,000 YS; 10 El, 190 Brin.
For furnace parts and equipment, salt pots; Type HL, heat resistant

ESCO NO. 50.
M-438; 0.12 max C, 2.5-3.0 Si, 20-23 Cr, 25-28 Ni, 2.5 Mo, 1.5 Cu, bal Fe.
Cast: 70,000 TS; 35,000 YS; 50 El; 60 RA; 140 Brin.
For salt pots, heat and corrosion resistant parts; Type CN-M-Cu; austenitic, corrosion resistant.

ESCO NO. 51.
M-438; 0.30 max C, 26-30 Cr, 8-11 Ni, 0.5 max Mo, bal Fe.
Cast: 90,000 TS; 57,000 YS; 25 El; 34 RA; 200 Brin.
For furnace parts, heat treat boxes; Type CE-30 austenitic, stainless.

ESCO NO. 52-C.
M-438; 0.10 C, 14-17 Cr, 33-37 Ni, bal Fe.
Cast: 70,000 TS; 40,000 YS; 10 El, 12 RA; 170 Brin.
For salt pots, furnace pots, heat treat boxes; Type HT; heat resistant.

ESCO NO. 52H.
M-438; 0.35-0.75 C, 13-17 Cr, 33-37 Ni, 0.5 max Mo, bal Fe.
At 1200°F: 42,000 TS; 28,000 YS; 5 El.
At 1800°F: 11,000 TS; 8000 YS; 28 El.
At 70°F: 67,000 TS, 40,000 YS; 10 El.
For retorts, radiant tubes, salt pots, hearth plates, carburizing boxes, resists oxidation and thermal cycling.

ESCO NO. 53C.
M-438; 0.20 max C, 23-27 Cr, 19-22 Ni, bal Fe.
Cast 75,000 TS, 35,000 YS; 35 El; 42 RA; 140 Brin.
For furnace parts, salt pots, heat treat boxes; Type CK-20; austenitic, heat resistant.

ESCO NO. 53H.
M-438; 0.20-0.60 C, 24-28 Cr, 18-22 Ni, 0.5 max Mo, bal Fe.
At 1600°F 23,000 TS; 21 El.
At 70°F: 75,000 TS; 40,000 YS; 18 El.
For gas dissociation equipment, fixtures, baskets, calcining tubes; good strength and oxidation resistance to 2100°F; Type HK.

ESCO NO 54.
M-438, 0.2-0.5 C, 19-23 Cr, 23-27 Ni, bal Fe.
For heat treating boxes, furnace parts; Type HN, heat resistant.

ESCO NO. 55
M-438, 0.3-0.5 C, 17-21 Cr, 37-41 Ni, bal Fe.
For salt pots, heat treat boxes, furnace parts; Type HU; heat resistant.

ESCO NO. 56.
M-438, 0.35-0.75 C, 10-14 Cr, 58-62 Ni, bal Fe.
At 1400°F. 32,000 TS, 23,000 YS.
At 1800°F: 10,000 TS, 8000 YS, 40 El.
At 70°F: 70,000 TS, 40,000 YS, 6 El.
For carburizing and hardening fixtures, retorts; Type HW, resists thermal cycling.

ESCO NO 57.
M-438, 0.3-0.7 C, 15-19 Cr, 64-68 Ni, bal Fe.
For heat treat boxes, furnace equipment; heat and corrosion resistant

ESCO NO. 61A.
M-438, 3 max C, 1.7-2.5 Cr, 13.5-17.5 Ni, 5.5-7.5 Cu, bal Fe.
Cast: 25,000 TS; 135 Brin.
For corrosion and wear resistant parts; Ni-Resist Type 1; corrosion resistant cast iron.

ESCO NO. 62A.
M-438, 3.0 max C, 1.7-2.5 Cr, 18-22 Ni, bal Fe.
Cast: 25,000 TS; 135 Brin.
For corrosion and wear resistant parts; Ni-Resist Type 2; corrosion resistant cast iron.

ESCO NO. 63.
M-438; 3 max C, 2 Cr, 20 Ni, bal Fe.
For corrosion and wear resistant parts; Ni-Resist Type 2B; corrosion resistant cast iron.

ESCO NO. 70.
M-438; 0.08-0.16 C, 1-2 Mn, 20.0-22.5 Cr, 19-21 Ni, 2.5-3.5 Mo, 18.5-21.0 Co, 2-3 W, 0.75-1.25 Cb, 0.15 N, bal Fe.
For high temperature applications; Multimet N-155.

ESCO 72.
M-438; 0.1 C, 0.18 Ti, 0.6 Cb, 26-30 Cr, 47-52 Co, bal Fe.
Cast: 135,000 TS; 48,000 YS; 10 El; 10 RA; 250 Brin.
For furnace baffles, burner tips, sintering grates, quench baskets.
Corrosion, heat and thermal shock resistant.

ESCO STAINLESS NO. 33.
M-438; 0.25 max C, 12-15 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

ESCO STAINLESS NO. 34.
M-438; 0.25 max C, 16-20 Cr, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

ESCO STAINLESS NO. 35.
M-438; 0.25 max C, 24-30 Cr, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

ES EXTRA.
M-459; 0.9-1.2 C, bal Fe.
For tools, water hardening.

ES PRIMA.
M-27; 0.12 C, 2.5 Ni, 0.8 Cr, bal Fe.
Hardened: 130,000-160,000 TS; 100,000 YS; 13 El; 40 RA, 270-330 Brin.
For gears, shafts, pinions; case-hardening.

ESSHETE 316.
M-1724; 0.04-0.09 C, 0.8 max Si, 1.0-2.0 Mn, 11.0-14.0 Ni, 16.0-18.0 Cr, 2.0-2.75 Mo, B, bal Fe.
Sol. tr.: 74,000 min TS; 30,000 min YS, 30 El.
For superheater tubes, power plant components.
B.S. 3605-855 (1963); ASTM 213-64T TP316H.

ESSHETE 321.
M-1724; 0.04-0.09 C, 1.0 max Si, 2.0 max Mn, 9.0-11.0 Ni, 17.0-19.0 Cr, 0.70 max Ti, bal Fe.
Sol. tr.: 74,000 min TS; 30,000 min YS; 30 El.
For superheater tubes, power plant components.
B.S. 970-En58B; ASTM 213-64T TP321H; AISI 321.

ESSHETE 347.
M-1724; 0.04-0.09 C, 0.8 max Si, 0.5-2.0 Mn, 9.0-13.0 Ni, 17.0-19.0 Cr, Nb = 10 × %C min, bal Fe.
Sol. tr.: 74,000 min TS; 32,600 min YS; 30 El.
For superheater tubes, power plant components.
B-S. 3605-822 Nb(1963): AISI 347; ASTM 213-64T TP347H.

ESSHETE 1250.
M-1724; 0.15 max C, 0.2-1.0 Si, 5.5-7.0 Mn, 9.0-11.0 Ni, 14.0-16.0 Cr, 0.8-1.2 Mo, 0.15-0.4 V, 0.75-1.25 Nb, 0.003-0.009 B, bal Fe.
Sol. tr.: 72,000 min TS; 25,800 min YS; 30 El.
For superheater tubes, pressure vessels, steam piping, parts operating up to 650°C.

ESSHETE CML.
M-1724: 0.12 max C, 0.4-0.7 Mo, 0.75-1.25 Cr. bal Fe.
Normalized: 62,000-78,000 TS; 22,000-25,000 YS; 45-41 El; 70-63 RA.
For superheater tubes, steam piping; resists heat to 1000°F; creep resistant.
BS 1507, 1508; ASTM A199-64T-Gr T11.

ESSHETE CRM2.
M-1724; 0.15 max C, 2.0-2.5 Cr, 0.9-1.1 Mo, bal Fe.
Normalized: 93,000 TS; 80,000 YS; 30 El.
Annealed: 72,500 TS; 34,500 YS; 40 El.
For steam piping, super heater tubes; creep resistance to 1100°F.
B.S. 1503, 1508; ASTM A200-62T GrT22.

ESSHETE CRM5.
M-1724; 0.12 max C, 4.0-6.0 Cr, 0.45-0.65 Mo, bal Fe.
Annealed: 67,000 TS; 30,000 YS; 40 El.
For heat exchangers, valves, superheaters, steam and oil tubes; resists scaling to 1100°F.

ESSHETE CRM9.
M-1724; 0.15 max C, 0.25-1.0 Si, 0.3-0.6 Mn, 8.0-10.0 Cr, 0.90-1.10 Mo, bal Fe.
.2% proof stress at 540°C: 32,500-39,000 psi.
B.S. 1607-GrP17; ASTM 199 Gr T9;
DIN X9CrMo91, Werkstoff Spec 213.

ESSHETE D4C.
M-1724, 0.15 C, 0.5 Mo, bal Fe.
Normalized: 56,000-68,000 TS.
For superheater tubes, steam piping; resists heat to 950°F: creep resistant

ESSHETE MV.
M-1724; 0.08-0.15 C, 0.4-0.7 Mn, 0.25-0.50 Cr, 0.5-0.7 Mo, 0.22-0.30 V, bal Fe.
Nor. & Temp 67,000 min TS, 42,200 min YS; 17 El
For steam piping.
B S 3604 CD 660(1963).

ESTHONIA 5 MARK.
Eng., 70 Cu, 20 Zn, 10 Ni.
For coinage, corrosion resistant.

"e.t.d." 150.
M-699, 0.40 min C, 0.75-1.0 Mn, 0.20-0.35 Si, 0.80-1.10 Cr, 0.15-0.25 Mo, 0.04-0.05 Te, bal Fe.
Bar: 150,000 min TS; 130,000 min YS; 10 El, 32 min Rc; 75% machinability.
For shafts, studs, bolts, gears; high strength without heat treatment.

"e.t.d." 180.
M-669; 0.40 min C, 0.75-1.0 Mn, 0.20-0.35 Si, 0.80-1.10 Cr, 0.15-0.25 Mo, bal Fe.
Bar. 180,000 min TS; 165,000 min YS; 5-10 El; 38 min Rc; 56% machinability.
For shafts, gears, studs, bolts, high strength without heat treatment.

ETERNOS 10.
M-1339; 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin
For chemical plant equipment, tanks, mixers, filters, Type 302; stainless, austenitic.

ETERNOS 11.
M-1339; 0.15 C, 24 Cr, 19 Ni, bal Fe.
Annealed: 100,000 TS; 45,000 YS; 50 El; 65 RA; 185 Brin.
For furnace parts, valves, turbine and jet engine parts; Type 310; stainless, austenitic.

ETERNOS 23.
M-1339, 0.15 max C, 24 Cr, 1.5 Al, 1.4 Si, bal Fe.
For oil refinery equipment; heat and creep resistant.

ETIRAL.
M-104; C, 10 Cr, bal Fe.
For wire drawing dies; tough and hard.

EUGENE VADERS.
Eng.; 57.5 Cu, 0.3 Fe, 2.5 Mn, 1.5 Al, 0.5 Si, bal Zn.
For propellers, gears, high strength castings; corrosion resistant.

EUREKA.
U.S.; 60 Cu, 40 Ni.
Hot rolled: 60,500-65,000 TS; 20,000-22,400 YS; 51-45 El; 67-65 RA.
For resistance materials and thermocouples; similar to "Constantan" and "Ferry Metals."

EUREKA.
Pb, Sb, bal Sn.
For Babbitt bearings; Babbitt metal.

EUREKA.
M-35; C, bal Fe.
For machinery parts; water hardened.

EUREKA 1 ELECTRODE.
M-765; 2.50 C, Cr, W, high cobalt.
For surfacing parts subject to severe wear, heat and abrasion.

EUREKA NO. 1 HARD FACING RODS-BARE.
M-765; 2.50 C, Cr, W, high cobalt.
For surfacing parts subject to severe wear, heat and abrasion.

EUREKA 2 HIGH SPEED BARE ROD
M-765; 0.75 C, 4.0 Cr, 4.0 Mo, W, plus high cobalt.
For welding high speed cutting tools all types by G.T A. method

EUREKA 4 HIGH SPEED BARE ROD.
M-765; 1.55 C, 12.0 W, 4.85 V, Cr, Co, bal Fe
For welding high speed tool where a 63-65 Rock C hardness is required

EUREKA 6 ELECTRODE.
M-765, 1.45 C, 28.5 Cr, 3.9 W, Ni, Si, high cobalt.
For surfacing punches, dies, shear blades subject to severe heat and impact.

EUREKA NO 6 HARD FACING ROD-BARE.
M-765; 1.45 C, 28.5 Cr, 3.9 W, Ni, Si, high cobalt.
For surfacing punches, dies, shear blades subject to severe heat and impact.

EUREKA 12 ELECTRODE.
M-765; 1.40-1.45 C, Cr, Ni, W, Mo and high cobalt.
For surfacing parts subject to severe wear, heat and abrasion.

EUREKA NO. 12 HARD FACING ROD-BARE.
M-765; 1.40 C, Ni, W, Mo, high cobalt.
For surfacing parts subject to severe wear, heat and abrasion.

EUREKA 35 H. W. ELECTRODE.
M-765; 0.07 C, 4.35 Cr, 0.85 Ni, Mo, Mn, bal Fe.
For welding hot work die units, forging and upsetter dies.

EUREKA 40-A A. H. BARE ROD.
M-765; 0.70 C, 1.0 Cr, Mn, Mo, bal Fe.
For welding the low air hardening and graphitic tool steels by G.T.A. method.

EUREKA 45 H. W. ELECTRODE.
M-765; 0.10 C, 4.25 Cr, 2.0 W, Mn, Mo, Ni, V, bal Fe.
For welding hot work die units, forging and upsetter dies.

EUREKA 45-A H. W. BARE ROD.
M-765; 0.08 C, Cr, Ni, Mo, Si, bal Fe.
Very low carbon hot work for welding hot work units that must be machinable, forging and die cast dies.

EUREKA 52 ELECTRODE.
M-765; Pure deoxidized copper.

EUREKA 70-A O. H. BARE ROD.
M-765; 0.90 C, Cr, V, W, Mo, Mn, bal Fe.
For welding oil hard tool steel by G.T.A. process.

EUREKA 70-W O. H. ELECTRODE.
M-765; 0.65-0.75 C, 1.4 Cr, 2.15 W, Mn, V, Si, bal Fe.
For welding "W" type oil hardening tool steels.

EUREKA 71-M O. H. ELECTRODE.
M-765; 0.65-0.75 C, 1.4 Cr, 1.15 Mo, Mn, V, bal Fe.
For welding oil hardening tool and die steels.

EUREKA 72 H. W ELECTRODE.
M-765; 0.25-0.30 C, 5.0 Cr, 2.75 W, 2.25 Mo, Mn, V, bal Fe.
For welding hot work die steels.

EUREKA 72-A H. W. BARE ROD.
M-765; 0.36 C, 5.0 Cr, W, Mo, Si, bal Fe.
For welding hot work tool steel punches, shear blades, etc.

EUREKA 73 H. W. ELECTRODE.
M-765; 0.40-0.50 C, 4.25 Cr, 9.5 W, 1.4 Mo, bal Fe.
For welding extreme hot work die steels.

EUREKA 73-A H. W BARE ROD.
M-765, 0.50 C, 7.5 Cr, 1.48 V, Mo, Si, bal Fe.
For welding hot work shear blades and punches subject to high heat.

EUREKA 75-X H. W. ELECTRODE.
M-765; 0.75-1.0 C, 0.80 Cr, 0.40 V, Mo, Mn, bal Fe.
For welding water hardening tools and dies.

EUREKA 75-XA W. H. BARE ROD.
M-765; 1.15 C, Si, Mn, V, bal Fe.
For welding water hard tool steel by G.T.A. process.

EUREKA 78-A H. W BARE ROD
M-765; 0.50 C; 7.5 Cr, 1.48 V, Mo, Si, bal Fe.
For welding high C, high Cr and similar alloys where a high Rockwell C hardness is required.

EUREKA 88 H W. ELECTRODE.
M-765, 0.40-0.50 C, 5.0 Cr, 5.0 W, 3.50 Co, Mn, Mo, V, bal Fe.
For welding extreme hot work die steels.

EUREKA 88-A H. W. BARE ROD.
M-765; 0.39 C, 4.25 Cr, 4.1 W, V, Co, bal Fe.
For welding hot work dies where extreme heat and impact is a problem

EUREKA 99 ELECTRODE
M-765; 97.0 Ni, bal Fe.

EUREKA 100 ELECTRODE.
M-765; 99 Ni, bal Fe.

EUREKA NO 100-A PURE NICKEL BARE ROD.
M-765; 99.0 Ni.

EUREKA 130 ALLOY ELECTRODE.
M-765; 0.25-0.35 C, 1.15 Cr, Mo, Mn, bal Fe.
For welding SAE 4130 and flame hardening units.

EUREKA 130-A BARE ROD.
M-765; 0.32 C, Mo, Cr, Mn, Si, bal Fe.
Low alloy for welding flame hardened dies and SAE 4130 steel.

EUREKA 145 ALLOY ELECTRODE.
M-765; 0.40-0.50 C, 1.0 Cr, Mn, Mo, V, bal Fe.
For welding SAE 6145 and also flame hardening dies.

EUREKA 145-A BARE ROD.
M-765; 0.45-0.50 C, Cr, Mo, Mn, Si, bal Fe.
Medium alloy for welding flame hardened dies and 6145 steel.

EUREKA 200 HARD SURFACING ELECTRODE.
M-765; 0.06-0.12 C, Cr, Ni, Mo, Mn, Cb, bal Fe.
Work hardening; 200 BHN + for surfacing parts subject to wear, heat and impact; austenitic.

EUREKA 240 HARD SURFACING ELECTRODE.
M-765; 0.10-0.20 C, Cr, Ni, Mo, Mn, bal Fe.
Work hardening, 240 BHN + for surfacing parts subject to wear, heat, and impact; austenitic.

EUREKA 340 HARD SURFACING ELECTRODE.
M-765; 0.60-0.75 C, Mn, Cr, W, Mo, Cb, bal Fe.
Work hardening; 340 BHN +, for surfacing parts subject to wear, heat, and impact; austenitic.

EUREKA 350-A ALLOY BARE ROD.
M-765; 0.06 C, 12.5 Cr, 1.85 Ni, bal Fe.
For joining or repairing cracked die sections.

EUREKA 400 BUILD UP ELECTRODE.
M-765; 0.55-0.65 C, Mn, Cr, Si, bal Fe.
For build up on water hardening tool and die steels.

EUREKA 440 HARD SURFACING ELECTRODE.
M-765; 0.75-1.0 C, Mn, Cr, Ni, W, Mo, Cb, bal Fe.
Work hardening; 440 BHN + for surfacing parts subject to wear, heat and impact; austenitic.

EUREKA 500-and 580 HIGH ALLOY ELECTRODES.
M-765; Low C, Cr, Ni, Mn, Mo, Si, bal Fe.
For joining and repairing high alloys and tool steel.

EUREKA 1000-A H. W. BARE ROD.
M-765; 0.40 C, 5.0 Cr, Mo, V, Si, bal Fe.
Tungsten free rod for welding die cast dies made from H-11 or H-13.

EUREKA 1215 A. H. ELECTRODE.
M-765; 0.75-1.0 C, 4.75 Cr, 1.05 W, 1.85 Mo, V, Mn, bal Fe.
For welding air hardening tool and die steels.

EUREKA 1215-A A. H. BARE ROD.
M-765; 1.0 C, 5.0 Cr, Mo, W, Mn, bal Fe.
For welding air hard tool steel by G. T. A. process.

EUREKA 1216 H. S. ELECTRODE.
M-765; 0.60-0.75 C, 4.60 Cr, 8.75 Mo, W, V, Mn, bal Fe.
For welding high speed steel and other hot work units.

EUREKA 1216-A HIGH SPEED BARE ROD.
M-765; 0.93 C, 8.5 Mo, 3.5 Cr, V, W, bal Fe.
High Mo high speed for welding tools of the M1-M2 type.

EUREKA 1220-A A. H. BARE ROD.
M-765; 2.15 C, 11.5 Cr, Mo, V, Mn, bal Fe.
For welding high carbon, high chromium tool steel by G. T. A. method.

EUREKA 5545 ELECTRODE.
M-765; 45 Ni, 55 Cu.

EUREKA NO. 5545-A CUPRO-NICKEL BARE ROD.
M-765; 45 Ni, 55 Cu.
For repairing cast iron patterns.

EUREKA 8510 W. H. ELECTRODE.
M-765; 0.50-0.75 C, 1.15 Cr, 0.45 Mo, V, Mn, bal Fe.
For welding water hardening tools and dies.

EUREKA EUREKALLOY "C" ELECTRODE.
M-765; 0.05-0.10 C, 55.0 Ni, 16.25 Cr, 17.5 Mo, W, Mn, V, bal Fe.
For surfacing parts subject to heat, impact, oxidation and certain chemicals.

EUREKA EUREKALLOY "X" ELECTRODE.
M-765; 0.30-0.35 C, Ni, Mo, high cobalt.
For surfacing units subject to pressure, impact, heat and galling, hot extrusion and forge dies.

EUREKA EXP-10 and EXP-20 SURFACING ELECTRODE.
M-765; Low C, Cr, Ni, Mo, Si, Mn, bal Fe.
For welding cast iron and alloy drawing and forming dies.

EUREKA "FORGEWELD" LOW ALLOY ELECTRODE.
M-765; Low C, Mo, Si, Mn, bal Fe.
For repairing forge shop components, rams and sow blocks.

EUREKA "HAMMERWELD" ELECTRODE.
M-765; Low C, Cr, Ni, Mo, Si, Mn, bal Fe.
For welding and repairing forging dies.

EUREKA MARWELD BARE ROD.
M-765; Maraging steel for repairing dies of maraging steel or overlaying hot work dies.

EUREMATIC NO. 2 FLUX CORED WIRE.
M-765, Low C, med. alloy, bal Fe.
For repairing rams and sow blocks.

EUREKAMATIC NO. 5 FLUX CORED WIRE.
M-765; Low C, med. alloy, bal Fe.
For forge die impressions and shanks.

EUREKAMATIC NO 45 FLUX CORED WIRE.
M-765, Low C, Cr, Ni, Mn, Mo, W, bal Fe.
For filling forge die impressions.

EUREKAMATIC NO. 45 SOLID WIRE.
M-765; 0 08 C, med Cr, Mo, bal Fe.
Semi hot work grade, for repairing upsetter and forge dies

EUREKAMATIC NO. 72 SOLID WIRE.
M-765; Low C, Cr, Mo, W, bal Fe.
For repairing shear blades, forge dies, and building composite units, hot work.

EUREKAMATIC NO. 73 SOLID WIRE.
M-765; Low C, med Cr, high W, bal Fe.
For repairing, shear blades and other hot work steel subject to severe heat.

EUREKAMATIC NO. 78 SOLID WIRE.
M-765; Med C, high Cr, (W free) bal Fe.
Hot work grade for repairing hot or cold die units.

EUREKAMATIC NO. 130 SOLID WIRE.
M-765, 0.32 C, Cr, Mo, Mn, Si, bal Fe.
For overlay with mild alloy; meets SAE 4130 Spec

EUREKAMATIC NO. 145 SOLID WIRE.
M-765; 0.45-0 50 C, Cr, V, bal Fe.
Medium carbon, meets SAE 6145 Spec

EUREKAMATIC NO. 350 ALLOY SOLID WIRE.
M-765, 0.06 C, Mn, Mo, high Cr, bal Fe.
For joining tool steel, repairing crane wheels and forge dies.

EUREKAMATIC NO. 1216 SOLID WIRE.
M-765; C, Cr, high Mo, bal Fe.
Type M1 and M2.

EUREKAMATIC "BUILD-UP" SOLID WIRE.
M-765; Low C, alloy, bal Fe.
For preliminary build up on die sections before facing with harder material.

EUREKAMOLD BARE ROD.
M-765; Low C, Cr, Ni, Si, bal Fe.
For mold repair—P6 type.

EUREKA T G.A. LOW AIR ELECTRODE.
M-765; 0.70-0 75 C, 0.75 Cr, 1.70 Ni, 1.65 Mo, 1.15 Mn, bal Fe.
For welding low air tool steels.

EUROPEAN "REAMUR."
Eng.; 2.8-3.5 C, graphite, 0.6-0.8 Si, bal Fe.
For castings; malleable cast iron.

EUTALLITE—6.
M-717; 29 Cr, 1.1 C, 4 W, bal Co; As cast: Rock. C45.
For hard facing overlay on engine valves, tractor treads, fuel pump shafts, forging dies. Alloy powders deposited by oxy-acetylene. Wear resistant.

EUTALLITE UNIVERSAL 10092.
M-717; Cobalt base alloy powder for overlays.

EUTECBOR 9.
M-717; For hard facing overlays using torch. Operates at 1800°-1900°F; wear and corrosion resistant.

EUTEC CHROM 2.
M-717; C, alloy, bal Fe.
Cast: 675 Brin.
For welding electrodes, hard overlay.

EUTEC ROD 14.
M-717; 3 C, 2 Si, bal Fe.
For gas welding rod; for cast iron

EUTECROD 14 FC.
M-717, Electrode for torch brazing or building up cast iron, as machine bases, motor and gear housings
Bonding temperature 1400°-1600°F, Hard: 200 Brin.

EUTECROD 15
M-717; Electrode for low temperature torch build up and sealing of cast iron, malleable, steel, copper and nickel alloys, such as crankcases, water jackets
Bonding temperature 450°-600°F, pressure strength 1500 psi.

EUTECROD 16
M-717, Copper base with high nickel content.
Rod for torch brazing ferrous and non-ferrous metals
Bonding temperature 1400°-1600°F, 100,000 TS

EUTECROD 16 FC
M-717; Flux coated modification of EUTECROD 16

EUTEC ROD 18.
M-717; Zn, bal Cu
For gas welding rod, for bronze and brass.

EUTECROD 18 FC.
M-717, Flux coated grade of EUTECROD 18

EUTECROD 19.
M-717, Zn base with Al
For surface build up on aluminum

EUTECROD 21-FC-E.
M-717;
For torch joining of aluminum; Melts 1090°F; 33,000 TS

EUTECROD 80.
M-717, Copper base with nickel.
Rod for torch brazing steel as bicylces, ladders, steel furniture.
Bonding temperature 1400°-1600°F; 80,000 TS.

EUTECROD 80 FC.
M-717;
Flux coated modification of EUTECROD 80.

EUTECROD 91.
M-717; Cobalt—Chromium—Tungsten.
Hard facing alloy for torch or TIG for build up on check valves, exhaust valves, hot punches.

EUTECROD 146.
M-717;
Electrode for torch brazing of cast iron, steels and copper base alloys at low heat; Bonding temperature 1400°-1600°F; Strength 65,000 psi.

EUTECROD 146 FC.
M-717; Flux coated modification of EUTECROD 146.

EUTECROD 155.
M-717, Rod for joining most ferrous and non-ferrous metals at low temperature.
Bonding temperature 725°F; 16,000 TS.

EUTECROD 157.
M-717; 95.5 Sn, 3.46 Ag.
Solder type alloy free from lead, zinc, antimony and cadium. Melts 425°F; 15,000 TS.

EUTECROD 157-B.
M-717;
Flux cored solder type alloy free from lead, zinc, antimony and cadium; Melts 425°F; 15,000 TS.

EUTECROD 158-B.
M-717,
Flux-cored solder; Melts 361°F, 7,000 TS.

EUTECROD 180
M-717;
Electrode for torch brazing copper base alloys;
Melts 1290°F, 42,000 TS.

EUTECROD 185 FC
M-717,
Machinable overlays on cast iron, steel, copper and nickel alloys
Flux coated, for torch, bonding temperature 1400°1600°F, hardness 200 Brin

EUTECROD 186 FC
M-717,
For machinable overlays on ferrous and non-ferrous parts; bonding temperature 1400°-1600°F, using torch, hardness 200-300 Brin.

EUTECROD 190.
M-717,
For torch welding aluminum; Melts 1070°F; 34,000 TS.

EUTECROD 196.
M-717,
For torch build-up and joining zinc die castings;
M P 700°F; 28,000 TS

EUTECROD 800.
M-717;
For torch brazing copper base alloys,
Melts 1305°F; 40,000 TS

EUTECROD 1601
M-717;
Rod for torch, furnace or induction brazing ferrous and non-ferrous.
Temperature 1225°F; 60,000 TS

EUTEC ROD 1700
M-717; Ag, bal Cu.
For silver brazing.

EUTECROD 1702
M-717;
Electrode for torch brazing steel, stainless steel, carbide tips; Melts 1200°F; 85,000 TS.

EUTEC ROD 1800.
M-717; Ag, bal Cu.
For gas welding rod; for steel and copper alloys.

EUTECROD 1801.
M-717, 51 Ag, 22 Cu, 21 Zn, 5 Cd, 1 Sn.
For brazing ferrous and non-ferrous;
M.P. 1120°F; 90,000 TS.

EUTECROD 1803.
M-717;
For torch brazing copper and copper alloys;
Melts 1185°F; 55,000 TS.

EUTECROD 1804.
M-717;
For torch brazing copper and copper alloys;
Melts 1185°F; 50,000 TS.

EUTEC ROD 1850FC.
M-717; Cu alloy.
Cast: 90,000 TS; 180 Brin.
For torch welding rod for copper; discontinued.

EUTECROD 1900.
M-717;
For torch welding magnesium; M.P. 1100°F; 30,000 TS.

EUTECROD 1909.
M-717;
For soldering aluminum and magnesium;
M.P. 315°F; 10,000 TS.

EUTECSIL 1020 FC.
M-717;
Flux coated alloy for torch brazing of ferrous and non-ferrous alloys; Melts 1050°F; 85,000 TS.

EUTECSIL 1030 FC.
M-717;
Flux coated rod, silver braze type, for joining ferrous and non-ferrous metals; Temperature 1150°F; 60,000 TS.

EUTEC-SILWELD 1618.
M-717;
For ferrous and non-ferrous joining; M.P. 1125°F, 85,000 TS.

EUTECTAL.
M-620; 1.5 Cu, 0.8 Mn, 1.58 MgSi, 0.35 Ti, 0.25 Si, bal Al.
Heat treated: 38,000 TS; 4 El; 98 Brin.
For light alloy parts; age hardenable.

EUTECTIC ALLOY-1.
U.S.; 50 Bi, Pb, 13 Sn, 10 Cd
For fusible alloys, fuses.

EUTECTIC ALLOY-2.
U.S.; 52 Bi, 40 Pb, 8 Cd.
For fusible alloys, fuses.

EUTECTIC ALLOY-3.
U.S.; 53 Bi, 32 Pb, 15 Sn.
For fusible alloys, fuses.

EUTECTIC ALLOY-4.
U.S.; 54 Bi, 26 Sn, 20 Cd.
For fusible alloys, fuses.

EUTECTIC ALLOY-5.
50 Sn, 18 Cd, 32 Pb.

EUTEC-TINWELD 1.
M-717;
For soldering iron, nickel, copper base alloys;
M.P. 450°F; 7,000 TS.

EUTEC-TINWELD II.
M-717;
For lead free soldering; M.P. 450°F; 15,000 TS.

EUTEC-TINWELD III.
M-717;
For soldering electronic and radio components;
M.P. 360°F; 8,000 TS.

EUTEC-TINWELD IV.
M-717;
For soldering copper base alloys M.P. 452°F; 10,000 TS.

EUTEC TRODE 24.
M-717; Ni alloy.
For arc welding rod; machinable welds on cast iron.

EUTECTRODE 27.
M-717;
For repair welding cast iron; AC-DC; for machine bases, frames, supports. Strength 60,000 psi.

EUTECTRODE 65.
M-717; Cr, Ni, Mo steel, coated.
Electrode for DC-Rev. welding and overlaying to give harder and stronger weld metal. 140,000 TS; 320 Brin.

EUTECTRODE 66.
M-717;
Electrode for AC-DC welding of mild steel, beams, channel iron, pipes; 80,000 TS; machinable.

EUTECTRODE 280.
M-717;
Electrode for reverse DC welding copper alloys to ferrous metals, 60,000 TS.

EUTECTRODE 300
M-717;
For DC reverse welding copper; 35,000 TS.

EUTECTRODE 670.
M-717; Cr, Ni steel.
Electrode for AC-DC welding of low alloy steel and some stainless steel; 95,000 TS.

EUTECTRODE 680.
M-717;
Electrode for AC-DC welding of alloy steels, leaf and coil springs, some stainless grades, 120,000 TS.

EUTECTRODE 691
M-717;
Electrode for AC-DC welding of miscellaneous steels, 105,000 TS.

EUTECTRODE 1850 (AC).

EUTECTRODE 1851 (DC).
M-717,
For arc welding copper base alloys.

EUTEC TRODE 2100.
M-717; Al alloy.
For welding rod (gas or electric); for Al sheet and castings.

EUTECTRODE 2101.
M-717;
For DC reverse welding of aluminum alloys; 34,000 TS.

EUTECTRODE N 2.
M-717;
For hard, wear resistant overlays on steels and cast iron, AC-DC; for plow shares, cement grinder rings, mixers, excavator teeth, hardness C 50-55 Rock.

EUTECTRODE N 4.
M-717;
Hard overlays on manganese steels; AC-DC; for railroad, construction equipment, rails and frogs Hardness as deposited Rb 98, work hardens to C 45 Rock.

EUTECTRODE N 40.
M-717;
For hard facing or joining austenitic manganese steels; AC-DC; for bucket teeth and lips, crushers, hammer mills and similar parts subject to severe impact; work hardenable.

EUTECTRODE N 61.
M-717;
For heavy build-ups of hard and abrasion resistant overlays on steel and cast iron; AC-DC; Hardness C 50-55 Rock

EUTECTRODE N 90.
M-717;
Hard overlay for ferrous metals; AC-DC, deposits retain high strength and hardness at elevated temperatures; for ash remover impellers, exhaust valves, hot punches

EUTECTRODE N 6800
M-717;
Electrode for AC-DC overlays on steel as forging dies, rams, piercing tools, tongs
85,000 TS; 210 Brin

EUTECTRODE Super 110.
M-717,
Electrode for AC-DC welding steel, angle iron, I-beams, channel iron, 110,000 TS.

EUTHERM A11.
M-1340, 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe
Annealed 80,000 TS; 35,000 YS, 55 El, 75 RA; 150 Brin
For chemical plant equipment, tanks, mixers, filters, Type 302, stainless, austenitic.

EUTHERM A22
M-1340, 0.15 C, 24 Cr, 19 Ni, bal Fe
Annealed 100,000 TS, 45,000 YS, 50 El, 65 RA; 185 Brin
For furnace parts pumps, valves, turbine parts; Type 310, stainless, austenitic

EUTHERM F8
M-1340, 0.12 max C, 2.3 Si, 6 Cr, bal Fe
Annealed 70,000 TS, 30,000 YS, 28 El, 65 RA, 160 Brin
For oil refinery equipment, heat and creep resistant

EUTHERM F10
M-1340, 0.12 max C, 2 Si, 18 Cr, bal Fe.
Annealed· 80,000 TS, 50,000 YS, 25 El; 50 RA; 150 Brin
For shafts, gears, chemical plant equipment, sinks; Type 430, stainless

EUTHERM F30
M-1340, 0.12 max C, 1.5 Al, 24 Cr, bal Fe.
Annealed 85,000 TS, 50,000 YS; 30 El, 55 RA; 180 Brin.
For oil refinery and chemical plant equipment; heat resistant

EUTHERM FA25
M-1340, 0.2 C, 25 Cr, 4 Ni, bal Fe.
Cast· 80,000 TS, 55,000 YS, 200 Brin
For furnace parts, heat treating boxes, valves, pumps, Type CC, corrosion and heat resistant.

EUZONIT.
M-1335; 55 Ni, 20 Mo, 20 Fe.
For corrosion and heat resistant equipment; corrosion and heat resistant

EUZONIT 60
M 1335; 0.10 C, 17 Cr, 60 Ni, 20 Mo, bal Fe
For corrosion and heat resistant parts; corrosion and heat resistant. Resists sulphuric acid

EUZONIT 70.
M-1335; 67 Ni, 30 Mo, bal Fe.
For high temperature applications; corrosion and heat resistant. Resists sulphuric acid.

EUZONIT 85.
M-1335; 85 Ni, 9 Si, 4 Cu.
For high temperature applications; corrosion and heat resistant.

EV4Co.
M-Germany; 1.3 C, 5 Co, 1 Mo, 4 V, 12 W, 4 Cr, bal Fe.
Hardened: C 64-66 Rock.
For cast cutting tools, reamers, drills, broaches, engravers tools.
High speed steel, Type T15, high hot-hardness and wear resistance.

EV5.
Russia; 0.7-0.8 C, 0.4 max Mn, 0.3-0.5 Cr, 5.0-6.5 W, bal Fe.
For permanent magnet; heat treated.

E.V 300.
M-752, 30% Cr cast iron (no nickel).
For corrosion resistance at room temp. and at elevated temp.

E.V. ALLOY
M-752, C, 10-12 Ni, 22-24 Cr, bal Fe.
Annealed 65,000-75,000 TS, 5 El.
For carburizing boxes, furnace parts, resists heat to 1175°C

EVANOHM
M-61, 20 Cr, 75 Ni, 2.75 Al, 2.75 Cu
Annealed· 150,000 TS, 117,000 YS; 20 El.
For precision resistors; high electrical resistance, low resistance change with temperature

EVANOHM
M-897; 20 Cr, 3 Al, 2 Cu, bal Ni
Annealed· 90,000 TS, 65,000 YS, 40 El.
For precision resistors; heat resistant to 300°C

EVANS PEERLESS
M-259, 0.9-1.2 C, bal Fe.
For tools, dies, jigs, water hardened.

EVANSTEEL GRADE I.
M-146; 1.5-2.0 Ni, 0.75-1.0 Cr, 0.3 C, bal Fe.
Annealed· 95,000-100,000 TS, 50,000-60,000 YS, 27-22 El; 40-30 RA, 200 Brin.
For sprockets, gears, high pressure valves; resists abrasion and wear; resists temperature to 1000°F.

EVANSTEEL, GRADE II
M-146, 0.3 C, 1.5-2.0 Ni, 0.75-1.00 Cr, bal Fe.
Annealed· 115,000-125,000 TS, 65,000-75,000 YS; 20-15 El, 30-25 RA, 275 Brin
For tractor shoes, bucket lips, dipper teeth, sheaves, abrasion resistant; heat resistant to 1000°F

EVANSTEEL, GRADE III.
M-146, 0.3 C, 1.5-2.0 Ni, 0.75-1.00 Cr, bal Fe
Annealed· 145,000-160,000 TS, 120,000 YS; 12 El; 10 RA, 400-500 Brin
For dipper teeth, liner plates, guard rails, pulverizer hammers; abrasion resistant; heat resistant to 1000°F.

EVERARD.
M-589, 1.0-1.2 C, bal Fe.
For dies, tools; water hardening.

EVERBRITE.
M-642, 29.5-31.5 Ni, 59-65 Cu, 5-8 Fe, 0.6 max Mn, 0.25 max C, 0.6 max Si.
Cast: 75,000 TS, 50,000 YS; 14 El; 20 RA; 200 Brin.
For valve disks, valve seat rings, steam turbine nozzle blocks and valves; machinable; resists action of steam.

EVERBRITE.
M-129; 60 Cu, 30 Ni, 3 Fe, 3 Si, 3 Cr.
Cast: 75,000 TS; 45,000 YS; 14 El; 170 Brin.
For valves, chemical plants; corrosion resistant.

EVERBRITE NO. 82.
M-154; 30.5 Ni, 62 Cu, 7 Fe, 0.5 Mn.
For steam applications; high corrosion resistance.

EVERDUR 637.
M-8; 2 Si, 7.25 Al, bal Cu.
Annealed: 88,000 TS; 44,000 YS; 25 El; Rock B 85.
For screw machine products and forgings, studs, bolts, switchgear, electrical hardware, valve stems.
Corrosion resistant, nonmagnetic.

EVERDUR 651.
M-8; 1.5 Si, 0.25 Mn, bal Cu.
Soft: 40,000 TS; 15,000 YS, 50 El; Rock F 55.
Hard: 70,000 TS; 55,000 YS; 15 El; Rock B 80.
For cold headed and roll threaded bolts, hardware marine fittings, pole line hardware, rigid conduit, welding rod. Corrosion resistant.
Good for severe cold working.

EVERDUR 655.
M-8; 95.8 Cu, 3.1 Si, 1.1 Mn.
Annealed Rods: 55,000 TS; 20,000 YS; 65 El; B 35 Rock.
Hard: 90,000 TS; 55,000 YS, 18 El; B 90 Rock.
For bearing plates, bolts, screws, forgings, hardware, springs, tanks, marine fittings, oil storage tanks.
High corrosion resistance and strength.

EVERDUR 656.
M-8; 95.8 Cu, 3.1 Si, 1.1 Mn.
For welding rods to weld copper and copper alloys, also plain and galvanized steel.
Good for carbon-arc and acetylene welding and inert gas welding.

EVERDUR 661.
M-8; 3 Si, 1 Mn, 0.40 Pb, bal Cu.
Soft. 58,000 TS, 22,000 YS; 70 El
Hard: 90,000 TS; 60,000 YS; 18 El.
For screw machine parts; free cutting, wear and corrosion resistant.

EVERDUR 1000 see EVERDUR 6552.

EVERDUR 1010 see EVERDUR 655.

EVERDUR 1012 see EVERDUR 661.

EVERDUR 1014 see EVERDUR 637.

EVERDUR 1015 see EVERDUR 651.

EVERDUR 6552.
M-8; 4 Si, 1.1 Mn, bal Cu.
Cast: 50,000 TS; 20,000 YS; 25 El.
For castings, pipe fittings, valves; M.P. 1000°C.

EVERDUR A see EVERDUR 655.

EVERSHYNE.
M-233; 0.2 C, 18 Cr, 8 Ni, bal Fe.
For stainless parts; stainless.

E.V.M.
M-115; 0.82 C, 0.35 Si, 0.25 Mn, 18.5 W, 4.3 Cr, 2.1 V, 0.65 Mo, bal Fe.
For drills, chasers, lathe tools, forming tools; high speed steel.

E.V. STEEL.
M-752; Ni-Cr heat resisting steel.
Six alloys ranging from 12 to 60% Ni.
For heat resistant parts as furnace parts, heat treat boxes, retorts and trays, burner nozzles.

EW.
M-459; C, bal Fe.
Water treated: 72,000-85,000 TS; 42,000-56,000 YS; 29-22 El.

EWP.
M-1114; C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe.
For hot dies; hot work steel.

EX-2.
0.65-0.75 C, 0.25-0.45 Mn, 0.20-0.35 Si, 0.70-1.0 Ni, 0.15-0.30 Cr, 0.08-0.15 Mo, bal Fe.
Hardened: Rock C 60 min.
Annealed: 200 Brin max.
For spindles, rolls, bearings, plungers, valves, meters, pins, cylinders. Wear resistant, deep hardening.

EX. "B" METAL.
Eng; 77 Cu, 15 Pb, 8 Sn, P.
For bearings, bushings, heavy duty

EXCELITE.
M-965, 32 Cr, 18 W, 45 Co, 2 C, 0.2 B, bal Fe.
For cutting tools; cast.

EXCELSIOR
M-248; 55 Cu, 45 Ni, 0.3 Fe
For resistance alloy; heat resistant.

EXCELSIOR.
M-98, 45 Ni, bal Cu.
Annealed: 70,000 TS, 25,000 YS; 35 El.
For resistors, rheostats, heating elements; low electrical resistance, for service up to 1000°F

EXELLOY
M-748, 0.10 C, 12 Cr, bal Fe
Heat treated. 115,000 TS, 90,000 YS, 22 El, 65 RA, 250 Brin.
For valves, valve stems; corrosion resistant.

EX. "K" METAL
Eng, 77 Cu, 12.5 Pb, 10.5 Sn, P.
For bearings, bushings, heavy duty.

EXL-DIE.
M-35; 0.90 C, 1.15 Mn, 0.5 Cr, 0.5 W, 0.1 V, bal Fe
Oil hardening cold work tool steel.
For taps, reamers, broaches, extrusion and engraving dies, form tools; non-deforming.
AISI 01.

EXL-DIE SMOOTHCUT
M-35; 0.9 C, 1 Mn, 0.5 W, 0.5 Cr, bal Fe.
For tools, dies, chisels, shear blades, drills, vise jaws; non-deforming, oil hardened.

EXLO.
M-394, 0.025 max C, Cr, Si, bal Fe.
Used as addition for stainless steel melting.

EXOCUT.
M-1; 1.09 C, 3.75 Cr, 8.0 Co, 9.5 Mo, 1.6 W, 1.15 V, 0.2 Mn, 0.3 Si, bal Fe.
Hardened: Rock C 68-70.
For cutters to machine heat treated superalloys.
Super high speed steel. Not shock resistant.

EXOHARD.
M-1; 1.1 C, 0.2 Mn, 0.3 Si, 3.75 Cr, 5.0 Co, 9.5 Mo, 1.6 W, 0.015 P, 0.020 S, 1.25 V, bal Fe.
Hardened: Rock C 64-68.
For cutting tools for hard metals, lathe and planer tools, broaches. Super high speed steel. Not shock resistant.

EXP. 99.
M-106; Same as RR 250.

EXPANDED METAL.
U.S.; 0.15-0.25 C, bal Fe.
For reinforced concrete or plaster walls; low carbon steel mesh.

EXPANDING ALLOY.
Eng.; 67 Pb, 25 Sn, 8.3 Bi.
For type metal, mounting purposes.

EXPANSIVE METAL.
M-216; 75 Pb, 16.7 Sb, 8.3 Bi.
For plugging castings; expands on freezing.

EXPORT.
M-1260, M-1261; 92 Sn, 3.9 Sb, 3.9 Cu, 0.2 Ni.
Cast: 7000 TS; 19 Brin.
For engine bearings and bushings; M.P. 440-600°F; shock resistant.

EXPRESS.
M-1408, 0 7 C, 14 W, 4 Cr, 1 V, bal Fe.
For lathe and planer tools, reamers, drills, broaches; high speed steel.

EXPRESS COBALT FIVE.
M-1408; 0.7 C, 4 Cr, 18 W, 1 V, 5 Co, bal Fe
For lathe and planer tools, reamers, broaches; high speed steel.

EXPRESS COBALT TEN.
M-1408; 0.7 C, W, 4 Cr, Mo, V, 10-12 Co, bal Fe.
For cutters for heat treated steels; high speed steel

EXPRESS E.Z.
M-1546, 0 72 C, 10.5 W, 1.3 V, 0.5 Mo, 0.25 Co, bal Fe.
Hardened: C 64-66 Rock.
For lathe and planer tools, hobs, broaches, end mills, form cutters.
High-speed steel, oil hardening, high red-hardness

EX-TEN 42.
M-604, 0 21 max C, 0 02 min V, 0 01 Cb, 1.35 max Mn, 0.30 max Si, bal Fe.
Plate· 42,000 min YS, 63,000 min TS; 24 El; 42,000 CYS.
For structural applications, automotive and truck parts, storage tanks, pipe lines, cargo containers and construction machinery.
Good formability and weldability Tough.

EX-TEN 45.
M-604; 0.22 max C, 1.25 max Mn, 0.10 Si, 0.02 Cb, 0 02 min V, bal Fe
Rolled 60,000 TS; 45,000 YS; 25 El.
For railroad car and bus bodies, cargo containers.
High strength low alloy construction steel.

EX-TEN 50.
M-604, 0 26 max C, 1.35 max Mn, 0.01 min Cb, 0 02 min V, 0 10 Si, bal Fe.
Rolled: 65,000 TS; 50,000 YS, 22 El.
For railroad car and bus bodies, cargo containers.
High strength low alloy construction steel.

EX-TEN 55.
M-604; 0.20 max C, 1.35 max Mn, 0.10 Si, 0.02 Cb, 0.02 min V, bal Fe.
Rolled: 70,000 TS; 55,000 YS; 20 El.
For automotive and truck bodies, cargo containers, tote boxes. High strength low alloy steel.

EX-TEN 60.
M-604; 0.26 max C, 1.35 max Mn, 0.02 min Cb, 0.02 min V, 0.012 max N, bal Fe.
Bar: 75,000 min TS, 60,000 min YP; 18 El.
For automotive and truck parts, cargo containers, tote boxes, gas cylinders, construction machinery.
Low-alloy, high strength steel.

EX-TEN 65.
M-604; 0.26 max C, 1.35 max Mn, 0.01 min Cb, 0.02 min V, 0.012 max N, bal Fe.
Bar: 80,000 min TS; 65,000 min YP; 16 El.
For automotive and truck parts, cargo containers, tote boxes, gas cylinders, construction machinery.
Low-alloy, high strength steel.

EXTRA.
M-32; 0.6-1.2 C, bal Fe.
For taps, reamers, drills, dies, cold heading dies; water hardening.

EXTRA.
M-140; 0.8-1.20 C, 0.25 Mn, 0.25 Si, bal Fe.
Water hardening tool steel; AISI W1.

EXTRA.
M-783; 1.15 C, 0.3 Mn, 0.5 V, 0.35 Si, bal Fe.
For drills, taps, water hardened.

EXTRA NO. 5.
M-360; 0.7-0.9 C, bal Fe.
For tools, drills, taps, water hardened.

EXTRA 214.
M-27; C, 19 W, 4 Cr, 2.25 V, bal Fe.
For tools, dies, cutters; high speed steel.

EXTRA BEST.
M-364; 1 C, bal Fe.
For tools, taps, reamers; water hardening.

EXTRA BEST MH.
M-1340; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed. 110,000 TS, 57,000 YS; 18 El; 40 RA; 210 Brin.
For drills, taps, springs, hobs, reamers; Type W1; water hardened.

EXTRA BEST VZH.
M-1340, 1.0 C, 0 25 Mn, 0.1 V, bal Fe.
For springs, taps, reamers, broaches; Type W2; water hardened.

EXTRA BEST Z.
M-1340; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated· 190,000 TS; 145,000 YS; 10 El; 30 RA, 400 Brin.
For springs, taps, drills, reamers, punches; Type W1; water hardened.

EXTRA BEST ZH.
M-1340; 1.0 C, 0.25 max Si, 0 25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS, 21 El; 42 RA; 200 Brin.
For springs, taps, drills, hobs, reamers; Type W1; water hardened.

EXTRA BEST ZW
M-1340; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated· 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin
For springs, rails, punches, axes, crimpers; Type W1; water hardened.

EXTRA CARBON.
M-114, 0.7-1 4 C, bal Fe.
For tools, dies, punches; water hardened.

EXTRA CARBON.
M-73; 1 0 C, 0.25 Mn, 0.25 Si, bal Fe.
For engraving tools, shear blades, taps, drills; water hardened.

EXTRA CHROME.
M-275; 0.5 C, 4 Cr, bal Fe.
For hot work dies and tools; hot work steel.

EXTRA COST.
M-618; 1.05-1.15 C, bal Fe.
For tools, drills; water hardened.

EXTRA (DISSTON).
M-357; 1.0 C, bal Fe.
For tools, drills, cutters; water hardened.

EXTRA D.R.
M-73; 1.2 C, bal Fe.
For drills, taps, cutters; drill rod, water hardening.

EXTRA DRACO.
M-114; 0.7-1.2 C, 0.2 V, bal Fe.
For tools, cold header dies; water hardened.

EXTRA DRACO DV.
M-114; 1.0 C, 0.50 V, bal Fe.
For tools, dies, taps, drills, cutters; Type W2; water hardened.

EXTRA DURO MX4.
M-616; C, alloy, bal Fe.
For tools; oil hardened.

EXTRA EXTRA.
M-459; 1.2-1.3 C, bal Fe.
For tools, water hardened.

EXTRA G.
M-782; 0.7-1.1 C, bal Fe
For tools, drills, taps; water hardened.

EXTRA H.
M-73; 1.0 C, 0.25 Mn, 0.25 Si, bal Fe.
For general tools, cutters, drills, hobs, taps; Type W1; water hardened.

EXTRA H.
M-1182; 1.0 C, 0.50 V, bal Fe.
For taps, cutters, drills, tools; Type W2, water hardened.

EXTRA HEADER DIE.
M-35; 0.95 C, 0.35 Mn, 0.25 Si, bal Fe.
For header dies; water hardened.

EXTRA HIGH LEADED BRASS 356.
M-8; 62.5 Cu, 35 Zn, 2.5 Pb.
Hard Sheet: 73,000 TS, 60,000 YS, 7 El; B 80 Rock.
Soft Sheet 45,000 TS, 17,000 YS; 50 El, B 15 Rock.
For clocks, instruments, screw machine parts, fasteners
Elect. cond 26 Hard and strong, good machinability

EXTRA L.
M-115, 0.6-1.25 C, bal Fe.
For tools, taps, punches; varying tempers

EXTRA LION.
M-1415; 0.70 C, 18 W, 4 Cr, 1 V, bal Fe.
For drills, cutters, hobs, broaches, reamers, high speed steel.

EXTRA M.G.
M-363, M-27; 1.05 C, 1.1 Mn, 0.5 Cr, 0.25 Si, bal Fe.
For tools and dies, long taps, reamers, screw dies, calipers; non-deforming.

EXTRA MH.
M-1340, 1.1 C, 0.25 max Si, 0.25 max Mn. bal Fe.
Annealed: 110,000 TS; 58,000 YS; 18 El, 40 RA, 210 Brin.
For springs, taps, reamers, cutters; Type W1; water hardened.

EXTRA PUNCH.
M-73; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For punches, dies; oil hardening.

EXTRA QUALITY.
M-363; 0.7-1.2 C, bal Fe.
For punches, dies, general tools; water hardening.

EXTRA RAPID 300.
M-27; 1.3 C, 4 Cr, 12 W, 1 Mo, 4 V, bal Fe.
For cutting tools, engraver's tools; high speed steel.

EXTRA RAPID 300A
M-27; 1.2 C, 10.5 W, 4.3 Cr, 3.8 V, bal Fe.
For tools, dies, cutters; high speed steel.

EXTRARD.
M-85; 0.35 C, 5 Cr, 1.4 Mo, 1.25 W, 0.2 V, 1 Si, bal Fe.
For heat resistant parts, hot work tools; Type H12; air or oil hardened.

EXTRA S.
M-1182, 0.60-1.4 C, 0.25 V, bal Fe.
For tools, taps, cutters, reamers; Type W2; water hardened.

EXTRA SO
M-616; 1.05 C, bal Fe.
For tools, drills, taps; water hardened

EXTRA SPECIAL
M-74, 1.50-1.30 C, 0.20-0.40 Mn, 0.15-0.40 Cr, 3.5-4.5 W, 0.35 V, bal Fe
For tools, form cutters, reamers; fast finishing steel.

EXTRA SPECIAL.
M-260, M-38, 1.25 C, 0.5 Cr, bal Fe.
Water hardened
For tools, punches, cold trimming dies, blanking dies, water hardening

EXTRA SPECIAL.
M-364, 1.2 C, bal Fe
For tools, finishing tools, drills, water hardening.

EXTRA SPECIAL ALLOY.
M-73, C, W, bal Fe
For tools, drills, taps, water hardened

EXTRA SPECIAL POWER TRANSFORMER 52-58
M-806, 0.03 C, 4.5 Si, bal Fe
Annealed. 75,000 TS, 68,000 YS, 2 El.
For power and radio transformers; high permeability.

EXTRA SUPERDURALUMIN
Japan, Al-Cu-Zn-Mn-Mg
For light alloy parts.

EXTRA SUPER INCOMPARABLE.
M-1409, 0.8 C, 22 W, 4.5 Cr, 1.8 V, 10 Co, 0.7 Mo, bal Fe
For lathe and planer tools, cutters; high speed steel.

EXTRA TENAZ DURO
M-27, 0.9-1.0 C, bal Fe.
For tools, drills, taps, water hardened.

EXTRA TENAZ DURO.
M-616, 0.95 C, bal Fe
For tools, drills, taps; water hardened

EXTRA TOOL
M-38; M-85, 0.7-1.2 C, bal Fe.
For cutters, dies, general tools; water hardened.

EXTRA TOOL
M-355, 1.1 C, bal Fe.
For tools, fixtures, water hardened.

EXTRA TOUGH AND HARD.
M-27; 1.1 C, bal Fe
For general purpose tools and dies; water hardening.

EXTRA TOUGH NO. 4.
M-69; 0.7 C, 1.5 Ni, 0.5 Cr, 0.2 Mo, bal Fe.
For punches, shear blades; tough.

EXTRA TOUGH NO. 6.
M-69, 0.50 C, 0.8 Mn, 0.95 Cr, 0.2 V, bal Fe.
For gears, bolts, springs, crankshafts; oil hardened, tough.

EXTRA TOUGH NO. 7.

M-69; 0.70 C, 0.7 Mn, 0.3 Mo, bal Fe.

For rails, hammers, axles, springs; oil or water hardened.

EXTRA TOUGH NO. 7 H.C.

M-69; 0.83 C, 0.83 Mn, 0.25 Mo, bal Fe.

For rails, hammers, axles; oil or water hardened.

EXTRA TRIPLE CONQUEROR.

M-1406; 1.6 C, 0.6 Cr, 6 W, 0.15 Si, 0.4 Mn, bal Fe.

For turning tools, drawing dies; finishing steel, wear resistant.

EXTRA TRIPLE GRIFFIN.

M-1112; 1.5 C, 0.35 Cr, 6 W, 0.35 Mn, bal Fe.

For drawing dies, cutters; water hardened, hard case and tough core.

EXTRA V.

M-57; 0.90-1.0 C, 0.2 V, bal Fe.

For tools, drills, taps, cutters, reamers, Type W2; water hardened.

EXTRA VALTOOL.

M-357, 0.60-1.4 C, 0.25 V, bal Fe.

For tools, drills, taps, cutters; Type W2, water hardened

EXTRA WARRANTED.

M-260; 1.0-1.2 C, bal Fe.

For taps, dies, reamers, drills, knives; Type W1, water hardened

EXTRA ZH.

M-1340; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe

Annealed: 100,000 TS; 53,000 YS, 21 El, 42 RA, 200 Brin

For springs, taps, drills, hobs; Type W1, water hardened.

EXTRA ZW

M-1340, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe

Annealed 100,000 TS, 53,000 YS; 21 El, 42 RA, 200 Brin

For springs, taps, drills, hobs, reamers; Type W1; water hardened.

EXTRUDAL

M-249, 0.4-0.8 Si, 0.4-0.8 Mg, bal Al

Forged: 36,000-43,000 TS, 29,000-36,000 YS, 18-10 El, 75-90 Brin.

For light alloy parts, good formability

EXTRUDAL 12

M-541; 0.8-1.3 Cu, 11-13 Si, 0.8-1.2 Mg, 0.8 max Fe, 0.6-1.2 Ni, bal Al.

TA Temper: 55,000-60,000 TS; 42,000-48,000 YS, 5-12 El, 110-135 Brin

For forged pistons High corrosion resistant

EXTRUSION DIE

M-73, 0.8 C, 3.5 W, bal Fe.

For extrusion dies, tools, oil hardening.

EYA-1 CAST IRON

Russia, 1.3-3.2 C, 17.8-19.2 Cr, 8.5-9.2 Ni, 1.7-2.6 Si, bal Fe.

For furnace parts and equipment; corrosion resistant, cast iron.

EYELET BRASS.

U.S.; 65-68 Cu, 32-35 Zn.

Hard: 85,000 TS; 60,000 YS; 4 El, 156 Brin.

Soft: 46,000 TS, 20,000 YS, 58 El; 53 Brin.

For eyelets, drawn shells; high ductility.

EZ 9W.

M-336; 0.7 C, 9.5 W, 3.5 Cr, 0.2 V, bal Fe.

For gripper and hot forming dies, punches, piercers; hot work steel.

E.Z. 14 W.

M-336; 0.7 C, 14 W, 3 Cr, 0.2 V, bal Fe.

240 Brin.

For hot dies, tools, extrusion and hot forging dies; high speed steel.

EZ 33A.

Various foundries; 2.7 Zn, 3.0 Re (Ce, etc.), 0-7 Zr, bal Mg.

T5-temper: 20,000-23,000 TS, 14,000-15,000 YS; 2-3 El.

At 600°F: 12,000 TS; 8000 YS; 50 El.

Magnesium sand and permanent mold casting with good pressure tightness and weldability.

For parts operating at 350-500°F.

ASTM B80-69, B199-68, AMS 4442, QQ-M-55, QQ-M-56; SAE 506.

E-Z-CUT 20.

M-240; 0.15 C, S, Mn, bal Fe.

Free machining; for screw machine products, and case hardened parts.

EZ-DIE.

M-35; 1 C, 5.2 Cr, 1.15 Mo, 0.25 V, bal Fe.

For blanking, coining and forming dies; air hardened, Type A2; non-deforming.

E-Z-DIE SMOOTHCUT.

M-35; 1.0 C, 0.8 Mn, 5 Cr, 1 Mo, 0.25 V, S, bal Fe.

For forming and blanking dies, extrusion equipment, air hardenable; tough and wear resistant; AISI A2.

E-Z DIE V.

M-35; 2.15-2.30 C, 1.0-1.3 W, 0.95-1.2 Mo, 5.0-5.5 Cr, 4.6-5.0 V, bal Fe

Hardened. C 60-66 Rock

For lamination and forming dies, burnishing rolls, blanking and drawing dies, powder metal dies.

High wear and abrasion resistance Cold work tool steel, Type A7. Air harden.

EZ HEAD

M-12, 0.08 max C, 16-18 Cr, 17.5-19.0 Ni, bal Fe.

For cold headed parts; stainless

E-Z STAINLESS STEEL

M-73, 0.3-0.4 C, 13-14 Cr, bal Fe

For cutlery, table-ware; stainless, free machining

E-Z-TEM.

M 1684, 0.35 C, 0.8 Mn, 0.45 Si, 1.0 Cr, 0.4 Mo, 0.5 Cu, bal Fe

Shock resisting tool steel

F-17 TRIMETAL

M-739, 8-12 Pb, 8-12 Sn, bal Cu, overlay 3-5 Cu, 7-8 Sb, bal Sn

For heavy duty bearings, with steel backing

F-23

M-739, 0.90-1.25 Sn, 14.75-15.50 Sb, 0.8-1.1 As, 0.6 max Cu, bal Pb

For bearings, SAE-15

F-95

M-339, 3.2 T.C., 1.6 Si, 0.7 Mn, 1 Ni, 0.25 Cr, bal Fe.

Cast: 108,800 TS, 330 Brin.

For piston rings, wear and fatigue resistant

FA-3

M-1699, Sintered carbide tool material

For heavy roughing cuts and interrupted cuts on cast iron, non-ferrous and non-metallic materials.

FA-4.

M-1699; Sintered carbide tool material

For roughing cuts and light interrupted cuts on cast iron, non-ferrous and non-metallic materials.

FA-5.
M-1699; Sintered carbide tool material.
For general purpose machining of cast iron, non-ferrous and non-metallic materials, and for wear resisting applications.

FA-6.
M-1699; Sintered carbide tool material.
For general purpose machining of cast iron, non-ferrous metals and non-metallics.

FA-7.
M-1699; Sintered carbide tool materials.
For finish cuts on cast iron, non-ferrous metals and non-metallics.

FA-8.
M-1699; Sintered carbide tool material.
For fine finishing cuts on cast iron, non-ferrous metals and non-metallics.

FA-9.
M-1699; Sintered carbide tool material.
For finish cutting cast iron, non-ferrous metals and non-metallics.

FA-62.
M-1699; Sintered carbide tool material.
For light roughing and finishing high temperature alloys and non-ferrous metals.

FABRIALLOY.
M-1171; 0.5-0.6 C, bal Fe.
For welding electrodes; shielded.

FACEWELD 1.
M-578; 4.2 C, 5.4 Mn, 0.71 Si, 0.25 Mo, 22.5 Cr, 0.12 V, bal Fe.
Hard surfacing arc welding electrodes for resistance to severe abrasion.

FACEWELD 12.
M-578; 4.5 C, 1.0 Mn, 1.0 Si, 6.0 Mo, 18.5 Cr, 0.7 V, bal Fe.
Hardsurfacing arc welding electrodes for resistance to severe abrasion.

FAGERSTA-16.
M-52; 0.80 C, 0.20 Si, 0.30 Mn, bal Fe.
Heat treated: 188,000 TS; 143,000 YS; 12 El; 35 RA; 388 Brin.
For clutch discs, girders, rails, tie rods, drills; Type W1; water hardened.

FAGERSTA-20.
M-52; 1.0 C, 0.20 Si, 0.30 Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, reamers, hobs, taps; Type W1; water hardened.

FAGERSTA-24.
M-52, 1.2 C, 0.20 Si, 0.30 Mn, bal Fe.
Heat treated: 20,000 TS; 125,000 YS; 8 El; 28 RA; 400 Brin.
For drills, cutters, reamers, broaches; Type W1; water hardened.

FAGERSTA "30" HOLLOW DRILL.
M-385, M-52; 0.8 C, 0.9 Cr, 0.3 Mo, bal Fe.
For drills for mining and quarrying; oil hardening.

FAGERSTA A540.
M-52; 0.80 C, 0.20 Si, 0.30 Mn, 0.10 V, bal Fe.
For chisels, axles, shafts, drills; Type W1; water hardened.

FAGERSTA AD 95.
M-785; 0.70 C, 0.25 Cr, 0.15 V, 1.0 W, bal Fe.
For coining dies; oil hardened.

FAGERSTA ALLOY "30" DRILL.
M-608; 1.0 C, 1.1 Cr, 0.30 Mn, 0.35 Mo, bal Fe.
For tools, drills; water hardened.

FAGERSTA ALLOY CHISEL.
M-385, M-52; Cr, W, Mo, C, bal Fe.
For punches, chisels, rivet sets and busters; shock resistant.

FAGERSTA ALLOY SHOE DIE.
M-52, M-385; 0.55 C, 0.65 Cr, 0.35 Mo, bal Fe.
For shoe dies, cutting dies for leather and paper and rubber; oil hardened.

FAGERSTA ALLOY SHOE DIE.
M-608; 0.50 C, 0.60 Cr, 0.60 Mn, 0.40 Mo, bal Fe.
For tools, dies; oil hardened.

FAGERSTA B85.
M-52; 0.40 C, 1.25 Mn, bal Fe.
For gears, machinery parts; tough.

FAGERSTA B 103.
M-52; 0.45 C, 0.25 Si, 0.8 Mn, bal Fe.
Normalized: 85,500-107,000 TS; 46,000 min YS; 18 El; 180-230 Brin.
For surface hardened gears, levers, shifter forks, shafts. Water hardening.

FAGERSTA B 805.
M-52; 0.40 C, 0.25 Si, 1.3 Mn, bal Fe.
Hardened: 100,000-118,000 TS; 65,000 min YS; 17 min El; 50 min RA; 210-250 Brin.
For surface hardened gears and shafts.
Oil or water hardening.

FAGERSTA BRILLIANT H.H.
M-608; 0.70 C, 3.5 Cr, 14 W, bal Fe.
For tools, cutters, drills; high speed steel.

FAGERSTA BRILLIANT WKE EXTRA
M-608; 0.70 C, 4.5 Cr, 9 Co, 1.5 V, 19 W, bal Fe.
For tools, cutters, drills; high speed steel.

FAGERSTA BRILLIANT WW.
M-608; 0 70 C, 4.5 Cr, 1.5 V, 18 W, bal Fe.
For tools, cutters, reamers; high speed steel.

FAGERSTA BROACH.
M-608, 1.15 C, 0.40 Cr, 1.25 Mn, bal Fe.
For tools, broaches, reamers; tough.

FAGERSTA BROACH.
M-52, M-385; 0 7 C, 18 W, 4 Cr, 1 V, bal Fe.
For broaches, cuttters, drills, taps; high speed steel.

FAGERSTA C46.
M-52; 1.3 C, 0.50 Cr, bal Fe
For files, razors, water hardened.

FAGERSTA C50.
M-52; 1.8 C, 12 Cr, 0 60 Mo, 3.25 Co, bal Fe.
For cold work tools, cutters; oil or air hardened, non-deforming.

FAGERSTA C71.
M-52; 0.95 C, 1.5 Si, 0.75 Mn, 1.0 Cr, bal Fe.
For drawing and forming dies; oil hardened

FAGERSTA C143.
M-52; 0 5 C, 0.85 Mn, 1.05 Cr, 0.3 Mo, 0 15 V, bal Fe.
For gears, machinery parts; oil hardened, tough.

FAGERSTA C182.
M-52; 0.90 C, 0.50 Cr, bal Fe.
For wood working tools; water hardened.

FAGERSTA C265.
M-52; 1.5 C, 12 Cr, 0.8 Mo, 0 2 V, bal Fe.
For drawing and blanking dies, punches; air hardened, non-deforming.

FAGERSTA C 345.
M-52; 0.42 C, 0.25 Si, 0.8 Mn, 1.1 Cr, 0.2 Mo, bal Fe.
Hardened: 112,000-117,000 TS; 72,000 min YS; 10 min El; 40 min RA; 210-370 Brin.
For gears, shafts, power transmission components.
Oil hardening.

FAGERSTA C424.
M-52; 0.50 C, 1.05 Cr, 0.15 V, 0.85 Mn, bal Fe.
For gears, shafts, springs; shock resistant.

FAGERSTA C550.
M-52; 1.0 C, 5.2 Cr, 1.1 Mo, 0.2 V, bal Fe.
For finishing tools, blanking dies; non-deforming, air hardened.

FAGERSTA C 642.
M-52; 0.25 C, 0.65 Mn, 1.05 Cr, 0.2 Mo, 0.3 max Ni, bal Fe.
Hardened: 156,000-185,000 TS; 128,000 min YS; 8 min El; 330 390 Brin.
For shafts, gears, machinery parts; oil or water hardenable.

FAGERSTA C 643.
M-52; 0.34 C, 0.25 Si, 0.7 Mn, 1 Cr, 0.2 Mo, bal Fe.
Hardened: 128,000-150,000 TS; 98,000 min YS; 12 min El; 50 min RA; 270-310 Brin.
For gears, shafts, power transmission components. Oil hardening.

FAGERSTA CARBON.
M-385, M-52; C, bal Fe.
For general tools; water hardening.

FAGERSTA CIRCULAR PLATES.
M-385, M-52; C, Cr, Ni, bal Fe.
For saws; oil hardening.

FAGERSTA COLD HEADER.
M-385, M-52; C, V, bal Fe.
For cold heading and swedging dies, tough.

FAGERSTA CUTLERY STEEL.
M-385, M-52; C, bal Fe.
For knives, saws; water hardening.

FAGERSTA D61.
M-52; 0.90 C, 1.2 Mn, 0.5 Cr, 0.5 W, 0.1 V, bal Fe.
For drawing and forming dies, punches; oil hardened, non-deforming.

FAGERSTA D65
M-52; 2 C, 13 Cr, 1.2 W, 0.75 Mn, bal Fe.
For forming and drawing dies, cold work tools; oil or air hardened, non-deforming.

FAGERSTA D66.
M-52, 0.3 C, 3.25 Cr, 9 W, 0.25 V, bal Fe.
For die casting dies, hot work tools; hot work steel, oil hardened.

FAGERSTA D110.
M-52, 0.35 C, 1.25 Si, 5 Cr, 5 W, 0.65 Co, bal Fe.
For Al die casting dies, hot work tools; hot work steel, oil hardened

FAGERSTA D249.
M-52; 0.45 C, 1.2 Cr, 0.25 Mo, 2.2 W, 0.15 V, 0.9 Si, bal Fe.
For pneumatic tools, chisels, shears; hot work steel, oil hardened.

FAGERSTA D366.
M-52; 0.3 C, 0.3 Mn, 3 Cr, 1.7 Ni, 9 W, 0.3 V, bal Fe.
For die casting dies, hot work tools; hot work steel, oil hardened.

FAGERSTA DIE CASTING.
M-608; 0.50 C, 3 Cr, 0.35 Mn, 0.25 V, bal Fe.
For die casting dies, tools; oil hardened.

FAGERSTA DRAWING DIE STEEL.
M-385, M-52; C, Mn, Cr, W, bal Fe.
For wire drawing dies; oil hardening.

FAGERSTA ENGRAVER PLATES.
M-608; 0.35 C, 0.30 Mn, 0.10 Si, bal Fe.
For engraver plates; water hardened.

FAGERSTA ENGRAVERS PLATE.
M-52, M-385; 0.35 C, bal Fe.
For engravers plates.

FAGERSTA FAST FINISHING.
M-385, M-52; 1.2 C, 2 W, bal Fe.
For finishing tools; water hardening.

FAGERSTA FB-A-2.
M-52; 1.0 C, 0.7 Mn, 5.2 Cr, 0.2 V, 1.1 Mo, bal Fe.
Ht. Tr.: 250,000 TS; 195,000 YS; 5 El; C 50 Rock.
For blanking and trimming dies, gages, shear knives, punches, forming dies, thread rolling dies Air hardening tool steel.
AISI Type A2 nondeforming

FAGERSTA FB-A-4.
M-52, 0.95 C, 2 Mn, 2.2 Cr, 1.1 Mo, bal Fe.
Ht. Tr.: C 62-65 Rock.
For punches, forming and blanking tools, shear blades, broaches, drills, reamers.
Air hardening tool steel. AISI Type A4 nondeforming.

FAGERSTA FB-A-6.
M-52; 0.7 C, 2.2 Mn, 1.0 Cr, 1.4 Mo, bal Fe
Ht. Tr.: 290,000 TS, 264,000 YS, 1 El; C 55 Rock.
For blanking and forming dies, shear blades, mandrels, master hobs
Air hardening tool steel. Type AISI-A6 non-deforming.

FAGERSTA FB-BRILLIANT DIE.
M-52; 0.50 C, 1.0 Mn, 0.3 Si, 1.1 Cr, 0.25 Mo, bal Fe
Prehardened low alloy steel for molds.

FAGERSTA FB-D2.
M-52, 1.5 C, 11.5 Cr, 0.2 V, 0.8 Mo, bal Fe.
Ht. Tr.: 278,000 TS, 214,000 YS, 1 El, C 57 Rock.
For blanking and drawing dies, gauges, burnishing tools, thread rolling dies.
Air hardening tool steel AISI Type D2 nondeforming.

FAGERSTA FB-D2 HIGH PRODUCTION.
M-52; 1.55-1.7 C, 0.25-0.35 Mn, 0.25-0.35 Si, 11.5-12.5 Cr, 0.7-1.0 V, 0.7-0.9 Mo, bal Fe
Air or oil hardening cold work tool steel, chromium type; AISI D2.

FAGERSTA FB-D3 HIGH PRODUCTION "H."
M-52, 2.05 C, 0.4 Mn, 11.5 Cr, 0.6 V, bal Fe.
Air or oil hardening cold work tool steel, chromium type; AISI D3.

FAGERSTA FB-D6.
M-52, 2.1 C, 0.7 Mn, 0.3 Si, 13 Cr, 1.3 W, bal Fe.
Hardened: Rock C 62-64
For punching and drawing dies, shear blades, knives, rotary slitters, gages, wear plates and cams, impact extrusion dies. Abrasion and wear resistant, non-deforming.
AISI Type D6 Air or oil hardening

FAGERSTA FB-H11
M-52, 0.40 C, 0.4 Mn, 1.05 Si, 5.0 Cr, 0.5 V, 1.35 Mo, bal Fe
Air or oil hardening hot work tool steel, chromium type, for forging dies and hot forming dies; AISI H11

FAGERSTA FB-H12
M-52, 0.35 C, 1 Si, 1.5 W, 1.6 Mo, 5 Cr, bal Fe.
Ht. Tr.: 216,000 TS; 185,000 YS, 14 El; 53 RA.
For trimmer dies, die casting dies, forging and bolt heading dies.
Hot work tool steel. AISI Type H12. Tough, shock resistant.

FAGERSTA FB-H13.
M-52; 0.35 C, 5 Cr, 1 V, 1.5 Mo, bal Fe.
Ht. Tr.: 290,000 TS; 228,000 YS; 3 El; C 55 Rock.
For forging and heading dies, bulldozer dies,
piercing and forming punches.
Hot work, air hardening tool steel.
AISI type H13, shock resisting.

FAGERSTA FB-M1.
M-52; 0.78 C, 3.8 Cr, 1.15 V, 1.5 W, 8.75 Mo,
bal Fe.
High speed steel for lathe tools, milling cutters,
drills, broaches; AISI M1.
Molybdenum type.

FAGERSTA FB-M2.
M-52, 0.83 C, 4.15 Cr, 1.9 V, 6.5 W, 0.5 Mo, bal Fe.
High speed steel, molybdenum-tungsten type,
for general purpose cutting tools, as drills,
lathe tools, milling cutters; AISI M2.

FAGERSTA FB-M3 (Class 2).
M-52; 1.20 C, 4.0 Cr, 3.0 V, 6.0 W, 6.0 Mo, bal Fe.
High speed steel for cutting tools, molybdenum-tungsten type; for lathe tools, gun drills, reamers,
thread chasers; high hardness.
AISI M3 Class 2.

FAGERSTA FB-M7.
M-52; 1.0 C, 3.75 Cr, 2.05 V, 1.75 W, 8.75 Mo,
bal Fe
High speed steel for cutting tools; AISI M7.

FAGERSTA FB-M10.
M-52; 0.90 C, 4.0 Cr, 2.0 V, 8.0 Mo, bal Fe
High speed steel for cutting tools, AISI M10.

FAGERSTA FB-O1
M-52; 0.95 C, 0.5 Cr, 0.5 W, bal Fe .
Ht Tr. 250,000 TS; 225,000 YS; 8 El; C 50 Rock.
For blanking and forming dies, punches, reamers,
plug and ring gauges, taps
Oil hardening tool steel. AISI Type O1,
shock resisting

FAGERSTA FB-06 GRAPHITIC.
M-52; 1.45 C, 0.8 Mn, 1.15 Si, 0.25 Mo, bal Fe.
AISI Type O6 oil hardening tool steel.

FAGERSTA FB-S1.
M-52; 0.55 C, 2 W, 1.7 Cr, 0.25 V, bal Fe
Ht. Tr.: 295,000 TS; 258,000 YS; 4 El; C 54 Rock
For chisels, punches, shear blades,
bolt heading dies, die casting dies.
Shock resisting tool steel.
AISI type S1, tough.

FAGERSTA FB-S1 MIRYCAL
M-52; 0.45-0.50 C, 0.2-0.5 Mn, 0.75-1.0 Si,
1.15-1.25 Cr, 0.15-0.25 V, 2.25-2.60 W, bal Fe.
AISI Type S1 shock resisting tool steel.

FAGERSTA FB-S4.
M-52, 0.55 C, 0.8 Mn, 2.0 Si, bal Fe.
AISI Type S4 shock resisting tool steel.

FAGERSTA FB-S5 TUFCUT.
M-52; 0.5-0.55 C, 0.6-0.8 Mn, 1.3-1.6 Si, 0.3-0.4 Mo,
bal Fe.
AISI Type S5 shock resisting tool steel.

FAGERSTA FB-S7 TUF DIE AIR HARDENING
Shock Resisting.
M-52; 0.5 C, 0.7 Mn, 0.25 Si, 3.25 Cr, 1.4 Mo,
bal Fe.
Air or oil hardening shock resisting tool steel;
AISI S7.

FAGERSTA FB-T1.
M-52; 0.70-0.75 C, 3.75-4.25 Cr, 1.05 V,
18.0 W, bal Fe.
High speed steel for general purpose machining;
AISI T1.

FAGERSTA FB-T4.
M-52; 0.68-0.75 C, 4.0 Cr, 1.05 V, 17.25 W,
0.5 Mo, 4.5 Co, bal Fe.
High speed steel for cutting tools
for machining tough metals; AISI T4.

FAGERSTA FB-W1.
M-52; 1.05 C, 0.25 Mn, 0.25 Si, bal Fe.
Ht. Tr.: 208,000 TS; 146,000 YS; 12 El; 460 Brin.
For cold working tools, dies, blanking and coining
dies, knurling and threading dies,
punches, stamps, taps, reamers.
AISI Type W1, water hardening.

FAGERSTA FB-W1 COLD HEADER DIE STEEL.
M-52; Composition by arrangement.
AISI Type W1 water hardening tool steel.

FAGERSTA FB-W1 EXTRA CARBON.
M-52; 1.0-1.1 C, 0.25-0.35 Mn, 0.25-0.35 Si, bal Fe.
AISI Type W1 water hardening tool steel.

FAGERSTA FB-W1 SPECIAL.
M-52; 1.0-1.2 C, 0.25-0.35 Mn, 0.2-0.3 Si, bal Fe.
AISI Type W1 water hardening tool steel.

FAGERSTA FB-W1 SPECIAL CARBON.
M-52; 1.0-1.2 C, 0.25-0.35 Mn, 0.2-0.3 Si, bal Fe.
AISI Type W1 water hardening tool steel.

FAGERSTA FB-W2
M-52; 1.05 C, 0.25 Mn, 0.25 Si, 0.20 V, bal Fe
Ht. Tr.: 210,000 TS, 148,000 YS; 10 El; 470 Brin
For cold working tools, dies,
blanking and coining dies, knurling and
threading dies, punches, stamps, taps, reamers
AISI Type W2, water hardening.

FAGERSTA HACK SAW
M-385, M-52, C, W, bal Fe
For hack saws, water hardening

FAGERSTA HIGH PRODUCTION
M-385, M-52, C, Cr, Mo, V, bal Fe
For production dies and tools, non-deforming.

FAGERSTA HOLLOW DRILL
M-385, M-52; 0.8 C, 0.3 Mn, bal Fe
For drills for mining and quarrying,
water hardening

FAGERSTA HOLLOW DRILL
M-608; 0.8 C, 0.3 Mn, bal Fe
For hollow drills, water hardened

FAGERSTA HOT DIE
M-385, M-52, C, Cr, W, bal Fe.
For hot work dies, hot work steel

FAGERSTA K291.
M-52; 0.12 C, 0.75 Cr, 3 Ni, bal Fe
For gears, camshafts, crankshafts,
case hardened, shock resistant

FAGERSTA K333
M-52; 0.15 C, 0.65 Cr, 1.25 Ni, bal Fe
For gears, camshafts, crankshafts,
case hardened, shock resistant

FAGERSTA K336
M-52, 0.18 C, 0.75 Cr, 3 Ni, bal Fe.
For gears, camshafts, crankshafts;
case hardened, heavy duty

FAGERSTA K669.
M-52; 0.30 C, 1.25 Cr, 4.25 Ni, bal Fe.
For gears, shafts; oil hardened, tough.

FAGERSTA K825.
M-52, 0.4 C, 1.4 Cr, 1.25 Ni, 0.2 Mo, bal Fe.
Ht. Tr.: 165,000 TS; 145,000 YS; 14 El; 350 Brin.
For gears, shafts, connecting rods, bolts,
fasteners, hardware.
Shock resistant, oil hardening.

FAGERSTA K845.
M-52; 0.35 C, 1.15 Cr, 2.6 Ni, bal Fe.
For gears, shafts, crankshafts; oil hardened, tough.

FAGERSTA L97.
M-52; 0.55 C, 3 Ni, 0.3 Mo, 0.4 Mn, 1 Cr, bal Fe.
For drop forgings dies, cold work tools; oil hardened, shock resistant.

FAGERSTA L441.
M-52; 0.20 C, 0.55 Mn, 1.8 Ni, 0.25 Mo, bal Fe.
For gears, shafts; case hardened.

FAGERSTA L536.
M-52; 0.30 C, 1.05 Cr, 3.25 Ni, 0.25 Mo, bal Fe.
Hardened: 213,000 min TS; 170,000 min YS; 8 min El, 25 min RA; 440-510 Brin.
Oil hardening steel for gears, shafts, machinery parts..

FAGERSTA NON-DEFORMING.
M-608, 0.95 C, 0.45 Cr, 1.05 Mn, 0.45 W, bal Fe.
For tools, dies; non-deforming

FAGERSTA OIL HARDENING.
M-385, M-52, C, Cr, W, bal Fe.
For blanking, stamping and forming dies and tools; non-deforming.

FAGERSTA OVERCOAT AXE
M-385, M-52; 1.0 C, 0.25 Mn, bal Fe.
For axes; water hardening

FAGERSTA OVERCOAT AXE.
M-608, 1.0 C, 0.25 Mn, bal Fe.
For axes, tools, water hardened

FAGERSTA P10
M-52; 0.70 C, 4.5 Cr, 18.5 W, 1.2 V, 0.6 max Co, bal Fe
For twist drills, hobs, cutters, reamers, high speed steel

FAGERSTA P15.
M-52, 0.8 C, 4.5 Cr, 18.5 W, 2.5 Co, 1.6 V, bal Fe
For planing and shaping tools, cutters, reamers; high speed steel

FAGERSTA PAVEMENT BREAKER
M-385, M-52; 0.65 C, 0.3 Mn, bal Fe
For spades, moil points for concrete breaking, water hardening

FAGERSTA PAVEMENT BREAKER.
M-608, 0.65 C, 0.30 Mn, bal Fe
For pavement breaking tools, water hardened

FAGERSTA POLHEIM WIRE
M-385; 1.8 C, 2 Cr, 2 Mn, 13 W, bal Fe
For wire drawing dies, oil hardened.

FAGERSTA POLHEM WIRE DRAWING.
M-608, 1.8 C, 2.0 Cr, 2.0 Mn, 13 W, bal Fe.
For wire drawing dies; oil hardened

FAGERSTA Q5.
M-52, 0.80 C, 1.2 Mo, 4.5 Cr, 18.5 W, 5.5 Co, 1.6 V, bal Fe.
For milling cutters, lathe and planer tools; high speed steel.

FAGERSTA Q10.
M-52; 0.80 C, 1 Mo, 4.5 Cr, 18.5 W, 10 Co, 1.6 V, bal Fe.
For lathe and planer tools, reamers, broaches, hobs, high speed steel.

FAGERSTA QRO-45 HOT WORK.
M-52; 0.30 C, 2.8 Cr, 0.5 V, 2.8 Mo, 2.8 Co, bal Fe.
Air or oil hardening tool and die steel for hot working operations.

FAGERSTA R140.
M-52; 0.10 C, 13.5 Cr, 1.1 Mo, bal Fe.
Annealed: 70,000 TS; 35,000 YS; 30 El; B 80 Rock.
Cold Drawn: 95,000 TS; 80,000 YS, 15 El; B 92 Rock.
For oil refinery and chemical plant equipment, valve trim, shafts. Corrosion resistant

FAGERSTA R320.
M-52; 0.09 max C, 17.2-18.7 Cr, 8.5-10.0 Ni, bal Fe.
Annealed: 78,000 min TS; 28,000 min YS; 40 min El; 55 min RA; B 90 Rock
80% Reduction. 259,000 TS; 228,000 YS; 5 El
For welded equipment in the food and chemical industries, washing machines, fittings, kitchen sinks.
Type 302 Stainless, austenitic.

FAGERSTA R350
M-52; 0.06 max C, 18.0-19.5 Cr, 8.5-10.0 Ni, 0.8-1.5 Mn, 0.25-0.75 Si, bal Fe
Annealed 80,000 TS, 35,000 YS, 60 El, B 80 Rock
Cold Drawn: 240,000 TS, 212,000 YS, 5 El.
For food, chemical, textile and plastic industries, storage tanks, vats, containers. Austenitic, stainless, oxidation resistant Type 304.

FAGERSTA R740.
M-52, 0.30 C, 14 Cr, 0.6 Mo, 0.4 Ni, bal Fe.
Annealed 95,000 TS, 50,000 YS, 25 El, B 92 Rock
Ht. Tr. 250,000 TS; 215,000 YS, 8 El; C 52 Rock
For cutlery, surgical instruments, gauges, shafts, hardware, gages, needle valves
Corrosion resistant, hardenable

FAGERSTA REGULAR.
M-608; 1.0 C, 0.35 Mn, bal Fe
For tools, drills, taps, water hardened

FAGERSTA RO 8155 HOT WORK
M-52, 0.40 C, 3.0 Cr, 0.5 Mo. bal Fe.
Air or oil hardening tool and die steel for hot working operations.

FAGERSTA ROLLED AUGER
M-608, 0.85 C, 0.30 Mn, bal Fe
For augers, drills, punches, water hardened.

FAGERSTA RRJ10
M-52; 0.08 max C, 11.5-13 Cr, 0.1-0.3 Al, bal Fe.
Annealed 71,000 TS, 42,600 YS, 22 El, 70 RA, 150 Brin.
Heat treated 175,000 TS, 145,000 YS, 21 El; 64 RA, 352 Brin.
For oil refinery and chemical plant equipment, Type 405, corrosion resistant

FAGERSTA RRJ11
M-52, 0.09-0.12 C, 13 Cr, 0.5 max Si, bal Fe
Annealed 75,000 TS, 40,000 YS, 35 El; 70 RA; 155 Brin
For turbine blades, valves, cutlery, surgical instruments, Type 403 and 410; corrosion resistant

FAGERSTA RRJ11
M-572, 0.15 max C, 11.5-13.5 Cr, 1 max Mn, 1 max Si, bal Fe
Annealed 80,000 TS, 40,000 YS, 35 El, 70 RA; 155 Brin.
Cold drawn 100,000 TS, 85,000 YS, 17 El, 60 RA, 205 Brin.
For valve parts, turbine blades, cutlery, knives, Type 410; corrosion resistant.

FAGERSTA RRJ14
M-52, 0.08 C, 13 Cr, 2 Ni, 1 Mo, bal Fe.
For oil refinery equipment; corrosion resistant.

FAGERSTA RRM20.
M-52; 0.07-0.12 C, 17 Cr, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refinery equipment, oil burners and heaters; Type 430; corrosion resistant.

FAGERSTA RRM22.
M-52; 0.2 C, 15-17 Cr, 1.25-2.5 Ni, bal Fe.
Heat treated: 100,000-135,000 TS; 78,000-112,000 YS; 25-15 El; 60-45 RA; 240-280 Brin.
For pump spindles, propeller shafts, aircraft structures; Type 431; stainless, hardenable.

FAGERSTA RRM23.
M-52; 0.10 C, 17 Cr, 8 Ni, Mo, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 60 El; B 80 Rock.
For chemical plant equipment, evaporators, digesters, acid tanks.
Stainless steel, acid resistant, austenitic.

FAGERSTA RRM24.
M-52; 0.10 max C, 17 Cr, 1.5 Mo, bal Fe .
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA, 150 Brin.
For oil refinery equipment, oil burners and heaters; Type 430Mo; corrosion resistant.

FAGERSTA RRM28.
M-52; 0.12 max C, 17 Cr, S, Se, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For screw machine products, shafts; Type 430F; corrosion resistant, free-cutting.

FAGERSTA RRNJ30.
M-52; 0.06 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS, 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers; Type 304; austenitic, stainless.

FAGERSTA RRNJ30.32.
M-52; 0.08-0.20 C, 2 max Mn, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 60 El; 70 RA; 150 Brin.
Cold drawn: 125,000 TS; 95,000 YS; 22 El; 55 RA, 277 Brin.
For oil refinery and chemical plant equipment; Type 302; stainless, austenitic.

FAGERSTA RRNJ31.
M-52; 0.05 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El, 75 RA; 150 Brin.
For chemical plant equipment, tanks, filters, mixers; Type 304; stainless, austenitic.

FAGERSTA RRNJ32.
M-52; 0.06 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks; Type 304; stainless.

FAGERSTA RRNJ33.
M-52; 0.10 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers; Type 302; stainless, austenitic.

FAGERSTA RRNJ35.
M-52; 0.05 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers; Type 304; stainless, austenitic.

FAGERSTA RRNJ36.
M-52; 0.03 max C, 19 Cr, 10 Ni, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 60 El; B 76 Rock.
For welded structures, chemical plant equipment, tanks, evaporators, digesters, agitators.
Type 304L stainless steel, austenitic.

FAGERSTA RRNJ38.
M-52; 0.08-0.15 C, 18 Cr, 9 Ni, P, S, Se, Zr, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For screw machine products, shafts; Type 303; stainless, austenitic.

FAGERSTA RRNJ40.
M-52; 0.08 max C, 18 Cr, 10 Ni, 1.5 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin
For acid resistant chemical plant equipment, tanks; Type 316; stainless, austenitic.

FAGERSTA RRNJ41.
M-52; 0.06 max C, 18 Cr, 9 Ni, 1.5 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316; stainless, austenitic.

FAGERSTA RRNJ42
M-52; 0.08 max C, 17 Cr, 12 Ni, bal Fe.
Annealed: 80,000 TS; 32,000 YS; 55 El; B 80 Rock.
For chemical plant equipment, evaporators, digesters, acid tanks.
Stainless steel; austenitic.

FAGERSTA RRNJ44.
M-52, 0.12 max C, 18 Cr, 10 Ni, 2.5 Mo, bal Fe.
Annealed 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316; stainless, austenitic.

FAGERSTA RRNJ45.
M-52; 0.06 max C, 18 Cr, 9 Ni, 1.5 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316; stainless, austenitic.

FAGERSTA RRNJ46.
M-52; 0.03 C, 17 Cr, 12 Ni, bal Fe.
Annealed: 78,000 TS, 30,000 YS; 60 El, B 78 Rock.
For chemical plant equipment, tanks, evaporators, digesters, mixers
Stainless steel, austenitic.

FAGERSTA RRNJ47
M-52; 0.10 C, 18 Cr, 15 Ni, bal Fe.
Annealed: 85,000 TS, 36,000 YS; 55 El; B 84 Rock.
For chemical and textile plant equipment, evaporators.
Stainless steel, austenitic. Heat and corrosion resistant.

FAGERSTA RRNJ50.
M-52; 0.06 C, 18 Cr, 12 Ni, 0.6 Cb, bal Fe.
Annealed: 88,000 TS; 38,000 YS; 55 El; B 82 Rock.
For welded structures, chemical plant equipment, evaporators, mixers, digesters.
Type 347 stainless steel, austenitic, stabilized, welding grade.

FAGERSTA RRNJ51.
M-52; 0.08 max C, 18 Cr, 8 Ni, Ti, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, tanks; Type 321; stainless, austenitic.

FAGERSTA RRNJ52.
M-52; 0.12 C, 18 Cr, 5 Ni, 9 Mn, bal Fe.
Annealed: 100,000 TS; 50,000 YS; 60 El; B 90 Rock.
For pumps, valves, valves bodies, food processing equipment, digesters, hardware, spray nozzles.
Type 202 and 204 stainless steel non-hardenable.

FAGERSTA RRNJ59.
M-52; 0.08-0.16 C, 12 Cr, 12 Ni, bal Fe.
For valves; corrosion resistant.

FAGERSTA RRO4.
M-52; 0.10 max C, 5 Cr, bal Fe
Annealed: 70,000 TS; 30,000 YS; 28 El; 65 RA; 160 Brin.
For oil refinery equipment; Type 501; creep and heat resistant

FAGERSTA RRO6
M-52; 0.10 max C, 5 Cr, bal Fe.
Annealed. 70,000 TS, 30,000 YS; 28 El; 65 RA; 160 Brin.
For oil refinery equipment; Type 501; creep and heat resistant.

FAGERSTA RRS70.
M-52, 0 13-0 18 C, 13 Cr, bal Fe.
Annealed: 80,000 TS, 42,000 YS; 33 El; 65 RA, 165 Brin.
For turbine blades, valves, cutlery, surgical instruments; Type 410; corrosion resistant.

FAGERSTA RRS70(72).
M-52, 0.15 min C, 12-14 Cr, bal Fe.
Annealed· 88,000 TS, 40,000 YS; 32 El, 68 RA; 170 Brin.
For cutlery, valve trim, turbine blades; Type 420; stainless, hardenable

FAGERSTA RRS71(73)
M-52, 0 15 min C, 12-14 Cr, bal Fe
Annealed: 88,000 TS; 40,000 YS, 32 El, 68 RA; 170 Brin.
For cutlery, valve trim, turbine blades, Type 420; stainless, hardenable.

FAGERSTA RRS72.
M-52, 0 26-0 37 C, 13 Cr, bal Fe.
Annealed· 95,000 TS, 50,000 YS, 25 El; 55 RA, 195 Brin.
For valves, cutlery, surgical and dental instruments, Type 420; corrosion resistant.

FAGERSTA RRS73.
M-52; 0.38-0.45 C, 13 Cr, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 20 El; 50 RA, 210 Brin.
For valves, cutlery, surgical and dental instruments; Type 420, corrosion resistant.

FAGERSTA RRS74.
M-52; 0.20 C, 13 Cr, 1 Mo, bal Fe.
For oil refinery and chemical plant equipment, corrosion resistant

FAGERSTA RRT80.
M-52; 0-12 max C, 20 Cr, 20 Ni, bal Fe.
For valves; corrosion and heat resistant.

FAGERSTA RRT83.
M-52; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El; 65 RA; 185 Brin.
At 1200°F: 57,000 TS; 22,000 YS; 32 El; 45 RA.
For furnace parts, valves, pumps, heat treating boxes; Type 310; austenitic, heat resistant.

FAGERSTA RRT85.
M-52; 0.15 C, 23 Cr, 14 Ni, S, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 50 El; B 83 Rock.
For heat treating boxes, furnaces, gas and oil heater baffles, salt pots. Free-machining.
Type 309S stainless steel, austenitic, heat and corrosion resistant.

FAGERSTA RRV60.
M-52; 0.35 C, 25 Cr, bal Fe.
Annealed: 85,000 TS; 50,000 YS; 30 El; 55 RA; 180 Brin.
For furnace parts and equipment; Type 446; heat resistant.

FAGERSTA RRV61.
M-52; 0.15 max C, 25 Cr, 2.5 Mo, 1.8 Ti, bal Fe.
For welded furnace parts and equipment; corrosion and heat resistant.

FAGERSTA RRV61.
M-52; 0 35 C, 23-27 Cr, bal Fe.
Annealed: 90,000 TS; 60,000 YS, 20 El; 45 RA, 180 Brin.
For furnace parts, heat treating boxes; Type 446; heat resistant.

FAGERSTA RRV62.
M-52; 0.12 max C, 26 Cr, 4 Ni, bal Fe.
Cast· 90,000 TS; 65,000 YS; 2 El; 212 Brin.
For furnace parts and equipment, heat treating boxes; Type CC-50; corrosion and heat resistant

FAGERSTA RRV62
M-52; 0 25 C, 23-30 Cr, 3-5 Ni, bal Fe.
Normalized: 93,000 TS; 71,000 YS, 20 El; 48 RA; 210 Brin
For valves, pumps, furnace parts; Type 327; heat resistant.

FAGERSTA RRV64.
M-52, 0.10 max C, 26 Cr, 5 Ni, 1.5 Mo, bal Fe.
For furnace parts and equipment, salt pots; Type 329, heat resistant.

FAGERSTA RRV64.
M-52; 0.20 C, 23-28 Cr, 2.5-5.0 Ni, 1-2 Mo, bal Fe.
Normalized. 103,000 TS; 78,000 YS, 18 El; 45 RA; 235 Brin.
Annealed: 95,000 TS; 41,000 YS; 29 El; 60 RA, 225 Brin.
For valves, pumps, furnace parts; Type 327, heat resistant

FAGERSTA RRV66.
M-52, 0.35 max C, 20 Cr, bal Fe.
For cutlery, valves, surgical instruments; Type 442; corrosion resistant.

FAGERSTA S310.
M-52; 0.55 C, 1.75 Si, 0.75 Mn, bal Fe.
For springs; oil hardened.

FAGERSTA SHOE DIE.
M-385; 0.55 C, 0 65 Cr, 0.35 Mo, bal Fe.
For cutting dies for leather, paper and rubber; water hardened.

FAGERSTA SOLID DRILL.
M-385; 1.0 C, 0.3 Si, 0.3 Mn, bal Fe.
For drills, chisels, taps; water hardened.

FAGERSTA SPECIAL.
M-608; 1.0 C, 0.35 Mn, bal Fe.
For tools, drills, taps; water hardened.

FAGERSTA SSL.
M-52; 0.8 C, 18.5 W, 1.2 Mo, 2.5 Co, 4.5 Cr, 1.6 V, bal Fe.
For cutting and planing tools, milling cutters; high speed steel.

FAGERSTA TWISTED AUGER.
M-385; 0.7 C, 0.3 Si, 0.35 Mn, bal Fe.
For augers for coal and ore mining; water hardened.

FAGERSTA W221.
M-52; 1.2 C, 0.55 W, 0.1 V, 0.3 Mn, bal Fe.
For twist drills, hobs, taps, reamers;
water hardened.

FAGERSTA W401.
M-52; 1.1 C, 0.3 Cr, 1 W, 0.1 V, bal Fe.
For twist drills, reamers, taps; water hardened.

FAGERSTA W406.
M-52; 1.4 C, 0.4 Cr, 5.5 W, 0.5 V, bal Fe.
For finishing cutters; water hardened.

FAGERSTA WKE-4.
M-52; 1.25 C, 4.1 Cr, 3.1 V, 9.0 W, 3.1 Mo, 9.0 Co, bal Fe.
Heat treated: Rock C 68.
For cutters, thread tools, lathe and planer tools.
Super high speed steel.

FAGERSTA WKE-45.
M-52; 1.40 C, 4.2 Cr, 3.9 V, 9.0 W, 3.5 Mo, 12.5 Co, bal Fe.
High speed steel for finish machining steel;
high hardness, good wear resistance,
good red hardness.

FAHLUN BRILLIANTS (FALUNER DIAMENTEN).
German; 60 Sn, 40 Pb.
For ornaments.

FAHR.
Fe-Ni-Cr.
For heat resistant parts, heat resistant.

FAHRALLOY C.
M-994; 56 Ni, 14 Cr, 17 Mo, 5 W, bal Fe.
For pumps, valves, plastic and
chemical plant equipment.
Heat and corrosion resistant.

FAHRALLOY CD.
M-994; 0.25 C, 1 0 Si, 27-30 Cr, 3-6 Ni, bal Fe.
Cast: 85,000 TS; 48,000 YS; 16 El; 190 Brin.
At 1600°F: 23,000 TS; 18 El.
For salt pots, furnaces, sintering bars,
cracking equipment, recuperators. High oxidation
resistance in S-atm. Corrosion
resistant casting alloy.
Type HD.

FAHRALLOY CF-4.
M-994; 0.04 C, 1.5 Si, 17-20 Cr, 9-12 Ni, bal Fe.
Annealed: 79,000 TS; 34,000 YS; 71 El.
For computer parts, engine mountings, filter press
plates, hardware, oil burner parts, spray nozzles
Stainless casting alloy, austenitic, non-hardenable.

FAHRALLOY CG-12.
M-994; 0.12 C, 1.5 Si, 20-23 Cr, 10-13 Ni, bal Fe.
Annealed: 77,000 TS; 36,000 YS; 50 El;
163 Brin.
For oil refinery and chemical processing
equipment, power plants, pumps, valve bodies.
Heat and corrosion resistant casting alloy,
austenitic, non-hardenable.

FAHRALLOY Cr-W.
M-994; 2.25 C, 11 Cr, 1 max Si, 1 W, bal Fe.
For heat resistant castings;
corrosion and heat resistant.

FAHRALLOY D-1.
M-994; 2.5-3 C, 10-12 Cr, 4-5 Mo, 1 max Si,
1 max Mn, bal Fe.
For heat resistant castings; corrosion and
heat resistant.

FAHRALLOY F-1.
M-994; 0.35-0.75 C, 37-41 Ni, 17-21 Cr, bal Fe.
For heat resistant castings; heat resistant, Type HU.

FAHRALLOY F-2.
M-994; 0.5 C, 21-24 Cr, 3-6 Ni, 1.75 max Si,
2 max Mn, bal Fe.
For heat resistant castings;
corrosion and heat resistant.

FAHRALLOY F-2-B.
M-994; C, 22 Cr, 9 Ni, bal Fe.
For castings; heat resistant.

FAHRALLOY F-2-B.
M-994; 0.8 min C, 16-23 Cr, 7-11 Ni, Si, Al,
bal Fe.
For heat and corrosion resistant parts;
heat and corrosion resistant.

FAHRALLOY F-3.
M-994; 0.5 C, 26-30 Cr, 4 Ni, 1.5 Si, 1 Mn, bal Fe.
For castings; heat resistant.

FAHRALLOY F3X.
M-994, 3.1-3.5 C, 26.5-28.5 Cr, 2.5-4 Ni,
1.25 max Si, 0.5 max Mn, bal Fe.
For heat resistant castings; corrosion and
heat resistant, cast iron.

FAHRALLOY F-5.
M-994; 0.35-0 75 C, 15-19 Cr, 64-68 Ni, 2 5 max Si,
2 max Mn.
For heat resistant castings,
corrosion and heat resistant; Type HX.

FAHRALLOY F-5-B.
M-994; 0.51-0 80 C, 49-57 Ni, 16-23 Cr, Mn Si,
bal Fe.
For heat and corrosion resistant parts;
heat and corrosion resistant.

FAHRALLOY F-10.
M-994, 0.2-0.5 C, 23-27 Cr, 11-14 Ni, bal Fe.
For heat resistant castings; heat resistant, Type HH

FAHRALLOY F-10LC.
M-994, 0 2 C, 22-26 Cr, 12-15 Ni, 2 Si, 1.5 Mn,
bal Fe.
Annealed: 88,000 TS; 50,000 YS, 38 El; 190 Brin
For chemical plant equipment, valves, pumps,
digester fittings; Type CH-20, stainless, austenitic.

FAHRALLOY F-11
M-994; C, 14-16 Cr, 49-51 Ni, 19-21 Mo and W,
bal Fe.
For heat resistant castings,
corrosion and heat resistant.

FAHRALLOY F-12.
M-994; 1.0 C, 28 Cr, 10 Ni, bal Fe.
For furnace parts; heat resistant

FAHRALLOY F-35.
M-994; 1 C, 33-36 Cr, bal Fe.
For heat resistant castings; heat resistant

FAHRALLOY F-35 N.
M-994; 2 C, 33-36 Cr, 9-11 Ni, 2 max Si,
2 max Mn, bal Fe.
For heat resistant castings; corrosion
and heat resistant

FAHRALLOY F-0726.
M-994; 0.5 C, 6-8 Cr, 25-27 Ni, 1 max Si,
1.25 max Mn, bal Fe.
For heat resistant castings; corrosion and
heat resistant.

FAHRALLOY F-0821.
M-994; 0.5 C, 7-10 Cr, 21-23 Ni, 1.5 max Si,
1 max Mn, bal Fe.
For heat resistant castings;
corrosion and heat resistant.

FAHRALLOY F-1260.
M-994; 0.35-0.75 C, 10-14 Cr, 58-62 Ni, 2.5 max Si, 2 max Mn.
For heat resistant castings; corrosion and heat resistant; Type HW.

FAHRALLOY F-1400.
M-994; 0.15 max C, 12-14 Cr, 1.5 max Ni, bal Fe.
Heat treated: 100,000-216,000 TS; 75,000-173,000 YS; 28-6 El, 62-9 RA; 185-415 Brin.
For chemical plant equipment, heat treating boxes; corrosion resistant; Type CA-15.

FAHRALLOY F-1535.
M-994; 0.35-0.75 C, 13-17 Cr, 33-37 Ni, 2.5 max Si, bal Fe .
Cast: 60,000 TS; 38,000 YS; 20 El; 21 RA; 156 Brin.
Annealed: 84,000 TS, 50,000 YS; 10 El; 18 RA; 200 Brin.
For furnace parts, muffles, heat treat boxes, pots; Type HT; heat and corrosion resistant.

FAHRALLOY F-1800.
M-994; 0.3 max C, 18-22 Cr, 2 Ni, 1.5 Si, 1 Mn, bal Fe.
For castings; stainless; Type CB-30.

FAHRALLOY F-1808.
M-994, 0.2 max C, 18-21 Cr, 8-11 Ni, 2 Si, 1.5 Mn, bal Fe
For castings; stainless, austenitic, Type CF-20

FAHRALLOY F 1808Cb
M 994, 0.08 max C, 18-21 Cr, 9-12 Ni, Cb = 8 × C, bal Fe
Annealed. 85,000 TS; 45,000 YS, 45 El; 165 Brin
For welded construction, chemical plant equipment, Type 347, stainless, stabilized.

FAHRALLOY F-1808LC
M-994, 0.08 max C, 18-21 Cr, 8-11 Ni, 2 Si, 1.5 Mn, bal Fe.
Annealed· 78,000-85,000 TS, 42,000-45,000 YS; 50-45 El, 155-165 Brin
For valves, pumps, mixers, spray nozzles, evaporators, Type CF-8, stainless, austenitic.

FAHRALLOY F-1808Mo
M-994, 0.08 max C, 18-21 Cr, 9-12 Ni, 2 Si, 1.5 Mn, 2-3 Mo, bal Fe.
Annealed· 80,000 88,000 TS, 45,000-48,000 YS; 48-42 El, 160-170 Brin.
For valves, pumps, mixers, spray nozzles, evaporators; Type CF-8M, stainless, austenitic.

FAHRALLOY F-1824.
M-994; 0.08 C, 16-19 Cr, 21-25 Ni, 2 Si, 1.5 Mn, 2-3 Mo, bal Fe
For heat resistant castings; corrosion and heat resistant, Type CN-7.

FAHRALLOY F-2210
M-994; C, 20-23 Cr, 9-11 Ni, Al, bal Fe.
For heat resistant castings; corrosion and heat resistant.

FAHRALLOY F-2520.
M-994, 0.25 C, 23-27 Cr, 19-22 Ni, 2 Si, 2 Mn, bal Fe.
For heat resistant castings; corrosion and heat resistant; Type CK-25.

FAHRALLOY F-2520-HK.
M-994; 0.2-0.6 C, 24-28 Cr, 18-22 Ni, 3 max Si, 2 max Mn, bal Fe.
For heat resistant castings; corrosion and heat resistant; Type HK.

FAHRALLOY F-2802.
M-994; 0.5 C, 26-30 Cr, 4 max Ni, 2 max Si, bal Fe.
Cast: 70,000-110,000 TS; 65,000-75,000 YS; 2-19 El; 190-223 Brin.
For ore roasting furnaces, rabble arms, dampers; Type HC; heat resistant.

FAHRALLOY F-2808.
M-994; 0.3 max C, 26-30 Cr, 8-11 Ni, 2 Si, 1.5 Mn, bal Fe.
Cast: 95,000 TS; 55,000 YS; 16 El; 18 RA; 212 Brin.
Annealed: 90,000 TS, 50,000 YS, 18 El; 20 RA; 197 Brin.
For valves, pumps, fittings, Type CE-30; corrosion resistant.

FAHRALLOY F-2810.
M-994; 0.2-0.5 C, 26-30 Cr, 8-11 Ni, 2 max Si, 2 max Mn, bal Fe.
For heat resistant castings; corrosion and heat resistant; Type HE.

FAHRALLOY F-2817.
M-994, 0.25 C, 27-30 Cr, 16-18 Ni, 1.5 Si, 1.5 Mn, bal Fe.
For heat resistant castings; corrosion and heat resistant.

FAHRALLOY F-2817-HI.
M-994, 0.2-0.5 C, 26-30 Cr, 14-18 Ni, 2 max Si, bal Fe.
Cast: 80,000 TS; 45,000 YS; 12 El, 180 Brin.
Aged· 90,000 TS, 65,000 YS, 6 El, 200 Brin.
For valves, fittings, pumps, furnace parts; Type HI; corrosion and heat resistant

FAHRALLOY F-3020
M-994, 0.2-0.6 C, 28-32 Cr, 18-22 Ni, 0.3 max Si, 2.0 max Mn, bal Fe.
For heat resistant castings, corrosion and heat resistant; Type HL

FAHRALLOY-HB.
M-994; 0.40 C, 1.5 Si, 18-22 Cr, 2 max Ni, bal Fe.
Annealed: 95,000 TS, 60,000 YS, 15 El, 195 Brin.
For furnace brackets and hangers, rabble arms, valve parts and bodies Heat and corrosion resistant casting alloy. Type CB-30.

FAHRALLOY-HT75
M-994, 0.75 C, 1.75 Si, 13-17 Cr, 33-37 Ni, bal Fe.
Cast: 70,000 TS; 40,000 YS; 10 El; 180 Brin.
At 1400°F, 35,000 TS; 26,000 YS; 10 El.
For air ducts, brazing trays, cyanide pots, fan blades, glass molds.
Heat and abrasion resistant casting alloy.
Type HT. High fatigue strength.

FAHRALLOY-HTCb.
M-994; 0.50 C, 1.75 Si, 13-17 Cr, 33-37 Ni, 1.0 Cb, bal Fe
Cast. 68,000 TS, 39,000 YS, 12 El; 175 Brin.
For glass molds, gear spacers, heat treating fixtures, muffles Heat and corrosion resistant casting alloy.
Type HT. High fatigue strength

FAHRALLOY-HU Cb.
M-994, 0.50 C, 1.75 Si, 17-21 Cr, 37-41 Ni, 1.0 Cb, bal Fe.
Cast. 70,000 TS; 40,000 YS; 9 El; 170 Brin.
For carburizing retorts, lead pots, resistor guides, muffles, pouring spouts, conveyor screws.
Heat and corrosion resistant casting alloy.
Type HU.

FAHRENWALD RESISTING GOLD ALLOY.
Eng.; 90-60 Au, 10-40 Pd.
For chemical equipment; white gold, high acid resistance.

FAHRIG ANTIFRICTION METAL .
Eng.; 90 Sn, 10 Cu.
For bearings; antifriction.

FAHRITE alloys see OHIOLOY alloys.

FAIRLEYS.
M-491; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tools and cutters; high speed steel.

FAKIR FAS2.
M-1312; 0.53 C, 0.90 Si, 0.9 Mn, bal Fe.
For gears, bolts, punches, crimpers; water hardened.

FAKIR FC1.
M-1312; 1.05 C, 1.0 Cr, 0.3 Mn, bal Fe.
For bearings, bushings, liners; water hardened, wear resistant.

FAKIR FGS.
M-1312; 1.05 C, 1.0 Cr, 1.15 W, 0.9 Mn, bal Fe.
For bearings, cutters, punches; water hardened, wear resistant.

FAKIR FJS.
M-1312; 0.9 C, 1.9 Mn, 0.1 V, bal Fe.
For punches, upsetters, blanking dies; oil hardened, nondeforming.

FAKIR FKL.
M-1312; 0.55 C, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold header and upsetter dies, crimpers; oil hardened, tough.

FAKIR FKO-10.
M-1312; 0.78 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, form cutters, hobs; high speed steel, heavy duty.

FAKIR FKP.
M-1312; 0.50 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant.

FAKIR FP.
M-1312; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel.

FAKIR FRS27MO.
M-1312; 0.95 C, 4 Cr, W, Mo, V, bal Fe
For form and milling cutters, reamers, hobs; high speed steel.

FAKIR FSC.
M-1312; 2.1 C, 11.5 Cr, 0.70 W, bal Fe.
For blanking and forming dies, punches; oil hardened, nondeforming.

FAKIR FSD.
M-1312; 0.35 C, 0.18 V, 1.05 Cr, 1.85 W, bal Fe.
For header dies, upsetters, punches, crimpers; oil hardened, tough.

FAKIR FSM.
M-1312; 0.35 C, 0.18 V, 1.05 Cr, 1.85 W, bal Fe.
For header dies, shears, punches, upsetters; oil hardened, tough.

FAKIR FSP.
M-1312; 0.30 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe.
For upsetters, punches, rivet sets; hot work steel, oil hardened.

FAKIR FSS.
M-1312; 1.05 C, 1.0 Cr, 1.15 W, 0.90 Mn, bal Fe.
For bearings, cutters, bushings; water hardened, wear resistant.

FAKIR FSZ.
M-1312; 1.4 C, 0.3 Cr, 0.1 V, 0.3 Mn, bal Fe.
For engravers tools, milling cutters, reamers; water hardened.

FAKIR FW2.
M-1312; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For cutters, drills; Type W1; water hardened.

FAKIR FW3.
M-1312; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For cutters, drills, hobs; Type W1; water hardened.

FAKIR FW4.
M-1312; C, bal Fe.
For tools, cutters; water hardened.

FAKIR FW5.
M-1312, C, bal Fe.
For tools, cutters; water hardened.

FAKIR FW6.
M-1312; C, bal Fe.
For tools, cutters; water hardened.

FAKIR FWM.
M-1312; C, bal Fe
For tools, cutters; water hardened.

FAKIR FWN.
M-1312, 0.55 C, Ni, Cr, Mo, V, bal Fe.
For punches, crimpers, upsetters; oil hardened, shock resistant.

FAKTUM.
M-912; 0.26-0.34 C, 2.2-2.5 Cr, 0.13-0.18 V, bal Fe.
For tools, dies, hot work steel.

FALCON 4.
M-435; 0.45 C, 2.25 W, 1.5 Cr, 0.25 V, bal Fe.
For chisels, pneumatic tools; shock resistant.

FALCON 6.
M-435; 0.55 C, 2.25 W, 1.25 Cr, 0.25 V, bal Fe.
For punches, shear blades, dies; shock resistant.

FALCON EXTRA.
M-253; high C, bal Fe.
For chisels, punches, see Seminole.

"F" ALLOY.
M 331; 2.5 Cu, 20 Zn, 0.5 Mg, 0.5 Mn, 0.75 Si, bal Al.
Heat treated. 8100 TS; 57,000 YS, 19 El.
For aircraft parts, structures; die casting.

FALLS 4-11-44.
M-92; 30 Ni, 30 Cr, bal Fe.
For strengthening high Si iron.

FALLS NO 11.
M-92; Cu alloy.
For high conductivity Cu castings, deoxidizers, degasifier

FALLS NO. 12 ALUMINUM.
M-92; 7.0-8.5 Cu, bal Al.
Cast: 19,000-22,000 TS; 14,000 YS; 1.5-2.0 El, 50 Brin.
For crankcases, vacuum cleaners; not heat treatable.

FALLS NO. 14.
M-92; Cu alloy.
For pressure tight castings; for Cu base alloys.

FALLS NO. 21.
M-92; Mn-Cu.
For Mn bronze hardener; hardener.

FALLS NO. 31 Al BRONZE HARDENER.
M-92; Fe-Al-Cu.
For producing Al bronze; 89 Cu, 10 Al, 1 Fe.

FALLS NO. 34 Al BRONZE HARDENER.
M-92; Fe-Al-Cu.
For producing Al bronze; 4 Fe, 10 Al, 86 Cu.

FALLS NO. 43 ALUMINUM.
M-92; 5 Si, bal Fe.
Cast: 17,000-19,000 TS; 9000 YS; 6-3 El.
For castings; corrosion resistant.

FALLS NO. 108 ALUMINUM.
M-92; 3 Si, 4 Cu, bal Al.
Cast: 19,000 TS; 14,000 YS; 1.5 El.
For castings of intricate design; pressure tight.

FALLS NO. 154 ALLOY.
M-92; 45 Ni, 15 Cr, bal Fe.
For ladle additions to iron.

FALLS NO. 195 ALUMINUM.
M-92; 4.5 Cu, bal Al.
Cast: 21,000 TS; 14,000 YS; 2.0 El.
For castings of high strength; heat treatable.

FALLS NO. 214 ALUMINUM.
M-92; 4 Mg, bal Al.
Cast: 22,000-25,000 TS, 12,000 YS; 9-6 El.
For castings; corrosion resistant.

FALLS BORON ALUMINUM.
M-92; 1 B, bal Al.
For introducing boron in Al alloys; grain refiner.

FALLS BORON COPPER 2%.
M-92; 2 B, bal Cu.
For master alloy for bronzes; grain refiner.

FALLS COPPER ALUMINUM.
M-92; 50 Cu, bal Al.
For Cu addition to Al alloys; alloying

FALLS COPPER-NICKEL.
M-92; 50 Ni, bal Cu.
For alloying for nickel bronzes.

FALLS FERRO ZINC. 5%.
M-92; 5 Fe, bal Zn.
For adding Fe to brasses and bronzes; imparts hardness and creep resistance.

FALLS LITHIUM ALUMINUM 5%.
M-92; 5 Li, bal Al.
For Li additions to Al alloys; diminishes porosity.

FALLS LITHIUM COPPER 2%.
M-92; 2 Li, bal Cu.
For degasifier and deoxidizer for Cu alloys; for dense, non-porous castings.

FALLS MAGNESIUM ZINC. 4%.
M-92; 4 Mg, bal Zn
For adding Mg to Zn base alloys; imparts hardness and creep resistance.

FALLS MANGANESE COPPER.
M-92, 30 Mn, bal Cu.
For Mn additions to Cu base alloys.

FALLS MANGANESE ZINC 4%.
M-92; 4 Mn, bal Zn.
For adding Mn to Zn base alloys, imparts hardness and creep resistance.

FALLS NICKEL COPPER.
M-92; 65 Ni, bal Cu.
For ladle additions to iron and steel.

FALLS PHOSPHOR COPPER.
M-92; 15 P, bal Cu.
For deoxidizing Cu base alloys.

FALLS SILICON ALUMINUM.
M-92; 50 Si, bal Al.
For Si addition to Al alloys; alloying.

FALLS SILICON COPPER.
M-92; 10-30 Si, bal Cu.
For Si additions to Cu base alloys.

FALLS SPECIAL PATTERN ALUMINUM.
M-92; Si, Ti, bal Al.
For patterns, match plates; small top shrinkage.

FALLS TITANIUM ALUMINUM.
M-92; 2.5-5.0 Ti, bal Al
For Ti addition to Al alloys; alloying.

FALLS TITANIUM ALUMINUM.
M-92; 5 Ti, bal Al.
For addition of Ti to aluminum alloys; increases fluidity and ductility.

FALLS V-25.
M-92; 25 Ni, bal Cu.
For Ni additions to bronze; hardener.

FAMA 100.
M-Sweden, 24 Ni, 13 Al, 4 Cu, bal Fe.
For permanent magnets, electrical and magnetic equipment High permeability.

FAMA 600
M-Sweden; 24 Ni, 13 Al, 4 Cu, bal Fe.
For permanent magnets, electrical and magnetic equipment. High permeability.

FAMA 700.
M-Sweden; 21 Ni, 12 Co, 10 Al, 6 Cu, bal Fe
For permanent magnets, electrical and magnetic equipment High permeability

FAN BLADES
Eng ; 61. Cu, 37.0 Zn, 1.5 Pb.
For fan blades; free-cutting.

FANITE.
M-53, 55 Zn, bal Cu. For brazing metal.

FANSTEEL NO. 1.
M-53, Cu alloy
For soldering tips; for low P M. solders.

FANSTEEL NO. 2.
M-53, Cu alloy
For soldering tips, for heavy duty service.

FANSTEEL 17
M-53, 6 Ni, 4 Cu, bal W
Sintered: 90,000 TS, 1 El, 230-255 Brin.
For rotors, flywheels, governors, radiation shields. Machinable Powder metallurgy.

FANSTEEL 21
M-53; 85-90 W, 10-15 Ag
Sintered: 75,000 TS
For high temperature rocket hardware.
Silver infiltrated tungsten High density 33% elect. cond.

FANSTEEL 42.
M-53; 0.5 Ti, 0.08 Zr, bal Mo
Sheet. 120,000-145,000 TS, 105,000-135,000 YS; 7-16 El.
At 2400°F. 50,000 TS.
For high temperature applications, aircraft skins and structural parts.
High recrystallization temperature, good hot strength.

FANSTEEL 60.
M-53; 10 W, 90 TA.
Sheet: 165,000 TS; 165,000 YS; 3 El, Rock B 97.
At 1500°F: 104,000 TS; 96,000 YS; 3 El.
For chemical equipment to resist corrosion and high temperatures, missile nozzles, electronic components.
High corrosion resistance. Work hardens.

FANSTEEL 77.
M-53; W base alloy.
High density alloy; 90,000 TS; 1 El; 230-255 Brin.
For rotors, flywheels, governor weights, radiation shields; machinable.

FANSTEEL 80.
M-53; 1 Zr, bal Cb.
At 1500°F: 32,000 TS; 28,000 YS; 15 El.
At 2500°F: 8000 TS; 6000 YS; 50 El.
At Rt; 50,000 TS; 37,000 YS; 15 El; B 67 Rock.
For missile and rocket components.
High heat and corrosion resistance.

FANSTEEL 82.
M-53; 32 Ta, 1.0 Zr, 0.005 C, bal Cb.
At 2000°F: 30,000 TS.
At 2400°F: 12,000 TS.
For missile and other high temperature applications; heat and oxidation resistant.

FANSTEEL 85.
M-53; 0.6-1.1 Zr, 26-29 Ta, 10-12 W, bal Cb.
At 70°F: 109,000 TS; 92,000 YS; 14 El.
At 2000°F 55,000 TS; 43,000 YS; 20 El.
For space vehicles, nuclear reactors.
Good combination of density, strength, and oxidation resistance at high temperatures.

FANSTEEL 99.
M-53; 1 Ni, bal W.
Sintered: 100,000 TS; 80,000 YS, 6 El.
For missile hardware, rotors, shields, counterweights.
Heavy metal, heat resistant.

FANSTEEL 222.
M-53; 8.5-9.5 W, 2.0-2.8 Hf, 0.0135 max C, 0.06 max Cb, bal Ta.
Stress Relieved (90% cold worked): 220,000 TS; 190,000 YS.
Recrystallized: 180,000 TS; 170,000 YS; 28 El
For aerospace equipment supersonic air and space craft, missile hardware, liquid metal reactors.
Low transition temperature, good creep properties.
Resists extreme environmental conditions

FANSTEEL 601.
M-53; Cu alloy.
Heat treated: 65,000 TS; 55,000 YS; 20 El; 125 Brin.
For soldering iron tips; elec. cond. 85.

FANSTEEL 602.
M-53, Cu alloy
Heat treated: 75,000 TS; 70,000 YS; 15 El; 150 Brin.
For collector rings, circuit breaker parts, torch tips, commutator segments; heat treatable, elec. cond. 80.

FANSTEEL 603.
M-53; Cu alloy.
Heat treated: 120,000 TS; 100,000 YS; 8 El; 190 Brin.
For springs, slip rings, circuit breakers, switch blades; heat treatable, elec. cond. 50.

FANSTEEL 606.
M-53; Cu alloy.
Heat treated: 95,000-115,000 TS; 95,000 YS; 10-15 El; 240 Brin.
For springs, vibrators, circuit breakers, switch blades; heat treatable, corrosion resistant, elec. cond. 53.

FANSTEEL 607.
M-53; Cu alloy.
Heat treated: 175,000-195,000 TS; 170,000 YS; 2-5 El; 420 Brin.
For springs, virbrator arms, contact brushes, fuse clips; heat treatable, elec. cond. 24.

FANSTEEL BL2.
M-53; 1 Ni, bal W.
For counterweights, gyros; high density.

FANSTEEL SCB-291.
M-53; 10 W, 10 Ta, bal Cb.
At 70°F: 75,000 TS; 60,000 YS; 25 El; Rock B 87.
At 1500°F: 46,000 TS; 36,000 YS; 21 El.
At 2500°F: 17,000 TS; 13,000 YS; 24 El.
For high temperature applications, space craft.
Readily workable. Good creep resistance.
Excellent high temperature strength.

FANWELD.
M-53, W, Cr, Co, TaC, CbC.
Cast: 530 Brin.
For hard facing welding rod, hot work dies; wear resistant, high red hardness.

FARCO.
M-253.
For solder for Al, stainless steel, Monel; corrosion resistant.

FARM-ALLOY.
M-507, 2 C, 12 Cr, 4 Mo, 1 V, 3 Ni, 2 Mn, 0.5 B, bal Fe.
Welded: 70,000 TS; 580 Brin
For hard facing electrodes; wear resistant.

FARMFACE
M-9; 4.5 C, 6.0 Mn, 2.0 Si, 30.0 Cr, bal Fe.
Welded. 600 Brin
For hard facing rod, austenitic, wear resistant.

FARRELL-CHEEK F-85.
M-220; 0.25-0.35 C, 1.2-1.4 Mn, 0.35-0.60 Si, 0.2-0.3 Mo, bal Fe.
Annealed: 85,000 TS, 53,000 YS; 22 El, 35 RA, 195 Brin.
Heat treated 105,000-150,000 TS; 85,000-125,000 YS, 17-10 El, 35-25 RA; 240-325 Brin
For gears, shafts, housings; wear and abrasion resistant.

FARRELL-CHEEK F-85-ACM.
M-220, 0.33-0.43 C, 0.65-1.0 Mn, 0.15-0.30 Mo, 0.8-1.1 Cr, bal Fe.
Normalized 100,000 TS, 75,000 YS; 18 El, 35 RA, 225 Brin.
For gears, shafts, housings; fatigue and abrasion resistant

FARRELL-CHEEK F-85-AKN.
M-220; 0.33-0.43 C, 1.5-2.0 Ni, 0.6-0.9 Cr, 0.2-0.3 Mo, bal Fe.
Normalized: 100,000 TS, 75,000 YS, 18 El, 35 RA, 225 Brin.
For gears, shafts, housings, fatigue and abrasion resistant.

FARRELL-CHEEK FC-1020.
M-220; 0.15-0.25 C, 0.65-0.85 Mn, 0.35-0.60 Si, bal Fe.
Annealed: 60,000 TS, 30,000 YS; 26 El; 38 RA; 120-170 Brin.
For machine tool castings, gears, shafts, housings; SAE1020, water hardened.

FARRELL-CHEEK FC-1025.
M-220, 0.20-0.30 C, 0.65-0.85 Mn, 0.35-0.60 Si, bal Fe
Annealed: 78,000 TS; 38,000 YS; 24 El; 36 RA; 150 Brin.
Heat treated: 80,000 TS; 55,000 YS; 22 El; 35 RA; 200 Brin
For machine tool castings, gears, housings, shafts; SAE1025, water hardened.

FARRELL-CHEEK FC-1030.
M-220; 0.25-0.35 C, 0.65-0.85 Mn, 0.35-0.60 Si, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 24 El; 35 RA; 170 Brin.
Heat treated: 90,000 TS; 60,000 YS; 20 El; 40 RA; 210 Brin.
For machine tools castings, gears, shafts, housings; SAE1030, water hardened.

FARRELL-CHEEK FC-1045.
M-220, 0.40-0.50 C, 0.65-0.85 Mn, 0.35-0.60 Si, bal Fe.
Annealed: 80,000 TS; 40,000 YS; 18 El, 30 RA; 175 Brin.
Normalized: 85,000 TS, 50,000 YS, 18 El; 26 RA, 195 Brin.
For machine tool castings, gears, shafts,; SAE 1045, water hardened

FARRELL F-85-B.
M-220, 0.25-0.35 C, 1.2-1.4 Mn, 0.35-0.60 Si, 0.2-0.3 Mo, bal Fe
Hardened: 120,000 TS; 100,000 YS; 14 El, 30 RA, 240-310 Brin.
For gears, pinions, shafts, crankshafts, wear and abrasion resistant

FARRELL-F-85-BKN.
M-220; 0.33-0.43 C, 0.60-0.80 Mn, 0.35-0.60 Si, 0.2-0.3 Mo, 1.5-2.0 Ni, 0.6-0.9 Cr, bal Fe.
Hardened 175,000 TS; 150,000 YS; 6 El, 12 RA; 350-400 Brin
For gears, pinions, shafts, crankshafts; air or oil hardening, tough, fatigue resistant.

FARRELL F 85-HCM.
M-220, 0.33-0.43 C, 0.65-1.0 Mn, 0.35-0.60 Si, 0.15-0.30 Mo, 0.80-1.0 Cr, bal Fe
Normalized 120,000 TS, 100,000 YS, 16 El; 30 RA, 250-300 Brin
For gears, pinions, shafts, crankshafts; high hardenability, fatigue and abrasion resistant

FARRELL F 85 L
M-220, 0.25-0.35 C, 1.2-1.4 Mn, 0.35-0.60 Si, 0.2-0.3 Mo, bal Fe
Normalized 100,000 TS, 65,000 YS, 18 El, 30 RA, 160-240 Brin
For gears, pinions, shafts, housings, wear and abrasion resistant

FARRELLOY
M-252. For solder, corrosion resistant

FARRELL'S "85" ALLOY (A)
M-220, 0.4 C, 0.2 Mo, 0.8 Cr, 0.7 Mn, 1.5 Ni, bal Fe
100,000-170,000 TS, 60,000-140,000 YS; 21-7 El, 36-15 RA, 200-400 Brin
For chains, shovels, crusher rolls, gears, car wheels, sprockets, coal cutters, resists wear, shock, and abrasion.

FARRELL'S HARD EDGE
M-220; 0.6 C, 1.5 Ni, 0.8 Cr, bal Fe.
Heat treated: 650-750 Brin.
For crane wheels, rollers, sheaves, sprockets, gears, abrasion resistant.

FASALOY.
M-53; Ag, Cu, Co.
For electrical contacts.

FASALOY NO. 3.
M-53; Ag, Cu.
For electrical contacts.

FASALOY NO. 4.
M-53; Ag, Cu.
For electrical contacts.

FASALOY NO. 5.
M-53; Ag, Cu, Ni.
For electrical contacts.

FASALOY NO 6.
M-53; Ag, Cu.
For contact parts, electrical contacts; high electrical conductivity.

FASALOY NO. 7.
M-53; Ag, Cd.
For electrical contacts.

FASALOY NO. 12
M-53, Pt, Ru
For electrical contacts

FASALOY NO. 14
M-53; Pt, Ir
For electrical contacts.

FASALOY NO. 24
M-53, Ag, Au.
For electrical contacts.

FASALOY 72
M-53; 72 Au, 26.2 Ag, 1.8 Ni.
For brazing tantalum to steel
Melting range 1904-1940°F.

FASALOY 99
M 53, Ag alloy
For contacts

FASALOY NO 106
M-53, Ag, Cu
B 82 Rockwell
For electrical contacts, springs

FASALOY NO 136
M-53, Ag, Ni.
For electrical contacts

FASALOY NO 138
M-53, Ag, Ni
For electrical contacts

FASALOY NO 139.
M-53, Ag, Ni
For electrical contacts

F A S STEEL
M-56, M-521, 0.4 C, 11.5 Cr, bal Fe
Oil treated 112,000-123,000 TS; 78,500-90,000 YS; 22-18 El, 43-35 RA, 210-260 Brin
For aircraft and automobile valves, heat and corrosion resistant, Firth Brown J-180

FASTBOR HOLLOW DRILL.
M-1067, 0.8 C, bal Fe
For hollow drills; tough.

FASTBOR HOLLOW DRILL
M-908, 0.8 C, bal Fe.
For hollow drill, water hardening

FASTELL NO. 31
M-53; Pd, Ru.
For electrical contacts; formerly No. 928.

FASTELL NO. 35.
M-53, Pd, Ag, Ni.
B85 Rockwell.
For electrical contacts; formerly No. 2.

FASTELL NO. 41.
M-53, Ag, Pd.
B80 Rockwell.
For electrical contacts; formerly No. 1.

FASTELL NO. 42.
M-53; Ag, Pd.
For electrical contacts; formerly No. 1090.

FASTELL NO. 51.
M-53; Ag, Pt.
For electrical contacts; formerly No. 10.

FASTELL NO. 72.
M-53; 72 Au, 26.2 Ag, 1.8 Ni.
For electrical contacts; formerly No. 11.

FASTELL NO. 130.
M-53; Ag, Cd.
For electrical contacts; formerly No. 3653.

FASTELL NO. 142.
M-53; Ag, Ni.
For electrical contacts; formerly No. 2647.

FASTELL 2900.
M-53; Cu.
Sintered: 28,000 TS; 8000 YS; 34 El; 15 Rock F.
Coined: 37,000 TS; 30,000 YS, 15 El; 75 Rock F.
For electrical parts, contacts, terminals, connectors, conductors, welding electrodes.
High conductivity, optimum density. Sintered electrical copper material.

FASTELL BH.
M-53; Mo-Ag.
For electric contacts; sintered

FASTELL E.
M-53; Ag, Mo.
For electrical contacts, sintered.

FASTELL N
M-53; W-Cu.
For electric contacts; sintered.

FASTELL NL.
M-53; Cu, W.
For electrical contacts; sintered; formerly X.

FASTELL UM.
M-53; Ag, W.
For electrical contacts; sintered.

FASTELL UP.
M-53; Ag, W.
For electrical contacts, circuit breakers; sintered.

FASTELL UR.
M-53; W-Ag.
For electric contacts; sintered.

FAST FINISHING.
M-365; 1.25-1.35 C, 3.5-5.0 W, bal Fe.
For tools, reamers, arbors; oil hardened.

FAST FINISHING (DISSTON).
M-357; 1.2 C, 2 W, bal Fe.
For tools, cutters, water hardened.

FATIGUE-PROOF.
M-669; 0.40-0.48 C, 1.35-1.65 Mn, 0.04 max P, 0.24-0.33 S, 0.15-0.30 Si, bal Fe.
Cold finished: 140,000 min TS; 125,000 min YS; 8 El; 30 min Rc; 80% machinability.
For studs, bolts, shafts, axles, machined parts.

FATIGUE-PROOF.
M-1124; 0.40-0.48 C, 1.35-1.65 Mn, 0.04 max P, 0.24-0.33 S, 0.15-0.30 Si, bal Fe.
Cold finished: 140,000 min TS; 125,000 min YS; 8 El; 30 min Rc; 80% machinability
For studs, shafts, bolts, axles, machined parts.

FAULTLESS-A BABBITT.
M-88; Sn, Sb, Pb, Cu.
Cast: 21.8 Brin.
For bearings for saw mills and wood working equipment; Babbitt, resists sudden strain.

FAVORIT.
M-1308; 0.9 C, 1.9 Mn, 0.1 V, bal Fe.
For shears, punches, cutters, dies, crimpers; non-deforming, oil hardened.

FAVORITO SC1.
M-616; 0.95 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, dies, cutters; non-deforming.

FB-3.
M-1699; Sintered carbide tool materials.
For blanking dies and punches for heavy shock in punching operations.

FB-4.
M-1699; Sintered carbide tool material.
For general purposes blanking dies and punches.

FB-5.
M-1699; Sintered carbide tool materials.
For blanking dies and punches, slitter knives for thicker material.

FB-6.
M-1699; Sintered carbide tool material.
For blanking dies and punches, for punching thin material.

FB-A2. (and other "FB" alloys)
SEE FAGERSTA FB-A2.

F.B.D.
German; 0.15 C, 1 Mn, 1.2 Si, 17.5 Cr, 16 Ni, 1.75 Mo, 2 Cb, 0.12 V, bal Fe.
For supercharger parts, gas engines; high heat resistant.

FC NO. 1.
M-439, M-1, 0.5 C, 0.7 Cr, 1.6 Ni, 0.5 Mn, 0.5 Si, bal Fe.
For stripper dies, backing blocks, die blocks; shock resistant, oil hardened.

FC NO 2
M-439, M-1, 0.18-0.23 C, 1.5 Cr, 0.5 Mo, bal Fe.
For upset insert dies; oil hardened, shock resistant.

FC NO. 5.
M-439, M-1; 1.9-2.2 C, 11.5-12.5 Cr, 0.6-0.9 Mo, bal Fe.
For draw dies, forming and blanking dies, non-deforming, oil hardened.

FC NO. 5XI.
M-439, M-1, 0.3 C, 5 Cr, 1.2 Si, 1.4 Mo, 0.3 V, 1.3 W, bal Fe.
For tools, dies, mandrels, extrusion rams, hot work steel, oil hardened.

FC-5X1 SPEC.
M-439; 0.30-0.35 C, 2.5-3.0 Cr, 9-10.5 W, 0.25 V, 0.25 Mo, 1.7 Ni, bal Fe.
For cast hot work tools; hot work steel, oil hardened.

FC-5XIV.
M-1, M-439; 0.37-0.42 C, 5 Cr, 1.2 Mo, 1.0 V, 1.2 Si, bal Fe
For die casting dies, hot work dies; oil or air hardened.

FC NO. 10.
M-439, M-1, 1.0-1.2 C, 1.1-1.3 Cr, 0.3-0.5 Mo, bal Fe.
For cold rolling dies; oil hardened.

FC NO. 14.
M-439, M-1; 0.35 C, 4.0-5.5 Cr, 0.25 V, 3.25-4.25 W, 1.25-1.75 Si, bal Fe.
For hot die inserts, dummy blocks, press forging dies; oil or air hardened, non-deforming.

FC NO. 19.
M-439, M-1; 0.35 C, 5 Cr, 1.5 Si, 0.3 V, 4 W, bal Fe.
For upset form punches, press forging dies, container liners; hot work steel, oil hardened.

FC NO. 20.
M-439, M-1; 1.4 C, 0.6 Si, 3.5 W, 0.2 V, bal Fe.
For cold drawing dies; water hardened.

FC NO. 23.
M-439, M-1; 0.35-0.42 C, 1.0-1.5 Cr, 0.8 Si, 3.75-4.25 W, 0.25 V, bal Fe.
For extrusion liners and rams; oil hardened, hot work steel.

FC NO. 38M.
M-439, M-1; 0.9 C, 0.25 Mn, 0.15-0.25 V, bal Fe.
For special purpose tools; water hardened.

FC NO. 55.
M-439, M-1; 1.5 C, 11.5-13 Cr, 0.95 Mo, 0.5 V, 2 Co, 0.4 Ni, bal Fe.
For cold work rolls, tools, dies; air hardened, non-deforming.

FC NO. 66.
M-439, M-1, 1.4-1.6 C, 11.5-12.5 Cr, 1.0 Mo, 0.6 V, 3.5 Co, 0.4 Ni, bal Fe.
For forming and blanking dies, punches; air hardened, non-deforming.

FC-85A.
M-220; 0.25-0.35 C, 1.2-1.4 Mn, 0.4 Si, 0.3 Mo, bal Fe
Normalized: 90,000 TS, 60,000 YS, 20 El; 40 RA, 193 Brin.
For gears, shafts, machine tool housings; tough and wear resistant.

FC-85AC.
M-220; 0.25-0.35 C, 1.2-1.4 Mn, 0.4 Si, 0.3 Mo, 1.2 Cu, bal Fe.
Normalized: 90,000 TS; 60,000 YS, 22 El; 42 RA; 193 Brin
For gears, cases, machine tool castings; tough and wear resistant.

FC-85-AKN.
M-220; 0.33-0.40 C, 0.8 Mn, 0.4 Si, 0.2-0.3 Mo, 1.5-2.0 Ni, 0.45-0.90 Cr, bal Fe
Normalized 100,000 TS; 75,000 YS; 18 El; 35 RA; 220 Brin
For gears, shafts, machine tool castings, air hardened, immune to temper brittleness.

FC-85-AN.
M-220; 0.16-0.23 C, 0.8 Mn, 0.4 Si, 1.75-2.50 Ni, bal Fe.
Normalized. 80,000 TS; 50,000 YS; 26 El; 55 RA; 160 Brin.
For gears, cases, machine tool castings, shock and fatigue resistant.

FC-85-AV
M-220; 0.25-0.35 C, 1.3 Mn, 0.4 Si, 0.25 Mo, 0.15 V, bal Fe.
Normalized. 90,000 TS, 60,000 YS; 22 El, 42 RA; 193 Brin.
For gears, cases, machine tool castings, shock resistant castings.

FC-85-BN
M-220; 0.25-0.30 C, 0.8 Mn, 0.4 Si, 0.2-0.3 Mo, 1.75-2.50 Ni, bal Fe.
Heat treated: 125,000 TS; 110,000 YS; 14 El; 32 RA; 275 Brin.
For gears, cases, machine tool castings; low temp applications, tough.

FC-85-HN.
M-220; 0.25-0.30 C, 0.7 Mn, 0.4 Si, 1.75-2.50 Ni, bal Fe.
Normalized: 90,000 TS; 60,000 YS; 25 El, 50 RA, 190 Brin.
For gears, casings, machine tool castings; immune to temper brittleness.

FC-85 T.
M-220; 0.2-0.3 C, 0.7 Mn, 0.4 Si, 0.5 S and P. bal Fe.
Heat treated: 82,000 TS; 46,000 YS, 21 El; 32 RA; 180 Brin.
For gears, shafts, machine tool housings; heat treated castings.

FC-440C.
M-1, M-439; 0.95-1.2 C, 16-18 Cr, 0.40-0.65 Mo, bal Fe.
For surgical instruments, ball bearings, liners; Type 440C; corrosion resistant.

FC-1025.
M-220; 0.2-0.3 C, 0.7 Mn, 0.4 Si, 0.5 S and P, bal Fe.
Annealed: 70,000 TS; 38,000 YS; 24 El; 36 RA; 143 Brin.
For gears, shafts, machine tool housings; SAE 1020 to 1027 steel castings.

FC-1025V.
M-220; 0.2-0.3 C, 0.7 Mn, 0.4 Si, 0.10-0.20 V, bal Fe.
Normalized: 75,000 TS; 48,000 YS, 25 El; 40 RA; 153 Brin.
For gears, cases, machine tool castings; shock resistant castings.

FC-1040
M-220, 0.4-0.5 C, 0.7 Mn, 0.5 Si, 0.05 S and P, bal Fe.
Annealed 80,000 TS; 45,000 YS; 17 El; 25 RA; 187 Brin
For gears, shafts, machine tool housings; SAE 1040 to 1046 steel castings.

FC-1040 N.
M-220; 0.4-0.5 C, 0.7 Mn, 0.5 Si, 0.5 S and P, bal Fe.
Normalized· 85,000 TS; 50,000 YS, 18 El; 26 RA; 170 Brin.
For gears, shafts, machine tool housings; SAE 1040 to 1046 steel castings.

FC-1040 Q
M-220, 0.4-0.5 C, 0.7 Mn, 0.5 Si, 0.05 S and P, bal Fe.
Heat treated· 95,000 TS, 65,000 YS; 19 El, 35 RA, 200 Brin.
For gears, shafts, machine tool housings, SAE 1040 and 1046 steel castings

FC-1084.
M-1, M-439, 0.25-0.35 C, 0.4 Mn, 1.0-1.5 Si, 8-10 Cr, 1.0-1.25 Mo, bal Fe.
For oil refinery equipment, stills; resists oil corrosion.

FC-8740.
M-439, 0.38-0.43 C, 0.5 Cr, 0.3 Mo, 0.5 Ni, bal Fe.
For cast gears, shafts, machine tools, oil hardened.

FC-AH
M-439, M-1; 1.45-1.60 C, 11.5-12.5 Cr, 0.8 Mo, 0.5 V, 0.2 Ni, bal Fe.
For forming and blanking dies; air hardened, non-deforming.

FC AIR HARDENING CAST TO SHAPE.
M-1; 1.5 C, 0.4 Mn, 0.4 Si, 12.0 Cr, 0.25 Ni, 0.5 V, 0.9 Mo, 0.75 Co, bal Fe.
AISI Type D2 cold work tool steel.

FC AIR HARDENING FORGING.
M-1; 1.5 C, 0.4 Mn, 0.4 Si, 12.0 Cr, 0.25 Ni, 0.5 V, 0.9 Mo, 0.75 Co.
AISI Type D2 cold work tool steel.

FC-ALX.
M-1, M-439; 1.75-2.0 C, 32-34 Cr, 16-17 W, 0.7 Mo, 0.5 Mn, bal Co.
For tools, dies; corrosion and abrasion resistant.

FC-ALX NO. 6.
M-439; 1.0 C, 33.5 Cr, 6 W, bal Co.
For high temperature applications; heat resistant.

FCB(T).
Eng.; 0.12 C, 17.5 Cr, 12 Ni, 1 Cb, bal Fe.
For gas turbine parts; stainless, austenitic, stabilized.

FCC 16B CAST-TO-SHAPE.
M-1, M-439; 0.65 C, 0.55 Mn, 0.9 Cr, 0.8 Mo, 0.1 V, 0.3 Si, 1.8 Ni, bal Fe.
For hot forming dies; hot work steel.

FCC 168.
M-1, M-439; 0.65 C, 0.9 Cr, 0.8 Mo, 0.1 V, 1.8 Ni, bal Fe.
For hot forming dies; oil or air hardened, hot work steel.

F.C.C. AIR HARDENING.
M-1, M-439; 1.45-1.60 C, 0.4-0.5 Mn, 0.7 Co, 11.5-12.5 Cr, 0.8 Mo, 0.5 V, bal Fe.
For blanking, forming, drawing, embossing dies, punches, hot press work, rotary shears; air hardening; non-deforming; cast to shape; resists abrasion.

FC CAST TOOL STEEL.
M-1; 0.9 C, 0.35 Mn, 0.3 Si, bal Fe.
AISI Type W1 water hardening tool steel.

FC-CMS.
M-439, M-1; 0.55-0.65 C, 0.8-1.2 Cr, 0.7 Mn, 0.4 Mo, 0.5 Ni, 0.15 V, bal Fe.
For forming dies; tough, oil hardened.

FC-CNS.
M-439; 1.6 C, 11-13 Cr, 0.5 V, 0.9 Mo, 0.6 max Co, bal Fe.
For blanking and forming dies, castings; air hardened, non-deforming.

FC-CTS.
M-1, M-439; 0.8-1.1 C, bal Fe.
For cold work dies, inserts, machinery parts; water hardened.

FC-CV.
M-1, M-439; 0.45 C, 1.0 Cr, 0.7 Mn, 0.2 V, bal Fe.
For machinery parts, dies; oil or water hardened.

FC-EZ.
M-439; 1.4 C, 0.25 Cr, 0.25 Mo, 1.3 Si, 1 Mn, bal Fe.
For cutters; oil or water hardened.

FC-FH.
M-1, M-439; 0.5 C, 1.1 Mn, 1.2 Cr, 0.4 Mo, 0.1 V, bal Fe.
For machinery parts, cold work dies; oil hardened.

FC-FLAMHARD.
M-1; 0.50 C, 1.15 Mn, 0.50 Si, 1.20 Cr, 0.12 V, 0.40 Mo, bal Fe.
Prehardened: 300-325 Brinell.
For die casting dies, die holder blocks, frames.
Hot work die steel.

FCF SPECIAL.
M-459; C, Cr, bal Fe.
For files; water hardening.

FCHD.
M-1132; 0.14 max C, 17-19 Mn, 10-13 Cr, 0.5-2.0 Si, 0.3-0.8 Ti or 0.1-0.3 N, bal Fe.
For turbine blades; high heat resistant.

FC-HE.
M-220; 0.25-0.35 C, 1.2 Mn, 0.4 Si, 0.2-0.3 Mo, bal Fe.
Normalized: 110,000 TS; 90,000 YS; 20 El; 45 RA.
For hard edge tools, gears; wear and abrasion resistant.

FCI STAINLESS IRON.
M-521; 0.12 C, 0.6 Si, 1.2 Mn, 13.5 Cr, 0.28 Mo, 0.23 S, bal Fe.
Heat treated: 85,000 TS, 58,000 YS; 28 El; 62 RA; 180 Brin.
For hardware, screw machine products; free-cutting, corrosion resistant.

FC-NCI.
M-439; M-1; 2.75 C, 1.2 Cr, 0.25 Mo, 1 Al, 2.6 Si, bal Fe.
For liners, sleeves, machinery parts; nitriding cast iron.

FC-ROLOY.
M-1, M-439; 1.5 C, 12 Cr, 1.1 Mo, 0.5 V, 0.7 Co, 0.25 Ni, bal Fe.
For cold working rolls, dies, blanking and forming dies; air hardened, non-deforming.

FC-ROLOY NO 2.
M-1, M-439; 1.0 C, 5.25 Cr, 1.15 Mo, 0.5 V, bal Fe.
For blanking and forming dies, cold work dies; air hardened.

FC SPEZIAL.
M-459; C, Cr, bal Fe.
For files; water hardening.

F.C.S. STAINLESS STEEL.
M-521; 0.18 C, 0.6 Si, 1.2 Mn, 0.23 S, 0.25 Mo, 13.5 Cr, bal Fe.
Heat treated: 92,000 TS; 65,000 YS; 25 El; 54 RA, 220 Brin.
For hardware, screw machine products, bolts, shafts, free cutting, corrosion resistant.

FCW SPECIAL.
M-459, C, Cr, W, bal Fe.
For files; water hardening

FD-3.
M-1699; Sintered carbide tool material.
For draw dies, for drawing wire, tube and bar stock

FD-4.
M-1699; Sintered carbide tool material.
For draw dies, for drawing wire, tube and bar stock.

FD-5.
M-1699; Sintered carbide tool material.
For draw dies, for drawing wire, tube and bar stock

"FD65" STEEL.
English; 0.25 C, 0.5 Mn, 3 Ni, 1.2 Cr, 0.45 Mo, 0.2 V, bal Fe.
Hardened: 150,000 TS; 20 El; 65 RA; 320 Brin.
For aircraft engine parts; case hardened.

FEAL.
M-France; 25 Al, bal Fe.
For atomic reactors.
Outstanding resistance to oxidation and excellent strength at high temperatures. It is particularly transparent to neutrons.

FECHRAL.
Russia; 0.06-0.15 C, 17-25 Cr, 4-7 Al, bal Fe.
For resistance wire; heat resistant.

FECRALOY.
M-61; 0.2 C, 13 Cr, 4 Al, bal Fe.
Rolled: 128,000 TS; 104,000 YS; 5 El.
For rheostats, heating elements; high heat resistance.

FEDERAL HIGH SPEED.
M-377; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed cutting tools; high speed steel.

FEDERAL-MOGUL F-2.
M-709; 80 Cu, 10 Sn, 10 Zn.
Cast: 40,000 TS; 29 El; 27 RA; 64 Brin.
For bushings, bearings; S.A.E. 64.

FEDERAL-MOGUL F-8.
M-709; 83 Cu, 7 Sn, 7 Pb, 3 Zn.
Cast: 34,000 TS; 23 El; 24 RA; 53 Brin.
For bearings, bushings.

FEDERAL-MOGUL F-15.
M-709; 70 Cu, 10 Sn, 20 Pb.
Cast: 31,300 TS; 16 El; 14.6 RA; 59 Brin.
For bearings.

FEDERAL-MOGUL F-22.
M-709; 5-12 Al, Fe, Ni, Mn, Zn, Sn, bal Cu.
Cast: 70,000 TS; 25 El; 130 Brin.
For marine propellers; resists sea water corrosion.

FEDERALOY AF-6.
M-709; Sn, bal Al.
Cast.
For journal and crankpin bearings; heavy duty.

FEDERALOY AT-7.
M-709; 5.5-7.0 Sn, 0.7-1.3 Cu, 0.7-1 3 Ni, bal Al.
Cast: 21,000 TS; 10,500 YS, 11 El; 44 Brin.
For journal and crankpin bearings; Alcoa 750 TS; heavy duty

FEDERALOY B-30.
M-709; 25-32 Pb, 1.5 max Ag, bal Cu.
Cast: 8000-9000 TS, 6 8 El; 22-32 Brin.
For journal and crankpin bearings; SAE 48; heavy duty

FEDERALOY B-35
M-709, 32-37 Pb, 1 5 max Ag, bal Cu.
Cast: 7750-8750, 6-8 El; 20-30 Brin
For journal and crankpin bearings; SAE 480, heavy duty

FEDERALOY B-40
M-709, 37-42 Pb, 2 max Ag, bal Cu.
Cast: 75,000 85,000 TS; 6-8 El; 20-30 Brin
For bearings, bushings; superior to Babbitt.

FEDERALOY B-100.
M-709, 3-5 Cu, 7-8 Sb, bal Sn.
At 70°F: 105,000 TS, 11 El; 24 Brin
At 300°F 42,000 TS, 22 El, 8 Brin.
For reciprocating engine bearings, pump bearings; Babbitt.

FEDERALOY F-12.
M-709; 6-8 Sn, 18-20 Pb, bal Cu.
Cast: 25,000 TS, 16 El, 14 RA; 47 Brin.
For bearings, bushings; resists adverse lubrication

FEDERALOY H-24.
M-709, 21-27 Pb, 4 min Sn, bal Cu.
Cast.
For journal and crankpin bearings, SAE 49; heavy duty.

FEDERALOY H-35.
M-709; 32-37 Pb, 4 min Sn, bal Cu.
Cast.
For journal and crankpin bearings; SAE 480; heavy duty.

FEDERALOY HF-2.
M-709; 9-11 Sn, 9-11 Pb, 0.75 max Zn, 0.5 max Ni, bal Cu.
Cast.
For heavy duty bushings, bearings; SAE-797.

FEDERALOY HF-3.
M-709; 4 Sn, 4 Zn, 8 Pb, 0.5 max Sb, 0.5 max P, bal Cu.
Cast.
For thrust washers, bearings, bushings; SAE-798.

FEDERALOY HF-16.
M-709; 3-4 Sn, 3 max Zn, 21-25 Pb, bal Cu.
Cast.
For heavy duty bushings, bearings; SAE 799.

FEDERALOY HF-24.
M-709; 76 Cu, 24 Pb.
Cast.
For bearings, liners, bushings; plastic bronze.

FEDERALOY L-200
M-709; 14-16 Sb, 0.75-1.25 Sn, 0.6 max Cu, 1.0 As, bal Pb.
At 70°F: 8800 TS; 2 El; 21 Brin
For bearings for engines, compressors, pumps and turbines; Babbitt.

FEDERALOY L-300.
M-709; 9.25-10 75 Sn, 14-16 Sb, 0.5 max Cu, bal Pb.
For bearings, bushings; Babbitt.

FEDERALOY L-301.
M-709; 2-4 Sn, 0.3-1.0 Hg, 0.05-1 0 Ca, 0.15 max Al, bal Pb.
At 70°F: 10,300 TS; 13 El; 23 Brin.
For bearings; Babbitt.

FEDERALOY RS-11.
M-709, 0.25-0.75 Sn, 0.10 max Fe, 88-92 Cu, bal Zn.
For architectural trim, commercial bronze, SAE 795

FEDERALOY RS-13
M-709, 66 Cu, 34 Zn.
For ornaments, fixtures, hardware, SAE 70C; yellow brass.

FEDERALOY RS-21.
M-709, 3.5-4 5 Sn, 1.5-4.0 Zn, 3.5-4.5 Pb, bal Cu.
Cast.
For piston pins, bushings, thrust washers; SAE 791, leaded bronze.

FEDERALOY RS-25.
M-709; 0 5 Sn, 8 Zn, 1 5 Pb, bal Cu.
Cast
For hardware; free-cutting

FEDERALOY RS-27.
M-709; 36 Zn, 1 5 Pb, bal Cu
Cast.
For hardware, free-cutting; SAE-72

FEDERALOY RS-29
M-709; 99.0 min Al
Cast.
For electrical machinery conductors

FEDERATED NO 2
M-815; 7.5 Sb, 3 5 Cu, 89 Sn
Cast. 10,900 TS, 8 El, 24 Brin
For bearings; M.P 466°F.

FEDERATED NO. 3.
M-815, 83.3 Sn, 8.3 Sb, 8.3 Cu.
Cast: 12,300 TS; 2 El; 26 Brin
For bearings; antifriction, Babbitt.

FEDERATED NO. 7.
M-815; 75 Pb, 10 Sn, 15 Sb.
Cast: 10,500 TS; 5 El, 20 Brin.
For bearings; antifriction, Babbitt.

FEDERATED NO. 8.
M-815, 80 Pb, 5 Sn, 15 Sb.
Cast: 10,000 TS; 5 El; 20 Brin.
For bearings; antifriction, Babbitt.

FEDERATED NO. 14.
M-815; 83.75 Pb, 0.75 Sn, 12.5 Sb, 3 As.
Cast: 9800 TS; 1.5 El; 22 Brin.
For bearings; antifriction, Babbitt.

FEDERATED NO. 15.
M-815; 83 Pb, 1 Sn, 1 As, 15 Sb.
Cast: 10,350 TS; 2 El; 20 Brin.
For bearings; antifriction, Babbitt.

FEDERATED F004.
M-815; 4 Mg, bal Al.
Sand Cast: 22,000-26,000 TS; 12,000-14,000 YS; 6-10% El; 50-60 Brin.
For corrosion resistant castings. Tough. Aluminum 214 alloy. Not heat treatable.

FEDERATED F004Zn.
M-815; 4 Mg, 2 Zn, bal Al.
Cast: 24,000-29,000 TS; 16,000-19,000 YS; 3-7 El; 70 Brin.
For cookware, food handling equipment, fittings, marine hardware.
Pressure tight, similar to Aluminum A214.

FEDERATED F008.
M-815; 8 Mg, bal Al.
Cast: 45,000 TS; 28,000 YS; 5 El; 75 Brin.
For general purpose die castings, brake shoes, propellers, cylinder blocks, motor brackets.
Tough, strong, high corrosion resistance. Similar to Aluminum 218.

FEDERATED F024.
M-815; 2 Si, 4 Mg, bal Al.
Cast: 20,000-24,000 TS; 13,000-16,000 YS; 1-2 El; 60 Brin.
For pressure tight castings, cooking utensils, marine fittings.
Aluminum B 214, excellent corrosion resistance.

FEDERATED F050.
M-815; 5 Si, bal Al.
Cast: 22,000 TS; 10,000 YS; 4 El; 50 Brin.
For pressure tight castings, marine hardware, architectural parts.
Aluminum 43 alloy, tough and corrosion resistant.

FEDERATED F070.3.
M-815; 7 Si, 0.3 Mg, bal Al.
Ht. Tr.: 33,000 TS; 24,000 YS; 3 El; 70 Brin.
Sand Cast: 23,000 TS; 12,000 YS; 3 El; 55 Brin.
For complex pressure tight castings.
Aluminum 356. Age hardenable, corrosion resistant.

FEDERATED F090.5.
M-815; 9.5 Si, 0.5 Mg, bal Al.
Cast: 46,000 TS; 24,000 YS; 4 El; 80 Brin.
For general purpose castings, cover plates, instrument housings, casings. Corrosion resistant die castings. Similar to Aluminum 360.

FEDERATED F100.4.
M-815; 0.8 Cu, 8 Zn, 0.4 Mn, bal Al.
Cast: 29,000 TS; 16,000 YS, 6-7 El; 60 Brin.
For permanent mold castings.

FEDERATED F0120.
M-815; 12 Si, bal Al.
Sand Cast: 27,000 TS; 12,000 YS; 8 El; 55 Brin.
Permanent Mold: 26,000 TS; 12,000 YS; 3 El.
For meter cases, switch boxes, thin walled castings.
Similar to Aluminum 13, not heat treatable, pressure tight, high fluidity.

FEDERATED F150.5.
M-815; 1 Cu, 5 Si, 0.5 Mg, bal Al.
Ht. Tr.: 44,000 TS; 42,000 YS; 1 El; 95 Brin.
Cast: 26,000 TS; 17,000 YS; 2 El; 75 Brin.
For complex pressure tight castings, cylinders, housings, hardware.
Age-hardenable, good castability, pressure tight.

FEDERATED F-250.
M-815; 2 Cu, 5 Si, bal Al.
For light alloy castings; age-hardenable.

FEDERATED F360.
M-815; 3 Cu, 6 Si, bal Al.
Ht. Tr.: 35,000 TS; 20,000 YS; 3 El; 80 Brin.
Sand Cast: 28,000 TS; 15,000 YS; 4 El; 60 Brin.
For housings, oil pans, casings.
Heat treatable, high strength.

FEDERATED F391 Ni.
M-815; 3.5 Cu, 9 Si, 1 Mg, 1 Ni, bal Al.
Cast: 32,000 TS; 26,000 YS; 2 El; 85 Brin.
For pistons.
Aluminum D 132 alloy.

FEDERATED F401.5 Ni.
M-815; 4 Cu, 1.5 Mg, 2 Ni, bal Al.
Ht. Tr.: 45,000 TS; 42,000 YS; 1 El; 100 Brin.
Cast: 34,000 TS; 32,000 YS; 1 El; 86 Brin.
For cylinder heads, pistons.
Aluminum 142 alloy, wear and heat resistant. Age-hardenable.

FEDERATED F410.
M-815; 4 Cu, 1 Si, bal Al.
Ht. Tr.: 47,000 TS; 42,000 YS; 1 El; 110 Brin.
Cast: 25,000 TS; 11,000 YS; 4 El; 65 Brin.
For high strength castings, housings, hardware, gear cases, oil pans.
Age-hardenable. Aluminum 195 alloy.

FEDERATED F 430
M-815; 3.5-4.5 Cu, 3 Si, 0.05 Mg, 0.5 Mn, 1 Fe, 0.3 Ni, 0.3 Zn, bal Al.
Cast: 25,000 TS, 12,000 YS; 3 El; 57 Brin.
Aged: 28,000 TS; 21,000 YS, 2 El; 74 Brin.
For light alloy castings; general purpose alloy.

FEDERATED F450.
M-815; 4 Cu, 5 Si, bal Al.
Ht. Tr.: 45,000 TS; 40,000 YS; 1 El; 105 Brin.
Cast: 25,000 TS; 15,000 YS; 2 El; 70 Brin.
For general purpose castings
Aluminum A108, heat treatable. Good castability.

FEDERATED F460.
M-815; 3-4 Cu, 5.5-6.5 Si, bal Al.
Ht Tr.: 45,000 TS; 40,000 YS; 1 El; 105 Brin.
Cast: 25,000 TS, 15,000 YS; 2 El; 70 Brin.
For general purpose castings, grills, reflectors, housings, casings.
Heat treatable, Aluminum 319 alloy.

FEDERATED F-480.
M-815; 4 Cu, 8 Si, bal Al.
For die castings; high strength.

FEDERATED F-720.
M-815, 7 Cu, 2 Si, bal Al.
For castings; general use.

FEDERATED F750.3
M-815; 6.5 Cu, 5.5 Si, 0.3 Mg, bal Al.
Ht. Tr.. 50,000 TS; 48,000 YS; 0.5 El; 130 Brin.
For pistons.
Aluminum 152 alloy, age-hardenable, high strength.

FEDERATED F1000.3.
M-815; 10 Cu, 0.3 Mg, bal Al.
Ht. Tr.: 44,000 TS; 40,000 YS; 0.5 El; 120 Brin.
For cylinder heads, pistons.
Aluminum 122 alloy. Heat treatable, good high temperature strength.

FEDERATED F1040.3.
M-815; 10 Cu, 4 Si, 0.4 Mg, bal Al.
Ht. Tr.: 46,000 TS; 44,000 YS; 125 Brin.
For cylinder heads, pistons.
Aluminum 138 alloy, age-hardenable.
Good high temperature strength.

FEDERATED F1121 Ni.
M-815; 1 Cu, 12 Si, 1 Mg, 2.5 Ni, bal Al.
Stress-Relieved: 32,000-36,000 TS; 28,000-30,000 YS; 0.5% El; 105 Brin.
For general purpose castings.
Aluminum A 132 Alloy. Not heat treatable.

FEDERATED F4110.
M-815; Si, bal Al.
For die castings; high fluidity.

FEDERATED STEEL MILL ALUMINUM GR. 4.
M-815; 85-90 Al, bal Cu, Fe, Mn, etc.
For deoxidizer in steel mills.

FEDERATED XXXX NICKEL.
M-815; Sn alloy.
For bearings, Babbitt.

FEDOL.
M-375; 1.2 C, 0.2 V, bal Fe.
For tools, dies; water hardening.

FENICOLOY.
M-1523; 29 Ni, 17 Co, 0.2 Mn, bal Fe.
Resistance wire: 294 ohms per cir.mil.ft.
Ann.: 75,000 psi.; hard drawn; 150,000 psi.
For resistors; max oper. range; 450°C.

FENTON'S ALLOY.
Eng.; 80 Zn, 14 Sn, 6 Cu.
For bearings; Babbitt.

FENTON'S ALLOY.
Eng ; 80 Zn, 8.5 Cu, 11.5 Sb.
For bearings; Babbitt.

FER.
M-365; 0.7-1.2 C, bal Fe.
For tools, dies, punches; water hardened.

FERAL.
Germany; 0.06 C, 0.6 Mn, bal Fe, clad with Al alloy.
For aircraft fire walls; aluminum-clad steel.

FERALITE
M-145; 3 C, Si, Mn, bal Fe.
For housings, fittings, gears, shafts, malleable iron.

FERALLOY.
M-104; 14 Al, Mn, Si, bal Fe.
For corrosion and heat resistant parts; corrosion and heat resistant.

FERALSI.
M-745; Fe-Al-Si.
For magnetic applications; high magnetic permeability.

FERALUN.
M-250; Special iron base + abrasive grains imbedded.
For stairs, platforms; castings; wear resistant.

FERAN.
M-798, Fe-Al.
For bi-metals in the canning industry.

FERAN.
Eng.; sheet Iron coated with Al and rolled together.
For engineering construction; corrosion resistance of Al and strength of Fe.

FERCHROMIT.
M-651; 22-30 Cr, 0.5-2.5 Si, 0.1-1.5 C, bal Fe.
Resists oxidation at high temperatures.

FEREX.
U.S.; 0.2 C, bal Fe.
For welding rod for armor; coated.

FERIMPHY.
M-771; iron alloy.
For armatures, transformers; soft magnet for strong or moderate field.

FERINOX.
M-101; 0.09 C, 1.2 Si, 1.3 Mn, 17 Cr, 8 Ni, 0.7 Mo, bal Fe.
Rolled: 299,000 TS; 250,000 YS; 8 El.
For watch mainsprings.
Stainless, austenitic, high fatigue strength

FERMET.
Eng.; 4 Cr, 18 Ni, 2.2 Mn, 1 W, 0.3 Cu, 0.35 C, bal Fe.
For corrosion resisting parts; stainless and corrosion resistant.

FERNITE 5C.
M-439; 0.45-0.55 C, 1.2 Mo, 4 Co, 19-21 Cr, 11-13 Ni, 0.2 Se, bal Fe.
For heat resistant parts; heat and corrosion resistant.

FERNITE 17A.
M-439; 0.30-0.50 C, 8-9 Cr, 18.7-19.7 Ni, bal Fe.
For high temperature applications; heat resistant

FERNITE 17B.
M-439; 0.20-0.30 C, 6.7-7.7 Cr, 18.7-19.7 Ni, bal Fe.
For high temperature applications; heat resistant.

FERNITE 24.
M-439; 2.3 C, 24 Cr, 0.3 Mn, 0.2 Si, 5.3 W, 0.3 V, 0.3 Ni, 0.9 B, bal Fe.
For forming and sizing dies; cast iron, corrosion resistant.

FERNO
M-688, 0.70 C, 3.75 Cr, 0.55 V, 0.7 Mo, bal Fe.
For hot work dies, punches, shear blades; good red hardeners.

FERNO EXTRA.
M-688; 0.45 C, 3.75 Cr, 0.4 Mn, 0.7 V, 12 W, bal Fe.
For hot work dies, punches, shear blades; tough and abrasion resistant.

FEROBA-III.
M-210, BaO, 6 Fe_2O_3.
3500 Br, 2500 Hc, 2,800,000 BH max.
For permanent magnets in electrical and magnetic equipment. High permeability.

FERRAL.
Russia, 0.25 max C, 12-15 Cr, 3.5-5.5 Al, bal Fe.
For electrical and heat resistance elements; applications to 1100°C.

FERRIMAG I.
M-38, BaO, 6 Fe_2O_3. (Sintered)
1,050,000 BH max; 2300 Br. 1850 Hc; 1150 Bd.
For permanent magnets, high coercive force.

FERRIMAG 5.
M-38, BaO, 6 Fe_2O_3.
Bar. 3950 Br, 2400 Hc, 2,500,000 BH max.
For electrical and magnetic equipment.
Permanent magnet, high permeability.

FERRO BRONZE.
U.S.; 8 Fe, 0.7 Cr, bal Cu.
For hardware; corrosion resistant.

FERROCAL.
M-302; Al alloy
Chill cast: 23,000-28,000 TS, 4-2 El.
For permanent mold castings; general machinery parts, automobile and motorcycle parts.

FERROCHRONIN 15-60.
M-303; 15 Cr, 60 Ni, bal Fe.
For electrical equipment, heating elements, resistors, high heat and electrical resistance.

FERROCHRONIN 20-30.
M-303; 20 Cr, 30 Ni, bal Fe.
For electrical equipment, heating elements, resistors; high heat and electrical resistance.

FERROCHRONIN 75-15.
M-303; 14-16 Cr, 72 Ni, 6-9 Fe.
For heaters, combustion liners, manifolds, regenerators; high heat and corrosion resistance.

FERROCITE.
M-799; 0.5 C, bal Fe.
For valves, guides; powder metals.

FERRODUR.
M-508; 3 C, 0.5 Mo, 1.2 Ni, 0.9 Mn, 2 Si, 0.2 Cr, bal Fe.
Heat treated: 50,000 TS; 0 El; 500 Brin.
For pump liners, shaft sleeves; centrifugal casting.

FERROLUM.
M-1193; lead clad steel.
For chemical plant equipment; acid resistant.

FERROMET.
M-1246; Fe alloy.
For machine parts, bearings, magnets; sintered alloy.

FERRO MOLYBDENUM (LOW CARBON).
M-640; 0.50 max C, 60-70 Mo.
For metallurgical applications in steel making; Mo-additions.

FERRO MOLYBDENUM (STANDARD).
M-640; 1.60-2.25 C, 58-65 Mo, bal Fe.
For metallurgical applications in steel making; Mo-additions.

FERRON.
M-329; 50 Fe, 35 Ni, 15 Cr.
For heating elements, heat and corrosion resisting parts; heat and corrosion resistant.

FERROPYR-I.
England; 86 Fe, 7 Cr, 7 Al, 1 Mn + Si.
For electrical resistances; used in high temperature range of 2100-2460°F.

FERRO SILICON.
M-394; 15-95 Si, bal Fe. For use in manufacture of steel; Vancoram Six Grades.

FERRO-SILICON CAST IRON NO. 8.
M-243; 3 C, 25 Si, bal Fe.
Welded: 26,000 TS.
For welding rods for cast iron; cast iron.

FERROSILID.
Russia; 0.5-0.7 C, 12-18 Si, bal Fe.
For cast pumps and conduits; acid resistant, cast.

FERROSTEEL.
M-748; 3 C, 1.8 Si, bal Fe.
Cast: 35,000 TS.
For valves, fittings; Tr.S. 3600; Tr. def. 0.14.

FERROTHERM FF 6.
M-72; 0.15 C, 6 Cr, bal Fe.
Heat treated: 78,000 TS; 50,000 YS; 18 El; 50 RA.
For furnace parts, crucibles, autoclaves, recuperators; heat and corrosion resistant to 800°C.

FERROTHERM FF 18.
M-72; 0.15 C, 18 Cr, bal Fe.
Annealed: 78,000 TS; 50,000 YS; 12 El; 12 RA.
For furnace parts, crucibles, autoclaves, recuperators; heat and corrosion resistant to 1000°C.

FERROTHERM FF 30.
M-72; 0.15 C, 30 Cr, bal Fe.
Annealed: 78,000 TS; 58,000 YS; 12 El; 8 RA.
For furnace parts, crucibles, autoclaves, recuperators; heat and corrosion resistant to 1200°C.

FERROTHERM FF 112.
M-72; 1.0 C, 12 Cr, bal Fe.
For furnace parts, crucibles, autoclaves, recuperators; heat and corrosion resistant to 850°C.

FERROTHERM FF 118.
M-72; 1.0 C, 18 Cr, bal Fe.
For furnace parts, crucibles, autoclaves, recuperators, heat and corrosion resistant to 1000°C.

FERROTHERM FF 128.
M-72; 1.0 C, 28 Cr, bal Fe.
For furnace parts, crucibles, autoclaves, recuperators; heat and corrosion resistant to 1100°C.

FERROTHERM FF 228.
M-72; 2.0 C, 28 Cr, bal Fe.
For furnace parts, crucibles, autoclaves, recuperators; heat and corrosion resistant to 1100°C.

FERRO-TIC GR.A.
M-1469; 26 Ti, 7 C, 2 Cr, 2 Mo, bal Fe.
Annealed: 400 Brin.
Heat treated: 700 Brin.
For drawing and forming dies, rolls, cutters; sintered carbide, heat treatable.

FERRO-TIC Gr. C.
M-1469, 26 Ti, 7 C, 2 Cr, 2 Mo, bal Fe (45% carbide by volume).
Ann: 40 Rock C.
Ht. Tr.: 300,000 Tr.S.; 70 Rock C.
For tools, dies, rolling and blanking dies, valves, wear parts.
Sintered carbides with alloy steel matrix, wear resistant; max operating temp 400°F.

FERRO-TIC Gr CM.
M-1469; 56.5 Fe, 27.6 Ti, 6.6 Cr, 2.0 Mo, 7.4 C. (45% carbide by volume).
Ann 45 Rock C.
Ht. Tr : 310,000 Tr.S; 66-70 Rock C.
For tools, dies, valves, forming dies
Steel bonded carbide; max. operating temp: 1000°F.

FERRO-TIC Gr CN 5.
M-1469; 45% WC by volume, age-hardenable copper-nickel alloy matrix.
For tools and dies, and for wear resistant parts exposed to sea water, corrosion resistant, excellent resistance to sea water.

FERRO-TIC Gr. CS-40
M-1469; 45% TiC by volume, Martensitic stainless steel matrix.
Ann: 50 Rock C
Hardened: 225,000 Tr.S; 68-70 Rock C.
Good wear and corrosion resistance; for can closing tools, chemical plant valve seats and wear parts

FERRO-TIC Gr. DN-1.
M-1469; 45% TiC by volume, age-hardenable nickel-aluminum alloy matrix.
Ann: 40-41 Rock C.
Age-hardened: 52-53 Rock C.
Good corrosion resistance toward strong chlorides.

FERRO-TIC Gr. HT-2.
M-1469; 45% TiC by volume, Ni-Fe-Cr age hardenable alloy matrix.
Ann: 44 Rock C.
Aged: 54 Rock C; 250,000 Tr.S.

FERRO-TIC Gr. HT-6.
M-1469; 45% TiC by volume, Ni-Cr age hardenable steel matrix.

Solutionized: 46 Rock C.
Aged (1st step): 51 Rock C.
Aged (fully): 54 Rock C; 310,000 Tr.S.
Excellent oxidation and corrosion resistance and high temperature strength.

FERRO-TIC Gr. J.
M-1469; 40% W TiC_2 by volume, high speed steel matrix.
Annealed: 48 Rock C.
Hardened and tempered: 70 Rock C; 250,000 TrS.
For tools for hot working applications as piercing, forming, machining of non-ferrous materials.

FERRO-TIC Gr. M-6
M-1469; 45% TiC by volume; maraging steel matrix.
Solutionized: 51 Rock C.
Aged: 65 Rock C; 280,000 TrS.
Can be nitrided for 75 Rock C surface.

FERRO-TIC Gr. M-6A.
M-1469; 50% TiC by volume, maraging steel matrix.
Solutionized: 54 Rock C.
Aged: 67 Rock C; 375,000 TrS.
Very good abrasion resistance; can be nitrided to surface hardness of 74 Rock C.

FERRO-TIC Gr. M-6B.
M-1469; 55% TiC by volume; maraging steel matrix.
Ann: 58 Rock C.
Hardened: 68 Rock C; 400,000 TrS.
Excellent wear resistance.

FERRO-TIC Gr. MS-5
M-1469; 45% TiC by volume; age-hardenable martensitic stainless steel matrix.
Solutionized: 51 Rock C.
Aged: 63-64 Rock C; 280,000 TrS
Good corrosion resistance, can be nitrided for high surface hardness, for abrasion resistance parts in the food, chemical and aerospace industries.

FERRO-TiC Gr. S-45.
M-1469, 39 TiC, 11 Cr, 7 3 Ni, 42 7 Fe.
450 Brin.
For valve parts, seal rings, knives, molds; oxidation and heat resistant

FERRO-TiC GR. S-55.
M-1469; 52 TiC, 8.6 Cr, 5.7 Ni, 33.7 Fe
550 Brin.
For valve parts, seal rings, knives, molds; oxidation and heat resistant.

FERRO-TITANIUM 18-2.5.
M-394, 2 5 C, 18 Ti, bal Fe.
For metallurgical applications in steel making

FERRO TITANIUM LOW CARBON.
M-394; 0.10 max C, 27-40 Ti, 8 max Al, 1-11 Si, bal Fe.
For metallurgical applications in making stainless steel.

FERROTITE.
M-192; 0.2 C, bal Fe.
For welding rod.

FERROTRODE N2B.
M-717;
For machinable overlays, and mild abrasion on ferrous metals; AC DC; for hammers, sprockets, rollers, excavator equipment.
Hardness C 28-31 Rock.

FERRO TUNGSTEN. (A.S.T.M.).
M-640; 0.60-0.70 C, 70-80 W, 1.0 max Si, bal Fe
For metallurgical applications in steel making; sum H_2S metals less than 0.25%.

FERRO TUNGSTEN (LOW MELTING).
M-640; 2.5 C, 65-75 W, 1.5 max Si, bal Fe.
For metallurgical applications in steel making; sum H_2S metals less than 0.25%.

FERRO TUNGSTEN (STANDARD).
M-640; 0.60-0.70 C, 76-80 W, 0.75 max Si, bal Fe.
For metallurgical applications in steel making; sum H_2S metals less than 0.25%.

FERROVAC 1020.
M-1214; 0.20 C, 0.01 Ni, 0.003 Mn, 0.005 P, 0.01 Si, bal Fe.
For poles pieces for magnetrons, klystron components; vacuum melted.

FERROVAC 4340.
M-1214, M-38, 0.4 C, 0.8 Cr, 1.8 Ni, 0.25 Mo, bal Fe.
Heat treated: 185,000-285,000 TS; 166,000-215,000 YS; 16-12 El; 60-41 RA; 410-540 Brin.
For bolts, gears, shafts, crankshafts; vacuum melted, shock resistant.

FERROVAC 52100.
M-1214, M-38, 0 95-1.1 C, 1.3-1 6 Cr, bal Fe.
Annealed: 95,000 TS, 65,000 YS; 27 El; 62 RA; 180 Brin.
Heat treated: 200,000 TS, 185,000 YS; 3 El; 30 RA; 400 Brin.
For plug and ring gages, jet engine bearings; vacuum melted, wear resistant.

FERROVAC E.
M-38, 99.9% Fe.
Gas free, high purity iron.
High maximum permeability.
For relays, solenoid plungers, armatures, pole pieces, magnetic core devices.

FERROVAC HALMO
M-38; 0.58 C, 4.75 Cr, 1.15 Si, 5.25 Mo, 0.55 V, bal Fe.
For high temperature bearings, shears, punches; vacuum melted hot work steel.

FERROWELD
M-192; 0 1 C, bal Fe.
For welding rods for cast iron, coated

FERROWELD
M-578, 0 15 C, 0 03 Si, 0.30 Mn, 0.04 P, 0.04 S, bal Fe.
Low carbon steel arc welding electrode.
AWS Class ESt.

FERROXDURE.
Dutch; BaO + 6 Fe_2O_3.
For permanent magnets.

FERROXDURE I.
M-1401, $BaFe_{12}O_{19}$.
For magnets for motors and oil filters; magnetic ceramic.

FERROXDURE II.
M-1401; $BaFe_{12}O_{19}$.
For magnets for motors and oil filters; magnetic ceramic.

FERROZOID.
M-121; 33-35 Ni, 3.5 Cr, bal Fe.
For electrical resistances, resistance alloy; now known as "Dullray"

FERRUL.
Eng; 54.6 Cu, 40 Zn, 5 Pb, 0.4 Al.
For bearings, intricate castings, free-cutting.

FERRY.
Eng.; 2 Ba, 1 Ca, 0.25 Hg, bal Pb.
For bearings, solder.

FERRY.
M-86, M-121; 55-56 Cu, 44-45 Ni.
Annealed: 73,000 TS; 34,000 YS; 45 El; 77 RA; 160 Brin.
For electrical resistances, thermocouples.
Max. operating temperature 440°C.
Corrosion resistant.

FERRYDUR.
M-1717; 13 Cr, C, others, bal Fe.
Up to 48-65 Rock C hardness.
Excellent wear resistance.
For castings to resist wear.
AFNOR: Z 200 C 13 (approx.).

FERRYNOX 8.
M-1717; 0.18-0.25 C, 17-19 Cr, 7-9 Ni, bal Fe.
Corrosion resistant, good resistance to scaling; austenitic.
For ventilator fans, heat exchangers.
AFNOR: Z 20 CN 18.08.

FERRYNOX 8M.
M-1717; 0.18-0.25 C, 16-20 Cr, 8-10 Ni, 3 Mn, bal Fe.
Good corrosion and heat resistance; Austenitic.
For pumps for chemical plants.
AFNOR: Z 20 CNM 18.10.

FERRYNOX 8S.
M-1717; 0.18-0.25 C, 16-20 Cr, 8-10 Ni, 2-3 Mo, bal Fe.
Excellent corrosion resistance, good resistance to scaling at elevated temperatures; austenitic.
For pump rotors, compressors.
AFNOR: Z 20 CND 18.10.

FERRYNOX 10.
M-1717; 0.05-0.10 C, 16-20 Cr, 8-10 Ni, Ti, bal Fe.
Corrosion resistant; temperature resistant.
Austenitic.
For food equipment, sugar refineries.
AFNOR: Z 6 CN 18 10.

FERRYNOX 12.
M-1717, 0.18-0.25 C, 22-27 Cr, 11-13 Ni, bal Fe
Good high temperature properties, Austenitic, corrosion resistant.
For furnace and heat treat equipment.
AFNOR: Z 20 CN 25.13.

FERRYNOX 15.
M-1717; 0.18-0.25 C, 23-27 Cr, 13-16 Ni, bal Fe.
Good high temperature properties.
Furnace equipment, jet engine parts.
AFNOR: Z 20 CN 25.15.

FERRYNOX 20.
M-1717, 0.18-0.25 C, 24-26 Cr, 19-22 Ni, bal Fe.
Good high temperature properties
For jet engine, gas turbines, heat exchangers.
AFNOR: Z 20 CN 25.20
US-AISI 310 Stainless.

FERRYNOX 35.
M-1717; 0.18-0.25 C, 14-16 Cr, 34-36 Ni, bal Fe.
Good high temperature properties in carburizing atmospheres.
For heat treat equipment, petroleum industry.
AFNOR: Z 20 NC 35.15.

FERRYNOX 65.
M-1717; 0 18-0.25 C, 14-16 Cr, 62-66 Ni, bal Fe.
Good high temperature properties, good corrosion resistance. For chemical plant equipment.
AFNOR· NC 15 Fe

FERRYNOX Co 50.
M-1717; 50 Co, 28 Cr, bal Fe.
Room temp: 60-70 Kg/mm²; 2-4 El.
1000°C: 11-13 Kg/mm²; 15-17 El.
Good strength at high temperatures.
Resistant to oxidation and many chemicals.
For furnace equipment.

F EXTRA.
M-459; C, bal Fe.
For files; water hardening.

F & G 1.
M-1548; 3.0-5.5 Cu, 0.3-0.9 Si, 0.3-1.0 Mn, 0.5 1.5 Mg, bal Al.
Soft: 23,000-31,000 TS; 15-20 El; 50-60 Brin.
Heat treated: 68,000 TS; 48,000 YS; 10 El; 140 Brin.
For rivets, hydraulic fittings, hardware, bridges, heavy duty structures.
Age-hardenable, high strength.

F & G 3.
M-1548; 5.0-6.0 Cu, 1.0 Si, 0.5 Mn, bal Al.
Soft: 28,000 TS; 15-25 El; 50-60 Brin.
Heat Treated: 71,000 TS; 57,000 YS; 2 El; 140 Brin.
For hydraulic fittings, hardware, aircraft and engine components.
Age-hardenable, high strength and endurance limit.

F & G 4.
M-1548; 0.5-1.0 Si, 0.8-1.5 Mn, 0.5-1.0 Mg, bal Al.
Heat treated: 50,000 TS, 36,000 YS; 12 El, 95 Brin.
For hardware, structures, tanks, aircraft components.
Age-hardenable, corrosion resistant.

F & G 5.
M-1548; 1.5 Mn, 5.0-9.0 Mg, bal Al.
Soft: 32,000 TS; 12,800 YS; 25 El; 55 Brin
Hard 68,000 TS, 48,000 YS, 10 El; 120 Brin.
For heat exchangers, fixtures, tanks.
Non-hardenable, corrosion resistant

F & G 8
M-1548, 1.0-2.0 Mn, bal Al.
Half hard. 26,000 TS; 21,000 YS; 5 El; 45 Brin.
Hard: 35,000 TS; 28,000 YS; 2 El; 60 Brin
For commercial roofing, heat exchangers, ducts, fixtures, tanks
Non-heat treatable, good weldability.

FH-2
M-1699; Sintered carbide tool material.
For heading dies and punches

FH-3
M-1699; Sintered carbide material.
For heading dies and punches.

FH-4.
M-1699; Sintered carbide material.
For heading dies and punches.

FH-5.
M-1699; Sintered carbide tool material
For heading dies and punches.

FH-6.
M-1699, Sintered carbide tool material.
For heading dies and punches.

F.I. 20 STEEL.
M-521, 0.06 C, 0.3 Si, 0.7 Mn, 21 Cr, bal Fe.
Heat treated: 72,000 TS; 55,000 YS; 34 El; 60 RA; 175 Brin.
For corrosion resistant parts; corrosion resistant.

FIELD.
Eng.; 10 Si, 3 Cu, 1.5-2 Al, bal Ni.
For corrosion resisting parts; stainless and corrosion resistant.

FIELD ROLLED.
Eng.; 60 Ni, 29 Fe, 20 Mo.
Stainless and corrosion resistant.

FIFTEEN PER CENT.
Eng.; 56.66 Cu, 28.33 Zn, 15 Ni.
For ornamental parts; corrosion resistant.

FIFTY-FIVE.
M-800; 2.9-3.1 C, 1.2-1.5 Ni, 0.4-0.6 Mo, 1.4-1.6 Si, bal Fe.
Cast: 55,000-62,000 TS.
For hydraulic press and diesel engine parts; cast iron.

FILBRITE.
Eng.; C, 17 Cr, 35 Ni, bal Fe.
For heat and corrosion resisting parts; stainless and corrosion resistant.

FILE BRONZE.
U.S.; 18-31 Sn, 7-8.5 Pb, 0-10 Zn, bal Cu.
For plumbing, hardware; free-cutting.

FILE METAL (GENFER).
64.6-62.0 Cu, 18-20 Sn, 10 Zn, 7.6-8.0 Pb.
For nail file; free-cutting.

FILE METAL (VOGEL).
51-73 Cu, 19-28.5 Sn, 0-7 Zn, 7.0-8.5 Pb.
For nail file; free-cutting.

FILIPOFF LEAD-CALCIUM.
1.37 Cu, 1.9 Ca, 1.0 Sr, 1.1 Ba, 0.1 Na, bal Pb.
For bearings; anti-friction.

FILNIC K.
M-44; Al-Ni.
For filaments; heat resistant.

FILNIC M.
M-44; 45 Co, 55 Ni.
For filaments, heat resistant.

FIL-SODER.
M-66, Sn-Pb
For solder for Al, no flux required

FINE SILVER
M-63, 99.9 Ag
Hard 41,000 TS; 30,000 YS; 3 El.
Annealed: 23,000 TS; 10,000 YS, 35 El, 38 RA
For jewelry, alloys; M.P. 1761°F.

FINIS
M-485; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tools and cutters; high speed steel.

FINISHING SPECIAL.
M-85; C, Cr, W, bal Fe.
For tools

FINKL COLD-HOT.
M-55, 0.9 C, 0.7 Cr, 0.2 Mo, 0.5 Ni, bal Fe.
For cold and hot trimming dies; heat resistant; tough.

FINKL CUPRODIE.
M-55, 0.55 C, 0.8 Mn, 1.55 Ni, 0.95 Cr, 0.3 Mo, 0.75 Cu, bal Fe.
Pre hardened (as required) from 37-50 Rc
Mech. prop. depend on hardness.
For hammer dies, forging press dies, drop hammer dies. Resists heat checking.

FINKL DC
M-55; 0.37 C, 0.4 Mn, 1.0 Si, 5.2 Cr, 1.4 Mo, 0.95 V, bal Fe. Vacuum electric furnace degassed.
As Ann: 229 Brin.
For die casting dies for Al, Mg, Zn, lead and tin base alloys; for plastic mold dies.
AISI Type H 13 Hotwork steel.

FINKL FS.
M-55, 0.55 C, 0.75 Mn, 0.27 Si, 1.0 Ni, 1.0 Cr, 0.3 Mo, bal Fe. Vacuum degassed.
FS is the annealed condition, see Finkl FX for prehardened condition.
For forging dies and other hotworking tools.

FINKL FX.
M-55; 0.55 C, 0.75 Mn, 0.27 Si, 1.0 Ni, 1.0 Cr, 0.3 Mo, bal Fe. Vacuum degassed.
FX is prehardened condition of Finkl FS. Hardness as ordered.
Mech. prop. vary with hardness.
Good high temperature properties.
For hammer dies, press dies, sow blocks, punchers, headers, and other hot work tools.

FINKL HB.
M-55; 0.52 C, 1.2 Mn, 0.27 Si, 0.65 Cr, 0.09 S, 0.20 Mo, bal Fe.
Prehardened: C 28-34 Rock (or as required).
For holder blocks, forging and extrusion dies, die casting and plastic molding dies.
Prehardened. Good machinability.

FINKL MD.
M-55; 0.32 C, 0.80 Mn, 0.52 Si, 1.7 Cr, 0.4 Mo, bal Fe.
Prehardened. C 28-34 Rock. Vacuum degassed.
For zinc die casting dies, plastic molds.
Prehardened; Type P20 Tool steel.

FINKL W4X.
M-55; 0.37 C, 0.45 Mn, 1.0 Si, 5.0 Cr, 1.45 Mo, 0.35 V, 1.25 W. Vacuum degassed.
Annealed or hardened as required, 37 to 46 Rc.
For forging press dies, inserts, extrusion press rams, liners, forging machine headers
AISI Type H-12 Hot work steel.

FINKL WF.
M-55, 0.35 C, 0.55 Mn, 0.5 Si, 0.65 Ni, 2.40 Cr, 0.72 Mo, bal Fe.
Prehardened, as required, from 28 to 50 Rc
Mech prop depend on hardness.
For hammer dies, press dies, punches, headers, gripper dies, insert dies, sow blocks.

FIREARMOR "A."
M-184, 65 Ni, 15 Cr, 1.75 Mn, 0.5 C, 1.0 Si, bal Fe.
Cast: 60,000 TS; 46,000 YS; 2.9 El; 1.2 RA; 190 Brin.
For carburizing boxes; heat and abrasion resisting.

FIREARMOR B.
M-184; 15 Cr, 60 Ni, 0.5 C, 1.7 Mn, 1.2 Si, bal Fe.
Cast. 62,000 TS, 33,000 YS, 1.5 El; 3.0 RA; 200 Brin.
For furnace parts, grates, heat resistant.

FIREDIE.
M-35; 0.35 C, 5 Cr, 0.45 Mn, 0.45 V, 1.4 Mo, 1.0 Si, bal Fe
For hot work dies, die casting dies; hot work die steel.

FIREDIE 13.
M-35; 0.38 C, 1.4 Mo, 5.2 Cr, 1.05 V, 1 Si, bal Fe.
Ht. Tr.: 285,000 TS, 225,000 YS, 4 El, C 54 Rock.
For hot extrusion tools and die casting dies for Al, Mg and Zn alloys.
Hot work tool steel type H13, tough, shock resistant.

FIREDIE 13 SMOOTHCUT.
M-35; 0.38 C, 1 Si, 1.4 Mo, 5.2 Cr, 1.05 V, sulphides, bal Fe
Ht. Tr.. 286,000 TS; 226,000 YS; 3 El; C 54 Rock.
For hot sizing dies for forming titanium alloys, hot extrusion and die casting dies, scroll shear dies.
Free machining, oil hardening.
Hot work steel type H13.

FIREX.
M-40; 0.40 C, 4.5 Ni, 1.10 Cr, 0.3 Si, 0.6 Mn, bal Fe.
For cutting tools, hot shears, shock resisting tools, chisels; air or oil hardening.

FIREX SPECIAL.
M-40; 0.40-0.55 C, 0.4-1.0 Cr, 2.75-4.0 Ni, 0.4-0.9 Mn, 0.15-0.20 V, 0.4-0.7 Mo, bal Fe.
For tools, dies, punches; shock resistant, tough.

FIRINIT.
M-381.
For welding and soldering rods.

FIRMINY A.C.M.
M-1043; 0.55 C, 1.4 Ni, 0.6 Cr, 0.4 Mo, 0.1 V, bal Fe.
For forging dies; oil hardened.

FIRMINY A.D.F.
M-1043; 0.28 C, 3.5 Ni, 1.1 Cr, bal Fe.
For gears, bolts, crankshafts, machine tool parts; oil hardened, tough.

FIRMINY A.D.F.M.
M-1043; 0.30 C, 1.3 Cr, 3.5 Ni, 0.4 Mo, bal Fe.
For forging dies, crankshafts; oil hardened, tough.

FIRMINY A.L.S.
M-1043; 1.45 C, 5.5 W, 0.55 Cr, 0.5 V, bal Fe.
For header dies, engraving tools; oil hardened.

FIRMINY A.M.3.
M-1043; 0.35 C, 1.1 Mn, bal Fe.
For gears, bolts, crankshafts; oil hardened, tough.

FIRMINY B.L.N.
M-1043; 0.28 C, 10 W, 3 Cr, 0.3 Mo, 0.6 V, bal Fe.
For hot work tools and dies, extrusion rams, punches; hot work tool steel; Z28WCDW10.

FIRMINY B.O.L.
M-1043; 0.38 C, 4.2 W, 3.4 Cr, 0.6 Mo, 1.0 V, bal Fe.
For hot work tools and dies, punches, extrusion rams; hot work tool steel, 38WCDV42.

FIRMINY B.T.R.
M-1043; 0.35 C, 4.7 Ni, 0.35 Cr, 1.15 Mo, bal Fe.
For forging and plastic mold dies, oil hardened.

FIRMINY C.L.D.
M-1043; 0.9 C, 1.5 Cr, bal Fe.
For bearings, dies; oil hardened, wear resistant.

FIRMINY C.M.Y.1.
M-1043; 0.50 C, 1 Cr, 0.25 Mo, bal Fe.
For bolts, gears, crankshafts; oil hardened, tough.

FIRMINY C.M.Y.2.
M-1043; 0.35 C, 1 Cr, 0.25 Mo, bal Fe.
For bolts, gears, crankshafts, oil hardened, tough.

FIRMINY C.M.Y.4.
M-1043; 0.25 C, 1 Cr, 0.25 Mo, bal Fe.
For bolts, gears, crankshafts, machine tool parts; oil hardened, tough.

FIRMINY C.M.Y.5.
M-1043; 0.20 C, 1 Cr, 0.25 Mo, bal Fe.
For crankshafts, machine tool parts; case hardened, tough.

FIRMINY C.M.Y.6.
M-1043; 0.12 C, 0.5 Cr, 0.5 Mo, bal Fe.
For machine tool parts, cams; case hardened, tough.

FIRMINY C.M.Y.7.
M-1043; 0.08 C, 1 Cr, 0.25 Mo, bal Fe.
For machine tool parts, cams, camshafts; case hardened, tough.

FIRMINY C.M.Y.16.
M-1043; 0.13 C, 5.5 Cr, 0.6 Mo, bal Fe.
For oil refinery equipment; creep resistant.

FIRMINY C.N.W.
M-1043; 0.38 C, 3 W, 2.5 Cr, 0.7 Mo, 0.25 V, bal Fe.
For pneumatic tools, chisels, upsetting dies; oil hardened.

FIRMINY C.R.V.
M-1043; 1.5 C, 1.8 Cr, 0.25 V, bal Fe.
For bearings, dies; oil hardened, wear resistant.

FIRMINY C.T.
M-1043; C, alloy, bal Fe.
For machine tool parts; oil hardened.

FIRMINY C.T.N.2.
M-1043; 0.10 C, 2 Ni, bal Fe.
For camshafts, cams, fasteners; case hardened, tough.

FIRMINY C.T.N.6.
M-1043; 0.10 C, 6 Ni, bal Fe.
For hobbing dies.

FIRMINY C.T.N.C.4
M-1043; 0.16 C, 1.8 Cr, 1 Ni, 0.1 Mo, bal Fe.
For cams, camshafts; case hardened, tough.

FIRMINY C.T.N.C.5.
M-1043; 0.10 C, 1 Ni, 1.4 Cr, 0.1 Mo, bal Fe.
For machine tool parts; case hardened, tough.

FIRMINY C.T.N.M.
M-1043; 0.10 C, 1.2 Ni, 0.12 Mo, 0.10 Cr, bal Fe
For gears, bolts, fasteners, cams; case hardened, tough

FIRMINY C.T.N.V.
M-1043, 0.10 C, 3 Ni, 0.3 Cr, bal Fe.
For camshafts, cams, gears, fasteners; case hardened, shock resistant.

FIRMINY C.V.A.1.
M-1043; 0.50 C, 1 Cr, 0.15 V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

FIRMINY C.V.A.2.
M-1043; 0.4 C, 1 Cr, 0.15 V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

FIRMINY C.V.A.3.
M-1043; 0.30 C, 2.5 Cr, 0.2 V, bal Fe
For oil refinery equipment; creep resistant.

FIRMINY C.V.A.4.
M-1043; 0.3 C, 1 Cr, 0.15 V, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

FIRMINY C.V.A.6.
M-1043; 0.18 C, 1 Cr, 0.1 V, bal Fe.
For gears, bolts, camshafts; case hardened, shock resistant

FIRMINY C.V.A.7.
M-1043; 0.12 C, 1 Cr, 0.1 V, bal Fe.
For gears, bolts, camshafts; case hardened, shock resistant.

FIRMINY C.W.2.
M-1043; 0.55 C, 1.8 W, 1 Cr, 0.9 Si, bal Fe.
For header dies; oil or water hardened.

FIRMINY C.W.3.
M-1043; 0.45 C, 1.8 W, 1 Cr, 0.8 Si, bal Fe.
For header dies; water or oil hardened.

FIRMINY F.C.K.
M-1043; 1.9 C, 13 Cr, bal Fe.
For blanking and forming dies; oil or air hardened.

FIRMINY F.G.O.
M-1043; 2 C, 3.75 W, bal Fe.

FIRMINY G.R.N.
M-1043; 0.42 C, 2 Si, bal Fe.
For machine tool parts; heat resistant.

FIRMINY ICN001.
M-1043; 0.11-0.16 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 35 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302; stainless, austenitic.

FIRMINY ICN164.
M-1043; 0.12 C, 18-19 Cr, 10-12 Ni, 2.5-3.5 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, mixers; Type 316 and 317; stainless, austenitic.

FIRMINY ICN164T.
M-1043; 0.12 max C, 18 Cr, 10 Ni, 2.5 Mo, Ti, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, mixers; Type 316; stainless, austenitic.

FIRMINY ICN472.
M-1043; 0.08 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
For chemical plant equipment, tanks, mixers; Type 304; stainless, austenitic.

FIRMINY ICN472T.
M-1043; 0.08 max C, 18 Cr, 8 Ni, Ti, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, tanks mixers; Type 321; stainless, austenitic.

FIRMINY ICN583.
M-1043; 0.05 max C, 18 Cr, 8 Ni, bal Fe.
Annealed 85,000 TS; 35,000 YS; 60 El, 70 RA; 150 Brin
For chemical plant equipment, tanks, mixers; Type 304, stainless, austenitic.

FIRMINY L.F.
M-1043, 1.15 C, 0.7 Cr, bal Fe
For bearings, cutters, dies; oil or water hardened, wear resistant.

FIRMINY M.12A.F.Y.
M-1043; 1 C, 12 Mn, bal Fe.
For wear resistant parts; wear and abrasion resistant

FIRMINY M.14A.F.Y.
M-1043, 1.2 C, 14 Mn, 1.5 Cr, bal Fe.
For wear resistant parts; wear and abrasion resistant

FIRMINY M.A.S.
M-1043, 0.38 C, 1.2 Mn, 1.2 Si, bal Fe.
For machine tool parts; tough.

FIRMINY M.C.R.1.
M-1043; 0.45 C, 0.9 Cr, 0.7 Mn, bal Fe.
For machine tool parts, gears; oil or water hardened.

FIRMINY M.C.R.2.
M-1043; 0.35 C, 0.9 Cr, 0.7 Mn, bal Fe.
For machine tool parts, gears; oil or water hardened.

FIRMINY M.C.R.3.
M-1043; 0.15 C, 0.9 Cr, 1.2 Mn, bal Fe.
For camshafts, cams, bolts; case hardened, tough.

FIRMINY M.C.R.4.
M-1043; 0.17 C, 0.8 Cr, 0.7 Mn, bal Fe.
For camshafts, cams, gears; case hardened, tough.

FIRMINY M.C.R.5.
M-1043; 0.10 C, 0.8 Cr, 0.7 Mn, bal Fe.
For camshafts, cams, machine tool parts; case hardened, tough.

FIRMINY M.L.
M-1043; 0.92 C, 1.3 Mn, 0.5 Cr, bal Fe.
For punches, blanking and forming dies; oil hardened, non-deforming

FIRMINY N.2.
M-1043; 0.28 C, 2 Ni, bal Fe.
For gears, bolts, fasteners, oil hardened, tough.

FIRMINY N.3.
M-1043; 0.28 C, 3 Ni, bal Fe.
For gears, bolts, fasteners; oil hardened, tough.

FIRMINY N.5.
M-1043; 0.28 C, 5 Ni, bal Fe.
For gears, bolts, fasteners, machine tool parts; oil hardened, tough.

FIRMINY N.C.1.
M-1043, 0.4 C, 2.8 Ni, 0.7 Cr, bal Fe
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant.

FIRMINY N.C.2.
M-1043; 0.3 C, 2.8 Ni, 0.5 Cr, bal Fe
For machine tool parts, bolts, gears; oil hardened, shock resistant.

FIRMINY N.C.3.
M-1043, 0.25 C, 2.8 Ni, 0.5 Cr, bal Fe.
For machine tool parts, bolts, gears, oil hardened, shock resistant

FIRMINY N.C.4
M-1043; 0.18 C, 2.8 Ni, 0.5 Cr, bal Fe.
For camshafts, cams, gears, case hardened, tough.

FIRMINY N.C.M.2.
M-1043, 0.32 C, 2.6 Ni, 0.7 Cr, 0.6 Mo, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant.

FIRMINY N.C.M.4
M-1043; 0.16 C, 2.9 Ni, 0.45 Cr, 0.3 Mo, bal Fe.
For machine tool parts, cams, case hardened, shock resistant

FIRMINY P.F
M-1043, 0.14 C, 4 Ni, 0.9 Cr, bal Fe
For camshafts, cams, gears, fasteners, case hardened, shock resistant .

FIRMINY P.F.3
M-1043; 0.10 C, 3.5 Ni, 0.6 Cr, bal Fe
For camshafts, machine tool parts, gears; case hardened, shock resistant.

FIRMINY S.A.M.
M-1043; 1.15 C, 1.9 W, 0.45 Cr, bal Fe.
For heading dies; oil hardened.

FIRMINY T.R.D.
M-1043, 1.3 C, 0.8 W, 0.5 Cr, bal Fe.
For cutters, dies; oil hardened.

FIRMINY T.S.W.
M-1043; 0.42 C, 2 Si, 0.4 W, bal Fe.
For machine tool parts; heat resistant.

FIRMINY V.D.L.
M-1043; 0.14 C, 5.5 Ni, 1.5 Cr, bal Fe.
For camshafts, cams, gears, bolts; case hardened, shock resistant.

FIRMINY V.D.L.D.
M-1043; 0.35 C, 3.8 Ni, 1.5 Cr, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

FIRST QUALITY.
M-363; 0.8-1.2 C, bal Fe.
For tools, punches, dies; water hardening.

FIRTH.
M-56; 1.05 C, 0.22 Mn, bal Fe.
For tools, dies, taps, drills; water hardened.

FIRTH 16-25-6.
M-57; 0.08 C, 17 Cr, 25 Ni, 6 Mo, 0.15 N, bal Fe.
Rolled: 115,000 TS; 60,000 YS; 35 El; 50 RA; 201 Brin.
Cold drawn: 150,000 TS; 120,000 YS; 19 El; 40 RA; 300 Brin.
For jet engine components, fasteners, bolts; ductile, high temperature uses to 1300°F.

FIRTH 19-9DL.
M-57; 0.28-0.35 C, 18-21 Cr, 8-11 Ni, 1.5 Mo, 1.4 W, 0.50 Cb, 0.4 Ti, 1.2 Mn, bal Fe.
Hot rolled: 118,000 TS; 69,000 YS; 58 El; 55 RA; 216 Brin.
At 1000°F: 89,000 TS; 42,000 YS; 43 El; 52 RA.
For turbine wheels, bolts, turbo superchargers; high temperature uses to 1200°F.

FIRTH 19-9DX.
M-57; 0.3 C, 19 Cr, 9 Ni, 1.5 Mo, 1.2 W, 0.55 Ti, bal Fe.
Hot rolled: 118,000 TS; 69,000 YS; 58 El; 55 RA; 216 Brin.
At 1000°F: 89,000 TS; 42,000 YS; 43 El; 52 RA.
For jet engine fasteners; high temperature uses to 1200°F.

FIRTH A-286.
M-57; 0.05 C, 1.35 Mn, 15 Cr, 26 Ni, 1.2 Mo, 2 Ti, 0.3 V, bal Fe.
Rolled: 135,000-160,000 TS; 85,000-115,000 YS, 20-30 El; 30-55 RA.
For gas turbine discs, jet engine components; austenitic, heat treatable.

FIRTHAG.
M-56; 0.45 C, 0.90 Mn, 0.95 Cr, 0.25 Si, bal Fe
For punches, gears, bolts; Brit, EN18.

FIRTH A.H.G.
M-56; 0.25-0.32 C, 0.3-0.6 Mn, 4-4.5 Ni, 1-1.5 Cr, bal Fe.
Air-hardened: 224,000-280,000 TS; 190,000-238,000 YS; 17 El; 20 RA; 444 Brin.
For gears, driving pinions, timing wheels; shock resisting "Firth-Brown E-84", "Atlas AHNC."

FIRTHALOY.
M-54; W.C.
For wire drawing and extrusion dies; cemented tungsten carbide.

FIRTH "A.W."
M-56; 1.20 C, 0.25 Mn, bal Fe.
For tools, cutters; water hardening.

FIRTH-BROWN 20CF.
M-56; 0.20 C, 0.35 Si, 0.9 Mn, bal Fe
For gears, shafts; case hardening.

FIRTH-BROWN 30CF.
M-56; 0.3 C, 0.35 Si, 0.9 Mn, bal Fe.
For gears, shafts; water hardening.

FIRTH-BROWN 40CF.
M-56; 0.42 C, 0.4 Si, 0.8 Mn, bal Fe.
For gears, shafts; water hardening.

FIRTH-BROWN 50CF.
M-56; 0.52 C, 0.4 Si, 0.8 Mn, bal Fe.
For gears, shafts; water hardening.

FIRTH BROWN 50CT.
M-56; 0.48 C, 0.25 Si, 0.70 Mn, bal Fe.
For streetcar and railway wheel tires; water hardened.

FIRTH BROWN 60CT.
M-56; 0.60 C, 0.25 Si, 0.70 Mn, bal Fe.
For streetcar and railway wheel tires; water hardened.

FIRTH BROWN 65CF.
M-56, 0.65 C, 0.35 Si, 0.70 Mn, bal Fe.
For machine tool parts, springs; water hardened.

FIRTH BROWN 65CT.
M-56; 0.65 C, 0.25 Si, 0.70 Mn, bal Fe.
For streetcar and railway wheel tires; water hardened.

FIRTH BROWN A-1.
M-56; 0.12-0.15 C, bal Fe.
54,000-63,000 TS.
For case-hardened railway and general forgings; case-hardening steel.

FIRTH BROWN A-2.
M-56; 0.22-0.26 C, bal Fe.
63,000-72,000 TS.
For marine shafting, boiler drums, crank axles, high pressure reaction chambers; water hardened.

FIRTH BROWN A-3.
M-56; 0.28-0.32 C, bal Fe.
69,500-78,500 TS.
For boiler drums, locomotive piston rods, marine shafting, gears, rotors, shafts; water hardened.

FIRTH BROWN A-4.
M-56; 0.32-0.40 C, bal Fe.
78,500-89,600 TS.
For mine shafting, locomotive crank pins, shafts, rotors; water hardened.

FIRTH BROWN A-5.
M-56, 0.40-0 50 C, bal Fe.
89,000-112,000 TS.
For turbo-electric disks, shafts, rotors, locomotive crank pins; oil hardened.

FIRTH BROWN A-6.
M-56; 0.55-0 65 C, bal Fe.
100,800-123,000 TS.
For die blocks; oil hardened.

FIRTH BROWN A 7
M-56; 0.60-0.70 C, bal Fe.
134,000-157,000 TS.
For diesel engine cylinder liners, forged rings for ball mills, oil hardened.

FIRTH-BROWN ANC1.
M-56; 0.3 C, 0.45 Mn, 4 25 Ni, 1.25 Cr, bal Fe.
For shafts, gears, formerly "Brown ATG."

FIRTH-BROWN ANC2.
M-56, 0.4 C, 0.5 Mn, 3.5 Ni, 1.6 Cr, bal Fe.
For shafts, gears; formerly "Brown ATG."

FIRTH-BROWN ANCM.
